LOOKS LIKE A BONANZA

Republic Group Shipment Gives Big Returns

VARIOUS VEINS DESCRIBED

Quartz Proposition Contains Values in Gold, Silver and Lead.

The development work carried on at the Republic group in Smith's camp since last September in order to secure a series of shipping tests has resulted very satisfactorily. The quantity of ore exposed on three of the properties, the permanence and continuity of the leads, coupled with the smelter returns all combine to demonstrate that the Boundary is about to add another producer to its growing list of high grade propositions.

The Republic group comprises the Last Chance, Republic, None Such and Hidden treasure mineral claims situate in Smith's camp, one mile west of the Montreal & Boston Copper Co.'s smelter at Boundary Falls. It is owned by the Republic Gold Mines, Ltd., of which W. T. Smith, a pioneer of the district, is the general manager. Mr. Smith has just received the smelter returns of a recent carload shipment of 20 tons of ore from the Last Chance claim. The ore was treated at the Hall Mines smelter, Nelson, B. C. The carload according to the official certificate averaged 18⅔ per cent. lead, $3 gold, and 22 ozs. silver, equivalent to $23.40 per ton including the lead bounty. Returns from the second carload shipment from the same claim have not yet been received but are expected daily; however the average check samples ran about the same as the prior shipment, indicating uniformity in values. The Last Chance lead varies from eight to ten feet in width and runs northeast and southwest, being traceable on the surface for hundreds of feet. The gangue is quartz, the richest ore being from one foot to eighteen inches wide on the hanging wall side; and the ore on the foot wall varies from two to two and one half feet in the thickness, but is of lower grade. The contents of the entire vein will concentrate at the ratio of five to one. The formation is ideal, the vein occuring in the slate with greenstone or diorite on the hanging wall, and slate on the foot wall.

The None Such claim also made a similar carload shipment, which averaged $10 gold and 2 ozs. silver per ton. The vein occurs in the same formation and averages from three to five feet in width. It is the same lead as the one on the Last Chance, the adjoining claim.

The carload shipment from the Republic claim proved even higher, the ore averaging $17 gold and 7½ ozs. silver per ton. The vein runs at right angles to the other lead and is from 12 to 18 inches in width. It occurs in identical formation.

A good wagon road extends from Boundary Falls to this group of mines, affording an inexpensive down hill haul. The C.P.R. traverses the Hidden Treasure, one of the properties of the Republic group. With three shipping propositions the outlook for the company is indeed exceedingly bright.

Chamberlain's Cough Remedy the Best Made.

"In my opinion Chamberlain's Cough Remedy is the best made for colds," says Mrs. Cora Walker, of Porterville, California. There is no doubt about its being the best. No other will cure a cold so quickly. No other is so sure a preventative of pneumonia. No other is so pleasant and safe to take. These are good reasons why it should be preferred to any other. The fact is that few people are satisfied with any other after having once used this remedy. For sale by all druggists.

LIGHT EXTENSION.

Petition of North End Residents Referred to New Council.

The retiring city council held its final meeting Monday night. Mayor Naden presiding. There were also present Ald. Caulfield, Bunting, McKenzie McNeil and Parker.

The annual reports of the city engineer, supt. of water works, the chief of police and chief of the fire brigade were received, adopted and referred to the incoming council.

The fire and light committee reported that it had conferred with E. G. Warren, manager of the electric light company, respecting the proposed extension of the electric light service on Government street to the Elkhorn brewery. The committee did not recommend the extension at present. The reported was adopted and referred to the new city council for further consideration.

POLICE REPORT.

In submitting his annual report for 1904 to the city council, A. D. Hallett, chief of police, made the following interesting comments: "I think you will agree with me that the past year was one of good order in this city. Crime was almost unknown, and any case that was brought to our notice, we did our utmost to have it settled in a satisfactory manner."

Cases tried in the police court were as follows: Drunk and orderly, 1; keeping disorderly house, 1; failure to take out traders licence, 1; soliciting without a licence, 1; frequenting house of ill fame, 1; selling prairie chickens, 1; keeping vicious dog, 1; assault and battery, 1; in possession of stolen property, 1; theft, 2; vagrancy, 5; allowing cattle to run at large, 2; keeping houses of ill fame, 74; inmates of house of ill fame, 68.

A GOOD SHOWING.

City Water Works Earned a Profit of $2350 Last Year.

The annual report of Sydney M. Johnson, city engineer, recently submitted to the city council is a model of clearness. It shows that the expenditure last year was $2011 89, an outlay lower than any year since incorporation with one exception. Of the total expenditure for the year over one third was caused by the freshet and Twin creek, being attributed more especially to the failure of the Greenwood street flume to carry off the water. This flume was improved and extended during the year.

