Malachite, Green, Ox-blood Red, Brillant Black, Dead Black, Natural, Ground, Gloss White, Flat White, Empire Blue.

THE MONTREAL AND BOSTON

SLIGHTLY DIVERGENT OPINIONS EXPRESSED BY GENERAL MANAGER, AND LARGE SHAREHOLDER.

—BY—

W. T. SMITH

Shareholder in the Dominion Copper Company.

"It is the same old story of the directors sending out a manager with no practical experience in mining or smelting. H. T. Pemberton is not, in my opinion, a qualified man. I don't believe he ever saw the inside of a copper smelter before he took charge of the plant at Boundary Falls. This gross incompetency has resulted in a direct loss of THOUSANDS OF DOLLARS in copper matte."

—BY—

H. T. PEMBERTON

General Manager Montreal and Boston Con.

"The charge made by W. T. Smith about slag losses is a MALICIOUS FALSEHOOD, which may be proven by examination of the company's monthly statements on fyle at New York and open to inspection by any shareholder of my company * * * * I cannot too strongly refute the allegations made by Mr. Smith which will be proven on examination to be without foundation."

WATCH? RIGHT?

If your watch shows any irregularity or gives other evidence that something is wrong with it, better have it examined by a competent watchmaker. You won't find any more skillful or more experienced anywhere than right here. We clean and repair all sorts of watches thoroughly and quickly, and guarantee our work as well as our prices.

* * *

If your watch chain is beginning to show signs of wear, or if you'd like a new chain for any reason, we are prepared to supply you with the best gold filled ever made at a moderate price. We carry the Simmons' make, the best known and most strongly guaranteed chains ever sold.

Millinery Ladies Ready-to-Wear Hats all at Special Prices.

RENDELL & CO

W. T. Smith, a heavy shareholder in the Dominion Copper Company, and one of the best known mining operators in the Boundary district, asserts that the primary motive leading to the recent close-down of all operations by the Montreal & Boston Consolidated is due to gross incompetency on the part of the management. The charge is a serious one, but the maker claims to have substantial proofs, which he has already laid before his fellow shareholders in the Dominion Copper Company. Mr. Smith also charges the Consolidated with non-accounting for ores, and claims that the shareholders of the Dominion Copper Company are entitled to the distribution of fully $100,000 which should have been paid over by the Montreal & Boston Consolidated.

General Manager H. T. Pemberton has issued a statement assigning the sudden cessation of operations to telegraphic instructions from the head office at New York, which ordered the closing down of the mines and "blowing out" of the smelter, pending the reorganization of the company. It is also stated that the controlling interest in the Consolidated will pass into the hands of a strong group of Eastern copper operators. Meanwhile intense interest is being manifested in Boundary mining circles as to the final outcome.

Mr. Smith characterizes the close down as being entirely unwarranted. To a representative of the Boundary Creek Times he said: "Nearly a year ago the Dominion Copper Company entered into an agreement with the Montreal & Boston Consolidated for the sale of all its properties in Phoenix camp for $480,000, being on a basis of fifteen cents per share, on 3,200,000 shares of stock. Under the terms of the bond the purchasing company was to pay $12,000 per month, and two dollars per ton on all ore shipped from the Phoenix mines to the company's smelter. Settlement for this ore to be made every thirty days and the proceeds applied on the bond. So far only $96,000 has been paid on the bond, and no settlement made for some 50,000 tons of ore shipped during the past ninety days. In other words the Dominton shareholders are entitled to the distribution of at least $100,000. James Breen, who owns one million shares is now in the east demanding for the local shareholders, an accounting of the ore treated. He is the heaviest individual shareholder.

"Regarding the re-organization scheme I believe it is for the express purpose of paying off the bond of the Dominion Copper Company, as I notice by the eastern financial press that the directors of the Consolidated propose issuing $700,000 of six per cent mortgage bonds. This cannot be carried out until we are paid up, and they obtain legal title to the mines."

Reverting to the serious charge of incompetency in the smelting department he continued: "It is the same old story of the directors sending out a manager with no practical experience in mining or smelting. H. T. Pemberton is not, in my opinion, a qualified man. I don't believe he ever saw the inside of a copper smelter before he took charge of the plant at Boundary Falls. This gross incompetency has resulted in a direct loss of thousands of dollars in copper matte, which even the veriest novice could ascertain for himself by an examination of the slag dump.

"I have no fault to find with the management of the mines. Under superintendent Geo. H. Collins they have been placed in a splendid position for continuous shipment. The close-down was inevitable through the causes I have stated, and in my opinion is a serious setback to mining in the Boundary."

The Dominion Copper Company owns the Brooklyn, Stemwinder, Rawhide, Standard, Montezuma, and Idaho copper claims in the Phoenix camp. For practically the past ten months the first three named mines have been shipping to the Boundary Falls smelter. The principal shareholders in the company are James Breen and E. J. Roberts of Spokane; Mayor George Rumberger of Phoenix, W. T. Smith of this city and Messrs. McKenzie, Mann & Cox, the millionaire railway syndicate of Toronto, Ont. It is reported that the Toronto capitalists agreed to subscribe to $300,000 of bonds in the re-organized corporation.

The Montreal & Boston Consolidated, was promoted by Messrs. Munroe & Munroe, whose creditors now hold their interest. The company owns the smelter at Boundary Falls and the Sunset mine in Deadwood camp. Of recent date it acquired the Morrison mine in the same camp and the Athelstan in Wellington camp. The close-down affects fully 250 employees in the mines and smelter, who have been paid off. The pumps in the Phoenix mines have not been drawn out, which is significant and the general belief is that after the experts have made a full examination of both the mines andsmelter the new plan of reorganization with ample capital for

(Continued on page two.)

MONTREAL AND BOSTON

(Continued from Page 1.)

working expenses will be successfully carried out.

General manager H. T. Pemberton authorized the following statement regarding the charges made by Mr. Smith:

"The charges made by W. T. Smith about slag losses is a malicious falsehood which may be proven by an examination of the company's monthly statement on fyle at New York and open to the inspection of any shareholder of my company. Mr. Smith has seen fit to bring me personally into this matter but his motive is beyond conjecture. The issues he mentions regarding non-payment for ores smelted are a matter for settlement between the directors of the two companys and have no bearing upon the local management.

"Instructions were received from New York to close down pending the re-organization, and for this reason only were operations suspended. I cannot too strongly refute the allegations made by Smith which will be proven on examination to be without foundation."

MONTREAL & BOSTON

Details of Reorganization—Entire Chauge of Management.

Montreal advices received early in the week contained particulars of the re-organization scheme af follows:

The new Dominion Copper Co., will have 2,600,000 shares of stock par $1, any $700,000 bonds, in lieu of the old capitalization of 1,200,000 shares, par $5 00.

Of the 2,600,000 shares of new stock, 1,000,000 shares go to the stockholders, 1,400,000 go as a bonus with the $70,000 bonds, and 200,000 shares go for reorganization expenses and as a bonus to Munroe & Munroe creditors. As these creditors hold 310,000 shares of stock, they secure 1 1-2 shares of new stock for each share of old.

The bond issue of $700,000 is all underwritten, Mckenzie & Mann the original owners of the Dominion Copper Co., having underwritten $300,000 of the new bonds. They will be offered to stockholders at 90. Underwriters get them at 10 per cent less.

The new company will start off with its properties fully paid for, and about $250,000 cash in the treasury.

Smelting operations have been ordered suspended while the smelter capacity is being increased from two to four furnaces, which will give it a capacity of 1000 tons per day. The property will have an entire change of management.

THE PROVIDENCE CO.

Meeting of Directors Held Yesterday at Which Some New Ideas Were Introduced.

The meeting of the directors of the Providence Mining company was the most harmonious yet held, all the business transacted being practically unanimously carried by the board.

W. T. Hunter was elected secretary of the company, in place of H. V. Fuller, resigned.

It was decided to sell 2,000 shares of treasury stock, Mark F. Madden being the broker appointed to dispose of them. Stockholders will have first chance to purchase. Twenty days were allowed in which to make application. The sale of this stock will provide funds for contemplated additions to the machinery of the mine. It is probable a dividend will be declared in the near future.

