DOMINION SMELTER

Large Improvements Under Way—New Furnace

\$20,000 IN MACHINERY

An Up-to-Date Equipment for Shops and Smithy—New Spur Track—More Power Wanted.

"What effect will the defeat of the West Kootenay bill have upon your operations here?" Superintendent Thomas of the Dominion smelter at Boundary Falls was asked by a representative of The Times. "I cannot state at present what the effect will be," said Mr. Thomas. "It is certain, however, that it will make a big difference. We have ordered a large quantity of electric machinery for our new machine shop and it will arrive here next week. But with the present supply of power it will be useless, and unless more power can be secured it will mean a loss of many thousand-dollars." Mr. Thomas further stated that it would be necessary to install a new boiler in the meantime and this would mean a large expense that will be practically useless when the electric power is eventually increased.

MR. DRUMMOND SPEAKS.

Speaking with Mr. Drummond, manager for the company, it was learned that great doubt existed among the members of the company as to what improvements would be made this summer. A contract has been let to the Taylor Engineering company of New York for a giant copper matting furnace, 48x204 inches inside the jackets. This and other machinery costing close to \$20,000 had been ordered, and is now being delivered with the expectation that an adequate supply of electric power would be secured. Whether or not this machinery would be made use of Mr. Drummond was not in a position to state, but in any case great loss would be entailed. The present supply of power is insufficient to meet the demands of the smelter and mines, and Mr. Drummond stated that 1,000 horsepower more is needed and he did not believe it could be secured. If the company determines to use the new machinery the present steam plant will have to be enlarged, entailing heavy expense and adding largely to the cost of operating. The officials of the company are much disappointed over the turn affairs have taken and frankly state the whole future of their plant as well as the immediate improvements are very largely influenced and at present seriously handicapped by the lack of power.

In spite of all difficulties some improvements will be made in the plant this summer. Negotiations are now going on with the C. P. R. for a new spur between the dump yard and the creek. The object of this is to facilitate the handling of the matte. At present this has to be elevated and conveyed to the cars on the old spur. When the new spur is completed the matte will be handled direct from the moulds to the cars down a gentle incline. The new furnace which has been ordered will double the capacity of the plant. At present the output averages 600 tons per day, but when the improvements have been installed this will be increased to 1200 tons per day. This will of course cause greater activity in the mines and will employ extra men in all departments of the company's plants. The present staff at the smelter includes 120 men. This will probably be increased to 175.

A large machine shop has just been erected and is awaiting the arrival of the new machinery. It is a substantially constructed building with heavy timbers, well braced, and numerous windows supply plenty of light. Under the same roof and situated nearest the smelter is the new blacksmith shop. This as well as the machine shop, will be equipped with the latest machinery and when completed will be sufficient to meet the requirements of the plant. In the blacksmith shop

there will be a pit where the locomotive will be repaired and kept in perfect running order. Just outside a chute has been erected for the coal supply.

A noticeable feature about the whole plant is its convenient arrangement. All the departments are so arranged that the work is carried on, not with hurry or confusion, but rather with care, order and precision. The floors are all smooth and level and are kept free from refuse or droppings. The new ore bins recently constructed are now in use and have added to the general capacity and convenience.

In discussing the question of the Great Northern with the smelter officials, they stated they knew nothing of the railway's plans. They were naturally anxious that the road should build, as it would be a great convenience in hauling ore from Phoenix and in securing freight from the American side. It would also create competition for freight. Mr. Drummond was asked what were the company's plans regarding a new smelter at Greenwood or Midway but he would make no statement other than there was nothing definite. "It is understood that the G. N. wants you to move to Midway." "There has no proposition been made," said Mr. Drummond, "and we are pretty well fixed here. I don't know what will be done."

ORE SHIPMENTS.

Mines Keeping Well up to Past Records—Large Increases Expected

While the ore shipments for the week ending March 10 did not create a new record, the figures come close up to the high mark of the previous week. Development work in some of the largest mines temporarily interfered with the shipments but with this well under way future outputs are expected to be largely increased.

The following are the shipments and smelter treatments in detail:

BOUNDARY.		
MINE.	WEEK.	YEAR.

FIRE THIS MORNING.

Brigade Gets a Run but Little Damage Done.

A small fire occurred this morning about 10 o'clock in the building formerly occupied by the Independent Meat Market. A small hole was burned in the roof but otherwise no damage was done. The fire brigade was called out but their services were not required. Some delay was caused by the team becoming intractable. After they were hitched to the hose wagon they pranced around and refused to budge. The driver eventually got them started and drove down the Greenwood street hill at a lively pace. By this time most of the people down town had started for the scene of the fire and for a few minutes Copper street took on the appearance of a busy city. The driver showed considerable skill in handling his team and the fire laddies responded promptly. The alarm served a good purpose in giving the brigade practice and the fire was fortunately slight.

THE BILL DEFEATED

After Long Fight Kootenay Company Loses Case

YMIR MEMBER OBJECTS

Wright Opposes Third Reading and the House Prorogues Before Another Chance is Given.

