HOLD-UP AT MIDWAY

H. Eldridge Shot and Severely Wounded.

THE DESPERADO ESCAPES

After Firing Two Shots, Both of Which Take Effect, He Disappears Into the Night.

(Special to The Times.)

MIDWAY, March 28. The citizens of Midway were startled at half past ten Tuesday evening by the sound of two shots fired in quick succession, and followed by sharp cries and groans. The night was very dark and those who were in their homes nearby, following the outcry, to the drug store of H. Eldridge, where they found the proprietor in agony at his own door. The account given of the event is quite clear but the motive involved is rather mysterious.

ELDRIDGE'S STORY.

From the story told by Mr. Eldridge it would appear that as he was returning home he was approached at the corner of the Eastern Townships bank, which adjoins his premises, by a man whose face was covered by a cloth and was ordered to hold up his hands and keep quiet. This Eldridge refused to do, when he was shot at by the man who stood a few feet from him. The shot took effect just above his breast and the bullet coming out of his shoulder went through the bank window. Eldridge started for his own door when another bullet struck him in the hip, going through the fleshy part of the same. The bullet hit a bunch of keys in his hip pocket, breaking the ring which held them into many parts. The assailant then fled in the darkness, leaving his victim writhing in pain at his own threshold.

MOTIVE UNCERTAIN.

Many theories are advanced for the murderous attack. The idea that he was mistaken for the bank manager and that the design was to secure entrance to the bank is exploded by the fact that the manager was at the moment at work at his desk and was plainly discernable by the burning light within. Another theory advanced is that the plan was either to secure entrance to Logan's jewelry store or the express money order office, which are in Eldridge's building, but this is hardly tenable, when it is remembered that to murder the man thus openly away from his own door would defeat such a purpose.

POLICE GOT BUSY.

The police were soon on the ground and made diligent enquiry into the circumstances, but so far as known without coming to any satisfactory conclusions or results. The community has been profoundly stirred by the event. Eldridge is resting quite comfortably today and fair hopes are entertained of his recovery.

PERSONAL NOTES.

Percy Jackson, employee of T. M. Gulley & Co., met with a very serious accident Monday evening. In jumping from a wagon he alighted on some loose boards with the result that he broke one of the bones of his leg at the ankle. He is progressing favorably under the care of Dr. Newcombe.

F. M. Stevenson, H. Viger, P. Lundberg and J. Thompson visited Nelson early in the week.

OBITUARY.

A sad bereavement befel Mr. and Mrs. William Chynoweth of Deadwood last Wednesday, the 28th inst., when their only child, Ethel, aged twelve years, passed away in the Sisters' hospital in Greenwood, as a result of complications for appendicitis arising from an operation. Deceased was a bright promising young girl and was much beloved by all who knew her and being the only child her loss is especially mourned by her parents.

The funeral will take place from the Greenwood Methodist church Sunday afternoon at 2 o'clock. Rev. H. S. Hastings will conduct the services.

BIG IMPROVEMENTS

Local Meat Merchant Makes Changes.

A COLD STORAGE PLANT

New Mechanical System Being Installed for the Better Handling of Meats and Vegetables.

It is not only among the mines and similar enterprises that progress is being made in Greenwood and the Boundary district. The retail merchants and business men generally are always on the alert for opportunities to improve and extend their business enterprises. It is not often that improvements affecting the general public to so great an extent are undertaken, as those now being made by Messrs. P. Burns & Co. in their Greenwood and Rossland meat markets. Until the present time the refrigeration system for the keeping of meats and dairy produce in a fresh and wholesome condition, was similar to that which has been in use for many years. Ice was procured from some stream during the winter and packed in sawdust for summer use. This was placed in the ice box and the meat kept in as even a temperature as possible but as the supply of ice in the refrigerator room varied, so did the temperature causing more or less damage to the meat.

To improve these conditions and to make it possible to serve the public with meats in the best possible condition, steps have been taken to install a refrigeration system of the latest and most approved pattern, which will be free from the defects of the old system and will include many new features that will be of great advantage and service.

J. G. Frank of Spokane, representing the John Lang Ice Machine Co. of that city, is here making the improvements. It consists of an up-to-date cold storage plant. The principal feature of the system from a mechanical standpoint is the machine which does the work. It is a two-ton ammonia compressor refrigerating machine, which has a capacity to produce, in technical language, two tons of refrigeration every twenty-four hours, or it will manufacture one ton of ice every sixteen hours. Ammonia is the chemical agent used in both operations.

Under the new system the temperature of the curing room is kept always the same to the great advantage in preserving the meats. When completed in about two weeks the new refrigerator system will have a capacity of 23,000 cubic feet. This will be used for meats, fish, vegetables, poultry, curing hams, eggs, butter and pickled meats, all arranged in separate compartments so that everything may be kept fresh and sweet. One of the advantages of the new system is that the produce is kept in a dry cold atmosphere and not in a damp cold as heretofore. It is said that meats kept under these conditions are served fresher, firmer and more satisfactory in every way.

The improvements are being made at an expenditure of some five thousand dollars and will be completed in two weeks. These are the first of the kind ever introduced into this part of British Columbia.

The musical concert held Tuesday night in the Presbyterian church was a success, especially as far as the program was concerned. The attendance was rather small but those who were present got more than their money's worth. The major part of the program was taken by Miss Queenie McCoy of the Victoria College of Music, and her sweet voice charmed her audience and many are of the opinion that she is the most gifted soloist that has been heard in Greenwood for a long time. Mrs. H. McCutcheon presided at the piano and Mrs. Oliver and A. M. Whiteside rendered vocal selections.

