THE ELKHORN MINE

Being Developed by Local Syndicate.

DIRECTORS APPOINTED

Forty Thousand Shares Purchased by Syndicate.

A local syndicate has secured control of the Elkhorn mine and began active mining operations last Wednesday under the direction of W. H. Jeffery, M. E., who has been appointed consulting engineer for the company. The Elkhorn is one of the oldest and best known of the high grade properties contiguous to Greenwood. It was secured by James Sutherland and Phil McDonald nearly three years ago and largely developed by them. Several carloads of high grade ore was shipped. Last spring a company was incorporated to acquire the property with a capitalization of $200,000, devided into $1 shares. One hundred thousand shares were placed in the treasury.

H. V. Fuller, Dr. J. E. Spankie, P. Welch, H. P. Dickinson, R. P. Williams, E. G. Warren and others purchased 20,000 shares of promoters' stock and 20,000 shares of treasury stock, and Messrs. Sutherland and McDonald retired from the active management of the property. A new board of directors was appointed as follows: President, Phil McDonald; vice-president, Jas. Sutherland; secretary-treasurer and manager, Dr. J. E. Spankie; directors; the above and H. V. Fuller, R. P. Williams, H. P. Dickinson, and E. G. Warren.

W. H. Jeffery, M. E., experted the property about six months ago and the following is taken irom his report.

"The formation or country rock of the district is a pyroclastic greenstone overlying the gray granites. The greenstone varies in depth, in many places the granites are exposed on the surface, forming bosses.

"The Elkhorn mine is developed by an incline shaft 142 feet in depth, following the vein as nearly as possible. At the 80-foot level of the shaft, a drift was run on the vein 80 feet to the west and 250 feet to the east, all in ore. Over $74,000 worth of ore has been stoped above this level to date. and the end of the ore shoot to the east is not yet reached. And by continuing the drift one thousand feet east to the end boundary line of the property, a large area of stoping ground can be opened up,

"The Elkhorn mine was started at the grass roots on the 9th day of December, 1902, with two men sinking the present shaft, and the force increased to 12 men on the 1st of May, 1903, and until the close down the mine was worked continuously in ore. Below the 80-foot level of the shaft, at the 132-foot level, drifts were run again on the vein 100 feet to the west and 150 feet to the east, all in ore in places 18 inches of solid ore is exposed. A little upraising and stoping has been done on this level merely to prove the ore bodies, which are most satisfactory and similar to the ore above on the 80-foot level.

"Three veins have been discovered on the property. Nos. 1 and 2 veins—known locally as the Elkhorn vein and the Providence vein, parallel each other in an easterly and westerly direction, pitching southerly, and are about 400 feet apart. No. 3 vein runs practically north and south, and pitches to the east. The ore consists of massive native silver, ruby silver, antimonial silver, galena, gray copper, and iron and copper pyrites in a quartz gangue.

"The richest native silver ever discovered in British Columbia has been found in the Elkhorn mine. Some fabulous assays have been taken. but the ore averages $20 in gold and from 160 to nearly 200 ounces in silver. very little sorting is required as the ore comes out massive and clean.

"The Elkhorn mine adjoins the Providence mine on the west, the Gold Bug on the east, the Spokane on the north. and the Coronation on the south. The Elkhorn and Providence mines are the largest shippers of high grade ore in Greenwood camp and have shipped the highest grade ore.

"The Elkhorn can be developed into a very large producing mine and a big dividend payer. The mine is proved beyond doubt, and it is only a matter of sinking and developing the immense ore shoots below, which are already exposed above by means of improved methods. Boundary creek flows through the west side of the property, where a concentrator can be erected at any time if so desired."

During most of the 1904 the price of antimony varied but little from 7 to 8¼ cents per pound for Cookson's, 6¼ to 6⅞ cents a pound for Hallett's ann 5⅝ to 6⅜ cents a pound for the United States, Japanese, French, Hungarian and Italian brands.

F. AUGUSTE HEINZE

Visits the Boundary District This Week.

PROMOTER AND LITIGANT

May Invest Money in Boundary Copper Mines.

F. Auguste Heinze was in the Boundary this week. The friend of the Amalgamated and of one Thomas Lawson of Boston was not here for the purpose of escaping any fighting. He has been fighting night and day for the last eight or nine years and he looks just as young and fresh as he did when he succeeded in flim-flamming the provincial government at Victoria. Mr. Heinzie almost became interested in the Boundary seven years ago. He owned the Columbia and Western charter, had succeeded in securing an enormous land grant from the provincial government and would have built the road had he succeeded in getting a cash subsidy from the Dominion government. But he didn't. The then owners of the V., V. & E. butted in, and in the row which followed the government passed up the subsidy. Then Heinzie saw a splendid opportunity to do up the C. P. R. and he couldn't resist the temptation. So he sold that corporation the Trail smelter, the railway and the railway and the railway charter for a few millions and afterwards sold for nearly a million more those portions of the smelter not specified in the origina bill of sale. He went back to Montana, fought the Amalgamated Copper company and several other institutions, became a politician and incidentally acquired sufficient fame to be noticed by the distinguished Thomas Lawson of Boston. And he is still young. As he climbed up mountain sides and down shafts and investigated drifts and glory holes he was as active as a schoolboy and looked almost as young.

