## THE ISLANDS OF SPITZBERGEN

It is believed that the bill before congress pertaining to "extra-territorial deposits of phosphate, etc.," but which in reality would apply American sovereignity to the islands of Spitzbergen, will not pass at this session. The lands involved, and on which are located extensive deposits of bituminous coal, in which John M. Longyear, of Marquette, Mich., and associates are interested, have been in progress of examination and exploitation for the past six years and shipments have already been made. The deposits are understood to contain a large tonnage and the coal is said to be of very high grade, approximating in steam quality the Pocahontas coal of the United States.

The bill, introduced by Senator Lodge, of Massachusetts, and which passed the senate early in January, proposes to attach to the jurisdiction of the United States these islands and to confirm the claim of the Longyear interests to the areas held by them. The measure is now pending in the house. According to Washington advices it is believed the legislation has little prospect of being enacted, at least at the present session.

In his annual message to congress President Taft referred to the operations of the American mining interests in Spitzbergen and called attention to the fact that the United States would be represented at an international conference to be held at Christinia, Norway, to consider the status of the islands. It was stated that the government would participate only on the understanding that American vested rights would be recognized. As this conference is to be held within the near future, it is stated to be the belief of the house committee on foreign affairs that the Lodge bill should not be put through pending the outcome of the meeting of the Norwegian capital.

At present Spitzbergen is "no man's land." No nation has ever claimed title to it. Described as "rocky, barren and snow-clad islands, lost in the solitudes of the Arctic ocean," the region contains no permanent population. Years ago it was the rendezvous of whalers. No flag was there and no law prevailed, and bloody battles between sailors took place Compared with Porto Rico, Spitzbergen is about three times as large. The islands have a total area of 15,200 square miles, or approximately twice that of New Jersey and about 3,000 square miles greater than that of Maryland. The region lies nearly 500 miles north of the northern extremity of Norway, and its open and working season covers but three months of the year.

Spitzbergen is easy of access in the summer time; the sun shines brightly, and the temperature has been known to rise above 80 degrees. There is but the shallowest of soil, still the Longyear miners have been able to raise in boxes a few vegetables, such as lettuce and other quick-growing plants. This year it is planned to transport shiploads of soil to the islands. The deepest shaft at the mines is down 800 feet, but even at that depth frost is encountered. Despite the cold, men are kept in the region all winter and are able to work beneath the surface. The constant presence of frost eliminates mine damp. An unprotected light can be used, and there is no such thing as an explosion.

The corporation controlled by Mr. Longyear and his associates is known as the Arctic Coal Co. Last summer the working force aggregated 130 men. This winter 50 have been retained to continue the underground work. In the summer two steamships controlled by the company ply between Norway and the coal mines, carrying in supplies and taking out coal, which finds a ready market in Europe.—Mining World.

## KING OPENS PARLIAMENT

King Edward opened parliament in state last Monday in London. Hundreds of thousands of Londoners and thousands of visitors from the country thronged the streets of the capital and around Westminster in particular.

Two regiments of Life Guards were drawn up, with bayonets fixed, to guard the line of route.

King Edward was accompanied by Queen Alexandra, and arrived at Westminster in his state coach when the royal couple were met with a salute of 41 guns.

The king's speech seems to have disappointed many old country people, who evidently expected a direct and definite indication of His Majesty's leanings for or against the Budget and other vital political questions of the day. King Edward is a diplomat, and his speech was guarded, as usual, on subjects that are for the people themselves to decide. The introduction of the king's speech dealt with the usual references to the friendly relatious existing between the various nations and England.

He referred at some length to the establishment of the South African Union and to the intention of the Prince of Wales to visit that country and open the first legislature of the Dominion of South Africa

## NEW DRY DOCK

A floating dry dock for Montreal, capable of accommodating vesseis of 20,000 tons, is the latest port equipment. It is understood that a considerable part of the capital for the dry dock will be provided by the Vickers, Maxim and Vickers company, one of the largest ship building concerns in Great Britain [illegible] dry dock and the [illegible] shipyard.

The British firm do not confine their activities to shipbuilding, and it is expected that they will operate the Montreal plant during the winter months, when navigation is at a standstill, for the output of railway supplies of various kinds.

## PANAMA CANAL

The grand total of canal excavation at Panama for the month of December was 2.811,681 cubic yards. This is 362,366 cubic yards more than the total for November, but 1,068,656 cubic yards less than the highest record, made in March, 1909. Of the grand total, 1,455,611 cubic yards was dry excavation, removed principally by steam shovels. The dredges removed 1,356,070 cubic yards, in addition to the amount pumped into Gatun dam by the suction dredges engaged on that work.

## DEEP MINING

The deepest coal seams mined in America lie above a depth of 2,200 feet; some of the coal mines in England are developing seams at a depth of 3,600 feet, while coal mining is carried on at a depth of about 4,000 feet in Belgium.

## PACHUCA

The mines of Pachuca, the latest of the large mining camps of Mexico to yield to the invasion of American capital, were discovered in 1551, and the "Xacal" and "Encino" mines soon after opened on the famous Rosario vein.

## B. C. COPPER'S LARGE PROFIT

The B. C. Copper company have just passed through the most profitable year in their history. The annual meeting of the company took place in West Virginia recently and the financial statement is now published.

The net profits for the past year were almost a quarter of a million, in spite of the fact that the plant was closed for three months early in 1909.

Also 132,556 shares of the New Dominion Copper company were acquired, and 1,312,246 pounds of copper stored. Copper was sold during the year for 13.08 cents per pound, against 13.5 the previous year.

