A TENDERFOOT TALKS

Glad to get Back Home and Rest.

WHAT HE THINKS HE SAW

Out in the West, Where People are Alleged to Lie, Steal and Cheat for Their Town's Sake

The following from the Mail and Empire is refreshing. If there is any city on earth can beat Toronto in the mashes of booming, then the columns of its great dailies dealing with Cobalt stocks and other gambling devices have not been as influential as intended.

But we give the tenderfoot's report on the west herewith:

"The west is truly the land of the publicicy man, says Mr. Joseph E. Thompson, Commissioner of Industries and Publicity for Toronto, just returned home after attending the Orange Grand Lodge in Vancouver. Mr. Thompson told the Mail and Empire that he was now better able to judge the land values of Toronto than ever before.

"Do you mean that our prices here are rather stiff?

"Stiff! Not at all. In comparison with what real estate in the west is bringing property in Toronto is being given away at the present time. What do you think of a firm in Vancouver refusing $53,000 for a building that cost them $3,000 six years ago? You don't hear of that often in Toronto. I am better able now to put up a good, strong, illustrated lecture on Toronto land-values."

I encountered publicity commissioners, agents, secretaries and representatives wherever I went. Even little Nelson, B. C. has one or two. They spring up strongly around Fort William and increase in numbers and persistency as you go westward. Reaching Vancouver on a Sunday evening I was greeted by a delegation of them as I rose from my bed on Monday morning. "Didn't I think of settling there?" "Might they be permitted to show me why I should." "If they managed to pursuade me that I should, might they go further and put me wise to some very desirable real estate." These were a few of the questions buzzed at me. And there seems to be a gentleman of that ilk at every second door.

WESTERNERS ARE PRIME "BOOSTERS."

"The Westerners certainly know how to boost their city. Farther to the south in one famous city built on a hill there is an unwritten injunction, 'Lie, steal or cheat for Seattle,' and the spirit of the same has been wafted northwards. By the way, the good citizens of Seattle obey more than three commands. They also pay taxes for Seattle—about 34 mills on the dollar."

"The publicity agent is in the heyday in Victoria, where they spend really more on booming the city than in Toronto. Eleven thousand dollars was their bill last year. And Vancouver, Medicine Hat and other places are good spenders as well.

THAT REAL ESTATE BOOM.

The great and perplexing question at present in the west is how long will the real estate boom last? We had a pretty empty one and disastrous one in Toronto about fifteen years ago, you will remember. Well, in my opinion, they have less cause for a boom in the west now than we had then. And that was little enough. The banks have shut down tight on western real estate propositions. You can't raise a dollar from them on that commodity. Regina spent over $2,500,000 last year on building permits, and it hasn't much over 7,000 population.

WHEAT A MONTH BEHIND

"About the wheat situation. Of course, everyone talks with habitual optimism about the crop, but when you get a real opinion it simmers down to this—that everything depends on the length of the summer season and a long season is needed. The growth is now three or four weeks behind and the harvest ought to be in by Aug. 25. If they strike an early frost there will be a great shortage, undoubtedly.

"On the whole, I think that Ontario has nothing to fear for years from an industrial standpoint. That circle of towns within reach of Niagara power will undoubtedly remain the supply points for the west beyond our time. The western towns are all dependent upon local conditions. Vancouver has its lumber and its fish, for instance. Outside of that, it has practically no industries, and the same with other places."

WON'T BLOW OUT THE GAS

"Have you heard about the light eternal in Medicine Hat?" said Mr. Thompson, before rushing out to escort a westerner around the Queen city, "They are burning natural gas both day and night on the streets, because it is cheaper than to pay a man to blow it out."

THE THREE LINKS INSTAL

Tuesday evening the officers of Boundary Valley lodge No. 38, I. O. O. F., were installed by Walter Cook of Phoenix, D. D. G. M. He was assisted by the following past grands, acting as grand officers: W. B. Fleming, grand marshal; J. A. Russell, grand warden; F. B. Holmes, grand secretary; W. Elson, grand financial secretary; E. Hallett, grand treasurer. Following were installed:

A. E Braithwaite, N. G.
Frank Spearing, V. G.
R. J. Sanders, R. S.
G. B. Taylor, F. S.
E. Foyle Smith, Treasurer.
D. McDonald, W.
Sid. Storer, C.
S. Belt, R. S. N. G,
Alex. Robinson, L. S. N. G.

After lodge work a supper was served in the banquet hall.

HIGH SCHOOL EXAMINATIONS

The results of the entrance examinations to high schools were announced the past week. There was a general slaughter. Out of a total of 343 candidates in the province only 143 passed, or about 41 per cent. In this division, No. 3 inspectorate, comprising East and West Kootenay and Boundary district, 15 passed out of 46. In Greenwood only one—Jas. Galloway—passed. Grand Forks and Phoenix were less fortunate. Midway and Deadwood each passed 1. Following are the results in Inspectorate No. 3:

Cranbrook—Number of candidates 14, passed 2, Ruth A. Harvey 621, Charles A. McGowan 551.