The items of expenditure were in round numbers as follows: Greenwood street flume, $359; repairs due to Twin creek flood, $314; repairs to Deadwood road, $108; supplies, tools and their repairs, $80; Boundary creek above Louisa street, $42; Deadwood street stairway, $38; crossing and sidewalk repairs, $220; grading Skylark street, $35; stumping Kimberly and Campbell streets, $18; gravelling Gold and Garland streets, $100; Marguerite street sidewalk, $23; repairs to bridges, $40; engineer, $212; street cleaning and general repairs, $137; city team, $276. Of this total, all was charged to maintenance with the exception of $41 charged to capital account.

No extensions were made to the distribution system during the year but the benefits of the mains laid two years ago were more fully appreciated by property holders living near by as evidenced from the fact that of the 19 new services installed, 17 were in connection with these extensions. Mr Johnson notes as a further evidence of the wisdom of making these enlargements that the revenue from the Church and Kimberly main is now without considering fire protection, 23 per cent. of its cost, whilst the Government street extension made that year, earns 33 per cent. of its cost.

During the year 19 connections were made with the mains at a cost of $246.20. and against this amount fees amounting to $152 were collected, so that the average cost to the city of installing new services was $2.82. The receipts from water works were $3177 and costs of management $493 leaving a net profit of $2350. The profits in the preceding year were only $778. There are at present 31 services out of commission. With the exception of the tank the whole system is in good condition.

G. R. NADEN RE-ELECTED

Opposition to the Mayor Did Not Materialize.

EVERYTHING BY ACCLAMATION

New Members of Council Are Ralph Smailes and Duncan McIntosh.

Unanimity of public sentiment crystallized Monday when the Mayor and members of the city council were elected by acclamation. George R. Naden succeeded himself in the civic chair. The personnel of the city council is unchanged with two exceptions, the two new members being Duncan McIntosh and Ralph Smailes who replace K. McKenzie in the north ward and Duncan Ross, M. P. in the south ward, respectively. Four nominations were made in the latter ward, but the withdrawal of T. M. Gulley rendered an election unnecessary.

G. B Taylor, returning officer, received the following nominations:

Mayoralty—G. R Naden, nominated by J. J. Caulfield and Dr. R. Mathison.

Aldermen—north ward: Herbert Bunting, nominated by Fred. B. Holmes and J. J. Caulfield.

J. J. Caulfield—nominated by G. R. Naden and W. B. Fleming.

Duncan McIntosh—nominated by Dr. Mathison and J. J. Caulfield.

South ward: Jas. H. McNeil—nominated by F. H. Parker and C. J. McArthur.

F. H. Parker—nominated by H. Bunting and G. R. Naden.

Ralph Smailes—nominated by F. H. Parker and C. J. McArthur.

T. M. Gulley (retired)—nominated by D. A. Bannerman and Jas. S. Birnie.

H. L. Johnston was elected school trustee for two years to fill the vacancy caused by the retirement of Ralph Smailes. His name was proposed by G. R. Naden and J. J. Caulfield.

The new city council will hold its inaugural meeting Monday night.

The names of the police and license commissioners have not yet been announced.

A DESERVED PROMOTION

James Petrie Appointed Master Mechanic at the Le Roi.

The numerous friends of James Petrie of this city will be pleased to learn of his appointment to the position of master mechanic at the Le Roi mine, Rossland. Mr. Petrie and family left for their new home on Tuesday. Those who are familiar with Mr. Petrie's acknowledged ability will realize that he will give a good account of himself. The offer reached him a few days ago from James Trevarrow, the general superintendent of the Le Roi.

Mr. Petrie has enjoyed the advantage of a splendid training in the United States and Canada. He was employed for ten years looking after the stationary plants at the coal mines of both the Santa Fe and Union Pacific railways. His first mechanical work in Canada was the installation of the Grand Forks water and electric light systems. He also installed and ran the plant at the Bonanza mine on the north fork of Kettle river, directing the development work as well. Mr. Petrie was also an engineer at the Granby mines for nearly five years before performing the duties of master mechanic at the Mother Lode mine for eleven months. Recently Mr. Petrie was the engineer in charge at the Eugene mine, Moyie, B.C., resigning to install the new compressor plant at the Betts & Hesperus mine on Hardy mountain, near Grand Forks. The continued advancement of Mr. Petrie in his chosen profession is striking proof of his capacity and intelligence.