The smelter plant will be enlarged this year and the payment of dividends resumed.

## TEN YEARS AGO

(From Boundary Creek Times of Feb. 26, 1900)

F. M. Munn came in from Eholt yesterday.

General Cronje, has surrendered unconditionally to Lord Roberts.

The mining machinery at the Sunset mine is almost installed.

Father Palmer is visiting Grand Forks this week, but will return on Saturday.

Massam & Laidlaw, of Spokane, made their first payment today on the Marguerite claim.

Geo. C. Fraser, late master mechanic for the B. A. C. at Ross- is visiting his old friend Harry Johns at the Sunset mine.

Within the past few days four stores have been robbed. G. S Watson, the A. H. Sperry Co., A. L. White and Greenwood Trading Co., are the losers.

## EDDY JUNIOR

Theodore Roosevelt Jr., son of former President Roosevelt, has just announced his engagement to Miss Eleanor Butler Alexander of New York. The news of the event was cabled to Colonel Roosevelt in Africa, and, although the announcement was a surprise, it is not feared that there will be any paternal displeasure. Mrs. Roosevelt has already approved of the engagement.

## KING EDWARD'S VILLA

The beautiful Villa Brazilian, at Posilippo, has been acquired by Sir Rennell Rodd, the British ambassador to Italy, on behalf of King Edward, who contemplates staying there at the end of March. King Edward and Queen Alexandra have been anxious for years past to obtain the villa, which commands a magnificent view of the Bay of Naples, for a holiday residence.

## NEW BANK AT MARCUS

Marcus, the gateway to West Kootenay, is now enjoying a period of enhanced prosperity which, primarily due to its greater importance as a divisional point on the Great Northern, has come of the better settled condition of the surrounding country, which is well adapted for ranching. Marcus is now putting up its first brick building, which is to house the First State Bank of Marcus.

## LESS CHINKS

The number of Chinamen employed in the Transvaal mines in January last was 11,534, in November there were but 3194 Colored miners increased from 190,152, to 190,968.

## SULTAN INSANE

A famous European alienist has been employed to examine the former Sultan, Abdul Hamid. Abdul is at Salonika, where it is reported he is slowly starving himself to death.

## TEN FEET EVERY DAY

The Greenwood-Phoenix tunnel is slowly but surely advancing into the mountain between here and Phoenix at the very respectable rate of 10 feet per day. The face of the tunnel is in over 400 feet, and at the present rate of progress the first ore body should be reached by the beginning of April. The compressor is working smoothly and every mining condition is favorable to the excellent work being done by the Superintendent, Duncan McIntosh, and his men.

## DIFFERENT MEN

Lieutenant Shackleton did not succeed in getting to the South Pole, he has got nearer to it than any predecessor. He has been received with great honor both in Great Britain and in this country. On the contrary, Commander Peary did get to the North Pole and he has been received coldly in both countries—In America because of his treatment of Cook and in England because he refused to allow an Englishman who accompanied him to within a degree of the pole to go any further. Shackelton, on the other hand, shared whatever honors he had freely with his companions. By apparently trying to hog the whole cake, Peary has practically got nothing.

## GEORGE WASHINGTON

Tuesday, February 22, was George Washington's birthday. Everywhere in the United States this day is celebrated, for Colonel Washington was their first president, and rightly named the father of his country. He was a typical specimen of the old English stock that settled the then British colonies and carved an empire out of the wilderness.

## NO. 7

There are 35 men at work on the No. 7 mine, near Greenwood. Work on the tramway and concentrator will commence as soon as the snow flies away.

## BISHOP WINS WARREN CUP

Last Tuesday night the finals for the Warren cup were played off at Greenwood Curling rink. The rival teams were neck and neck the entire evening until the last end, when Bishop's rink won in a sensational manner by 15 to 8. The rinks were as follows: E. W. Bishop, C. Summers, George Clerf and J. McCreath, Sr. E. R. Redpath, Dr. McLean, E. Russell and M. D. Macpherson.

## THE GERMAN ARMY

The peace strength of the German army has risen during the past year to 620,000 men of all ranks and 111,820 horses.

This does not include 456,398 reservists. Germany leads the world in aeronautics, and the last year has only confirmed her supremacy of the air. Her arial fleet consists of twelve dirigibles, systems Zeppelin, Parseval and Gross, while there are fifteen other dirigibles in private hands susceptible of being requisitioned to act in conjunction with her immense army.

## LATE HON. CORNWALL

The Hon. C. F. Cornwall, who died last week in St. Joseph's hospital, Victoria, was born at Ashcroft, Eng., 1836. He came to British Columbia in 1862, practicing law in the then active mining districts. He was a member of B. C.'s first parliament and was lieutenant-governor of British Columbia until 1886.

## STRUCK ORE

The ore body, for which search has long been made at the Copper [illegible] near Republic, has been found and is said to be of good value. E. L. Tate is manager.

Emperor William, of Germany, was laid up last week with a severe cold, and it is stated he knew nothing of the riots at Frankfurt.