Creston—Number of candidates 4, passed 3, George T. Huscroft 714, Vera Huscroft 691.

Fort Steel—Number of candidates 1, passed 0.

Grand Forks—Number of candidates 1, passed 0.

Moyie—Number of candidates 1, passed 0.

Golden—Number of candidates 5, passed 5, Charlotte Armstrong 793, Charles O. Dalquist 700, Dorothy Hambly 688, George Parson 574, John Rutherford 553.

Deadwood—Number of candidates 1, passed 1, Elsie F. Graham 550.

Greenwood—Number of candidates 7, passed 1, James R. Galloway 565.

Midway—Number of candidates 4, passed 1, Barbara M. Jackson 567.

Phoenix—Number of candidates 1, passed 0.

New Denver—Number of candidates 4, passed 2, Joseph M. Turner 653, Richard S. Turner 631.

Sandon—Number of candidates 1, passed 0.

Slocan—Number of candidates 2, passed 1, Adolph Beck 558.

ALLEGED SPY

A Japanese has been taken in the act of making plans of Fort Rosecrans in Southern California. That he had been capable and industrious appears to be evident from his possessions of 200 photographs showing the locations of the guns and general views of the harbor and government works. His plans and specifications of torpedo casements, electric machinery and control of the mine field would have been especially valuable to any enemy of the United States.

President Fallieres of France was last Sunday made the target at which a naval reservist fired two shots. Mercifully the bullets went astray, and the would-be-assassin went to prison.

The V. W. & Y. railroad is perfecting plans for the construction of a railroad bridge, across the second Narrows, near Vancouver. Speculation is rife as to the full meaning of the move and it is taken to indicate connections with the Grand Trunk Pacific from the north.

THE SMELTER TRUST

A Powerful Agency in Control

OF U. S. COPPER SITUATION

Believed to Exist, With United States Senator Guggenheim as it's Dominating Head

Investigation by Attorney General Buonaparte has convinced the United States Government that a trust exists, that absolutely controls the smelting industry of the United States. The Guggenheims, Senator Guggenheim of Colorado if you will, is at the head of it, and his word goes even with such political forces of the country as E. H. Harriman and J. J. Hill. It not only controls rates from the railroads, but it dictates as to whether the roads shall put spurs into a mine or not. If the mine is one the trusts wants, and cannot buy at it's own figures, it merely forbids the railways givivg the accommodation sought. The trust is now reaching out for the Alaska fields and unless the Government is able to cope with it, there is no limit to which it may go.

BY AUTO

Mr. Louis W. Hill, accompanied by a party of railway men, made the trip from Keremeos to Princeton by automobile last Tuesday, returning to Keremeos the following day. We should have been delighted to have had the party try their machine on the road up Boundary Creek, but the Hill family does't appear to like the looks of things in this valley

PRICES OF METALS

The prices of the metals continue very satisfactory, and with slight fluctuations, hover around the following:

Copper	21 cents
Silver	65 cents
Lead	5 cents

OUTPUT OF BOUNDARY ORES

The LOW GRADE mines of the Boundary, which first began shipment in 1900, sending out 100,000 tons that year, have been steadily increasing. The 1906 shipments were 1,161,537 tons, and that of 1907 will be a large gain thereon.

The HIGH GRADES, up to the end of 1906, had in the past four years shipped out over 10,000 tons with a value of over $1,000,000.

Mines.	Total to end 1906.	Tons in 1907

THE COAST PAPERS

The World and the Province newspapers have both been growing lately, growing in size, in quality, in circulation. Apparently business jealousy prompted the Province to declare that its circulation was twice as great as that of the World. Business jealousy or self protection on part of the World prompted that paper to bring suit for libel against the Province. The suit was recently tried out before Justice Clement. Mr. Martin appearing for the World and Mr. Davis for the Province. The presiding justice found for the World in the matter of fact and for the Province in the matter of law. As we understand it that means that the Province did not tell the truth about the World but that its falsehood did not constitute libel. The case was dismissed and each side pays its own costs.

THE DOUKHOBORS

The Doukobors in Manitoba appear restive. Last Monday night about 50 of them, men and women, tramped into Dauphin, Manitoba, clad in blue and pink night gowns and straw hats.

They were seeking for a warmer climate, but were seeking it via the Winnipeg route.

The Doukhobors have strange notions about Winnipeg. Once upon a time they started for there seeking the Christ, now it is a warmer climate they are after. From reports they are more likely to succeed in securing the heat than they were in looking for a Messiah

PAY ORE COLUMN

Preparations are being made to resume work on the Carmi property on the West Fork.

For the two weeks ending last Saturday, the district smelters reduced over 71,000 tons of ore.

The diamond drill is now in about 250 feet on the Elkhorn. In about 50 feet more the ledge is looked for.

New York parties are daily expected to conduct negotiations for the Gold Drop group on Wallace mountain at Beaverdell.

