## Equipage For Spring and Summer

No doubt you are anxious to procure serviceable and fashionable attire. We are rather particular what we wear ourselves, and have therefore been careful in the selection of our customers' goods.

### NEW WAISTS

White summer waists in silk and lawn; latest sleeves and cuffs. Handsomely trimmed with pleating, insertion, etc. Selections from two of the leading manufacturers.

### FANCY DRESS GOODS

Pretty effects in fancy organdies and muslins; cotton, linen and silk voiles; Pongee silk, with lace and insertion to match.

### FANCY COLLARS AND BELTS

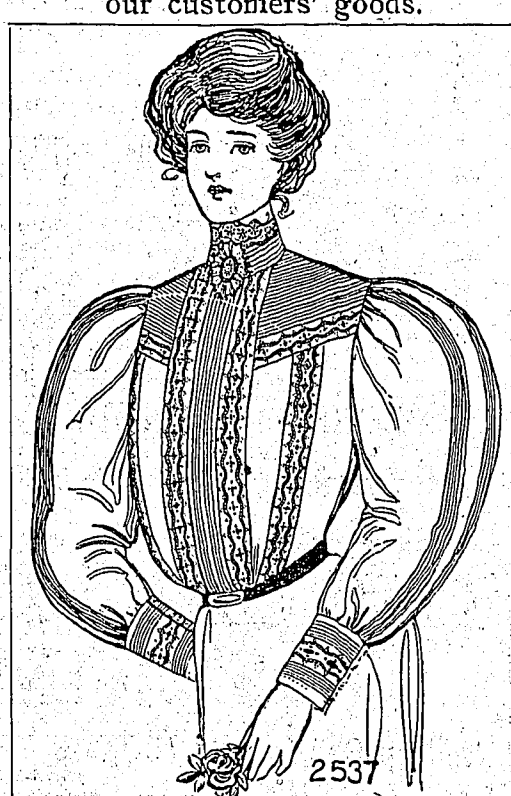

The latest thing in collar and cuff sets, girdles, crush leather and silk belts. See the new shades and cut steel buckles.

### ALLEN'S WHITEWEAR

Good values and handsome patterns in night gowns, corset covers, chemise and drawers. Children's dresses in white wash silk and fine lawn.

### Carpets, Curtains, Etc.

A new line of wool, tapestry and Brussels carpets, just to hand. Also art squares, in tapestry, wool and hemp. Complete stock of oil cloth, linoleum, matting, window shades, lace curtains, curtain nets and figured muslins.

### LADIES' SHOES

BELL'S Fine Footwear is well known. For style, fit, finish, it has no equal. The new styles include a chocolate, Gibson tie, Blucher cut; very fashionable.

The 'PORTIA' walking shoes and oxfords in patent and vici kid. Sure to please at \$4.00 and \$4.50.

### MEN'S SHOES

McCREADY'S—The patent Bluchers are taking the lead as dress shoes. New lines of tan and patent oxfords.

BELL'S—The best values in shoes for all occasions. Prices within the reach of all.

OTHER LINES—Among our specials in smeltermen's and miners' shoes is the 'T.D.' Blucher \$3.00—Congress \$2.00. Excellent value.

### SCHOOL SHOES

A complete assortment of vici and calf Bluchers, Little Gents' and other shoes for boys, and lace shoes and sandals for girls. The largest stock of children's shoes ever carried.

HEADQUARTERS FOR EVERYTHING

## The Russell-Law-Caulfield Co. LIMITED.

If you are looking for an **AMERICAN SHOE** we have a swell line in Patent Colt, \$6 and \$6.50; Genuine Kangaroo, \$6; Vici Kid, \$4.50 and \$5; Velour Calf, \$4.50; Box Calf, \$5.50.

We also carry a full range of Slater's Invictus shoes.

Our spring samples from the Crown Tailoring Co. are very complete and at Eastern Prices, from \$12 to \$28.00.

## ANOTHER HIGH GRADE

Rich Strike on the Prince Henry in Skylark Camp.

An important strike was made during the week on the Prince Henry, a claim in the high-grade belt on the north side of the Phoenix wagon road, directly opposite the E. P. U. tramway. At a depth of 15 feet a vein of high grade ore was encountered about four inches wide, which has every sign of permanency and which has since considerably increased in width. The ore is of the same character as that contained in the majority of the mines in the belt, and carries high values in both gold and silver. The strike is of much importance, showing as it does the continuity of the veins and the almost absolute assurance of rich mineral in all the claims on the hill. The Times extends to Dr. Spankie and his associates in the bond on the property its most hearty congratulations.

The shaft is being sunk at an angle of roughly 60 degrees dip to the east. A porphyry dyke cuts the vein at the south of the shaft, and the ore body shows up remarkably strong in the north side, in which direction the drift will most probably be run as soon as sufficient depth has been attained. Actual work for ten days only had been done when the ore was struck. Engineer Jeffry is overseeing the development work.

The Winnipeg Free Press is publishing extracts from their paper "Twenty years ago" and among other items the other day inserted this ad: Three hundred volunteers are wanted for active service in the Northwest. Parties wishing to join Col. Thomas Scott's battalion may apply to the undersigned today at the Donaldson Block, 341 Main street. Signed Stewart Mulvey, D. H. McMillan, John McBeth.

This number is at present occupied by the Atlas Assurance Co., and the officials were much puzzled when man after man came in during the day in reply to the ad and asked to be taken on the battalion. The mystery remained unsolved until one of the staff happened to read the "Twenty years ago" column and there saw the ad.

W. G. Gaunce, who has up to date sent the correspondence from here appearing in the Spokesman-Review and the Nelson Daily News, has most courteously retired from both positions in favor of Arthur Wheeler, so that there may not be any clashing in reports sent out from this camp. Will persons having news items worth sending out kindly note the change and let Mr. Wheeler know of such at this office.

## AT THE EMMA MINE WILL BUILD ROAD

Development Work Now Being Done.

Great Northern Will Build This Summer.

## LARGE VEIN OF GOOD ORE

MAIN LINE TO SIMILKAMEEN

Shaft Down 115 Feet—Electric Power Will Be Used.

Another Rich Section Becomes Tributary to U. S. Business Men.