The Epworth League of the Methodist church will hold a social at the parsonage next Wednesday evening, to which all young people are cordially invited. Strangers will be made especially welcome and a pleasant time is promised for all.

MIDWAY AND VERNON

Railway Company Wins Its Case.

SUBSIDY WILL BE PAID

Chief Justice Hunter Decides That Road Is Entitled to Assistance—Debts Will Be Paid.

"Decision in our favor. Subsidy Act in full force and effect."

RALPH SMAILES.

Such was the welcome and long-looked-for message received by Duncan McIntosh from Mr. Smiles on Wednesday evening, announcing victory for the Midway and Vernon Railway company in their long fight to secure the subsidy for building the line from Midway to Vernon. The news spread like wildfire and soon every business man in town was congratulating the successful and happy promoters and incidentally himself, for while it meant fortune to those directly connected with the road, it meant considerable to almost every individual merchant in Greenwood. The news was telephoned all over the city, and even the telegraph wires were brought into use to spread far and wide the welcome tidings, and on all sides smiling faces were much in evidence. For weeks and months the decision just handed down by Chief Justice Hunter at Victoria has been awaited with growing impatience. Through the long course of the Midway and Vernon case in its adventures in the provincial legislature it has been closely watched by all classes of people. Sometimes hope ran high and at others blank disappointment and despair stared in the face, but when final decision was left to Chief Justice Hunter hope was again revived and the victory, though not unexpected, was nevertheless joyfully received.

WHAT IT MEANS.

The decision that the Midway and Vernon shall be paid their subsidy means first that all debts will be paid. All the accounts for labor and merchandise will probably be settled in thirty days. This will mean a great deal for Greenwood and all other towns, especially Midway, where the promoters and contractors have been doing business. Thousands of dollars' worth of accounts that have been standing for many months and which some of the creditors despaired of ever getting, will be paid and large sums of money will be put into circulation, stimulating and promoting business generally. It is not known yet when construction work will be resumed, but it has been stated that this will be started as soon as men can be secured and the proper organization effected to carry on the work.

At Midway the news was received with equal satisfaction. The merchants and townspeople there are likewise vitally interested and had also waited long for the decision. As a result Midway looks forward to a strong revival in business in all lines. With the V. & E. work, the proposed C. P. R. extensions, the Midway and Vernon resuming operations and the possibility of the Great Northern building to Greenwood, the season promises to be one of exceptional activity for that town.

At Rock Creek, Westbridge and Beaverdell the news was equally welcome, for it is generally realized that the whole future of that country is identified with the success of the Midway and Vernon line.

POLICE COURT CASES.

In the police court this week the Windsor hotel was arraigned for breaking the law, but the case was dismissed through lack of evidence. Similar charges were laid against the National hotel and after several adjournments came up for settlement this afternoon.

The charge against the Ladysmith hotelman for assaulting John Barry was also considered this afternoon, but at the time of going to press no decision had been reached.

FRIDAY MARCH 30, 1906.

BOOST THE BOUNDARY.

There is a movement on foot for the formation of a club or association among the business men of Greenwood, Phoenix and Grand Forks for the purpose of advertising the Boundary district generally. It is felt that some steps should be taken to make known the advantages and resources of this district and to attract thither capital and population, more especially the former. It has been discussed in all three towns mentioned and it is thought that more effective work can be done by all three co-operating than by any one town taking up the work alone.

It is proposed that representatives of all the towns meet and thoroughly discuss the subject, appoint a central executive committee, with sub-committees in each of the towns, whose duty it would be to work out the details regarding the advertising of their own town and forward the results in concrete form to the executive. One or more members of the executive would reside in each town and most of the business of the club could be carried on by correspondence. The local committees, composed of most of the business men of the town, would hold meetings as often as necessary to push forward their work. It has been proposed to call this new organization "The Boundary Booster Club."

That there is an opening for such an organization in the Boundary most business men will admit. It is generally realized that the future looks bright and that the district is on the eve of a business revival of no mean order. With steadily increasing

ore shipments, with new claims being worked and old ones undergoing improvements that will add still further to the output, the present season promises to be one that will begin a new epoch among the Boundary mines. "There is a tide in the affairs of men, which, when taken at the flood, leads on to fortune." The present indicates that the tide is coming this way and that now is the time to prepare to make the best possible use of the opportunities offered.

Much that is now widely known of the Boundary district has been spread abroad by the persistent efforts of individuals. The results so far have been good and those who have contributed by voice and pen to the advertising of the Boundary are to be congratulated upon their success. But if one or two or a dozen working separately and individually have accomplished much, it is certain that a score or a hundred by co-operating could accomplish immeasurably more. Such is the object of "The Boundary Boosters' Club."

The principal requirement of the present moment is a man who will take the lead, interest business men and prominent citizens generally in the project and make it a success.

PURITY AT ELECTIONS.

It is more than likely that during the present session acts will be passed to insure the purity of elections. Mr. Borden and Mr. Fitzpatrick have both spoken on the subject and it is convenient to state concisely the several proposals now before the house, and their present status:

1. Fixed dates for bye-elections. Proposed by Mr. Borden; approved by Mr. Fitzpatrick.
2. Independent returning officers, who are to have the unfettered appointment of deputy re-

turning officers. Proposed by Mr. Borden; approved by Mr. Fitzpatrick.

3. Voters who do not exercise the franchise to be deprived of it for a period. Thrown out as a suggestion by Mr. Borden; rather favorably viewed by Mr. Fitzpatrick.

4. Some features of the election law, such as the clauses relating to hiring conveyances, made more practical. Suggested by Mr. Borden; approved by Mr. Fitzpatrick.