Accompanying him was P. A. O'Farrell, the well known newspaper man. P. A. also enjoys the distinction of having appeared in Everybody's Magazine through the good offices of Thomas Lawson of Boston, but P. A. has been written up before, so he doesn't mind a little thing like that. There was also T. W. Leonard, one of Mr. Heinze's Butte attorneys. Mr. Leonard enjoyed the trip immensely. His official life is not a happy one. When at home he never knows when he has to start a new fight for his distiuguished client or when he has to resist the enemy. Heinze is the most resourceful litigant that has ever broken into American courts, and the Amalgamated is no slouch, either. So Mr. Leonard enjoyed his vacation in British Columbia. Mr. Fisher, a New York capitalist, was also a member of the party.

They arrived in Grand Forks early in the week and accompanied by G. A. McLeod of the McKinley mine, and H. W. Warrinuton, chief engineer of the Kettle Valley lines, they visited Franklin camp and the North Fork of the Kettle river. The McKinley mine was examined and Mr. Heinze was greatly impressed with the magnificent showing there. He will likely invest money in the property.

Phoenix was then visited and the Granby mines thoroughly examined. Mr. Hodges' special electric train, which has been kept busy this summer, hauling distinguished visitors through the miles of underground workings, was put into service and Mr. Heinze and his party saw ore bodies that eclipse anything that can be found elsewhere, even in Butte.

W. B. Hodges, O. B. Smith, and W. B. Wilcox, of Phoenix, G. A. McLeod and H. W. Warrington of Grand Forks escorted Mr. Heinzie and his party down to Greenwood, and after luncheon a special train was secured and Superintendent J. E. McAllister, Mine Foreman Karl Holman, and Geo. B. Paul showed them the Mother Lode.

FURTHER VIOLATIONS.

Evidently the board of license commissioners for the Boundary district is determined to still further violate the law, treat with contempt the instructions of the attorney-general, and disregard public opinion.

Along the line of the V., V. & E, between Midway and the international boundary line, three whiskey joints are being erected. Two of these are the property of the redoubtable Manley of Grand Forks and the third is owned by one Thomas, of Cascade, the gentleman who dispensed free whiskey in the interests of Geo. Fraser in the last provincial campaign, and who has since figured in one of the worst of the many license scandals with which the Boundaryhas been blessed. These joints are miles from a wagon road, are not intended to accommodate the traveling public. Their mission is to fill railway navvies with bad whiskey and endanger the lives of those who areconstructinga railway through a difficult country. They are being built against the strongest possible protests from contractors and sub-contractors. The attorney-general issued instructions a few months ago to license commissioners thatlicenses should not be granted along the line of railway being built. Is he strong enough to see that these instructions are carried out, or is the Fraser-Manley grip on the McBride government too strong?

THE GLOBE'S VIEW.

O. S. Hammond, the Toronto Globe correspondent who accompanied the tariff commission on its western trip, has been sending some interesting letters to his paper. Based on the information contained in a letter written from Greenwood the Globe editorially deals with the plea made by local smelter men against the operation of the high tariff in the interests of manufacturers. It says:

"There are about 450 items in the schedule of Canadian customs duties, and as many of them include several articles or lines of goods, we are bearing over a thousand different taxations for revenue and protection purposes. The familiar habit of demanding the levying of a new taxation, or the increase of an old one wherever it promised to increase profits, has tended to multiply the imposts inordinately, and the whole list is followed by the dragnet of duty on 'unenumerated articles.' With the tendency set strongly toward the multiplying of taxation, and the easy idea abroad that it is all and always paid by foreigners or by the inert merchandise on which it is levied, due weight should be given to to those who speak on behalf of the majority who lose more than they gain by trade obstructions. In the Kettle River valley, the scene of one of Canada's greatest industries, the Tariff Commission heard a general protest on behalf of the men who have labor, which is free, to sell, and goods, which are duitable, to buy. They also heard arguments on behalf of some large and important interests directly injured by the protection policy.

"These arguments have been given at length by our staff correspondent. Mining is an industry that must always respond to business conditions. Under the most favorable circumstances there will always be some ores too lean to pay the cost of working. On the other hand there will always be some ores so rich as to yield a profit in spite of adverse circumstances. This is in a measure true of all industries, but the truth is more apparent in regard to mining. It was on behalf of this industry that its leading representatives in Greenwood, B. C., asked for relief from the duty on explosives, on candles, on structural iron, ank on bar steel. They also entered a protest against the proposed duty on lumber.

"The duty on powder is declared to cost the mining industry $41,800 a year. The duty on light train rails, structural and bar steel also imposes direct burdens on the mining industry, and it is clear that the tariff gives no compensating advantage that can permit the shifting of the burden to the canadian consumers. There must be large bodies of ore just too lean to pay the cost of mining and smelting, augmented as it is by the tariff, but which would be brought within the paying class by the relief demanded. It may be well to accentuate this aspect of the tariff question, as it is often but little considered or entirely ignorod in popular discussions. As a rule the burden of protection is so widely distributed that no single interest feels justified in moving against it. While trade and industry must suffer the aggregate of all the petty losses. they are too well concealed to provoke a definite outcry. But when the burden is concentrated on a single industry the often ignored side of the argument is presented for public consideration. The commission is helping to clarify popular thought and discussion on a question often befogged by the continuous iteration of one-sided arguments.

DOUBLE-BARRELED.

Conservative journals in this province are kept busy manufacturing political capital out of the appointment of a new lieutenant-governor. One of the more ingenious organs suggests a name and the others howl in derision. When the appointment is not made they gleefully point to discord in the Liberal ranks and find a new man for the position.

