The Big Store | The Hunter-Kendrick Co. Ltd. THE BIG STORE | The Big Store

What Shall I Buy For Christmas ?

A FEW SUGGESTIONS FROM OUR DIFFERENT DEPARTMENTS MAY AID YOU IN YOUR SEARCH FOR A SUITABLE GIFT.

FOR A LADY

A PAIR OF KID GLOVES
Ask for the famous "Reynier" brand. The most stylish.

SOME SILVERWEAR
is always acceptable. Rogers' famous "1847" make lasts a life-time.

A DAINTY HANDKERCHIEF
We have some in Japanese silk with lace border.

A CARPET SWEEPER
The "Bissell" makes sweeping easy.

A CENTER-PIECE
Appeals to every woman. Especially a "Battenberg."

A SILK FASCINATOR
A special line in silk and white.

A PRETTY TIE
Something in Chiffon and Lace, or Silk and Lace.

FOR A GENTLEMAN

A "GILLETTE" SAFETY RAZOR
Makes shaving a pleasure.

A HANDSOME CARVING SET
An English made set is always the best.

A GOOD POCKET KNIFE
An "I.X.L." or "Boker" is the correct thing.

A PAIR OF HOUSE SLIPPERS
Something in leather or felt.

A CASE OF HANDKERCHIEFS
Containing six fine linen ones. A most useful gift.

AN ASCOT OR DERBY TIE
We have some special Christmas patterns.

A PAIR OF GLOVES
Our Silk and Mohair lined gloves are unequalled.

Dainty
Delicate
Delightful
Silverware
Presents

Tea Sets,
Waiters,
Fruit Dishes,
Berry Dishes,
Bake Dishes,
Bon-Bon Dishes,
Pickle Jars,
Butter Dishes,
Fern Dishes,
Cream and Sugars,
Biscuit Jars,
Marmalade Jars,
Nut Bowls, Etc.

A Large assortment of Cut Glass, Numerous Small Novelties, and Jewelry in Latest Designs,

REGINA WATCHES

A. LOCAN & CO.

GREENWOOD AND MIDWAY.

IS A HEALTHY CITY

Medical Officer of Health Presents Report.

IS EXCEPTIONALLY GOOD

Only Two Cases of Typhoid Fever From City Proper.

At the regular meeting of the city council held Monday evening, with Mayor Naden in the chair, the election bylaw was considered in committee and read a third time. A letter was read from Mayor Stevens of Kamloops, president of the Union of B. C. Municipalities, asking for suggestions from council regarding amendments to the Municipal Clauses act. A sub-committee was appointed to report on the matter.

Dr. Oppenheimer, medical officer of health, asked for leave of absence, which was granted. He also presented his annual report, which was referred to the board of health. The report follows:

To His Worship the Mayor and Aledrmen of the City of Greenwood.

Gentlemen: I have the honor to submit herewith my first annual report as medical officer of health for the Corporation of the City of Greenwood. This report commences from the date of my appointment, April 1st, 1905.

Health Bylaw No. 106, I am pleased to say, was brought to greater perfection this year and modified in many ways to suit the growth and advancement of the city and protect the health of same.

The city also purchased a Babcock milk tester and is now able to determine accurately the quality of the milk supplied. Several tests were made during the year and I have pleasure in reporting the same were up to the standard; it was, also, tested for impurities (preservatives), and was in every way pure and satisfactory.

There were numerous complaints as to nuisances during the year; the same had my best attention and were rectified, but I would suggest that hereafter complaints be made in writing to the board of health, then acted upon, and the sanitary inspector notify these people in writing and a record be kept of the same. I am sure this would save a good deal of work and delay.

A new water supply has at last been installed. Its source is preferable to the old, which is a step in the right direction. Now, I would suggest another very important matter, namely, the disposal of the sewage of the city, and if the corporation could see its way clear, I would strongly advocate that a system be installed. Something will have to be done sooner or later, as there are many cesspools in the city of six years' standing and these in time mean trouble. If we cannot afford a system just yet I would suggest that the public put in septic tanks. They can be highly recommended and, after all, are less expensive and at the same time not a menace to the health of the city; in fact, numerous places have this method on a larger scale for their disposal of sewage. I might mention Vancouver, B. C., and Exeter, Eng. I wish your honorable body would take note of this section of my report.

I am pleased to report the health of the city was exceptionally good this year' there being only two cases of typhoid fever from the city proper. There was a mild outbreak of mumps and chicken pox among the children.

Gentlemen, I have tried to make this report as concise as possible, but there are one or two suggestions I have made that I should like to have carried out, especially the septic tank system. I must thank the health board and the sanitary inspector for their courtesies during the year.

All of which is respectfully submitted. I have the honor to be, gentlemen, your obedient servant,

Sidney S. Oppenheimer, M.D.
Medical Officer of Health.
Greenwood, Dec. 7, 1905.

INSTALL ELECTRIC HOIST

Power for Elkhorn Mine Now Furnished by Electricity.

The Elkhorn Mining company this week installed a gallows frame and a 5-horsepower electric hoist. The hoist was supplied by the Denver Engineering Works and the motor by the Bullock Electric company. The motor and hoist were purchased through E. G. Warren of the Greenwood Electric company.

STILL HE LINGERS.

One million dollars is being spent daily to quench the thirst of the people of New York, and still J. Peck MacSwain lingers in Golden, B. C.

Smith Curtis of Rossland was in the city this week, leaving today over the Great Northern.

ANNUAL MEETING

Greenwood Liberal Association Elects Officers.

IMPORTANT RESOLUTIONS

Pension System and Eight Hours in Smelters.

The annual meeting of Greenwood Liberal association held last Friday evening was well attended. Kenneth McKenzie, president, occupied the chair. Secretary-Treasurer Thomas read the annual financial statement, which showed a substantial balance to the credit of the association.