5. Much more stringent limitation and investigation of election expenditures and contributions. Proposed by Mr. Borden; not directly touched upon by Mr. Fitzpatrick.

6. Appointment of an independent official to initiate prosecutions for election irregularities, thereby abolishing the saw-off. Strongly advocated by Mr. Borden; approved by Mr. Fitzpatrick.

7. Election trials to be made simpler and speedier. Proposed by Mr. Borden not directly touched upon by Mr. Fitzpatrick.

8. Prohibition of bribing by promises of public works. Proposed by Mr. Borden; not touched on by Mr. Fitzpatrick.

9. Some reform in the preparation of voters' lists. Strongly and significantly urged by Mr. Fitzpatrick, Mr. Borden not having said anything on the subject.

10. Punishment of debauched constituencies, either by saddling them with costs or by depriving them of representation. Suggested by Mr. Borden, but not touched on by Mr. Fitzpatrick.

In his reply Mr. Fitzpatrick said that a saw-off should be regarded as compounding felony.—Vancouver World.

Thomas Deasy, ex-chief of the Victoria fire department, has been appointed chief of the Nelson fire brigade, taking the place of the former one who was discharged for not properly attending to his duties.

MR. BROWN'S VIEWS

Columbian and Western, Midway and Vernon, and West Kootenay Acts.

(Continued from last week.)

"During the latter part of the session the government brought down an act to amend the Columbia and Western Railway Subsidy Act, 1896. This provided for granting the Columbia and Western Railway company 808,872 acres of land. In order to understand this act it may not be amiss to state some of the essential facts in connection with the C. & W. subsidy. The Columbia and Western Railway company was incorporated in 1896 to build a railway from Trail to Penticton, divided into six sections, and in the same year a subsidy act was passed, in which provision was made for giving a land subsidy to the company for sections 1, 3, 4, 5 and 6. The company built sections 1, 3 and 4, but did not build sections 2, 5 and 6.

"Section 5 of the Subsidy act provided: 'No lands shall be granted which are not designated and surveyed by the company within seven years from the passing of this act.' The act was passed on the 17th of April, 1896. The company did not designate and survey the lands within seven years from the passing of its subsidy act. In fact the survey is not entirely completed yet. The company, however, applied to this government for the balance it claimed to be entitled to on its subsidy for section 3, and in May, 1905 the government passed an order in council by which it pledged itself to bring in legislation to give the company the balance claimed by it, viz., 808,872 acres.

"The opposition opposed this bill on the ground that the company had signally failed to carry out its agreement to build from Trail to Penticton, as the portion of the line from Midway to Penticton was not built, which left a very important part of the province destitute of railway facilities, and did not give the connection with the coast via Penticton, the Okanagan lake and the Shuswap and Okanagan railway, which was contemplated when the subsidy act was passed. That it was the company's own fault that the surveys were not made within the time stipulated, as the negotiations with regard to substituting other aid than that mentioned in the Subsidy act was initiated and carried on by the company in its endeavor to take advantage of the province.

"These contentions could not be and were not successfully assailed, but while the bill was not acceptable to some of the Conservatives, all voted for it who were present on its second reading, except Price Ellison, who voted against it. In this case, also, the Socialist wing of the Conservative party meekly following Premier McBride, Hawthorthwaite making a voluble and specious plea in favor of the bill. Davidson, the Labor member from Slocan, on every occasion on which this matter came up shirked the vote.

MIDWAY AND VERNON.

"In marked contrast to the generosity shown to the Columbia and Western (really the C. P. R.) was the treatment meted out to the Midway and Vernon Railway company. After ten miles had been nearly graded and the success of the project seemed assured, Premier McBride and Finance Minister Tatlow gave an interview in Montreal in December to the manager of the Bank of Montreal there in which they stated that this company would not be paid any subsidy until it established its right to it in court. The government would not say that the company had not complied with the provisions of the Subsidy act, although a sworn statement of what had been done had been placed before it, and the inference is it could not, even in the interests of its master, the C. P. R., yet by throwing out this doubt as to the company's right to receive the subsidy, it blocked the enterprise for a time and deprived workmen, farmers and merchants of money due them to the amount of \$60,000 or \$70,000. The premier even blocked Price Ellison's bill extending the time for completing the railway, possibly for fear it would have some effect in validating the subsidy.

"Some important bills were brought before the house which I regret did not pass. The bill providing for an eight-hour day in smelters was brought before the house by Mr. Davidson from Slocan. I supported the bill this year, although I voted against a similar bill last year, as the conditions had changed, and even had fuller and better information as to the effect of such a measure this year than we had the year before. When the matter came up last year no attempt had been made

to arrive at an agreement with the smelter employees with respect to the hours of labor and the wages to be paid to the employees. There was a grave danger, if the act were passed, that it would precipitate an industrial crisis which would close the smelter and throw many out of employment; that it was alleged by those who pretended to know the conditions respecting smelting that it would not stand a reduction of hours unless the wages were materially reduced; that we had not sufficient information to warrant us in passing this legislation in the face of these representations, and that in any event the proposed act was not to come into force until the 1st of March, 1906, and before that time information could be obtained respecting the conditions surrounding smelting and if necessary legislation could be introduced which would come into effect as soon, or nearly as soon, as that under the proposed bill.

"During the interval between the sessions 1905 and 1906, mainly owing to the exertions of Mr. MacDonald, leader of the opposition, an agreement had been arrived at between the smelter employers and employees in all the smelters in B. C. except those on Vancouver Island. There was therefore no danger of a disastrous strike or lockout. The change had not increased the operating expenses nearly so much as had been represented that it would, and the passing of the act would make permanent a condition which had in the majority of smelters in the province been voluntarily agreed to. A majority of the opposition voted for the bill, but it was defeated by 19 to 17.

