The Big Store

The Hunter-Kendrick Co. Ltd.
THE BIG STORE

The Big Store

Summer Sale of WHITEWEAR

We are closing out our stock of Whitewear to make room for the fall goods. You will find our prices exceptionally attractive. Why not call and see?

White Waists as low as **60c** **White Skirts only 75c**

Corset Covers 25c and up.

We have only a few Fancy Silk Parasols left and you can have them at the lowest.

Big Mid-Summer Sale

Our Annual SUMMER SALE Commences

Mon. July 17

Another Chance For CASH BUYERS.

CUSTOMERS OF THIS STORE KNOW THAT WHEN WE ADVERTISE "SUMMER" SALE THAT WE MEAN BARGAINS

All departments in this store are crowded with summer goods and before we can talk about fall business these shelves and boxes must be cleared. If your ready to save money on every wanted thing for Man, Boy, Women, Girl and Home, we're supremely ready and give you the chance. ✕ ✕ We're not giving you prices in this space but our hand bills will give the first draft of bargains. Come with the crowd Monday morning at 8:30 and get first choice.

IMPORTANT Be sure to bring the momey for this sale will be for CASH ONLY. Cash or C. O. D. will be our terms.

RENDELL & CO.

STORE CLOSES DAILY AT SEVEN O'CLOCK
EXCEPT SATURDAYS AT 10 P. M.

A GREAT DISTRICT

The Similkameen and Its Resources.

SOME CRITICISMS MADE

Properties Being Offered at Reasonable Prices on Working Bonds.

Alex Robinson returned from the Similkameen this week, where he had been for the past two months. In conversation with a reporter he gave the following information in reference to that promising district:

"The Similkameen country is slowly but surely gaining the attention of of mining men. At the present time experts representing several big concerns are examining properties scattered all the way from Kruger mountain to points twenty miles beyond Princeton. While the whole section of country mentioned is well worth inspection as a field for mining investments. The country adjacent to Princeton and that portion between Keremeos and Twenty Mile creeks is particularly worthy of attention. It is on the range between these two latter creeks that the Nickel Plate mine is located. Lying east and north of this is a vast mineralized section that in the next few years will in all probability make the Boundary take a second place in tonnage production. Near the Nickel Plate, on the Twenty Mile creek slope, is the Kingston group, which was bought for $65,000 and upon which development work is now being carried on. On the Fairy Queen group, recently bonded for a large amount, and in which some Greenwood men are heavily interested. South of these are the groups owned by T. J. Marks and Paul Broadhagen. South again on Sixteen Mile is the Oregon group, owned by Hedley men, which gives promise of outdoing the Granby in size as much as it does in value.

"The pivotal point of interest of this section, from a mining point of view is Riordan mountain and the district immediately adjacent thereto. Here are situated some of the most promising claims in the entire Similkameen country, and it is here that almost daily representatives of mining companies can be met sampling the ore that has been exposed by open cuts, shafts and tunnels, with a view of acquiring a bond on some of the properties. Last week a deal was consummated whereby two groups owned by McKinnon Bros of Hedley, MeLean of Keremeos and other parties, passed into the hands of a mining syndicate, and several other deals are pending which if satisfactorily concluded will make this one of the busiest mining sections in the province. The ore in most cases is similar to that found in the big mines of the Boundary. The exceptions are the claims owned by Webster on Fifteen Mile, the Marks and Broadhagen properties and the Nickel Plate and Sunnyside, where the ore can be handled by stamps and the tailings cyanided. The ore from claims known as the Nickel Plate group are being handled in this way, and from the amount of work done are perhaps the best known properties in the Similkameen. While the mine is no doubt a bonanza, it is doubtful if it has been a good advertisement for the district, owing to the enormous expense that the management evidently considered necessary in its development. The ore is conveyed in 2-ton cars by electric motors to the brink of the mountain, a distance of one and a half miles, and transferred to the mill by gravity tramway in 5-ton skips. It is not easily apparent why this was necessary. There is a splendid mill site immediately beside the mine, and water could easily be secured from a lake three miles away. For some reason the compressor is installed at Hedley, two and a half miles from the mine, and the cost of freighting and laying a six inch pipe line up the mountain, to say nothing of the purchase price, must have been a heavy item of expenditure.

"The system of mining followed is in some respects an imitation of the Boundary methods. There are two glory holes, in addition to the underground workings. The mine employs, all told, about seventy men, but as a 40-stamp mill handles its entire production, it can be easily understood that the management is fortunate in having a high-grade property to deal with.

"The ore on some of the claims owned by the company is base and is a smelting proposition, but no development work is being done on any of them, nor anything else to indicate the erection of the smelter, the site for which the company struggled so hard to obtain. The land granted for that purpose is now a magnificant ranch, planted partly in fruit trees and partly in garden, the produce from the latter being used to supply the mine boarding house. A fine residence for the manager adorns another part of the "smelter site." Water for irrigation purposes is brought from Twenty Mile creek, and the smelter has resolved itself into a beautiful ranch, which is a credit to the owner, and which indicates the man's natural avocation, for no matter how one may question the manager's methods of mining, his abilities for high class farming are beyond dispute.

"There is one error regarding the Similkameen which can stand correction. It has been reported by irresponsible persons that no work has been done in the country and that prospectors hold their claims for impossible prices. Both these statements are wrong. The latter especially is an utter absurdity, for claims can be secured there on working bonds that in any other country would command a substantial cash payment, The claim owners there realize that they have to allow generous terms on bonds in order to induce capital to take hold, and in no camp in British Columbia are there such liberal terms given as there are at the present time in the Similkameen.

"Hedley itself is growing steadily, stores and hotels are going up rapidly, and it bids fair to be the center of the Similkameen country. The advent of the railroad is eagerly looked forward to, and is all that is necessary to start the various camps on the way to being the greatest mining district in British Columbia."

EPWORTH LEAGUE.

