Political Situation

Like a bolt from the blue came the announcement on Sunday morning last of the resignation of Hon. R. F. Green, chief commissioner of lands and works in the Conservative-Socialist government of British Columbia. It was well known that this hybrid administration was in difficulty. Ever since Attorney General Wilson resigned, about the 1st of March last, it has been one cabinet minister short, and the nominal premier, McBride, was afraid to open a single constituency in the province to fill up his cabinet. Hawthornthwaite, the irresponsible Socialist leader, found so much difficulty during his summer tour of the province, in explaining his alliance with McBride, that he told the latter on his return he could no longer depend on his support Having these things in view, it is said the cabinet was divided as to the advisability of having another session or dissolving the house. Messrs. Green and Tatlow wished another session, evidently believing that Hawthornthwaite's threats were not to be taken seriously, as he was hopelessly committed to the government's course and policy during the last three years, and notwithstanding his lack of principle and consistency, would again support the government at critical times. A not inconsiderable element of the Conservative party has been clamoring for Mr. Green's dismissal for some time, but the premier had so ardently defended all the shady deals and gross mismanagement of the department of lands and works during Mr. Green's tenure of office, that it was generally believed the late chief commissioner was secure. However, the unexpected happened, and Mr. Green is now down and out.

Immediately following the announcement of Mr. Green's resignation came the announcement of the dissolution of the legislature, nomination and election. Nomination is fixed for the 19th of January, and the elections for the 2nd of February. The premier realizes that his easy is a desperate one and he evidently hopes, by throwing overboard Mr. Green, he can steer his battered and discredited ship to the haven of the Treasury Benches again.

But Mr. McBride cannot escape responsibility for the actions of his late minister by dismissing him at the last moment. A death-bed repentance will not satisfy the electors of British Columbia.

It was through the general incompetence of the government and the particular bungling of Mr. Green that the Coal and Oil licenses granted in Southeast Kootenay were utterly valueless, although the government collected more $120,000 therefor. Mr. McBride was well aware of this state of affairs, as it was lucidly and vigorously presented by the Liberal opposition in the house.. It was decided by the courts that the government had no authority to issue the license it purported to issue. As a result no title could be obtained, no capital interested, and consequently no development to any extent even attempted.

Then the dealing with Kitamaat lands will require some explanation. Certain individuals—favorites, of course—were allowed to acquire lands on Kitamaat Harbor, which were under reserve, and as to which these same favorites had not complied with the provisions of the land act at all, Mr. McBride was aware of the facts in this case, because they were brought out under oath and Mr. McBride himself admitted that some of the crown grants of Kitamaat lands obtained in this questionable way should be cancelled. But no one has heard of any cancellation, and no one who knew Mr. McBride or Mr. Green, expected any.

The unsavory Kaien Island deal, which was put through in defiance of all law, and guarded and hedged with secrecy to enable Jimmy Anderson and others of Mr. Green's particular friends to secure coal lands and money and favors, while very poor provision was made for protecting the interests of British Columbia, was well known to Mr. McBride. He cannot now evade responsibility by making a scapegoat of Mr. Green.

But Mr. Green is not the only member of his cabinet with an unsavory record. Mr. McBride's own record will not bear examination any better than Mr. Green's. When he took office he announced his intention of introducing the Party Line system of government. Yet we find during his very first session, he formed an alliance with an unscrupulous demagogue of a very low type, whose reputed principles were the very antithesis of the principles of Conservatism, which Mr. McBride was supposed to represent. He sacrificed, or, at least, compromised his Conservative principles for the sake of holding office.

The Conservative party had a platform on which it appealed to the electorate, prior to the elections of 1903. One plank was the reservation of coal areas in the province.

In spite of the object lessons which we have had as to the great danger of our industries being tied up, and of the people suffering for lack of fuel through trouble between employers and employees, no coal areas have been reserved. Nn the contrary, hundreds of thousands of acres of coal lands have been alienated to speculators. The platform advocated a liberal expenditure on roads and trails in order to exploit properly the resources of the provinces. Yet the Public Works were starved under the Conservative-Socialist government as never before. The same platform advocated the repeal of the two per cent tax on minerals. Both the Premier and the Finance Minister declared it was an infamous tax and should be removed. It remained as before. But why go further? Nearly every plank has been broken and Mr. McBride as leader is deserving of greater censure than any other person for this state of affairs as is responsible for, and should compel his party to observe its ant-election promises to at least a reasonable degree.

The treatment of the Midway and Vernon by McBride and Finance Minister Tatlow will be dealt with later.

LIBERAL CONVENTION

A convention of the Liberals of the district has been called to meet in Greenwood tomorrow night (Saturday) at 8 o'clock, for the purpose of nominating a candidate for the coming provincial elections. The rooms formerly occupied by the Times, in the Rendell building, have been secured as committee rooms and are now open.

James R. Muir, the well-known piano tuner and regulator,, will be in town again in a few days and will have the pleasure of calling on all his customers and friends.

LAND WITHDRAWN

It is reported that the C. P. R. has withdrawn from the market its lands on the West Fork. We have not been able to verify this, but have reason to believe it is true. If this be so it may mean that the giant corporation of Canada sees a possibility of a higher market for its lands, due to the building of the Midway & Vernon. We can bear such a possibility with equanimity, and if the Midway & Vernon shall be able to triumph over all its enemies, the most powerful of them can mark up its lands all they will possibly stand.