The scheme hasn't even the virtue of being original. It has been tried before when Liberal appointments had to be made and it always failed as it will fail now. The first suggestion was that Geo. Riley, M. P., was slated for the appointment and immediately that gentleman was treated to tirades of abuse from the Conservative newspapers. Mr. Riley is a very estimable old gentleman who could reasonably expect fair treatment from newspapers, whether appointed lieutenant-governor or not. It is even possible that Mr. Riley is not now nor ever has been a candidate for the position.

Then Hon. G. W. Ross was to be appointed, and columns were written against the enormity of sending an outsider to the province. Reference was also made by distinguished journalists like the present editor of the Nelson Tribune to the awful past of Mr. Ross, and how shocking it would be to turn such a wicked man loose in the wild and wooley west. It has since developed that Mr. Ross knew nothing of the appointment and never discussed the matter with Sir Wilfrid or any member of his government.

So the good work goes on. Conservative newspapers believe a policy of you'll be damned if you do and you'll be damned if you don't is effective, but Conservative newspapers are sometimes mistaken.

THE TORONTO GLOBE

Correspondent on Mines of of the Boundary.

THE TARIFF COMMISSION

Comparison of United States and Canadian Frontier Towns.

A trail of gray smoke, drifting aimlessly through the valley of the Kettle river, denotes the location at Grand Forks of the Granby smelter, the chief support of a large section of the Boundary country. The railway in reaching Grand Forks travels over mountains of great height, but here the track lies in a deep valley, and all that is visible is rolling country with a level plateau paralleling the river bed. It was not alone for this fertile strip that weeks have been consumed in the Canadian parliament battling over the entrance of J. J. Hill into Canadian territory. There are mountains of ore in the regions beyond, which, though of low grade, are in sufficient quantities to supply Canada with its largest mine. On a great hill to the west lies Phoenix, the home of the Granby mines, where the ore, once broken loose, is scooped by a steam shovel, loaded into cars, and sent down a grade of over 2,000 feet to the smelter. Last year about 600,000 tons of ore were mined there, producing 14,000,000 pounds of copper. Two other smelters, one at Greenwood, belonging to the British Columbia Copper company, and one at Boundary Falls, add to the industrial wealth and energy of the Boundary country, which, though the newest, now claims to be the largest mining camp in Critish Columbia.

LOW TARIFF ADVOCATES.

It was from the representatives of these big industries that the tariff commissioners heard the ardent low talk which has already been telegraphed. It is true that the views presented were frankly dictated by self interest, but they were spoken with a force and sincerity that deserve every consideration. They were the views of consumers, whose case is often drowned by the noise of the tomtoms around the banqueting boards. That the mining men of Greenwood and vicinity had the courage to oppose the demand for a duty on rough lumber, which is supposed to be so universally in request out here, occasioned some surprise. Still there again they spoke as consumers, and showed how an increase in duty would mean an increase in price.

Some firm opinions on trade matters are evidently held by Mayor Naden, who in welcoming the commission said: "I presume that nearly everyone, or certainly the great majority of the people who address you, will be addressing you in favor of an increase in the tariff on some particular lines. perhaps it would not be out of place fer me to say a few words on behalf of those who have nothing to sell but their labor. In the Kootenay you heard the representatives of the smelters who want a duty on lead; you have heard the representatives of the lumber industry, who want a duty on lumber; you have heard the fruit men, who want a duty on fruit. While these are all very laudable objects, there are a great number of us who have no fruit to sell, no lumber to sell, no lead to sell, and while we realize that the prosperity of our country depends to a great extent on the manufacturing and non-producing elements, the consumers have also some rights, and we would ask you to remember us when you are changing the tariff, and while you make it so that the manufacturers can live, on behalf of those who do not manufacture anything I would ask that you try and be as reasonable as you can, and not make the cost of living so high that you are going to make a few millionaires and a great number of others.

NOT ASHAMED OF FREE TRADE.

"Perhaps I am one of a very small minority of people in this covntry who are free traders. I certainly am one; I am not ashamed to own it. It is not popular to be a free trader. And still a certain amount of revenue has to be raised. I for one feel that if you give to Canadians a fair field and fair favor they can compete with any nation on earth without a very high tariff. (Applause.) These are just my own personal sentiments. In this respect I am not speaking for the community, except that I am speaking for those who would like a fair show."

The chairman, Mr. Fielding, in his reply said the government felt the whole question of the tariff shovld be

(Continued on page 4)

How to Cure Corns and Bunions.

First, soak the corn or bunion in warm water to soften it; then pare it down as closely as possible without drawing blood and apply Chamberlain's Pain Balm twice daily, rubbing vigorously for five minutes at each application. A corn plaster should be worn a few days to protect it from the shoe. As a general liniment for sprains bruises, lameness and rheumatism, Pain Balm is unequaled. For sale by all druggists.

YALE-COLUMBIA LUMBER COMPANY,

NAKUSP, B. C.

Applications for Special Timber Licenses

TAKE NOTICE that thirty days after date we intend to apply th the Hon. Chief Commissioner of Lands and Works for a special license to cut and carry away timber from the following described lands, in Osoyoos district:

1. Commencing at a post marked Yale-Columbia Lumber Co's south west corner, east of C. P. R. Block No. 3638 on the West Fork of the Kettle river, running thence north 160 chains, thence east 40 chains, thence south 160 chains, thence west 40 chains to the point of commencement.

Dated September19th, 1905.