Mr. and Mrs. Frederic Keffer, Mr. Ellis Lovejoy and a Times reporter visited the Emma mine, one of the properties owned by the B. C. Copper Co., one day last week. Mr. Lovejoy is a mining engineer from Columbus, Ohio, and had been in the Loomis country, state of Washington, inspecting some properties in that section; on his way through he spent some time in this camp and looked into the methods adopted by the companies operating the immense low-grade copper lodes, particularly the Mother Lode.

When told last summer, by a lady visitor to his home, of the system followed, Mr. Lovejoy was very sceptical, but he left thoroughly convinced that that he had been correctly informed. Such visits are calculated to do this country an immense amount of good, as reports from experienced mining men are better advertising than can be secured in any other way. The late visit of M. M. Johnson, M. E., who was here in February last to report to the Guggenheim Exploration syndicate on the Boundary mines, more particularly those operated by the Montreal and Boston Consolidated, has caused comment from all the leading papers on the continent and will doubtless be the means of directing the attention of the mining world more than ever to this section of the province.

The Emma is situated on the Eholt-Phoenix branch of the C. P. R., and on the Great Northern branch to Phoenix. In fact both branches go through the property, as does also the C. P. R. spur to the B. C. mine. The property was secured by the B. C. Copper Co. on account of the particularly fine fluxing quality of the ore, which carries a large excess of iron over silica, and is therefore of great value to smelters treating such ores as are found in Rossland, and treated at Nelson, Trail and Northport. It occasionally happens that the ore is needed by the Greenwood smelter when the Mother Lode ore is more than ordinarily refractory.

The vein on the Emma is about thirty-five feet wide and the walls are very distinctly defined. Up to date the property has been worked entirely from the surface by glory-holing, but a dyke having been encountered right across the vein, the company is now sinking a shaft in the dyke at an angle of 60 degrees towards the ore body, with the idea of drifting under the vein and hereafter taking all the ore up the shaft. At the time of going to press the depth attained is about 115 feet and the ore body had not yet been struck, although there was every indication of its proximity, and some ore was being sent up from the bottom.

From plans made it is not expected that the ore body will be encountered until the shaft has been sunk to 130 feet depth. The probabilities are that by the end of next week the shaft will be down to the required depth and that the drifting on the vein will be started.

Two shifts of men are working and the power is obtained from the air compressor on the Oro Donoro. The shaft is single-compartment, with man-hole, and is a distinct credit to the superintendent, Mr. Morrison. It is timbered throughout and struck the writer as being a particularly fine piece of work.

Power for the new work will be obtained from the new line promised by the Kootenay Power Co.

The Very Best Remedy for Bowe Troubles—No Family Can Afford To Be Without It.

"I regard Chamberlain's Colic, Cholera and Diarrhoea Remedy as one of the very best remedies for bowel troubles," says Mr. J. W. Hanlon, editor of the Despatch, Ocilla, Georgia. "I make this statement after having used the medicine in my family for several years. I am never without it." No family can afford to be without a bottle of this remedy in the house. It is certain to be needed sooner or later. For sale by All Druggists.

In the latest number of the Hedley Gazette an article appears from which it is gathered that the Great Northern Railway company has decided to build into the Similkameen from a point on their main line near Wenatchee. While no one can reasonably blame the Great Northern it is a deathblow, if true, to this section. It was hoped by almost all that the company would build from Midway west and give Greenwood connection. Such it now appears is not the intention. The following is the conclusion of the article in question:

"The consensus of opinion among those who claim to be 'in the know' is that the road is coming in from Wenatchee and the section from Midway to the lower end of the Similkameen is abandoned for the present at least."

"How British Columbians in the Boundary and the Coast will like this remains to be seen. To them it may seem death to Canadian interests to have an American railway boring into the heart of British Columbia's plum pie, but to the trail trapper of the Similkameen

"Death is King and Vivat Rex. Tread a measure on the stones." "There are some who claim that Pat Welch now has the contract to build from Loomis to Princeton, and that this portion is to be graded first, the supplies for same to be toted in."

"What the C. P. R. will do in the matter nobody knows, and the Similkameen has quit caring. If Vancouverites don't like the present outlook of the Great Northern running in from Wenatchee and quitting this side of Hope mountain instead of building from Midway and going on to the coast they can have it out with their coast representatives at Ottawa. If these men had supported V. V. & E. legislation at Ottawa in 1894, or even in the early part of the present session work would have probably been undertaken."

If anything further were required to show the utter folly of the government's do-nothing policy, surely it is abundantly evident from the foregoing. Whereas Similkameen might have been opened to business men here and from the coast had Premier McBride introduced any kind of a programme, which he was assured again and again by J. A. Macdonald, the opposition leader, would receive the support of members on the opposition benches, this wonderfully rich section of country would be opened for business from B. C. points. As it is now the Americans get the trade.

A most amusing dispatch from the Victoria correspondent of the Nelson Daily Tribune appeared in a recent issue of that paper. The item was headed "Is up against it. McBride's railway policy turned down. Can't muster majority. Moribund government may ask for a dissolution and make appeal to people." The dispatch in full follows:

Everything in the way of railway legislation has been given a year's hoist, as the members of the government cannot agree on a policy. If there is any railway construction this summer, it will be without financial aid from the province. The Joy-McBride government no longer controls a majority of the house on any railway policy it can bring down, and the lieutenant-governor's speech from the throne amounts to no more than so much dish water.

It is rumored that McBride will ask for a dissolution, immediately the house adjourns, and go to the country on a railway policy framed in the interest of the Grand Trunk Pacific and connecting lines, like John Hendry's projected road from North Vancouver to Fort George. In order to carry Victoria and the Island, the Grand Trunk Pacific will purchase the Esquimalt & Nanaimo and its land grant.

P. Helstab, an old-timer in the Boundary, but now a resident of Hedley City, is visiting old-time friends here and at Midway.