Monday evening last the members of the Epworth League of the Methodist church elected officers as follows:

Rev. H. S. Hastings, hon. president.
Miss M. Green, president.
H. A. Clark, 1st vice-president.
P. Wells, 2nd vice-president.
Miss L. M. Dixon, 3rd vice-president.
Miss Dynes, 4th vice-president.
Mr. Webb, secretary.
Mrs. F. H. Parker, treasurer.

The League meets every Monday at 8 p. m. in the Methodist church.

Andy Hamilton is in town.

The thermometer registered 101 yesterday.

Mrs. B. F. Petch is rapidly recovering from her illness.

It is reported that work will shortly be resumed on the Carmi, West Fork.

J. Fuller, formerly with the Russell-Law-Caulfield Co., returned to the city this week.

Mrs. E. B. Dill returned Wednesday from a month's outing on the West Fork, much improved in health.

Ed. A. Hain, of Hain & Co., Midway, was a visitor in the city yesterday, and says there is not a vacant house in that town.

S. Stingley returned from Montreal yesterday, and leaves today for Revelstoke, having been transferred to the main line.

Thos. McAulay came in from the West Fork yesterday. He reports all the properties showing up well with development. Business is picking up in Beaverdell.

A large number of people are daily arriving in Midway, with the object of engaging in business when railway construction commences on the Great Northern and Midway and Vernon. The right of way for the latter is now being purchased.

FRIDAY JULY 21, 1905

Two of the most important provisions of the Municipal Clauses Act, dealing with the regulation of the sale of liquor, are, owing to a typographical error, rendered quite useless, and conviction under them impossible, according to the contention of Joseph Martin, K. C. The whole trouble has arisen over the transposition of A5 and A6, and the two clauses affected are subsections 4 and 5 of section 177. Sub-section 4 says that the occupant shall be responsible for all sales of liquor on his premises, and if unlawful, shall lay himself open to the penalties provided under section 176 of the act. Now it is held that as a matter of fact it is not section 176 at all that provides the penalties; this is done by section 175, and all that 176 does is to state the manner in which the penalty is to be recovered. Sub-section 5 deals with the "actual offender," the person who sells the liquor, and the same mistake exactly is made in sub-section 4. These two sub-sections, the most important ones dealing with the imposing of penalties for unlawful sale of liquor, are thus, he contends, invalid, and all bylaws made under them are also useless.—Ex.

THE Vancouver Province is "warm" over the passage of the V., V. & E. bill. The people most interested would have been much warmer had the bill not passed. However, there is no use of calling people "liars." At best it is poor reasoning. The member forr Yale-Cariboo was successful in getting railway competition fo a large portion of his constituents. Whether he told the truth or not is of little moment so long as the main object was attained.

A COAST politician has sued a coast daily newspaper for libel. During a campaign very few people take the statements of political writers seriously, and very few politicians have reputations that could be injured by a newspaper article.

THE present session of the house of commons has been long but it has resulted in real benefit to the Boundary and districts west of here—railway competition.

IT IS said that construction work will yet be started this season on the Great Northern between Denoro and Midway.

PROVIDENCE was the cause of the departure of a number of our citizens for Nelson this week.

Chamberlain's Colic, Cholera and Diarrhoea Remedy The Best in Existence.

T. M. Wood, manager of the White County News, Beebe, Ark., is a representative Southern business man, who does not hesitate in expressing his good opinion of a well known remedy. He says: "It gives me pleasure to recommend Chamberlain's Colic, Cholera and Diarrhoea Remedy, having used it myself and in my family with the best results. In fact I believe it to be the best remedy of the kind in existence. Sold by all druggists

The principal quicksilver mines in China are the Wan Shan Chang, in the perfecture of Toon Yen, and are situated about 3,000 feet above sea level. The journey from Shanghai, 1.324 miles, may be accomplished in 25 days. The quicksilver deposits, lying in magnesian limestone, are scattered over an area of about three square miles. One variety of cinnabar is bright transparent red, and another a dark opaque red, with which antimony is almost invariably associated in small quantities. Native mercury is sometimes found with antimonial ore. The ore-pickers, mostly lads, women and children, produce from 10 to 15 pounds of select ore each, assaying one to two per cent. mercury, which is the customary amount gathered in a day's work. In working the mines during the rainy season, the surface water as it accumulates in the lower workings is forked by means of bamboo or wooden chain pumps, similar to those used for irrigation purposes. Timbering is unnecessary, the ground being compact and holding up well, even in the largest working. Ventilation is poor, but workmen give it no attention because they do not wish to incur expense. The ore is mined in the ordinary way by drilling holes, seldom beyond 15 inches deep, with three-fourths inch iron drills pointed at both ends with steel. The holes are charged with two or three ounces of domestic gunpowder, and the slow burning fuse is a conical shaped piece of paper. An average shot breaks about 100 to 200 pounds of rock. The men work an average of five or six hours a day, and receive in addition to meals daily 130 cash—about eight cents. The public are mostly old workings which have have been abandoned as too poor to be worked by a company, but still rich enough for individual miners, who, on payment of a hammer tax of 39 cents a month to the local magistrate, are allowed to work in any unoccupied mines within a limit, vaguely defined "of ten feet." If the ore won is in sufficient quantity, the landowner establishes a furnace near the mine, and the miner is compelled to have his ore treated in it, the owner retaining the usual percentage collected through the percentage holes, which is seldom, if ever, below 20 per cent.—Mining World.

EQUAL DISTRIBUTION

Are Our Legislators Drifting to Socialism?

HALF MILLION DOLLARS

Divided Annually Between Senators and Members of the House of Commons.

The resolutions increasing sessional indemnity of members passed the house of commons this week unanimously. The tendency of the resolution is rather of a Socialistic character, for if it does not mean an equal division of the nation s wealth among the whole people, it certainly means an equal division of a nice slice of the nations wealth among those nearest the public chest. So to those of a socialistic turn of mind the resolution of Minister of Justice Fitzpatrick must appear a step in the right direction.