COMMUNICATED

To the Editor of the Boundary Creek Times:

I should like, if possible, to correct a wrong impression which may have been created by your recent publication of Inspector's school report for 1905, together with your conclusions drawn therefrom. To begin with, both have failed to see the real cause of low percentage of attendance at the public school. Greenwood, it must be remembered, is a mining town, and has, in consequence, a large floating population—people with no abiding city, driven hither and thither by the "Wanderlust." Families settle in town, and the children attend for a month or so. Then the spirit of unrest takes possession of them, and away they go to some other place. To show how these transient pupils lower the percentage, let me give a few statistics from the school register for the fall term. In Division I 35 pupils were enrolled, the percentage of attendance being 81. Of these 8 were either arrivals or removals, who attended only 31 on an average out of 82. Had it not been for these the percentage of attendance would have been 94. In Division II the attendance of the children of the permanent residents averaged 90 per cent, but 17 of the transient variety, attending on an average 22 days each, reduced it to 72. Even 81 and 72 per cent are considerably above 52. From the above all will agree that the parents of Greenwood are not indifferent on the all important subject of the education of their children, and that the mild philippic of the Inspector does not apply to them.

J. L. WATSON, Principal.

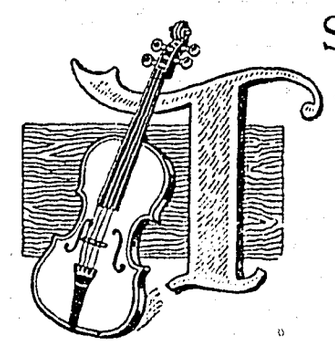
Try This for Your Cough.

To relieve a cough or break up a cold in twenty-four hours, the following simple formula, the ingredients of which can be obtained of any good prescription druggist at small cost, is all that will be required: Virgin Oil of Pine (Pure), one-half ounce; Glycerine, two ounces; good Whisky, a half pint. Shake well and take in teaspconful doses every four hours. The desired results can not be obtained unless the ingredients are pbre. It is therefore better to purchase the ingredients separately and prepare the mixture yourself. Virgin Oil of Pine (Pure) should be purchased in the original half ounce vials, which druggists buy for dispensing. Each vial is securely sealed in a round wooden case which protects the Oil from exposure to light. Around the wooden case is an engraved wrapper with the name—"Virgin Oil of Pine (Pure)"—plainly printed thereon. There are many imitations and cheap productions of Pine, but these only create nausea, and never effect the desired results, 11-24



Shape Expression

THE beauty of a violin lies in its lines.

Yet a violin is made up of many parts—the lines are the result of each part being carefully made and as carefully put together.

You cannot shorten the length of the Semi-ready Coat without destroying its artistic lines—the length of the coat is carefully designed to look well with the other lines of the coat only when in a certain proportion to these other lines.

In tailoring Semi-ready to physiques we prevent the necessity of making alterations of vital parts.

As the seams are left with outlets and inner parts basted only—minor alterations can readily be made.

Money back for any dissatisfaction.

LA GRIPPE

This distressing and unfortunately very common malady easily takes rank among the very "meanest" of the diseases to which people living in this climate are liable.

La Grippe is no respector of persons; it attacks the young and the old, the rich and the poor with the utmost impartiality.

Except in the cases where Pneumonia develops, La Grippe is seldom directly fatal; the real danger lies in the after effects. Even when the patient has fairly well recovered from an attack (and it is very hard to tell just when he has fully recovered) the muscles are relaxed, the nerves unstrung, the heart and lungs weak, the throat and bronchial tubes irritable and tender and the whole system depressed, run-down and in no condition to resist the attack of any other disease to which it may be exposed.

This condition is fraught with danger and demands instant and intelligent attention, the system must be built up and restored to a normal and healthy condition—advice easy to give, often very hard to follow.

The appetite is liable to be poor and the digestion impaired so that it is almost impossible to consume and digest sufficient ordinary food to do the work quickly and effectively. What is required is a concentrated food, palatable, easy to digest and containing the elements necessary to repair the waste which La Grippe has committed.

Just such a food is found in

FERROL

a scientifically prepared emulsion of Cod Liver Oil, Iron and Phosphorus, palatable, digestible and effective. FERROL contains just what the run down system needs and all it requires. Cod Liver Oil to restore the lost flesh and make what is left firm and healthy, Iron to enrich the impoverished blood and restore elasticity and firmness to the relaxed muscles, Phosphorus to tone the nerve and brain as nothing else will.

Two or three bottles of FERROL, taken after the acute stage of La Grippe has passed, will do more to repair damages than can possibly be accomplished in any other way. Try it and see.

PAY ORE COLUMN

The smelter of the Dominion Copper company has recently established a new record of 5,328 tons of ore in one week. Supt. Thomas states that the new giant Giroux hot blast furnace is partly set up, and with a couple of cars more of machinery, soon expected to arrive, it will be completed some time in December; or at least by the first of the new year the new furnace will be in commission, giving the works, with three furnaces, a total capacity of from 1,200 to 1,400 tons of ore per day, or between 40,000 and 50,000 tons monthly. At the company's several mines work continues uninterruptedly, and Manager Drummond expects to have no trouble whatever in supplying the increased tonnage required whenever the smelter is prepared to receive it.

The Dynamo looks particularly good. For the present work has been suspended on the tunnel and surface work is being carried on. The ledge has been stripped for a long distance, said to be 300 feet.

SCHOOL REPORT

Following is the report of the public school for the month of December:

Division I.—J. L. Watson, teacher.

Pupils actually attending	31
Average daily attendance	27.73
Percentage	89.45
Average daily attendance for December, 1905	26.69

Pupils present every session—Willie Bryant, Kate Bernard, Olive Bunting, Jim Galloway, Grace Holmes, Theodore Hunter, Fred Janes, Roddie McCutcheon, Willie White and Shirley Yuill.

Pupils attending every session during the fall term—Kate Bernard, Jim Galloway, Grace Holmes and Willie White.

Division II.—C. M. Martin, teacher.

Pupils actually attending	42
Average daily attendance	40.67
Percentage	96.35
Average daily attendance for December, 1905	31.56

Pupils present every session: Percy Archambault, Barnie Archambault Ruth Bernard, Leo Barnett, Thelma Chambers, Jimmie Dermody, Stella Dynes, Maude Eales, George Eales, Arthur Eales, Harold Hunter, Alex Hunter, Edward Hardy, Ellen Hardy, Esther Lawson, Roy May, Charles McArthur, Jessie McDonald, Anna Mackenzie, Hazel Redpath, Grace Redpath, Vera Redpath, Ward Storer, Dick Taylor and Margie Williams.