In doing some prospecting work on the Duncan, T. T. Henderson has unearthed some very fine looking ore veins.

Considerable Elkhorn stock is selling in the east at present. It would appear to be an excellent investment at present prices.

The Connection claim east of town is looking well. Messrs. Sutherland and White are working in the 7-inch lead, showing free gold.

Messrs. Scully and English, who own some valuable copper properties near Carmi, are in town preparatory to leaving on tommorrow's stage to continue development work.

The electric hoisting plant for the Sudbury was completed this week. The power line to this property runs from the north end of the town, passing over the Gold Bug hill.

A very fine lead of rich ore has been opened on the Relief claim near the Rambler at Beaverdell. A shaft has been sunk forty feet on the ore and the vein improves in size and character with depth.

D. Patterson, who was in town Thursday reports the Leroi in Camp McKinney looking particularly well. The Phoenix syndicate which bonded the claim some three months ago have done considerable work on the property since taking charge. They have crosscut the lead in several places and find the ore body 90 feet wide, lying between granite and diabase, and with shipping ore now in sight.

Very Fine

The Publicity Department of the Edmonton Board of Trade has gotten out quite the handsomest thing we have yet seen in the way of advertising. It is entitled "Ten minutes with Edmonton," and a copy of it comes to us through the courtesy of Edgar W. Dynes.

AN EASTERN VISITOR

Looks Over the Copper Situation

SEES GOOD PRICES AHEAD

Mr. Geo. L. Walker, of the Boston Commercial, Does the Copper Camps of the Boundary

One of our most prominent visitors this week was Mr. Geo. L. Walker, of Lexington, Mass., who accompanied by Mrs. Walker, is making a tour of the Boundary.

Mr. Walker is Editor and part owner of the Boston Commercial, and his weekly letters in that paper, dealing with the copper situation, constitute a prominent feature. Mr. Walker's views as expressed through his "Weekly Copper Letter," are eagerly sought after by mining men and brokers, and are widely distributed.

In addition to being a newspaper man of experience, Mr. Walker is a geologist and keeps in touch with mining development generally.

While in Greenwood Mr. Walker looked over the local smelting plants, and some of the mines and then went to Phoenix to continue his study of the district.

Mr. Walker is very confident that the price of copper is to remain firm for some time. He said he had discussed the matter with those most thoroughly conversant with the metals and especially copper, and the opinion was general that copper would not sell down to 15 cents again in a generation.

This is Mr. Walker's first visit to British Columbia, and he and Mrs. Walker, who is a Canadian, thoroughly enjoyed their trip west, even as they were enjoying their stay in the Boundary.

DONE IN FIGURES

Calgary places its population today at 21,500.

Russia has decided to expend $15,500,000 from 1909 to 1911 in the construction and ornament of new warships.

The government has authorized contracts for $1,500,000 worth of additional rolling stock for the Intercolonial.

The total circulation of Dominion notes, bank notes and specie in June was $58,316,531, the largest in many months.

Since April 1 last the immigration has totalled over 100,000, so that the total population at the present date is in the neighborhood of 6,600,000.

A raft containing 10,000,000 feet of lumber has been successfully towed from the mouth of the Columbia to San Francisco, a distance of 555 miles done in 7 days. The raft was 780 feet long, 55 feet wide and drew 23 feet of water.

Canada now has a population of over six and a half millions. The Department of Census and Statistics has recently made a careful and elaborate estimate of the population. It found that on the first day of April, this year, the population of Canada was, as nearly as could be estimated, 6,503,900. This is a growth of population in six years since the last decennial census, of 1,133,585. The total population in 1901 was 5,371,315. If the present rate of growth is maintained Canada will show a population of over seven and a half millions when the next census is taken.

THE DISTRICT SITUATION

The mining condition of the Boundary was never so satisfactory as at present. The mines are all busy, the smelters are busy, the railroads are rushed. Ore is coming down from the hills at a rate never before realized and copper is going east from the smelters as never before. For years the different mining companies have been busy getting their mines in shape to ship for the full requirements of the smelters. Not only has that point now been reached, but with smelter capacity only recently very much enlarged, the mines are capable of supplying the district's daily total smelting capacity of 6000 tons. Large faith and liberal expenditure have been necessary to realize this condition, but men of faith were in charge and men with money were behind them, and thus in seven years the Boundary's demonstration has been made. The improved price in copper and the prospect of its being maintained has stimulated the industry, and not content with present attainment the companies are reaching out for greater things. And while this is true of the old, new concerns are coming into the field, seeking a share in the Boundary wealth. The latest factor to enter the field, the Canadian Consolidated, begets fresh hope in the minds of the people and adds to the trio of big concerns operating in the district. There seems little ground for doubt that their ores will be smelted near to their properties. Whether this will be done at Greenwood or some other point is not of greatest moment. That it will be done eventually in the district is chief consideration.