Besides members of the house and senat, a number of others are benefitted by this initial move in the direction of Socialism. The premier's salary was raised, the leader of the opposition is given a salary, some of the judges get a slice, ex-cabinet ministers are again allowed to get their hands in the strong box, and in fact the "very best" people in both parties are to be adequately recompensed for their services to the country. It is pleasing to note that the resolution was "adopted unanimously," and that "congratulatory speeches were made by members on both sides of the house."

The resolutions provided that members and senators shall receive $20 a day up to 30 days attendance, and for more than 30 days, members and senators will receive a lump sum of $2,500. In future the sessions of both the house and senate will be at least 31 days. The premier's salary is to be increased and the leader of the opposition is to receive a salaay of $7,000.

There will be deducted from the indemnity of each member and senator $15 a day for every day he is absent from his seat. Actual moving expenses will only be paid hereafter, mileage being abolished. Members and senators must furnish a statement at the close of each session setting forth their expenses in traveling to and from parliament and also the number of days of absence. These statements will be received by the accountant of the house of commons in the form of affidavits.

In addition to the foregoing provisions, it is provided that cabinet ministers who have served five years at the head of a department will receive an annuity equal to one half of the salary received when in office. Among the immediate beneficiaries under this provision will be the following:

Sir Charles Tupper, Bart., a father of confederation.

Sir Hibbert Tupper, the son of a father of confederation.

Sir Hector Langevin, proxy.

Sir Mackenzie Bowel, suppressed a strike in cabinet.

Sir Adolph Caron—

Sir John Carling, representative of a very influential class.

Hon. Israel Tarte, nifty.

Hon. A. G. Blair, heady.

Hon. Clifford Sifton, discoverod the vast mineral wealth of the Yukon.

Hon. John Costigan an empire-builder Did great service to the country by moving home rule resolutions. Is on speaking terms with supporters of both parties.

Hon. J. Haggart, just John Graham Haggart, of interest to students of evolution.

The judges of Canada have come in for a share in the general distribution of the nation's surplus wealth. All supreme court judges' salaries are increased. The chief justice of the supreme court of Canada is to receive $10,000, and the others $9,000 each; the exchequer court judge $8,000; chief justice supreme court of British Columbia, $7,000; other judges $6,000 each. British Columbia county court judges for the counties of Cariboo, Westminster, Yale, Nanaimo, Vancouver, Victoria-Atlin, and Kootenay, will each receive $3,000. It is further provided that there will be paid in lieu of traveling allowances heretofore authorized to each judge, whether of a superior or county court, in addition to his moving or transportation expenses the sum of $6 a day for every day during which he is attending as a judge in court or in chambers at any place other than that at which he is by law obliged to live.

VOL. 9, NO. 46, JULY 21, 1905

TOWN TOPICS

The stages are daily crowded with passengers for points west.

The street sprinkler might profitably be used this warm weather.

Nat Darling, traveler for the Mainland and British Lion cigars, was in the city Tuesday.

Ernest Mills left yesterday morning for a trip to Nanaimo. He will be away a couple of weeks.

Mail is now delivered from the train at Anaconda, instead of as formerly through the Greenwood office.

Gold Commissioner Kirkup of Rossland was in the district this week attending to his duties as assessor.

C. Scott Galloway is in Nelson this week on business connected with the Fremont and Strathmore companies.

Bob Yuill returned this week from Hardy mountain where was doing assessment work on the Rabbit's Paw group.

W. Y. Williams, formerly superintendent for the Granby company, was in the city yesterday, returning from a trip to Osoyoos.

Geo. F. Williams, for a number of years in business here, but now traveling for a Montreal house, was in the city Wednesday.

G. A. Evans, publisher of the Grand Forks Sun, was a caller at the Times office this week. He had been making a tour of the Boundary on his wheel.

Part of the force on the Preston was laid off Saturday. The full force will not be put on again until stoping is commenced. Sinking is at present being done.

Arthur Wheeler, for the past three months press correspondent at Greenwood, left yesterday for Victoria, where he has accepted a position on one of the dailies. Mrs. Wheeler accompanied him.

It is said that there are twelve legal gentlemen employed on the Providence case now being tried in Nelson. With a fair deal the gentlemen should each get $16,666.66⅔, but of course some of the big fellows will want that extra two-third cents.

Arrangements are being made to give a banquet to Duncan Ross, M. P., on his return from Ottawa, This is in recognition of his services in the fight for railway competition. The banquet will be non-political in its character.

It is not yet definitely settled whether or not there will be a celebration here next month on the anniversary of the organization of Greenwood Miners' Union. The difficulty here is that there is no place in which sports can be held and an entrance fee charged. Without a good subscription from the business men of the city the union could not undertake the celebration.

Sulphur is used in the preparation of sulphuric acid, in the manufacture of gunpowder, in making friction matches, in vulcanizing rubber, as an insecticide, and in medicine as a laxative, and for certain skin diseases.

A Michigan company manufacturing fifty tons of charcoal iron a day formerly allowed the smoke made in burning the wood to go to waste. Now the smoke as it is formed is delivered into stills charged with lime and surrounded with cold water, the result of the condensation being first, acetate of lime; second, alcohol; third, tar; fourth, gas, which is consumed under the boilers. A thousand cords of wood are converted into charcoal daily, yielding 2,800,000 cubic feet of smoke, from which are obtained 12,000 pounds of acetate of lime, 200 gallons of alcohol and 25 pounds of tar.