2. Commencing at a post marked Yale-Columbia Lumber Co's south west corner, north of limit No. 1 aad east of C. P. R. Block No. 3638, on the West Fork of the Kettle river, running thence north 160 chains, thence east 40 chains, thence south 160 chains, thence west 40 chains to the point of commencement.

Dated September 19th, 1905

3. Commencing at a post marked Yale-Columbia Lumber Co's south east corner, on the east side of the West Fork of Kettle river, north of C. P. R. Block No. 2704, running west 80 chains, thence north 80 chains thence east 80 chains, thence south 80 chains to the point of commencement.

Dated September 21st, 1905.

4. Commencing at a post marked Yale-Columbia Lumber Co's north west corner, on the north side of the main branch of the Kettle river, and east of C. P. R. Block No. 5705, running east 40 chains, thence south 160 chains, thence west 40 chains, thence north 160 chains to point of commencement.

Dated September 21st, 1905.

5. Commencing at a post marked Yale-Columbia Lumber Co's north west corner, on the north side of the main branch of the Kettle river, running east 80 chains: thence south 80 chains, thence west 80 chains, thence north 80 chains to point of commencement.

Dated September 21st, 1905

6. Commencing at a post marked Yale-Columbia Lumber Co's north-west corner, on the north-west side of the main branch of the Kettle river, west of C. P. R. Block No. 3637, running east 80 chains, thence south 80 chains, thence west 80 chains, thence north 80 chains to point of commencement.

Dated September 22nd, 1905.

Nakusp, B, C.

NOTICE OF FORFEITURE.

To PHILIP B. S STANHOPE or to any person or persons to whom he may have transferred his interest in the "Prince of Wales" and "Princess Louise" mineral claims, situate in West Copper camp, in the Greenwood Mining Division of Yale District.

You are hereby notified that I have expended the sum of $257.65 in assessment work on the above claims, such work being required and necessary to hold ths said claims for the years ending the 10th day of July, 1905, and the 13th day of August, 1905, respectively, under the provisions of the Mineral Act and amending acts, and if at the expiration of ninety days from the date of the first publication of this notice in the Boundary Creek Times, you fail or refuse to contribute your portion of such expenditure, namely, $42.94, together with all costs of advertising, your interest in said mineral claims shall become vested in me, you co-owner, upon my filing in the proper office in that behalf the affidavit required by section 4 of the Mineral Act Amendment Act, 1900.

Dated this 13th day of October, 1905.

ROBERT LEE.

Could Not Be Better.

The uniform success of Chamberlain's Colic, Cholera and Diarrhoea Remeda has won for it a wide reputation and many people throughout the country will agree with Mr. Chas. W. Mattison, of Milford, Va., who says: "It works like magic, and is the best preparation I know of. I couldn't be any better." He had a serious attack of dysentery and was advised to try a bottle of this remedy; which he did, with the result that immediate relief was obtained. For sale by all druggists

RIVERSIDE DAIRY

FLOYD & COX. Proprietors

PURE MILK AND CREAM

Delivered Daily to any part of the city.

Synopsis of Regulations Governing t s Disposal of Dominion Lands within t e Railway Belt in the Province British Columbia.

A LICENSE to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths excepting those situated West of Yale for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:—

Sawn lumber, 50 cents per thousand feet B. M.

Railway ties, eight and nine feet long, 1½ and 1¾ cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent on sales

A license is issued as soon as a berth is granted but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.

The dues payable under a permit are $1 50 per thousand feet B. M, for square timber and sawlogs of any wood except oak; from ½ to 1½ cents per lineal foot for building logs; from 12½ to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties; and 50 cents per cord on shingle bolts.

Leases for grazing purposes sre issued for a term of twenty-one years at a rental of two cents per acre per annum,

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more thau 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for agricultural purposes map be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the District, within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is reduired to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence on and cultivation of the land in each year during the term of three years.

It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property, with buildings for their accommodation will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) or any person who is eligible to make a homesteod entry under the provisions 0f the Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY.
Deputy of the Minister of the Interior.

A striking feature of the recent meeting of the British Association for the advancement of science was the promulgation of a theory that radioactivity is the primary source of the sun's heat. Radium thus extends its way into the science of astronomy as it has already into physics and chemistry.

The magnitude of underground haulage operations may be appreciated when it is stated that in 1903 in coal mines in the United Stales alone it is estimated that 325,000,000 tons of coal were hauled an average of 3,000 feet from the pit mouth. This corresponds to an aggregate of 185,000,000 ton miles.

For the manufacture of a diamond the first necessity is to select pure iron, free from sulphur, silicon, phosphorus, etc., and to pack it in a carbon crucible with pure charcoal from sugar. The crucible is then put into the body of the electric furnace and a powerful arc formed close above it, between carbon poles, utilizing a current of 700 amperes at 30 volts pressure. The iron rapidly melts and saturates itself with carbon. After a few minutes heating to a temperature of above 4,000 degrees C., a temperature at which the iron melts like wax and volatilizes in clouds, the current is stopped and the dazzling, fiery crucible is plunged beneath the surface of cold water, where it is held until it sinks below a red heat. As is well known, iron increases in volume at the moment of passing from the liquid to the solid state. The sudden cooling solidifies the outer layer of iron and holds the inner molten mass in a tight grip. The expansion of the inner lixuid on solidifying produces an enormous pressure, and under the stress of this pressure the dissolved carbon separates out in transparent forms—minutely microscopic, it is true—all the same veritable diamonds, with crystalline form and appearance, color, hardness and action on light, the same as the natural gem.