## A DISAPPOINTING SESSION

For the benefit of those of our readers who do not receive the coast papers we reproduce in full the leading article from last Saturday's Victoria Colonist entitled "A disappointing session," wherein that paper expresses its entire disapproval of the famous McBride policy of do nothing. Conservatives in this district are, almost to a man, bitterly outspoken regarding the failure of the famous quartette, Fraser (Grand Forks), Shatford (Similkameen), Macgowan, Vancouver, and Grant of Comox, to stand by their pre-election pledges and obtain railway legislation even at the expense of the defeat of the McBride government. Coast opposition papers all tell of their "open revolt" on Saturday last and their subsequent "falling into line" and acquiescence in the now famous government railway policy. The Colonist's flop is a very high tribute to the constant stand taken by the brilliant leader of the opposition, Mr. J. A. Macdonald. The article referred to follows:

"It is the general expectation that with today's sitting, the 1905 session of the Provincial Legislature will terminate with an unusual suddenness, and with results and accomplishments in the form of legislation added to the statute book that will not by any means approximate the expectations of the country at the opening of Parliament. It had been hoped that a clean-cut and progressive policy would be enunciated and developed, the natural working out of which would be a stimulus given to industry in its varied branches, the encouragement of popu-

lation, and an impetus to legitimate provincial growth. With all the world looking to Western Canada, the occasion seemed ripe for accomplishments. But the dying days of the session find few of the roseate hopes destined to realization. The promised railway policy has ended in barren debating, behind the closed doors of the caucus, of the various proposals advanced by those companies which sought co-operation of the government in the carrying out of their construction projects. The Assessment Act has, it is true, been amended in a measure to correct some of the manifest injustices demonstrated in its working during the last recess; and the finance minister has been able to show an economical conduct of the general routine of business of the province, and in his estimates to indicate a consistent disposition on the part of the administration to curtail expenditure in every possible manner. This, however, does not meet the demands of a province aiming to be progressive, and whose natural resources and opportunities, with wise legislative assistance, assuredly destine it for greatness. Instead of assisting natural progress born of individual enterprise, the legislation added to the statute book during the present session has, indeed, a recognized tendency in a contrary direction, as for example in the bill of the member for Nanaimo city further limiting the employment of underground workers in the collieries out of which it is greatly feared there must come suspension on this island of one of its most important industries. In consenting to the passage of this measure, as in reluctance to present a straight-cut railway programme, the government of the day will be condemned by many of independent minds in politics for fatal devotion to the shibboleth of expediency. It were infinitely better, these critics will contend, to go down to defeat upon the issue of a tangible policy for the betterment of provincial conditions, than to live by grace of acquiescence in ill-considered and even distinctly harmful and dangerous laws. The session ends with the government of Hon. Mr. McBride still in the saddle, but its results have weakened instead of strengthening the ministry in the eyes of the people. The electorate will recognize and accentuate the undeniable fact that it is highly dangerous for any government to seek to carry on with so variable and insufficient a majority as to make recourse to the support of a party, divergent from its own; a first necessity of existence in power. Hon. Mr. McBride and his ministry it appears to many would have better proven their recognition of their duties to British Columbia had they set their political course and held to it even in the face of defeat through devotion to a decisive and consistent Conservative policy recognizing and based upon the conditions and necessities of the province as it is today."

## Chamberlain's Colic, Cholera and Diarrhoea Remedy.

The great success of this preparation in the relief and cure of bowel complaints has brought it into almost universal use. It never fails, and when reduced with water and sweetened is pleasant to take. It is equally valuable for children and adults. For sale by all druggists.

## NOTICE OF FORFEITURE.

TO J. P. WELLS or to any person or persons to whom he may have transferred his interest in the Asiro fractional mineral claim situated in the Greenwood Mining Division of Yale District.

YOU are hereby notified that I have expended the sum of \$300.00 (one hundred dollars) for assessment work on above mentioned claims, such being required and necessary to hold the same for the year ending 29th Dec. 1904, under the provisions of the Mineral Act and Amending Acts, and if at the expiration of ninety days from the date of the first publication of this notice in the "Boundary Creek Times" you fail or refuse to contribute your portion of such expenditure namely \$25.00 due by you J. P. Wells, together with all costs of advertising, your interests in said mineral claim shall become vested in me (your co-owner) upon filing in the proper office in that behalf the affidavit required by section 4 of the "Mineral Act Amendment Act 1900."

Dated this 24th day of February, 1905.

S. H. STINGLEY.

## Corporation of The City of Greenwood

## BYLAW NO. 105.

A BY-LAW TO RAISE BY WAY OF DEBENTURES THE SUM OF \$15,000 FOR THE PURPOSE OF EXTENDING THE WATERWORKS SYSTEM OF THE CITY OF GREENWOOD.

WHEREAS it is necessary and expedient to extend the waterworks system of the City of Greenwood and for that purpose to borrow by way of debentures the sum of \$15,000;

AND WHEREAS a petition signed by the owners of at least one tenth of the value of real property in the City of Greenwood, as shown by the last revised assessment roll, has been presented to the Municipal Council requesting them to introduce said bylaw;

AND WHEREAS for the payment of said debentures, sinking fund and interest it will be necessary to raise the sum of \$1,440.00 by special rate in each and every year;

WHEREAS the whole rateable lands and improvements or real property of the said Municipality according to the last revised assessment roll is \$1,124,525.00 and

WHEREAS the existing debt of the municipality amounts to \$75,950.00, and no principal or interest is in arrears;

Therefore the Municipal Council of the City of Greenwood enacts as follows:

1. It shall be lawful for the Corporation of the City of Greenwood to raise by way of loan from any person or persons, body or bodies, Corporation or Corporations, who may be willing to advance the same on the credit of the debentures hereinafter mentioned the sum of \$15,000 and cause the same to be paid into the hands of the City Treasurer of the said City of Greenwood, for the purpose aforesaid, and with the object hereinbefore recited.

2. It shall be lawful for the Mayor to cause any number of debentures to be made, not exceeding in the whole the sum of \$15,000 in sums of not less than \$100 each, as may be required, and all such debentures shall be sealed with the seal of the Corporation of the City of Greenwood, signed by the Mayor, and countersigned by the Treasurer of the said City.

3. The said debentures shall be payable in twenty years from the day herein mentioned for this bylaw to take effect at such bank in the City of Greenwood as the Council may by resolution direct.

4. The said debentures shall have coupons attached for the payment of interest at the rate of six (6) per centum per annum on the amount of said debentures and shall be made payable yearly on the 4th day of May in each and every year.

5. A special rate on the dollar shall be levied and raised in each and every year, in addition to all other rates, on all the rateable property of the City, sufficient to pay interest, and create a sinking fund for the payment of the debt hereby created at and when the same shall become due.

6. The sum of \$900 shall be raised annually for the payment of interest on the amount of the debt incurred during the currency of the debentures hereby incurred, by way of sinking fund.

7. It shall be lawful for the Corporation from time to time to purchase any of the said debentures at such prices as may be mutually agreed upon, and all debentures so purchased shall be cancelled, and no reissue of any debentures or debenture shall be made in consequence of any such purchase.