The great basin of the United States is a triangular plateau, and includes the western part of Utah, quite the whole of Nevada, parts of Oregon and California, and extending into Idaho. On its west is the Sierra Nevada, and its east the east the Wasach mountains. The base of the triangle at the north is 500 miles from east to west, and the extent from north to south is 800 miles. The entire basin covers 210,000 square miles. The areas of greatest depression are nearest the borders and the highest elevation near the center. The highest mountain range is East Humboldt, one peak of which is over 11,000 feet in height. Volcanic rocks form or conceal the original rocks of many of these ranges. The slopes and the original markings show that the lakes and rivers that once existed within the basin have become smaller, and many have entirely disappeared. The basin contains yet many streams and lakes, the lakes peculiarly being salt for the most part, and the waters never reach the ocean, being absorbed by evaporation or sink into the desert sands. But from 4 to 15 inches of rain falls in the basin annually. The mineral wealth of the great basin is vast, and prospecting over its great extent is continually being carried on with splendid finds here and there.

One Dollar Saved Represents Ten Dollars Earned.

The average man does not save to exceed ten per cent of his earnings. He must spend nine dollars in living expenses for every dollar saved. That being the case he cannot be too careful about unnecessary expenses. Very often a few cents properly invested, like buying seeds for his garden, will save several dollars outlay later on. It is the same in buying Chamberlain's Colic, Cholera and Diarrhœa Remedy. It costs but a few cents, and a bottle of it in the house often saves a doctor's bill of several dollars. For sale by all druggists.

NOTICE OF FORFEITURE.

To Charles N. Collins, his heirs and administrators, or to any person or persons he may have transferred his interest in the Hard Cash mineral claim, situate on Wallace Mountain, West Fork Kettle River, in the Greenwood Mining Division of Yale District.

You are hereby notified that we have expended the sum of $500 for work on the above-mentioned claim and $12.50 for recording the same for assessment work for five years, such being required and necessary to hold said claim for the years ending the 2nd July, 1900, 1901, 1902, 1903 and 1904, under the provisions of the Mineral Act and Amending Acts, and if at the expiration of ninety days from the date of first publication of this notice in the Boundary Creek Times, you fail or refuse to contribute your portion of such expenditure together with all costs of advertising, your interest in the said mineral claim shall become invested in us, your co-owners, upon filing in the proper office in that behalf the affidavit required by section 4 of the "Mineral Act Amending Act, 1900."

Dated 9th June, 1905.

GEORGE M. MILLER
WILLIAM KINTZ.

NOTICE OF FORFEITURE.

To F. P. Ketchum or to any person or persons to whom he may have transfered his interest in the London mineral claim situate on Deadwood camp, in the Greenwood Mining Division of Yale District.

You are hereby notified that I have expended the sum of $100 for work on the above mentioned claims and $2.50 for recording the same for assessment work for one year, such being required and necessary to hold said claims for the year ending the 8th March, 1901 and 1905, under the provisions of the Mineral Act and Amending Acts and if at the expiration of ninety days from the date of first publication of this notice in the Boundary Creek Times, you fail or refuse to contribute your portion of such expenditure together with all costs of advertising, your interest in said mineral claim shall become invested in me, your co-owner, upon filing in the proper office in that behalf the affidavit required by section 4 of the "Mineral Act Amending Act, 1900."

Dated 1st June, 1905.

PRESS COMMENT.

Mining camps and the people in them who are given to bemoaning the dullness of the times, but who make no effort to strike out in new lines and so keep up with the best traditions of the West, must be content to drop down and out of the struggle for existence.—Prospector.

That Mr. Foster should take a pessimistic view of the affairs of Canada is what might reasonably be expected. Mr. Foster has been convinced that the Dominion is heading straight for bankruptcy ever since 1896. It was in that year, it will be remembered, that Mr. Foster ceased to be finance minister. But Canada has been doing pretty well since then, and will continue to go ahead even though Mr. Foster may be compelled to grace the opposition benches for some years to come.—Winnipeg Tribune.

Nearly one hundred Canadian families, with household goods valued at many thousands of dollars, passed through Windsor, Ont., bound for the United States during the past year. The loss of these people to Canada is serious, even if their places are being filled up by emigrants from other countries. We should try as hard to keep our people at home as we do to induce foreigners to come to Canada, for they are of our own kin and of more value in building up the Dominion than the hords of Molokins, Galicians and Doukhobors pouring into the West.—Victoria Times.

