GREENWOOD.

NEW POWER STATION

Boundary Falls Plant Will Be Up-to-Date.

GREENWOOD SUBSTATION

Distributing Plant Will Also Be Constructed.—Rock Work Progressing.—Expensive Machinery.

When the new power plant of the Greenwood Electric company at Boundary Falls has been completed Greenwood's busy suburb will have one of the most up-to-date power producing stations in the country. In construction and equipment every precaution is being taken by the company to provide efficiency combined with simplicity and economy of maintanence. Many will remember that some years ago a power plant was projected by Robert Wood and C. Scott Galloway, and that considerable construction work was done at that time. A dam was built some 300 feet above the falls and a shelf was blasted out on the face of the cliff directly over the falls and some trestle work constructed to carry the pipe line. Part of this work will be utilized by the new promoters. The old dam, which is still in a perfectly solid condition, will be raised six feet higher to increase the storage capacity of the reservoir by several million gallons.

From the dam a thirty-inch wood stave pipe line will carry the water 1,450 feet to the power plant, 1,150 feet below the falls. The intake of the pipe line will be at the top of the present dam, so that when the work is finally completed there will be a body of water six feet deep above the pipe, supplying a powerful stream of water to the power plant below. The line will be carried along the edge of the cliff on the shelf of rock already blasted out and will follow the contour of the hill side without passing over the old trestle. After covering about half the distance it passes over the top of the hills and follows a straight line down to the power plant. From the power house a stand pipe will be run up the side of the hill and connected with a reservoir which will be constructed on a level with the top of the dam after it has been raised the necessary six feet. The object of the stand pipe and reservoir is to regulate the water power and to safeguard against accidents.

The power house will be 26x40, constructed of brick on strong foundations. The initial equipment will consist of one generator of 1500 K. W. (2000 horse power) three phase, producing 4,400 volts. This will be directly connected to a 200-horse power impulse water wheel, regulated by a needle nozzle. The governor, a most important part of the machinery, will be manufactured by the Lombard Governor Co. of Ashland, Mass., and will be known as the Lombard governer, recognized as one of the very best available today. This piece of machinery, which is small compared with some of the largest parts, will cost over $1,000. The power house is designed to allow for the instalation of more machinery when this becomes necessary.

At present Alex Robinson, who has the contract for rock work, has several men at work preparing for the laying of the pipe line and the construction of the dam. Considerable rock will have to be blasted out and some deep gulleys filled up. The work, including the building of the power house, will occupy the entire summer, but the company expects to have everything completed by the autumn.

From the power plant at Boundary Falls the power will be conducted along overhead wires to a sub-station, to be constrncted on the hillside by the Phoenix road. This will be equipped with three 75 K. W. transformers. These will transform the current from 4,400 volts to 2,200 volts. A swith board will distribute the power to light and power systems of the city. Before the new system has been completed the company will make several necessary changes in the present line equipment in the city.

ACTIVITY AT MIDWAY

Rails and bridge timbers have arrived in large quantities, and we understand that no time will be lost in preparing the grade to receive the track. This will be no light undertaking, as there is considerable trestle work between here and Molson.

The trouble which arose when a number of Italians were paid off, seems to have had but little effect on the work as the booming of shots continue as before.

Messrs. Porter & Stewart have taken up their headquarters in Midway, having opened an office in the Riverside addition. This firm has the contract for the bridge work.

A number of heavy bridge castings are piled up in the yard, indicating preparations for a bridge of considerable proportions. Whether they are destined for the bridge over the river at this point, or whether they are intended for use at some point further west, has not yet leaked out.

Twenty-five car loads of steel from the Sault arrived in Midway last week, and tracklaying from Midway to Keremeos will proceed at once. It is expected that a mile a day will be made and Keremoes reached this fall.—Midway Star.

Men's Women's and Children's Summer Shoes in tan, white and black. No better value in town. Try us. Galloway Bros. 37-38

THE HEART OF THE HILLS.

There's a wonderful country lying
Far off from the noisy town,
Where the wind flower swings,
And the song-bird sings,
And the tumbling brooks came down—
'Tis a land of light and of laughter,
Where peace all the woodland fills:
'Tis the land that lies
'Neath the summer skies,
In the heart of the happy hill.

The road to that wonderful country
Leads out from the gates of care:
And the tired feet
In the dusty street
Are longing to enter there:
And a voice from that land is calling,
In the rush of a thousand rills,—
"Come away, away,
To the woods to-day,
To the heart of the happy hills."

Far away in that wonderful country,
Where the skies have deepest hue,
In the shadows cool,
By the foaming pool,
We may put on strength anew;
We may drink from the magic fountains
Where the wine of life distils:
And never a care
Shall find us there,
In the heart of the happy hills.

—Boston Transcript.

LOST—On Monday, on Copper street, a Waltham, nickel case watch. Reward if returned to O. Lofstad, Ladysmith hotel. 37

STRIKE AT ELKHORN

Good Vein at the 260 Foot Level.

A VERY PROMISING MINE

Will Probably Rank With the Best in the Boundary.—Development Work Is Continuing.

The Elkhorn mine is also sharing in the good fortune that is smiling upon the high grade mines of Greenwood. Last week there were good things to say of the Providence, and this week a sort of "to be continued" good luck story tells pleasant things about the Elkhorn. Early this week a lucky shot at the 260 foot level revealed a strong vein of high grade ore, eight inches wide, and Elkhorn stock immediately climbed a little nearer the dollar mark. The ore that has just been opened up not only maintains the high standard of the mine, but it gives the owners every encouragement to look forward to still greater things in the future. The shaft, which is now nearing the 270 foot level, will be continued to the 300 foot level before any crosscutting or stoping is commenced. The owners are determined to vigorously push the development work, and after the 300 foot level has been reached drifts will be opened and ore will be taken out for shipment. This work will probably commence during the latter part of June.

A PROMISING MINE.

The Elkhorn has long been considered one of the most promising mines in the vicinity of Greenwood and some of the leading business men of Greenwood have staked their interest in it. Among others interested are Dr. J. E. Spankie, E. G. Warren, R. P. Williams, G. B. Taylor, H. V. Fuller, James Sutherland and Phil McDonald.

Prior to the time when the present owners took possession of the mine, the Elkhorn was worked by James Sutherland and Phil McDonald. A shaft was sunk 142 feet, while two levels were run north and south, one at the 85 foot level and the other at the 142 foot level. Ore was followed for over 300 feet on both levels and $76,000 worth of ore was taken out and treated at the Trail smelter.

The Elkhorn ore is high grade in silver and gold. A shipment made early in January averaged $100 per ton and the new ore will maintain this grade, if not exceed it, running possibly to $125 per ton.

BEATS THE PROVIDENCE.

The high grade mines situated to the north of the city all take their standing, more or less, from the Providence, the one mine above all others that has proven the value of the Greenwood high grade properties. It is interesting, therefore, to note that the Elkhorn ore has exceeded that of the Providence in value and quantity at equal depths. As the Providence reached greater depths the richness and strength of the veins increased, and so have those in the Elkhorn, and with the encouragement which the last find has given it is reasonable to expect that lower levels will continue to produce higher values. The present outlook at the Elkhorn is bright and promising, and in a month or six weeks it will probably be added to the Greenwood shipping list.

Your furniture cleaned and varnished. Thompson & Rowston, decorators

GRANBY ENLARGING

The enlargement of No. 1 furnace at the Granby smelter was completed last week and it was blown in on Wednesday. The work has been done both economically and expeditiously, the furnace only being out of commission for three weeks. It is the intention of the managemen to test No. 1 thoroughly before commencing the enlargement of the other furnaces of the smaller type. It is probable that she will smelt in the neighborhood of 500 tons per day and possibly somewhat better.