Revivals of mining activity are usually heralded by the approach of spring when organic life expands and absorbs fresh vitality. In his hopes, plans and aspirations, man seems likewise to vary and modify with the seasonal changes. It is therefore anomalous and significant that mining in the Greenwood high grade belt, instead of slackening for the long winter months, has shown a cumulative and expansive tendency. More properties are now being developed than at any previous period in the history of the camp. Each fortnight during the past few months has seen work started on new propositions with a corresponding enlargement of the local payroll. And now with midwinter approaching the mining industry continues to grow by leaps and bounds. Twelve high grade propositions, most of them either dividend-payers or on a self-sustaining basis, are now being operated, giving employment to nearly one hundred and fifty miners. The outlook for the future is still brighter. The development of the Coro-Canadian group, two miles east of town, was undertaken this week, Grand Forks people again showing their faith in the possibilities of mining around Greenwood. The next four weeks will also witness the starting of work on the Gold Bug, Goldfinch and Meadowlark, equally famed locally as high grade and promising propositions. Faith in the camp has been amply justified by the phenomenal results accomplished in so short a period by the Providence, Elkhorn, E. P. U. and Skylark. Not a failure has occured where the development work has been directed with intelligence. The friendly rivalry of Phoenix and Grand Forks in attempting to acquire meritorious properties should stimulate the people of Greenwood to secure their share of the bonanzas that lie at their doors; and if they fail to do so the responsibility can easily be placed. From a business point of view we have everything to gain by welcoming outside capital which cannot do otherwise than contribute largely to the pre-eminence of Greenwood as a great mining centre.

Citizens of Greenwood may well congratulate themselves upon having again secured a representative mayor and city council. It is just as well that the talk of nominating a candidate to oppose Mayor Naden only ended in talk. Mr. Naden has discharged his duties with signal ability and inaugurated a new era of retrenchment and financial reform. His grasp of civic affairs is so thorough that a continuance of the same policy may be expected during the current year, with the co-operation of aldermen united in working for the best interests of the city. There still remains much to be accomplished. We would merely mention in passing that a reduction of the assessment would be gratefully welcomed by overtaxed ratepayers. Those people who have remained here throughout the period of depression should be asked to bear as light a burden as possible in view of the sweeping economies effected last year and as the city debt is comparatively small, its repayment should be spread over as long a period as possible. Signs are not wanting that a revival of prosperity is imminent. If conditions continue to improve the population will rapidly increase and a greater number of people will lessen the burden of taxation. It is a matter for congratulation that ex-Mayor Smailes has re-entered the council where his business capacity will be exercised in promoting the best interests of the city. Duncan McIntosh will also prove a strong addition to the mayor's advisers. If he applies the same common sense to civic affairs that he does to opening up high grade properties the interests of Greenwood will certainly be well looked after.

The utilization of water power by man is one of the characteristic features of the past decade. In this respect the effete east is keeping pace with the progressive west. The most wonderful generators of electric power ever built were set in operation the other day in the power house of the Canadian Niagara Power Co., on the Canadian side. Two of the units were started, each being of 10,000 electrical horse power, of which the station, when completed, will have eleven making its capacity 110,000 horse power. This new station and the two big stations on the American side can be operated as one plant, assuring customers, whether on the Canadian or American side, continuity of service. Toronto will receive the first large block of power. In California electrical energy is being transmitted a distance of nearly two hundred miles.

A number of philanthropic ladies and gentlemen are endeavoring to provide the city and district with a new ambulance. Any object having in view the remedying of discomfort, or the alleviation of pain is well worthy of public support. In order to provide funds a dance will be given in the Masonic hall on Friday night. Everybody who can afford it should buy a ticket for the coming event. It matters little whether one is able to dance or not. Accidents are not infrequent in the surrounding camps and the consciousness that one has done something towards aiding an injured brother will bring its own reward.

The McBride government secured a lot of free advertising over its assurances that the provincial finances would show a surplus this year. Now, however, despite the enormous increase in taxation, a deficit is in sight, and steps are being taken to devise new means of enlarging the revenue. Premier McBride is strong on promises but stronger in making excuses for the state of affairs that will shortly engage the attention of the legislature.

Nelson and Grand Forks are arranging to send teams here to try conclusions with the local curlers. The visitors will receive a right royal welcome as Greenwood hospitality, and especially that dispensed by our Scottish citizens, is proverbial. It has been tritely observed that the best characteristics of men are evoked and enduring friendships established in the comradeship that is associated with well contested curling matches.

With the inauguration of a passenger service to Phoenix over the Great Northern, Frank Royer will discontinue his stage service between Grand Forks and Greenwood. Thenceforth he will cover the route between here and Phoenix.