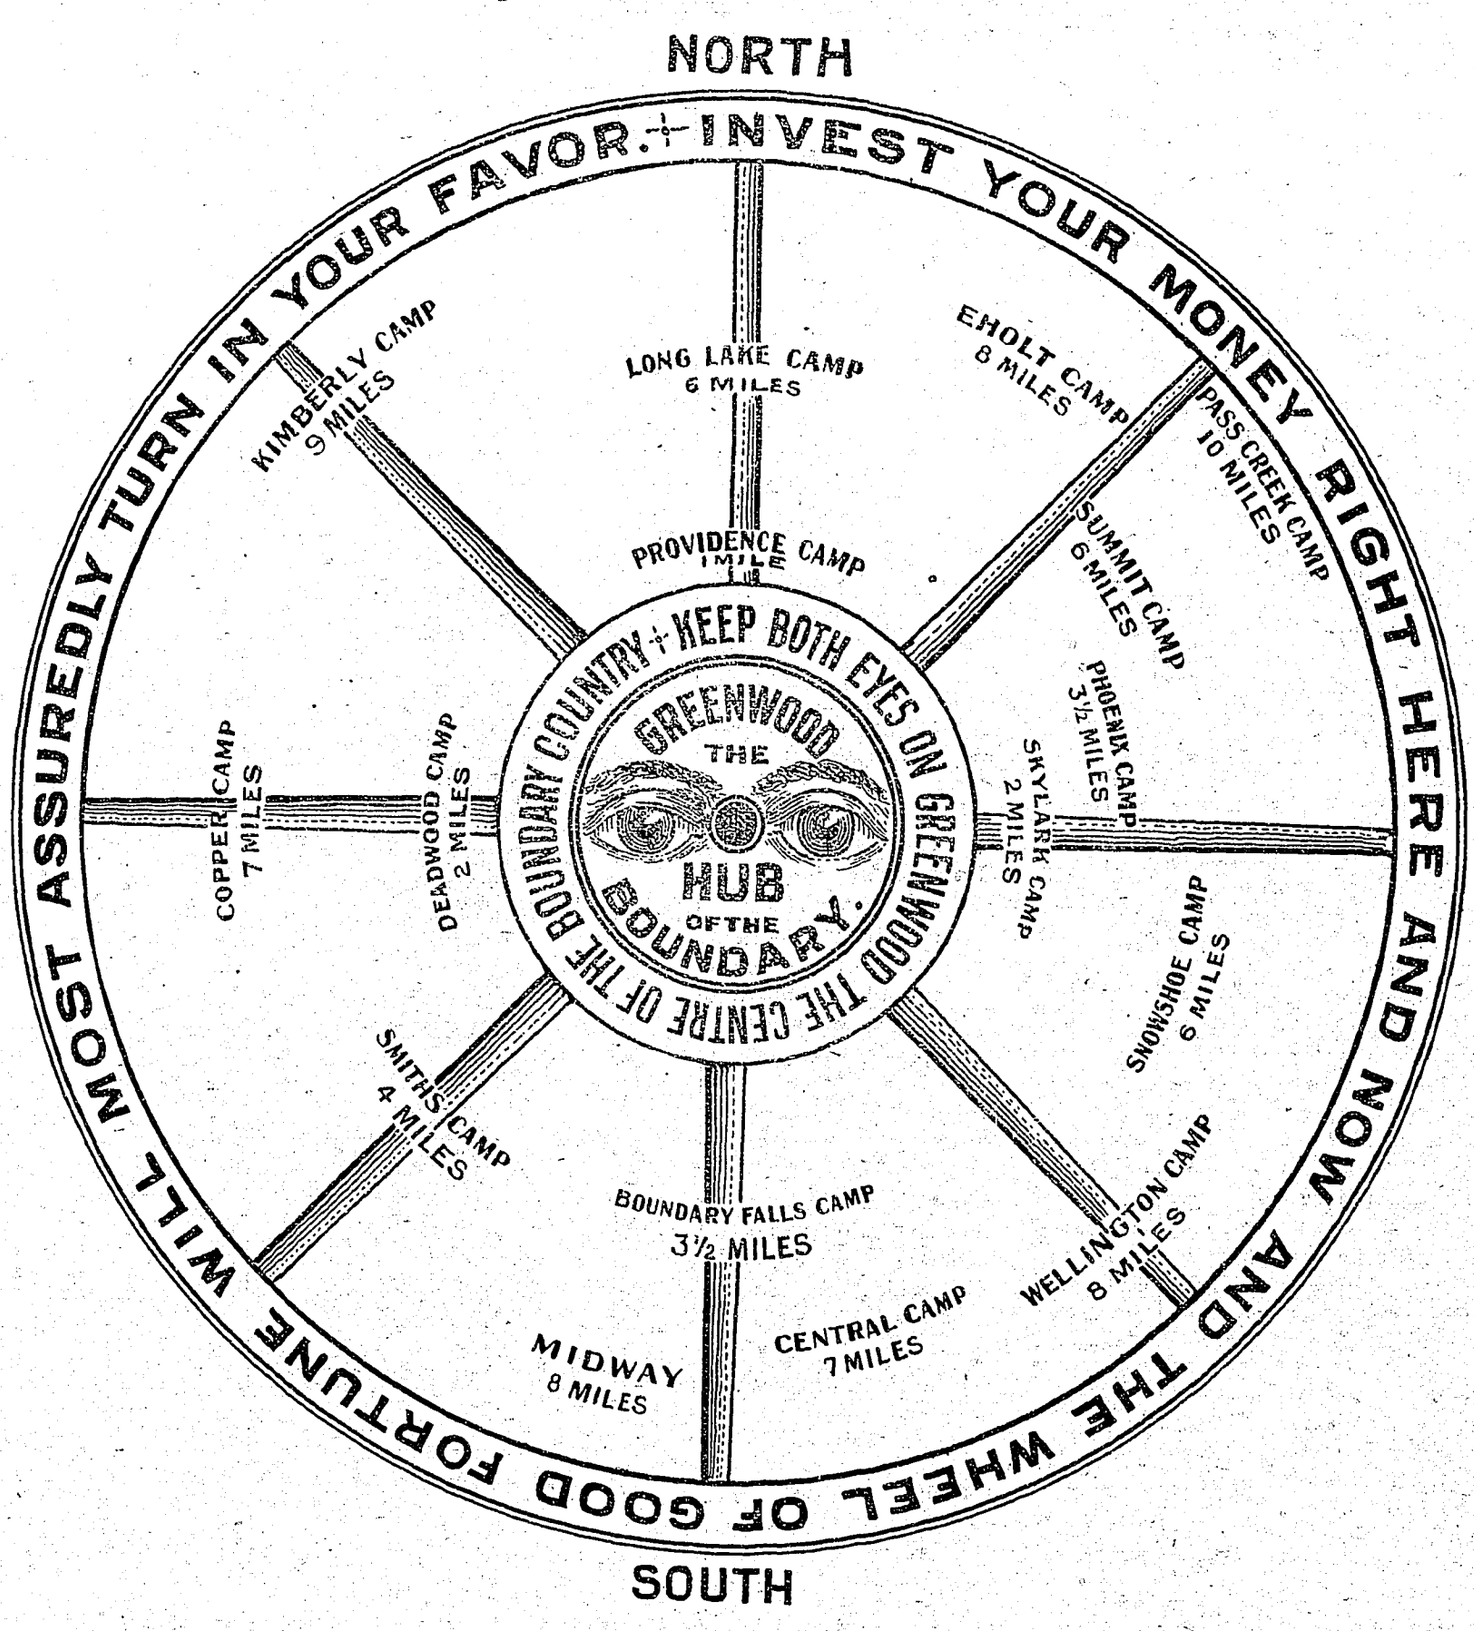
The new premium list of the Spokane Insterstate Fair will be out this week. It is much larger and more comprehensive this year than it has ever been before, and the prize lists and classifications have been thoroughly revised. Many new classes have also been added, and the management hope that all the changes will be found to be real improvements. This list is distributed as generally as possible by mail, and any one not receiving a copy within the next few days will be sent one on application to Robt. H. Cosgrove, No. 519 First avenue, Spokane, Wash.