Now that ore appears in plenty, that transportation rates are reasonable, that fuel supplies seem assured and that prices are satisfactory the industry would appear to have entered upon a career of unquestioned promise. The industry is on a profitable basis, the district's welfare is guaranteed. What towns and what people shall share most in this prosperity depends in the last analysis largely upon the spirit of the towns and the people themselves.

ON THE MOVE

From all parts of Canada come reports of business activity. From ocean to ocean the people are busy. In the mines, in the sawmills, at railway construction, in manufacturing establishments, in everything and everywhere the people are busy. And they are busy at remunerative prices. From every centre of the Dominion, the reply made to the Department of Labor's inquiry as to conditions comes the response "busy." The agricultural yield of the magnificent fields yearly grows greater. The output of increasing and enlarging factories yearly grows larger. The output of the mines increases yearly. Railroad mileage is being rapidly extended and new fields are being opened up. The population is increasing by leaps and bounds, increasing not only by birth-rate, but by the acquisition of thousands of the best from the United States and Europe. Bank capital is growing and the savings of the people being added to. Homes are being reared at a gratifying rate. Hours of labor are being lessened even while the wage rate is being maintained. This is certainly Canada's growing time. This new century has opened auspiciously for her. To it are flocking, as to a land of promise, people from the four quarters of the earth. The fame of its wealth of natural resources, its opportunities, its beneficent and progressive government has reached the other nations and they desire to share at once in its upbuildings and its benefits. Its recent progress stirs the pride, its future promise excites the enthusiasm of those who love the country and its institutions. Independent and fearless, this new country has set its course by the stars, and wise heads and firm hands are holding it true on its way. For race feuds break the harmony. No creed conflict creates discord. No financial heresies distract the people. No embroilment with other nations excites fear. Steadily, serenely the good ship sails on a roomy sea to its desired end. Its statesmen view its progress with satisfaction, its patriots thrill with pride, its people dwell in happiness and prosperity.

EDITORIAL NOTES

WORK is life, worry is death.

WAITING, waiting long, wears out the stoutest heart.

KING EDWARD and Queen Alexandra as was expected, received a right royal welcome in Ireland.

POLITICS is like checkers. Everybody wants to get into the king-row. That crown looks good.

IF the pedlars of evil tidings were obliged to take out a license, some of them would go out of business.

THE local holders of Japanese securities will not be overjoyed at the tumble the Mikado's paper has taken.

PREMIER MCBRIDE denies that he said "breakfast to perdition." We didn't think that sounded like him anyway.

THE heart that sees only good in others is a well-spring of peace. The one that sees only defects is like a graveyard full of decayed and decaying things.

PREMIER MCBRIDE'S new version of "breakfast to perdiction" is likely to become a classic. In the vernacular breakfast was the last thing mentioned but the Premier has the good taste to take his early on the trip.

EXPERIMENTS with the air-ship appear to have been very successful in Paris. Recently one was navigated about over the heads of the Parisians for three-quarters of an hour, sailing equally well, with, against, or broadside to the wind.

IT looks now as if prison bars were likely to fence Harriman from the people's pasture on which he has been feeding for years past. Should Roosevelt make it stick, millions of the people whose millions he has stolen will applaud the "big stick."

DESPITE all the talk of war between the United States and Japan, provoked by San Francisto incidents and the proposed removal of the United States fleet of battleships from the Atlantic to the Pacific waters, influential men in both countries most intimately affected progress to believe that these two nations will remain friends for many years. So may it be.

THE LIBERALS AND THE LORDS

Sir H. Cambell-Bannerman has had scorn heaped upon him for the evaporation of his brave words about the House of Lords, and the condensation of all his threats into a mere resolution. That sort of scorn is easy. But the resolution has been passed demanding that the House of Commons shall, in case of difference with the Lords, be ultimately predominant, and that it shall be so without acknowledging even the limited right which of late is all that is claimed by the Lords—that of vetoing a measure as an appeal to the people. The resolution demands that such change shall be made as shall secure that the will of the people shall prevail within the life of a single parliament. This resolution has been supported by an enormous majority, and when the country is appealed to, those who voted against it will find it very hard indeed to answer for their course. This move will go far to ensure the return again of the Liberals, with a mandate from the people to bring in just such legislation, so plain that the Lords will not have their usual excuse for throwing out the bill, namely that the people have not pronounced upon the question. The House of Lords has only to throw out a few more measures to prepare the country for pronouncing with fair plainness. Mr. Birrell has begun by launching one well adapted to be effective to this end in his Irish Evicted Tenant's Bill which empowers the government to expropriate land for the reinstatement of evicted tenants of whom there are about two thousand in Ireland. This measure will be very popular with the working and agricultural classes in Britain. It will not only perplex the Lords, but will go a long way toward showing the Irish people who are their friends.—The Montreal Witness.

The Boundary's Pay-roll in industrial concerns alone, today totals A Quarter of a Million Dollars monthly.

This a district of 10,000 people at most, means $300 per year for every man, woman and child in the district.