With the proroguing of the provincial legislature came the defeat of the West Kootenay Power and Light company's bill for the extensions of their rights so as to include the distribution of power in Yale county. The contest was a long and fiercely fought one. The West Kootenay company fighting for greater powers and the Cascade company fighting for self protection with the floor of the house as the battle ground. The bill had been introduced, read a second time, passed through the committee stage where it was submitted to expert criticism and was reported to the house for the third reading in the last hours of the session. It is probable that the bill would have passed and have become law had not H. Wright of Ymir objected. Wright's objections blocked the bill and the government did not consider it important enough to prolong the session so that it might be taken up at another sitting. During the whole of the session the objecting member has not been conspicuous for his activity, for, beyond asking a few questions, he has done little to earn his sessional allowance and the confidence of his constituents, but at the last moment, as a long fought bill was about to pass, his feeble voice was raised and the business of a parliament and the interests of an important industry was blocked. The defeat of the bill by the mere fact that no vote could be taken on it unless the proroguing of the house be postponed was the feature of the closing session.

On Saturday there was a long debate on this bill, champions of the Cascade company insisting on restrictions being placed on the West Kootenay to protect the interests of the other. Finally the following amendment was inserted:

"Before exercising any of these rights, powers and privileges by the act given or conferred the West Kootenay Power and Light company, limited, shall obtain from the lieutenant-governor in council, the sanction of the lieutenant-governor in council, who shall impose such terms as be just and equitable after taking into consideration the rights, power, privileges and property (if any) now enjoyed by any other company at present operating and supplying light, heat and power in the said district of Yale."

The West Kootenay company objected to the passage of the bill with this amendment and tried to withdraw it, but the majority refused to allow this and insisted on its being passed with the above clause tacked on. Today's proceedings were fatal to the measure, as stated.

The defeat of this bill will probably have some effect on the local smelter companies' supply of power, but as both F. Keffer and J. E. McAllister of the B. C. Copper company are out of the city, no statement could be secured from the company.

James E. McCauley, president of the Holland Gold-Copper Mining company, owning properties situated on the west slope of Copper mountain, on the Similkameen river in vicinity of the Princeton, B. C., announces that sufficient funds have been secured to resume work on the company's properties and that its further development will be commenced as soon as the snow has left the ground. In speaking of the future development of the property, Mr. McCauley said: "I will put a force of men to work immediately and expect to have ore ready to ship by the time the rails are laid on the V. V. & E. and intend shipping steadily."

VESTED INTERESTS.

In a recent issue The Times published an editorial entitled "Vested Interests and the Power Question," dealing with the need for more power in the Boundary. At the beginning of the editorial reference was made to the undignified manner in which The Week, published in Victoria, had dealt with the same question, calling the West Kootenay Power and Light Co. a "hog" and a "buccaneer." Under the heading of "Vested Rights" The Week replies to The Times as follows:

"The Boundary Creek Times takes exception to the title by which The Week designated the West Kootenay Power and Light Company in last issue. If our esteemed contemporary will read the letter of our Kootenay correspondent in the current issue he will find full justification for the course we pursued. We are as anxious as our contemporary for the Boundary to have all the electric power required, and said so, but by common consent the bill as submitted would have ruined the Cascade Company. We advocated government control of rates. The Week always fights for the 'under dog'."

The Nelson article referred to applauds The Week's reference the "Kootenay Hog" and admits that the West Kootenay Power and Light Co. is not particularly popular in Nelson. It is not to be expected that a Nelson correspondent would spend much time or space fighting for the interests of the Boundary district. It is gratifying, however, to note that both The Week and its Nelson correspondent favor government control of rates.

WEST FORK NEWS.

Big Lumber Output—New Bridge at Rock-Creek.

The Yale Columbia Lumber company at Westbridge have two camps at work, one under their own supervision and one under sub contract, getting out logs. It is estimated that the output will run close to eight million feet of logs. These will be held until the high water commences when they will be driven down the Kettle river to Cascade, where the large timbers will be converted into lumber and the smaller into railway ties.

The new traffic bridge at Rock Creek over the Kettle river is now under construction. This bridge is being built by the government for the convenience of the wagon traffic and it will take the place of the present one which has been in a dilapidated condition for many months. The work is under the supervision of W. Middleton.

MIDWAY NOTES.

Baseball Club Started—Will the C. P. R. Build?

MIDWAY, March 15.—Baseball enthusiasts are making preparations for the baseball season and a club has been organized ready to start the game as soon as the weather permits. A strong list of officers have been chosen and the team will be fast and brilliant players. The officers are: Honorary president, P. Welch; president, W. M. Law; manager, Nate Green; secretary, H. R. Stevenson; treasurer, C. E. Moe; committee, J. Haverly, E. Melville, A. Soule, B. Logan and J. Dallas. Every effort will be made to put the grounds in first class shape and regular practices will be held as soon as possible. The team are anxious to get their skill up to the limit and they expect to be ready for all comers early in April. It is expected they will take a prominent part in the coming Empire Day celebration and if possible a baseball tournament will be arranged.

Dispatches from the east state that the C. P. R. contemplate extending their line west from here to Penticton. As yet however nothing has been done in the way of active work. Naturally much interest is taken here in the project and the local people hope to see work starting soon.

F. W. Hart, who has disposed of his furniture and undertaking business, contemplates moving to Greenwood where he has large real estate interests. The Times on sale at McRae Bros. & Smith.

PHOENIX NOTES.

The leading citizens of Phoenix, following the example of nearly all other progressive towns, have formed a social club to be known as the Phoenix Club. The names of the first trustees or managing directors are—Robert H. Karatofsky, Alexander McDonald, Alvin Taylor, Wesley Connell and John Mulligan.

The Phoenix Miners' Union are making preparations for holding the eighth annual convention of district No. 6, Western Federation of Miners here on the 20th inst. This is the first time a convention of any kind has been held in Phoenix, and the local miners are sparing no pains to properly entertain the expected delegates. David Oxley will erect a three-story

building, 30x60 feet, adjoining the Summit hotel. The contract has been let to H. A. Wright and the premises will be leased to D. Deane for a term of years.