THE CANADIAN BANK OF COMMERCE

Paid-up Capital, $10,000,000 Reserve, $6,000,000

DRAFTS ON FOREIGN COUNTRIES

Arrangements have recently been completed under which the branches of this Bank are able to issue Drafts on the principal points in the following countries:

## BOUNDARY POLICE

The year 1908 was one reign of terror for the Boundary. The towns of Greenwood, Grand Forks, Phoenix and Miday, with the smaller settlements of Carson, Cascade, Rock Creek, Myncaster, Bridesville, Sidley and Osoyoos, all close to the International Boundary line, were subject to holdups, robbery under arms, cattle stealing, petty thievery, and murder. After a series of daring exploits, the holding up of His Majesty's subjects, theft, cattle and horse stealing extraordinary, the series of border crimes culminated in the foul and dastardly murder of C. L. Thomet, a highly respected citizen and law-abiding good fellow, popular and extremely well thought of. That year crime was rife in this part of the country, merchants went armed in the less populated communities, no one was safe, money—the object of the marauders—if not forthcoming, was followed by murder. Then the provincial government in its astute wisdom sent us a man to clear the district of crime, gave him a free hand, made him the paramount head of the entire boundary line police and spent a few shekels, of the many we pay the government for protection, with a splendid result. The year 1909 saw no fresh crimes, but several convictions. The new chief has a mailed fist and used the above mentioned free hand with a deadly effect on crime and criminals. We all felt safe. Holdups ceased, robbery came to a short stop by a sentence of many years to the Newman brothers, cattle stealing became a byword, and we, who live on the outskirts of civilization, on a foreign frontier, at the gateways of B. C., were assured of a perfect system of police protection, our money, our lives secure, our cattle immune from the brand of the spoiler; and we owe this most satisfactory state of things not entirely to the allwise government, who sent us a most able man to cope with crime in our midst, but to the fact that that man was given a free hand, able lieutenants and several of them, and that he himself is held in wholesome awe and respect by the crook, who is run out of Spokane and by the undesirable who is wanted in the State of Washington to our south.

But the year of grace, 1910, to-wit, is another story. As yet but two of its twelve pages have been writ up, and it remains to be seen whether the same free hand and support will be given to our chief of provincial police as has been done in the past.

His small police force is scattered along the boundary, very many miles apart, too far apart to act together, and the chief officer, the official head, whose presence is often necessary at headquarters, but is more often necessary where the rogues foregather, should not be tied down here without a spare man to leave in charge. And yet we live at the gateway of B. C. Not only does the overflow of rough toughs from Washington affect the Boundary, but all B. C. If we have good men here to keep them out, to suppress crime on the frontier, there will be less need of provincials to guard our citizens up north. It is up to our B. C. authorities to see that C. J. Bunbury, the chief of provincial police in the Boundary district, is upheld and backed by the department, and that he has as many lieutenants as his needs require.

## THE WEATHER

Each year, when Autumn follows the few short days of the Boundary summer, we revel in the hope of an Indian summer, and warm, cozy Fall days, and, more often than not, September and October are something to write home about. But after months of winter's snow and cold, it is exasperating to have each week to delay the publication of the springtime effusions we receive, to deny ourselves the pleasure of printing pretty poems of Spring—all because winter has returned again and more snow and more cold is added daily to our list of disagreeable nesses. It's been cold, and is cold, and apparently the worst is not yet.

## EDITORIAL COMMENT

"Made in Germany," will be common in Canada soon. When the surtax is removed Canada will be once more invaded by German goods and bads.

There is an awful lot of kicking in the papers these days about the Income Tax in B. C., and the hardship it works on the average man. First find your income, then find your trouble. Neither bothers us.

The Manitoba legislature is considering a bill to license newsboys, and empowering any constable or teacher to search any boy under 16 for smoking materials. What a snap for teachers and policemen. Free tobacco at all times. We object. Editors should have the privilege of searching for smoking materials too—including matches.

# OUTLINES OF CURRENT EVENTS

A severe earthquake visited the island of Crete last Saturday.

The bill for the incorporation of Prince Rupert is now being printed.

The French South Pole expedition is on its way home from its quest of the South pole.

There was no Chinese New Year in Moyie, whose inhabitants will not tolerate a pig tail.

Los Angeles celebrated at Fiesta park last week, when the the annual automobile show took place.

The Czar of Russia unexpectedly visited his capital last week, driving unescorted in an open carriage.

The Russian Commission of defence are planning the expenditure of $500,000,000 extending over the next ten years.

The Patrick brothers who played with the Nelson hockey team last year, are playing for Port Renfrew this season.

The Alaska Steamship company's steamer, Yucatan, was lost last week in a collision with an iceberg, in Icy strait, Alaska.

The Earl of Desart is the third arbitrator agreed to by the U. S. and Venezuelan governments in their disputes submitted to the Hague.

Herbert John Gladstone, secretary of State for home affairs, recently appointed Governor General of British South Africa, has been elevated to the peerage.

The Mad Mullah is again on the warpath. With a big force of Devishes he has been killing and looting in the Sultanate of Mijertine, a British protectorate.

The Montreal Winter Carnival was not a success this year. Opposition of railroads, the typhoid epedemic and the disastrous thaw were the principle factors of failure.

The public schools of Columbus, Ohio, were dismissed last Saturday owing to there being 19 inches of snow in the streets. The children were unable to reach the buildings.

Cairo, Ill, was the scene last week of a mob of four hundred men, seeking the death of two negroes by Lynch law. The arrival of troops alone prevented the lynching.

Andrew Carnegie had a narrow escape from death last week, when his private car Olivet was side swiped by another train, in the train shed of the Pennsylvania Railroad at Pittsburg.

The Kaiser owns the pottery works at Cadiner. Apart from acting as managing director he he also contrives to stimulate the sale of his majolica ware among his friends and wealthy men.