8. This Bylaw shall before the final passing thereof receive the assent of the electors of the Corporation in manner prescribed by the Municipal Clauses Act and Amending Acts.

9. This Bylaw may be cited as the Waterworks Loan Bylaw, 1905.

10. This Bylaw shall take effect and come into force on the 4th day of May, 1905.

TAKE NOTICE that the above is a true copy of the proposed by-law upon which the vote of the municipality will be taken at the City Hall on Thursday the twentieth day of April, 1905, between the hours of eight a. m. and four p. m.

G. B. TAYLOR,  
Clerk of the Municipal Council.  
Dated April 7th, 1905.

Corporation of The City of Greenwood

NOTICE is hereby given that the assessment roll for 1905, has been returned, and can be inspected by any person having an interest therein until the sitting of the Court of Revision. The first sitting of the Court of Revision on the said assessment roll will be held in the City Hall, Greenwood City, on Monday, the 29th day of May, 1905, at ten o'clock a. m. Any person desiring to make complaint against his or her assessment must give notice in writing to the Assessor, stating the ground of his or her complaint, at least 10 days before the said date.

VICTORIA, B. C.

# REPORT OF THE DIRECTORS OF THE BANK OF BRITISH NORTH AMERICA

Presented to the Proprietors at their Sixty-Ninth  
Yearly General Meeting.

The annual general meeting of the proprietors of the Bank of British North America was held on Tuesday, March 7th, at the office of the corporation, No. 5 Gracechurch Street, London, Mr. E. A. Hoare, presiding. The Secretary (Mr. A. G. Wallis) having read the notice and the auditors' report.

The Chairman said: Before making any reference to the balance-sheet which is in your hands to-day, I must say a few words respecting one paragraph in the report issued with the balance-sheet of June 30th last. We then said: "The sum of £4,180 has been set aside out of the profits of the half-year to meet the depreciation in the bank's investment in Dominion of Canada bonds, which will hereafter stand in the books at 97." Having been obliged in December, 1903, to set aside out of profits the sum of £2,000 to provide for depreciation in our Consols, we felt that it was rather hard that this further appropriation in respect of our Canada bonds should be necessary, but you no doubt understood perfectly well that it was rendered necessary by market fluctuations alone, and that, as the quotations on the Stock Exchange had fallen, it was necessary for us to write down our investment to that level, although we are well aware that on its merits a Dominion of Canada bond is worth more to-day than ever it has been before. It is satisfactory to be able to add that a recovery in values has already taken place, and that our investment is now again worth par. I will now pass on, and make some observations on the balance-sheet to December 31st, 1904. Deposits and current accounts compared with December 1903, show an increase of £311,000; 77 per cent. of this increase is in the savings bank department, which is daily growing in favor in Canada. Bills payable and other liabilities show a decrease of £620,000. This decrease consists almost entirely in the bills payable, which are £550,000 less than at this time last year. This reduction does not signify any diminution of the bank's business generally, but it is the reflection of a long period of inactivity in New York, to which I shall have to refer again when I speak of our profits. Notes in circulation show an increase of £32,000 compared with this time last year. But here I must explain that the figures at December 31st do not represent in this or in any year the highest point of our circulation. It is in the months of October and November, when the harvest is being moved, that the circulation reaches its maximum, and by December 31st the ebb-tide has begun and made some progress.

**ADDITION TO RESERVE FUND.**  
By an addition of £20,000 to our reserve fund the total is raised to £420,000. I would remind you that the whole of this sum has been saved out of profits, while the reserves of many of our friendly rivals have been largely augmented by the premiums obtained from the issue of new capital. On the other side of the account, cash and specie are £67,000 less than this time last year, but cash at call and short notice is £125,000 larger, so that the total under these two headings shows an increase of £57,000. The cash and specie is 37 per cent. of our immediate liabilities, while the two items together amount to 35 per cent. of our total liabilities to the public. Investments, so far as regards our British Government stocks, show no change, while our Dominion of Canada bonds, as already explained, now stand at 97 instead of 100. Other securities, at £133,000, show a decrease of £14,000. In Canada, as in the United Kingdom, the values of all high-class securities continued low during the half-year, but a strict revaluation of these securities shows that they stand in our books at less than actual values. Bills receivable, loans on security and other accounts show a decrease of £323,000 compared with this time last year; but I have nothing special to say respecting these figures, which are not due to any other cause than the ordinary fluctuations of our business.

**NEW BANK PREMISES.**  
Bank premises show an increase of £21,000 during the year. Our actual expenditure has been £31,000, but, as you have seen, we have taken from the profits of the half-year the sum of £10,000 in reduction of this account. At December 31st, 1901, our premises account stood £120,000; so that in these three years we have spent £70,000. Had it been possible, we should gladly have avoided this large increase in the account, but I have no hesitation in saying that we had no choice if we were to retain our position in Canada. The bulk of the money has been spent in Winnipeg, and although

I am myself responsible for urging upon my colleagues the necessity of a proper banking house in that city, I am going to add that it has been well spent. The site, which we purchased in October, 1902, is one of the best in the business part of the city, and it is worth a great deal more to-day than it was then. The building which we have erected upon it is not only well adapted to all our banking requirements, but is also an ornamental to the city, which is rapidly increasing in importance, population and wealth, and if we had been influenced chiefly by motives of economy in this matter we should have made a great mistake. At Toronto we have carried out extensive internal alterations, whereby we not only secure a first-class banking accommodation, but also earn a considerable rental. At Ottawa our building was right enough, but the situation was wrong, and it was necessary to make a change or to be forgotten, so we made the change, and this was the next heaviest item. Then we had to build a manager's residence at Winnipeg, where the demand for houses is so great that it is almost impossible for a married officer to obtain accommodation, even at an exorbitant rental. At Rosthern until quite lately we conducted our business in a little wooden shanty, of which I had a photograph taken when I was there in 1903. If you will come and look at a print of that photograph after the meeting you will thoroughly appreciate that it was not a leaning to extravagance which led us to purchase a modest brick building, where we might conduct our business in safety. The bank at Victoria has been practically rebuilt, and, although I have not seen it, I believe it is now a thoroughly modernized and suitable building. There has been other expenditure at other branches, but nothing of importance. I have spoken at some length on this point, so that you may thoroughly understand our reasons for the present transfer of £10,000, and for further transfers which will have to be made in the future—not because there is not ample value, and more than ample value, in property, but because we do not wish to see this account remaining at so high a point.