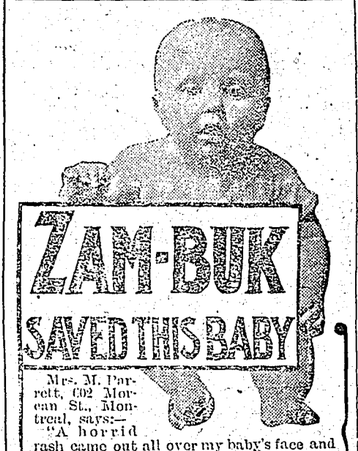
And the pay-roll is growing.

SUNDAY SERVICES.

CATHOLIC.—Church of the Sacred Heart.—Divine service 1st, third and fourth Sunday in each month. Holy mass at 10 a. m.; vespers and benediction at 7:30 p. m.; Sunday school at 2:30 p m. REV. J. A. BEDARD, O. M. I., pastor.

ANGLICAN—St. Jude's. Rev. John Leech-Porter, B. D., pastor. Services at 8 a. m., 10:45 a. m. and 7:30 p. m; Sunday school, 12 p. m. All seats free. Services alternate Sundays at Boundary Falls, at 4 p. m., and Eholt at 3 p. m.

The Methodist and Presbyterian congregations have united forces for the months of July and August. Last Sunday, July 14th, services were held in the Presbyterian church in the morning and in the Methodist church in the evening. Rev. F. J. Rutherford B. A. officiating at both services. This plan will be followed (D. V.) for the following three Sundays. Then Rev. M. D. McKee will preach in the Methodist church in the morning and in the Presbyterian in the evening during August.



Mrs. M. Parrelt, 602 Morgan St., Montreal, says:—"A horrid rash came out all over my baby's face and spread until it had totally covered his scalp. It was irritating and painful, and caused the little one hours of suffering. We tried soap and powders and salves, but he got no better. He was so fretful all day long that it made it very hard for me. He refused his food, got quite thin and worn, and was reduced to a very serious condition. I was one day advised to try Zam-Buk, and did so. It was wonderful how it seemed to cool and ease the child's burning, painful skin. He gradually became more easy and able to sleep. Zam-Buk from the very commencement seemed to go right to the spot, and the pimples and sores and the irritation grew less and less. Within a few weeks my baby's skin was healed completely. He has now not a trace of rash, or eruption, or eczema, or burning sore. Not only so, but cured of the tormenting skin trouble, he has improved in general health. He has got fat and plump, weighs no less than 32 lbs., although only 7 months old, and is in first-class condition."

Zam-Buk is sold at all stores and medicine vendors, 50c. a box, or post free from Zam-Buk Co., Toronto, for price, 6 boxes for $2.50.

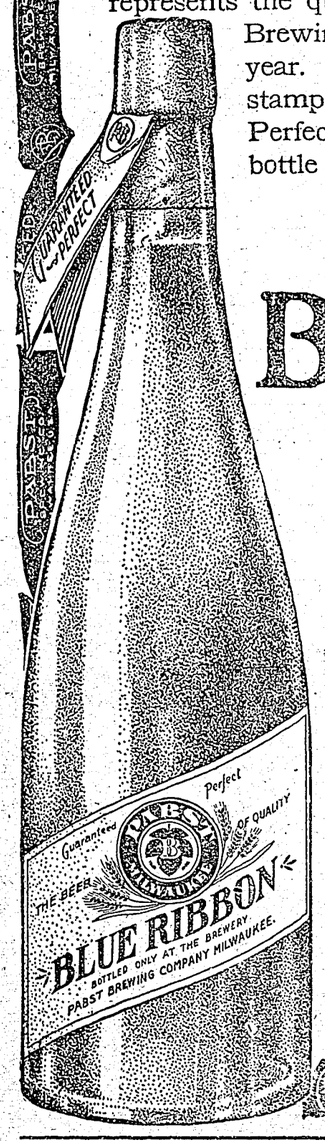
8,523 Miles of Blue Ribbon

Enough to stretch one-third the way around the world. This represents the quantity of blue ribbon used by the Pabst Brewing Company of Milwaukee during the past year. About six inches of this blue ribbon is stamped in silver with the words "Guaranteed Perfect" and wrapped around the neck of each bottle of



Pabst Blue Ribbon

The Beer of Quality

Some idea of the popularity of this famous brew may be gathered from the size of this order for blue ribbon labels.

The blue ribbon is the mark of excellence and is used only on Pabst Blue Ribbon. It is the maker's pledge of quality and your guaranty of purity.

When you order beer, insist upon having Pabst Blue Ribbon. You can recognize the bottle by the blue ribbon fastened to its neck, as shown in the illustration.

Made by Pabst at Milwaukee

And Bottled only at the Brewery.