Dr. H. S. Simmons was elected president for the ensuing year, Dr. R. Mathison, vice-president, and A. F. Thomas was unanimously reelected secretary-treasurer. The following were unanimously elected as the executive committee: Kenneth McKenzie, Geo. R. Naden, W. S. Graham, S. B. Yuill, J. W. Parker and T. F. Sutherland.

During the installation of officers stirring speeches were made by Kenneth McKenzie, the retiring president, the new president, and the vice-president.

The routine business having been disposed of, two subjects were brought up that evoked spirited and interesting discussions. The first was the indemnity bill, passed at the recent session of the Dominion parliament. The speakers all held that the increase to members of the house of commons was justifiable, but held that the pension system could not be justified and should be materially amended forthwith. Finally the following resolution was unanimously passed:

"That the association, while endorsing the increased sessional indemnity to members of the house of commons, strongly disapproves of the pension clause of the Indemnity bill as applied to ex-ministers of the crown, and it expresses the hope that same may be revised at the coming session of parliament."

It was also decided to send the above resolution to other associations throughout the district of Yale-Cariboo.

The other subject discussed was the question of an eight-hour law applicable to smelters. Some held that if smelter managements voluntarily granted an eight-hour day, the necessity for legislation was removed. Others held that such legislation should be passed in any event as a safeguard for the future. All held that the system of working men thirteen hours a day should no longer be tolerated, and unless immediately discontinued drastic legislation should be passed forthwith.

Finally the following resolution was accepted as meeting the views of those present, and unanimously passed:

"That this association strongly endorses the action now being taken in this province with a view to securing a reduction of

(Concluded on Page 2.)

ANNUAL MEETING

(Continued from Page 1,)

the hours of labor in the various smelters in the province, and requests its representative in the local legislature to use his influence to support any legislation furthering this end."

The association then adjourned after a most successful meeting.

LOCAL NEWS ITEMS.

Dr. Mathison, dentist, opposite post-office.

Chas, Galloway returned Sunday last from the coast.

Dr. Mathison returned from Phoenix yesterday.

Call up Thompson & Rouston and have that broken window repaired.

Bob Perry is down from the West Fork to spend the Christmas holidays.

Duncan Ross, M. P., left yesterday for the coast and will be away about a week.

Dr. Simmons returned Tuesday from his monthly professional visit to Phoenix.

The C. P. R. have reduced the round trip fare east during the holidays from $83.90 to $79.50.

Lost—A lady's ribbon belt and buckle of Maple Leaf design. Finder will confer a favor by returning same to this office.

Eight pair of curling stones were received this week by the Russel-Law-Caulfield company for the Curling club. The stones run from 38 to 40 pounds and are beauties.

F. M. Elkins, inspector for the Sun Life, returned this week from a trip to East Kootenay and Alberta. He reports business fairly good along the Crow, especially at Coleman.

E. Jacobs, managing editor of the B. C. Mining Record is in the city. He is making a tour of the Interior of the province to secure the necessary data for the annual mining review.

If you are going to have company for Christmas dinner you will want good bread. FIVE ROSES FLOUR makes bread like mother used to make it. Order a sack from Smith & McEwen, Phone 21.

The date of the Christmas Tree entertainment to be held in the Presbyterian church, is changed from Friday, 22nd, to Thursday, the 21st inst. Good programme, Any one who wishes can put presents on the tree.

The annual special number of the Anaconda News appeared this week. It is a 52-page edition, containing statistics of the year's progress in the district, principally in regard to the mining industry. Although Editor Keffer is one of the youngest journalists in Canada, the special edition of The News is one of which many an older man in the business might justly feel proud.

Pyrrhotite, or magnetic pyrites is an iron sulphide. It is bronze-like in color, in hardness of 4 and specific gravity of 4.6. It usually occurs massive. The mineral contains 60 per cent iron and 40 per cent sulphur. The great quantity of sulphur in pyrrhotite prevents its external use as an ore of iron. At times pyrrhotite carries copper and if in sufficient quantity makes a valuable copper ore.

Last week a West Fork trapper sent sent to a friend in town for musk, The friend dropped into a drug store and ordered a pound of musk. "A-a-a pound?" the astonished druggist asked. "Yes, a pound," was the reply. "Don't you understand English?" The druggist regretted that he hadn't that much musk in stock, but would order it if the customer had the price on his person. The purchaser produced his wallet and wanted to know the price, and guessed he was good for a pound of musk anyway. When the druggist thought $1,000 would be a fair deposit, the customer just said plain "hell!" and left the premises.

INDEPENDENCE DOESN'T PAY.

Billy McAdams, formerly of the Sandon Paystreak, has accepted the editorship of the Edmonton Bulletin, Frank Oliver's paper. One by one the old newspaper men of the interior of B. C. drop out of the Independent ranks and reach for the "flesh-pots." The only source of revenue for the Independent newspaper is the workingman, and it has been proved time and again that the workingmen will not support independent thought. If some peculiarity of his church is criticized, he wants to mob the editor. If some action of his union is unfavorably commented upon, he wants to fight. The independent newspapor is expected to praise rascality in the church and condem the same in corporations; to praise socialistic co-operative organizations and condem mergers; commend anarchy and condemn standing armies; boost insurance agents and tin-horns, and condemn highway robbers; praise those who buy their clothing in the east, and boycott Chinese; work for nothing during a political campaign for some fellow who has in some way managed to drift along without working, and in fact do everything opposed to true independence. Billy has taken the only sensible course in accepting the editorial chair of a party newspaper. His orders are easily understood and followed—simply to praise all the acts of the party and condemn all opposition. No trouble with the units of the party—the policy of the leaders is the policy of all.

Faith

You cannot be expected to have faith in Shiloh's Consumption Cure, the Lung Tonic, as a cure for Colds, Coughs and all diseases of the air passages, if you have not tried it. We have faith in it, and we guarantee it. If it doesn't cure you it costs you nothing. If it does it costs you 25c. That's fair. Try it to-day.