Pupils attending every session during the fall term—Ruth Bernard, Jimmie Dermody, Alex Hunter, Edward Hardy, Ellen Hardy and Dick Taylor.

GEMS OF POESY

James Mack of Greenwood has contributed three poems to this book.

Price $2. On sale at Holmes & Kennedy's.

THEY COME HIGH

More than twice as much money is now being sent out of the United States for the purchase of luxuries than was the case ten years ago.

Including cigars, cigarettes and tobacco, the importations of luxuries during the fiscal year 1906 amounted to $125,000,000; ten years ago the grand total was $51,000,000. Quite an increase, even for generous, luxury-loving Uncle Sam!

Most remarkable was the upward jump of the importations of diamonds and other precious stones—in 1896 aggregating $7,944,032, and in 1906, $35,000,000. Cotton laces, embroideries and edgings rose steadily from $10,878,954 to $42,120,915; while the imports of silk laces and ribbons nearly doubled.

Other than tobacco, the bulk of the luxuries comes from Europe, which joyously recognizes the value of America's patronage.

No Opium in Chamberlain's Cough Remedy.

There is not the least danger in giving Chamberlain's Cough Remedy to small children as it contains no opium or other harmful drug. It has an established reputation of more than thirty years as the most successful medicine in use for colds, croup and whooping cough. It always cures and is pleasant to take. Children like it. Sold by all druggists.

NEW YEAR'S GREETING

Before next week's issue of the Times shall greet our readers we will have entered into a new year, and we take this opportunity of extending to all our greeting for the occasion. May 1907 be a bright, happy, prosperous year to all our readers, and more, to all the residents of the town and district is our fervent wish. The old year lies a-dying. It has brought its cares and responsibilities, its griefs and joys, to all of us. The opportunity to have made more of it than we have, has passed away. But just ahead a New Year dawns, its opportunities all before us, before us individuals, as fellow citizens. What the year shall be to one rests largely with himself. What it shall be to the community rests, too, with us.

The New Year is no better than any other in which to put into action resolutions of good things, although it is often the starting point of virtuous spasms. Each day made a day of industry and patience and noble effort makes the year one of such. That only is correct living which measures not the year, but the day, the hour, the present, and the present is, after all, the only vantage ground we have.

For us, as a community, the year 1907 seems to contain much of promise. The industrial conditions were never before on so happy a basis for Greenwood. Foundrtions solid and secure are laid. Mining is no longer an experiment in the Boundary. It has cost millions of money to prove our resources locally, but they have stood the analysis to which they have been submitted by cold-nosed science and return-seeking capital. Henceforth let us not say, "If mining shall pay," "if the town grows," "if" and "if" and "if," but rather let us plan and work on the assurance that mining does pay, and that the town has grown, is growing and must grow.

The wealth of silver and gold and copper all about us is being made to minister to our welfare. Only a small part of it has yet been touched. The stream of prosperity that flows from the hills about will widen, deepen yearly, but our individual attitude to the problem of civic prosperity and the industry on which it is based affects the rate of flow. The most humble individual can help or hinder.

We can each be a member of an unorganized "boosters' club," helping ourselves and others in ways little suspected, or if we prefer, we can each be a wet blanket thrown on the fires of hope, and courage to arrest, and it may be extinguished. Let us begin the New Year right by working to make our community the brightest, happiest and most prosperous in the land, for by that kind of effort well-sustained it can only thus become such. Will you, kind reader, join the Greenwood Booster Club for 1907?

EDITORIAL NOTES

THE teacher whose business to watch for and criticise mistakes and defects needs to carefully watch himself lest he degenerate into a common scold. It is even so with the critic of a party in parliament. Observation of such suggests to us that already some of them have reached the level of the chronic scold.

AND now with the mining industry of the Boundary fairly and firmly on its feet, the 1907 objective is the two million ton mark.

NIGHT

IMPRESS IT ON YOUR NEW YEAR'S BALL

K. O. P. MEMORY

UNITED STATES LANDS

President Roosevelt Recommends a Change in the Land Laws.

In a message sent to congress recently, President Roosevelt takes an advanced stand on the matter of public lands. He says:

"The developments of the past year emphasized with increasing force the need of vigorous and immediate action to recast the public land laws and adopt them to the actual situation. The timber and stone act has demonstrated conclusively that its effect is to turn over the public timber lands to great corporations. It has done enormous harm, it is no longer needed, and it should be repealed.

"The desert land act results so frequently in fraud and comparatively seldom in making homes on the lands that it demands radical amendment. That provision which permits assignment before patent should be repealed and the entrymen should be required to live for not less than two years at home on the land before patent issues. Otherwise the desert land law will continue to assist speculators and other large holders to get control of land and water on the public domain by indefensible means.

"The commutation clause of the homestead act serves, in a majority of cases, to defeat tho purpose of the homestead act itself which is to facilitate settlement and create homes. In theory the commutation clause should assist the honest settler, and doubtless in some cases it does so. Far more often it supplies the means by which speculators and loan add mortgage companies secure possession of the land. Actual—not constructive—living at home on the land for three years should be required before commutation, unless it should appear wiser to repeal the commutation clause altogether.

"These matters are more fully discussed in the report of the land commission, to which I again call your attention. I am gravely concerned at the extremely unsatisfactory condition of the present public land laws and at the prevalence of fraud under their present provision. For much of this fraud the present laws are chiefly responsible. There is but one way by which the fraudlent acquisition of these lands can be definitely stopped, and therefore I have directed the secretary of the interior to allow no patents to be issued to public lands under any law until an examination of the ground shows actual compliance with that law. For this purpose an increase of special agents in the land office is urgently required ank unless given, bonafine would-be settles would be put to grave inconvenience or else the fraud will in large part go on.