It was decided to fight the Diamond litigation to a "finish."

An offer was made by local shareholders to either buy outside holdings or sell their stock to the controlling interests. This proposition was declined by the board, it is said, on the ground that better results could be obtained by having local parties interested who could notify the board in Chicago of incompetency or mismanagement.

Active development will be carried on at the mine in future.

Angus Cameron left yesterday for East Kootenay to look after the coal and oil interests of a local syndicate.

ROSSLAND FATALTIES

Two Meet Death and Three Are Injured.

ROSSLAND, May 24.—Two men killed and three wounded is the list of casualties in the Rossland mines during the past 24 hours.

The first fatality occurred about midnight last night, when Hugh Bennett, a young miner, employed in the Josie, was coming on shift. By some unknown means he slipped from the lander and fell into timber chute a distance of 50 feet. He died while he was being taken to the surface. There were no external injuries and the physicians said the cause of death was a ruptured blood vessel.

At 1 o'clock today, Levi Handeback. a shoveller in the Le Roi, had the roof cave in on him where he was working on the 700-foot level. His left leg was so badly shattered that it had to be amputated above the knee.

At 4.30 this afternoon on the 1050-foot level of the Le Roi, Steve Welsh was picking behing the machine when the sharp point of the implement struck a stick of dynamite that had not exploded when the previous round of holes had been fired. The dynamite exploded under the impact of the implement and the result was that Welsh was instantly killed, his body being mangled badly.

John Shimgneski, a machine man, who was near by, was hurled a considerable distance by the explosion, and his leg broken, while Alex. McFarland, another machine man, who was a little further away, was severely cut about the head and face.

LICENCE TO AN EXTRA-PROVINCIAL COMPANY.

"COMPANIES' ACT, 1897."

CANADA:
PROVINCE OF BRITISH COLUMBIA.
No. 259.

HIS IS TO CERTIFY that "The Montreal and Boston Consolidated Mining and Smelting Company, Limited," is authorized and licensed to carry on business within the Province of British Columbia, and to carry out or effect all or any of the objects of the company, to which the legislative authority of the Legislature of British Columbia extends.

The head office of the company is situate at Toronto, in the Province of Ontario.

The amount of the capital of the company is seven million five hundred thousand dollars, divided into one million five hundred thousand shares of five dollars each.

The head office of the company in this Province is situate at Greenwood, and Arthur Murdoch Whiteside, Barrister-at-law, whose address is Greenwood, is the attorney for the company.

Given under my hand and seal of office at Victoria, Province of British Columbia, this 2nd day of May, one thousand nine hundred and five.

[L.S.] S. Y. WOOTTON,
Registrar of Joint Stock Companies.

The following are the objects for which the company has been established:—

To carry on the business of mining and smelting, and also to manufacture and deal in iron, stone, manganese. coal, coke, copper, oil and other minerals, timber and lumber, and to manufacture and deal in the products thereof and, the manufactured articles in which such products are utilized, and also to construct, maintain and operate buildings, machinery, engines, cars, docks, bridges, elevators, canals and other waterways and other works; to apply for purchase, lease or otherwise acquire patents and patent rights, trade marks, improvements, inventions and processes, and to exercise, develop and grant licenses with respect thereto; and (b) for the said purposes:

1. To acquire by purchase, lease or otherwise, and upon such terms and conditions as may be agreed upon, real and personal property and estates, and interests therein, including quarries, mines, wells, water powers, lakes, ponds, streams and watercourses:

2. To acquire by lease, purchase or otherwise, and upon such terms and conditions as may be agreed on, rights, powers, concessions, privileges and franchises, to enable the company properly to exercise and carry on all or any of the rights, powers, concessions, privileges, franchises and objects of the company:

3. To acquire by purchase, subscription or otherwise, and to hold and dispose of stocks, bonds or any other obligations of any corporation formed for, or then or theretofore engaged in or pursuing any one or more of the kinds of business purposes, objects or operations above, mentioned, or owning or holding any property of any kind hereinbefore described, or of any corporation owning or holding the stocks or obligations of any such corporation:

4. To enter into any arrangement for sharing profits, union of interests or co-partnership with any person or company carrying on, or about to carry on, any business or transaction which may be of benefit to the company hereby incorporated:

5. To hold for investment or otherwise to use, sell or dispose of, and to guarantee any stock bonds or other obligations of any other corporation:

6. To aid in any manner any corporation whose stocks, bonds or other obligations are held or are in any way guaranted by the company, and while owner of any such stocks, bonds or other obligations to exercise all the rights, powers and privileges of ownership thereof, and to exercise any and all voting power thereon:

7. To acquire and carry on all or any part of the works, property, franchises, and to undertake any liabilities of any person, firm, association or company engaged in or pursuing any one or more of the kinds of business, purposes, objects or operations above indicated, or possessed of property suitable for the business purposes of the company hereby incorporated, and as the consideration for the same to pay cash or to issue any shares, stock, debentures, bonds or obligations of the company hereby incorporated:

8. To sell, assign, transfer and convey to any persons or corporations having power to acquire the same, and on such terms and conditions and for such considerations as may be agreed on all, or from time to time, any of the works undertaking, real and personal properties, rights, powers, concessions and privileges of the company:

9. To do all acts and exercise all powers, and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on all or any of its undertakings. 36-39.

AGRICULTURE AND HORTICULTURE

By Percy Godenrath.

A run through the Boundary district at this season cannot fail to impress on the mind that an era of cultivation has at last really set in, and that particular attention is being directed to the possibilities of fruit culture and mixed farming. Throughout the numerous arable valleys, or along the sunny slopes of mountain sides, one notes evidences of cultivation, and what is better—scores of new homes. It is two years since the writer last visited the "Boundless Boundary," and no better indications of its growth and prosperity are to be found—aside from its mining—than the fact that fruit growing and mixed farming is here being profitably engaged in. It means much for its uprowth, adding a stable and permanent population of thrifty tillers of the soil, who, working hand in hand with the toilers in the mines and smelters, create conditions that many another section of our great province might well envy.

Keeping pace with the horticultural industry of Grand Forks, whose Riverside nursery is one of the most interesting sights of the Gateway City, is ever adding to his stock and planting additional acreage, to meet not only the increasing wants of a splendid home market, but to supply the demand of the Kootenays. Chatting with him the other day he outlined to me the progress of Canadian horticulture during the last quarter of a century, which has been of so marvellous a character, that, to anyone not conversant with the statistics, the actual status of this important industry would be a matter of unbounded astonishment. Let me say here that the editor of The Times invited me to contribute something to this week's issue, and though nominally The Times represents a mining community, I purpose taking a new trend, and pointing out the possibilities of the Boundary to those looking for locations, particularly with a view to engaging in fruit raising. To come back, then, to my interview with Mr. Burrell, for he is an authority on the subject, having before his arrival in the district been lecturer for the Ontario Farmers' Institute, the Ontario Fruit Growers' Association, and also in charge of the Tender Fruit section of the experimental station at Niagara, Ont. He said:

"In its commercial aspect British Columbia horticulture has within the last ten years made such progress that it is little short of phenomenal. A fuller recognition of the favorable climatic and soil conditions has been accompanied by a vigorous effort on the part of the fruit growers of this province to produce an article that will hold its own in competition with any fruit grown on the continent. The gradual capturing of the markets of Manitoba and the Northwest by B. C. fruit is a convincing proof of success. Speaking of the province generally, and my remarks are pertinent to the Boundary, it is fairly free from the worst insect pests of the east. Three of the worst—the San Jose scale, the codlin moth and the plum curculio are practically unknown. The pear and cherry slug (Selandria cerasia) and the bud moth are more or less injurious in the western districts, but I have not seen either of them in the Kettle river valley. But the great advantage of this and other contiguous valleys over the coast and lower mainland districts from the horticultural standpoint lies in its immunity from serious fungus diseases. This is doubtless owing to the altitude. We are here 1,700 to 2,000 feet above sea level, and the "rot" of the plum (Monilia fructigena), and scab of the apple (Fusicladium) are practicallp unknown. Exemption from these two diseases, which so greatly diminish the profits of fruit culture in Eastern Canada, and which seriously injure plums, apples, etc., in other portions of the province should be, and is, a factor of the greatest importance to the fruit growers of the Boundary.