**PROFITS FOR YEAR 1904.**  
Finally, I may point out that our profits this year, after making ample provision for all accounts which we consider to be in the least doubtful amount to £96,000, exclusive of those sums which you so generously allow us to appropriate for the benefit of the staff, compared with £83,000 in 1903. We regard this as particularly satisfactory, because, as I have already stated, the year 1904 was one of inactivity in New York. As you are aware, we employ a large part of our resources at call and short notice in New York, and during 1901 the average rate for call money did not exceed 1 1/2 per cent., and for time money, 3 per cent. Such were the general conditions of the money market in New York, over which we have no control, and the result was that the contribution of profit from that office was largely reduced. That need not trouble you at all, for these conditions will not be

permanent, and a return to greater activity will certainly be seen, although I am not going to venture to predict the date. In the meantime, we consider that it is eminently satisfactory under such circumstances to see a substantial increase of £13,000 in the total profits of the year, compared with those of 1903.

**INDUSTRIAL CONDITIONS.**  
In general business, the year 1904 was not without its vicissitudes. The winter 1903-4 was of exceptional severity, so that traffic by road and railway was only carried on under great difficulties and expense. This interfered with the shipment of produce and the distribution of merchandise, and also had a serious effect upon agriculture in Eastern Canada. The lumber industry did not enjoy so much prosperity as during recent years, chiefly owing to a diminished demand from the United Kingdom, which was only partly compensated for by the steady consumption of the United States. The dairy industry, which is of such growing importance in the East, realized considerably less money for the producers than in 1903, and had it not been for the good harvest in the West, we should probably have seen a partial set-back in the growing prosperity of the Dominion.

**THE WHEAT CROP.**  
Naturally, the progress of the crops in Manitoba and the Northwest Territories was watched by all in Canada and in the United Kingdom with anxiety for the success or otherwise of the harvest in that great country is no longer a question of merely local interest. In certain parts of the country the crops were damaged by rust, and in consequence of this the grade of wheat was not so high as the hopes of the farmers had led them to expect. The crop was, however, bountiful, being estimated at sixty million bushels; while the inferiority in quality was more than made up by the higher price obtained, and it is estimated that the wheat alone will realize forty million dollars. The influx of settlers consequently continues, many still coming into the country from across the boundary, and bringing with them not only capital but valuable experience. New lands are being constantly taken up, while farmers already on the ground have been adding to their holdings. This is, perhaps a weak spot at the present time, for, encouraged by the success of past seasons, and seeing the price of land steadily advancing in value, no doubt many have been tempted to make larger purchases than their capital justifies. That the price of land should advance under the influence of a constant stream of settlers is only natural; but there is reason to fear that the speculator has also contributed to this movement, and this is much to be regretted, for speculation of that sort actually retards the progress of the country. It is also noticeable that the number of commercial failures in Manitoba and the Northwest Territories has increased, although the total of such liabilities has not increased in like proportion. It is difficult for us who remain at home, or perhaps pay an occasional visit to the West to realize the amount of self-restraint that is necessary in these western communities, if business is to be kept on a safe basis, the necessities of the country are so immense, the genuine opportunities for extension are so frequent, and the very climate is so conducive to a sanguine temperament. But we are convinced that the true development of the country in the future is dependent upon the prudence of those who have the power of granting or withholding credit, and we fully recognize our own share of this responsibility.

**THE U. S. "DRAWBACK."**  
No reference to the Northwest would be complete without some mention of the new departure by the Government of the United States, with reference to the importation of wheat from

Canada. Hitherto wheat has been subject to a duty of 25 per cent. There has been no alteration in the law, but there is in existence a law by which the United States Treasury may permit a "drawback" of 99 per cent. of the duty paid on raw materials used in manufacturing articles intended for export only. In future, wheat is to be included amongst such raw materials. I do not intend to wander on to the debatable ground of fiscal questions, but this action by the United States Treasury may have effects not at present contemplated. To the wheat grower in the West it must surely be beneficial, inasmuch as he will find a new market open to him where the price of his produce is, as a rule, higher than that to which he has been accustomed. Those who may wish to pursue this interesting subject further should refer to the Commercial Supplement of the Times of February 6th and 20th, or to the Canadian Gazette of February 9th. Since the harvest of the wheat has been unusually favorable for farming operations, and I have seen it stated that the land already under plough for next season is 500,000 acres in excess of that at this time last year, and that a reasonable estimate of the land under wheat in 1905 is 4 1/2 million acres.

**MINING INDUSTRIES.**  
Passing on westwards, the mining industries of British Columbia have shown considerable activity during 1904, and a rough estimate compiled by the Provincial Government values the mineral output at \$19,775,000. This shows an increase of more than \$2,000,000 over the production of 1902 and 1903, but just falls short of 1901, when the output reached \$20,000,000. This increased production has not, however, been accompanied by any better results for the shareholders in either the Canadian companies or those established in the United Kingdom, and in all alike, profits, where existing at all, have been meagre in the extreme. Efforts are now being made by influential persons in Canada and the United Kingdom, representing some of the principal companies in the Rossland Camp, to bring about an amalgamation of interests, and should these efforts meet with success there should be brighter days ere long. In the Yukon, on the other hand, the output of gold showed further diminution, barely reaching \$10,000,000 in 1904, compared with \$11,000,000 in the preceding year. The population of Dawson is also considerably less than it was a year ago; but this is by no means surprising, for in placer mining camps as the auriferous ground is worked out the miners move on to more attractive fields of labor; and so it has been in this case, the exodus to the goldfields of Tanana and Fairbanks having been on a large scale. Apart from fresh discoveries that may be made, either of alluvial or quartz, the future of the camp appears to depend chiefly upon an adequate water supply, and I understand that efforts are being made towards the attainment of this object. Whatever may be the output for the future, it is interesting to look back on the results of the camp, since it first came prominently into notice seven years ago, for during this period the value of gold recovered has certainly not been less than \$20,000,000. These figures must surely entitle it to rank amongst the wealthiest placer mining camps in the world. On the Pacific Coast the canning industry met with poor results, the catch being small. Last autumn the general manager visited England by invitation of the court, as there were matters which we desired to discuss with him personally. His visit was most valuable; we availed ourselves of the opportunity of frequent consultations with him, which we trust may be productive of good in the future. A vote of thanks to the Directors, General Manager and Staff was unanimously passed.