RENDELL & CO.

Our Prices Sell The Goods

OUR stock of staple and fancy dry goods for spring and summer is now complete, and we venture to say that it is the largest and most comprehensive ever shown in Greenwood.

IN Embroidered Lawn and Linen Waists we are particularly strong, all the latest styles and designs shown. In Silk Waists we are showing some extra nice values.

OUR Ready-to-wear department is very complete, our assortment of Mohair and Tweed skirts is particularly attractive.

IN Children's goods we have a nice range, some extra good values in Sailor and Buster Brown dresses. Come in, examine and be convinced.

A very dainty showing of Embroided Lawn and Linen Waists, long and short sleeves. From $1.50 to $5.00.

A very fine range of white and cream wash Silk Waists. Great values from $3.50 to $5 Ladies fancy and white Sunshades. We have a very large assortment from $1.50 to $5.00.

Our stock of Mohair Skirts is large, all styles and prices from $3.50 to $6.00

A nice line of children's dresses, Sailor and Buster Brown styles in Print, Gingham and chambray, from 45 cts to $1

We have a particularly fine range of children's sunshades, from 35 cts to 1.50

RENDELL & CO.

ASSIZE COURT MEETS

Important Cases Argued Before Judge.

THE WATER RIGHT CASE

His Lordship Reserves Decision.--Copper Company Writ Amended.—Mineral Cases Dismissed.

At the court of assize, held in Greenwood this week, the following grand jury was summoned to serve:

Edwin Warren Bishop, Charles Scott Galloway, William H. Jeffrey, Fred B. McLaine, James M. Paton, Herbert F. Stow, Edward C. Warren and Geo. Hugh Wood, of Greenwood; Martin Burrell, G. H. Fripp, Neil McCallum and William Spier, of Grand Forks; John R. Jackson, Midway.

After viewing the public buildings of the city such as the court house, school house and hospital, they brought in the following presentment to presiding Judge Morrison:

May it please your worship, the grand jury desire to extend to you a cordial welcome upon this, your initial visit to this district.

We have inspected the goal, court house, school house and the hospital, conducted by the Sisters of St. Joseph of Peace, and found same to be all in most excellent condition.

We congratulate your Lordship on the paucity of criminal cases to come before you, but desire to respectfully draw your attention to the necessity for more police protection at Midway and other international points, as owing to the proximity of the International Boundary line several cases of shooting, hold-ups, etc., have remained unpunished.

We trust your Lordship's stay in the Boundary may be a pleasant one and that you may have an opportunity of seeing the wonderful mineral resources which are responsible for the development and progress of this section of the province.

C. SCOTT GALLOWAY,
Foreman.

The petit jury included the following:

Edward B. Dill, Robert Donagin, James I. Feeny, Frank Janes, Edward H. Mortimer, Norman Morrison, William McBride, James D. McCreath John H. McFarlane, John W. Nelson, Sidney Oliver, T. Stuart Palmer, Thomas H. Patterson, Dan Steward, Frank Spearing, Wm. T. Smith, Isaac Skidmore, George Swayne, George H. Thompson, Samuel Webb, William C. Wilson and George Wellwood, of Greenwood; William S. Graham, Hugh Murray, Matt Maloney, Peter G. Smith, Joseph Wilmshurst and John Williamson, of Anaconda; John Mulligan, of Phoenix; P. T. McCallum, of Grand Forks.

THE CASES.

The first criminal case was that of King vs. Lofstad, committed on a charge of shooting. The grand jury found no bill and the case was dismissed. The other criminal case was King vs. Andrews. George Andrews was charged by the V., V. & E. railway with obtaining money under false pretenses last August. Only one witness, K. G. Hankinson, of Midway, was called by the crown. The case first came up on Monday, but was not proceeded with, as it was desired that A. E. Baldwin of the V., V. & E. survey party now working in the Hope mountains, be brought to Greenwood. After waiting four days, and finding that it was impossible to get Mr. Baldwin, the parties consented to proceed with the case. After the evidence had been taken the judge reviewed the case and charged the jury strongly in favor of the accused, and the jury gave a verdict of not guilty without leaving their places. Earnest Miller for the crown, J. P. McLeod for the defendant.

The civil case of Worden vs. Worden, to have defendant declared trustee for plaintiff of a certain farm near Sidley and for alimony, was settled out of court. A. M. Whiteside for plaintiff, J. R. Brown for defendant.

THE WATER RIGHT CASE.

The most important civil case was that of W. H. Covert and the Eastern Townships bank vs. Lenord Vaughan McInnis and the B. C. Trust Co. S. S. Taylor and H. C. Hannington for plaintiff, J. A. MacDonald and David Whiteside for defendants.

The claim was for a declaration of priority of record over some 300 inches of water in Fourth of July creek. Both Covert and Vaughan are pioneer farmers in the Grand Forks district. Covert came into the district in 1885. In 1887 he applied for a water grant, but by some mistake this was not issued until 1889. In the meantime Vaughan applied for and secured a grant over the same water in 1888. These circumstances tended to seriously complicate matters and a worse condition of affairs was brought about by Vaughan and his partner, McInnis, abandoning their preemption claims, thus impairing their water rights. Covert and Vaughan are both owners of valuable property. On the former's ranch are planted some 11,000 fruit trees, and on the latter are some 400 trees. The case is an important one and Judge Morrison has reserved decision for the present, desiring to give it careful consideration before rendering final judgment.

OTHER CASES.

In the case of the Dominion Copper Co. vs. Athlestan Gold and Copper Co, A. M. Whiteside, counsel for the plaintiffs, asked liberty to amend writ of summons and also for a mandamus compelling defendants to establish a registered office in the province under the Companies' act and to register stock thereunder. The court gave an order to amend the writ, but the mandamus was deferred.

In the case of H. J. Cole vs. Nicholas Kuhman, Richard McCulloch and H. H. Shellenberger, an order was granted dismissing action and removing adverse filed against title in mining recorder's office of the Yellowstone Fractional and the Crescent Fractional mineral claims. J. R. Brown for plaintiff, I. H. Hallett for defendants.

The court closed its labors Thursday morning when the Andrews case was settled as stated above.

C. P. R. SUMMER EXCURSIONS.

The Canadian Pacific has placed on sale at all Kootenay points a series of low rate excursion tickets to various eastern points. The following rates apply from Rossland, Trail, Nelson and common points to New Haven, Conn., where the meeting of Knights of Columbus will be held, namely: $83.60, selling dates May 24, 25, 26; Winnipeg, Pt. Arthur, Fort William, Duluth, St. Paul, Minneapolis, $52.50; Omaha, $85.68; Kansas City, $58.25; St. Louis, $60; Chicago, $64, on sale June 4, 6, 7, 23, 25, July 2, 3, August 7, 8, 9, September 6, 10. On same dates through excursion rates will be quoted to all points in Ontario, Quebec, Maritime Provinces, New York and New England. Tickets are first-class, bear 90 days limit for return, and are subject to usual variations of route and are also good in one or both directions via the Great Lakes including meals and berths on lake steamers.—Adv.

It Is Dangerous to Neglect a Cold.