"In addition to our freedom from the most injurious insect and fungus scourges, mention must be made of the wonderful growth of all fruit trees—an eloquent testimony to the richness of of the soil and of another important fact, that all classes of fruit trees come into bearing at a considerably earlier age than in the east. The coolness of the nights here somewhat retards the ripening period of some fruits and on this account it is doubtful if grape-growing will be a commercial success. Berries do extremely well in the valley, some of our varieties of strawberries especially being the finest fruit I have seen in twenty years' experience on this continent. Fine peaches and sweet cherries have been grown, but the severe cold of an occasional winter will doubtless do more or less injury to these tender fruits and for commercial purposes they should be planted more sparingly than plums, crabs, apples, pears, etc., with which success is practically sure. In brief, I can unhesitatingly say that with our ever expanding markets, a fine climate and comparative freedom from pests, fruit growers in the Boundary have an exceedingly bright outlook."

For years the agricultural resources of the Kettle river valley, in the immediate vicinity of Cascade City and Grand Forks, and further west between Midway and Rock Creek, have been locally known and appreciated. Now holdings are being secured up the North and West Forks of Kettle river. Land along Boundary creek, between Eholt and Midway, in the bottoms and on the sunny slopes of the mountains enclosing it, show many signs of patient husbandry in new clearings and young orchards. The start has been made. Old timers who acquired large acreages are following the example set by the Okanagan, and are dividing their farms into smaller holdings of 10, 20 and 40 acre plots, which find a ready sale to newcomers—for the prolific character of the soils is gradually becoming known on the outside.

The recent sale of the McConnell ranch, embracing about 1,400 acres, practically adjoining the townsite of Grand Forks, to Messrs. N. McLellan and Ernest Miller, carried with it the conditions that the property shall at once be surveyed and subdivided into suitable blocks in order to get a fair realization of the value of the respecttve portions and procure settlement. For the past two weeks Forbes M. Kerby, P. L. S., has been laying out the land and it is the intention of the purchasers themselves to plant a large area in fruit trees this season and next spring. The early settlement of this tract means much to Grand Forks, for the greater part of the property contains as fine a stretch of fruit growing and agricultural land as can be found anywhere in the Kettle river valley.

Writing of the possibilities of that section of the valley, the history of William Henry Covert, the pioneer fruit grower, is well worth telling. For nigh on two decades Covert has toiled and tilled 320 acres, bringing it from a scene of desolate beauty, unacquainted with the fertility of its own resources, to the embodiment of perfected loveliness. In 1902 he decided to cut up the homestead into ten acre plots, install a complete irrigation and and domestic water system and sell out, retaining a small acreage for himself. This he has at last been successful in doing, and after paying all expenses will receive a comfortable competence that entitles him in his declining years to retire from the arena of daily toil.

It was late in the fall of 1885 when this sturdy Argonaut decided to take up a homestead in the Kettle river valley. He came to the district long before any of the now numerous towns, mining camps and smelters had come into existence. Marcus, on the American side of the line, distant 45 miles, was the nearest trading post. Everything had to be packed on horseback to the ranch. There were no roads, only Indian trails. Little by little it became noised about that mineral—gold, silver, copper and lead—were to be found in the rugged fastness of the adjoining mountains. Shortly came the advance guard of civilization—the sturdy Bedouin of the hills. Not until after the Rossland "boom" in 1895 6, did the Boundary attract any particular attention. It is well known that mining men, many indeed high up in their profession, who came to examine the claims, while admitting their great potentialities, turned them down for lack of transportation facilities. But claim owners did not become discouraged, neither did this pioneer farmer. The former dug and delved for the hidden treasures, and the latter toiled early and late to cultivate the soil. Finally the Canadian Pacific railway sent in several experts and on their reports promptly built the Columbia and Western branch at a cost of over $3,000,000 to tap the numerous camps. In a day the advent of the "iron horse" caused embryonic cities to spring up, the payrolls at the different camps steadily increased, the mines were developed and smelters built. Then it was that the cultivators of the soil, who had hung on so tenaciously, commenced to reap their reward. Of these perhaps Mr. Covert was the best known. To his place came the mine owner and prospector for their supplies of vegetables, fruits, and meats. Covert cleared more land, planted orchards and small fruit trees. He was always energetic and ambitious, and he knew, too, that mining camps demand the best luxuries in the eating line. This demand he was able to supply at handsome figures, and now after twenty years of frugality and effort success has come to him. A success that every pioneer applauds, for did he not pave the way? This man started with $60, borrowed money! Today the sale of his property will net him over $25,000—all won by persistent and intelligent effort. This should be an incentive to the persevering, frugal and industrious husbandman, who, casting about for a location, makes up his mind to throw in his lot with the toilers of the "Boundless Boundary." In conclusion it may safely be stated that few sections of the entire province show greater progress than the Boundary and it offers unsurpassed inducements to the settler in searce of a location; the stockman seeking a ranch; the fruit grower in search of an orchard; the prospector in quest of earth's hidden treasure vaults; the lumberman, the business man, or the capitalist, whethea large or small, who seeks investment for his money.

THE MAKERS OF

"THE LECKIE BOOT"

ARE "OLD TIMERS" OF THE WEST.

They know to a nicety, the climatic and geographical conditions that call for a special class of footwear to meet these conditions.

Eastern shoe men cannot know these things from mere hearsay.

They must live "out west"—get "the local color" as it were—become steeped in western experience and knowledge obtainable only by living the life of a Westerner, before they can hope to make satisfactory footwear for the strenuous life of the toiler in western forests, fields and mines.

"THE LECKIE BOOT" is a western product for western people.

Look for the trade mark upon the sole.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory.

Coal.—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2000 pounds shall be collected on gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miners' certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered coal in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts. bearing location notices, one at each end on the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5.00.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When 500 has been expended or paid, th has been expended or paid, the locator may, upon having a survey made, and upon complying with the other requirements, purchase the land at $1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

Placer Mining, Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims generally are 100 ft. square; entry fee, $5 renewable yearly. On the North Saskatchewan river claims for either bar or bench the former being 100 feet long and extending between high and low water mark. The larter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental, $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Dredging in the Yukon Territory—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged beds or bars in the river below low water mark, that boundary to be fixed by its position on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles, within six years from such date Rental $100 per mile for first year, and $10 per mile for each subsequent year. Royalty, same as placer mining.

Placer mining in the Yukon Territory—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direclion of the creek or gulch, the width being 1,000 to 2,000. All other placer claims shall be 200 feet square.

Claimes are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of mining recorder's office. One additional day allowed for each ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two 1,500 altogether, on the output of which no royalty will be charged. the rest of the party ordinary claims only.

Entry fee $10. Royalty at the rate of two and one half per cent. on the value of the gold shipped from the Yukon territory to be paid to the Comdtroller.

No free miner shall receive a grant of more than one mining claim on each eperate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of $2. A claim may be abandoned, and another obtained on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done a claim each year to the value of at least of $200.

A certificate that work has been done must be obtained each year. It not the claim shall be deemed to be abandoned and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum—All unappropriated Dominion Lands in Manitoba, the Northwest Territories and within the Yukon Territory are open to prospecting for petroleum, and the minister may reserve for an individual or company having machinery on the land to be prospected, an area of 640acres Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well and such other land as may be determined will be sold to the discoverer at the rate of $1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

UNION LABEL

FRIDAY MAY 26, 1905

ON our first page will be found a story of Montreal & Boston Consolidated. Both sides to the controversy have had a hearing and brief statements from the local management and a local stockholder are placed side by side. The Times feels that justice to all concerned demanded such a course. It knows too little of the merits of the matter to do other than allow the parties in interest to state their case. We have abundant grounds however for expressing the opinion that the shut-down will be of short duration. The company is in process of reconstruction along lines that must insure to its personal well fare. The company has some of the best properties in the Boundary and once well financed and well managed cannot prove other than a money-maker for its stockholders. The pending reorganization promises the former and undoubtedly means the latter. The company's mines are in fine condition for a large and increasing output and if the capacity of the smelting plant should be doubled, as intimated, the outlook for a prosperous future is assured. It is due moreover to the readers of this paper at a distance to have this assurance of the values of the company's holdings, even as it is due to the district to prevent misconception of the merits of the camp.