WEST KOOTENAY POWER.

"Another bill which I regret was defeated was the West Kootenay Power and Light bill. The West Kootenay Power and Light company was incorporated in 1897, and was authorized to supply power, light and heat within a radius of 50 miles from the city of Rossland. In the same year the Cascade Power and Light company was incorporated and was authorized to supply heat and power 40 miles from Cascade. The first named company wished to have to the area of its operations extended to the district of Yale. The Cascade company is utterly unable even now to supply the power required in the Boundary district and it is expected the demand for power will be more than doubled within the next year. The Cascade company, however, claimed that it was entitled to a preference for the power it could supply and unless that were given it would lose \$500,000 or so, which it had invested, as it could not compete with the West Kootenay company. The matter was before the private bills committee for days and a great deal of evidence given. This evidence showed clearly the great need of the Boundary district for power, and the incapacity of the Cascade company to supply it. Representatives of the Cascade company made a most persistent lobby and when the bill came up in the house sympathy with that company was surprisingly strong.

"When the bill came up in committee Dr. Young of Atlin moved the following amendment which was voted down, to repeal section 1, and substitute the following in lieu thereof:

"1. Subject to the rights, powers, privileges, priorities, and to the franchises granted to the said Cascade Water, Power and Light Company, Limited, by the said act, chapter 51 of the statutes of 1897, and to the full and complete enjoyment thereof, and in respect only of such power as may be required by the inhabitants, cities, towns, mines, smelters, railways and tramways within the area defined by the said act in excess of the amount which can be produced by the Cascade Water, Power and Light Company, Limited, from time to time at their works now or hereafter to be constructed on the said Kettle river near Cascade City aforesaid, the West Kootenay Power and Light Company, Ltd., are hereby authorized and empowered to supply power, light and heat by electricity to the inhabitants, cities, towns, mines, smelters, railways and tramways in the District of Yale, and to construct and maintain buildings, sub-stations, wires, poles and appliances necessary and proper for the transmission of electricity from any of the works of the said West Kootenay Power and Light Company, Ltd., now or hereafter erected at Bonnington Falls, on the Kootenay river, and subject as aforesaid the expression 'the said area' used in the said statute, chapter 63 of the Statutes of 1897, is hereby extended so as to include the whole of the said district of Yale."

"Then it was proposed by Mr. Ross to add the following as a new section: 'Before exercising any of the rights, powers or privileges by this act given

or conferred, the West Kootenay Power and Light Company, Limited, shall obtain the sanction of the lieutenant-governor in council, who shall impose such terms as may be just and equitable, after taking into consideration the rights, powers, privileges and priorities of any now enjoyed by any other company at present operating and supplying light, heat and power in the said district of Yale.'

"Notwithstanding the fact that the needs of the Boundary district for power were pointed out in the debate which took place on this proposed section, the premier made a strong speech in favor of the Cascade company and of the adoption of the proposed section and it was carried in committee, every member of the executive voting for it.

"When the bill came up for report at the next sitting of the house, I wanted to strike out the section which Mr. Ross had inserted and insert the following in lieu thereof:

"The lieutenant-governor in council shall have the right from time to time to fix the maximum and minimum rate or rates which may be charged by the said company for power, light and heat supplied, or which may be supplied by the company to inhabitants, cities, towns, mines, smelters, railways and tramways for any purpose whatever in the districts of Yale and Kootenay, and the said company shall not have the right or power to charge or collect any rate or charge in excess thereof."

"This was voted down and as Mr. Fraser, who had charge of the bill, would not move the adoption of the report as the bill then stood, it went over to the next sitting.

"At the next sitting Mr. Bowser moved to strike out all the words after the word 'Cascade' in the section inserted by Mr. Ross. This carried. As the section now stood it required the sanction of the government before the bill came into force, but there was no assumption of prior rights by any other company. The report was then adopted and Mr. Fraser moved that the bill be read a third time. Mr. Wright of Ymir objected, and as a bill cannot be advanced two stages if any member objects, and as the premier refused to hold another sitting of the house the bill was killed.

"The session closed with the government still in power but discredited by the Kaien Island scandal, by the transparent alliance with the Socialists, by the failure of the government to observe its pre-election pledges, especially in the matter of providing railway facilities to aid in developing the natural resources of this province. There is no doubt that disintegration of the government has set in, as indicated by the resignation of Attorney-General Wilson and by the dissatisfaction of some of its followers, and it is doubtful whether it will ever face the legislature again."

Eczema, Tetter, Salt Rheum, Itch, Ring Worm, Herpes, Barbers' Itch.

All of these diseases are attended by intense itching, which is almost instantly relieved by applying Chamberlain's Salve and by its continued use a permanent cure may be effected. It has, in fact, cured many cases that had resisted all other treatment. Price 25 cents per box. For sale by all druggists.

Chicago, Milwaukee & St Paul Railway
'THE MILWAUKEE'

Sleeplessness.

Disorders of the stomach produce a nervous condition and often prevent sleep. Chamberlain's Stomach and Liver Tablets stimulate the digestive organs, restore the system to a healthy condition and make sleep possible. For sale by all druggists.

EARN CASH

In Your Leisure Time

If you could start at once in a business which would add a good round sum to your present earnings—WITHOUT INVESTING A DOLLAR—wouldn't you do it?

Well, we are willing to start you in a profitable business and we don't ask you to put up any kind of a dollar.