How often do we hear it it remarked: 'It's only a cold," and a few days later learn that the man is on his back with pneumonia. This is of such common occurrence that a cold, however slight, should not be disdisregarded. Chamberlain's Chough Remedy counteracts any tendency of a cold to result in pneumonia, and has gained its great popularity and extensive sale by its prompt cures of this most common ailment. It always cures and is pleasant to take. For sale by All Druggists.

MONEY FROM CHICAGO

W. A. Nicholson, the unfortunate miner who lost both his eyes in an explosion at the Providence mine, was the recipient this week of a present of $60 from the Chicago members of the Providence Mining company,

Those who contributed were: Mark F. Madden, president of the company, $25; J. B. Henney, $20; J. B. O'Donnell, $10; E. J. Fox, $5.

Sore Nipples.

A cure may be effected by applying Chamberlain's Salve as soon as the child is done nursing. Wipe it off with a soft cloth before allowing the child to nurse. Many trained nurses use this salve with the best result. Price 25 cents per box. Sold by All Druggists.

IMPROVED SLAG CARS

A new and interesting type of slag car has recently been designed by the Power and Machinery company of Cudahy, Wisconsin. Some idea as to its size can be gained from the over-all dimensions, which are fifteen feet long and six and one-half feet high. Each car weighs 27,000 pounds, empty, or 47,000 pounds when filled with slag. The bowl is made in five sections, the bottom being made in one piece with four quarters forming to top. This allows of any worn or broken part be ing easily replaced. These sections are securely bolted together and tied to a steel supporting ring by key bolts. The supporting ring is securely riveted to the pinion-toothed trunnions which roll on a racked track. The pinion and the track are both made open between the teeth to prevent their being clogged by any slag which might be spilled into them. The trunnions are rolled by means of a sleeve which is operated through a lever by a 12-inch compressed air cylinder. This cylinder is designed to operate on sixty pounds air pressure and to tilt and hold the pot in any desired position. The air valve for this cylinder is a simple four-way cock conveniently operated from the side of the car. All the levers and other operating parts are made of steel to reduce the weight of the machine without sacrificing strength. A hand wheel and screw is also provided so that the bowl can be dumped by hand, should the air supply fail from any cause. When tilted to the extreme position, the side of the bowl makes an angle of 50 degrees with the vertical so as to readily allow the slag skull to slide out. The bowl in dumping is carried to the side of the car by the rolling of the trunnions, so as to dump outside of the rail. An apron in the middle of the truck prevents any drippings from falling on the track.

The entire body of the car is carried on eight powerful springs placed under the front and rear supporting frames and resting on the main bearing boxes. A large factor of safety was used in the design of all the parts of this machine because of the rough usage to which it is put. Special pains were also taken to make it as simple as possible to operate for the men usually employed for such labor. Slag cars of this design are made in various sizes up to fifteen tons in capacity, and with or without the air cylinder.

A BOY WITH A FUTURE

Henry Morgan, the office boy to a large manufacturing company, was a smart youngster, and one day when he was sent to one of the operating departments with a message he noticed at once that something was wrong with the machinery. He gave the alarm and thus prevented much damage.

The matter was reported to the head of the firm, who summoned Henry.

"You have done me a very great service, my boy," said the genial chief. "Your wages will be increased by one dollar weekly."

"Thank you, sir," said Henry. "I will do my best to be worth it."

The reply struck the chief almost as much as the boy's previous service had done.

"That's the right spirit," he said. "In all the years I have been in business no one has ever thanked me in that way. I will make the increase two dollars. Now, what do you say to that?"

"Well, sir," answered Henry, after a moment's hesitation, "would you mind if I said it again?"

THE SENATE

Sir Wilfrid Laurier made rather an important speech last week in discussing a resolution which had been introduced in favor of Senate reform. The resolution was moved by Mr. McIntyre of Perth, who advocated the substitution of fifteen year appointments for life tenure and compulsory retirement at 80 years of age. Sir Wilfrid expressed a personal leaning toward the American system of nomination by legislatures and suggested that the subject might properly engage the attention of the conference of Provincial Premiers which will be held this year. * * * Mr. W. F. Maclean introduced a motion to rescind the sessional indemnity and pension legislation of last session. The trend of opinion in the house seems to be in favor of retaining the indemnity, though the pension arrangement may be modified.

INTERNATIONAL WATERWAYS.

The International Waterways commission appointed by the governments of the United States and Canada, presented an interim report of their conclusions recently. The report as presented deals with the question of Niagara Falls and the water power at Sault Ste. Marie. In regard to Niagara Falls the commissioners agree teat it would be sacrilege to destroy the scenic effect of the great cataract. In order that the falls may be preserved it is recommended that not more than 36,000 feet per second be abstracted from the river on the Canadian side and not more than 18,500 feet per second on the American side. In addition, a diversion of not more than 10,000 cubic feet per second may be authorized for the Chicago drainage canal. The Canadian commissioners, while assenting to these conclusions, express the view that any treaty or arrangement as to the preservation of Niagara Falls should be limited to the term of twenty-five years and should also establish the principles applicable to all diversions or uses of boundary waters. In regard to Sault Ste. Marie, it is agreed that the water power should be divided equally.

Stomach Troubles.

Mrs Sue Martain, an old and highly respected resident of Faisonia, Miss., was sick with stomach for more than six months. Chamberlain's Stomach and Liver Tablets cured her. She says: "I can now eat anythink I want and am the proudest woman in the world to find such a good medicine." For sale by All Druggists.

EARN CASH

In Your Leisure Time

If you could start at once in a business which would add a good round sum to your present earnings—WITHOUT INVESTING A DOLLAR—wouldn't you do it?

Well, we are willing to start you in a profitable business and we don't ask you to put up any kind of a dollar.

Our proposition is this: We will ship you the Chatham Incubator and Brooder, freight prepaid, and

You Pay No Cash Until After 1906 Harvest.

Poultry raising pays.

People who tell you that there is no money in raising chicks may have tried to make money in the business by using setting hens as hatchers, and they might as well have tried to locate a gold mine in the cabbage patch. The business of a hen is—to lay eggs. As a hatcher and brooder she is outclassed. That's the business of the Chatham Incubator and Brooder, and they do it perfectly and successfully.

The poultry business, properly conducted, pays far better than any other business for the amount of time and money invested.

Thousands of poultry-raisers—men and women all over Canada and the United States—have proved to their satisfaction that it is profitable to raise chicks with the

No. 1— 60 Eggs
No. 2—120 Eggs
No. 3—240 Eggs

CHATHAM INCUBATOR AND BROODER.

"Yours is the first incubator I have used, and I wish to state I had 52 chicks out of 52 eggs. This was my first hot; truly a 100 per cent. hatch. I am well pleased with my incubator and brooder. THOS. MCNAUGHTON, Chilliwack, B.C."

"My first hatch came off. I got 170 fine chicks from 190 eggs. Who can beat that for the first trial, and so early in the spring. I am well pleased with incubator, and if I could not get another money could not buy it from me. Every farmer should have a No. 3 Chatham Incubator.—F. W. RAMSAY, Dunnville, Ont."

"The incubator you furnished me works exceedingly well. It is easily operated, and only needs about 10 minutes attention every day. R. MCGUFFIE, Moose Jaw, Assa."

The Chatham Incubator and Brooder is honestly constructed. There is no humbug about it. Every inch of material is thoroughly tested, the machine is built on right principles, the insulation is perfect, thermometer reliable, and the workmanship the best.

The Chatham Incubator and Brooder is simple as well as scientific in construction—a woman or girl can operate the machine in their leisure moments.

You pay us no cash until after 1906 harvest.

EDITOR'S SON RAN AWAY.