The closing of the works moreover will afford the New York management opportunity to inquire into the labor conditions at the works and to relieve if found necessary a situation which it is claimed was fast becoming intolerable. We have no fear whatever but that the present interchange of views between management and stockholder will result in good, nor have we any doubt of the great merits and possibilities of the big concern.

THE TIMES appears this issue in an enlarged form. This, of course, means a larger expenditure, and it is a question of patronage whether the the increased expenditure can be met by the management or not. Fully one half of the business men of the city do not advertise. Nearly all of them are interested in mining, and are anxious to have the development work on their claims mentioned. Only one hotel in the city advertises. Hotel men ask and receive more courtesies from the press than any other class. They seldom give anything in return for this. Of the thousands of prospectors whose claims have been written up in this paper, not five per cent have become subscribers. A newspaper is a business proposition and therefore requires money to keep it going.

DAVYS, the mine manager who imagined he was of so much importance that the miners of the Slocan were wasting good ammunition on him, has decided to discontinue work on his claims near Silverton, until some one is convicted and sentenced. Before becomining interested in mining property in the Slocan Mr. Davys must have known the conditions that existed in regard to labor and the wages that it would be be necessary for him to pay. He must have known that the people were opposed to Oriental labor. Knowing this, in acquiring property, he entered into an agreement—as binding to an honorable man as a written one—to comply with the conditions then existin the district. No one would claim that Mr. Davys had not a legal right to bring Chinese into the Slocan, but in doing so he violated a tacit agreement with the people of the Slocan.

AN Eastern dispatch says that the fight between the C. P. R. and Great Northern over the V. V. & E. charter has been declared off, the latter road being allowed to build without opposition, and the former will be given running privileges over the road. This will be satisfactory to the people west of here if some provision is made in regard to freight and passenger rates. A railroad to the Similkameen is a necessity in the development of the mines of that district, but members of parliament should protect the people from excessive charges which will undoubtedly result from the agreement which the dispatch announces.

NOTWITHSTANDING rumors that have been current in the city for the past two weeks, no intimation has been received from Ottawa of a change in the editoriai or business management of The Times. Should a change be contemplated, due notice will probably be given in the columns of the paper by the managing editor.

CRUCIFIXION is a mild form of torture to that sometimes inflicted by a vicious directorate on small shareholders of a mining company.

THE annual report of the provincial minister of mines has been received, but to late for extended notice in this issue.

A Cheerful Giver.

Bobby's father had given him a ten cent piece and a quarter of a dollar, telling him he might put one or other on the contribution plate.

Which did you give, Bobby? his father asked when the boy came home from church.

Well, father, I thought at first I ought to put in the quarter, said Bobby, but then, just in time, I remembered "the Lord loveth a cheerful giver," and I knew I could give the ten cent piece a great deal more cheerfully, so I put that in.

Counsel—I wish my client was here instead of, as I expect, lying in bed. His Honor—Perhaps he is better lying in bed than lying here.

Why Suffer From Rheumatism?

Why suffer from rheumatism when one application of Chamberlain's Pain Balm will relieve the pain? The quick relief which this liniment affords makes rest and sleep possible, and that alone is worth many times its cost. Many who have used it hoping only for a short relief from suffering have been happily surprised to find that after a while the relief became permanent. Mrs. V. H. Leggett of Yum Yum, Tennessee, U. S. A., writes; "I am a great sufferer from rheumatism, all over from head to foot, and Chamberlain's Pain Balm is the only thing that will relieve the pain." For sale by all druggists.

PRESTON BONDED

Another High-Grade Claim Purchased.

Nine Men Put to Work This Week.

Colonel L. T. Dickason, a prominent capitalist of Chicago, largely interested in the coal business in that section, E. Ford Johnson and William Bailey, also of Chicago, were visitors at Greenwood during the latter part of last week. Mr. Bailey had been here before, but it was the first visit of the other two gentlemen.

The party visited the Crescent, Last Chance, Preston, Helen Skylark and several other properties. All expressed themselves highly pleased with the country and greatly impressed with the potentialities of the Greenwood high-grade belt. Colonel Dickason and Mr. Johnson returned to Chicago on Tuesday morning last, but expect to come back and pay a more extended visit to the camp during the coming summer. Mr. Bailey will remain for some time and it is not unlikely that he will make Greenwood his headquarters permanently.

While here the party purchased the Preston, adjoining the well known Crescent mine. From the Crescent some of the richest ore yet found in the camp has been taken, assays ranging from $143 to $808 per ton in gold and silver. The details of the deal are withheld, but it is understood the price paid was a substantial one, the previous owners retaining an interest.

It is the intention of the new owners to organize a stock company, but limited to themselves and their associates, among whom are Mr. Ferdinand W. Peck, Samuel K. Martin, and other prominent Chicago capitalists.

Development work has already been begun under the supervision of W. H. Jeffery, M. E., a force of nine men having been started at work immediately negotiations were concluded and the title to the property acquired.

The outlook for the Preston is very bright and it should soon become a valuable addition to the producers of high-grade ore and aid to swell the list of constantly growing dividend-paying mines in Greenwood.

It is a great satisfaction to those in the district who have the truest intereets of the mining industry at heart to know that Chicago people of high standing, means and influence are getting hold of so many good things in this neighborhood. The gentlemen named have a very large following in Chicago and the probability is that more and larger deals will follow as the result of their advent into this camp.

THE GOLD DROP.

One of the first claims located on Wallace mountain, West Fork of Kettle river, was the Gold Drop, owned by Thomas Murray. The location was made in 1899, and the claim lies near the Rambler, Black Diamond and Standard. Two shafts have been sunk on a 5-foot lead, one 45 and the other 22 feet. The lead has been prospected by open cuts for a distance of 2,000 feet. In the ledge there is a paystreak 20 inches wide averaging 300 ounces in silver. This paystreek occurs in the 20 foot shaft. In the 45-foot shaft, in addition to the paystreak already mentioned, there is a lead from two to four inches wide, principally gray copper, and running 450 ounces in silver. Besides the Gold Drop, Mr. Murray and his father, P. Murray, own the Homestake and Gold Drop Fraction, adjoining claims. Development will be resumed on this group in a couple of weeks, when a drift tunnel will be run a distance of 250 feet this season. This will give a vertical depth from the apex of about 175 feet. The owners intend shipping ore the coming winter, and believe that there will be a good net profit to their credit, even with the handicap of a fifty mile haul to the railway against them. Two shifts will be worked all summer. The claims are about a mile from the West Fork wagon road and a few hundred feet from the Rambler road.

THE SKYLARK.

The Skylark Development company limited, owning the Skylark mine in the camp of the same name, is an instance of what intelligent mining will accomplish, after the original owners had thrown up the sponge and declared there was no more ore to be had. After years noted as a producer of high-grade ore, the mine was apparently abandoned, until a syndicate of Phoenix men got together and subscribed a small fund to start operations last fall. A development company was formed headed by A. W. B. Hodges, general superintendent of the Granby company, as president; Dr. R. B. Boucher, vice-president; A. B. Hood, secretary, and O. B. Smith, superintendent of the Granby mines, manager. Since starting operations, October 1st, the mine has paid for its own development, cost of machinery and the payments on the $30,000 bond, have been met. In one month alone, April, the ore returns netted $7,000. This from a mine apparently gutted, and from a vein running from 6 to 13 inches in width. The first-class ore averages $140 per ton, and the second-class $40. The shareholders in the development company have cause to believe they have struck a bonanza, as from present indications the Skylark is capable of turning out many thousands of dollars worth of rich ore.

THE DON PEDRO.