COAL LAND PUTS PREMIUM ON FRAUD.

"Further, the secretary of the interior should be enabled to employ enough mining experts to examine the validity of a'l mineral land claims and to undertake the supervision of the use of the mineral fuels still belonging to the United States.

"The present coal laws limiting the individual entry to 160 acres puts a premium on fraud by making it impossible to develop certain coal fields and yet comply with the law. It is a scandal to maintain laws which sound well, but which make fraud the key without which great natural resources must remain closed.

"The law should give individuals and corporations under proper government regulation and control (the details of which I shall not at present discuss), the right to work bodies of coal land large enough for profitable development.

"My own belief is that there should be provision for leasing coal, oil and gas rights under proper restrictions

"If the additial force of special agents and mining experts I recommend is provided and well used the result will be not only to stop land frauds but prevent delays in patenting claims and conserve the indispensable fuel resources of the nation.

"Nany of the existing laws affecting rights of way and privileges on public lands and reservations are illogical and unfair. Some work injustice by granting value rights in perpetuity without return. Others tend to protect the grantee in his possion of permanent impravement made at large expense. In fairness to the government, to the holders of rights and privileges on the public lands and to the people whom the latter serve, I urge the revision and enactment of thesc laws in one comprehensive act providing that the regulations and the charge now in force in many cases may be extended to all, to the end that unregulated or monopolistic control of great natural resources may not be acquired or misused for private ends."

Dr. Mathison, dentist, Naden-Flood block.

For Rent—Warm furnished cabin (plastered), $5.50. H. J. Clint. 22-23

Mr. Sanford Dixon spent Christmas at Grand Forks with his sister, Mrs. A. D. McMillan.

Mr. Angus J. McGillivary, manager of the Queen Bess mine, Sandon, is in town at present.

On Monday morning Capt. Swayne commenced operations in his new bakery on Copper street.

Mr. and Mrs. Mathison spent a few days in Grand Forks this week, returning home Wednesday.

Mr. D. A. Hunter, principal of Ladysmith public school, is spending his vacation with his family in town.

J. C. Haas, M. E., who has the Golconda development in charge, has left for the east to be gone six weeks.

Mr. Bash left Thursday morning for Ymir on business connected with the Dominion Copper company.

Miss Caldwell, teacher in Cranbrook public school, is spending her vacation with her sister, Mrs. G. B. Taylor.

Mr. and Mrs. Goddard and family of Kamloops, are spending a few days at the home of Mr. G. W. Parker.

Lost—Bunch of keys lost on Copper street, near post office. Reward given to party returning same to Postmaster.

Miss M. L. Moffatt, teacher of Division VII, in Nelson public school, is spending her vacation under the parental roof.

On Wednesday morning the mercury suddenly dropped to the zero point, and has been hovering around there ever since.

Andrew Hanson, a former Greenwoodite, but now a prosperous rancher of the Myers Creek valley, was shaking hands with old friends in the city last Saturday.

Unlike many of the coast cities, Greenwood did not suffer from a turkey famine during the holiday season, the P. Burns Co. having received at the eleventh hour a sufficient quantity to satisfy all demands.

The first hockey match of the season was played last night between Phoenix and Greenwood teams. The game was well contested throughout, the score standing at call of time 3 to 2, in favor of Greenwood.

A musical entertainment under the auspices of Greenwood Concert band, was given by the Polmatier Sisters of Troy, N. Y., at the Auditorium Thursday night. The attendance was very small. Those present enjoyed a rare musical treat.

The B. C. Telephone Co. intend moving into their new office, back of P. W. George's store, on Sunday next. Owing to delay in arrival of the new switchboard from Chicago, the new metallic system will not be fully completed before the end of January.

Mrs. W. H. Davidson and family leave tomorrow for Greenwood where they will join Mr. Davidson and in future reside. Jimmie Davidson, who has made quite a name for himself as a successful jockey here, expects to show the Boundary people how races are won during the next summer.—Nelson News.

During the past week our local merchants and business men have been wearing that smile that has become famous for its durability. All report business at this season of the year the best that has been for years. This fact, no doubt, largely accounts for the many beaming countenances.

A meeting of the city council was held Thursday night. All members were present, Acting Mayor Bunting in the chair. Among the items of business transacted was the granting of the Greenwood City Waterworks company a further period of three months from January 2, 1907, for the completion of their plant at Boundary Falls.

Dr. Simmons, dentist, Phone 96 Wallace-Miller Block, open evenings.

Miss Pickard of Fredericton, N. B., arrived in the city on Monday last, and will spend the winter here with her sister, Mrs. Dr. Simmons.

Geo. H. Cropley, proprietor of the Riverside livery, has purchased the building adjoining Holmes & Kennedy, Copper street, and formerly owned by Smith & McRae, and is now busily engaged remodeling it into an up-to-date livery stable.

Miss McQueen, who has been in charge of the C. P. R. telegraph office in this city for almost four years, left Wednesday afternoon for Kenora, Ont., where she will visit her sister for a couple of months. Her many friends in Greenwood wish her a very pleasant holiday, and look forward with pleasure to welcoming her once more into their midst.

Many of our young people who have been pursuing their studies at different institutions of learning, are spending the holiday season at the family fireside. Among those who have returned are Misses McCreath, McMynn and Shaw, of the Young Ladies' College, Yale; Mr. Floyd Hunter, of Moscow University, and Mr. Harry Simmons, of the Presbyterian College, Calgary.

The two men convicted before Magistrate McMynn for a defective knowledge of the ethical law regarding "Mine and Thine" were taken over to Nelson Thursday afternoon by Chief McKenzie and handed over to the tender care of Warden Lemon, who will provide them with free lodging and board for two months. In return for this kindness they will probably be asked to spend some time each day on the stone heap.

The Christmas tree and entertainment at the Presbyterian church on Friday evening, the 21st inst., was most successful, the church being filled to its fullest capacity. The church was suitably decorated with evergreens, and the tree itself being loaded with presents, presented a fine appearance. An excellent program was provided by the children of the school, and all present enjoyed themselves very much.