To the Editor—The day of the San Francisco earthquake, Richmond W. Freeman, the 15-year old son of the editor of the Northwest Farm and Home, North Yakima, Wash., ran away from home and has not been seen since. He has brown hair, blue eyes, wore blue overalls grey jacket and black flannel shirt, soft black felt hat. All last year he was an invalid from rheumatism and nervous prostration brought on by cigarette smoking and other imprudence. An aged, grief stricken father appeals to the press to publish this notice in the hope that it may lead the boy to voluntarily return. If he does not do so there is still hope left, and that is that the officers of the law will arrest and hold him, and telegraph his father and receive the reward for so doing.

In the nervous condition of the boy his naturally bright mind is not normal and he is not responsible for what he does. What the parent desires to do is to save him from a life of degeneracy and crime. The father of the boy has built up an excellent book and job printing business and had hoped that he would deed it along with the buildings, lots machinery and business to his son. He is a practical printer.

Yours fraternally,
LEIGH FREEMAN.

Never growl becase a newspaper fails give every scrap of news, so long as you take no pains to give the editor information. We have seen readers who were much put out at times because we make no note of the arrival or departure of a friend visiting them, or of a local affair, or of the heaven-sent babies that visit their homes over night. The average newspaper man is not a mind-reader, but gets most of his news the same way the dairyman gets his milk—by pumping.—Enderby Progress.

If you need letterheads, billheads, envelopes, wedding or society stationery printed in a business-like and attractive form, call up the *Times*. Phone 29.

NEWSPAPER PROFITS.

There has been from time to time some expression of a desire for a daily paper in Greenwood. Ambitious citizens who are anxious to see the Boundary metropolis take its place among the leading cities of the province, apparently think the first step should be the establishment of a daily paper. Those who are least informed as to the cost of running a daily newspaper are the most anxious to have one started. It will probably surprise many and disappoint others, to learn that the income of the average village newspaper in British Columbia is barely sufficient, and in many cases, fails to meet current expenses. The Nelson Daily News has frankly admitted that they are obliged to put up a continal struggle in order to pay their bills and keep the sheriff from becoming too intimate with their affairs. The News is a good paper and is a credit to its energetic editor, F. J. Deane, but why should a newspaper manager any more than any other business man run a thousand dollar enterprise in a hundred dollar town? If the city of Nelson, the acknowledged distributing point for the Slocan and the Boundary, with its shipbuilding and lake trade, its 20,000 club and progressive business men cannot be made to yield its one daily paper, a living profit, how in the name of common sense could a daily paper make enough to pay a business tax in Greenwood?

BOUNDARY ORE TONNAGE.

The following table gives the ore shipments of the Boundary mines for 1900, 1901, 1902, 1903, 1904, 1905 and 1906, as reported to the Boundary Creek Times:

THE LIABILITY OF TRADE UNIONS.

The more the approval by the House of Commons of Clause 3 of Mr. Hudson's bill is considered the less does it commend itself to all who are free to use their own judgement in regard to a matter substantially simple and of great importance. Mr. Westlake tells us in the letter which we printed yesterday that the clause in its present form will be futile, that it will leave things exactly as they were, and that under it there will be new decisions as disappointing to unionists as the Taff Vale case. Certainly the clause is clumsily worded. It does not aptly express the end in view, if it expresses it at all. Trade unions are at present not liable "by reason of the action of a member or members of such trade union;" but because they are the principals of agents who have done wrong in the course of the business of their principals or employers. The clause might have ran with great clearness in some such terms as these—"The principle of employers' liability shall not apply when employers are trade unions." We are not sure, however, that the adoption of the clause as it stands would "leave the Courts just where they are." At all events, the object in view is clear. "Trade unions can do no wrong," is to be enacted. We are familiar with this doctrine as to the Sovereign. It is to be extended to these associations. Religious bodies have in past times claimed a similar immunity, but their pretensions have been resisted and have failed. Even the Crown no longer enjoys full immunity; there are ways and means by which an aggrieved subject can obtain redress. Mr. Hudson's measure, if construed as he desires, would place trade unions in a wholly unique position. They would have here privileges denied to them, so far as is known, in any country in which such unions exists. The amazing facility with which a measure of this kind has commanded an overwhelming majority in the House of Commons illustrates in a striking way the effect of the practice of extracting and giving "pledges" as to the manner in which candidates will vote as to particular measures if they are returned to Parliament. It is a pernicious practice. A constituency is entitled to know the general convictions and policy of any one soliciting its votes. On the momentous matters of politics he is justly expected to speak clearly and to abide by his declared opinions. The evil which is growing fast is that of exacting precise promises as to particular measures made up of many important details, the consequences of which can often be understood only after full discussion and close examination. To endeavour to extract a pledge of this sort is to ask a candidate to shut his eyes to light; to forbid him to use his reason, reflection, and ampler knowledge; to turn him into a delegate who goes to Parliament with orders or instructions from which he must not deviate. Is there something in the character of modern canvassing which tends to multiply this sort of machine-made opinion? We shall never know how many gave such a promise with respect to Mr. Hudson's Bill without having read it. It may be conjectured with plausibility from recent speeches that many who read it did not understand its purport and consequences.

It is to much too soon to forecast the ultimate fate of the measure which the Government has adopted. In due time it will pass the Commons, though, it is to be hoped, with many modifications in detail. But one cannot help speculating as to what would happen if, being sent to the house of Lords, that Assembly, perhaps convinced by the Attorney-General's arguments were to recast it, and to restore it substantially to form in which he introduced it. What would be the duty ot the Government in these circumstances? Not, it would seem, to complain that the House of Lords had taken the exact course which they had recommended as the best. Nor would it seem to be reasonable to treat the matter as one of secondary consequence, as to which the Government need give no leading, but might divest itself altogether of responsibility.—The London Times.

Anderson Bros., the new grocers, are making a specialty of Rakwana Ceylon Tea, said to be the finest on the market today.

H. C. Kerman, sheriff of Grand Forks,, was in Greenwood on official business in connection with the supreme court.

W. H. Covert of Grand Forks, one of the parties interest in the Grand Forks water right case was in the city attending court this week.

The brass band will hold a dance in the Masonic Hall on Monday evening June 4th. The receipts will be devoted to the needs of the band.

Greenwood business men in all lines of trade report business exceptionally good. The city is more prosperous than it has been for years.

W. H. Norris of Midway, is making application for the purchase of 40 acres in the Similkameen on the right of way of the Columbia & Western railway.

Rev. F. A. MacInnis, the new Presbyterian minister for Midway and Boundary Falls, will preach his first sermon at Midway next Sunday morning.

C. N. Bell, who has been in charge of the grocery department at Hunter-Kendrick's, left this week for Toronto. He may remain in the east permanently.

W. E. Morand of Phoenix, and old timer in Greenwood was in the city on business Thursday. Mr. Morand expects to start in business here at an early date.

J. Manson of Kamloops, arrived in town this week and has taken charge of the grocery department at Hunter-Kendrick's as successor to C. N. Bell, who resigned.

Judge Townsend of Rossland, has been appointed right-of-way agent for the V., V. & E. from Cloverdale to the summit of Hope mountains and will work eastwards.

J. E. Miller, inland revenue collecter of Vancouver inspected the local revenue office this week. He found everything in excellent condition and was pleased to note the steady increasing receipts.

The members of the Greenwood amateur Dramatic Company desire to express their appreciation of the services rendered by Mr. Russell of the Bank of Montreal staff both prior to and during the performance on Thursday night.