Shiloh has cured many thousands of the most obstinate cases, and we do not hesitate to say that it will cure any Cold, Cough, Throat or Lung trouble. If we did not believe this we would not guarantee it. Shiloh has had an unbroken record of success for thirty years. It has stood every possible test without failure. Further

Proof

is found in the many testimonials of those who have tried Shiloh and been cured. Mrs. Archie Taylor, Asaph, Pa., writes:—

"I bought a bottle of Shiloh's Consumption Cure and found it very beneficial. I have two children, and they had a terrible cough. I gave them everything I could think of, but they got no better, until one evening my husband bought a bottle of Shiloh. We gave it to the children when they went to bed, and they slept all night. It cured them completely. I shall always keep it in the house." 603

A HOTEL ON WHEELS

New Dining Cars of the Great Northern Railway a Feature of the Oriental Limited.

It is, perhaps, best to say that in every respect—china, cuisine and attendants, the dining car serviee of the Oriental Limited is in keeping with the luxuriousness of the remainder of this regal train, and has won, as the dining car service has always helped to win, the title, "The Comfortable Way," for the Great Northern railway. The new dining car service of the Oriental Limited equals in beauty, design and interior furnishings anything which is operated on any transcontinental line. Every luxury which a first-class hotel or club affords in the way of service is really on the dining car of the Oriental Limited. The new dining cars were built with a special purpose in view of affording the most comfortable surroundings, as well as giving the traveler a unique and luxurious place in which to enjoy his meals. A gentleman who recently made the journey to the coast from St. Paul on the Oriental Limited, in speaking of the dining car service, said:

"I have traveled on almost every important railroad in the United States, but I have yet to find one which surpasses the Oriental Limited in the comfort and convenience afforded the traveler. Your dining car service is excellent, the equal of any in the country, and the superior of many. I was particularly struck with the beauty of the interior furnishings of these dining cars; they are really a novelty of car architecture."

DON'T THROW MONEY AWAY

THE SETTING HEN—Her failures have discouraged many a poultry raiser.

You can make money raising chicks in the right way—lots of it.

No one doubts that there is money in raising chickens with a good Incubator and Brooder.

Users of the Chatham Incubator and Brooder have all made money. If you still cling to the old idea that you can successfully run a poultry business using the hen as a hatcher, we would like to reason with you.

In the first place, we can prove to you that your actual cash loss in eggs, which the 20 hens should lay during the time you keep them hatching and brooding, will be enough to pay for a Chatham Incubator and Brooder in five or six hatches, to say nothing whatever of the larger and better results attained by the use of the Chatham Incubator and Brooder.

If you allow a hen to set, you lose at least eight weeks of laying (three weeks hatching and five weeks taking care of the chickens), or say in the eight weeks she would lay at least three dozen eggs. Let the Chatham Incubator on the hatching, while the hen goes on laying eggs.

Our No. 3 Incubator will hatch as many eggs as twenty setting hens, and do it better. Now, here is a question in arithmetic:—

If you keep 20 hens from laying for 8 weeks, how much cash do you lose if each hen would have laid 3 dozen eggs, and eggs are worth 15 cents per dozen? Ans.—$9.00.

Therefore, when the Chatham Incubator is hatching the number of eggs that twenty hens would hatch, it is really earning in cash for you $9.00, besides producing for your profit chicks by the wholesale, and being ready to do the same thing over again the moment each hatch is off.

Don't you think, therefore, that it pays to keep the hens laying and let the Chatham Incubator do the hatching?

There are many other reasons why the Chatham Incubator and Brooder outclasses the setting hen.

The hen sets when she is ready. The Chatham Incubator is always ready. By planning to take off a hatch at the right time, you may have plenty of broilers to sell when broilers are scarce and prices at the top notch. If you depend on the hen, your chicks will grow to broilers just when every other hen's chicks are being marketed, and when the price is not so stiff.

The hen is a careless mother, often leading her chicks amongst wet grass, bushes, and in places where rats can confiscate her young.

The Chatham Brooder behaves itself, is a perfect mother and very rarely loses a chick, and is not infested with lice.

Altogether, there is absolutely no reasonable reason for continuing the use of a hen as a hatcher and every reason why you should have a Chatham Incubator and Brooder.

We are making a very special offer, which it will pay you to investigate.

Small Premises Sufficient For Poultry Raising.

Of course, if you have lots of room, so much the better, but many a man and woman are carrying on a successful and profitable poultry business in a small city or town lot. Anyone with a fair sized stable or shed and a small yard can raise poultry profitably.

But to make money quickly, you must get away from the old idea of trying to do business with setting hens as hatchers. You must get a Chatham Incubator and Brooder.

To enable everybody to get a fair start in the right way in the poultry business, we make a very special offer which it is worth your while to investigate.

The Chatham Incubator and Brooder has created a New Era in Poultry Raising.

The setting Hen as a Hatcher has been proven a Commercial Failure.

The Chatham Incubator and Brooder has always proved a Money Maker.

A Light, Pleasant and Profitable Business for Women

Many women are to-day making an independent living and putting by money every month raising poultry with a Chatham Incubator.

Any woman with a little leisure time at her disposal can, without any previous experience or without a cent of cash, begin the poultry business and make money right from the start.

Perhaps you have a friend who is doing so. If not, we can give you the names of many who started with much misgiving only to be surprised by the ease and rapidity with which the profits came to them.

Of course, success depends on getting a right start. You must begin right. You can never make any considerable money as a poultry raiser with hens as hatchers. You must have a good Incubator and Brooder, but this means in the ordinary way an investment which, perhaps you are not prepared to make just now, and this is just where our special offer comes is.

If you are in earnest, we will set you up in the poultry business without a cent of cash down. If we were not sure that the Chatham Incubator and Brooder is the best and that with it and a reasonable amount of effort on your part you are sure to make money, we would not make the special offer below.