The increasing patronage enjoyed by the Alexander hotel is taxing the accommodations of that popular hostelry to such an extent that the proprietor, R. V. Chisholm, is contemplating the addition of 25 or 30 rooms.

At the last meeting of the city council three matters of importance were dealt with. It was decided to ditch Twin creek, which runs through the center of the city from Church to Second streets. Two hundred and fifty dollars were voted to the fire brigade to assist in purchasing instruments, these to remain the property of the city, and it was decided to purchase a team of horses for the use of the fire department. A team has been badly needed for some time to haul the fire apparatus up the steep hills. It will also be used in street work of various kinds.

It is expected that work will soon be resumed on the government wagon road from Princeton to Saturday creek. This road will connect the Voget, the Sunset the Bryant and all camps on Friday creek, thereby forming an outlet for some promising properties. The road follows closely and almost parallel to the proposed line of the V., Y. & E.

MERCHANTS' CORNER

Seasonable Hints on Spring Wear.

New York reports that in men's hats for spring and summer manufacturers have produced a greater variety than in many preceding years. Early spring days call forth light-colored derbys and soft felts. A well known shop is showing a smart derby in light brown or Java color, with band and binding to match. The block follows the dimensions of the regular black derby, with its variations from one season to the next. This year the crown is a quarter of an inch lower than last. It begins at five inches and stops at five and three-quarters. Brims are set flat instead of rolling, which gives them a wider appearance. Light gray, with band and binding to match, is another novelty. Darker shades of gray trimmed with black and a very light pearl gray has a dove colored band and binding. Black derbies have narrow grosgrain bands and brim bindings. Aside from this there is little difference in the new styles, save for the height of the crown and the flat of the brim.

Of soft hats there is an endless variety of shapes, including Alpine or tourist hats, combination or telescope hats and the round felt with slightly rolling brim and crushed crown. One of the unusual styles in a tourist's hat is modelled after the regulation Alpine, with slightly increased height of crown. The color is the slate, and the wide silk band is black; the edge of the brim is raw and curled to the extent of about a quarter of an inch. The same hat comes in light grey with white band and binding, the latter being extremely rare. Another soft felt shown is made of pearl grey felt, with band and binding of a darker tone. The brim has a decided curl at the edges and the back turns up in such a manner that it completely hides the wide band.

TRY GOOD NOTES.

Broadcloth is extremely well liked by the tailor for carrying out princess effects.

Border frocks are evidently to be and of the leading styles of the coming summer.

The vogue of narrow neckwear comes to us this time from London, where it is quite the rage.

Gilt or nickel buttons have recently been put on the market for the front of tailored shirt waists.

Corded handkerchiefs are in excellent demand, especially those showing hand embroidered initials.

The rage for narrow Valenciennes lace has filled up the summer dress and bubbled over on the hats and parasols.

Some new pocketbooks which the city stores are showing show a leather strap on top which can be lengthened if desired.

Fancy buttons of contrasting color or to match, are much in vogue. Very few plain buttons are used on gowns.

Lace hats will replace the embroidered linen hats of last summer. They are made of narrow lace, ruffled close upon chiffon frames.

Afflicted With Rheumatism.

"I was and am yet afflicted with rheumatism," says J. C. Bayne, editor of the Herald, Addington, Indian Territory, "but thanks to Chamberlain's Pain Balm am able once more to attend to business. It is the best of liniments." If troubled with rheumatism give Pain Balm a trial and you are certain to be more than pleased with the prompt relief which it affords. One application relieves the pain. For sale by all druggists.

Faith

You cannot be expected to have faith in Shiloh's Consumption Cure, the Lung Tonic, as a cure for Colds, Coughs and all diseases of the air passages, if you have not tried it. We have faith in it, and we guarantee it. If it doesn't cure you it costs you nothing. If it does it costs you 25c. That's fair. Try it to-day.

Shiloh has cured many thousands of the most obstinate cases, and we do not hesitate to say that it will cure any Cold, Cough, Throat or Lung trouble. If we did not believe this we would not guarantee it. Shiloh has had an unbroken record of success for thirty years. It has stood every possible test without failure. Further

Proof

is found in the many testimonials of those who have tried Shiloh and been cured. Mrs. Archie Taylor, Asaph, Pa., writes:—"I bought a bottle of Shiloh's Consumption Cure and found it very beneficial. I have two children, and they had a terrible cough. I gave them everything I could think of, but they got no better, until one evening my husband bought a bottle of Shiloh. We gave it to the children when they went to bed, and they slept all night. It cured them completely. I shall always keep it in the house."

SHILOH

25c. with guarantee wherever medicine is sold.

Job Printing at the Times.

The chief cause of knocking out a machine and of breaking, bending and blunting drills is carelessness and the lack of supervision while starting holes. It is also contended that in underground machine boring in ground of the average hardness found in the Transvaal at 80 pounds instead of at 60 pounds. In West Australia 100 pounds pressure has been kept on the receiver when working in hard quartz. A mistaken desire for economy may induce the miners or the pipe repairer to use worn out piping, and hose for connections, which of course leads to a more or less constant loss of air by leakage.

THE EDITOR'S REWARD.

Verily the path of the country editor is a path of thorns.

His bread is promise and his meat is disappointment.

His creditors chase him by day and the devil grineth at him in his dreams by night.

One subscription is wood and behold it is rotten, soggy and of short measure.