## THE BANK OF BRITISH NORTH AMERICA

Dr. Balance Sheet for the Half-Year Ending 31st December, 1904.		Cr.	
To Capital	20,000 shares of £50 each, fully paid.	\$4,866,666.66	
To Reserve Fund		2,044,000.00	
To Deposits and Current Accounts		17,887,704.44	
To Notes in Circulation		3,017,007.30

## No Time Equal to the Present

Never in the history of the Boundary has the district had a brighter outlook than today. With the successful development of the immense large bodies of low grade ore and the enlarged and much improved facilities for treating at a very small cost, the continued opening up of new high grade properties and their successful and profitable operation has made the Boundary famous as a mining centre, and every day adds more to the list of new finds and bigger values. It is readily admitted that Greenwood is the Eldorado of the Boundary with all roads leading thereto, and surrounded as it is, with such magnificent resources is destined in a few years to be a second Butte. If you therefore want to participate in its future prosperity, now is the time to invest both in mines and real estate. For NINETY DAYS we intend giving you a chance to make a safe and profitable investment. Every lot we own will be put on sale at rock bottom prices during the above period. Prices ranging from \$50.00 up, at terms to suit the purchaser. Make your selection and make it early.

## RALPH SMAILES,

AGENT FOR THE GREENWOOD TOWNSITE COMPANY.

Synopsis of Regulations Governing the Disposal of Dominion Lands within the Railway Belt in the Province of British Columbia.

A LICENSE to cut timber can be acquired only at public competition. A rental of \$5 per square mile is charged for all timber berths excepting those situated West of Yale for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:—  
Sawn lumber, 50 cents per thousand feet B.M.

Railway ties, eight and nine feet long, 1½ and 1¼ cents each.  
Shingle bolts, 25 cents a cord.

All other products, 5 per cent on sales.

A license is issued so soon as a berth is granted but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.

The dues payable under a permit are \$1.50 per thousand feet B. M., for square timber and sawlogs of any wood except oak; from ½ to 1½ cents cents per lineal foot for building logs; from 12½ to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for rail-

way ties; and 50 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of twenty-one years at a rental of two cents per acre per annum.

Coal lands may be purchased at \$10 per acre for soft coal and \$20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for agricultural purposes may be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the District, within which the land is situated, receive authority for some one to make entry for him.

A fee of \$10 is charged for a homestead entry.

A settler who has received an entry for a homestead, is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property

with buildings for their accommodation, will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) of any person who is eligible to make a homestead entry under the provisions of the Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the Act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY,  
Deputy of the Minister of the Interior,  
Ottawa, February 4th, 1905.

## A Safe Cough Remedy for Children.

In buying a cough medicine for children never be afraid to buy Chamberlain's Cough Remedy. There is no danger from it and relief is always sure to follow. It is especially valuable for colds, croup and whooping cough. For sale by all druggists.

## NOTICE OF FORFEITURE.

To John Nelson, J. A. Munson and H. Magnuson or to any person or persons to whom they may have transferred their interest in the Morning Glory and Rainstorm Mineral Claims situated on Cedar Creek, main Kettle River, in the Greenwood Mining Division of Yale District.

You are hereby notified that we have expended the sum of \$400 for work on the above mentioned claims and \$10 for recording the same for assessment work for two years, such being required and necessary to hold said claims for the years ending the 6th of June, 1903 and 1904, under the provisions of the Mineral Act and Amending Acts and if at the expiration of ninety days from the date of first publication of this notice in the Boundary Creek Times, you fail or refuse to contribute your portion of such expenditure together with all costs of advertising, your interest in said mineral claims shall become invested in us, your co-owners, upon filing in the proper office in that behalf the affidavit required by section 4 of the "Mineral Act Amending Act, 1900."

Dated 3rd March, 1905.  
CHARLES E. JOHNSON,  
JOHN BERGMAN.

of the city.

# Mining News of the Boundary.

Two cars of ore were shipped from the Last Chance this week.

Harry Shallenberger has engaged men to do some development work on the D. A. claim.

At the last federal elections the total number of votes cast is officially declared to be 1,030,186. This includes the Yukon. The vote in the previous general election in 1900 was 952,496.

The owner of the Bonnie Belle, situate on the road to the Mother Lode mine, reports having struck three feet of very fine ore on his claim. On the Highland Queen, also situate on the West side, good ore has been found.

W. T. Hunter and associates in the Seattle bond have decided to install a boiler and use a steam drill in the development work. The machinery was hauled from Greenwood on Thursday by two four horse teams provided by C. J. McArthur.

The Odd Fellows of Boundary Valley Lodge will attend the evening service at the English church April 30th, leaving the hall at 6:45 in regalia, accompanied by the Greenwood band. It is hoped all members of the order in the district will be present.

Work on the tunnel of the Strathmore mine is being steadily prosecuted. The tunnel is now 245 feet and it is estimated that 40 feet more work is required before the first ore body will be struck at an approximate depth of 175 feet. Two shifts are working, and good progress is being made daily in spite of the hardness of the rock through which the tunnel is being driven. When it is finished the Strathmore will be in a position to ship ore.

An important deal in mining property was completed on Saturday last by Gaunce & Wickwire, mining brokers of this city. The property referred to is the Bank of England, a claim in Phoenix camp, situate between the Monarch, on which the Granby company have started extensive surface work, and the Rawhide, which, as stated elsewhere in this issue, the Montreal and Boston intend to thoroughly develop. The deal is a cash purchase option, \$10,000 payable on 1st July next. The purchase was made in the name of W. S. Macey, but it is reported that the Granby company are the power behind the throne. The same firm have also bonded the Black Bear fraction and the Toboggan, both in the same vicinity.

A bond has recently been taken by employees of the Granby Consolidated on the Mavis, a claim directly south of the Skylark and adjoining the Bay. The bonding syndicate has put two men to work on the claim, and on Wednesday evening last received word that they had found two very promising leads running across the property, seventy-five feet apart, one of which is fully two feet in width. Only one assay has been made of samples taken from the outcrop, which gave value of one and a half ounces gold. One of the members of the syndicate informed The Times that active work would be immediately commenced on the claim, which, as can be gathered from the foregoing, gives every evidence of being a very rich one. While these claims are being operated by Phoenix parties, they are exclusively Greenwood district propositions and will undoubtedly do much to advertise this camp as a very rich and profitable one to operate in.