WE WILL SHIP NOW TO YOUR STATION FREIGHT PREPAID

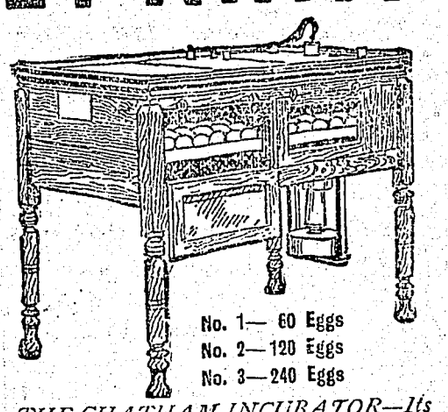
A CHATHAM INCUBATOR and BROODER

You Pay us no Cash Till After 1906 Harvest

"Gentlemen,—Your No. 1 Incubator is all right. I am perfectly satisfied with it. Will get a larger one from you next year. H. M. LOCKWOOD, Lindsay, Ont."

"Gentlemen,—I think both Incubator and Brooder is all right. I got 75 per cent. out of three hatches. R. S. FLEMING, Plattsville, Ont."

Gentlemen,—I had never seen an incubator until I received yours. I was pleased and surprised to get over 80 per cent., and the chickens are all strong and healthy. A child could operate machine successfully. JAS. DAY, Ratinwell, Man."



THE CHATHAM INCUBATOR—Its success has encouraged many to make more money than they ever thought possible out of chicks.

Every Farmer Should Raise Poultry

Almost every farmer "keeps hens," but, while he knows that there is a certain amount of profit in the business, even when letting it take care of itself, few farmers are aware of how much they are losing every year by not getting into the poultry business in such a way as to make real money out of it.

The setting hen as a hatcher will never be a commercial success. Her business is to lay eggs and she should be kept at it. The only way to raise chicks for profit is to begin right, by installing a Chatham Incubator and Brooder. With such a machine you can begin hatching on a large scale at any time.

You can only get one crop off your fields in a year, but with a Chatham Incubator and Brooder and ordinary attention, you can raise chickens from early Spring until Winter and have a crop every month. Think of it!

Quite a few farmers have discovered that there is money in the poultry business and have found this branch of farming so profitable that they have installed several Chatham Incubators and Brooders after trying the first.

Perhaps you think that it requires a great deal of time or a great deal of technical knowledge to raise chickens with a Chatham Incubator and Brooder. If so, you are greatly mistaken. Your wife or daughter can attend to the machine and look after the chickens without interfering with their regular household duties.

The market is always good and prices are never low. The demand is always in excess of the supply and at certain times of the year you can practically get any price you care to ask for good broilers. With a Chatham Incubator and Brooder you can start hatching at the right time to bring the chickens to marketable broilers when the supply is very low and the prices accordingly high. This you could never do with hens as hatchers.

We know that there is money in the poultry business for every farmer who will go about it right. All you have to do is to get a Chatham Incubator and Brooder and start it. But perhaps you are not prepared just now to spend the money. This is why we make the special offer.

IS THIS FAIR?

We know there is money in raising chickens.

We know the Chatham Incubator and Brooder has no equal.

We know that with any reasonable effort on your part, you cannot but make money out of the Chatham Incubator and Brooder.

We know that we made a similar offer last year and that in every case the payments were met cheerfully and promptly, and that in many cases money was accompanied by letters expressing satisfaction.

Therefore, we have no hesitation in making this proposition to every honest, earnest man or woman who may wish to add to their yearly profits with a small expenditure of time and money.

This really means that we will set you up in the poultry business so that you can make money right from the start, without asking for a single cent from you until after 1906 harvest.

If we knew of a fairer offer, we would make it.

Write us a post card with your name and address, and we will send you full particulars as well as our beautifully illustrated book, "How to make money out of chicks." Write to-day to Chatham.

We can supply you quickly from our distributing warehouses at Calgary, Brandon, Regina, Winnipeg, New Westminster, B.C., Montreal, Halifax, Chatham. Factories at CHATHAM, ONT., and DETROIT, MICH. 5-2

A GOOD REPORT.

The report of the medical officer of health for the city of Greenwood makes very interesting reading. Towns in the mountains of British Columbia are unfortunately not too happily situated in so far as one of the best preventives of epidemics is concerned–adequate sewage systems. There are no great outlets in which sewage can be drained and consequently towns are forced to makeshifts that are often fraught with great danger from a public health point of view. Notwithstanding this fact Greenwood has been remarkably free from disease. The good work should continue and whatever improvements are possible should be introduced. In the conservation of the public health eternal vigilance is the price of safety.

MORE CHARTERS.

Charter-mongering is infectious. There are now no less than five applications being made to either the provincial legislature or the Dominion parliament for charters to build railways through the interior of British Columbia. The majority of these have practically the same route. It is reasonable to suppose that all these are not being applied for by bona fide railway builders. It is possible that none of them are. Experience in British Columbia has taught that the indiscriminate granting of railway charters has retarded railway construction in this province. The opening up of the interior of the province by a railway running north and south will do more for its development than any other project, but the bona fide railway is discouraged at the outset by the builders of paper railways, who are always standing in the way until their particular charter is taken care of.

Once parliament grants a charter its holders are entitled to some protection and and reasonable time to finance their project. It is unfair to them to grant them certain privileges and then destroy their chances by granting charters to any one who applies for the same. Let us have a general railway act, which would rid the country of charter-mongering, or show some judgment in granting charters.

PREMIER MCBRIDE had an interview with Sir Thomas Shaughnessy in Montreal recently. Both the premier and Sir Thomas, or rather the company of which he is president, will stand considerable watching during the approaching session of the legislature. Doubtless the premier needs a strong friend at the next election and the C. P. R. are anxious to get a million or so acres of the public domain to which it is not entitled and another million dollars of public funds for the construction of a railway to parallel another road which is being built without public aid. The people, however, are more anxious to keep the lands and the money than they are to help McBride or the C. P. R.

FOR the first time in the history of Great Britain the prime minister has been assigned a place in official processions. For centuries he has been allowed to roam at will from the band in front to the boy leading the donkey in the rear. Now he is placed where he can tread gently on the skirts of the Archbishop of York. There is an old Scotch saying: "So long as grass grows or water runs there'll be guile in in the heart of a Campbell." It is possible his majesty had this in view when placing Sir Henry Campbell-Bannerman in a position where the majority of the court officials could keep their eyes on him.