TUNNEL AND STOPE

Ronald C. Campbell-Johnson, M. E., of this city, contributed an interesting article on mining in the Boundary to the last number of the B. C. Mining Exchange. He claims that copper ores are being mined and smelted here at a lower rate than elsewhere. Underground mining, Mr. Campbell-Johnson declares, has been reduced in the Boundary to 96 cents per ton, or fifty per cent. of the cost of open cut or glory hole work. Smelting and concenting are given at $1.35 per ton. All the costs do not exceed $3.00 per ton, a figure that is not equalled even by the Tennesse Copper Co.

Substantial development was carried out at the Mother Lode mine last year. The open workings were considerably enlarged—in fact they are now one big quarry, the dividing masses of ore having been broken down and sent to the smelter. There is here a long double track adit, from which half a dozen raises have been made to the quarries above. The consolidation of the crushing plants having been decided upon, a new tunnel was driven to intersect the main shaft from which the 200-foot and 300-foot levels were opened, on the same level as the quarry tunnel. At the shaft a large pocket has been excavated, and this will discharge the 4 to 5 ton skips, obtained to replace the cages previously used. The skips will empty into a bin at the head of the shaft, the ore passing thence to either one of a pair of Jincques-Farrell crushers. These crushers will be operated by two engines driven by compressed air—so arranged that either engine can drive either crusher, thus reducing chances of stoppages by breakdowns in either engines or crushers. A belt conveyor will take the crushed ore to the main ore bins. The diamond drill has been used underground during recent months with good results, one hole proving the occurence of very good magnetic ore down to the 345 feet below the bottom of the shaft, at which point the drill was withdrawn.

TAX SALE.

G. B. Taylor, city treasurer, held an adjourned tax sale Wednesday at the city hall. Ten lots were sold for approximately $200. The remainder of the unsold lots, over 125 in number, were bid in by Mr. Taylor on behalf of the corporation. All these properties may be redeemed by the late owners at any time within the next twelve months.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2000 pounds shall be collected on gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miners' certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered coal in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end on the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5 00.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the has been expended or paid, the locator may, upon having a survey made, and upon complying with the other requirements, purchase the land at $1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

Placer Mining, Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims generally are 100 ft. square; entry fee, $5 renewable yearly. On the North Saskatchewan river claims for either bar or bench the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental, $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Dredging in the Yukon Territory—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged beds or bars in the river below low water mark, that boundary to be fixed by its position on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles, within six years from such date. Rental $100 per mile for first year, and $10 per mile for each subsequent year. Royalty, same as placer mining.

Placer mining in the Yukon Territory—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being 1,000 to 2,000. All other placer claims shall be 200 feet square.

Claimes are marked by two legal posts, one at each end bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of mining recorder's office. One additional day allowed for each ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two 1,500 altogether, on the output of which no royalty will be charged, the rest of the party ordinary claims only.

Entry fee $10. Royalty at the rate of two and one half per cent. on the value of the gold shipped from the Yukon territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each seperate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of $2. A claim may be abandoned, and another obtained on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done a claim each year to the value of at least of $200.

A certificate that work has been done must be obtained each year. If not, the claim shall be deemed to be abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum—All unappropriated Dominion Lands in Manitoba, the Northwest Territories and within the Yukon Territory are open to prospecting for petroleum, and the minister may reserve for, an individual or company having machinery on the land to be prospected, an area of 640 acres. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well and such other land as may be determined will be sold to the discoverer at the rate of $1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

Greenwood, B. C., Jan. 9th, 1905

TO THE MAYOR AND ALDERMEN,
Corporation of the City of Greenwood.

GENTLEMEN:—I have examined the books and vouchers of the City of Greenwood for the year and they are all in order and correct.

I herewith enclose Balance Sheet, receipts and expenditures account, general revenue account, special revenue account and tax statement.

The receipts and expenditure account shows the actual receipts and disbursements of the city for the year and need no explanation.

The general revenue account shows on the credit side the amount of taxes levied for general purposes only, and the total revenue of the city for general purposes from all sources, including the profit on the waterworks which has been credited with $825.00 for hydrant rental and charged with $1,425 40 for depreciation, which makes a nett profit of $2,350.37 to this department.

The debit side of the general revenue account shows the gross expenses of the city for the year (exclusive of debenture interest) and depreciation on fixed assets

The special revenue account shows on the credit side the amount levied for the year for debenture interest and sinking fund, the interest collected on arrears of special taxes and the amount allowed by the bank on the sinking fund; on the debit side is shown the amount paid for debenture interest and hypothecation account and the amount required by the by laws for sinking fund.