Development was resumed Monday on the Don Pedro, one of the claims included in the Lake group in Skylark camp, owned by the Chicago-B. C. Mining company. At the time work was suspended the shaft was down 75 feet, and Manager Harry Shallenberger states that the 150-foot level will be reached before drifting is started. A horse whim is being installed. Previous development disclosed a vein of quartz highly mineralized, averaging a foot in width. On the dump sufficient ore to make up a carload was taken out which more than paid expenses of sinking. The company owns 177 acres of crown-granted land, traversing which are several high-grade veins, carrying gold and silver values. Surveyors are locating a wagon road to join the Greenwood-Phoenix main trunk road. Ten men are employed.

FAREWELL SERMON.

The Rev. J. D. Knox, who has been pastor of the Greenwood Methodist church for the past four years, will occupy the pulpit for the last time on Sunday next, 11 a. m. and 7:30 p. m, and on the following Thursday night a reception will be given in his honor by the church, to which his congregation and friends are cordially invited. It is expected that the Rev. H. S. Hastings, Mr. Knox's successor, will be present, when the congregation will have an opportunity to receive their new pastor.

Chamberlain's Cough Remedy the Very Best.

"I have been using Chamberlain's Cough Remedy and want to say it is the best cough medicine I have ever taken," says Geo. L. Chubb, a merchant of Harlan, Mich. There is no question about it being the best, as it will cure a cough or cold in less time than any other treatment. It should always be kept in the house ready for instant use, for a cold can be cured in much less time when promptly treated. For sale by all druggists.

British Columbia is evidently going to have competition in railway building even if she does not have competition in transportation after the railways are built. We shall accept the first movement with thankfulness and hope for the best respecting the second. In any event we shall have competition in service in addition to a guarantee against exorbitant charges with the presence of two corporations within a coveted field.—Victoria Times.

A Good Suggestion.

Mr. C. B. Wainwright of Lemon City, Fla., has written the manufacturers that much better results are obtained from the use of Chamberlain's Cholic, Cholera and Diarrhœa Remedy in cases of pains in the stomach, cholic and cholera morbus by taking it in water as hot as can be drunk. That when taken in this way the effect is double in rapidity. "It seems to get at the right spot instantly," he says. For sale by all druggists.

PRESS COMMENT.

However just a strike may be, if it be followed by acts of violence public sympathy is turned against the strikers, and public sympathy oftentimes plays an important part in the matter of winning or losing a strike. Violence is as wrong morally as it is legally. Men have a right to quit work, but no man has a right to do bodily harm to another for taking his job. Workingmen have the undoubted right to organize, to strike for better conditions, to persuade other workmen to stand with them, and to persuade the public to give the preference to those who concede union conditions. So much is conceded now by all except a reactionary few who would follow the truth that "every man has a right to manage his own business" to the absurdity of destroying fundamental rights of workingmen. These few, however, are so far in the minority that they and their opinions are of small moment. But workingmen and all other men, must realize—and nearly all of them do realize—that others have the right to refuse to be persuaded without incurring violence or threats of violence. The unions are not going to be weakened, but strengthened, by a rigid enforcement of the law. They have ample room for the exercise of all their energies under the law. The brick-throwing unionist is the most effective strike-breaker. The unionist who asserts all his rights and at the same time respects the rights of others is the man who helps his fellows and improves the civilization of which he is a part.—Nelson Economist.

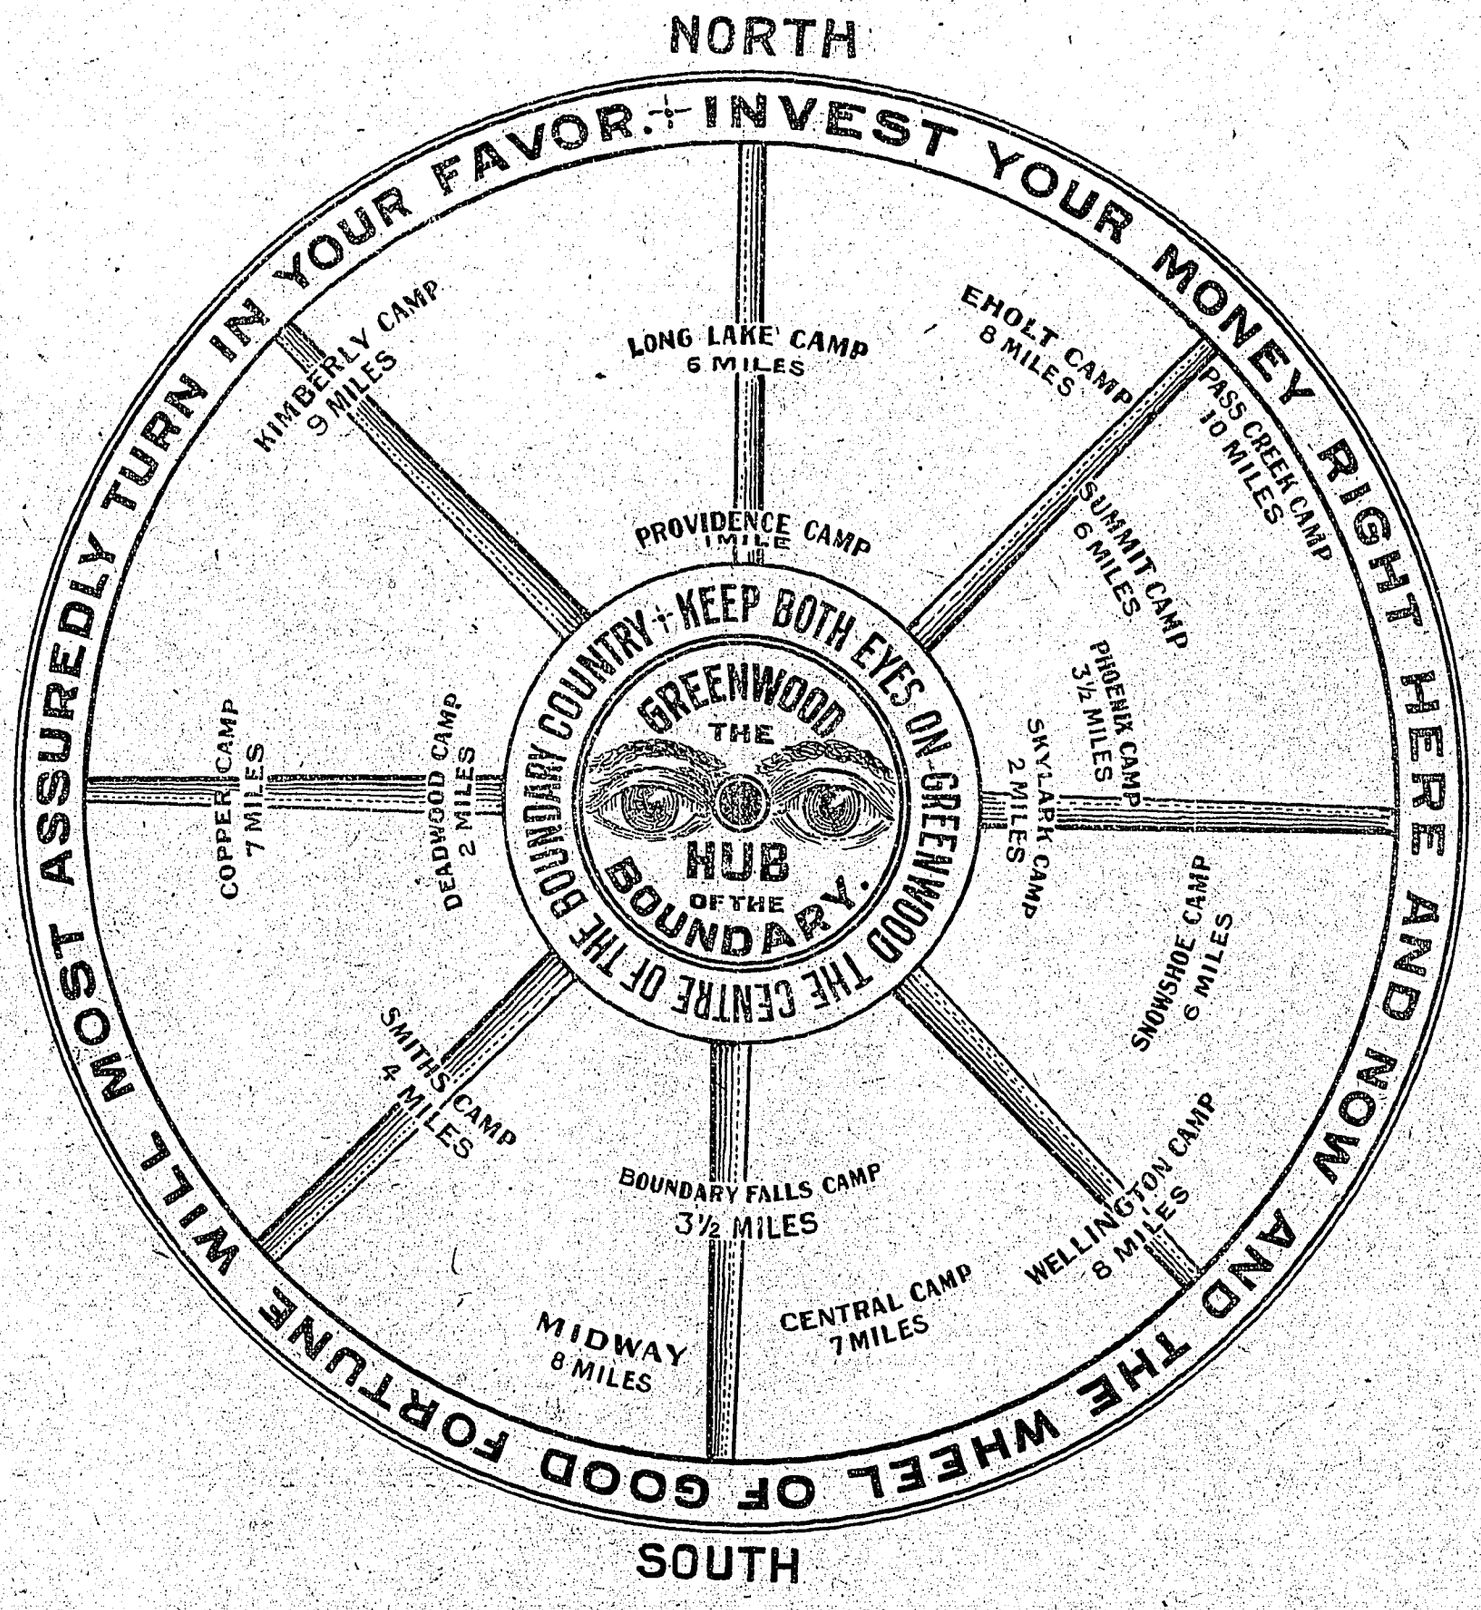
During his recent stay in England Sir Thomas Shaugnessy was reported in the columns of The Chronicle as deploring the ignorance that still prevails concerning Canada in Great Britain. "People," he said, "should visit Canada instead of going to Monte Carlo, Vienna, Rome, the Rivera. If they would occasionally turn their attention in another direction and visit what is, after all, a part of their own country, and should be recognized as such, quite as much as Scotland or Ireland, some good might result. They can get there more cheaply than to some parts of the continent; they would have an ideal sea trip, and they would learn something of their own people across there that would enlighten their minds." That is good advice, but some of our own people go to Europe who have never seen Quebec, Niagara or the Rocky mountains.—Toronto Globe.