THE resolution passed by the Greenwood Liberal association in reference to the pension system for ex-cabinet ministers, will meet with approval. While much can be said in favor of granting pensions to those who have faithfully served their country. The details of the legislation passed last session are objectionable in many ways. It is hoped that the government will carefully revise this legislation and will bring in such amendments as will remove these objections.

THERE is more mining done in the province today than at any other time in its history.

WANTED—Girl to do general housework. Address "F" Times office.

Mexican cut coins and filligree work, opals and linen drawn work. The O I C New and Second Hand Store. A. L. White.

Synopsis of Regulations Governing t s Disposal of Dominion Lands within t e Railway Belt in the Province British Columbia.

A LICENSE to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths excepting those situated West of Yale for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:—

Sawn lumber, 50 cents per thousand feet B. M.

Railway ties, eight and nine feet long, 1½ and 1¾ cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent on sales

A license is issued as soon as a berth is granted but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B. M., for square timber and sawlogs of any wood except oak; from ½ to 1½ cents per lineal foot for building logs; from 12½ to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties; and 50 cents per cord on shingle bolts.

Leases for grazing purposes sre issued for a term of twenty-one years at a rental of two cents per acre per annum,

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for agricultural purposes map be made personally at the local land office for the district in which the land to be taken is situated or if the homesteader desires, he may on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the District, within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is reduired to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence on and cultivation of the land in each year during the term of three years.

It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property, with buildings for their accommodation will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) or any person who is eligible to make a homesteod entry under the provisions Of the Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

In recent years the preparation of ground mica has bceome an industry in itself and several Canadian firms have gone into the business. Waste or scrap mica, the refuse of the cobbing sheds, is generally used, The difficulties of grinding are great, owing to the tough and scaly nature of the mineral. Mills which woak well on almost everything else fail utterly on mica. Recently there has been a return to the old burnstones. Most of the manufacturers keep their process a secret. Prices of ground mica range from 5 to 10 cents a pound, and the scrap mica for grinding is bought for $8 to $10 a ton. It must be free from rust or gangue, which would affect both the color and lustre of the product. The process of grinding as employed by the International Mica company is as follows: The mica is first roughly screened and then cleaned before entering the grinder, which is a sheet iron cylinder nine feet long by 30 in. in diameter, punched in rows and set at an incline of one inch and a half in its length. As the machine slowly revolves, loose pieces of steel, enclosed in the cylinder, pulverize the mica until fine enough to drop through the holes, which are three-sixteenths of an inch in diameter. It is then sized and graded in trommels from flakes down to the finest powder, the finest screens being of silk. The plant is operated by water power on the Gananoque river. The application of ground mica in the arts and for technical purposes is manifold, the principal markets being in England and Germany. A duty of 25 per cent. is imposed by the United States.

A great temple lined with gold, that shone as the sun, hidden away in a great unknown land, presumed to exist, not known to, was the sought for prize of many Spanish expeditions during the sixteenth century. Conjecture had it that this wonderful golden temple existed in the land of Dabaiba and this land included a goodly part of South America. No temple of the kind was ever found, yet expedition after expedition made vain search for the golden myth, penetrating into the then vast unknown central South American region and though not having been rewarded by gold yet they made known to the world the nature of the wilderness visited, thus the expeditions were not wholly fruitless. It was in search of this vast treasure that the world is indebted to for the word eldorado. The latter day version of the word is somewhat different from its original meaning. The Spaniards applied the word Eldorado to the far-off temple, which history told them was lined with purelgold and blazoned with emeralds and the word has been passed down, today referring to the extraordinary gold fields, not of districts where gold is extracted from ores, but peculiarly only of auriferous fields.

Rocking stones are known at many places. A number of them are the work of man; most of them, however, the work of nature. Those cut by man have been contrived by cutting out a mass of rock round the center point of the base of the block. Those by nature are usually granite rocks, in which porphyry and feldspar occur bountifully; these minerals being rapidly decomposed and the sand and dust swept away by the elements, what was originally a solid rock becomes a group of pillars of irregular shape, separated by horizontal and vertical fissures. gradually the edges of the block forming the pillar decay, and it assumes the appearance of two or more spheroidal rocks, one resting on the other, when the upper mass is so situated as to preserve the equilibrium. Notwithstanding the gradual wearing away of the base, a rocking stone is the result. Rocking stones are centers of interest, those of Great Britain being numerous, and several of which are artificial. The greatest of all rocking stones is that of Tandie, Argentina, which weighs 700 tons, yet is so poised that it rocks in the wind and a nut may be cracked if properly placed.

The use of a powerful fan is one of the most certain methods of insuring ventilation throughout a mine.

Scissors and Paste

More than ordinary interest attaches to the C. P. R. appropriations for the coming year. They are the heavieat ever ever asked for on the Pacific division. The fact that the company will definitely undertake doing away with the Big Hill at Field places a new interpretation on the company's policy, and indicates a determination place the main line in the best position of any line on the continent us regards grades. The twenty-mile lyop to be made at Field to give a oxe per cent. grade will undoubtedly be followed by the construction of the road round the Big Bend from Beavermouth to Revelstake, so as to give the company first-class grade through the mountains for freight traffic, while the present line over the mountains will be used mainly for tourist and passenger traffic. These improvements mean great things for British Columbia The opening of the Big Bend will add immensely to the Company's freight traffic, as the the mines in that region will be actively develyped, and lumber mills will spring up in the magnificent forests now locked up thsre from transportatiod. The prospects of Revelstoke were never brighter, and this city seems surely to be entering on an important stage in its commercial development and history.—Kootenay Mail.