A NOBLE ASSET

The death of Mr. Samuel McAllister, for forty-seven years a teacher in the Toronto public schools, is an event that may fairly ask some passing attention. Mr. McAllister retired from active work only last December, and consequently had not long enjoyed the evening of his days. It is useful to reflect on the almost incalculable benefits which such a career confers upon the community in which it is transacted. It is of course true that all good work has a beneficial influence on the people amongst whom it is done. It is so specially and discoverably true, however, in the case of a capable and conscientious teacher that the departure of one such is a fitting time to proclaim the obligations. Both here and far from here there are men who derived some of their soundest and most sterling influences from Samuel McAllister. They feel their debt and have acknowledged it, but even if we did not know these particular instances we would be assured of the quiet, steady power for good that radiates from such a life throughout veins and arteries of the community. It is an occasion for pausing, for thought both on the part of the teacher and the society which they serve. Such a calling ought never to become a mere conventional means of earning a livelihood. By every art and effort its moral enthusiasm should be sustained. That is the individual's side of it. It is equally incumbent on the community that it should not treat him as if he were the mere earner of one of its grudging salaries. He should be steadily recognized for what he is, the greatest source for light and leading and uplifting that lies in the way of the young in all grades of the social scheme. Everyone recognizes the tremendous importance of parentage, but it must also be recognized that the work of the teacher is often to neutralize the misdirection and misknowledge of home. He should possess the directing traditions and the wide culture that may be lacking at home; the broad mindedness and the world outlook that cannot be expected in all walks of life, but which we may fairly expect our schools and schoolmasters to supply. If it were more common to cross-examine ourselves in this respect public education would be on a better footing than it is today. If parents would ask themselves under what school influences their children are spending those precious years there would be less difficulty in achieving the ideals at which educational reformers aim. The influence of a wise and ever-green teacher in a community is immeasureable and, humanly speaking, infinite. —Toronto Globe.

HIS USE FOR A FORK

A Denver man had a friend from a Kansas ranch in the city Saturday, on a business deal, and at noon they went to a down town restaurant and had lunch together. The Kansas ranchman ate his entire meal with his knife. when he was nearing the end he discovered that he had no fork.

"Say," he said to the Denver man "That waiter did'nt bring me a fork."

"Well, you don't need one," replied the Denver man seriously.

"The duece I don't," came from the Kansan, "What am I going to stir my coffee with."—Denver Post.

Three Questions

If you are tempted to reveal
A tale to you some one has told
About another, make it pass,
Before you speak, three gates of gold.

These narrow gates-First, "Is it true?"
Then, "Is it needful?" "In your mind
Give truthful answers. And the next
Is last and narrowest—"Is it kind?"

And if to reach your lips at last
It passes through these gateways three
Then you may tell the tale, nor fear
What the result of speech may be.

The mails from the Mount Royal have been recovered. The Department of Marine has ordered that the hulk of the vessel which constitutes a menace to navigation, be blown up with dynamite.

Zam-Buk Succeeded when Five Doctors Failed.

"I want to say that Zam-Buk is the finest healing balm on earth." So writes Mrs. M. J. Beers, of L'Orignal (Ont.) She adds: "I had a bad open sore on my nose, which for many years refused to heal, and caused me many hours and hours of pain, especially in the hot weather. At different times five doctors treated the wound, and I was also in the hospital, but I could not get a cure. I recently tried Zam-Buk and a few boxes healed the wound. I am 73 years of age, but in all my long life I have never met anything to equal Zam-Buk as a healer of skin sores and diseases."

Zam-Buk also cures blood poison, festering, inflamed sores, insect stings, chafed places, sore feet, sunburn, cuts, bruises, etc. Gives ease in cases of piles. Stores and druggists at 50c a box or Zam-Buk Co., Toronto, for price.

KETTLE VALLEY FRUIT

Anyone having doubts as to capability of the soil in this locality to produce abundant crops of fruit could not do better than pay a visit to those orchards near town that are old enough to begin bearing. We took a look at several a few days ago and were more than surprised at what we saw. Even at this early date the trees are so loaded down with fruit that the limbs are barely able to support it. At W. H. Norris's orchard, which has not received the attention this year that it usually gets, the trees are literally breaking down with their load of fruit, and the same may be said of the trees at C. J Lundy's and at the Riverview Farm Co's. place, while at several other places the comparatively few trees that have arrived at bearing age are producing equally good results.

As a fruit growing locality the Kettle river valley hereabouts has not yet been fully discovered by those looking for fruit lands, doubtless owing to lack of publicity. This state of things, however, cannot continue much longer, as newcomers are crowding us both on the east and on the west. Land in this district has not reached the fancy prices demanded in the older fruit growing localities, and small holdings are within the reach of the average person. This will ultimately have its effect, and we predict that the next few years will see the entire valley devoted to fruit raising. If this been attempted earlier, there would have been a very different story to tell. However, it is better late than never.—Midway Star.

NOTICE is hereby given that thirty days after date, we intend to apply to the Hon. Chief Commissioner of Land and Works for a special license to cut and carry away timber from the following described lands:

No. 1. Commencing at a post planted on the north side of Copper creek and about one and a half miles from the main Kettle river and about one mile from the west line of C. P. R. lot No. 2714, and running west 160 chains, thence north 40 chains, thence east 160 chains, thence south 40 chains to point of commencement.