Our proposition is this: We will ship you the Chatham Incubator and Brooder, freight prepaid, and

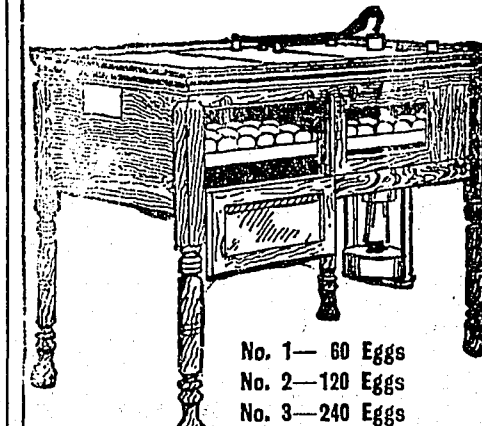

You Pay No Cash Until After 1906 Harvest.

Poultry raising pays.

People who tell you that there is no money in raising chicks may have tried to make money in the business by using setting hens as hatchers, and they might as well have tried to locate a gold mine in the cabbage patch. The business of a hen is—to lay eggs. As a hatcher and brooder she is out-classed. That's the business of the Chatham Incubator and Brooder, and they do it perfectly and successfully.

The poultry business, properly conducted, pays far better than any other business for the amount of time and money invested.

Thousands of poultry-raisers—men and women all over Canada and the United States—have proved to their satisfaction that it is profitable to raise chicks with the

No. 1—60 Eggs
No. 2—120 Eggs
No. 3—240 Eggs

CHATHAM INCUBATOR AND BROODER.

"Yours is the first incubator I have used, and I wish to state I had 52 chicks out of 52 eggs. This was my first lot, truly a 100 per cent. hatch. I am well pleased with my incubator and brooder. THOS. McNAUGHTON, Calliwick, D.C."

"My first hatch came off. I got 170 fine chicks from 180 eggs. Who can beat that for the first trial, and so early in the spring. I am well pleased with incubator, and if I could not get another money could not buy it from me. Every farmer should have a No. 3 Chatham Incubator—P. W. RAMSAY, Dunnville, Ont."

"The incubator you furnished me works exceedingly well. It is easily operated, and only needs about 10 minutes attention every day. R. McGUIRE, Moose Jaw, Assa."

The Chatham Incubator and Brooder is honestly constructed. There is no 'humbug' about it. Every inch of material is thoroughly tested, the machine is built on right principles, the insulation is perfect, thermometer reliable, and the workmanship the best.

The Chatham Incubator and Brooder is simple as well as scientific in construction—a woman or girl can operate the machine in their leisure moments.

LE ROI SHARES

Thrown Away as Rubbish,
Found as a Fortune.

In the early days of Rossland, when Le Roi shares were selling at 5 cents, a shabbily-dressed man entered a small tailor shop in a small town in Oregon.

"Tailor," he said, "I want a suit of clothes, but I have no money. If you'll make me a suit I'll give you 5,000 shares of Le Roi stock."

The tailor demurred at first. He wanted cash, but after a while the persuasive powers of the miner won upon him and he accepted the shares in exchange for the clothes. Three years passed away. Careful development proved that the Le Roi mine was a property of great value and wise men began to gather in odd blocks of the stock; they were able to trace all the shares except 5,000. Advertisements were inserted for the missing shares, without meeting with a response for a long time. After the lapse of some months the tailor's eye happened to meet one of the advertisements. He remembered the 5,000 shares that had been given him for the suit of clothes and which he had thrown into an old soap box containing rubbish. He had forgotten the name of the mine. In fact, he had regarded the stock as of no value and the suit as good as given away. Finally he decided to look at the certificates and to his joyful surprise found that they were the identical ones that had been advertised for and were worth \$7 a share. He surrendered the stock upon payment of their value and departed for the Fatherland.

An almost identical incident has just developed at San Francisco. A tailor named Schoenstein went to Tonopah a little more than a year ago and opened a tailor shop. "One day," relates Schoenstein, "a broken gambler came into my shop. He was bleary-eyed and shaky after a night at the tables, and broke, but the lust of the game was still in his blood, and he wanted to play more."

"Bill," he knew me well; anyway, first names go in Tonopah. 'Bill,' he remarked, 'here's a bunch of Tonopah extension. Give me fifty bones and it's yours.'

"My whole capital was \$80, but I decided to buy. I gave him the money and bought a round of drinks, which cost me \$2 more."

Schoenstein then went to San Francisco. He left the stock behind when he changed rooms. He later returned for it and was informed by the landlady that it had been thrown into the rubbish in the cellar and might possibly be found there. There in an ash barrel lay the stock which three weeks ago was worth \$27,500. Schoenstein put the stock in the bank. Four weeks ago he received an offer of \$2,500 for the stock. He accepted. A little later he learned to his sorrow that the stock was worth \$27,500 at the time he sold. Still later he learned that Schwab, the steel magnate, had sold it for \$500,000. Such is luck.—Vancouver World.

MERCHANT'S CORNER

Have One Price and Stick to it.