VOL. 11, NO. 5, OCT. 6, 1905

revised from time to time. "A review of the question," he said, "does not necessarily involve great changes, but it merely means that one should look over the new conditions that have arisen and adopt our tariff to those conditions so far as change may be required. Unfortunately we cannot fix the tariff just exactly to suit you all. Each one could make a tariff to suit himself very nicely, but we have to consider other standpoints—not only how the matter affects that particular industry or society or interest, but how it will affect the whole Dominion. We have to try and agree upon a policy which all can accept.

CONFLICRING INTERESTS.

"In a country like Canada, with its vast territorial conditions, interests east and west may come in conflict. If each one will insist in having the tariff fixed to suit his section or interest or province we cannot work out a harmonious tariff. But if we approach it in a spirit of give and take and having regard to the other fellow as well, then we will have a general tariff meeting the necessity of the whole Dominion. That is the spirit in which we approach the question It is the spirit in which you have discussed it today. There were besides portions of your remarks which I might take as a text for a tariff policy—to let the manufacturers live and prosper, but yet in making the tariff to try and not make it a burden on the working people of the country." (Applause.)

In presenting the case for the smelters and mining men, Mr. J. E. McAllister, superintendent of the Dominion Copper company's smelter, took pains to tell the commission in several instances that they wanted the duty reduced or removed because Canadian manufacturers were not supplying the class or quality of goods wanted. But, he went on, we are in a peculiar position, from the fact that we are carrying on a tremendous industry—one of the largest in Canada—and at an extreme distance in almost every case from the base of supplies. On this account it seems to us that special consideration should be given to the tariff on such supplies and articles as we require in the prosecution of our industry. By consideration I do not mean sweeping reduction or removal of the tariff, but merely that it will receive your consideration and judgment, and what we will endeavor to do is put the points to be emphasized before you this morning, and we will hope for your favorable consideration of what we say.

IS THERE AN EXPLOSIVE COMBINE ?

During Mr. McAllister's argument for the removal of the duty on dynamite, Mr. Fielding asked why the miners did not make it themselves if they were overcharged.

"We have our hands full and require all our capital for developing our mines," Mr. McAllister answered.

"It has been represented that powder is in the hands of a combination."

"It is almost impossible to prove it, though we we may know it exists. We know that it exists for we have the effect of the combination."

"It is worth while enquiring into," Mr. Fielding answered, "because we should not support any combination in this country."

Mr. McAllister thought the makers of structural iron had too much of a snap. He mentioned a building erected by tender, in which an American firm got the contract in competition with Canadians, sublet it and thus made two profits, and still at a lower price than a Canadian who were protected by a 35 per cent duty.

Dear Mother

Your little ones are a constant care in Fall and Winter weather. They will catch cold. Do you know about Shiloh's Consumption Cure, the Lung Tonic, and what it has done for so many? It is said to be the only reliable remedy for all diseases of the air passages in children. It is absolutely harmless and pleasant to take. It is guaranteed to cure or your money is returned. The price is 25c. per bottle, and all dealers in medicine sell 3i4

SHILOH

This remedy should be in every household.

Mr. Fielding pointed out that the Canadian firms desired protection, and that they had to pay duty on machinery, fuel, etc. "We have had to do a great deal for the steel industry in Canada. They say they are having a hard time to net along, and I am really afraid that the Hamilton and Dominion Bridge companies will hardly see it from your point of view. When they read of your evidence tomorrow they will begin to lie awake at nights." (Laughter.)

When Mr. McAllister asked that the 5 per cent duty be removed from bar steel, such as is used for mining and smelting purposes, because suitable steel was not made in Canada. Mr. Fielding asked if it was not likely to be made soon with the development of the iron industry.

"We require steel that will temper and get very hard," Mr. McAllister replied, "but nave not been able to get that." He gave the same reason for wanting the duty removed from candles, saying that those made in Canada were not suitable, as they burned .oo fast in the draught, where they are generally used. He thought there might be some secrets in the making which the Canadian factories had not learned.

On the steel rail question, Mr. McAllister told Mr. Brodeur he was not aware that light rails were being made in Canada, and had not asked the works at Sault Ste Marie and Sydney for prices. "I would put the request for the removal of the duty," he said, "as purely and simply to foster the mining and smelting industry."

AGAINST LUMBER DUTY.

Before Mr. McAllister concluded he volunteered the information that the "operatoas of the mining and smelting industries of this section are averse to the placing of a duty on rough lumber coming into the country."

"You are aware that that has been very strongly pressed upon us by other citizens of British Colnmbia?" Mr. Fielding asked.

"We are, yes. We can see ourselves that if a duty is placed on rough lumber, the price of our lumber is merely going up to that extent. I would instance the fact that the company which I represent now has in contemplation the purchase of 750,000 feet of rough lumber."

Mr. Fielding asked if lumber was sometimes sold here at dumping prices.

Mr. McAllister Illustrated by saying that they were in the home of the industry, and he remembered that when a boy in Ontario the most expensive place to buy peaches was in the Niagara district.

"Perhaps the Niagara boys did not buy them," suggested the chairman amid laughter.

Mr. McAllister informed Senator Templeman that the consumption of lumber by the mining interests in this section amounted to about 2.000,000 feet per year, and in reply to another question, said the duty on powder meant a difference in price to the consumers here of $41,800 a year.