He puffeth the supper gratis, then attendeth, pays his quarter, and receiveth two oysters or three strawberries.

He boometh the town and all things therein and receiveth no support, and is a prophet without honor in his own country. Two young people marry and he giveth them a great puff; they go to housekeeping and taketh not a paper.

He is bound down with woe, and his days are full of grief and troubles and vexation of spirit.

But he glideth along and endureth in patience, and it is written that he shall have his reward at the judgment. And we believe it, but it's a long way off.—Ex.

It not infrequently happens that underground workers who are engaged in the actual work of breaking rock know more about the efficiency of the various drills and devices provided for them than do the manufacturer. There appears to be one efficiency of actual operation and another efficiency determined by scientific test.

Keweenaw Point, celebrated for its copper deposits, is a peninsula in northern Michigan projecting into Lake Superior. It is as large as the state of Delaware and includes the two counties of Houghton and Keweenaw. Among its important towns are Calumet, Houghton, Eagle and Copper Harbor.

Eczema, Tetter, Salt Rheum, Itch Ring Worm, Herpes, Barbers' Itch.

All of these diseases are attended by intense itching, which is almost instantly relieved by applying Chamberlain's Salve and by its continued use a permanent cure may be effected. has, in fact, cured many cases that have resisted all other treatment. Price, cents per box. For sale by all druggists.

Gold production in Japan has grown from 3,129 ounces in 1874 to 142,300 ounces in 1904, and silver from 87,700 ounces to 1,981,290 ounces.

THE SETTING HEN—Her failures have discouraged many a poultry raiser.

You can make money raising chicks in the right way—lots of it.

No one doubts that there is money in raising chickens with a good incubator and brooder.

Users of the Chatham Incubator and Brooder have all made money. If you still cling to the old idea that you can successfully run a poultry business using the hen as a hatcher, we would like to reason with you.

In the first place, we can prove to you that your actual cash loss in eggs, which the 20 hens should lay during the time you keep them hatching and brooding, will be enough to pay for a Chatham Incubator and Brooder in five or six hatches, to say nothing whatever of the larger and better results attained by the use of the Chatham Incubator and Brooder.

If you allow a hen to set, you lose at least eight weeks of laying (three weeks hatching and five weeks taking care of the chickens), or say in the eight weeks she would lay at least three dozen eggs. Let the Chatham Incubator do the hatching, while the hen goes on laying eggs.

Our No. 3 Incubator will hatch as many eggs as twenty setting hens, and do it better. Now, here is a question in arithmetic:—

If you keep 20 hens from laying for 8 weeks, how much cash do you lose if each hen would have set and laid 3 dozen eggs worth 15 cents per dozen? Ans.—\$9.00.

Therefore, when the Chatham Incubator is hatching the number of eggs that twenty hens would hatch, it is really earning in cash for you \$9.00, besides producing for your profit chicks by the wholesale, and being ready to do the same thing over again the moment each hatch is off.

Don't you think, therefore, that it pays to keep the hens laying and let the Chatham Incubator do the hatching?

There are many other reasons why the Chatham Incubator and Brooder outclasses the setting hen.

The hen sets when she is ready. The Chatham Incubator is always ready. By planning to take off a hatch at the right time, you may have plenty of broilers to sell when broilers are scarce and prices at the top notch. If you depend on the hen, your chicks will grow to broilers just when every other hen's chicks are being marketed, and when the price is not so stiff.

The hen is a careless mother, often leading her chicks amongst wet grass, bushes, and in places where rats can confiscate her young.

The Chatham Brooder behaves itself, is a perfect mother and very rarely loses a chick, and is not infested with lice.

Altogether, there is absolutely no reasonable reason for continuing the use of a hen as a hatcher and every reason why you should have a Chatham Incubator and Brooder.

We are making a very special offer, which it will pay you to investigate.

Small Premises Sufficient For Poultry Raising.

Of course, if you have lots of room, so much the better, but many a man and woman are carrying on a successful and profitable poultry business in a small city or town lot. Anyone with a fair sized stable or shed and a small yard can raise poultry profitably.

But to make money quickly, by planning to take off a hatch at the right time, you may have plenty of broilers to sell when broilers are scarce and prices at the top notch. If you depend on the hen, your chicks will grow to broilers just when every other hen's chicks are being marketed, and when the price is not so stiff.

We can supply you quickly from our distributing warehouses at Calgary, Brandon, Regina, Winnipeg, New Westminster, B.C., Montreal, Halifax, Chatham. Factories at CHATHAM, ONT., and DETROIT, MICH.

The Chatham Incubator and Brooder has created a New Era in Poultry Raising.

The setting Hen as a Hatcher has been proven a Commercial Failure.

The Chatham Incubator and Brooder has always proved a Money Maker.

A Light, Pleasant and Profitable Business for Women

Many women are to-day making an independent living and putting by money every month raising poultry with a Chatham Incubator.

Any woman with a little leisure time at her disposal can, without any previous experience or without a cent of cash, begin the poultry business and make money right from the start.

Perhaps you have a friend who is doing so. If not, we can give you the names of many who started with much misgiving only to be surprised by the ease and rapidity with which the profits came to them.

Of course, success depends on getting a right start. You must begin right. You can never make any considerable money as a poultry raiser with hens as hatchers. You must have a good Incubator and Brooder, but this means in the ordinary way an investment which, perhaps you are not prepared to make just now, and this is just where our special offer comes in.

If you are in earnest, we will set you up in the poultry business without a cent of cash down. If we were not sure that the Chatham Incubator and Brooder is the best and that with it and a reasonable amount of effort on your part you are sure to make money, we would not make the special offer below.