Lhassa, the capital of Thibet, has been occupied by 2000 Chinese troops, supposedly for the purpose of abolishing the Thibetan council and establishing a purely Chinese government in Thibet.

Dr. R. Berl, of Vancouver, has been arrested for smuggling, at Blaine, Wash., having in his possession five beautiful pearls, which he had failed to declare and pay duty on when crossing the line.

The Toronto Saturday night recently published an exposure of the methods of one George H. Munroe, a get-rich-quick promoter of Toronto. So thoroughly was Munroe and his methods of fleecing the public shown up, that he was forced to leave Toronto for parts unknown. Saturday's [illegible] exposing similar methods on the part of oil companies in Alberta, and is opening the eyes of the investing public on this wild cat stock business. More power to their elbow.—Havelock Standard.

Owing to the death of Sir George Drummond, President of the bank of Montreal, the vacant position will, in all probability, fall to Sir Edward Clouston, Bart., and it is but natural to presume that the general managership of this great institution will be taken over by Mr. Meredith, who is next in the line of promotion. Mr. Meredith, who comes from an old Ontario family and who was born in London, Ont., and is a brother of Chief Justice Meredith, joined the staff of the Bank of Montreal in 1867, entered the service at Hamilton, Ont. In 1879 he became accountant at the main office in Montreal, and he has step by step worked his way to his present position.

Do you know that croup can be prevented? Give Chamberlain's Cough Remedy as soon as the child becomes hoarse or even after the croupy cough appears and it will prevent the attack. It is also a certain cure for croup and has never been known to fail Sold by all druggists and dealers.

## CIVIL WAR

Greek troops occupy Athens, the Greek capital, and are waiting to defend their chief city from threatened attack of the Greek Navy. This is a unique state of civil war.

There's a difference between dignity and pomposity, but some people don't seem to be able to realize it.

### MINERAL ACT

**Certificate of Improvements.**

NOTICE.

"Gem" and "Emerald" Mineral Claims, situate in the Greenwood Mining Division of Yale District. Where located: Long Lake Camp.

TAKE NOTICE that I, C. Æ. Shaw, agent for Spencer Bennerman, Free Miner's certificate No. B14423, and Fred Moser, Free Miner's certificate No. B14082, intend, sixty days from date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claims.

And further take notice that action under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 16th day of December, A. D. 1909.

32 C. Æ. SHAW, B. C. L. S.

### Dissolution of Partnership.

NOTICE Is hereby given that the copartnership heretofore subsisting between the undersigned as confectioners and tobacconists, etc., under the firm name of Holmes & Kennedy, Greenwood, B. C., has this day been dissolved by mutual consent. The business will hereafter be carried on by Fred B. Holmes, by whom all debts of the old firm will be paid, and to whom all outstanding accounts due the old firm must be paid.

Greenwood, B. C., February 19, 1910.

W. G. KENNEDY.
FRED B. HOLMES.

Witness: T. W. Hebbard.

### NOTICE OF SALE

Pursuant to an order of the Supreme Court of British Columbia, made in an action wherein Elise Wennerud is plaintiff, and Sivert Dahl is defendant, which was entered at the Registry Office at Greenwood, British Columbia, the 3rd day of February, 1910.

SEALED TENDERS Will be received up to two o'clock in the afternoon of the 25th day of February, 1910, by the Registrar of this Court, at Greenwood, B. C., for the purchase of the lands and premises, goods, chattels and effects of the partnership heretofore existing between the plaintiff and defendant, which are hereunder mentioned, the highest or any tender not necessarily accepted.

Any property not sold by tender will be offered for sale by Public Auction at the Court House at Greenwood, B. C., on Monday, the 28th day of February, 1910, by me, the undersigned.

The following is a description of the property to be offered for sale, viz.:

HOTEL PROPERTY.

Lots 6 and 7, block 15, of the Murray Subdivision of the Town of Midway, British Columbia, together with the Central Hotel and outbuildings thereon.

ALSO

The furniture, goods, chattels and effects now being therein, heretofore used in connection with the partnership premises.

FARM PROPERTY.

Lot 312 S, Group 1, in Osoyoos Division of Yale district, Province of British Columbia, containing 160 acres, situate on Nicholson creek, about four miles from Rock Creek, about 70 acres of which are under cultivation and fenced, together with three (3) log buildings and the hay and cattle sheds thereon.

ALSO

Three horses and 1 colt.
Thirty-head of mixed cattle,
Wagons and sleighs.
Farming implements of all kinds now being thereon.

Further particulars at sale, or upon application to C. J. Leggatt, solicitor for the plaintiff, Midway, B. C.

Terms of sale, cash.

Dated at Greenwood, B. C., the 3rd day of February, 1910.

JAMES S. BIRNIE, Auctioneer.

### MINERAL ACT.

**Certificate of Improvements.**

NOTICE.

"Paymaster Fractional" Mineral Claim, situate in the Greenwood Mining Division of Yale District. Where located: In Graham Camp, south of and adjoining Granada mineral claim.

TAKE NOTICE that I, George R. Naden, Free Miners' Certificate No. B27297, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under Section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 11th day of October, A. D. 1909.

28 GEORGE R. NADEN.

STOMACH LIVER LUNGS

Each of the chief organs of the body is a link in the Chain of Life. A chain is no stronger than its weakest link, the body no stronger than its weakest organ. If there is weakness of stomach, liver or lungs, there is a weak link in the chain of life which may snap at any time. Often this so-called "weakness" is caused by lack of nutrition, the result of weakness or disease of the stomach and other organs of digestion and nutrition. Diseases and weaknesses of the stomach and its allied organs are cured by the use of Dr. Pierce's Golden Medical Discovery. When the weak or diseased stomach is cured, diseases of other organs which *seem* remote from the stomach but which have their origin in a diseased condition of the stomach and other organs of digestion and nutrition, are cured also.