The Sunday School of the Methodist church held a very successful entertainment on Christmas night. The church was very tastefully decorated for the occasion. A unique feature of the decorations was a log cabin constructed out of paper. With its rough-looking logs, brick chimney and snow-covered roof it presented a very pretty sight and was well worth seeing. It took the place of a Christmas tree, its interior and exterior being decorated with presents. Mr. Macknight took a flashlight of the decorations and the children grouped on a platform. Those who had the entertainment and decorations in charge are to be congratulated on the success which attended their efforts.

Information has been received from the east to the effect that the officials of the Dominion Copper company at a board meeting held a few days ago in New York, have decided to enlarge their smelter at Boundary Falls by the addition of three more furnaces. These will probably be installed and in operation before the end of 1907. The improvements will cost $150,000, and will be paid out of the earnings. When the furnace now under construction and these other three are completed, the smelter will then have six furnaces capable of treating 3,400 tons of ore daily. Electricity has recently supplanted steam as motive power at the smelter, and in the course of a month or so will also be employed in the company's mine. This change will effect a saving of about $100,000 per year.

WISE SAYINGS

The hardest thing to find is an honest partner for a swindle.

If you talk about your ill health it will make you less healthy.

Talk much of what you are going to do, and you will never do it.

Christmas eve was one of the red letter variety for the children at the Mother Lode mine. A Christmas tree and entertainment were given in the company's dining room. Mr. Keffer presided, and Mr. Holman, being called on for a few remarks, welcomed all present, and extended to them the hospitality of the company. The children provided an excellent program, their singing being especially good. The entertainment over, Santa Claus duly appeared and began distributing the presents, which were both numerous and valuable. The distribution completed, all present sat down to a sumptuous Christmas dinner provided by the company. All departed feeling it was good to be there. Christmas day all the children at the mine and Deadwood were given a sleigh ride to Greenwood, and were kindly entertained at the home of Mr. and Mrs. Keffer.

Christmas day was well observed and thoroughly enjoyed by all the inhabitants of Greenwood. Many of the surrounding mines were closed down, and work in some departments of the smelter was suspended for the day. One noticeable feature to the man on the street was the great number of strangers within the gates and the good cheer evidenced on all sides. Ideal weather conditions prevailed. The day was spent in various ways, many taking advantage of the fine weather and good sleighing went driving. Large numbers attended the skating rink, where the ice was in excellent condition. Some enthusiastic hurlers of the stanes collected a few kindred spirits and repaired to the Curling rink. In the afternoon the city band, of which we are justly proud, turned out with their new instruments and entertained the citizens with many choice selections. Excellent order prevailed on the streets during the day, and Chief McKenzie's duties were not onerous. A few individuals, becoming rather hilarious from imbibing too freely from the cup that cheers, were given free lodgings for awhile. When these had come to themselves they were allowed to go without being called to contribute anything to the city exchequer.

BETTER CLASS TAILORING

Has Conquered the Prejudice Which Custom Generates.

The man who wears a comfort last C width shoe does not of necessity wear a Physique Type C suit of Semi-ready tailoring, but the man who has studied the reason why he will today pay more for a store shoe than he would pay for a shoe made on the cobbler's bench, will understand why Semi ready tailoring must of necessity win all the better class of tailoring trade. No tailor can possibly excel the work on a Semi-ready suit or overcoat, even though it be but a $15 serge or tweed, for good tailoring helps the new physique type system of the Semi-ready. The physique types A, B, C, D, E, F and & mean more than were shoe widths, just as do the five variations of each type and the many sizes of each variation.

P. W. George & Co. will be pleased to show you how what "Semi-ready" tailoring profits the wearer.

For nice fresh flowers for funerals decorations and weddings, write or telephone Spokane Florist Co., Main 5, Spokane. 5-30

THE
COPPER
HANDBOOK

(New edition issued Nov. 15, 1906)

Is a dozen books in one, covering the history, Geography, Geology, Chemistry, Mineralogy Metallurgy, Terminology, Uses, Statistics and Finances of Copper. It is a practical book, useful to all and necessary to most men engaged in any branch of the Copper Induetry.

Its facts will pass muster with the trained scientists, and its language is easily understood by the everyday man.

It gives the plain facts in plain English without fear or favor.

Its lists and describes 4626 Copper Mines and Companies in all parts of the world, descriptions running from two lines to sixteen pages, according to importance of the property.

The Copper Handbook is conceded to be the

WORLD'S STANDARD REFERENCE BOOK ON COPPER

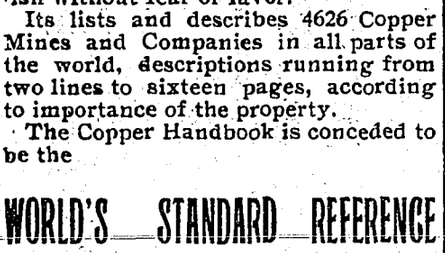
The Mining Man needs the book for the facts it gives him about mines, mining and the metal.

The Investor needs the book for the facts it gives him about mining, mining investments and copper statistics. Hundred of swindling companies are exposed in plain English.

Price is $5 in Buckram with gilt top; $7.50 in full library morocco. Will be sent, fully prepaid, on approval, to any address ordered, and may be returned within a week of receipt if not found fully satisfactory.

HORACE J. STEVENS
Editor and Publisher.
453 Postoffice Block, Houghton, Michigan.

COLUMBIAN COLLEGE



New Westminster, B. C.

Receives both ladies and gentlemen as resident or day students. Has a complete business or commercial course. Prepares students to gain teachers' certificates of all grades. Gives the four years' course for the B. A. degree, and the first year of the of the School of Science course, in affiliation with Toronto University. Has a special "Prospectors' Course" for miners who work in B. C.

Instruction is also given in Art, Music, Physical Culture and Elocution.