WE WILL SHIP NOW TO YOUR STATION FREIGHT PREPAID

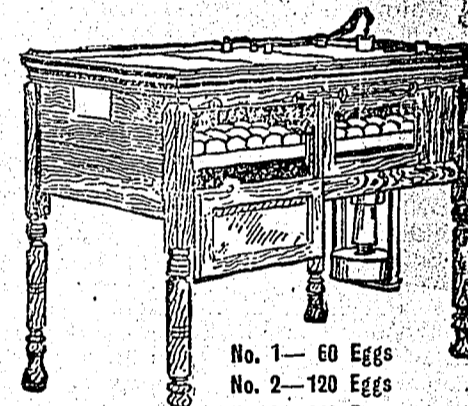

A CHATHAM INCUBATOR and BROODER

You Pay us no Cash Till After 1906 Harvest

"Gentlemen,—Your No. 1 Incubator is all right. I am perfectly satisfied with it. Will you please send me a larger one from you next year. H. M. Lockwood, Lindsay, Ont."

"Gentlemen,—I think both Incubator and Brooder is all right. I got 75 per cent. out of three hatches. K. S. FLEMING, Plattsville, Ont."

Gentlemen,—I had never seen an incubator until I received yours. I was pleased and surprised to get over 90 per cent. and the chickens are all strong and healthy. A child could operate machine successfully. JAS. DAY, Rathwell, Man."

No. 1—60 Eggs
No. 2—120 Eggs
No. 3—240 Eggs

THE CHATHAM INCUBATOR—Its success has encouraged many to make more money than they ever thought possible out of chicks.

Every Farmer Should Raise Poultry

Almost every farmer "keeps hens," but while he knows that there is a certain amount of profit in the business, even when letting it take care of itself, few farmers are aware of how much they are losing every year by not getting into the poultry business in such a way as to make real money out of it.

The setting hen as a hatcher will never be a commercial success. Her business is to lay eggs and she should be kept in the nest. The only way to raise chicks for profit is to begin right, by installing a Chatham Incubator and Brooder. With such a machine you can begin hatching on a large scale at any time.

You can only get one crop of your feds in a year, but with a Chatham Incubator and Brooder and ordinary attention, you can raise chickens from early Spring until Winter and have a crop every month. Think it!

Quite a few farmers have discovered that there is money in the poultry business and have found this branch of farming so profitable that they have installed several Chatham Incubators and Brooders after trying the first.

Perhaps you think that it requires a great deal of time or a great deal of technical knowledge to raise chickens with a Chatham Incubator and Brooder. If so, you are greatly mistaken. Your wife or daughter can attend to the machine and look after the chickens without interfering with their regular household duties.

The market is always good and prices are never low. The demand is always in excess of the supply and at certain times of the year you can practically get any price you care to ask for good broilers. With a Chatham Incubator and Brooder you can start hatching at the right time to bring the chickens to marketable prices when the supply is very low and the prices accordingly high. This you could never do with hens as hatchers.

We know that there is money in the poultry business for every farmer who will do it right. All you have to do is get a Chatham Incubator and Brooder and start it. But perhaps you are not prepared just now to spend the money. This is why we make the special offer.

IS THIS FAIR?

We know there is money in raising chickens. We know the Chatham Incubator and Brooder has no equal.

We know that with any reasonable effort on your part, you cannot but make money out of the Chatham Incubator and Brooder.

We know that we made a similar offer last year and that in every case the payments were met cheerfully and promptly, and that in many cases money was accompanied by letters expressing satisfaction.

Therefore, we have no hesitation in making this proposition to every honest, earnest man or woman who may wish to add to their yearly profits with a small expenditure of time and money.

This really means that we will set you up in the poultry business so that you can make money right from the start, without asking for a single cent from you until after 1906 harvest.

If we know of a fairer offer, we would make it. Write us a post card with your name and address, and we will send you full particulars, as well as our beautifully illustrated book, "How to make money out of chicks." Write to-day to Chatham.

THE MANSON CAMPBELL CO., Limited, Dept. No. 217, CHATHAM, CANADA
Let us quote you prices on a good Fanning Mill or good Farm Scale.

Progress and Development

Progress and development are terms closely identified with life in the West. In a new country people are working daily for the upbuilding of town, city and district, and for the improvement of the conditions under which men and women are called upon to live. Every act of daily life that tends to bettering one's surroundings makes directly or indirectly for the improvement of society generally. In all this the local newspaper plays an important part. Among its local readers it stimulates an increasing interest in their home city, keeping them posted on all local happenings, and becomes a welcome weekly messenger, bearing bright and welcome tidings. Among its outside readers it forms a valuable advertising medium making known the merits, advantages and prospects of the city and attracting thither citizens who want employment, business firms looking for locations, and capitalists seeking investments. In the upbuilding of a town, city or district the local paper is an important factor.

BOUNDARY CREEK TIMES

The Boundary Creek Times aims to do its full and complete share in the upbuilding and improvement of Greenwood and the Boundary district. It is not handi-

capable to any party, clique or corporation, but it is free at all times to rise up and promote the best interests of the City of Greenwood and its people. To do this most thoroughly and satisfactorily the Times must have the support and cooperation of the citizens of Greenwood.