*The strong man has a strong stomach. Take the above recommended "Discovery" and you may have a strong stomach and a strong body.*

GIVEN AWAY.—Dr. Pierce's Common Sense Medical Adviser, new revised Edition, is sent *free* on receipt of stamps to pay expense of mailing *only*. Send 31 one-cent stamps for the book in paper covers, or 50 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

## Synopsis of Canadian North-West

### HOMESTEAD REGULATIONS.

ANY available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate. Entry by proxy may, however, be made on certain conditions by the father, mother, son, daughter, brother or sister, of an intending homesteader.

The homesteader is required to preform the conditions connected there with under one of the following plans;

1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal.—Coal mining rights may be leased for a period of twenty-one years at an annual rental of $1. per acre. Not more than 2,560 acres shall be leased to one individual or company. A royalty at the rate of five cents per ton shall be collected on the merchantable coal mined.

W. W. CORY,
Deputy of the Minister of the Interior.

N. B.—Unauthorized publication of this advertisement will not be paid for.

## MINES AND MINING

In a vicious fight at the 1,000-ft level of the Ready Bullion mine, near Treadwell, Joe Bakich, a Slavonian, struck John Harris, his helper, on the head with a drill. Harris' skull was crushed, and he is in a precarious condition. A deputy marshal from Juneau brought Bakich to jail. He declares the blow was struck in self-defence. The helper is too ill to make a statement.

A shut-down of all mining operations in the Butte district is threatened by reason of the action of a majority of the hoisting engineers in leaving their posts recently when concessions from the mineowners in the matter of jurisdictional disputes were not forthcoming. The men involved are members of International Union 138. Operations are continued in but four of the Amalgamated company's properties, the Silver Bow, the Berkey, the Mountain and the Buffalo.

A free milling gold property at Pearl Harbor, Alaska, and said to rival in possibilities the production of the Alaska-Treadwell mine, will be developed shortly by a Chicago group of capitalists as a result of a favorable report made two months ago by Col. Allan, of Chicago. The deal was negotiated by one of the principal owners, J. R. Stewart, of Victoria, and formerly a well known coal mining operator of Edmonton. The ledge is said to be high grade and to be traceable on the surface for over two miles. It will be developed by means of two long tunnels and a small stamp mill will also be installed this spring for the purpose of making experimental mill tests. The new company in which the property has been vested is the Alaska Consolidated and has a capitalization of $3,000,000.

Canada possesses three-fifths of the stores of nickel in the world. There are only two countries in the world that have any appreciable store of nickel—the Dominion and the French colony of New Caledonia. Both deposits are controlled by substantially the same organization—the International Nickel company, of New York. The Canadian deposits are incalculable, but millions of tons are lying in the earth because it did not suit the purpose of the trust to produce more than a limited amount each year. It is now urged that the nickel mines of this country should be taken over by the government. This, it is claimed, would give Great Britain an enormous advantage over all other countries in the construction of war ships and would insure for all time the material, which is the chief feature in the construction of modern battleships, would be preserved for Canada and the empire. Nickel is found in an ore that contains also a considerable proportion of copper. It was copper that was being searched for when the prospectors chanced upon the other and more valuable metal. That was less than 20 years ago, but in those days there was little demand for nickel, and vast quantities of valuable material were thrown aside as unsalable, but the case was entirely altered when the value of nickel as a steel alloy was discovered.

A few minutes delay in treating some cases of croup, even the length of time it takes to get a doctor oftens proves dangerous. The safest way is to keep Chamberlain's Cough Remedy in the house, and at the first indication of croup give the child a dose. Pleasant to take and always cures. Sold by all druggists and dealers.

## KHARTOUM IS READY

Although former President Roosevelt is not expected to arrive for two weeks, Khartoum is rapidly filling with visitors anxious to greet him. It is estimated that Khartoum will entertain the greatest crowd in its history when the distinguished American reaches there.

Manuel of Portland was recently snubbed by a chorus girl in a way that made him feel like a two-spot instead of a king.

## NOVA SCOTIA

From the East came wisdom, it is said; and the eastermost province of the Dominion, Nova Scotia, is showing its wisdom by "taking stock" of its forest resources with a view to inaugurating a businesslike system of managing them. This inventory was begun during the past summer (1909), and was under the charge of Dr. B. E. Fernow, dean of the faculty of forestry of the University of Toronto, who was assisted by the chief fire warden of the province and several trained foresters.

The southwestern part of the province, from Hants county westward, has been covered and it is expected that the survey will be completed during the coming summer.

To total area surveyed during the past summer was about 8,500 square miles. The cost was very low, averaging less than 20 cents per square mile.

Only a rough survey, or "reconnaisance," was attempted. Each member of the party was assigned a certain district and allowed considerable latitude in choosing a way to cover this to the best advantage. Time and expense were saved by utilizing existing records and information secured from well-informed persons, where these were found reliable, the field work consisting largely in checking the information thus obtained, studying, forest types, etc

This information was then plotted in the field directly on large scale maps (2 inches to the mile.) Among the points recorded were the extent of the burned areas, the degree of cutting on cut-over areas, the composition of the forest, the condition of the young growth or "reproduction" and the character of the farming lands, meadows, etc., within the farming country.