The balance sheet shows the liabilities of the city on December 31st to be $59,000 for debentures issued, $8000 due the Bank of Montreal on hypothecation account and $2118 for sundries, in all $69,118 as against $100,290.85 on the 1st of January, which is a decrease of $31,172 85; against this there is now only $1,597.99 in the sinking fund as $12,254.00 was taken out during the year to redeem debentures.

The amount which now, according to the by-laws, should be in the sinking fund is $18,005.26, but $17.947 has been withdrawn during the years 1903 and 1904 for the redemption of debentures which would only leave a balance of $57 8 76 due the sinking fund. As there is now $1,579.99 on deposit in this fund there is a surplus in cash of $1,521.23 and in outstanding taxes belonging to the sinking fund $2,638,48.

The item, special revenue account, sinking fund $21,305.40 appearing in the balance sheet amongst the liabilities is the total amount of taxes levied by the city for sinking fund purposes since incorporation.

W. E. HODGES,
Chartered Accountant.
Auditor.

NOTICE is hereby given that the Nicola Kamloops and Similkameen Coal and Railway Company will apply to the Parliament of Canada, at the ensuing Session thereof, for an Act declaring that the said Company is, and has been since its Railway was by 3 Edward VII, C. 164, declared to be a work for the general advantage of Canada, a Company under the legislative jurisdiction of the Parliament of Canada, and authorizing the Company to construct and operate in extension of the Railway it is now authorized to construct, a Railway from Osoyoos Lake to a point at or near Grand Forks with power to connect with the Vancouver, Victoria and Eastern Railway at or near Grand Forks, and with the Columbia and Western Railway at or near Midway, and extending the times limited by the Acts respecting the Company for the commencement and completion of its undertaking, and for other purposes.

Dated at Toronto this 7th day of December 1904.

H. S OSLER,
Solicitors for the Applicant.

Our Mines

The Phoenix pay roll last month exceeded $50,900.

Three shifts are now employed at the Brooklyn mine.

A night shift is to be added to the Skylark force at an early date.

Diamond drilling is in progress on the lower levels of the Granby mines.

The glory hole at the Rawhide mine continues to maintain a daily output of 350 tons.

The average price of silver for 1904 was 57.25 cents; the average price for 1903 was 53.41.

The C. P. R. has a shortage of ore cars. The Montreal and Boston Co. alone needs 20 cars daily.

One furnace was closed down at the local smelter for several days this week owing to a deficiency in the water supply.

Granby ore shipments last year, according to a revised statement, were 549,703 tons, an increase of 40 per cent. over the shipments in 1903.

Revised figures show that the B. C. Copper Co. produced 174,298 tons of ore in 1904, while the company's smelter in that period treated 209,637 tons.

Work on the Silver Cloud, Skylark camp, has been resumed. The last smelter shipments of high grade ore ran $120 per ton, the principal values being in silver.

Operations in the main workings of the Providence are still suspended pending repairs to the boiler. Four or five men are engaged at work in the tunnel.

The Last Chance mine has made a phenomenal record since starting operations a few months ago. The car now being loaded will bring shipments to the 100 ton mark.

Mexico leads the world in the production of silver. The last reliable figures published were for 1902, and these give Mexico a silver output of $77,800,000, coinage value.

The Sally mine, west fork of Kettle river, shipped a carload of ore to the Trail smelter this week. The ore is hauled in sleighs to Midway and thence transported by C. P. R.

Dividends from Southeast Kootenay mines in 1904 have been most satisfactory. The St. Eugene paid $70,000, the Crow's Nest Pass Coal Co. $172,254, and the North Star $120,000, a total of $362,254.

The value of the mineral output of British Columbia last year is estimated at $21,133,000 as compared with $17,495,954 in the preceding year. The Boundary district is credited with a production estimated at $4,500,000.

Harry Shallenberger returned to Spokane last week. He intimated that the development of the Crescent mine in Skylark camp will be resumed within six weeks. A plant will likely be installed. The ore on the Crescent dump is valued at $3,000.

The refusal of the Le Roi company to pay $15,426.47, which the provincial government insists upon under the workings of the two per cent tax on the value of the ore mined, has resulted in a temporary seizure of a portion of the Le Roi company's property.

The first payment of $3,000 on the Skylark bond was made last week. The amount was derived from ore shipments. The capital stock is $250,000 in shares of $1.00 each, of which 124,000 shares are in the treasury. The first issue of 12,000 shares of treasury stock sold for 50 cents per share.