Every effort is being put forth to make the Times the class of newspaper the people want. Increasing attention is being continually paid to mining news, especially of that nature that will interest those employed in the work as well as those whose capital is invested in the properties. With this end in view we aim to have

A Subscriber in Every Home

As a result of the efforts that have already been put forth, we believe that an increasing interest is already being taken in its news columns. We have evidences of this from the fact that the subscription list is already growing; the street sales are increasing weekly and the news dealers find more demand for each succeeding issue. This is a satisfactory condition of affairs that acts in two ways. It increases the revenue of the circulation department and it makes the paper a first-class advertising medium for local business men.

In handling local advertising every effort is put forth to protect the Greenwood merchant. The local page is reserved for them and foreign advertising has been repeatedly refused because the advertising manager refused to disturb the positions held by local advertisers.

Business men of Greenwood, we are here to protect and advertise you. We are protecting you! Do you advertise? Read The Times, subscription \$2.00 per year.

NOTICE.
NOTICE is hereby given that 60 days after date I intend to apply to the Honourable The Chief Commissioner of Lands and Works for permission to purchase 640 acres of land, situated in the Osoyoos Division of Yale District (Similkameen Land Division) British Columbia, described as follows:
Commencing at a post planted at the North-East corner of Lot 3246 in said Division, thence running about 80 chains East, thence 40 chains North, 20 chains East and 40 chains North, thence 80 chains West, to the North-East corner of the land applied for by Wm. G. McMyun, thence Southerly following the boundary of said land applied for by Wm. G. McMyun, to the point of commencement.
Dated 18th December, 1905.
EDWARD B. McMYNN.

NOTICE.

THE KETTLE RIVER VALLEY RAILWAY COMPANY will apply to the Parliament of Canada at its next session for an Act, further amending Section 8 of its Act of Incorporation (1 Edward VII).

- To amend the Act of Incorporation of the Kettle River Valley Railway Company, British Columbia, to read:
 - To construct a branch northerly from Hedley along Twenty Mile creek for a distance of about twenty miles.
 - To construct a branch from a point on the said extension, from Midway to Hedley, to Penticton, British Columbia.
 - Giving the Company running powers and rights over the line of railway of the Columbia and Western Railway Company now constructed and in operation between Grand Forks, British Columbia, and Midway, British Columbia, together with all its branches and connections or any portion thereof, between the said Grand Forks, and Midway, British Columbia.
 - Further amending Section 4 of said Act of Incorporation by increasing the capital of the Company to Five Million Dollars.
 - Amending Section 10 of the said Act of Incorporation by striking out the words "thirty five thousand" in the second line thereof, and substituting therefor the words "forty thousand".
- Dated at Toronto this 6th day of February, 1906.
MACDONELL & BOLAND,
24-28. Solicitors for Applicants.

NOTICE.

To James Wilder, Joseph A. Devlin and Cosens Bros.

TAKE NOTICE that the Vancouver, Victoria and Eastern Railway and Navigation Company require from you for the purposes of their railway all and each of your estate and interest in the lands hereinafter described, and will take under the provisions of the Railway Act, 1903:
ALL AND SINGULAR those certain parcels or tracts of land and premises situate, lying and being in the Osoyoos Division of Yale District and being the portion of the South-West quarter of Section 18, Township 67, in said Osoyoos Division of Yale District, described as follows: A strip of land 1,780 feet more or less in length, extending from the west limit to the north limit of said South-West quarter of section 18, and 99 feet in width, being 49½ feet on each side of the entire line of the railway of the Vancouver, Victoria and Eastern Railway and Navigation Company for a distance of 892.3 feet from its intersection with said west limit and thence 300 feet in width being 100 feet on each side of the said center line for a distance of 200 feet, and thence 99 feet in width, being 49½ feet on each side of said center line for a distance of 587.8 feet more or less to its intersection with the north limit of said quarter section, and containing 4.04 acres more or less; the course of said center line being particularly described as follows: Beginning at a point in the west limit of said quarter section, 361.4 feet south of the north-west angle thereof, thence easterly by a tangent 272.3 feet, thence by a 3 degree curve to the right 430 feet, thence by a tangent 490 feet, thence by a 6 degree curve to the left 587.8 feet, more or less to a point in the north limit of said quarter section, 239 feet from the middle of said section 18, and being according to a plan of the said railway approved by the Board of Railway Commissioners for Canada and deposited in the Land Registry Office for the District of County of Yale at Kamloops.
AND TAKE NOTICE that the power intended to be exercised by the said Railway Company with regard to the lands above described is the taking of the said lands in fee simple for the purpose of constructing the said railway and works thereon and operating the same.
AND FURTHER TAKE NOTICE that the Vancouver, Victoria and Eastern Railway and Navigation Company are ready and willing and hereby offer to pay the sum of two hundred dollars as compensation for the lands above described and for any damages caused by the exercise of their powers therein.
Dated at Rossland, B. C., this 19th day of January, 1906.