On Monday last three men named George Gordon, said to be from Charlottetown, P. E. I., S. M. McPherson, said to be of Boston, Mass., and Chas. Andrews, were engaged in shooting stumps at Carlin & Doyle's logging camp on Sheep creek, beyond Fort Steele. It appears that they hae loaded up a hole and withdrew to a distance awaiting results. The shot hung fire for a considerable time, and they, thinking that all possible panger had passed, went up to investigate the matter, possibly witl. the intention of putting in another cartridge. As they approached the stump the charge exploded, killing Gordon and McPherson on the spot and severely injuring Andrews. The bodies of the poor fellows presented a horrible sight when brought over to Undertaker Beatty's parlors to await burial. Al. Doyle personally took Andrews over to St. Eugene hospital as fast as a pair af horses could make the trip. Andrews' condition is critical, but there is some hope for his recovery.—Cranbrook Herald.

Something new in mining in Kootenay will soon be begun by two prominent citizens of Nelson. They purpose to strike an extensive ore body which they believe exists beneath the bed of Moyie lake. On the east side is the St. Eugene mine with its large deposits of silver and lead; on the opposite shore is the Aurora, with ore almost identical in character except that in places it carries higher valves in zinc. The distance between is about 2,800 feet. The idea that the two mines are on the same lead is not a new one. But the courage and ability required to determine it have not been combined before. The territory preempted covers the whole width of the lake with a belt 1,500 feet wide. The bed of the lake has been explored and found to consist of a deep layer of gravel, covered by a deposit of fine clay and silt. Therefore the danger of water interfering with operations is not very great. Mining under water is no new thing. Some of the tin mines of Cornwall extend for miles under the bed of the ocean, silver and lead are mined under the bed of Lake Superior, and the bed of Nanaimo harbor is one vast coal mine. The plans ef Messrs. Black & Mackay involve the sinking of a shaft close to the boundary line between their property and the Lake Shore mine of the St. Eugene company. The sides of the shaft will be protected by cement until bedrock is reached. Then a tunnel will be driven under the bed of the lake until the lead is struck. The depth of Moyie lake in midchannel is about 200 feet, but towards both shores it is shallow, consequently a shaft of moderate depth it is thought will suffice.—Nelson News.

The Secret.

After a good deal of study and work we have at last figured out why so many country editors are rich. Here is the secret of success:

A child is born in the neighborhood the attending physician gets $50; the editor gives the loud-lunged youngster and the "happy" parents a send-off and gets $0. It is christened; the minister gets $10, and the editor gets $00. It grows up and marries, the editor publishes another long-winded flowing article, and tells a dozen lies about the beautiful and accomplished bride; the minister gets $10 and a piece of cake, and the editor gets $000. In the course of time it dies and the doctor gets from $25 to $1000, the minister gets perhaps another $15, the undertaker gets from $50 to $100, the editor publishes a notice of death and an obituary two columns long, a lot of poetry, lodge and society resolutions, and free card of thanks and gets $0000.

No wonder that so many country editors get rich,—Morehead Coaster.

Stage compression in air power plants depends for its effectiveness upon theefficiency of the cooling apparatus employed.

With the materials that are now manufactured from asbestos, it should be possible to construct absolutely fireproof buildings, even to the decorations usually made of wood and cloth.

In every important mine there should be at least one airway of large size in addition to the shaft, which should be maintained quite unobstructed from top to bottom af the workings, and should be kept for ventilating and traveling purposes onlp.

According to the usual arrangement of hoisting apparatus, the strain on the rope due to sudden stopping is enormous. It has been suggested that some means should be devised to overcome this danger from sudden stoppage, and one method proposed is to introduce some kind of yieldingness in the attachments or supports of the rope, which will come inte play when the pull in the rope is accidentally too great.

The quarter dollar silver piece in American coinage was first coined in 1796 and its weight was 104 grains. In 1853 it was reduced to 93 grains. There were no quarter dollars coined in the years 1798 to 1803 inclusive, 1808 to 1815 inclusive, and 1817, 1824, 1826 and 1830. It is legal tender to the sum of $10.