Dr. Fernow's report as to the possible future of the forest is interesting and encouraging. He remarks: "Although the data on reproduction and rate of growth are not yet collated, it is safe to say that, if the fires are kept out (and apparently with the present organization still further perfected this can be done reasonably well), there is no difficulty in restocking by natural means most of the cut-over areas, if not too severely culled.

* * * In the pure hemlock-spruce stands all that is necessary is to remove the old hemlock thoroughly and cleanly to have the young growth of spruce, already on the ground, take its place."

He thinks, however, that incorrect ideas are often held as to the growth of spruce. The white spruce may, he says, when growing in comparatively open situations, make a sawlog in sixty years. The forest spruce, which is mostly red spruce, is of slower growth, and will probably not average a sawlog in less than a hundred years.

To a large extent the differen species are found to be localized Thus the white pine is found most plentifully in Shelburne and part of Queen's, the hemlock in Annapolis, and the spruce in Digby.

Heretofore estimates of Canada's forest areas, the stands of timber thereon and of the country's forest resources in general have been very largely guesswork. The action of Nova Scotia takes prominence as the first attempt on any large scale to substitute accurate information for this uncertainty. While no doubt errors have crept in, the estimates are at least based upon exact knowledge; and that is far more than could be said of former estimates. It is to be hoped that other provinces of the Dominion will see fit, ere long, to follow Nova Scotia's example in this line of work.

While it is almost impossible to prevent an accident, it is never impossible to be prepared—it is not beyond any one's purse. Invest 25 cents in a bottle of Chamberlain's Liniment and you are prepared for sprains, bruises and like injuries. Sold by all druggists and dealers.

## AT THE CHURCHES

METHODIST — Rev. I. B. Hibbert will conduct services in the Methodist Church every Sunday. Morning, 11 a. m.; Sunday School, 3 p. m. Evening, 7:30,

PRESBYTERIAN—St. Columba. Services will be conducted morning and evening, 11 a. m. and 7.30 p. m. Sunday School 2.30 p. m. Rev. J. A. Petrie, minister.

CATHOLIC.—Church of the Sacred Heart.—Divine service 1st, third and fourth Sunday in each month. Holy mass at 10 a. m.; vespers and benediction at 7:30 p. m.; Sunday school at 2:30 p.m. REV. J. A. BEDARD, O. M. I. pastor.

CHURCH OF ENGLAND (St. Jude's)—Every Sunday, Morning and Evening. Matins, 11 a. m. Evensong, 7:30 p. m. Sunday school, 2.30 p.m. Holy Communion, 1st and 3rd Sundays at 8 a.m; other Sundays at 11 a. m.

Saints' Day services as announced in Church.

Rev. F Vernon Venables, Vicar.

**The People's Schoolmaster.**

If you want a clear and concise medical book—which is full of the most useful information for man or woman—order the People's Common Sense Medical Adviser, by R. V. Pierce, M. D. Treats of Anatomy, Hygiene, Medicine—a book of one thousand pages (new, fully revised, up-to-date edition) gives all particulars which men or women should know about themselves. How to correct ordinary derangements and weaknesses; treats of diseased conditions and the practical treatment theroof. Household hints and advice about the family—a chapter on Mother and Babe, etc.

This new edition is almost a household necessity. Send thirty-one one cent stamps for this handsome cloth bound book to Dr. R.V. Pierce, Buffalo, N. Y.

## TEDDY LOOKS GOOD

One Teddy Roosevelt seems to look pretty good to the newspaper editors of Oregon, Washington and Idaho, in fact to most of them west of the Mississippi river. A Chicago newspaper conducted a canvass of the editors west of the Aleghanies recently to find out their choice for president. The move was made to ascertain if Taft is still a favorite with the people [illegible] showed that Roosevelt is a favorite with 1,360 editors, while Taft trails with 1,093. In Oregon Taft got 14 votes and Roosevelt 32; in Washington Roosevelt 51, Taft 31; in Idaho Roosevelt fell behind Taft, the latter receiving 17 votes and Roosevelt 14.

## A BEAUTIFUL BOOK

Whether you are interested in fruit culture and its possibilities or not, if you are anything of a lover of the beautiful, write to E. F. Massam, Medford, Oregon, for an illustrated booklet on Medford, Oregon, and information regarding the wonderful resources of the Rogue River valley in southern Oregon. If the beautifully illustrated prospectus received by us is any criterion of the town's folk of Medford, or of the resources of the Rogue River valley, then that is the only place to live on earth.

## GERMAN RIOTS

More rioting has occurred at Frankfort-on-Main and a large number wounded on both sides. The mob stoned the police and used pepper with great effect. The police used their sabres and four civilians are in the hospital with mortal wounds.

**Allen's Lung Balsam** is warranted to cure the most distressing Cough.

## OVER 100 SLAIN

A despatch from the governor of Dakura, Senegal, says a French detachment has suffered heavy losses through an ambuscade in the Oudar region. A whole company, consisting of five french officers and 110 native soldiers were massacred.

Jim Jeffries was born April 15, 1875. Jack Johnson was born March 31, 1878.

## PORTLAND CANAL

W. T. Smith, perhaps better known by mining men as "Boundary" Smith, who has made and lost fortunes in various mining camps and who lately threw in his lot with the Portland Canal district is now in Spokane, Wash., interesting capital in a new venture in this camp.