Synopsis of Regulations Governing the Disposal of Dominion Lands within the Railway Belt in the Province of British Columbia.
A LICENSE to cut timber can be required only at public competition. A rental of \$5 per square mile is charged for all timber berths excepting those situated West of Yale for which the rental is at the rate of 5 cents per acre per annum.
In addition to the rental, dues at the following rates are charged:—
Sawalumber, 50 cents per thousand feet B. M.
Railway ties, eight and nine feet long, 1½ and 1¼ cents each.
Shingle bolts, 25 cents a cord.
All other products, 5 per cent on sales.
A license is issued as soon as a berth is granted but in unsurveyed land no timber can be cut on a berth until the licensee has made a survey thereof.
Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.
Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.
The dues payable under a permit are \$1.50 per thousand feet B. M., for square timber and sawlogs of any wood except oak; from ½ to 1½ cents per lineal foot for building logs; from 12½ to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties; and 50 cents per cord on shingle bolts.
Licenses for grazing purposes are issued for a term of twenty-one years at a rental of two cents per acre per annum.
Coal lands may be purchased at \$10 per acre for soft coal and \$20 for anthracite. Not more than 320 acres may be acquired by one individual or company.
Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.
Entries for land for agricultural purposes may be made personally at the local land office for the district in which the land to be taken is situated or if the homesteader desires, he may on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the District, within which the land is situated, receive authority for some one to make entry for him.
A fee of \$10 is charged for a homestead entry.
A settler who has received an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:
(1) At least six months' residence on and cultivation of the land in each year during the term of three years.
It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 heads of cattle, to be actually his own property with buildings for their accommodation will be accepted instead of the cultivation.
(2) If the father (or mother, if the father is deceased) or any person who is eligible to make a homestead entry under the provisions of the Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.
(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the act as to residence may be satisfied by residence upon the said land.
Application for a patent should be made at the end of three years before the local agent, sub agent or a homestead inspector.
Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.
W. W. CORY,
Deputy of the Minister of the Interior.

DECEPTIVE DEALING

The Folly of Dishonest Mining Transactions.

TRUTH STRONG ENOUGH

The Gilt-Edged Opportunities of Bril-Columbia Need No Colored Statements.

The following letter on the follies of fake mining deals was first published in the Similkameen Star:

Editor Star—Sir: Anyone that has examined mines long for himself or others will, I believe, readily admit that it is far more easy to obtain capital than it is to secure a prospect or mine that will bear out what it is represented to be and a business proposition with it. This statement may cause surprise to many claim owners and good prospectors, most of whom see little of the commercial side of life and who have been repeatedly baffled in every attempt to get financial aid for properties of merit, but it is a cold fact conceded by all posted in mining affairs.

A defective title, huge commissions over and above the net price, unbusiness-like propositions the promoter's utter lack of experience, principle, or influence are a few of the burdens that the legitimate side of mining has to bear and are the cause of many failures in the sale of mines. But in an experience of over forty years in most of the great camps in the examination of prospects and mines in all stages of development and conditions, including many fruitless trips with their attendant cost and hardship, convince me that the climax of all obstacles in the successful disposition of a mine or in securing funds is: misrepresentation. It matters little whether it is done by accident or design or from a standpoint of policy it is ultimately as foolish as it is futile and leaves in its wake a train of evils that at times almost staggers faith in humanity, and it is today the most serious problem that the great mining industry has to contend with.

The profession of the man who is by nature and experience equipped to inspect a mine, note all the strong and weak factors of the district and make an honest, clean cut report and protect his principles, is a rare and valuable acquisition. The leaser is the best expert in the world. He usually represents all the factors that develop high grade prospects into big camps. The ability that fits a man to inspect mining property compels him to be a keen judge of men as well as of rock—the former is by far the most difficult puzzle to solve. There is no laboratory in which the various specimens of lunacy can be analyzed that we must often come in contact with, especially when greed constitutes one of the chief factors. This honest but sometimes visionary type of man forms a factor in the evil we have to deal with in mining life. This intense spirit of greed, mingled as it often is, with various forms and degrees of insanity, starts at the top of the system, permeates every strata of social and business life, infuses itself into every process of mining and industrial life, on down till it enters into and mingles with the tailings of humanity. The number of people afflicted by this malady are more numerous than supposed, and infest every community.

There are also many forms of intoxication that are not caused by drinking adulterated whiskey. People who are supposed to be sober and in a normal state of mind do such mean and foolish things that the average drunkard acts like a sensible man compared with them. From the moment these strange hallucinations take possession of a certain class of people and become identified with a mine they dissolve partnership with all the common and business sense they possess, believing there is no further use for grey matter that it is all luck. Nature seems to have equipped them to act the fool for the benefit of the mining fakir, who manipulates these crude notions relative to mines to his own advantage and to the detriment of the camp and the sore disappointment of many.

That is one factor in the game—they are the anvil to receive blows, the other side is the hammer to give the blows and exists in shape of a combination or ring composed of a fiscal agent, an engineer and chemist somewhat careless of their professional

honor, a professor or geologist filled with far fetched and technical phrases, a pretended prospector who develops his claims usually and forever with an axe and pencil. These usually complete the ring, all of whom are filled with everything except a knowledge of mines and ore. The strange part of it is that no human effort can induce this clique to select or accept a property of any merit. If such were the case it would condone the crime to some extent and lead to the discovery of a mine. They surround their tale with a halo of myth and like the gold brick swindle they rarely approach the liberal spirited man of affairs but select the most penurious man in the community who is insanelly avaricious and thinks he is buying \$1000 in gold for \$100, knowing he is robbing some one of \$900. He is as guilty as the operator and if the mischief stopped here no great harm would be done. One must feel the need of supernatural power to even check this torrent of corruption and ignorance that attached itself to mining and medicine, both prolific fields for the vendor of quack schemes.

This province has done much to discourage exaggerated report of mines but continual effort and vigilance is the price of success. The truth is grand enough here. It surpasses the fiction of other places. But misrepresentation will injure and shackle progress for the mines, or men who use it.

It will tend to destroy confidence among responsible intending investors who are needed and whom we must look for in the old cities of wealth. After all, the progress of the industrial and commercial world rests upon confidence, labor and honor more than upon money. Every lie destroys confidence, every truth builds it up—the truth is genuine, the lie is spurious therefore the conflict between honest methods in mining and fakes resemble the difference between the counterfeit and the genuine dollar.