American newspapers have a remarkable record of lawlessness to deal with. There are railroad companies prosecuted for illegal rate making, beef packers indicted for violations of the anti-trust laws, a United States senator convicted of crime in connection with land frauds, former postal officials sent to jail for participation in dishonest contracts, a judge on trial charged with cheating the government, and a great financial institution in the throes of reorganiza- after a career of reckless disregard of sacred obligations. It is not surprising that, in the midst of all this, trade union officials should be in trouble for extortion from employers.—Toronto Globe.

How potent and dangerous is the lobbying of the corporation lawysrs at Ottawa has been demonstrated in the narrow squeak with which the V., V, & E. railway bill escaped defeat. This is what is known as the Jim Hill road. It is anxious to build into British Columbia with its own money. This is, of course, a strange offer to make Canadians, to want to build a railway for the development of the country, without dipping the corporation hand deep into the public chest. The introduction of the road would necessarily disturb the C. P. R. monopoly in British Columbia, but even so, has it not been found a desirable thing for the country to disturb this monopoly in other provinces. The whole of the Conservative party, with the exception of one member, allowed itself to be lobbied into a position of opposition to this bill and in favor of monopoly. Every trick was resorted to defeat the bill.—Winnipeg Voice.

On the subject of the court reporting difficulty, referred to in these columns the other day, a correspondent suggests that barristers and witnesses might speak into phonograph receivers and that the typewriting might be done from these instruments. This would render the court reporter unnecessary. But the phonograph has been tried and without success. The trouble with it is that it takes too much when it works all right, but that it will not work unless the speaker is close to it and there is absolute silence. In the transcription of the language which ought to be "cleaned up" as the report is taken is mixed, and hard to put in good shape. It must not be forgotten that the work of the stenographer does not consist merely of taking down everything that is said, but of putting everything that is said into such a shape that it can be understood.—Mail and Empire.

No Time Equal to the Present



Never in the history of the Boundary has the district had a brighter outlook than today. With the successful development of the immense large bodies of low grade ore and the enlarged and much improved facilities for treating at a very small cost, the continued opening up of new high grade properties and their successful and profitabl operation has made the Boundary famous as a mining centre, and every day adds more to the list of new finds and bigger values. It is readily admitted that Greenwood is the Eldorado of the Boundary with all roads leading thereto, and surrounded as it is, with such magnificent resources is destined in a few years to be a second Butte. If you therefore want to participate in its future prosperity, now is the time to invest both in mines and real estate. For **NINETY DAYS** we intend giving you a chance to make a safe and profitable investment. Every lot we own will be put on sale at rock bottom prices during the above period. Prices ranging from $50.00 up, at terms to suit the purchaser. Make your selection and make it early.

RALPH SMAILES,

AGENT FOR THE GREENWOOD TOWNSITE COMPANY.

It is rumored from Rome that the pope will leave the Vatican for a cooler resort during the hot weather. The rumor would not be important were it not that no pope has left the Vatican since the papacy was deprived of its temporal power years ago. By consistently remaining a "prisoner of the Vatican," Leo XIII, like Pius IX, maintained a constant protest against the act of the Kingdom of Italy in taking over the papal states. If Pius X goes to a more salubrius summer resort than the Vatican gardens, he will tacitly abandon the line of policy followed by his predecessors. Some such action on his part, in acknowledgement of irrevocable facts as they exist in Italy, has been anticipated ever since his election as pope, and the expectation has been strengthened by the new attitude of the papacy that was manifested during the recent parliamentary elections in Italy.—Winnipeg Free Press,

Apropos of machine work in politics, the premier and his stoker, Hon. R. F. Green, appear to be keeping their hands very effectively upon the lever in the constituency of Alberni. We doubt whether anyone knows with certainty when the election will be brought off in the western constituency. In the meantime arrangements are being made for the transportation of those essentials of Toryism called "pluggers" to the points where there will be least possibility of detection. The two trained workers of the government, the premier and his right-hand man, the chief commissioner, are diligently engaged in smoothing the way for the polling of bogus votes. However, the opposition has been furnished with a copy of the plan of campaign, and there is a possibility of a flank movement being developed. As politicians the hon. the premier and the most hon. the chief commissioner are intensely practical in their methods. They are in charge of a highly organized machine? but there is alalways a chance of the aforesaid machine slipping a cog or two.—Victoria Times.

Auctioneering the reputation of a professional man may not be conducive to the best interests of the mineral industry; nor will matching the veracity of experts with contrary views establish indisputable evidence of the intrinsic worth of a mine. To the reputable engineer a challenge to prove an error of judgment of a professional colleague is often an unpleasant task, and there are records available to show that even an "auditor expert" may err, particularly when estimating the value of ore in a mine. What jeopardizes the career of a mining company more perhaps is the peculiar managerial policy of directors, whose heart throbs are the speculative counters. Until the gambling office holders repent, shareholders need not look for the salvation of their company. Another iniquity of the promoter-president or director is his proclivity to organize heavily capitalized subsidiary companies by dividing land which he acquired in one or more concessions. What may be expected from such prodigality is now being ventilated by the daily press in the case of a well-known Mexican gold mine.—Mining World.

MORE PROMOTIONS.