Dated May 30th, 1907.

No. 2. Commencing at the southeast corner of No. 1, and running south 40 chains, thence west 160 chains, thence north 40 chains, thence east 160 chains to point of commencement.

Dated May 30th, 1907.

No. 3. Commencing at the northwest corner of No. 1, and running south 80 chains, thence west 80 chains, thence north 80 chains, thence east 80 chains to point of commencement.

Dated May 31st, 1907.

No. 4. Commencing at the northwest corner of No. 3, and running south 80 chains, thence west 80 chains, thence north 80 chains, thence east 80 chains to point of commencement

Dated May 31st, 1907.

No. 5 Commencing at the northwest corner of No. 1, and running west 80 chains, thence north 80 chains, thence east 80 chains, thence south 80 chains to point of commencement.

Dated June 1st, 1907.

No. 6. Commencing at the southwest corner of No 5, and running west 80 chains, thence north 80 chains, thence east 80 chains, thence south 80 chains to point of commencement.

Dated June 1st, 1907.

YALE COLUMBIA LUMBER CO.

Synopsis of Canadian North-west Homestead Regulations

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior

THE
COPPER
HANDBOOK

(New edition issued Nov. 15, 1906)

Is a dozen books in one, covering the history, Geography, Geology, Chemistry, Mineralogy Metallurgy, Terminology, Uses, Statistics and Finances of Copper. It is a practical book, useful to all and necessary to most men engaged in any branch of the Copper Industry.

Its facts will pass muster with the trained scientists, and its language is easily understood by the everyday man.

It gives the plain facts in plain English without fear or favor.

Its lists and describes 4626 Copper Mines and Companies in all parts of the world, descriptions running from two lines to sixteen pages, according to importance of the property.

The Copper Handbook is conceded to be the

WORLD'S STANDARD REFERENCE BOOK ON COPPER

The Mining Man needs the book for the facts it gives him about mines, mining and the metal.

The Investor needs the book for the facts it gives him about mining, mining investments and copper statistics. Hundred of swindling companies are exposed in plain English.

Price is $5 in Buckram with gilt top; $7 50 in full library morocco. Will be sent, fully prepaid, on approval, to any address ordered, and may be returned within a week of receipt if not found fully satisfactory.

PAGE OF PERSONALS

Dr. Mathison, dentist, Naden-Flood block.

L. H. Moffatt, of the Greyhound, is in town.

Born to Judge and Mrs. Brown on Sunday, July 14, a son.

A. L. White has returned from a short trip to Spokane and Medical lake.

C. J. Leggatt, barrister of Midway, was discharging business here this week.

Dr. and Mrs. Simmons left on Thursday for a two-weeks' outing on the lakes in the Slocan.

Robert Wood came down from Beaverdell on Tuesday's stage. He will remain for a few days.

Mr Fred Hopkins and Miss Annie Christenson were married at Boundary Falls last Saturday evening.

Dale, the Carmi homicide, met and answered the law's last demand at Kamloops last Thursday morning.

Mr. A. Lucas, of Kaslo, chief district assessor, and Mr. J. Kirkup of Rossland were Greenwood visitors during the week.

A. E. Thomas, otherwise "Red" has removed to Greenwood and will have charge of the local business of the Thomas Drug Co'y.

Mr. W. E. George who has been superintendent at the Cariboo for some months past, has resigned and is planning a trip to the old country.

The Thomas Drug Co'y. having purchased the business of C. M. Crouse, of Nelson, Mr. Arthur Thomas has left to assume charge of the new store.

Although last Sunday was far from an ideal day for fishing, John Cole landed a pound and a quarter beauty from the waters of Boundary creek.

Jas. W. Ellis and Ed. Rowland "lit" out last Monday for the coast. With good weather and good roads they expect to make Vancouver before the hop-picking season sets in.

Mrs. James E. Simmons and Miss Edna Simmons who have been visiting in Greenwood for the past week left on Tuesday for Vancouver where they will make their future home.

Mrs. Sidney M. Johnson received a somewhat serious fall Sunday last while driving with a party to Midway. It appears that some part of the running gear of the wagon gave way while going down hill. Mrs. McMynn of the party and Mrs. Johnson were thrown out. Mrs. McMynn escaped injury luckily.

Dr. Simmons, dentist, Phone 96 Wallace-Miller Block, open evenings.

Born to Mr. and Mrs. Alex. Robinson on Saturday, July 13th, a daughter.

C. M. Crouse formerly of Midway, but recently of Nelson was a Greenwood visitor this week.

W. T. Hunter left this week for his annual pilgrimage to Dakota. He expects to be away for three weeks.

What with checking up the customs, scrapping mosquitoes and killing rattlesnakes, Walter Frith is having a busy time at Chapaca.

Mr. Wm. Whyte of the Canadian Pacific was in Greenwood recently, but he came right in and turned around and went right out again.