Chancellor Boyd declines to fine Coyne, who provided the Minnie M for the conveyance of pluggers in the Sault election, on the ground that a steamer is not "a conveyance." The statute says there shall be a fine of $100 if electors are carried by railway carriages, cabs, carts or any conveyance, and his lordship holds that the Minnie M is not "any conveyance." This is a curious decision. But, then, the law has its kinks. His lordship ruled in the Stratton case that a government is entitled to "conciliate" its opponents by giving them patronage and so forth. In other words it is not improper to persuade with a gift. This sounds very much like a justification of bribery.—Toronto Mail and Empire.

Following upon the announcement of the determination of the Great Northern to build into Princeton, in the Similkameen, comes, as was anticipated, the announcement of a contract having been let for a portion of the C. P. R. line from Spence's Bridge into Nicola, 45 miles. It is stated, however, that this has been the intention of the C. P. R. directorate for some time past, and that the surveys, plans and specifications were completed and ready some months past. In any event, the district affected has long been promised and long in need of transportation facilities that are now apparently to be amply provided.—Victoria Colonist.

British Columbia has passed some freak legislation in its history, but among it cannot be classed either its anti-Mongolian act or commercial travelers' tax. It is because the men at Ottawa know nothing of the conditions here that they characterize our legislative work as freakish. They should study the question of commercial travelers on the spot, and learn that many gentlemen dubbing themselves commercials are in reality pedlers, competing with local tradesmen who have to pay rent, rates and taxes. When these matters are up for discussion at Ottawa, one wonders if British Columbia has any representatives, and what they are doing.—Nelson Tribune.

No Time Equal to the Present



Never in the history of the Boundary has the district had a brighter outlook than today. With the successful development of the immense large bodies of low grade ore and the enlarged and much improved facilities for treating at a very small cost, the continued opening up of new high grade properties and their successful and profitable operation has made the Boundary famous as a mining centre, and every day adds more to the list of new finds and bigger values. It is readily admitted that Greenwood is the Eldorado of the Boundary with all roads leading thereto, and surrounded as it is, with such magnificent resources is destined in a few years to be a second Butte. If you therefore want to participate in its future prosperity, now is the time to invest both in mines and real estate. For NINETY DAYS we intend giving you a chance to make a safe and profitable investment. Every lot we own will be put on sale at rock bottom prices during the above period. Prices ranging from $50.00 up, at terms to suit the purchaser. Make your selection and make it early.

RALPH SMAILES,

AGENT FOR THE GREENWOOD TOWNSITE COMPANY.

Synopsis of Regulations Governing the Disposal of Dominion Lands within the Railway Belt in the Province of British Columbia.

A LICENSE to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths excepting those situated West of Yale for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged :—

Sawn lumber, 50 cents per thousand feet B.M.

Railway ties, eight and nine feet long, 1½ and 1¾ cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent on sales.

A license is issued so soon as a berth is granted, but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B. M., for square timber and sawlogs of any wood except oak; from ½ to 1½ cents cents per lineal foot for building logs; from 12½ to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties; and 50 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of twenty-one years at a rental of two cents per acre per annum.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for agricultural purposes may be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the District, within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead, is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of attle, to be actually his own property, with buildings for their accommodation, will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) of any person who is eligable to make a homestead entry under the provisions of the Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the Act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY,
Deputy of the Minister of the Interior.

Ottawa, February 4th, 1905.

A Safe Cough Remedy for Children.

In buying a cough medicine for children never be afraid to buy Chamberlain's Cough Remedy. There is no danger from it and relief is always sure to follow. It is especially valuable for colds, croup and whooping cough. For sale by all druggists.

NOTICE OF FORFEITURE.

To John Nelson, J. A. Munson and H. Magnuson or to any person or persons to whom they may have transferred their interest in the Morning Glory and Rainstorm Mineral Claims situate on Cedar Creek, main Kettle River, in the Greenwood Mining Division of Yale District.

You are hereby notified that we have expended the sum of $400 for work on the above mentioned claims and $10 for recording the same for assessment work for two years, such being required and necessary to hold said claims for the years ending the 6th of June, 1903 and 1904, under the provisions of the Mineral Act and Amending Acts and if at the expiration of ninety days from the date of first publication of this notice in the Boundary Creek Times, you fail or refuse to contribute your portion of such expenditure together with all costs of advertising, your interest in said mineral claims shall become invested in us, your co-owners, upon filing in the proper office in that behalf the affidavit required by section 4 of the "Mineral Act Amending Act, 1900."

Dated 3rd March, 1905.

CHARLES E. JOHNSON.
JOHN BERGMAN.

A Good Family Liniment.