Fox & Ross, stock brokers of Toronto are running the following advertisement in Eastern newspapers:

COPPER GOLD MINES.

A. F. Hogue, mining engineer, formerly manager of the Great Broken Hill mines of Australia, from which hundreds of million pounds sterling were taken by its fortunate English shareholders, reports: The showing on the King Edward mines in Boundary district (about 8 miles from the Granby Mines, the Mother Lode shipping about twenty thousand tons weekly) is almost an exact counterpart of the Broken Hill Mines of Australia.

Send for full report, etc.

First offering of Pooled Promotion Syndicate Shares 3 cents per share.

Fox & Ross,
Stock Brokers, Toronto, Ont.
(Established 1887.)

It is about on a par with the exaggerated statements by means of which unscrupulous promoters have induced investors to place their money on wildcat schemes and ultimately anathematize British Columbia. Without expressing any opinion on the value of King Edward Mines, we would point out that if it has to be discounted as much as the statement that "the Mother Lode mine is shipping about twenty thousand tons weekly, it cannot be worth much. From the official returns we find that the total shipments of the Mother Lode from commencement to date have been as follows: 1900, 5,340 tons; 1901 99,034 tons; 1902, 141,326 tons; 1903, 138,079 tons; 1904, 174,298 tons; and 1905 to the 30th of June, 89,948 tons—a total of 648,025 tons in six years. Leaving out 1900, when the tonnage was nominal, this gives an average of 2,770 tons weekly; or, taking the present year alone, 3,460—about one-sixth of the figure named by Fox & Ross. As a matter of fact, the celebrated Granby Mines are only shipping 12,000 tons a week. These methods of securing investors' money make Lawson's "Frenzied Finance" look cheap.—Nelson Tribune.

THE WATERWORKS

Extension Is Now Nearing Completion.

THE PIPE IS ALL LAID

Reservoir Will Be Completed by the First of August—Supply of Pure Water.

In a few days the laying of pipe for the waterworks extension will have been completed, and it is expected the reservoir on Lind creek will be ready to receive water by the first of August.

When the system is completed it will be one of the best in the province, taking into consideration the number of people to be served. For domestic purposes the water of Lind creek will be used altogether, and the old system will not be used except in case of a break in the new or an extensive fire. The exhaust or outlet will be at the old reservoir on Twin creek, as the reservoir for the new system is so much higher than that of the old. In case of shortage of supply of water from any cause, the shortage will be supplied automatically from Twin creek, so there will be sufficient water at all times for fire protection.

The new reservoir is 60x50x12 feet, and is built of masonry. From the reservoir to Anaconda there are 3,100 feet of 8-inch pipe. To supply Anaconda there are 800 feet of 4-inch and 2,200 feet of 2-inch pipe. From Anaconda to connect with the old system 4,100 feet of 6 inch pipe have been laid. The hydrant pressure will be 100 lbs., using five streams. This insures sufficient force for fire protection in both Anaconda and Greenwood.

The system will be extended along Silver and Summit streets, and it is the intention in the near future to continue it north to the end of Copper street.

Ever since the old system was put in there has been more or less agitation for purer water for domestic purposes, and this year the city entered into an agreement with the property owners of Anaconda in return for water rights on Lind creek to to put in a system for that place. Greenwood's part of the bargain was: To provide and lay a 4-inch main along Second street from Everett to Tacoma avenues; 1-inch main along Tacoma avenue from Second to Fifth; 2-inch main along Fifth from Tacoma to Denver; 4-inch main on Denver from Fifth to Sixth; 4-inch main on Sixth from Denver to Everett; 2-inch on Butte from Second to Sixth; also install three fire hydrants; install key hydrants for domestic purposes at points along the above pipe lines where there are at least three applicants for same not otherwise served; will connect said water system with the Greenwood system and will allow the residents of Anaconda the use of the water free of charge for the term of one year from the date the water is turned on in the system. Greenwood fire brigade will respond to all fire alarms from Anaconda, which will pay Greenwood $5 for each turnout and other actual expenses involved in said turnout.

That in the event of any of the existing pipe lines in Anaconda being available for distribution purposes, and being found in good condition and protected from frost, that Greenwood will take over said pipe lines and allow the cost of same on account of water rates, after the period of free water shall have elapsed; and that the rates thereafter shall be the same as in Greenwood: to extend the proposed system to supply future consumers and those not directly served by the proposed work, whenever the applying consumers shall in revenue provide for ten per cent and sinking fund on the cost of the required extension; that the cost of water from a key hydrant, after one year, shall be 50 cents per month to each consumer.

THE WASTE DUMP.

Three simple minerals comprise granite, feldspar, quartz and mica.

Mexican dollars are redeemable at the customs houses in the United States at the rate of 49.8 cents in American money.

Russia imported last year 3,106,901 long tons of coal and 574,147 tons of coke, both showing a substantial increase as compared with 1903.

The iron age refers in archaeology, an age, the third in succession, in which weapons and many other implements began to be made of iron, stone having been used in the first and bronze in the second age for these purposes.

The Canadian government allows a bounty of $5.50 a ton on steel rails made at home; this added to the import duty of $7 per ton, gives the domestic manufacturer an advantage of no less than $12.50 per ton over the Americans.

Toilet papers—special price in quantities—at Smith & McRae's

Asbestos can hardly be classed as a pigment, although when used as a filler its white color lightens the color of the material to which it is added. The chief use of asbestos in plant manufacture is to yield a so-called, non-inflammable fireproof paint. The fibrous varieties of talc are also used for this purpose. Only a small proportion of the total production of asbestos in the United States is utilized in paint manufacture.

CHOLERA INFANTUM.

Child Not Expected to Live from One Hour to Another, but Cured by Chamberlain's Colic, Cholera and Diarrhoea Remedy.