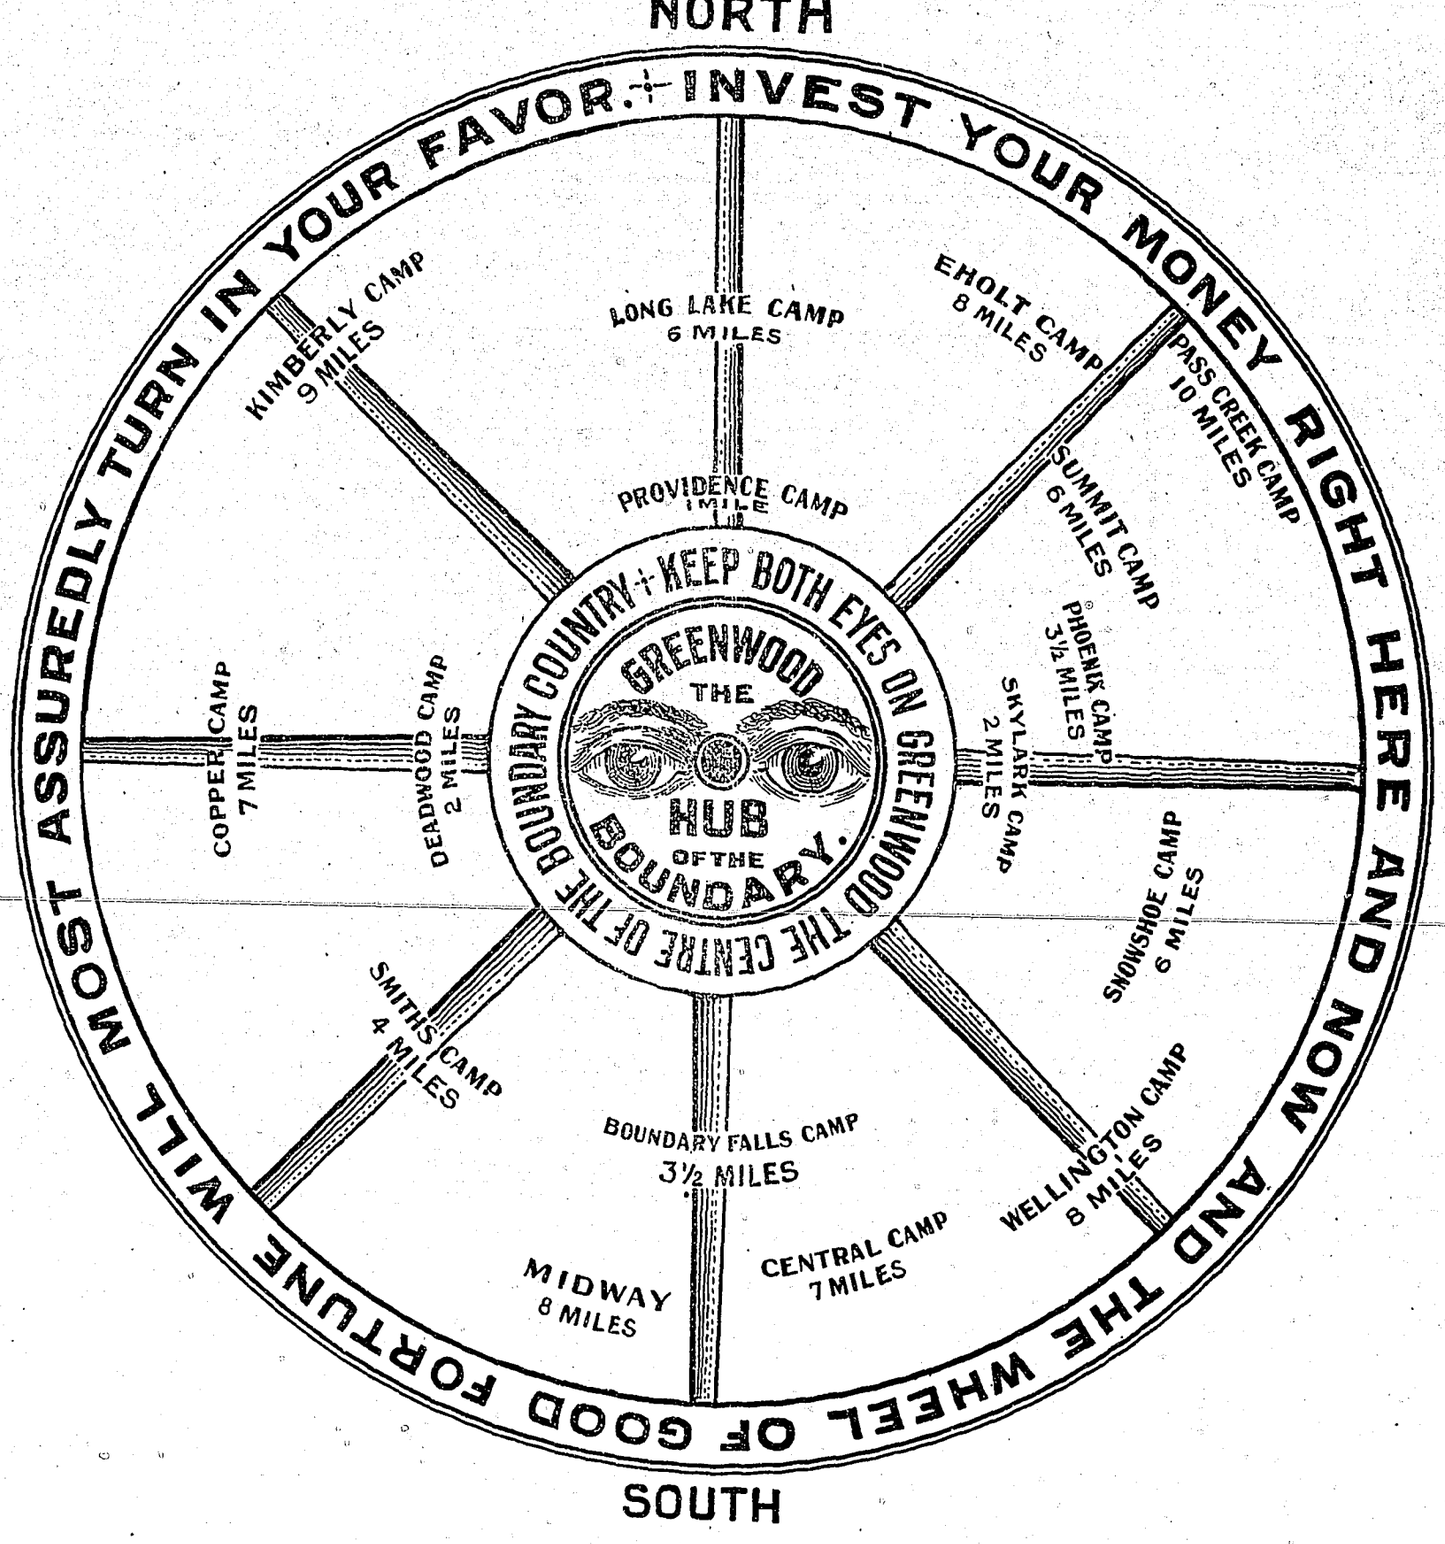
No Time Equal to the Present



Never in the history of the Boundary has the district had a brighter outlook than today. With the successful development of the immense large bodies of low grade ore and the enlarged and much improved facilities for treating at a very small cost, the continued opening up of new high grade properties and their successful and profitabl operation has made the Boundary famous as a mining centre, and every day adds more to the list of new finds and bigger values. It is readily admitted that Greenwood is the Eldorado of the Boundary with all roads leading thereto, and surrounded as it is, with such magnificent resources is destined in a few years to be a second Butte. If you therefore want to participate in its future prosperity, now is the time to invest both in mines and real estate. For NINETY DAYS we intend giving you a chance to make a safe and profitable investment. Every lot we own will be put on sale at rock bottom prices during the above period. Prices ranging from $50.00 up, at terms to suit the purchaser. Make your selection and make it early.