Every family should be supplied with a bottle of Chamberlain's Pain Balm. For cuts, bruises, burns, scalds and similar injuries, which are of frequent occurrence, there is nothing so good. It soothes the wound and not only gives instant relief from pain but causes the parts to heal in about one-third the time required by the usual treatment. As it is an antiseptic all danger from blood-poisoning is avoided. Sold by all druggists.

Floor Lac is the latest thing in floo finishes, no varnish required. For sale at Russell-Law-Caulfield Co.

THE SIMILKAMEEN

Travel to the West Increasing Daily.

Real Estate Moving Briskly at Hedley.

Travel is increasing daily to the Similkameen, and not a stage departs from here but is crowded with prospectors, railway contractors, speculators and fortune hunters. The announcement that the Great Northern railway has actually let the contract for the construction of 22 miles from Ore to the International Boundary, and that dirt will be thrown within the next ten days has wetted the appetites of hundreds who have for years looked upon the Similkameen as "the promised land."

J. F. Royer, manager of the Overland Flyer stage line, has completed the establishment of a fast service between Greenwood and Hedley City, and the traveller from Spokane can now make the trip comfortably, in 36 hours. From the Coast, by the Great Northern railway, Hedley can be reached two days sooner than going via Spences Bridge. Connection with the stage is made daily at Phoenix. From here to Chesaw five and a half are consumed. The night is spent there and on Sundays, Tuesdays and Thursdays the service is made to Hedley City in 14 hours. The trip from Phoenix to Hedley costs $17.00.

Passengers returning from the Similkameen report considerable activity at Oro, Wash. This point will probably be construction headquarters on the American side of the line, and alreapy several of the contractors are taking in their outfits, preparatory to commencing operations. H. B. Madden of the Pacific hotel is building a hotel there. Hughie Maguire, formerly of Phoenix is doing business at present under canvass, but is said to be arranging for lumber for building a 40 room hotel. Hughie has made and lost more than one "bunch" in the Boundary alone and his many friends will wish this genial fortune hunter a return of luck at Oro. R. Grigor, who formerly had a wholesale liquor store here, and is now engaged in business at Walla Walla, has purchased lots with a view to starting another wholesale liquor establishment. Major Anderson, at one time Indian agent on the Colville Reserve looms up as a land speculator. He was here Sunday en route to Spokane and admits the purchase of a large block of "sage brush" adjoining the townsite of Oro and lying between the Okanagan and Similkameen rivers. He modestly stated that he had a colonization scheme on hand, and meant business.

Keremeos too is experiencing lively times. A Vancouver syndicate is spending money corraling the old time farms with a view to subdividing into 10 and 20 acre plots. That section of the Similkameen valley is highly desirable for horticulture, when water can be brought on to the land, as is evidenced by the splendid fruit orchards of Frank Richter and others. Surveyors have been busy laying out the land, and quite a force of men are building houses, planting orchards and laying out an extensive system of irrigation.

Hedley City, the terminus of the stage line, is also receiving much attention at the hands of the visitors. Real estate is moving briskly, buildings are going up and a good summer is looked forward to. The Nickle Plate mine has on its pay-roll 140 employees at the mine and mill. A big hotel has recently been opened.

Further up the valley at Princeton, the pioneer town of the Similkameen district, the possibilities of both the Great Northern and the Canadian Pacific railway building in the near future, has stimulated business to a marked extent. Princeton is one of the prettiest townsites in the whole valley, and for years has been the government headquarters for the district. Backed by a rich mineral country in every direction, situated in the heart of a coal basin, surrounded with splendid grazing, farming and fruit growing lands and mountains clad in commercial timber, its future is assured. Copper Mountain 12 miles from town is once again the mecca of the prospector and mining operator. The announcement that the B. C. Copper Company has secured a controlling interest in the Sunset and is to develope the same and the work being done by Emil Voight on the same mountain augurs well for that camp. In fact the cry of "Ho! for the Similkameen" is heard in the land, and now after many years of patient waiting, its pioneers are looking forword to reaping a harvest. May fickle fortune reward them abundantly. They deserve it.

Two four-horse teams, loaded with merchandise, left here yesterday for Sidley, where it is said R. G. Sidley is going to open a general store.

During a drinking bout in a Copper street hotel Wednesday evening one of the parties went outside and tied a rock in his handkerchief, and coming back into the room, struck one of the party three times on the head with the rock and then ran out of the hotel. Last week the police magistrate fined a couple of bartenders $50 each for selling liquor to intoxicated persons, but it appears the hint has not been taken by some of the others. Although they do not appear to think so, the laws of the country are intended for the guidance of hotelmen as well as others.

A Snap.

A five-roomed house and furniture for sale at less than half its cost. Good well on property. Inquire at this office.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Post Office at Vancouver, B.C.," will be received at this office until Friday, June 23, 1905, inclusively, for the erection of a Post Office building at Vancouver, B. C., according to plans and specification to be seen at the Department of Public Works, Ottawa, Ont., and at the Vancouver Armoury, Vancouver, B. C.

Tenders will not be considered unless made on the printed form supplied, and signed with the actual signatures of the tenderers.

An accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p. c.) of the amount of the tender, must accompany each tender. This cheque will be forfeited if the party tendering decline the contract or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,
FRED GELINAS,
Secretary.

Department of Public Works,
Ottawa, May 16, 1905.

"Pinto" Shell Cordovan

Used in H.B.K. Mitts, Gloves and Moccasins—tough as whalebone, flexible, soft, pliable, scorch-proof, wind-proof, boil-proof, crack-proof, tear-proof, rip-proof, cold-proof, almost wear-proof—certainly the greatest leather ever used in mitts and gloves.

Like buckskin it is tanned without oil, unlike buckskin it is not porous, it is wind-proof—will outwear three buckskins.

"Pinto" Mitts and Gloves never crack or harden, never get sodden, are always warm, pliable, soft and comfortable.

Sold at all dealers but never without this brand:—

The Chicago Daily News notes that millionaires never become poets. For that matter, has it ever known a poet to become a millionaire?—Montreal Star.

Japan has bought twenty-five million barrels of flour with the proceeds of her first loan. She raised the dough first and then bought the flour.—Belleville Intelligencer.

By advertising in the local paper you not only direct attention to your own wares, but you show to the outside world that you are living in a progressive and prosperous community.

Do you want to add $320 to your income?

It will only require a few minutes of your time every day to earn $320 a year. You can earn it with a Chatham Incubator. A No. 2 Chatham Incubator will hold from 100 to 120 eggs—according to size of eggs. Eighty chickens is a low average hatch—users of Chatham Incubators will tell you so. Chickens are always in demand and the supply is always short, so fifty cents is the average price secured. If you only take off eight hatches in a year, that gives you an income of $320.00. Wouldn't that extra amount be useful to you? ¶ Best of all, you can buy a

Chatham Incubator without one cent of cash until October, 1905

The machine pays for itself many times over before that time. There couldn't be a fairer offer than this. We ship a Chatham Incubator to you at once, freight prepaid by us, and your first payment is not due until October, 1905. Write us to-day for full particulars. The Chatham Incubators and Brooders have every new improvement worth while in an incubator or brooder. The incubators are made with two walls, case within case, of dry material that has been seasoned in our lumber yards. They are built solid as a rock and will stand any amount of usage for years. The sooner you accept our offer the sooner will the Chatham Incubator be earning profits for you.

We sell for Cash or on time as you desire.

Coles & Frith

TOWN TOPICS

W. G. Gaunce returned from Seattle Saturday last.

F. Knight was a visitor from Grand Forks this week.

D. O. McKay of Westbridge spent the past week in Greenwood.

P. Burns & Co. have a new delivery cart, painted scarlet and green.

Bobby Robinson, who has been in the hospital for the past three weeks, has fully recovered.

Jack Doran, a pioneer knight of the grip, and now in business for himself in Toronto, was here on Tuesday.

J. C. Haas, M. E., came up from Spokane on Tuesday to inspect the work being done on the Golconda.

Thos. Corkill and Thos. Kermeen are doing assessment work on the the Great Laxey group near Eholt.

Six miners left here Wednesday on the West Fork stage for Beaverdell, where they will work on the Sally.

