**MIDWAY COAL CO.  
HOLD CONFERENCE**

Engineer Will Locate Shaft to Intercept Other Six Veins on Property.

SHIPMENTS WILL BE MADE IN NEAR FUTURE

Permanent Machinery Will Be Installed and Large Force Employed.

The Boundary Mining and Exploration Co., Ltd., with headquarter in Spokane, and whose holdings are located near Midway have issued the following letter to shareholders which is of general interest to the public:

At a conference of directors it was decided to advise all of the stockholders in the Boundary Mining and Exploration Co. that the development work has now reached such a stage that we are in a position to begin permanent equipment with working shaft and hoist.

The work so far accomplished has developed our No. 3 vein and we are now in coal on drifts and shafts about 500 feet. In order to work this vein on an economical plan, our engineer has advised that we sink a shaft and equip the mine with hoist, tippel and other machinery of a permanent character to enable us to ship the coal in commercial quantities.

He will locate the shaft at a point where it will be possible to intercept the other six veins which are known to exist on our property, all of which are of larger dimensions than those already developed, and this will enable us to use the working shaft as our outlet for all the veins for some years to come.

Our engineer has been instructed to proceed with this work at once, and we may confidently look forward to the shipment of coal in the near future.

At the completion of this work the value of our stock should be at the par value on one dollar per share. After March 1st, 1911, no stock can be procured for less than 50c per share.

Any further information desired will be promptly furnished by addressing F. L. Smith, secretary-treasurer, 223 Paulsen building, Spokane, Wash.

**Lower Express Rates.**

Officers of Canadian and American express companies have announced a reduction in through rates soon to take effect between all offices of the United States and many of Canada. All of the important express companies are included in the reduction.

The announcement states that a decision was reached by the principal express companies that is of far-reaching importance. Instead of two companies which may handle an express package, making a separate charge on each line, the charge will be the same as if one company had carried the package from shipping point to destination. Necessary details are now being perfected, and as soon as legal requirements are complied with this plan for through service at through rates will then take effect generally between all express offices in the United States.

TO LET—Furnished house, centrally located, moderate rent. Enquire of A. L. White.

**FAREWELL TO FATHER BEDARD.**

A simple but cordial farewell was given Rev. Father Bedard last Sunday in the Catholic church on the occasion of his departure for the coast. The congregation was more numerous than on ordinary Sundays, many having come from afar, not withstanding the cold, to wish Godspeed to their pastor.

Father Bedard celebrated Mass, and in well chosen words, gave his hearers a clear and concise sketch of what they ought to do in order to insure the prosperity of the parish and the maintenance of the Christian spirit in their home.

After Mass a delegation came forward and presented Father Bedard with a handsome purse of \$225.00 and read the following address:

"To the Rev. Father Julian Bedard, O. M. I. on the occasion of his departure from Greenwood. "DEAR REVEREND FATHER:—

"The news of your departure from our midst came as a great shock to your parishioners of Greenwood, and brought feelings of deep sorrow to their hearts.

You have been our pastor and friend for the past ten years, and during that time, we say it without offence to your well known modesty, you have accomplished wonders, both here and in the district. Our congregation at Greenwood has indeed experienced the vicissitudes which are the lot of every industrial center where there is a floating population; but one thing which has always remained unchanged, is your zeal for our spiritual welfare.

"You leave behind you, Dear Reverend Father, a neatly adorned and very comfortable little church, a splendidly equipped hospital, in the establishment of which you had the chief part; and a fine residence which many a larger parish would like to possess. We are indebted to you for all these things, and Dear Reverend Father, we feel our loss very keenly, and we assure you that we shall keep your remembrance in our hearts for years to come.

As a token of appreciation and esteem for yourself and of gratitude for your labors in our behalf, we beg you to accept this purse.

"We know that ill health only could have separated you from us even for a moment, we will therefore bid you good-bye, but not forever; we look forward with pleasure to the time when obedience will send you back to our midst.

"May you enjoy a most needed rest and return to us with renewed strength and vitality. On behalf of your parishioners and friends of Greenwood, we shall ever be

Affectionately yours in Christ,  
C. J. MCARTHUR, J. B. DESROSIERS,  
PORTMAN BROS. CHAS. GAUVREAU,  
A. A. FRECHETTE, E. J. CARTIER.