The free reading room was removed this week from the premises on Greenwood street to the Miner's Union reading room on Copper street. The officers of the miner's union wish it to be understood that the rooms are open to all and anyone desiring to make use of them will be welcome to do so.

For the accommodation of Victoria Day excursionists, May 24th, the Canadian Pacific railway will sell to and from all stations including Kootenay steamers round trip tickets at fare and one-third for the round trip, on sale May 22, 23 and 24, good to return till May 29th.

Fun for the children. Fireworks and fire crackers at Smith & McRae's. 37-38

G. R. Naden returned Thursday from a trip to the coast. On his return be visited Penticton, and was thoroughly delighted with the appearance of the country there. He states the fruit trees have mostly passed the blossoming stage and the fruit is beginning to form. He seen one cherry tree only two years old which would bear fruit this summer. This is an evidence the remarkable adaptability of the country to fuit growing.

N. H. Lamont spent part of the week in Grand Forks on business, returning Friday.

HIGH GRADE MINES

Greater Interest Being Taken in Greenwood Properties

The excellent results recently obtained at the Providence and Elkhorn mines and the excellent conditions at the Strathmore, which are steadily improving, have had a splendid effect upon the outlook for the Greenwood high grade mines. Not only has local faith been strengthened but considerable interest has been aroused among eastern capitalists and new money is likely to be secured for local investment.

CLAIMS BONDED.

It is understood that the Diamond Fraction, Texas and Mayfield Fraction claims surrounding the Fremont and Providence claims have been bonded by local parties in the interests of a new Chicago company.

J. C. Haas has examined the Lake and Don Pedro claims for Chicago owners and work is expected to start soon.

STRATHMORE IMPROVING.

At the Strathmore work is progressing most favorably. The winze has been sunk beyond the fault, which was encountered and the ledge is gradually widening. The ore, which has always shown high values is steadily improving with greater depth, showing native silver and free gold. The drift is being opened along the vein and present indications are most encouraging. It is expected that a shipment will be made this month from the ore taken out in development work. The winze will be sunk to the 100 foot level and drifts opened north and south on the vein and shipments made regularly.

The Chicago owners, who recently acquired control of the Strathmore, are well pleased with the results obtained so far and have decided to equip the mine with all the necessary machinery and run the mine to its full capacity.

BIG LAND DEAL

8500 Acres Sold—Eastern People Watching Greenwood More Houses Wanted.

An important real estate deal was put through this week, when F. W. McLaine land agent for the C. P. R. sold 8500 acres of railway land to R. G. Sidley of Sidley. The land lays near Osoyoos lake in the southern Okanagan district and is considered some of the finest range land in that part of the country. Mr. Sidley intends using it for ranching purposes. It is understood that other land is likely to change hands in that district before long.

Mr. McLaine informs the Times that he has been receiving many enquiries from eastern Canadians who are desirous of settling in southern British Columbia and that a party of six are leaving the province of Quebec and coming to Greenwood to look the situation over. This is an encouraging sign and every inducement should be held out to intending settlers.

There is also some enquiry from distant points for Greenwood city lots. A letter was also received by L. B. Hodge from a professional man in North Dakota asking for information about Greenwood and vicinity This would indicate that Greenwood is receiving some attention abroad. There is also some local enquiry for building lots and the enquiry for houses is growing stronger all the time. The demand for good houses is especially strong and cannot be nearly supplied.

DO YOU EAT SALT?

Its Use and Abuse Discussed by Scientific Authority.

The other day a board of health physician remarked to me: "Chloride of sodium is not found in the composition of the human body. Therefore it must be supplied along with our food." I replied: "Not so, doctor; because salt is not native in our bodies it should not be supplied, for we naturally have no need of it. And, besides, what the body does not need is a burden or a danger to it. Why not say, 'alcohol and nicotine are not found in the system. Therefore supply them.'" Fallacious argument!

Common salt is composed of two active poisons—chlorine, a heavy yellow gas, irritating the air passages when inhaled and very destructive to color and fabrics, which is seen in the action of chloride of lime, as used in laundries, and sodium, which is a metallic element. Together they form a salt of an earthy character.

I believe the following statements about salt are exact and reliable:

1. Unorganized minerals (salt, iron, lime, etc.) cannot be assimilated by and used in rebuilding the body. Only when organized into living grains, fruits, nuts and other foods, can these minerals become a vital part of our organism.

2. On the other hand, we cannot long live, perhaps only a few weeks, unless the exhausted salts of our systems are renewed. This is a vitally important necessity, though the amount needed is small. All the minerals which the body can utilize to any advantage are abundantly supplied in natural foods.

Hutchinson's Physiology says: "Salt is usually taken into the system in sufficient quantities in our food. Even the water we drink has traces of it. The habitual use of much salt in cooking or as a seasoning at the table is a bad habit in itself and leads to the desire for other and more injurious condiments."

M. Rene Laufer, in "Revue Scientifique," writes that, "The taste for salt is not innate or instinctive; it is acquired. The mother's milk contains very little salt. Cow's milk has at least four times as much, but even with this amount the adult who should live on milk alone—say three quarts a day—would take more chlorides than he needs. Man in a state of nature does not salt his food. Primitive peoples who lead a pastoral and nomadic life do not add salt to what they eat. The same is true of animals. Dogs and cats do not like salt. Even the domestic herbivores get along very well if salt is not added to their food. 'The tales of disease resulting from lack of salt are not trustworthy.' (From translation in Literary Digest)

PLAIN FACTS.

3. Salt destroys the natural delicacy of taste, as does alcohol. The palate becomes so dulled that no food seems to have any taste without high seasoning. This entails the loss of much real pleasure in eating, for the divinely imparted flavors are perfectly delicious, but the salt or pepper depraved tongue is too numb to enjoy or even detect them.

4. The use of salt with food tends strongly to overeating. More food is eaten because it is "salted to taste" than the system requires or would be eaten otherwise.

5. Salt has a specially harmful effect upon the blood and its circulation. On a damp day observe the moisture on the metal cap of your salt shaker. Witness, too, how a brick of salted butter will "sweat." Salt has the property of drawing the moisture from the air to the perforated cap; out of the butter to the surface of the mass, and it draws the moisture from your blood, and leaves it far too thick to circulate freely through the infinitely small capillaries that connect the arteries with the veins. These capillaries are so minute that it takes 335 of them to make an inch. They are finer than baby's softest hair, and hollow, too. The blood flows through the arteries to the capillaries, but it must be thin enough to go through easily. Then it goes back to the heart by the venous circulation. But the blood is too thick. It does not pass from artery to vein readily. The hands and feet grow cold. The heart wearies of trying to force it through, and the whole being, clogged and impure, cries out, Water, water! That is exactly why you are so thirsty after eating heartily of salt fish.

Try this experiment: Take the brightest red piece of beefsteak you can buy. Salt it thoroughly. Now look at it in three days. Where has all the redness gone? Precisely where the rosy complexion of your childhood has gone, my dear salt seasoner. It takes the healthy redness from the beef blood and from yours, too.

6. Salt interferes with digestive processes. Vinegar and salt are good embalmers—the first of vegetables, the other of dead carcasses. A piece of meat salted so that it will keep is simply embalmed. It keeps well out of the stomach. It keeps better inside of it than were it unseasoned. Any food treated to a fixation of its condition is thereby made less digestible It is preserved, pickled, cured, embalmed (or anything you please) against the atmosphere and against the gastric juice.

Now let me tell you of some experiences I have had with animated salt cellars:

SOME CASES.