The struggles and failures and grand successes of mining life are the same as in other occupations. The western world owes its wealth and civilization to the pioneers of mining. The same business factors that created the millions of Marshall Field make millions for W. A. Clark. Geo. Hearst's name would sell a mine in the East or in London. Honor and human nature are the same in a mining camp as in New York or London, with a few good attributes in favor of the miner. There is one law that leads to success for those who desire to sell or develop mines on reasonable terms. A misrepresentation cannot be long concealed but terms can always be modified.

The resources of B. C. from a mineral and agricultural and climatic point of view are without a parallel in the western world. This fact is beginning to dawn on the outside world and is admitted by all who are familiar with the province.

Two great competing lines of railroad will give easy access to all parts of the Similkameen district. The vast wealth of power that can be generated from the numerous big streams, the great area of coal and timber in proximity to the seaboard are such mighty factors in the economy of things as to be beyond computation. Everything points to rapid development of all these resources, especially the mineral, all of which invites thousands of people and millions of money to this section.

JOHN F. LELAND.

Always Keeps Chamberlain's Cough Remedy in the House.

"We would not be without Chamberlain's Cough Remedy. It is kept on hand continually in our home," says W. K. Kearney, editor of the Independent, Lowry City, Mo. That is just what every family should do. When kept at hand ready for instant use, a cold may be checked at the outset and cured in much less time than after it has become settled in the system. This remedy is also without a peer for croup in children, and will prevent the attack when given as soon as the child becomes hoarse, or even after the croupy cough appears, which can only be done when the remedy is kept at hand. For sale by all druggists

IN SOUTH CAROLINA.

The South Carolina Legislature has resolved to abolish the State dispensary system of selling intoxicating liquor, but it has not provided for a return to the license system. The

State dispensary will be replaced either by local dispensary or by entire prohibition in each county, according as the people prefer by vote of the electors. The bill enacting this change will, if it is approved by the Governor, introduce other changes that seem to be improvements. One is that the salaries of the officials in charge of county dispensaries will not depend on sales. Another is that one-third of the profits on traffic goes into the public school fund, one-third to the county for general purposes and one-third to the town or city in which the dispensary is located.

There has never been found among the mysterious mound builders of the western continent any utensil that could be regarded as a lamp. The North American Indians who were found inhabiting the country on the arrival of the Europeans possessed no lamp. The pine torch was their only illuminating. The one lamp that can claim the distinction of being really American was the stone lamp of the Eskimo. When or where in the world the first lamps were made has as yet not been determined. Stone lamps and terra cotta lamps of crude design were in use thousands of years ago. The lamp of today is a product of the 19th century.

There have been no developments in the Midway and Vernon case this week. It is now before Chief Justice Hunter and everything depends upon his decision. Until Friday morning no word had been received as to the final settlement.

Letters received in Greenwood from the Alberta Railway and Irrigation Co., Lethbridge, state that on account of the strike among the coal miners they are unable to supply coal to the dealers here. This will probably cause a shortage of fuel.

It is reported from Victoria that the West Kootenay Power and Light company has offered to purchase the Cascade plant at \$200,000. It is understood that S. S. Fowler has refused, placing the value of his plant and good will at \$680,000.

The Helen mine, which has been closed down on the lower level for a few days on account of water and frost, will resume work again in a few days. Work with hammers started on the upper level Thursday. The presence of the water is considered a good sign and the lead is expected to prove a valuable one.

Work started this week at the Crescent mine on a large body of high grade ore. A large quantity of ore is in sight and will be taken out and shipped to the smelters as fast as possible. The present indications point to most profitable results and prospects were never brighter. Development work will be continued on both shaft and drifts.

A. M. Whiteside, solicitor for the Dominion Copper Co., Ltd., returned early this week from Victoria, where he had been engaged on business for his clients. A petition was presented to the supreme court amending the company's original charter, which provided that the capital be \$5,000,000 divided into shares of \$1.00 each, to provide that the value of the shares be increased to \$10.00 each and the number reduced to 500,000. An order was made confirming the alteration, and notice of this will be published in New York city and in Toronto.

It has been announced that the present session of the Dominion parliament will be a short one, ending probably in June. It was first intended that the tariff be revised, but as Hon. W. S. Fielding, chairman of the tariff commission, who recently met with a painful accident, is incapacitated for active work, it has been found impossible to do this and only legislation absolutely necessary will be dealt with. Sir Wilfrid Laurier has announced that an extra session will be called in November and the tariff dealt with then.

MINERS' CONVENTION

Annual Meeting Opens in Phoenix Next Tuesday

The eighth annual convention of district association No. 6, Western Federation of Miners, meets in Phoenix next Tuesday. Ernest Mills, secretary for the Greenwood branch. Henry Britzins and Fred Hazlewood have been appointed delegates to represent the local miners. A number of important questions will come up for discussion, among others the affiliation of the district association with the

Trades and Labor Council of Canada. For some time past the miners have felt that it would be to their interests to have co-operative stores in the Kootenays, and this question will also be discussed. Other matters pertaining to the welfare of the federation and labor will also be considered. District No 6 of the Federation comprises the province of British Columbia and includes nineteen unions as follows: Camborne, Grand Forks,

A business man's rainy day or Waterproof Boot without an equal. Ask to see them at your dealers.

L 169. MEN'S TAN CHIPPEWAN VEAL KIP WATERPROOF BOOTS