It is an assertion frequently made that an article has two prices, what it is worth and what it will fetch. Under certain circumstances this may be the case, as, for instance, at a forced bankruptcy sale where goods may be sold at one-half their value, but it is bad commentary on a merchant, when business is normal to hear it stated of him that he has two prices for his goods what he asks and what he takes for them. Such a man gets well known and for this reason, even when he asks what is a first price on an article, he rarely succeeds in getting it, because customers, knowing how he can be beaten down in his prices, will not buy from him until he make some concession in the price. How much better it would have been had he taken a decided stand at the first and refused to lower his price, even though he lost the sale by so doing. As some compensation for this, he would have gained the respect of the community at large, and he would have found that by degrees, provided that he adhered to his decision to have only one price, he was drawing the trade of the most desirable customers in the town and locality. People like to deal with a man of this kind because they feel that all his customers will be treated alike and no favors or concessions will be granted to one more than to another. This applies to dry goods men just as to others merchants, and should be an encouragement to those weak-kneed members of the trade who are always making unnecessary concessions to a

customer for fear of losing a sale. If your goods are worth the price you ask for them, don't be bull-dozed into taking less and thus wronging yourself, and your family and doing the trade in general an immeasurable injury.

Hugh Cameron of Camp McKinney was a visitor in the city this week.

A Favorite Remedy for Babies.

Its pleasant taste and prompt cures have made Chamberlain's Cough Remedy a favorite with the mothers of small children. It quickly cures their coughs and colds and prevents any danger of pneumonia or other serious consequences. It not only cures croup, but when given as soon as the croupy cough appears will prevent the attack. For sale by all druggists.

Synopsis of Regulations Governing the Disposal of Dominion Lands within the Railway Belt in the Province of British Columbia.

A LICENSE to cut timber can be acquired only at public competition. A rental of \$5 per square mile is charged for all timber berths excepting those situated West of Yale for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:—

Sawnlumber, 50 cents per thousand feet B. M.

Railway ties, eight and nine feet long, 1½ and 1¼ cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent on sales.

A license is issued as soon as a berth is granted but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.

The dues payable under a permit are \$1.50 per thousand feet B. M., for square timber and sawlogs of any wood except oak; from ½ to 1½ cents per lineal foot for building logs; from 12½ to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties; and 50 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of twenty-one years at a rental of two cents per acre per annum.

Coal lands may be purchased at \$10 per acre for soft coal and \$20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for agricultural purposes may be made personally at the local land office for the district in which the land to be taken is situated or if the homesteader desires, he may on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the District, within which the land is situated, receive authority for some one to make entry for him.

A fee of \$10 is charged for a homestead entry.

A settler who has received an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence on and cultivation of the land in each year during the term of three years.

It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property with buildings for their accommodation will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) or any person who is eligible to make a homestead entry under the provisions of the Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY,
Deputy of the Minister of the Interior.

Progress and
Development

Progress and development are terms closely identified with life in the West. In a new country people are working daily for the upbuilding of town, city and district, and for the improvement of the conditions under which men and women are called upon to live. Every act of daily life that tends to bettering one's surroundings makes directly or indirectly for the improvement of society generally. In all this the local newspaper plays an important part. Among its local readers it stimulates an increasing interest in their home city, keeping them posted on all local happenings, and becomes a welcome weekly messenger, bearing bright and welcome tidings. Among its outside readers it forms a valuable advertising medium making known the merits, advantages and prospects of the city and attracting thither citizens who want employment, business firms looking for locations, and capitalists seeking investments. In the upbuilding of a town, city or district the local paper is an important factor.

BOUNDARY CREEK TIMES

The Boundary Creek Times aims to do its full and complete share in the upbuilding and improvement of Greenwood and the Boundary district. It is not handicapped in its work by any restraining obligations to any party, clique or corporation, but it is free at all times to rise up and promote the best interests of the City of Greenwood and its people. To do this most thoroughly and satisfactorily the Times must have the support and cooperation of the citizens of Greenwood.

Every effort is being put forth to make the Times the class of newspaper the people want. Increasing attention is being continually paid to mining news, especially of that nature that will interest those employed in the work as well as those whose capital is invested in the properties. With this end in view we aim to have

A Subscriber in Every Home

As a result of the efforts that have already been put forth, we believe that an increased interest is already being taken in its news columns. We have evidences of this from the fact that the subscription list is already growing; the street sales are increasing weekly and the news dealers find more demand for each succeeding issue. This is a satisfactory condition of affairs that acts in two ways. It increases the revenue of the circulation department and it makes the paper a first-class advertising medium for local business men.

In handling local advertising every effort is put forth to protect the Greenwood merchant. The local page is reserved for them and foreign advertising has been repeatedly refused because the advertising manager refused to disturb the positions held by local advertisers.

Business men of Greenwood, we are here to protect and advertise you. We are protecting you! Do you advertise? Read The Times, subscription \$2.00 per year.

Advertise in the Times, Rates Reasonable

GREENWOOD IS FIRST

Local Prosperity Second to None.

INFORMATION WANTED

People in the Wheat-Country Want to Know More About the Boundary District.

F. W. McLaine returned Tuesday from a business trip to Calgary. He went by way of Revelstoke and returned via Kootenay Landing and Nelson. Speaking of business conditions he said that things in Calgary were quite prosperous and the people making lots of money growing wheat. "There is considerable interest shown in the Boundary district generally," said Mr. McLaine. "They have a very good opinion of Greenwood especially, but they are not well posted as to details. The Granby dividends declared some time ago have gone far to strengthen confidence, and the progress of the other smelters is being closely watched."

Mr. McLaine is of the opinion that an organized effort should be made to advertise the resources of the Boundary among outside cities. "There are lots of farmers who have made money out of wheat growing and are looking for investments, and if the advantages of Greenwood and vicinity were made more widely known much of this capital would come in. The 20,000 club in Nelson is doing this kind of work and people in outside places are making many enquiries. The hotels are actively cooperating and among other methods employed 'Find out about the 20,000 Club' is printed on the menu cards."