Case First.—Miss W. wished me to visit her sister, a chronic invalid unhelped by any treatment. I went to take dinner with the family and observed the sister's symptoms across the table. White, chalky skin, dull eyes, blue finger nails, a listless manner in general, poor breathing, etc. In a moment she calls for salt. In passing it is spilled. After the usual jokes about "bad luck," I ased her if she used much salt. "Yes," she replied. "I can eat nothing unless smothered with it." Then, much to her surprise, I informed the ladies that the sickness was wholly due to ruination of the circulation owing to salt eating. She gave it up, and now I hear that she enjoys almost perfect health.

Case Second.—A mother spoke to me about her daughter's ghastly complexion and the strange coolness of her skin in any weather. The hands and feet were always cold. "Yet," said her mother, "Jennie's appetite is good, but she is so nervous and irritable and too weak to exercise either body or mind." I asked about salt. Yes, she craved it continually. The mother became afraid of her eating so much, and it was hidden in the barn. Jennie searched for it. Perhaps she found it soon. Anyway, she died.

Case Third.—A 16-year-old boy returns home from skating nearly perished with cold. The other youths are perspiring. He eats an apple, and with it a teaspoonful of salt. The same old story. He also wore woolen socks in bed—his feet were so cold. The salt did for him what it does for the ice cream freezer—lowers the temperature of the blood by evaporation and destroys the cold-resisting power of the body.

Reader, you may be incredulous of these facts and say, "I don't eat enough to hurt me." I thought so, too. But do as I did. Try this experiment—live all next fall and winter abstaining wholly from salt. All this winter I have not touched it. I wave worn lighter clothing, used lighter bedding, slept in a room with open windows and no heat, and have felt no need of stimulants or even warm meals all winter. My heart action is more positive than ever before. For the first time in my life I have gone through the cold weather without suffering from the bugbear of cold feet.

If you are given to overeating, avoid salt.

If you are anaemic, avoid salt.

If you have weak heart, poor circulation or cold extremities, avoid salt.

If your hands chap and break open, avoid salt.—A. Ziegler, B. D., in Physical Culture.

THE NORTHLAND TRAIL

The compass point of opportunity is again directing thousands of emigrants eager to pursue the path of promise into the conquered wilds of Western Canada. The great wheat crop of last fall has been translated into gold as yellow as the nuggets unearthed in the Sierras by the Argonauts of Forty-nine. Money is reported to be as plentiful on the prairie of the Northwest as it was in Dawson and Yukon a decade or more ago. The plow and the seeder are today singing the bonanza song, and the pilgrims of empire are dancing to this music as miners have done to the click of pick and pan. A hundred thousand settlers are expected to desert the States between now and the last of June. It would be well if even a larger number could be drafted from the millions of homeseekers who annually come to claim a welcome at the American front door. No one can deny that a large good is being done to the many who take the northland trail, for there work is rewarded with plenty. The first need of life is food, and the Western Provinces are fast developing into one of the world's great food fields. On such a firm foundation a great people are sure to rise. The day has broken clear over the valleys of the Saskatchewan, and these settlers live in a land of good and golden promise.—Collier's Weekly.

Not if as Rich as Rockefeller.

If you had all the wealth of Rockefeller, the Standard Oil magnate, you could not buy a better medicine for bowel complaint than Chamberlain's Colic, Cholera and Diarrhoea Remedy. The most eminent physician can not prescribe a better preparation for colic and diarrhoea, both for children and adults. The uniform success of this remdy has shown it to be superior to all others. It never fails, and when reduced with water and sweetened, is pleasant to take. Every family should be supplied with it. Sold by All Druggists.

H.B.K. BRAND

BIG SHIRT

Made big enough for a big man to work in with comfort. Has more material in it than any other brand of shirt in Canada. Made on the H.B.K. scale it requires 39½ to 42 yards per dozen, whereas common shirts have only 32 to 33 yards.

That's the reason why the H.B.K. "Big" Shirt never chafes the armpits, is never tight at the neck or wristbands, is always loose, full and comfortable and wears well.

Each shirt bears a tiny book that tells the whole history of the "Big" Shirt, and also contains a notarial declaration that the H.B.K. "Big" Shirt contains 39½ to 42 yards of material per dozen.

Sold at all dealers but only with this brand:—

H.B.K. BRAND

HUDSON BAY KNITTING CO.

Montreal Winnipeg Dawson

Sciatica Cured After Twenty Years of Torture.

For more than twenty years Mr. J. B. Massey, of 3322 Clinton St, Minneapolis, Minn., was tortured by sciatica. The pain and suffering which he endured during this time is beyond comprehension. Nothing gave him any permanent relief until he used Chamberlain's Pain Balm. One application of that liniment relieved the pain and made sleep and rest possible, and less than one bottle has effected a permanent cure. If troubled with sciatica or rheumatism why not try a 25-cent bottle of Pain Balm and see for yourself how quickly it relieves the Pain. For sale by All Druggist.

MAIL CONTRACT

SEALED ORDERS, Addressed to the Postmaster General, will be received at Ottawa until noon, Friday, the 8th of June, for the conveyance of His Majesty's Mails, on a proposed contract for four years, six times per week each way, between Greenwood, B. C., and Ferry, Wash., from the 1st July next.

Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of tender may be obtained at the Postoffices of Greenwood, Midway, Boundary Falls and Anaconda, and at the office of the Postoffice Inspector.

Postoffice Inspector's office,
Vancouver, B. C., 27th April, 1906.

JOHN R. GREENFIELD,
36-38 Postoffice Inspector.

Synopsis of Canadian Homestead Regulations.

ANY available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

W. W. CORY,
Deputy of the Minister of the Interior.

IN AMATEUR COMEDY

Local Artists Win Pronounced Success.

LARGE CROWD DELIGHTED

Rounds of Applause Greet the Players —Interest Well Sustained from Start to Finish.

The Greenwood Amateur Dramatic company played successfully to a full house Thursday night, presenting "Between the Acts" in a manner creditable to all members of the company and pleasing their large audience to a pronounced extent. Considering the fact that a series of misfortunes (the sickness of several players, who after practicing for some time were obliged to find substitutes), tended to interfere with the work of preparation, makes Thursday night's succesful performance all the more notable. Generally speaking all the players acted their part well, though it would be an overstatement to say that the cast was an all star one.

SOME STARS.

The position of a critic is seldom a pleasant one, and it is less so when it is necessary to say that the acting of the gentlemen was rather superior to that of the ladies. It is but fair to state, however, that the ladies were at a disadvantage in the rehersals. The palm of superiority must be awarded to Randolph Stuart as George Merrigale, and to N. F. Kendall as "The Uncle," while F. W. McLaine played a difficult and interesting part in a manner that commanded the continuous attention of the audience and sustained the interest in the comedy. His part, though cleverly performed, lacked at times sufficient intensity of feeling to fully interpret the spirit of the moment. Mr. Kendall and Mr. Stuart both were clever in their interpretations by both word and act, and their ennunciation was almost faultless.

A. E. Duchesnay as Harris, "the valet," added to the multitude of comical situations. His demeanor and appearance was highly appropriate and pleasing and it would be hard to secure an amateur more fitted for the part. His ennunciation was not as clear, however, as many in the audience would have desired, and his lines were frequently spoken so hurriedly that their meaning was lost to many, especially at the rear of the house.

A FAVORITE.

Among the ladies Mrs. McLaine as "Sally" was the favorite with the audience, her jaunty Irish appearance and her well spoken witticisms were much enjoyed and loudly applauded. She was one of the stars of the evening and played her part exceptionally well.