A group of claims, which are in fair way to soon become constant and large shippers, is the Republic, situate some two and a half miles down the valley on the west side of the C.P.R. The work at present being done is on the None Such, where a tunnel has been run on the vein for a distance of over 400 feet and which is now in splendid looking ore carrying good values in silver, lead and gold. It is the intention of W. H. Smith, who is president and manager of the company owning the group, to continue this tunnel to meet the shaft on the Last Chance, which will have to be deepened to about 400 feet to make the connection. The tunnel when finished will be about 2,500 feet long and by the time that the connection is made it is estimated that there will be over 30,000 tons of ore in sight. There is another tunnel in existence 75 feet lower than the present workings and which will be connected with them by a raise through which all the ore will be taken out of the mine. The mine is in a position to ship lots of ore at present, but Mr. Smith has decided, and very wisely, to push development work and block out the ore before doing any extensive shipping. The probabilities are that the company will put in a concentrator of about 100 tons a day capacity, and concentrate all the ore before shipping. Several cars shipped last fall gave values of about \$23 a ton.

A cable dispatch to the Mail and Empire dated April 2nd says that the Simplon tunnel, the longest in the world, was put into commission today, when from the Swiss and Italian sides

the first trains passed through, meeting at the centre, where there was the iron door which originally prevented the overflow of a torrent of hot water, and which was today opened for the first time. The weather at the entrance to the tunnel was springlike, though the surrounding mountains were covered with snow; but once inside, the temperature became very high. Engineer Brandon, who had directed the work on the tunnel, conducted the Italian train, which part of the way was lighted by miners with lanterns.

The train from the Italian side was the first to reach the iron door, but a little later the train from the Swiss end was heard on the other side of the door. There was a brief time spent in communicating through the door by means of hammering, and finally the door was knocked down amidst frantic applause and cries of "Long live Switzerland," and "Long live Italy," bands played the Italian Royal March and the Swiss Anthem, and the two parties embraced and kissed each other. Engineer Brandau shook hands with Engineer Rosemund, the director of the work on the Swiss side, and the Italian Bishop Noveran embraced the Swiss Bishop Sion. The latter then preached a short sermon, saying that "the Church blesses progress." In the name of God, he blessed the tunnel.

## THE WEST FORK

It is our intention to shortly issue a number of The Times especially devoted to the mines and mining claims of the West Fork of the Kettle river, a section directly tributary to Greenwood and from the active development of which the local business men have much to gain. We have arranged to send a man on the ground who will give an extensive write up and description of the whole country and we shall issue a large number of copies for outside circulation. If possible to obtain the photographs and the necessary support the number will be illustrated and we trust that we shall have the co-operation of the merchants and citizens generally in this most important work. Synopses of the result of the trip to be undertaken by our representative will be mailed to all the leading newspapers and will undoubtedly do much to advertise Greenwood to the outside world.

We bespeak for our representative the hearty support of the business men in the canvass which it will be necessary to undertake before the number can be published.

## About Rheumatism.

There are few diseases that inflict more torture than rheumatism and there is probably no disease for which such a varied and useless lot of remedies have been suggested. To say that it can be cured is, therefore, a bold statement to make, but Chamberlain's Pain Balm, which enjoys an extensive sale, has met with great success in the treatment of this disease. One application of Pain Balm will relieve the pain, and hundreds of sufferers have testified to permanent cures by its use. Why suffer when Pain Balm affords such quick relief and costs but a trifle? For sale by all druggists.

## COLUMBIA COLLEGE.

Founded 1892 Incorporated 1893  
NEW WESTMINSTER, B. C.

Provides a Christian home for students of both sexes at Modern rates. Has a preparatory class for junior students, doing grade public school work. Does high school work, confers all high school privileges, and prepares for teachers' examinations. Teaches all branches of a practical business course and gives diplomas. Gives a liberal education in its collegiate course and in the ladies' college course for M.E.L. and M.L.A. in university work. Can take students through the complete arts course and the degree of B.A. can be obtained from Toronto University with which the college is in full affiliation.

For full information and terms write

Rev. W. J. Sipperell, B.A., B.D., principal; or Rev. J. P. Howell, bursar.

## Chamberlain's Cough Remedy the Best and Most Popular.

"Mothers buy it for croupy children, railroad men buy it for severe coughs and elderly people buy it for la grippe," say Moore Bros., Eldon, Iowa. "We sell more of Chamberlain's Cough Remedy than any other kind. It seems to have taken the lead over several other good brands." There is no question but this medicine is the best that can be procured for coughs and colds, whether it be a child or an adult that is afflicted. It always cures and cures quickly. Sold by All Druggists.

## Horse for Sale for Keep.

Left in charge of the undersigned by Alfred Swinburne, November 1st, 1903, one pinto horse, not branded. Will be sold to pay charges for keep after thirty days from date. Charges \$2.00 per month.

## ANOTHER FURNACE

Will Be Added to Boundary  
Falls Smelter

## INSTALL CONVERTER PLANT

In the Near Future and Capacity More  
Than Doubled.

A representative of the Times visited the Boundary Falls smelter on Saturday last and was courteously received by Manager Pemberton who authorized the statements following.

Mr. Pemberton said that it was the intention of his company to install as soon as possible a converter plant sufficiently large to handle twice as much matte per day as was now being produced. At present and for some time back the matte produced by the Montreal & Boston company has been converted in the shells of the B. C. Copper company. The present contract with the B. C. Copper Co. shortly expires and Mr. Pemberton thinks that by that time his plant will be ready for business.

The furnace which has been on the ground for some time will be put up and still another has been ordered, these when blown in will give the Boundary Falls smelter a capacity of from 1,200 to 1,500 tons of ore per day. The company's mines are fully capable of an output large enough to keep the smelter going full blast.

Mr. Pemberton said that his company had been in the market for power for some time and there now seemed a reasonable possibility of the Kootenay Power Co. putting in a line this summer from Bonnington Falls. During Mr. Campbell's last visit to this section he virtually agreed to furnish a line. Providing this agreement is carried out a compressor plant will be put on the Rawhide mine and that property extensively developed.

At present the company's mines are furnishing between 670 and 700 tons of ore a day and for some time the weekly output has exceeded the 4,000 tons per week mark.

Asked as to whether he had really bonded the Seattle claim on the north fork of the Kettle river in conjunction with Mr. W. T. Hanter, Mr. Pemberton said most emphatically that he had not, and that as far as he knew Mr. Hunter was operating the claim himself.