PASSED UP BONANZA

Bob Jacobs Tells What F. J. Finucane Missed.

Francis J. Finucane, capitalist of Spokane, had a narrow escape from being a quarter owner in one of the 17 properties that comprise the famous Cobalt mining district in the Temiskaming section in northern Ontario.

In 1904 he was offered one of the four shares in the Jacobs property for $500. The letter containing the offer did not reach Mr. Finucane for some weeks, and was pigeonholed. This year the mine shipped 320 tons of ore to Newark, N. J., the gross receipts of which aggregated $200,000. Another carload will be delivered to the smelter this month, bringing the year's output up to $250,000 gross.

Robert I. Jacobs, manager of the Jacobs cobalt mine, is in the city. He formerly resided in the Boundary district of British Columbia and is here to attend the Oppenheimer-Fischer nuptials.

The seventeen mines comprising the Cobalt district, said Mr. Jacobs yesterday, are now producing on a basis of five to six million dollars annually. The camp is practically only a year old, and the deepest level yet attained is 100 feet. The ore occurs in true vertical fissures from one to five inches in width. Average values are enormous. On our property the ore averages about $2,000 a ton.

The characteristic ore of the Jaoobs property carries 4,000 ounces of silver, 2 per cent. nickel, for which the smelter formerly allowed a small amount, but since cut off: 6 per cent cobalt, for which we received 65 cents a pound, and as high as 70 per cent arsenic. the allowance for which has been ½ cent a pound.

Mr. Jacobs has a number of fine cobalt samples with him. He is not personally interested in the ownership of the property under his management. a brother in Montreal being the principal owner.—Spokesman-Review.

Pegmatite is a coarsely crystalline granite, composed of lamellar feldspar and quartz and often with white mica.

12-14 Post Office Inspector.

Boundary's Largest Power Printing Establishment

MR. CUSTOMER:

It is contrary to the laws of nature to disregard the beautiful works of the Creator. It is also contrary to the laws of building up your own city to send East for your printing when it can be procured as quickly, as cheaply, and, in many instances, better, in your own town. Consider this matter carefully, and in placing your next order give the people who spend their money in your city a chance.

MR. SUBSCRIBER:

We trust that you will not overlook the litile circular sent you last week. It is a small matter to you, but a large one to us. If you have not attended to it yet, do so today. This week we have added nearly Five Hundred Dollars worth of material to our office, and to pay for it we must have what is coming to us on our Subscription List,

TOWN TOPICS

W. Hoffstetter, one of the old-timers, is visiting in the city.

Mrs. E. A. Anderson is visiting relatives in Spokane.

Remember the K. of P. ball on the evening of January 1st. It will be the best of the season.

Polmatier Sisters in the Auditorium Friday evening, 22nd inst., under the aussices of the Masonic lodge.

F. W. Brown, who is organizer for the Independent Order of Foresters in the State of Washington, was a guest of his brother, J. R. Brown, M. P. P., last week.

The business places are beginning to put on holiday airs, the churches are preparing for their Christmas trees and the saloons are commencing to mix Tom and Jerrys.

The regular meeting of the K. of P. holiday week will be held on Thursday evening, 28th, instead of Wednesday, 27th, they having "exchanged pulpits" with the Masons to allow the latter to hold their installation on St. John's day.

A meeting was held in the city hall Monday evening to devise ways and means by which the Citizens' band could be continued. There was not a very large turnout. A. D. Hallett, the bandmaster, stated that the boys were not asking for financial support, but if work could be obtained in the nearby mines for fifteen musicians it would increase the number to 34 or 35 pieces, making the band one of the best in the province. No definite action was taken at the meeting, it being decided to hold another meeting after the Christmas holidays.

The curling rink was opened Tuesday evening, and now the man who doesn't wear a "Tam" is not considered of much account.

A curling match was played Wednesday between the aldermen, skipped by Duncan Ross, and the city officials, skipped by A. D. Hallet, which resulted in a win of 14 to 4 in favore of the city officials.

The Polmatier Sisters, who will play in the Auditorium on the 22nd inst. under the auspices of the Masonic lodge, are well spoken of by eastern papers. Says the Winnipeg Free Press: "The Elks have a reputation for doing things well, but last night's entertainment was away ahead of anything else they have ever done. The first part of the programme was sustained by the Polmatier Sisters, a quintette of charming young ladies of the highest musical talent, assisted by Mr. C. W. Hitchcock, whose dramatic recitals and impersonations were a thing to be remembered."

Superintendent Thomas of the Dominion Copper company's smelter is taking things a little more easily this week. Since blowing in about two weeks ago, he gave the plant his constant supervision. On account of its lying idle so long there were many matters to be attended to. Everything is now running shipshape and the one furnace is averaging 350 tons a day. The matte is sent to the B. C. Copper company's bessemerizing plant and already five carloads of matte have been shipped. In all probability the present smelter will be enlarged and will be kept in service for at least two years. This will give the company ample time to thoroughly develop its mining properties.

P. Welch arrived in Midway Sunday evening, after an absence of over a month. He has been busy starting work on the new railway being built conjointly by the Great Northern and Northern Pacific from Kennewick to Portland, Ore. This work has been somewhat delayed on account of all the surveys not having been completed. Mr. Larson's serious illness called Mr. Welch east, but fortunately he is now fully recovered. During his absence Foreman Kellett succeeded in getting the Similkameen work well under way. Mr. Welch's firm has the contract from the international boundary line to Keremeos. This work is not envied from a contractor's point of view. Along the banks of the Similkameen the greater part of the material is broken rock and hardpan. However, the firm has on the ground the best adapted plant for work of this nature. The greater portion of the plant was used by J. W. Stewart in the big irrigation ditch near Calgary and includes powerful steam shovels and heavy wagons, specially constructed to handle large quantities of loose material. The hauling of this heavy plant from Midway to the Similkameen was no small undertaking. As little snow falls in the Similkameen, this work will be vigorously prosecuted all winter.