Term opens September 17, 1906. For calendar, etc., address COLUMBIAN COLLEGE.

DOMINION COPPER CO.

Has Bonded Copper Property in the Similkameen.

(From the Similkameen Star)

E. F. Voigt returned from Vancouver on Sunday, after an absence of several weeks, and he brings back with him good news to the people of Princeton. He has bonded group No. 14, comprising three claims and a fraction, situated on Copper mountain, to the Dominion Copper Co., a corporation of sound financial standing and at present operating in the Phoenix, Deadwood, Wellington, and Summit camps. James Lindsey made a report on the group 14 a few months ago and it was upon his recommendation that the deal was made. Representatives of the Dominion Copper Co. are expected to arrive in Princeton at once when arrangments will be made to start development work immediately and a force of men will be put to work.

If this property turns out as good as expected, it will mean more to Princeton than may seem at first sight. What has been lacking in the past has been the lack of money and enterprise to take hold and show the value of the copper deposits in this section. Once this is done, any amount of money will be found ready and willing to come in and take a chance.

Mr. Voigt has stayed with Copper mountain for a good many years, at no small expense, never wavering in his belief that she would come to her own, and it is to be hoped that success has at last crowned his labors.

MIDWAY NOTES.

George Cunningham, Jr., returned Monday from Keremeos and other western points, where he has been for the past few months. Everything, he says, indicates that Keremeos will have a great boom next summer.

Mr. and Mrs. Wyatt, who have been visiting here for the past three weeks, returned home to Ontario this week.

Dave McBride, of Brideville, gave a ball last night at his new hotel on Anarchist mountain. It was in the nature of an opening ceremony, although somewhat late, the hotel having been opened for business for some time.

The name of the station at Dave McBride's place on Anarchist mountain has been changed from Oxford to Brideville.

A number of Midway people went over to Molson Christmas night to attend the masquerade ball given in Parry's hall. Among those who went from here were Mrs. Swanson, Mrs. Dowding, Mrs. Bush, Miss Lena Bush and Messrs. Bush and Sherman Haynes.

We understand Judge Spink has been asked to decide the question of the legality of the Swanson hotel license. At the moment of going to press his reply had not been received. It is expected the case will be heard about January 5.

Sunday last saw the new wagon bridge completed sufficiently to enable traffic to pass over it. Foreman Wilmshurst got his men to work Sunday in order that it might be made available for heavy traffic as soon as possible after the last car of lumber arrived—which, by the way, was lost for over a week between here and Danville. However, the bridge is now completed with the exception of the side rails and few other odds and ends that do not interfere with its regular use, and we are glad to say, that annoying as the delay has been, we have at least got a good bridge. It is perfectly rigid under the strain of heavy traffic, and is a credit to those engaged in its construction.

STEVENSON-COURTNEY

Last Saturday evening, at the home of Mrs. A. J. Broomfield, Midway, Mr. Howard R. Stevenson and Miss Winnifred A. Courtney were joined in the holy bonds of matrimony, Rev. Leach-Porter of Greenwood, officiating.

King of All Coug :

Mr. E. G. Case, a mail carrier of Canton Center, Conn., who has been n the U. S. service for about sixteen years, says: "We have tried many cough medicines for croup, but Chamberlain's Cough Remedy is king of all and one to be relied upon every time. We also find it the best remedy for coughs and colds, giving certain results and leaving no bad after effects." For sale by all druggists.

LOST

About July 31st, one medium-sized white cow, blue neck, branded Æ on upper part of right hip. Also small red cow branded same brand as above. Information regarding same will be suitably rewarded by applying to the

B. C. COPPER CO.,
Mother Lode mine.

FOR SALE—Residence of Mr. Flynn, situated on Church street, near school house. Price, $300 cash. Apply Mrs. H. Coutts, three doors south of Pioneer hotel, Government st. 15-16

Alteration—The term "alteration" applies to the partial change of substance in rock or mineral which does not necessarily involve its replacement by another. It is a purely chemical process.

The tin deposits of Mexico are again attracting notice and some considerable amount of American capital has been subscribed to exploit these resources. The existence of tin in Mexico has been known since the days of the early Spaniard, but thus far all attempts to exploit the deposits on a commercial scale have been unsuccessful, chiefly for the reason that the rich ore which was amenable to the crude treatment practiced, was found only in limited quantity. There has been a continued small annual production of tin, mostly gathered from the stream deposits by natives. Some ten years ago an American company took up some tin land in Durango, but nothing has come of it, and until very recently the deposits have been looked upon as somewhat of a myth. However, in the light of better modern practice in mining and metallurgy, some of the recent explorations have given fair promise of profitable operation. It is hoped that the present investigations will be continued by men of skill, experience and sufficient capital to definitely prove the value of the deposits.

WINTER EXCURSIONS

Maritime Provinces, Ontario, Quebec the Old Country.

The Canadian Pacific Railway announce a series of low round trip rates first class three (3) months' limit from Kootenays to all points in Ontario, Quebec, Maritime Provinces and the Old Country.

Rate from Greenwood to Toronto, Montreal, Windsor and intermediate points is $83.55, Halifax or St. John in connection with ocean passages, $94.55.

Tickets will be sold daily November 24th to December 31st.

Corresponding rates will be quoted to all eastern Canadian points from all Kootenay stations.

This is an unusual opportunity to visit eastern Canada or the Old Country at Christmas at a low rate.

Detailed information sailing lists, for ocean steamers, first class or tourist sleeper reservations on application to local agents, or write

COLUMBIAN COLLEGE

New Westminster, B. C.

Receives both ladies and gentlemen as resident or day students. Has a complete business or commercial course. Prepares students to gain teachers' certificates of all grades. Gives the four years' course for the B. A. degree, and the first year of the of the School of Science course, in affiliation with Toronto University. Has a special "Prospectors' Course" for miners who work in B. C.

Instruction is also given in Art, Music, Physical Culture and Elocution.