Miss Reid as "Dick's Aunt" and the quarreling wife of Dick's crusty uncle, played her part effectively. She was seen to best advantage when starting a quarrel with her husband and when she swept from the stage vowing never to return. Her moments of grief, however, were hardly intense enough to strike a responsive cord in the auditors hearts, though they were good imitations of the genuine.

Mrs. English as "Dick's Wife," proved an interesting character and her inopportune appearances upon the scene added much to the enjoyment of the comedy. She was especially interesting in the most spirited interviews with "Dick's Aunt," Miss Read, though, at times, the manner and vocalization of both suggested unfamiliarity with their lines.

A DECIDED SUCCESS.

To say the least, the first performance of the Greenwood Amateur Dramatic company was a decided success, and it is doubtful if another company of equal talent could be organized in the city. Their success should encourage them to continue in the good work they have started and to strive to attain to greater perfection and to encourage the musical and dramatic talent of the city.

Between the first and second acts A. M. Whiteside favored the audience with a vocal selection which was much enjoyed by all present. Mr. Whiteside was in excellent form and he was obliged to respond to a hearty encore. Mrs. Sidney Oliver was his accompanist. Between the second and third acts Mr. Upson of Boundary Falls, rendered a song and gave a clog dance which was especially enjoyed by the boys in the gallery.

THE MERCHANTS CORNER

Hood River Strawberries.--Higher Priced Underwear.

The Hood river strawberry crop is estimated at 70,000 to 80,000 crates this season. This year 108,000 crates were shipped. Last year's shortage is due to several causes. The season of 1904 was unsatisfactory, as by a combination of circumstances the berries were late and arrived on the eastern markets in competition with the berries from nearly all the heavy berry districts of the Mississippi and Missouri river points, and while the fruit of those sections is much inferior, yet it served to lower the markets at all points. This discouraged many of the Hood river growers, and they reduced their acreage. This year's acreage is at least 400 acres less than in 1904.

In the upper valley, both in the Mt. Hood and Crapper sections, there has been some increase in the acreage, but it has been more than offset by reductions in the valley. There will be more late berries, about the same amount of early berries, but far less to ripen in middle of the berry season. This however, will no doubt be of pecuniary advantage to the strawberry growers of the entire valley, as it will serve to distribute the crop over a longer period, make it easier to obtain pickers during the height of the season, easier for the shippers to handle the crop, and less apt to cause a glut in the difierent markets at any time.

Apples are beginning to bloom, and the bloom is very heavy all over the valley. Many of the orchards are beginning to bear this year, mostly Spitzbergens and Newtowns. There will be four or five times as many of these varieties as last year, while it is estimated that the entire crop of commercial apples will be fully 175,000 boxes, against 60,000 last year.

PRICES GOING UP.

Manufacturers of knitted goods are forcing their selling agents to demand higher prices for the coming season, and on all duplicate orders top prices must be paid. Representatives of the largest underwear mills said recently that they had practically concluded that an advance in prices is imperative; otherwise they will have no goods to deliver. This refers, of course, to the business which is to be given now for delivery next season.

As to the extent of the advance nothing will be known definitely until a month or two hence, when mills are ready to show their lines. The mills are not only hampered by the high prices of raw materials, but the costs of labor have been advanced in many ways, notably by the scarcity of operatives who are at all skilled.

As showing the actual situation, one of the largest dealers said that he did not know where he could go to get 500 cases of ladies' ribbed vests for delivery within a reasonable time at prices within 25 per cent. of the figures that prevailed a short time ago. On all ladies' underwear this condition is reflected in a greater or less degree.

Outside of the congested conditions in the bundle hosiery trade, what has been said of the underwear trade refers in a general way to the hosiery business. There has been overproduction of 84-needle hose, and while goods are moving the prices cannot possibly reimburse mills, unless it be that deliveries are coming from cotton costing 40 per cent. less than cotton costs today. The trading is proceeding from a glutted market.

All lines of bleached hosiery are scarce in first hands, particularly the goods suitable for children. There is a steady trade in lace and embroidered hosiery in colored yarns, while all white lines can be disposed of as soon as shown. Jobbers note the increased call for high quality goods this season and are of the opinion that it is simply the reflection of the great prosperity of the people —Winnipeg Commercial.

Not if as Rich as Rockefeller.

If you had all the wealth of Rockefeller, the Standard Oil magnate, you could not buy a better medicine for bowel complaint than Chamberlain's Colic, Cholera and Diarrhoea Remedy. The most eminent physician can not prescribe a better preparation for colic and diarrhoea, both for children and adults. The uniform success of this remdy has shown it to be superior to all others. It never fails, and when reduced with water and sweetened, is pleasant to take. Every family should be supplied with it. Sold by All Druggists.

If you need letterheads, billheads, envelopes, wedding or society stationery printed in a business-like and attractive form, call up the Times. Phone 29.

Progress and Development

Progress and development are terms closely identified with life in the West. In a new country people are working daily for the upbuilding of town, city and district, and for the improvementof the conditions under which men and women are called upon to live. Every act of daily life that tends to bettering one's surroundings makes directly or indirectly for the improvement of society generally. In all this the local newspaper plays an important part. Among its local readers it stimulates an increasing interest in their home city, keeping them posted on all local happenings, and becomes a welcome weekly messenger, bearing bright and welcome tidings. Among its outside readers it forms a valuable advertising medium making known the merits, advantages and prospects of the city and attracting thither citizens who want employment, business firms looking for locations, and capitalists seeking investments. In the upbuilding of a town, city or district the local paper is an important factor.

BOUNDARY CREEK TIMES

The Boundary Creek Times aims to do its full and complete share in the upbuilding and improvement of Greenwood and the Boundary district. It is not handicapped in its work by any restraining obligations to any party, clique or corporation, but it is free at all times to rise up and promote the best interests of the City of Greenwood and its people. To do this most thoroughly and satisfactorily the Times must have the support and cooperation of the citizens of Greenwood.

Every effort is being put forth to make the Times the class of newspaper the people want. Increasing attention is being continually paid to mining news, especially of that nature that will interest those employed in the work as well as those whose capital is invested in the properties. With this end in view we aim to have

A Subscriber in Every Home

As a result of the efforts that have already been put forth, we believe that an increas- interest is already being taken in its news columns. We have evidences of this from the fact that the subscripiion list is already growing; the street sales are increasing weekly and the news dealers find more demand for each succeeding issue. This is a satisfactory condition of affairs that acts in two ways. It increases the revenue of the circulation department and it makes the paper a first-class advertising medium for local business men.

In handling local advertising every effort if put forth to protect the Greenwood merchant. The local page is reserved for them and foreign advertising has been repeatedly refused because the advertising manager refused to disturb the positions held by local advertisers.

Business men of Greenwood, we are here to protect and advertise you. We are protecting you! Do you advertise? Read The Times, subscription $2.00 per year.

A BIG CELEBRATION

Program of Victoria Day Sports at Midway.

GREENWOOD BRASS BAND

Local Musicians Will Delight the Throngs of Visitors.—Baseball Club Will Meet All Comers.

Midway will be the center of attraction for young and old next Thursday, when Victoria Day will be celebrated with all the loyalty and enthusiasm that should mark such an occasion. The 24th is recognized as Midway's day, and the towns both east, west and south will join in making the day a memorable one.

For weeks the people of Midway have been preparing for the event. The railways have arranged special trains at special rates to accommodate the crowds; the business men have subscribed liberally to the prize funds, and the hotels and restaurants have been making special preparations to entertain the large throng of guests that are sure to be on hand to enjoy the sports.