At the present time there are six working properties in the camp, the Portland, Stewart, Portland Wonder and Main Reef on Glacier creek; the Bitter Creek group on Bitter creek and the Red Cliff on Lydden creek. Up on Salmon river the Edgecombe syndicate are working on the Alaskan side and it is generally reported that this last mentioned concern will undertake development within a short time on its holdings in in the camp.

A huge scow, purchased for the Red Cliff Mining Co., in Prince Rupert, was lost from the tow of the Otter a few days ago across Dixon entrance while it was being brought to Stewart. A heavy sea was encountered and the scow broke away. The Otter made a valiant attempt to pick it up again but this was impossible on account of the rough sea.

## TIRED OF LIFE

Abdul Hamid, former sultan of Turkey, attempted to commit suicide in Vienna by trying to strangle himself with a silk handkerchief. He was prevented from carrying out his purpose by a servant, and placed in a straight-jacket.

## SAVED HER HAIR

**Zam Buk Cured Scalp Eczema**

If you have eczema, ringworm or any scalp sore, do not permit your hair to be cut off without first trying Zam-Buk. Mrs. David Monteith, of [illegible] street, Norwood, Winnipeg, says: "My daughter contracted eczema of the scalp, and this broke out regularly for three years in succession. It would probably have been recurring yet each season had it not been for Zam-Buk. The eczema first started with an outbreak of little red, watery pimples, which turned into large sores. We consulted a medical man, and tried lotions, powders, salves and all kinds of things but in vain.

"Each time the disease appeared her hair had to be cut off. When this had been done three times a friend suggested that, as other things had failed I should try Zam-Buk, instead of again consulting a doctor and going through the old and ineffective programme. I acted on this advice, and obtained some Zam-Buk. Almost as soon as this was applied the child experienced relief. The itching and irritation seemed to be soothed, and in several places, after some days' treatment, there appeared marked signs of improvement so we thought we would not this time cut off the hair.

"We kept on applying Zam-Buk until in a few weeks it was very evident a complete cure was being effected, In the end all the sores were healed, the hair over the effected parts had grown again, and at the present time her scalp is healthy and quite free from every trace of sore or eczema." The same healing virtue is responsible for cure of ulcers, abscesses, running sores, cuts, cracks, scalds, burns, piles, abrasions, etc, For children's rashes there is nothing to equal Zam-Buk, as it is so pure. All druggists and stores at 50 cents box, or post free from Zam-Buk Co., Toronto, for price.

## FOUR COMETS

During the month of January, 1910, four comets were at one time in the heavens. The first of these is Halley's comet; the second Winnecke's, rediscovered at the Observatory de la Plata on October 31st by Poro; the third is Daniel's, and the fourth Inness'.

If troubled with indigestion, constiptation, no appetite or feeling bilious, give Chamberlain's Stomach and Liver Tablets a trial and you will be pleased with the result. These tablets invigorate the stomach and liver and strengthen the digestion. Sold by all druggists and dealers.

The pitcher that goes too often to the well has at least seen something of the world before the crash comes.

## BETWEEN TWO STOOLS

Once more the Kaiser has threatened the possible occupation of Dutch territory unless Holland takes steps to place itself in a state of defence against Great Britain. Holland is placed in a very awkward position, with Britain on one side and Germany on the other.

## A DEFENCE PROPOSAL

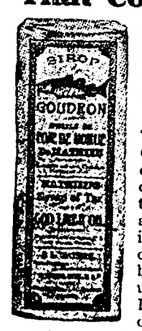
It is expected that Lord Kitchener will recommend a system to enable Australia to mobilise a great field force for Imperial purposes in the event of a menace to the Empire, without undermining her autonomy or formally enlisting men for Imperial service.

When a fellow feels like throwing himself down and worshipping a girl, he should wait. She will probably throw him down herself.

## SOMEWHAT PREVIOUS

A German pamphleteer has published a scheme for the division and distribution of the British Empire after it is conquered, which goes to show that the said Empire does not contain all the war fools in the world.

**Consumption May Follow That Cold.**



Colds are the beginning of most tubercular troubles.

Mathieu's Syrup of Tar and Cod Liver Oil arrests the disease, cures the cough, dissipates the cold, soothes and heals the inflamed and diseased tissue and builds the system up.

It is beyond all question the greatest cough and cold cure and system builder combined.

Large bottle 35 cts from all dealers.

**J. L. Mathieu Co. Props., Sherbrooke, P.Q.**

## TOWN TOPICS

It was 20 degrees below zero this week.

Jim McCreath has returned from Spokane.

Martha scared the night watchman at the Mother Lode one dark night this week.

D. R. Tait, the manager of the Kettle River Irrigated Fruit Land Co., has returned from Vancouver.

There is much counterfeit silver money being circulated in Greenwood these days. Better bite all you get.

The Ladies Aid of the Presbyterian church will meet at the house of Mrs. Kinney on Tuesday next at 2.30 p. m.

Mr. Davidson, of the wholesale firm of Smith, Davidson & Wright, Vancouver, paid a visit to Greenwood this week.

Married—At Greenwood, February 15th, John Franklin Potts to Minnie Thompson, of Seattle, by the Rev. J. A. Petrie.

The Electric Light Co. are busy thawing out mains and private water pipes, the result of Monday and Tuesday's severe cold snap.

Ed. Massam, one of the promoters of the Boundary Falls smelter, is now located at Medford, Ore., and is a member of the Rogue River Orchard Land Co.

Hon Joa, the chinaman arrested last week, in Wellington camp for inflicting a serious injury on Mike Mullen, during a rowdy evening, was remanded last Monday for eight days.