Mr. McAlister's general statement was endorsed by Messrs. A. B. W. Hodges, manager of the Granby smelter; W. C. Thomas, superintendent of the Dominion Copper company's smelter, and Mr. T. R. Drummond, resident manager for the Dominion Copper company.

While en route to Greenwood the commissioners passed through Midway, the present western terminus of the C. P. R. in the Boundary country, and there witnessed the construction work now proceeding on two new rail roads. One is the Victoria, Vancouver and Eastern, here being extended from a point in Washington state westward toward the coast. Over 800 men are at work in Canada and several thousand more on the portion south of the boundary, where some heavy construction work, costing as high as $75,000 per mile, according to the engineer's statement, is being encountered by Mr, Hill's workers. Within a few days steel will be laid to Midway frow Curlew, twelve miles southeast in Washington, and then the Great Northern will have another entrance into Canada and will ship in their supplies which at present come by a laborious wagon trail. The other railway is being built from Midway to Vernon, 150 miles, and will thus reach the famous Okanagan valley. American and Canadian capitalists are behind it The result is a boom in Midway and a decided ascent in land prices.

Here also may be made a comparison between Canadian and American conditions of law and order. Across the Kettle river, a quarter of a mile away in Washington, lies Ferry, a mushrosm village of six weeks' growth, following the wake of the railway construction gangs. Of the fifteen buildings in the town twelve are saloons or worse, and the types of faces which appeared at the doorways were more suggestive of a morning police court than anything else. There is no police protection or supervision in Ferry, and crimes are frequent and violent. Across the border provincial police guard Midway, and life is quiet and orderly.—O. S. Hammond in Toronto Globe.

Cook's Cotton Root Compound.

The only safe effectual monthly medicine on which women can depend. Sold in two degrees of strength—No. 1, for ordinary cases, $1 per box; No. 2, 10 degrees stronger for Special Cases, $3 per box. *Sold by all druggists.* Ask for Cook's Cotton Root Compound; take no substitute.

The Cook Medicine Co., Windsor, Ontario.

GEORGIA MINSTRELS.

Richards & Pringle's Famous Georgia Minstrels will appear at the Auditorium Tuesday, October 17. The coming of this popular organization is always hailed with delight by lovers of old-time minstrelsy, as the performance approaches nearer to what made the minstrels so popular. The manager of the local playhouse is also glad to see the "Georgias" make their annual visit, as it means a full house and big box office receipts.

The word is passed along the line that the show put up by these sons of Ham excells anything ever seen by by this or similar organizations.

Some Seasonable Advice.

It may be a piece of superfluous advice to urge people at this season of the year to lay in a supply of Chamberlain's Cough Remedy. It is almost sure to be needed before winter is over, and much more prompt and satisfactory results are obtained when taken as soon as a cold is contracted and before it has become settled in the system, which can only be done by keeping the remedy at hand. This rsmedy is so widely known and so altogether good that no one should hesitate about buying it in preference to any other, For sale by all druggists.

W. T. Hunter of the Hunter-Kendrick company returned on Tuesday from North Dakota.

Some experiments in coal storage indicate that coal will lose less calorific power when stored under water than when stored in the usual manner. Two per cent is given as the loss in water storage, while from 10 to 50 per cent is reported on air storage for varying periods of tim.

RAILWAY NOTES.

Chief Engineer Lackie of the Midway and Vernon left on Thursday for Carmi, to send Engineer Bassett and his party to the summit. Mr. Bassett has completed the location line as far as Carmi. Engineer Snow is working from the summit this way and will be at Carmi in about three weeks. Engineer Bassett witl work from the summit towards Okanagan lake. It is expected that the full location line will be completed inside of sixty days.

Contractor Gallagher, who has a subcontract on Myers creek and whose work has been stopped pending the settlement of right of way difficulties with the C. P. R., left last week to visit his family in St. Paul. He expects to resume work in 10 or 12 days.

Expropriation proceedings will be commenced immediately by the V., V. & E. Railway company in connection with the right of way over C. P. R. lands.

The track has been laid from Curlew to Midway and freight is now being hauled over the Great Northern to the latter point. As soon as the road is better ballasted a through train will be run from Spokane to Midway. It is also stated that a mixed train will be put on from Grand Forks to Phoenix. As soon as the Midway service is started, Royer's stages will connect with the train there.

The battle of the railway forces still continues. Major-General Pearce and Captain McLaine organized a new edition to the famous Black Watch and planted them on the V., V. & E. right of way. Alex. Kellett, foreman for J. W. Stewart, is too good a Scotchman to have anything but respect for a regiment having such an illustrious name, so he went and saw and came away determined that while the soldiering had somewhat degenerated since the days of Balaklava, that it were better to endure the law's delays than spoil the maccaroni market.

The customs office at Midway has been moved to the international boundary line and Collector Gardom is completing an office and residence there. The change was found necessary because of the completion of the Great Northern to that point.

Georgia Minstrels.

When Richards & Pringle's Famous Georgia Minstrels appear at the Auditorium on Tuesday, October 17, the the public will see the most expensive colored show ever organized. If any doubt of the absolute trathfulness of this statement exist, it will be forever dispelled when the performance is given.

It must be confessed now that there were doubts in the minds of the management about their being able to make the giving of so vast and expensive show with any profit, and as a matter of fact the business ordinarily done by other shows would not have been profitable, and packed houses rule everywhere.