In the Granby mines last year the development consisted of 2,130 feet of sinking and raising, and 3,046 feet of cross cutting. The total footage to date is 26,237 lineal feet, or about five miles of underground work. This is exclusive of stopes. The output to date exceeds 1,500,000 tons. The mine gives employment to 350 men.

Work on the Palmer Mountain tunnel is being rushed as rapidly as possible and John Boyd is getting everything in shape for the beginning of his larger schemes. At the tunnel a force in engaged in clearing the grounds for the reduction works, and grading the roadbed for an electric tram from the mouth of the tunnel to this site.

The E. P. U. shipped three carloads of ore in December. The last lot ran 4 3 oz. gold, besides silver, the total values being $90 per ton. Shipments will run three carloads this month, and Duncan McIntosh, the manager, has wagered that he will have shipped five carloads between January 1st and February 15th. Mr. McIntosh is enthusiastic about the recent improvement in the property.

The Emma mine, in Summit camp, shipped 38,000 tons last year. The B. C. Copper Co. owns a three-quarter interest in the property, the other quarter being held by the Hall Mining and Smelting Co. of Nelson. During the past year a second incline shaft, starting from the level of the lowest railway track, was sunk and from the bottom of this new working a diamond drill demonstrated the presence at depth of self-fluxing ores of improved value.

At Monday's meeting of the shareholders of the Royal Victoria Gold Mining Co., Ltd., owning the Golden Eagle, held in Greenwood, a resolution was adopted authorizing the bonding of the mine to a Spokane syndicate. The property is located in Brown's camp, on the east side of the north fork of the Kettle river, twelve miles from Grand Forks. One of the leading shareholders is S. Moulton Barrett of this city. The terms of the bond have not transpired but it is understood the price is considered satisfactory to the present owners.

Contracted Chronic Diarrhoea While in the Philippines.

"While with the U. S. Army in the Philippines, I contracted chronic diarrhoea. I suffered severely from this terrible disease for over three years and tried the prescriptions of numerous physicians, but found nothing that did me any good until I tried Chamberlain's Colic, Cholera and Diarrhoea Remedy, two small bottles of which entirely cured me and I have since had no return of the disease."—Herman Stein, 212 N. Union Ave., Pueblo, Colorado. For sale by all druggists.

TOWN TOPICS

W. T. Smith has returned from Spokane.

E. Ferguson of Nelson was here last Tuesday on business.

Birth—On the 10th inst the wife of F. G. Engbaum, of a son.

Ernest Cartier, of the Windsor, has returned from a trip to Butte.

The midwinter number of the Phoenix Pioneer will be issued within a fortnight.

There was a dance at Phoenix last night under the auspices of the Miners' Union.

W. Cookson has returned from Victoria where he was successfully operated on for appendicitis.

Fred Knight, of Grand Forks, was over this week to inspect the rich strike in the Strathmore mine.

Capt. and Mr. Ruger, accompanied by Mrs. M. A. Carpenter, all of Chesaw, Wash., were guests at the Imperial this week.

The exhibit of Bay ore consisting of quartz filled with free gold in the window of P. W. George & Co. is attracting no little attention.

Harry Small, the veteran traveller, who has been on the road for thirty-five years, was a visitor here this week stopping at the Imperial.

For Sale—Baby buggy with runners complete, in first class condition, also canary bird and cage. Apply at this office or P O box 1, city.

George D. Clark, who is well known in this city, was recently installed as worshipful master of Harmony lodge, A.F. & A.M., Grand Forks.

There will be a dance in the Masonic hall tonight. The proceeds will be devoted to the worthy object of purchasing a public ambulance. A large attendance is assured. Excellent music will be provided.

Fred Starkey and Alex. McQueen of Nelson, are arranging for a visit of Nelson curlers to this city before the end of the month. It has also been arranged that a scratch rink from Grand Forks will participate.

W. E. Hodges, the well known chartered accountant is about to remove to Vancouver, where he will enter into partnership with Halliwell & Co., chartered accountants. The genial personality of Mr. Hodges will be greatly missed by his numerous friends.

Alex. McQueen, commercial tourist, politician and raconteur, Nelson, B.C., was at the Imperial this week. Between stories, Mr. McQueen found time to expatiate on the merits of Morena cigars. Before leaving town he added specimens of Greenwood's high grade ores to his list of samples.

W. Wilson of the Mother Lode mine, gave a driving p rty to Midway on Sunday, his ten guests being fellow employees and lady friends. On the return trip the young people were entertained by their genial host to dinner at the Imperial. Mrs. Graham was heartily complimented on the elaborate character of the menu. Before returning home the visitors were given a vocal and instrumental treat.