F. Arrah Snyder has resigned as consulting metallurgist for the Gilmore Mining & Smelting Co., of Chiapas, Mexico, and will be succeeded by his brother F. W. Snyder, of Pasadena, Cal.

P. W. George & Co., are moveing into their new city premises on the corner of Greenwood and Copper streets, known as the Hyde block. P. W. himself is working like a Trojan moving goods.

Alex Bloomfield drove in from Westbridge, on Wednesday evening last, with John McKenzie, who is seriously ill. He was taken to the hospital and it is feared is suffering from blood poisoning.

The Ice Carnival, advertised to take place at the rink on Tuesday last, was not the success it should have been. No doubt the intense cold of Monday and Tuesday nights kept most of the keen skaters away.

The Hockey match at the Mother Lode, last Friday, between the mine and the smelter teams, was a splendid game. Clean hockey, fine play, wonderful rooting, and a victory for the smelter by 8-6.

Don't forget to take in the big hockey match at the Rink tomorrow night, at 8 o'clock, Smelter vs. Mother Lode. This is the second game of the series, the first being won by the Smelter last week. Boost for—whoever you want to win.

The partnership which has existed for about 6 years between Messrs. F. B. Holmes and W. Kennedy has been dissolved. Mr. Holmes will continue to conduct the stationery business on Copper street. Mr. Kennedy will visit the coast cities for a while.

While taking a horse to water at Long lake last week, T. Stuart Palmer, of the Jewel mine, states that several trout came to the surface of the water hole. This is good news, and proof positive that the fish, put into the lake by the Kettle River Fish and Game Protective society, last fall, are doing well,

Two Greenwood curling rinks left on Wednesday for Phoenix to extirminate the Phoenician curlers, in the local Bonspiel. The Greenwood rinks are: Alex McDonald, K. C. B. Frith, C. Summers, Geo. Evans; J. S. Birnie, E. W. Bishop, Bert Logan, and H. McCutcheon. Phoenix however won the allcomers cup, defeating rinks from Grand Forks and this town. The Burns cup was played for yesterday. Our two local rinks were unfortunately drawn against each other.

### AT LOS ANGELES

Despite the order of Secretary of the Interior Ballinger, to the effect that all applications for land on the Yuma irrigation project would be considered "simultaneously" on the morning of March 1, the 150 persons who have been in line for five days waiting for the distribution of the 40-acre farms, have decided to hold their positions in line and and not chance a "grand rush" with later arrivals.

The Los Angeles land office, in a circular that is in the hands of the land seekers, said in part:

"The agents of the building in which the land office is situated will not permit anyone to remain in the building at night. As a consequence any line which may be formed prior to the date of opening will be formed on the street and will be under the supervision of the police department.

"The head of the line will be allowed to enter the building at an early hour on the morning of March 1 and the line formation will be maintained in the hall of the building until the last farm has been disposed of, the rule of 'first come first served' being strictly enforced."

As a result of the announcement, the landseekers took up their stations in the line early in the week and despite the rains, have held them day and night,

### IN THE HOUSE

The Penticton Railway bill, a Hill measure, was introduced today. It is for a line south from Penticton, connecting with the [illegible] Hill agents are very [illegible] Neil Mckay and other [illegible] members are making a strong fight to have the charter given only on condition that the dismantled six miles of the Kaslo-Slocan road be put in condition and operated. The matter will come up in the railway committee.

### WILL WORK DUNDEE

The Dundee mine at Ymir, after lying idle for ten years, will be reopened and operated as soon as snow goes, under the direction of C. W. Riley, on behalf of A. E. Rand, of New Westminster, who is largely interested in the property.

"Now McTavish, it,s like this; you've either to stop the whisky or loose your eyesight—and you must choose." "Ay weel, doctor, I'm an auld man noo, an' I was thinkin' I've seen aboot every thing worth seein'."

Anattack of grip is often followed by a persistent cough, which to many many proves a great annoyance. Chamberlain's Cough Remedy has been extensively used and with good success for the relief and cure of this cough. Many cases have been cured after all other remedies had failed. Sold by all druggists and dealers.

### FOR RENT

Three room furnished house. water and electric lights in the house, south of Capt. Swayne's, Silver street, we pay water rent, $15 per month.

Five room furnished house, water and electric light in house, south of Capt. Swayne's, Silver street, $21.50 per month. We pay water rent.

Three room furnished house, by Chas. Kinney's residence, electric lights and water, $15 per month. We pay water rent.

Residence property for sale on easy payments. A. L. WHITE.

### FOR SALE

About 7 tons of loose hay, 6 tons timothy, 1 ton grain hay.

Apply Fritz Haussner, Greenwood, or Fred B. Holmes.

### POSSIBILITIES

Fifty-four years ago seven French scientists investigated photography, and asserted that it could be never used for anything but still life, because an exposure lasting at least thirty minutes was necessary.

And yet the men who own kodaks today shrug their shoulders when the Los Angeles aviation meet is mentioned and declare that aeroplanes will never be of any commercial importance.

### REVOLT IN INDIA

A most serious revolt of the natives at Jagdalupur, India, is causing the British authorities much anxiety. Only 200 police were available for duty and it is feared that the troops ordered there will not arrive in time to prevent bloodshed. This is the most serious outbreak since the mutiny.

The telescope which is being installed in the Transvaal observatory will be the second largest in the British Empire. It will be 35 feet long and have an aperture 26 inches in diameter.