The question of flux has been the

subject of very careful and patient experiment. Mr. Pemberton says that they can now manage entirely with the ores of their own mines, which when properly assorted form splendid self-fluxing furnace charges.

## TOWN TOPICS

Born—At Anaconda on 2nd April, to Mr. and Mrs. A. G. Bjorn, a son.

Wanted—Furniture and cook stoves. H. J. Clint, Copper street.

The Citizens' band intend holding a concert in the Auditorium on May 1st.

When that band stand is forthcoming, the band promises weekly concerts in the evening.

The pastor will conduct both services in the Methodist church Sunday next. In the evening the sermon will be for young men.

Thoroughbred Brown Leghorn eggs (winter layers), \$1.00 per setting. Fresh milk cows for sale. Stooke Bros., Midway, B. C.

On Monday evening the Epworth League will give a programme in the Methodist church that will be all American. A pleasant evening may be expected. All are welcome.

K. M. Stephen, for a number of years bookkeeper for the Hunter-Kendrick Co., leaves today for Grimsby, Ontario. His many friends in Greenwood wish him prosperity in the East.

The baseball season opened Sunday with a match between Phoenix and Greenwood, resulting in a win for the home team. Phoenix had the best of the game until the ninth inning, when Law and Fleming's excellent rooting turned the scales. J. J. Strutzel of Phoenix played an excellent game both on and off the diamond. Phoenix is very weak on umpires. Score 11-10 in favor of Greenwood.

Charles Oliver, one of Greenwood's old-timers who has been visiting his parents in Cornwall, England, for the past three months, returned on Tuesday last. Mr. Oliver reports immigration to the Northwest territories exceptionally heavy at present, an average of 28 cars a day leaving St. Paul. The immigrants are mostly from Kansas, Oklahoma and Nebraska.

George Mackenzie and G. O. Guise left Wednesday morning for Hazelton. They went by way of Osoyoos, the Similkameen and Cariboo road, taking with them a band of 50 horses. The trip will take nearly two months. Mr. Guise will return to Westbridge after disposing of the stock, while George will go 400 miles further north to where his partners have been trapping during the winter.

The best and most exciting match yet played in the bowling alley was between the Ontario and Maritime provinces boys—locally known as the Musheaters and Fisheaters. The oatmealers won by five points. The teams were: Oatmeal—Glengary, A. Nicholson; Grey, W. Connell; Muskoka, E. B. Dill; Perth, Geo. Firdley; Bruce, E. W. Bishop. Fish—Kings, J. Feeney; St. John, K. C. B. Frith; Halifax, J. P. Myers-Grey; Queens, S. Crouse; Victoria, J. Drum.

The ladies of the Presbyterian church held their sale of work Thursday afternoon and evening. The booths were tastefully arranged, particularly that devoted to the sale of Ladies' Home Journal pictures and the solicitation of subscriptions, to that paper and the other Curtis' publication—The Saturday Evening Post. Judging from the attendance the affair was evidently a financial success—it certainly was socially. Refreshments were served both afternoon and evening and a good musical programme rendered in the evening. Despite very disagreeable weather the attendance was large.

H. C. Kerman, sheriff of Grand Forks, was a visitor to the city during the past week. Asked as to what the syndicate which has acquired the Cora-Canadian intends doing, Mr. Kerman said that some interesting developments would be made public in a short time.

If the bylaw now before the citizens for ratification receives the requisite number of votes to enable the corporation to utilize the new source of supply, Greenwood will be one of the best-equipped cities in B. C. for adequate fire protection. It will then be up to the merchants and property owners to apply for and receive, it is hoped, a general reduction in fire insurance rates.

The Canadian Pacific Railway company has a large gang of men at work laying a pipe line east of Eholt. It is anticipated that this, together with the regular dependable source of supply, will provide sufficient water for all engines on the Columbia and Western, without, as was the case last winter, having to depend on the generosity of the civic water systems along the road. The shortage of water last winter in this city was more often due to the needs of the C. P. R. than to the actual consumption of the citizens.

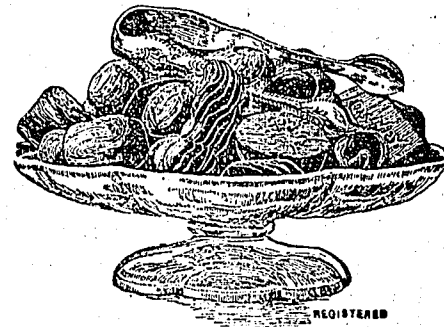

A meek-looking gray horse, one of the animals used to haul a delivery wagon by the Hunter-Kendrick Co., got the spring fever on Wednesday afternoon and, finding his halter rope broken, started on a prospecting tour. He sprinted up Copper street, then with his helm hard a starboard careered bravely up the hill past George & Co's, shedding a sack of wheat en route. Finding the harness and wagon slightly hampering the freedom of his movements, Mr. Gray calmly smashed his harness and one of the shafts of the vehicle and finished his course alone. Subsequently he was seen tied to the ring in front of his owners' store, looking as meek as ever and as though he was not in the least to blame for his temporary aberration.

Up to date the people of the coast have taken but very little interest in Greenwood mining propositions; it is good news, therefore, to hear that recent dispatches sent from this city by visiting and local newspaper men have created much comment, especially in the capital and Vancouver. From both of these centers inquiries have been received this week, in response to which full and complete details as to the outlook have been sent. It would be a matter of congratulation if some of the good things could be secured by some of the coast capitalists, instead of so many of them going to United States operators, much as the latter have done and are doing for the development of this country.

The guarantee fund provided by several mine owners and business men of the city has been made payable, unanimously to Arthur Wheeler, until last week the special staff correspondent of the Victoria Daily Times. Mr. Wheeler will make it his business to keep the outside world posted on the doings of the mines directly tributary to Greenwood and would esteem it a favor if persons interested in mining properties here would take the trouble to keep him posted as to the transfer of their holdings, development work, etc. It is his intention to personally visit all the mines and claims as soon as possible. Mr. Wheeler states that he intends moving his family here as soon as he can and becoming a resident of Greenwood. Mr. Wheeler is a good musician and will doubtless prove an acquisition to the ranks of local vocalists.

For Sale—First-class piano, less than half price. For particulars apply to Wm. Fleming.

Wanted—To borrow \$400 on good security, for one or two years. Apply at this office.