Ruth, the little daughter of E. N. Dewey of Agnewville, Va., was seriously ill of cholera infantum last summer. "We gave her up and did not expect her to live from one hour to another," he says. "I happened to think of Chamberlain's Colic, Cholera and Diarrhœa Remedy and got a bottle of it from the store. In five hours I saw change for the better. We kept on giving it and before she had taken the half of one small bottle she was well." This remedy is for sale by all druggists.

TOWN TOPICS

Mrs. S. Oliver is visiting in Nelson this week.

D. H. Holbrook of Chesaw was in the city Saturday.

Pat Welch, the railway contractor, passed through the city Saturday.

Government Agent McMynn is expected home from Scotland next week.

Mrs. S. Stingley, who has been visiting friends here for some time, left for the coast Friday.—Trail Creek News.

Licenses were renewed by all the hotels in the city last Saturday, with the exception of the Clarendon, which dropped out of the game,

The B. C. Telephone company's force of workmen engaged in rebuilding the line have reached Grand Forks.

W. J. Snodgrass of Okanagan Falls was in the city this week. Mr. Snodgrass says that the settlement of the Ellis ranch has not been as rapid as expected.

L. S. Moulton-Barrett, who was taken to New Westminster some time ago, is now in England under charge of a specialist, and is reported as recovering.

W. A. Harkin, who for years was press correspondent in the Boundary, with headquarters at Grand Forks, has accepted a position on the Vancouver Province.

George Barber, who has been in charge of the Greenwood freight sheds for the past five years, left last week for a trip to the old home in England. He will be gone about three months.

Inspector Lawry of the insurance companies, has notified City Engineer Johnson that he will visit Greenwood next month and inspect the city's fire protection appliances, and the new waterworks.

Midway is to have a newspaper. It is said that Gus Evans of the Grand Forks Sun will publish a newspaper there in addition to the one he already publishes. This looks very much like the thin edge of a monopoly.

Dr. and Mrs. Mathison returned the past week from a two months' trip in the Similkameen and Okanagan districts. The doctor reports a pleasant time and a successful professional trip in the garden spotes of the Interior.

J. Peck MacSwain is at present in the Upper Okanagan. It is nearly time to come home, Peck. The Boundary is about ripe for a financial disturbance, if all the railways promotions talked of start construction work.

Judge Leamy is still very low, but was reported to be slightly better yesterday. His eldest son arrived home last Saturday from St. Catharines, Ont., where he is employed in a large electrical establishment.—Grand Forks Sun.

Duncan Ross, M. P., is expected to arrive home about the end of the present month, when this paper will no doubt regain its political equilibrium. In the meantime, "don't shoot, the performer is doing his best," but don't care very much whether others are satisfied or not.

Geo. Johnson, of Nanaimo, grand chancellor of the Knights of Pythias of British Columbia, visited Greenwood lodge Wednesday evening After lodge meeting a banquet was served in the anteroom and a number of speeches made. The grand chancellor reports the order, with one exception, in a flourishing condition in every town visited. On the trip he attended the grand lodge of the Northwest territories, held at Calgary. He left yesterday for New Denver.

The mineral department has a prominent location in the new 1905 Spokane Interstate fair premium list. Diplomas are offered for all displays meriting them, and a handsome silver cup will be given to the camp sending in the best general exhibit. Further particulars in regard to this department may be had from the secretary at Spokane.

Mrs. D. Whiteside, who has been spending a couple of woeks at the coast, is at present the guest of Mr. W. J. Whiteside. Mrs. Whiteside is charmed to be back again in the Royal City and to renew old acquaintances. Her stay, however, will be short as, in company with a cousin from Toronto, she will visit Victoria and the Portland fair and return at their leisure to Greenwood.—Westminster Columbian.

Wednesday evening last D. McVicar was ordained an elder of the Presbyterian church here. The ordination service was conducted by Rev. D. McKee, the minister, and the sermon preached by Rev. H. S. Hastings, pastor of the Methodist church.

W. G. Gaunce will go from Nelson to Seattle as soon as the Providence case is over, to attend the wedding of his daughter on Tuesday morning, 26th inst. The wedding is to be strictly private, owing to Miss Gaunce's recent illness. Mr. Gaunce expects to bring Mrs Gaunce back to Greenwood with him for permanent residence. Mrs. and Miss Gaunce made many friends in Greenwood last summer who will be pleased to have the former a resident of the town, and who will heartily join in wishes for the bride's future happiness.

Judging from the correspondence sent to outside papers one would conclude that there had been a strike at the Greenwood smelter last week. It is well known that a strike cannot occur without the sanction of the union under the jurisdiction of which the work is being done. It is also well known that one, or two, or a dozen men have the right to quit work if they choose, and the employer has the right to discharge one, two, or a dozen mem. This is a general custom recognized by both employer and union. On account of a new head feeder being employed at the smelter last week, a number of the men quit, holding that the man in line of promotion should have got the position. This the men had a right to do, so also had the company the undoubled right to place the man in the position whom they think would best serve their interests. These are the facts. There was no question of a strike, no dispute between the union and the company. It was simply a matter that comes up daily between employer and employee all over the world—accepting or rejecting work; employing or discharging help.

Toilet papers—special price in quantities—at Smith & McRae's

Buy It Now.

Now is the time to buy Chamberlain's Colic, Cholera and Diarrhœa Remedy. It is certain to be needed sooner or later and when that time comes you will need it badly—you will need it quickly. Buy it now. It may save life. For sale by all druggists.

For the Man Who Shaves Himself

The great secret of a good shave is having your razor in good condition. And you cannot get the edge right without careful stropping on a good stop. Any leather makes a razor strop, but to make a good one, requires the right kind of leather and the knowing how. We want you to see the lot of strops just in at our stores, We believe they are the finest ever shown here, and we would like you to have a look, and take a feel at them. If you need a strop you'll buy one. If you don't need one it will help convince you of the superior quality of the goods we handle.

Thomas Drug Co. Ltd.