"Among other B. C. towns experiencing business activities is Golden. This town has taken on a new lease of life and promises to become a thriving center. The building of the Kootenay Central branch of the C. P. R. is making a great deal of work. A contract for ten miles of the road has just been let and work is expected to start April 1st. This road, running from Golden to Fort Steele, will open up a rich agricultural district along the northern part of the route, while the southern part will tap a good mining country."

Mr. McLaine found prospects good in all the districts visited, but in no place better than they are right at home in Greenwood.

WANTED; by Chicago wholesale house, special representative (man or woman) for each province in Canada. Salary \$20.00 and expenses paid weekly. Expense money advanced. Business successful; position permanent. No investment required. Previous experience not essential to engaging. Address General manager, 134 Lake Street, Chicago, Ill., U. S. A. 29-38.

Two Men May Look ALIKE

The one will be honest and reliable. The other questionable. So with boots. All boots that look well are not honest. Leckie Boots are all leather and made to meet western requirements. The logger, the prospector and the miner can depend on them when far from the busy haunts of men.

Ask your dealer for "Leckie Boots" and take no substitute.

PHOENIX NOTES.

The contract for digging the Twin Creek ditch was awarded at the last council meeting to Wm. Fleming and James Murdock at the following prices dirt and hard pan 75 cents per yard, rock \$1.50. It was also decided to purchase a team from J. W. Jones at Grand Forks and a wagon in Greenwood, the latter to cost \$1.00, besides the necessary harness for the use of the city.

Mrs. A. B. Hood accompanied by Mrs. R. D. Morkill left Tuesday for Sherbrook, Quebec.

Allan Morkill ledger-keeper for the Eastern Townships bank has left for Sherbrooke, Quebec whence he has been transferred. Before leaving his many friends presented him with a gold watch and chain as a token of esteem.

A PLEASING SIGHT.

Most people enjoy looking at beautiful flowers and any one visiting the greenhouse of Mrs. Ada Bernard, Government street north, will see many floral beauties that please the eye and delight the olfactory senses. Carnations of all colors and shades, attract the first attention, but tulips, calla lilies, lilies of the valley, hyacinths, freesias and roses, in bright and delicate colors, make the place of delight to all lovers of the beautiful. There are also many fine foliage plants, palms, aca, caria, century plants and king cactus. Mrs. Bernard also keeps a wide variety of bedding plants, which will be ready for use as soon as the gardens and lawns are ready for dressing.

OPPORTUNITY.

Master of human destinies am I!
Fame, love and fortune on my footsteps wait.

Cities and fields I walk: I penetrate
Deserts and seas remote, and passing by
Hovel and mart and palace, soon or late

I knock unbidden, once, at every gate!

If feasting, rise; if sleeping, wake before

I turn away. It is the hour of fate,
And they who follow me reach every state

Mortals desire, and conquer every foe
Save death. But those who doubt or hesitate,

Condemned to failure, penury and woe,
Seek me in vain and ceaselessly implore;

I answer not, and I return—no more.
—By late Senator John J. Ingalls.

Afflicted With Rheumatism.

"I was and am yet afflicted with rheumatism," says J. C. Bayne, editor of the Herald, Addington, Indian Territory, "but thanks to Chamberlain's Pain Balm am able once more to attend to business. It is the best of liniments." If troubled with rheumatism give Pain Balm a trial and you are certain to be more than pleased with the prompt relief which it affords. One application relieves the pain. For sale by all druggists.

HOW MICA IS MINED.

Mica is an essential in electrical apparatus, and has no substitute. It is produced especially in the land "where every prospect pleases." India employs more persons in mica mining than any other country, and the area covered by mica deposits is the largest known, yielding in 1902, 685 tons from 200 mines. The system followed is to open cuts along the outcrops of the mines where mica crystals are found and to alternate with crosscuts at right angles through the vein formation. The material is raised to the surface by rows of native women placed along the inclined opening, who pass buckets filled with mica from hand to hand, or pitchers filled with water for draining the works. The rough sheets are crudely trimmed by a knife, done up into packages and carried by carts to the shipping point. The wages paid are scarcely union labor rates, the women getting 3d per day, the men 4d and the overseers 8d.

Faith

You cannot be expected to have faith in Shiloh's Consumption Cure, the Lung Tonic, as a cure for Colds, Coughs and all diseases of the air passages, if you have not tried it. We have faith in it, and we guarantee it. If it doesn't cure you it costs you nothing. If it does it costs you 25c. That's fair. Try it to-day. Shiloh has cured many thousands of the most obstinate cases, and we do not hesitate to say that it will cure any Cold, Cough, Throat or Lung trouble. If we did not believe this we would not guarantee it. Shiloh has had an unbroken record of success for thirty years. It has stood every possible test without failure. Further

Proof

is found in the many testimonials of those who have tried Shiloh and been cured. Mrs. Archie Taylor, Asaph, Pa., writes:—"I bought a bottle of Shiloh's Consumption Cure and found it very beneficial. I have two children, and they both have a terrible cold. I gave them everything I could think of, but they got no better, until one evening my husband bought a bottle of Shiloh. We gave it to the children when they went to bed, and they slept all night. It cured them completely. I shall always keep it in the house."

The last shipment of Rambler ore, of which returns have just been received, went \$125 per ton. Mr. Nelson expects to make another shipment next week after the West Fork roads have improved.

The Miner's Union are arranging to give a benefit concert in the Auditorium April 12th. in aid of W. A. Nicholson who lost his eye sight some time ago as the result of a mine explosion.

E. Collier of Beaverdell was a visitor in the city this week. He is one of the many in that part of the country vitally interested in the Midway & Vernon decision having been in the employment of the company in the capacity of guide.