W. F. Honey, of Park River, North Dakota, left for home today after spending a week here, the guest of Duncan McIntosh. Mr. Honey is interested in the Providence, Gold Bug and E.P.U. mines. This is not his first visit here. Mr. Honey stated that he is well pleased with his mining investments and added that the fame of Greenwood's high grade mines is spreading in the leading American investing centres.

The Greenwood Citizens' band held its annual meeting at the band room Monday night. The election of officers for the ensuing year resulted as follows: Hon. President, Mayor Naden; president, A. Logan; Vice-President, L. B. Hodge; Sec'y-Treas., A. D. Hallett. It was decided to hold an entertainment in the near future as the band is in need of funds to purchase several new instruments. The organization is in first-class shape, and Bandmaster Hallett expects to be in even better condition than last year.

The Associated Boards of Trade of Eastern British Columbia will meet at Nelson next month but the date has not yet been announced. Greenwood will be represented. The subjects to be discussed will include the following: the organization of a department of mines as a branch of the Dominion service; the imposition of an import duty on rough lumber; the encouragement of the production of zinc; the cancellation of the reserves on land; assistance to a Coast-Kootenay railway and to the Kootenay Central railway.

The last issue of the Similkameen Star contains the following personal intelligence: "The only and original J. Peck MacSwain, author, critic and circumnavigator, blew into town last week on the tail end of a nor'-easter snow storm. He came from various points in the Kootenay and Washington, his destination being anywhere. He is a member of the International Typographical Union which entitles him to craft courtesies anywhere in the round world. He had long ago heard of Princeton and was only recently enabled to include it in his itinerary. He thinks it an ideal situation and will come again, probably to locate permanently."

A telephone message from Camp McKinney, received yesterday, conveyed the information that the deal for the purchase of the Ellis ranch in the Okanogan had just been closed. The estate comprises over 30,000 acres. The new owner is an eastern syndicate promoted by W. T. Shatford of Vernon, and his brother, W. L. Shatford, M. P. P., of Fairview.

Geo. Rumberger was re-elected mayor of Phoenix yesterday, defeating W Delahy by 24 votes. The poll stood Rumberger 97, Delahy 73. Aldermen: west ward—Jas. Marshal, Thos. Roderick and J. Carson; east ward—Ed. Brown, R. I. Birnie and D. McInnis. At Grand Forks Mayor Hammar was re-elected, defeating R. Gaw by 51 votes. John Houston won out in Nelson with a majority of 15.

A working bond on the Coro and Canadian group in Skylark camp was obtained last week from James Sutherland by W. A. Harkin on behalf of a Grand Forks syndicate. The group lies between the Crescent and Last Chance mines and has two well defined quartz leads besides other good showings. The ore in a 30-foot shaft on No. 1 or the Crescent vein runs from $23 to $92 per ton in gold and silver, the latter predominating. The work of sinking the shaft was started Tuesday. The services of W. E. Jeffery, M. E., as consulting engineer have been retained.

BONDED MEADOWLARK.

Geo. R. Naden, on behalf of local and outside parties, has secured a bond on the Meadowlark claim, which adjoins the Skylark mine to the south. The price has not transpired, and the name of the principals will be withheld for the present.

Mr. Naden informed the Times that development work will be started next week. Supplies have already been hauled to the property and quarters secured for the men. The Skylark lead is supposed to run into Meadowlark ground but has not been definitely located. There is, however, a good showing which will be opened up. This may prove to be the Skylark vein. The Meadowlark is owned by J. McNichol, Midway, W. G. McMynn, Greenwood, and N. J. Laplante, Marcus, Wash. It comprises 51 acres.

Geo. A. Rendell of Armstrong is in town.

Miss McPherson, Spokane, is at the Windsor.

W. M. Law is expected home Monday from Spokane.

Shaft-sinking at the Skylark was started this week.

Jeff and Mrs. Davis, Grand Forks, are at the Imperial.

Geo. R. Stocker and wife were at the Imperial this week.

Don't miss the Ladies Philharmonic quartette; opera house Saturday night.

Phoenix and Greenwood aeries, F.O. E., installed officers here Monday night.

S. Dilsheimer, Colville, Wash., is here looking after his business interests.

The Bay mine continues to improve. Free gold is still being extracted in large quantities.

Local inland revenue receipts for the six months ending in December were $7,234.24 and not $1,218 as printed.

There will be readings, vocal solos and quartettes and violin solos at the Philharmonic concert Saturday night.

It is reported that the Granby Co. has just acquired the Monarch, Gold drop and other properties in Phoenix camp.