The program is a lengthy one and made up of great variety. The street parade at noon is a novelty, two bands in daily parade,

Billheads and stationery in Berkshire bond and Bearsden mills. None Better. The Times job department.

THE WASTE DUMP.

The Indian Territory asphalt rock is probably the best found in the United States.

Systems of flues and mechanical scrubbers are being used experimentally in solving the fumes problem.

All detaching hooks used as safety devices should be taken apart, annealead, cleaned and oiled at least onee in three months.

In Butte county, California, there are thirty dredges at work. These contribute very largely to the total gold ontput of the state.

The usual timber shaft lining may last from twelve to fifteen years, but after six or eight years it will be necessary to replace individual pieces which decay prematurely.

Methods of economical production are characteristic of all large enterprises, but the principles involved apply to small undertakings as well as large. To reduce the cost of handling ore is to add to its net return.

Concrete foundations for electrical machinery, where good insulation is of importance, should be covered with a generous layer of asphalt. Concrete is a good insulator when dry but a fair conductor when wet.

Diamond mining is in many cases speculotive in the last degree. The miners will often work weeks without recovering any of the precious stones, and may then suddenly run into a pocket containing a fortune.

An average of $1.67 per ton at mine was paid in the Transvaal for 807,851 tons of coal marketed in the four months ending April 30.

The Isle Royal in Lake Superior yielded some years ago a mass of copper weighing 1209 pounds. In prehistoric times Isle Royal yielded considerable native copper and implements made of it have been found in graves and mounds throughout the United States.

A mass of gold, free from quartz was taken from the Byer and Haltman claim. Hill End, New South Wales, May 10, 1872, weighing 640 pounds and worth $148,000. It was imbedded in blue slate 250 feet from the surface. It was 57 inches long, 38 inches wide, and averaged 4 inches in thickness.

Your eyes thoroughly examined by Dr. Mecklenburg, the celebrated and sixteen-year-experienced eye-specialist Possessor of four Diplomas from chartered institutions, who guarantees to fit you with proper glasses after all others have failed. Come and see for yourself. At Thomas Drug Stores Phoenix, Oct. 20-22; Greenwood, Oct 23, 24 and 25; Midway, Oct. 26-27.

A very fancy line of wedding stationery, printed from a very pretty steel engraver's script, at this office.

BARTENDERS—You can get neatly printed cards with the following on them: "Tom and Jerry" "Fresh Buttermilk", "Hot Whiskies", "Eggnsg" Ect., which are business bringers for the bar, the same to be had at 35c a piece at the Times Job Dept.

New and Bewildering

SIGHTS, SCENES AND SENSATIONS

Without a Parallel in the Minstrel World.

TOWN TOPICS

Thanksgiving will be Thursday, the 26th inst.

J. W. McBride of Bolster was in the city this week.

The Anaconda News will publish a special Ceristmas edition of about 50 pages.

The Rev. J. R. Robertson, B. A., of Grand Forks, will preach in the Presbyterian church Sunday.

Word was received yesterday from Spokane that the Crescent mine had been awarded the diploma for the best display of silver ore at the Interstate fair.

Bruce Craddock returned Monday from Oroville Monday, where he has been for the past six weeks.

Wm. Morton returned from Carmi this week, where he had been doing assessment work on his claims.

Geo. Barber, in charge of the freight sheds here has been transferred to Rossland, and left Monday for that city.

Julius Ehrlich, manager in the Boundary for P. Burns & Co., left this week for a trip through the Similkameen.

Nicely furnished rooms, single or en suite, furnace heated, with baths at all times. Reasonable Rates. Hotel National.

Tuesday evening the new Presbyterian church at Midway was opened. The Greenwood choir assisted at the opening.

Thos Roderick and Jas. McNulty returned this week from the Similkameen where thry had being doing assessment work.

For sale, cheap, one transit, and one level, with two tripods. The O I C New and Second Hand store. A. L. White, 'phone 16.

Robert Wood, who is working the Sally and shipping high grade ore from that mine, was down from the West Fork last week.

R. P. Williams of the Jenckes Machine company, and H. P. Dickinson of the Giant Powder company, were visitors to the city this week,

Duncan McIntosh left this week for the West Fork to secure mining properties for Eastern investors. He expects to be away two weeks.

Mark F. Madden, president of the Providence Mining company, arrived from Chicago on Wednesday and will spend a few days in the district.

City Collector Taylor has sent out notices announcing that taxes must be paid before November 1st to secure rebate of one sixth on general tax for this year.

F. M. Elkins, general agent for the New York Life, returned this week from a business trip to East Kootenay and Alberta. He left yesterday for the coast.

The issue of waterworks debentures, amounting to $15,000, has been sold to Stinson & Co. of Toronto. It is anticipated that the waterworks system will be completed this year.