The Sisters Hospital acknowledge the receipt of blankets for the use of the Ambulance from Messrs Hunter-Kendrick Co., P. W. George, Rendell & Co, Russell-law-Caulfield Co, and T. M. Gulley & Co, and pillows from A. L. White & Co.

The C. P. R. are making preparations to build a spur line to the Providence mine. The mine owners have constructed ore d mpers and have completed all arrangements for loading cars as soon as the line is completed. In the meantime shipments have been suspended, but will be resumed with larger volume as soon as the C. P. R. are ready to place the cars.

ORE SHIPMENTS.

The ore shipments for the Boundary mines for the week ending Thursday night were 25,706 tons, an increase of 2,916 tons over the previous week. The largest increase is shown by the Granby, with 1,810 tons more than last week, while the Mother Lode, Emma, Sunset and Rawhide show small increases. The smelter treatment increased 1,910 tons.

THE STOCK MARKET.

Granby shares are quoted in Boston at \$12.87½. Other shres, especially Le Roi, show considerable activity, being quoted in London at £1 15s. 9d., an increase of 4s. 6d. over the quotations of Wednesday, March 21st. There is considerable demand for Le Roi stock and the indications point to higher prices. Rambler-Cariboo continues to be fairly strong and on Wednesday 38½ was bid and 40 cents asked. Canadian Gold Fields syndicate is quoted in Toronto at 6½ cents bid, 7½ cents asked. The following are the quotations up to Wednesday night, march 28th:

	ASKED.	BID.
American Boy.....	.01½	.01
Canadian Goldfields ..	.07½	.06½
Cariboo McKinney.....	.02	.01½
Center Star.....	.46	.45
C. M. & S. Co. of Can.....	135.00	130.00

Hecla.....	2.00	1.90
International Coal.....	.40	.34
Jumbo.....	.30	.29½
Rambler-Cariboo.....	.40	.38½
Sullivan.....	.04	.03
St. Eugene.....	1.05	.95
White Bear.....	.03½	.03
Roselle.....	.25	.24

ELDRIDGE RECOVERING

Information received from Midway this morning is to the effect that H. Eldridge, the young Midway druggist who was mistaken for Manager Moe of the Eastern Townships bank and held up and shot in the shoulder and hip, is resting easy and recovering as rapidly as can be expected. It is stated that there is no apprehension of dangerous results and complete recovery is apparently certain.

The unknown perpetrator of the outrage is still at large, and small hopes are entertained of ever capturing him. Vigilant watch is being kept on local surroundings and information has been wired to all parts of the country, especially to points in the neighboring states. Lack of details largely handicap operations, as little is known of the man's appearance. Mr. Eldridge is the only one who has any idea of what the would-be-murderer looked like and he remembers only that he wore a light colored hat,

MINERAL ACT.

Certificate of Improvements.

NOTICE.

"Blue Jay" Mineral Claim, situate in the Greenwood Mining Division of Yale District. Where located: In Skylark Camp. TAKE NOTICE that we, M. H. Kane, Free Miner's Certificate No. B8505, John W. Nelson, Free Miner's Certificate No. B8634, M. J. Price, Free Miner's Certificate No. B91690, Evan Parry, Free Miner's Certificate No. B91502, and L. S. Morrison, Free Miner's Certificate No. B91516, intend, sixty days from the date hereof, to apply to the Mining Recorder for Certificates of Improvements for the purpose of obtaining a Crown Grant of the above claim. And further take notice that action, under section 37, must be commenced before the issuance of such Certificates of Improvements. Dated this 26th day of March, A. D. 1906. 30/38

AT THE STRATHMORE.

Shipment Made This Week. Preston Next Week.

Work at the Strathmore is going on in a most satisfactory manner. Seven men are kept steadily at work day and night. A cross-cut on the 60-foot level has opened a fine body of high grade ore which, H. E. Shafer, the superintendent, states is the best that has yet been struck in the mine. This showing is most important as it is below all apparent surface disturbances and adds to the length of the ore body, as it trends to the south. The ore body is over 200 feet long and appearances are much more encouraging than ever before.

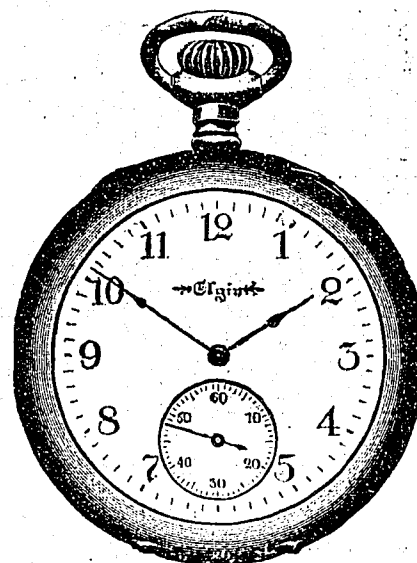

Sinking will be commenced next week and a first class new shaft will be made on the dips of the vein from the 60-foot level. At the same time the shaft will be raised to the surface. About twenty tons were shipped to the Trail smelter this week which is expected to run \$150 per ton. This is the first shipment that has been made for some months, but more are expected to be made at short intervals. Mr. Shafer is delighted with the prospects and expects the future to bring large returns. In the meantime he is opening a large area for stoping, and after development work has been pushed well forward he expects to take out large quantities of ore.

HELEN AND PRESTON.

Work at the Helen is going on in the north and south drifts with six men busy day and night. Both drifts are opening up a fine body of ore and prospects are bright.

The Preston expects to ship a car next week. Besides taking out ore for shipment, development work is being pushed forward as rapidly as possible at the 100-foot level. Seven men are at work and the mine looks good at all points.