D. L. Tait, of the Yale-Columbia Lumber Co., who left here recently to cover the distance to Vancouver on horseback, when last heard of had reached Princeton.

Bert Logan returned on Wednesday from a quick trip as far west as Princeton. He reports the country looking beautiful, business quiet and the people yearning for that railroad.

George Barrett, of Beaverdell came in on Tuesday's stage from the West Fork. He reports mining properties on Wallace Mountain looking well and everybody anxiously waiting for a railroad.

The Mother Lode was closed down last Sunday to give the men a lay-off. The ore situation at the smelter permitted of cutting out the supply for that day, the policy of the management being to do no more work than is necessary on Sunday.

Reginald Gardam, collector of customs at Midway has tendered his resignation to take affect at the end of August. Mr. Gardam has been a faithful and painstaking officer and has administered his duties during the strenuous days of railroad building with tact and fidelity.

King Reese, of the P. Burns & Co., left on Tuesday with Mrs. and the family for Los Angeles. The trip is necessitated by the serious illness of Mrs. Reese, and the public will heartily join in the hope of the anxious husband, that health may come to the wife and mother as a result of her stay in the south.

Mr. C. L. Trotter of Toronto, accompanied by Mrs. Trotter, is visiting with his brother-in-law, Hugh McCutcheon. Mr. Trotter is interested in the fruit tree and fruit industry in Ontario and intends taking a trip through the Okanagan and Similkameen with a view of inquiring into the fruit possibilities of that district.

The Boundary did not make a very brilliant showing in the recent high school examinations.

Out of 13 candidates examined Greenwood only 3 reached the required standard, viz: Barbara M. Jackson, of Midway; James R. Galloway, of Greenwood and Elsie F. Graham of Deadwood. Phoenix and Grand Forks each sent up one candidate and both scored failure.

Out of fourteen candidates in all these towns 3 only passed, or about 21 per cent. The total number in the province that went up from the rural districts was 345 of which 143, or 41 per cent. passed. There's something wrong with the Kootenays.

SCISSOR WORK

There have been 34 fatal accidents and 5 suicides in Winnipeg since the first of the year.

The Cobalt strike appears to be yet unsettled. Large numbers of the miners are leaving for the west where good wages are assured.

Japanese Coming

The steamer Kumerick with 1,200 Japanese passengers, is ready to sail for Vancouver. The charterer, M. Oriyama, has deposited $25 for each passenger with the ship's agent, to comply with the Canadian immigration law, which requires that every Japanese immigrant must possess twenty-five dollars.

Miners Want Conciliation

The Department of Labor has received an application from the employees of the Inverness Railway and Coal Co., Cape Breton, for a Board of Conciliation and Investigation under the Lemieux act to inquire into questions at issue with the company in reference to wages, over-time, Sunday work, etc. John D. Matheson, barrister, of Port Hood, N. S., has been named as the men's representative on the board.

The report of the Board of Conciliation and Investigation in connection with the Springhill mines has been received by the department, but will not be made public until communicated to the company and the miners there. Another application has been received from the men asking for the appointment of a board to investigate matters concerning yardage, etc., at the Springhill mines.

Harvest Outlook

Private advices received during the past few days from Southern Manitoba indicate that the drouth s having disastrous effects on the crops and failure is staring many districts in the face. Rain has fallen in streaks along the creeks and rivers, and others have got no rain at all. Many farmers are reported to be ploughing up their fields.

North of the C. P. R. main line extending to the boundary of the province and west into Saskatchewan, there are excellent crop prospects.

Double Tracking

The C. P. R. will construct a double tracking system from Winnipeg west, but not before the double tracking from Winnipeg east to Fort William is completed. No appropriation has been made by the directors of the company but it is the intention to carry it out as soon as the transportation necessities of the country will warrant such a course being taken.

HINT OF INSIDE HISTORY

Frustration of an Attempt to Steal the Semi-Ready System

A year ago the Semi-Ready encountered an experience which might be likened to the history of a gold mine. Years of effort and of splendid energy had been spent in promoting the Semi-Ready system now so generally accepted by gentlemen.

One can recall instances where years of labor and thousands of dollars had been spent in developing many a gold mine before the true vein of quartz is uncovered in all its richness—the rich strike to be quickly followed by the quarrels and law suits which follow the quest of gold.

The Semi-Ready tailoring, its physique type measurement system, and its valuable trade-mark passed through the same stage of hot warfare when some onlookers saw that the vein of popular acceptance had been reached. An attempt to separate the workers who had carried it to success was frustrated. The Semi-Ready company is today one of the most successful industries in Canada. With finely equipped shops, built expressly for their tailoring, and with 69 Semi-Ready wardrobes, established throughout the Dominion, their international trade emblem has been estimated to be worth a million dollars.

But the gold mine allegory is complete only when a gentleman realizes that he can clean up a five or ten dollar nugget every time he saves that amount by preferring a Semi-Ready suit or overcoat.

P. W. George & Co., will be pleased to show you how what Semi-ready" tailoring profits the wearer.