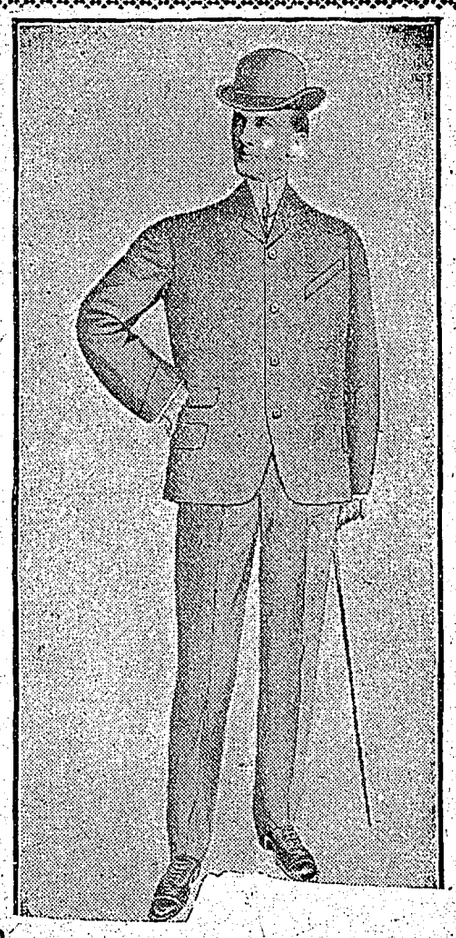
At the meeting of the Curling club held Friday evening, it was decided not to build for a third sheet of ice this year, but improvements will be made to the present building.

Fred Hazlewood and Bob Halcrow have taken a contract to sink from the 130 to the 200-foot level on the Helen. They have purchased the 3-drill compressor formerly used at the B C in Summit camp, and will use power.

The properties which the B. C. Copper company are developing on Copper mountain near Chesaw have been closed down for the winter. Work will be resumed in the spring. Superintendent Harry Johns was in the city this week.

The editor of that excellent little society journal, The Week, published in Victoria, last week made the startling announcemnt that he was a humorist, a laugh-producing, side-splitting, bones and tambourine literary end man. The gentleman will shortly publish a key to his jokes.

Dr. Mecklenburg, the famous eye expert, will be at the Thomas Drug store, Greenwood, Oct. 23-25; Midway, 26-27; Phoenix, 20-22. Save your sight by consulting him. Headaches, cross eyes, short sight, far sight and every defect of the eyes properly treated. Satisfaction guaranteed. Difficult cases especially invited.



Where

ARE YOU GOING TO PURCHASE YOUR

Fall Clothes?

TALK THIS QUESTION OVER CAREFULLY

Determine which store can reasonably do the best for you. Such talk will bring you here. We court discussion and investigation. We are now ready for fall buyers. Our variety is fascinating. Styles were never before so elegant and effective. And low prices prevail—prices consistent with high grade goods. It is not a question of value in our store—you know you will get your money's worth. You have only to please your fancy.

DUGONG OIL

EMULSION

Is very palateable and a sure cure for troublesome coughs and colds. The Australians use it extensively for that purpose.

$1.00 PER BOTTLE

WHITE BROS.

DISPENSING CHEMISTS AND OPTICIANS.

Mayor Naden, whose departure last week for the Portland fair was delayed by right-of-way difficulties on the V., V. & E., left for Portland Thursday morning accompanied by Mrs. Naden.

Mr. Johnston, consulting engineer of the Dominion Copper company, is expected here in a few days. Upon his arrival it is expected instructions will be given to blow in the smelter at Boundary Falls and that this plant will be run until a new smelter is erected. This course may not be pursued if the smelter which press correspondents and a few others are building for the company at Grand Forks is completed before Mr. Johnston's arrival. The Grand Forkers have not a monopoly in this respect. It is even stated that the company is going to buy the Northport smelter and treat their ores there. In the meantime the officers of the company are not paying much attention to the hot air work of other people. General Manager Drummond and Superintendent Thomas are busy getting the mines into shape and everything in readiness for steady and permanent operations.

G. O. Guise, the Westbridge merchant, was in the city Tuesday.

Mrs. H. B. Madden left Wednesday for a visit to the Spokane fair.

There will be a song service in the Methodist church on Sunday evening.

Abe Hallberg has disposed of his harness business and gone to Spokane.

The Ladies' Aid society of the Methodist church purpose holding a bazaar on Friday the 27th inst.

Divine service will be resumed in St Jude's church Sunday next, the 15th inst., by the Rev, J. L. Porter, late of Lacombe, Alta., who has been appointed rector of the parish of Greenwood. The services will be as follows: Holy communion at 8 a. m.; matins, 11 a. m.; children's service and instruction, 2:30 p. m.; evensong, 7:30 p. m. On Monday evening a meeting will be held in order that Mr. Porter will be able to meet the members of his congregation, and it is hoped that all who can do so will be present.

F. AUGUSTE HEINZE

(Continued from first page.)

Mr. Heinze didn't talk much, but nothing escaped his keen eye, and one wondered if he were asking himself whether he had made a mistake in changing the position of a railway and mining magnate in the Boundary for that of a mining man, litigant and politician in Butte. Had it not been for that article by Thomas Lawson of Boston in Everybody's the decision would probably have been in favor of the Boundary.

Mr. Heinze and his party left for Spokane on a special train on the Great Northern Wednesday afternoon.

The postoffice has been moved to the old Bank of B. N. A. building.

The increased cost of timber and the inferior quality now obtainable in many parts have combined to make concrete a strong competitor as a material for lining shafts. Its advantage in protection against fire and in its low first cost as compared with brick or stone add to the favor with which it is being received.

A Judicious Inquiry.

A well known traveling man who visits the drug trade says he has often heard druggists inquire of customers who asked for a cough medicine, whether it was wanted for a child or an adult, and if for a child they almost invariably recommend Chamberlain's Cough Remedy. The reason for this is that they know there is no danger from it and that it always cures. There is not the least danger in giving it, and for coughs, colds and croup it is unsurpassed. For sale by all druggists

..Cod Liver Oil..

The King of Medicines For Weak Lungs And CHRONIC COUGHS.