Term opens September 17, 1906. For calendar, etc., address COLUMBIAN COLLEGE.

COPPER PROSPECTS

Present high prices, the result of a greatly increased consumption and a slowly rising production which, by the way, is less than had been estimated earlier in the year, indicate that copper mining dividends will be larger than heretofore. Many mines that were opened while the copper boom was on a few years ago are rapidly reaching the dividend-paying stage, and the older properties by more economical working are able to squeeze out an extra dividend occasionally. It requires greater managerial talent to meet the exigencies of a low grade copper mine, notwithstanding the current high prices, to guarantee an equitable return on the capital invested. To say that nearly one half of the market price of copper today is profit is nonsense, and as a rule it sound like the twaddle of an inexperienced person, one, for instance, whose livelihood depends upon the flotation of mining stocks on glittering generalities. Some of the better paying of the larger working mines cannot honesily boast of producing copper at less than 11 or 12 cents per pound, and not a few must pay 13 cents and more In remote cases, however, it may be possiflle to gnd an exceptionally well managed mine that can produce copper at 10 cents or a fraction less per pound, but speaking generally the cost is nearer 12 cents. A factor that partly explains the higher cost of producing copper today is labor: miners in Montana, for instance, who formerly received $3,50 per day, now demand $4, Higher wages also rule in Arizona and orominent mining states. This, coupled with more expensive supplies, has made it necessary to raise the charges for producing copper. It should also be remembered that as the output increases and the ore deposit which may have been worked for years, gradually becomes exhausted, new explorations must be made or more land purchased, which, of course, means additional costs on the copper output. Even so great a mine as the Calumet & Hecla, which has already paid dividends of nearly $100,000,000, and has sufficient copper bearing rock in its old property to continue the sharing of profits for some time to come, has found it expedient to increase its land holdings by new purchases. It is a fact not to disputed that the life of even a copper mine is limited. At a time like the present all copper mining operations are at top speed, the desire being to reap the harvest of high market prices.

The probability is that production in 1906 will show a fairly large increase over 1905, when the total of 402,637 tons (57.4 per cent of the world's production) was about 11 per cent greater than 1904. The statistican of The Mining World calculotes that the 1906 output will be not far from 446,000 tons the high record. Consumption, however, shows a longer stride; last year it was 268,500 tons, or 20.5 per cent more than 1904, and in 1906 will probably total about 325,000 tons, the record. An increasing proportion of the domestic consumption is being supplied by imports from Mexico and Canada. Exports this year show a marked falling off, but when the extraordinary demand from China in 1905 is wiped off the ledger, the total shipments in 1906 look more favorable. In fact, some of the more important European countries show an increased consumption this year.

Copper prices average about 5 cents per pound better than 1905, and in the 11th month of 1906 fluctuated between 22 and 22½ cents per pound for Lake copper, f. o. b. New York, 21½ and 22.30 cents for electrolytic, 21¼ and 21⅞ cents for casting; while standard copper sold at London at £97 to £101 18s 9d per ton (21.05 to 22.11 cents per pound.)—Mining World.

Dear Mother

Your little ones are a constant care in Fall and Winter weather. They will catch cold. Do you know about Shiloh's Consumption Cure, the Lung Tonic, and what it has done for so many? It is said to be the only reliable remedy for all diseases of the air passages in children. It is absolutely harmless and pleasant to take. It is guaranteed to cure or your money is returned. The price is 25c. per bottle, and all dealers in medicine sell 314

SHILOH

This remedy should be in every household.

In Praise of Chamberlain's Cough Remedy.

There is no other medicine manufectured that has received so much praise and so many expressions of gratitude as Chamberlain's Cough Remedy. It is effective, and prompt relief follows its use. Grateful parents everywhere do not hesitate to testify to its merits for the benefit of others. It is a certain cure for croup and will prevent the attack if given at the first appearance of the disease. It is especially adapted to children as it is pleasant to take and contains nothing injurious. Mr. E. A. Humphreys, a well known resident and clerk in the store of Mr. E. Lock, of Alice, Cape Colony, South Africa, says: "I have used Chamberlain's Cough Remedy to ward off croup and colds in my family. I found it to be very satisfactory and it gives me pleasure to recommend it." For sale by all druggists.

A CHEERFUL VIEW

British Columbia has an ideal mining law. Ontario's mining law is bad, and, in spots, Ontario's minerals are not much better. In British Columbia the miner settles the title to a claim when he drives his stakes. In Ontario the lawyers settle a title to a claim when they get the patent out of the government at the Queen's Park, and even the patent is not always final. In British Columbia the miner applies for his certificate of improvement or his Crown grant. His application is advertised. If objection is raised the courts at once determine the validity of every assault upon the claim-holder's title. In Ontario the title to a mining claim is a question of fact and poliey to be determined by the government In British Columbia the title to a mining claim is a question of fact and law determined by the courts.—Grand Forks Sun.

Synopsis of Canadian Homestead Regulations.

ANY available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother,

(3 If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,00 pounds shall be collected on the gross output.

W. W. CORY,
Deputy of the Minister of the Interior

OVER-EATING OF XMAS FARE!

Pardonable at this Season, but the Results are Unpleasant

Eating more than is necessary is like choking a fire by putting on too much fuel. The food is not only undigested and useless, but a menace to health. Depression, drowsiness, headache, nausea, flatulence, and indigestion, are some of the consequences. A Bilean after dinner is the best help to the overburdened stomach. All sufferers from dyspepsia find Bileans indispensable. They enable you to eat what you like, when you like, and how you like. Unequalled as a family medicine.

INTERESTING CURE BY BILEANS.

Lady who had Dyspepsia for a Year.