A treat is in store for music lovers who attend the entertainment at the opera house Saturday night. Popular prices.

F. Rosenhaupt, Spokane, a shareholder in the Last Chance Co. was here this week on business with Manager McVicar.

J. Frank Fouche, dramatic artist of Chicago, will give an entertainment in the auditorium Monday, the 23rd inst., in aid of the proposed public school library.

Services will be held in the Methodist church next Sunday at 11 a m. and 7:30 p.m. In the evening the pastor will preach his second sermon on the Prodigal Son.

E. G. Warren's rink visited Phoenix Monday and defeated Mr. McNichol's rink by six points Two other local rinks will play Phoenix curlers at Phoenix tomorrow.

R. Gardom, collector of customs at Midway, reports the following statistics for the six months ending December 31st last: Value of dutiable goods $14,065; free goods, $4,325; duty collected, $3,025.

W. G. Gaunce has returned from Seattle where he visited his family. Mr. Gaunce reports business as very active at the coast. He was amazed at the interest displayed by Spokane people in regard to this camp.

R Marpole, general supt. of the Pacific division of the C.P.R.; H. J. Cambie, engineer; J. S. Lawrence, divisional supt., and party were here Thursday on a tour of inspection. They visited other Boundary points.

Lack of power caused the Granby Co. to blow out two furnaces this week. For the same reason the lights at Phoenix have been cut off. Greenwood's service will not be impaired owing to the terms of the contract with the Cascade Power Co.

On Thursday evening at the home of Mrs. McBain aunt of the bride, Rev. J. D. P. Knox united in marriage Mr. Ernest Penson and Miss Elizabeth Monroe Embree. Only the immediate friends of Mr. Penson and Miss Embree were present Their many friends join in hearty good wishes for a happy life.

The masquerade carnival at the rink last night was largely attended and proved very successful. The following won the prize competitions: Best dressed lady, Miss Effie Coutts; best dressed girl, Annie Chistenson; best dressed boy, Theo. Hunter; best dressed gent, A. J. Morrison; best sustained character, Geo. Clurf.

Cured His Mother of Rheumatism.

"My mother has been a sufferer for many years from rheumatism," says W. H. Howard of Husband, Pennsylvania. "At times she was unable to move at all, while at all times walking was painful. I presented her with a bottle of Chamberlain's Pain Balm and after a few applications she decided it was the most wonderful pain reliever she had ever tried, in fact, she is never without it now and is at all times able to walk. An occasional application of Pain Balm keeps away the pain that she was formerly troubled with," For sale by all druggists.

COAL MINERS STRIKE.

On Sunday Jan. 1st at a mass meeting of the Coleman Miners' Union a strike was declared against the International Coal and Coke Co at Coleman, and on the following morning the mines were tied up. The strike was declared with the consent of F. H. Sherman, president of the district Union. The mine management threatened to import labor so engineemen and firemen were called out and the fires were drawn. The pumps have been taken from the mines and everything points to a bitter fight. The men are determined to secure the recognition of the union.

At a public meeting of the townspeople on Tuesday a committee was appointed to wait upon Mr. Galer to endeavor to get him to meet the union committee. Mr. Galer is out of town meeting his directors and nothing has been heard from him. It is understood that the International people have entered into contracts with the C.P.R. at a very low figure and this may explain why they refuse to agree to a scale of wages.

The International also supplies coke to the Granby and Boundary Falls smelters. The president is A. C. Flumerfelt, late of the Granby Co.

FIRE RECORD.

Annual Report of Chief Hallett Makes Recommendations.

In his annual report of the fire department submitted to the city council, Chief Hallett says:

"In reporting the doings of the fire department for the past year I feel we should be thankful for having passed another year with very little loss by fire.

"The department only had three alarms during the year, the most serious being at the residence of H. W. Harris last March, and of which a full report was made at the time.

"The department at present consists of 31 members, divided into three companies, one for each hose reel, and one for the wagon. Each company has a captain and a lieutenant and there is also a chief and assistant chief. We hold meetings semi-monthly.

"There is at present on hand 2400 feet of hose in good condition, and we are pleased to note that you have ordered 500 feet more, which will put us in much better shape. The team which you purchased this year is giving good satisfaction.

"The water supply at present is very low, and I believe it would be well for you to caution citizens not to waste any until spring."

WE ARE SATISFIED!
ARE YOU?

Well the year has opened in a good healthy, and we may say brisk manner. We are holding the reins and will allow no stumbling--at least in the Drug business. Eternal Vigilance is the Motto---and we're "it."

Come in and allow us to show you our Cough Remedy. This is the season for it.