P. J. Dermody, superintendent of the Providence mine, went over to Nelson Monday to meet the Chicago directors of his company.

The business men of Greenwood should make an effort to hold a celebration on Dominion Day. Now is the time to get at work.

Jupiter Pluvius ruled out the baseball players last Sunday, and the greater part of the week robbed the street sprinkler of its job.

Jas. Moran, one of the pioneers of Phoenix, but now engaged in ranching below Midway on the Kettle river, was in the city Monday with new potatoes for sale.

J. W. Nelson of the Pioneer hotel is under the doctor's care, suffering from appendicitis. It is probable an operation will have to be performed next week.

M. P. Gordon, ex-mayor of Kamloops, was in the city Tuesday. He is traveling for the Inland Cigar company, of which company he is one of the principal stockholders.

H. L. Johnston, roadmaster on the Columbia and Western, with headquarters at Greenwood, has been transferred to Nelson, and will in future have charge of the Nelson division.

Mark F, Madden, H. J. Fitzgerald, J. B. Heeney and D. B. Scully of Chicago arrived in the city Tuesday. All the gentlemen are interested in the Providence mine, and came here to attend a directors' meeting of the company, which was held yesterday.

Chas. Galloway won the hundred-yard dash in Grand Forks Wednesday.

Geo. B. Paul of the Greenwood smelter returned this week from a visit to Spokane.

The Greenwood lacrosse team defeated Grand Forks Wednesday last by a score of 4 to 3.

E. W. M. Lysons returned this week from surveying a number of mineral claims on the North Fork of the Kettle river.

Bruce Craddock left this week for Trail. After spending a few days in the smelter town he will go to Poplar, where he has large mining interests.

The Initiatory and First degrees will be conferred on five candidates by the local lodge of Odd Fellows June 6th, and the following Tuesday evening the Second and Third degrees will be put on.

W. Y. Williams, formerly superintendent of the Granby, and John Rogers of Grand Forks, passed through the city Wednesday on their way to the Similkameen. Mr. Williams has lately returned from a trip to Europe.

One of the latest attractions secured for the Dominion exhibition to be held in Westminster from September 27 to October 7 is an exhibit that will be illustrative of mining and smelting operations, arrangements for which have been made with the Hall Mines and Smelting company of Nelson.

Rumor has it that Captain Harry Johns is slated for a top-notch job in one of the mines, but he blandly declines to discuss the subject. Since his retirement from the scenes of active mining in this section he has traveled quite extensively, and perhaps is not averse to once again resuming harness.

F. F. Ketchum has first place in the bowling alley contest with 222 points, E. W. Bishop being second with 211. There must be something wrong with the local bowlers when they allow a backwoods merchant, fifty miles from a railway, and who never saw a bowling alley, to walk into town and top the score.

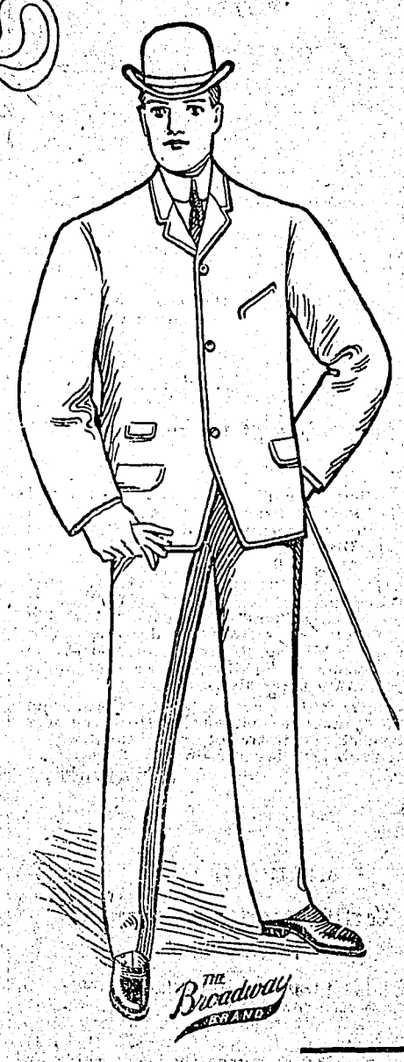
The Mackenzie-Hambly Co., who have been conducting a millinery business in Greenwood for the past five years, have announced their intention of giving up business, and their large stock, which is complete in all spring and summer styles, is being sold regardless of cost. Show rooms in Rendell & Co's store.

All the large stores in Greenwood were closed Empire Day. A few of the residents went over to Grand Forks to see how dull a town really can be without throwing up the sponge. Neither Foulds Bros. nor the Citizens' band went over. They attended the Summer Carnival in Grand Forks last year.

In the immediate vicinity of Greenwood, in what is locally termed the "high-grade belt," the following properties are all being developed: Providence, Elkhorn, Twin, Toronto, E P U, Bay, Skylark, Don Pedro, Last Chance, Silver Cloud, Mavis, Preston, Gold Bug, Spokane, Medow Lark, Fremont, Helen and Highland Queen.

Thos. Murray came down from Beaverdell on the West Fork Saturday last, where he has been for the past thirteen months developing his claims. For the past three months he has been working on the Sally. He says that the West Fork will astonish the mining world when with another year's development has been done. Mr. Murray's opinion is worth something, considering that he has spent his life in mining, and thus gained the best of all mining knowledge, practical experience.

F. F. Ketchum, the only merchant doing business on the West Fork, came down from Beaverdell Saturday list to spend a few days in the metropolis of the Boundary. It is over a year since Mr. Ketchum was in Greenwood, and his many friends here have been doing their utmost to make his visit a pleasant one. He says that, although business has not been very brisk at Beaverdell for the past four years, the prospects at the present time are very encouraging. There is now no doubt as to the richness and permanency of of the ore bodies of the West Fork. The season's development on Wallace mountain, especially on the Sally group, has shown much better results than those familiar with the property expected. Not only on the Sally, but on all the claims working good results are being obtained. On the Duncan, the Wabash, the Rambler and other properties in the vicinity of the Sally the ore bodies are showing up well. This is also true of the properties in the vicinity of Carmi. Mr. Ketchum leaves for Beaverdell tomorrow.



"BROADWAY" CLOTHING

STYLISH

HIGH GRADE

ATTRACTIVE DESIGNS

THE Russell-Law-Caulfield

—COMPANY, LIMITED.—

Dealers in Shelf and Heavy Hardware, Groceries, Chinaware, Etc.

Poor sight is a terrible handicap. Consider your child's future. Our scientifically adapted glasses perfect sight.

WHITE BROS.

CITY COUNCIL.

At a special meeting of the city council held Saturday evening there were present Mayor Naden and Aldermen Bunting, Caulfield, Mackintosh, Parker and Smailes. Minutes of previous meeting read and adopted.

A Mr. Fish, representing steel pipe manufacturers, briefly addressed the council on the merits of his goods. It was decided to purchase 1,800 feet of 6-inch steel pipe for Copper street, and the balance of the pipe for the waterworks extension will be supplied by the Pacific Pipe company of Vancouver.

Board of health was authorized to make contract with Sisters' hospital for care of indigent sick.

A petition, asking that Barber street, between Long Lake and Skylark, be opened, from H. McCutcheon and others, was referred to street committee.

Clerk was instructed to advertise waterworks debentures in the Toronto Globe.

City engineer reported good progress being made on the waterworks extension

City engineer was instructed to notify steam laundry to make arrangements for disposal of waste or the city would be compelled to close laundry.

Finance committee reported the following acounts correct, which were ordered paid:

Greenwood Electric Co.	$114 25
Thos Drug Co	1 75
C. J. McArthur.	5 00
Yale-Columbia Lumber Co	31 96
Leon Fontier	15 00
Sacred Heart hospital	30 00
E. G. Warren	3 50
Hunter-Kendrick Co	1 50

Council adjourned to meet 29th inst.

Fred Stork, mayor of Fernie, has declared war on the Fernie Ledge and boycotted that paper. Our sympathy is mostly with Stork for if Lowery doesn't make him wish he was back on the ranch hoeing potatoes before he gets through with him we miss our guess.—Blairmore Times.