Mrs. Charles Merrett, 35 Cornwall Street, Toronto, Ont., says: "I was a sufferer from acute dyspepsia for 12 months before using Bileans. Pains in the chest and in the region of the heart, and a sensation of fulness in the stomach, usually after meals, were some of the symptoms. Such sudden and severe attack of pain in the region of the heart made me think I had heart disease, but my doctor said there was nothing wrong with that organ, and the whole trouble lay in the food not digesting properly. I tried doctor's medicines and various remedies advised by friends and by druggists, but nothing seemed able to cure me of those terrible pains and the distress after food until I began using Bileans. A very few gave me such relief that I kept on using until I had no more trouble with my heart or stomach. I was recommended to try Bileans by parties who had used them as a family medicine for a long time, and now I would strongly recommend them to any sufferer from indigestion or allied symptoms. There is nothing to equal Bileans as an all-round medicine for young and old."

BILEANS

Bileans are altogether different and superior to the ordinary stomach and liver pills. They are purely vegetable in composition and are a certain cure for headache, nausea, and all the effects of indigestion. They also cure constipation, piles, female ailments and irregularities, anæmia, rheumatism, debility, blood impurities, and all ailments and disorders arising from defective bile flow and assimilation. Of all druggists at 50c. a box, or post free from the Bilean Co., Toronto, for price. 6 boxes for $2.50.

WHAT VISITORS SAW

In Our Great Northern Canada

AND WHAT THEY SAY

As Taken from Their Home Papers After Their Return.—Most Complimentary References.

For the past few years the people of the United States have been busy discovering Canada, discovering its lands, its laws, its climate, its prospects, and the result of that discovery has been that hundreds of thousands have located in our northwest. What our brothers in Britain have been slow to realize, our cousins south of the line have been swift to comprehend.

They see what the country possesses, they realize what its future must be. And so they came by the car load, by the train load, and they have introduced into the northwest numbers, industry, intelligence, capital. They assimilate with the Canadian, they like his laws, they like his privileges, they like his opportunities. The language is the same, the flags are colored alike, traditions are one, habits are similar, laws are even better.

Then why not come? Why not get a foothold here while opportunity becons?

They have sent their spies into the country and they have returned to them bearing grapes.

Last summer a party of newspaper men toured the country and the following extracts from their home papers on their return show what they thought of Canada.

For 27 days these dozen of trained newspaper men observed, and already a couple hundred columns of corre spondence has appeared, and to read it makes the Canadian proud of his heritage, even as it makes the man down in the states anxious to share it. Here are samples of what their papers said:

I. C. Norwood, Washington Star—Homesteading in Canada is a much easier proposition than it is in any of the states. In the country a homestead can be secured for $10 and an occupancy of three years. In the states seven years are required and the land costs $1.25 an acre. Anyone with half an eye may see that the last half century has wrought wonderful changes in the industrial map of North America. A new day is dawning for Canada. As the national evolution of Japan stands as an index of the genius of the last half of the nineteenth century, so undoubtedly will the development of Canada represent the progress of the first half of the twentieth. Within the next forty years that nation will grow up and become our friendly commercial rival, and furnish the world with bread.

And 'tis wheat that is going to be responsible for the main part of Canada's growth. Wheat, the staff of life, the advance agent of prosperity. The 550,000 square miles of wheat country of Western Canada is coming to the front as the backbone and mainstay of the Dominion. About 200,000,000 acres in this region are fit for cultivation and nearly all of it will produce the best wheat in the world. If one-quarter of these acres are eventually sown to wheat, there will be bread enough to cover England's deficiency four times over and an overflow sufficient to heap up the hungry lands of the continent of Europe.

Edward G. Lowry, New York Evening Post—We have been up and down the Canadian West, and, seeing, have understood how these provinces have averaged twenty-three bushels of wheat to the acre. It is a fat country, readily yielding its riches. The grain stands as high as a man's shoulder, with heavy, full heads. Along one road leading out from Regina it is possible to ride forty miles in a direct line through unbroken fields of standing grain. These people have been here long enough to give heed to other things than the tilling of the land. They have planted gardens and flowers and made their homes attractive with growing things. Americans have come here in great numbers. Most of them have succeeded. Many control an entire section, 640 acres. Practically no farm in the provinces is less than 160 acres. I drove for an hour with a Mennonite, a Russian refugee, now a farmer in Canada. "This government can't be beat," was his vehement assertion made eagerly and with shining eyes. For the man seeking cheap lands on which to raise wheat there is no need to go beyond the great Saskatchewan valley, with its comsaratively mild and short winters, its rich soil and growing access to market. The development of Western Canada is one of the wonders of recent times.

R. H. Lindsay, Kansas City Star—Respect for the law, whatever their opinion may be of its wisdom or justice, is a striking characteristic of high and low in Canada. No American who comes to Canada and mingles freely with the people can fail to be impressed with the fact before he has been across the border three days, Railroad men, professional men, working men, all seem to agree in the sentiment, "It is the law. It must be obeyed." No man seems to think himself too rich or too big to yield cheerful obedience. This seems to be as true of relatively new and unsettled country in the west as of the older provinces of the east. There is little of the free and easy, reckless spirit of our own western communities in the new Canadian provinces of the west. In town and country in Manitobu, Saskatchewan and Alberta, life and property are safe, disorder and crime almost unknown The cities are well policed and in the sparsely settled regions the famous Royal North West Mounted Police keep excellent order.

Thomas J. Pence, Raleigh News and Observer—Hundreds of our people are getting rich in Canada. They are digging dollars out of the ground. Nowhere in the world are the toilers of the soil as prosperous as in this country, and Canada is making rich men out of farmers who have hitherto been in the most moderate circumstances. The crops this year are larger than ever before. The wheat fields in the three wheat provinces of Manitoba, Alberta and Saskatchewan have yielded from twenty-one to forty bushels to the acre. Oats have run from ninety to one hundred and twenty bushels. Other cereal crops are large in the same proportion and the people up there are happy.

Canada is booming in all particulars, and people are flocking in by the thousands.

It is the poor man's land. It is the land of opportunity. Men of small means can go there and build fortunes. It is the land of promise. Canada promises to furnish a large per cent of the food stuff of the world.