THE PROGRAM.

A lengthy program of events has been arranged including horse racing, baseball, mountain climbing, bicycle races and a hose contest. To the winners of these, attractive prizes will be awarded.

The Greenwood baseball club expects to be on the ground to uphold their good name as successful stick handlers, against all comers. It is expected that the ball teams of all the surrounding towns will be on hand to give the Greenwood boys a rub. The first prize for the winners of the ball tournament is $100, and the locals have already planned out how they will spend it.

The Greenwood brass band will be honored guests at Midway. The boys are practicing their most catchy tunes and they will probably win fresh laurels to decorate their scarlet suits.

The following is the program in full:

HOSE CONTEST.

At 10 a. m., on Fifth street. Prize, $75.

BASEBALL.

During the day on the ball grounds, beginning at 10:30 a. m. Prizes, $100 and $50.

MOUNTAIN CLIMBING.

At 11 a. m., from corner Sixth street and Chamblet avenue. Prizes, $20 and $10.

HORSE RACING.

On the course beginning at 1 p. m. and consisting of:

Pony Race—Half mile dash, for 14 hands or under. First prize $20, second $10.

Free For All Running Race—Half mile heats, best two in three; 4 to enter and 3 to start. First prize $75, second $40.

Free For All Race—Single horse in harness; half mile heats; open to pacers and trotters; best two in three; 3 to enter and 2 to start. First prize $75, second $40.

Running Race—Half mile heats, best two in three. Four to enter and three to start. Open to horses within a ten mile radius. Previous winners barred. First prize $40, second $20.

Prospectors' Race—Ride one horse, lead another, ride 600 yards, put on pack and return. First prize $15, second $7.50.

Bucking Contest—Horses must be genuine buckers. Two to enter. First prize $30, second $15.

Cowboys' Race—Free for all. Four to enter and three to start. First prize $20, second $10, third bridle, value $5.

Entry fee of 10 per cent of purse will be charged for pony, free for all running, harness and local running races. All others free.

BICYCLE RACES.

Bicycle Race—Half mile. Three to enter. First prize $15, second $7 50.

All entries for the races must be made with the secretary before 11 a. m. of the 24th.

Starter—A. McQueen.

Judges—D. Munroe, J. F. Royer, A. Trautweiser, W. Powers, F. Richter, C. A. Dempsey, Frank Lewis.

FATAL ACCIDENT

Two Miners Killed and One Injured Near Hedley.

One of the most serious accidents that has yet attended mining operations at the Nickel Plate, near Hedley, occurred last week when Isaac Doran and Joseph Dumas were instantly killed and A. Anderson severely injured. The accident occurred in the tunnel on the Sunnyside's mine and was caused by a premature blast. The men had taken in the powder, fuse and caps to lode eleven holes, in a sack. Whether or not the detonators were attached to the fuse is unknown, and neither is it known whether they had sprung any holes before loading, which is the most common cause of loading accidents.

Doran and Dumas were in at the face of the tunnel when the blast went off and were blown back against the wall, about 40 feet away, where the tunnel changes direction. The bodies were frightfully mangled. Anderson, who was near the mouth of the tunnel, was taken out unconscious. Whether he had been blown against a wall doesn't appear. He was bleeding from the ear, which the concussion from the blast would account for without any other injury.

Doran leaves a widow and one son, aged about 12 years. He had married twice, and the boy was from the former marriage. Deceased was born in Scotland and was an old miner in the Nickel Plate. Dumas was unmarried.

PRINCETON IS CENTRAL

What the Railways Will Do for the Similkameen Town.

The significance of a railway, or railways, into the Similkameen can hardly be realized or predicted at the present time Where it now takes days to reach with mail will then be done in a few hours. For instance: Vancouver will be reached in less than five hours, which now takes eighty; Nelson and Greenwood are distant about four days from Princeton by rail and steamer, which will be shortened by the V., V. & E. to within a half dozen hours. With the completion of the Hill system to Winnipeg Princeton will be within two days' touch of the bread basket of the empire—the great prairie wheat belt. These considerations of easy access to important outside points along with the proposed junction of the Tulameen and Similkameen railway routes of the Great Northern will make Princeton a divisional centre of leading consequence. If, as has been hinted by a minister of the government that the C. P. R. would build via Quilchena creek into the Similkameen district, then a third railway line would knock at the gates of Princeton for admission. Eliminating all speculation regarding proposed routes and railways the one outstanding feature of greatest import is the purchase and negotiations for tracts of land in and about Prenceton by the Great Northern.—Similkameen Star.

CANADA'S INCREASE

An estimated increase of $8,500,000 in the mineral production of Canada during the past year, despite a falling off of $2,000,000 in the Yukon gold output, indicates that Canada is steadily gaining a place among the mineral producing countries of the world, and that her mining development is quite in line with the advancement observable in every other from of industry. An increase in mineral production is reported from every province showing that every portion of the Dominion is sharing in the general advancement. British Columbia and Nova Scotia maintain their pre-eminence in the production of the more valuable minerals but Ontario and Quebec are forcing their claims to recognition in no uncertain manner. Altegether mining is apparently in a very healthy condition, the production having increased almost fourfold in 10 years. It futures is great with possibilities as the construction of the Transcontinental railway will make valuable districts accessible in which various kinds of mineral deposits lie in unlimited quantities awaiting the miner's pick and shovel, and means of tranportation of the rich ores from the mines to the market. —Mining World.

NORTH FORK RAILWAY

G. N. Will Build a Line to Pathfinder Mine.

Much interest is being taken in the development of the North Fork country where the B. C. Copper Co. recently bonded the Gloucester group of claims. Railway construction is naturally of the first importance, and on this the Grand Forks Gazette says:

"The Gazette is in a position to announce that the Great Northern railway will extend its system up the North Fork of the Kettle river in the immediate future. J. H. Kennedy, construction engineer, arrived in town from Midway, accompanied by W. F. Milliken, assistant engineer, who will have charge of the survey party. Mr. Kennedy preferred not to discuss such matters as the charter under which the company would work, though it is understood that matters have been arranged in Ottawa. The line will be constructed from the smelter spur to the Pathfinder mine this fall, and a preliminary mine will probably be run through to Franklin camp. Without a more careful looking over of the ground Mr. Kennedy would not say what route would be taken, but it is likely that construction will start in the neighborhood of the smelter dam, and possibly a new bridge may be erected across the Kettle north of the present structure, and the road then run entirely on the east side of the river.

COPPER MARKET

The latest reports from Boston say: Copper continues very strong, with domestic prices showing a decided tendency to harden. Lake is generally held at 18¾ to 18⅞ cents; electrolytic is 18½ to 18¾ cents, and casting 18¼ to 18½ cents a pound.

A Large lake company is reported to have made sales at 19 cents a week ago and it is understood that it is holding its copper at 19 cents.

ANDERSON BROS.

THE NEW GROCERY

Saturday morning we will offer

Fresh Strawberries,
Fresh Bananas,
Fresh Oranges,
Fresh Lemons,
Also Dr. Barber's Famous Lettuce and Ripe Tomatoes.

Next Week :

New California Potatoes, Cabbage, and Onions.

Rakwana Tea *is one of our Leaders. .... Ask for sample.*

Quick Delivery Our Motto.

We Want to be Your Grocers

ANDERSON BROS.

Wallace-Miller Block, Copper Street.

Spring Goods

IN HARDWARE