Father Bedard, in a few heartfelt words, thanked them for the sentiments expressed:

"During these ten years I have been working amongst you," he said, "I never had any ill feeling against any one. I leave no enemy behind, and I may say that during all this time I never had any."

He wished to thank in a special manner all his friends of Greenwood who could not be present. He said he had done only his duty to all, irrespective of creed, nationality or position, and he was glad to see that he had the sympathy of all. He accepted the present as a remembrance of his friends of Greenwood.

**Beef Takes a Jump**

P. Burns, head of P. Burns & Co., announced on his arrival in Vancouver from the east that, on account of the hard winter in Alberta and consequent rise in the price of hay and other fodder, the price of beef would make a material advance in the near future. Pork and mutton will also move up the scale, but not to such a great extent as beef.

**Black Death**

England is becoming seriously alarmed over the accumulating evidence that the "Black Death" has secured a firm foothold in the country. It is not alone that the rats all over the island are unquestionably thoroughly infected, it is beginning to be clear now that many men, women and children have died of the disease, their illness simply having been wrongly diagnosed by the attending physicians.

**WHEAT MAY GO ON FREE LIST**

**A Report That Reciprocity Treaty Will Include Free Wheat.**

The whole of Canada from the Atlantic to the Pacific is much exercised about a report from Washington that wheat will be put on the free list by the trade treaty which has just concluded but which is being kept a secret by both the governments of the United States and Canada. The report is not definite but the rumor is sufficiently verified to get the Dominion talking. The free entry of Canadian wheat into the United States was one of the big things asked by the farmers' delegation the other day. Canadian millers on the other hand are not favorable on the whole. Robert Meighen of the Lake of the Woods Milling Co. is reported from Montreal as saying: "Free wheat would be the most disastrous catastrophe that could happen to this country." Sir Wilfrid Laurier said that all power was in the hands of Messrs. Fielding and Paterson in Washington, and who would disclose the Washington negotiations on their return to Ottawa.

It is understood by both governments that the trade treaty is to be kept a secret until after parliament has been informed of the exact nature of the negotiations.

**MINES AND MINING**

Another rich strike of lead-galena ore three to four feet wide is reported from the Standard mine at Silverton.

In seven years the St. Eugene concentrator at Moyie has turned out over ten million dollars' worth of ore concentrates. And this is not counting the crude ore shipped from the mine. These figures give some idea of the production of Moyie's big mine.

It is stated that there are 300,000 tons of gold-copper ore available at the B. C. Copper company's Lone Star mine.

The eighth furnace at the Granby smelter was blown in on Monday and about 3,600 tons of ore per day have been smelted during the latter part of last week.

The British Columbia Copper company's smelter treated 12,215 tons of ore last week as follows: Mother Lode, 6,802; Jack Pot, 591; Rawhide, 4,350; Napoleon, 472.

The promoters of the Greenwood-Phoenix tunnel are applying for incorporation of the Greenwood-Phoenix Tramway Co., limited, with power to run a tunnel under the mountain from Greenwood to Phoenix.

The Phoenix Mining, Smelting and Development company is said to have sold additional stock to the value of \$13,500, which will be used in the further development of the company's Woodburn property in Wellington camp.

G. C. Tunstall, late gold commissioner for the Similkameen, passed away at Kamloops on the 6th in the 74th year of his age. Deceased had a very wide circle of friends who will miss the gen-

ial and affable 'Judge.' Many have cause to remember the kindly help and generous benefactions of the deceased, and his courteous mien won a host of friends.

Red Cliff—Superintendent A. D. McPhee states that the long tunnel is in over 1450 feet, and that in a distance of 1400 feet an upraise has been started to connect with the upper workings.

There are at present six heavy teams and crew of men busily engaged in stripping the surface at the Napoleon mine where the glory hole will be started as soon as the raise is completed, says the Orient Journal. They have uncovered a vast body of oxidized ore which will be treated in the cyanide mill when it is completed. At present all the ore being mined is of a sulphide character, which is shipped to the company's smelter at Greenwood.

The Spokane Chronicle says that the Belcher mountain country, between this city and Republic, has received a new impetus through the reported purchase of the Copper Key by the Granby interests. The Key is on the same vein as the Belcher and the Blue Bell. It has already shipped extensively under the management of E. L. Tate, of Spokane. The Granby company, it is said, already has a crew of men on the ground surveying and preparing to build a tramway to get the ore down to the railroad.

The Argo Tunnel company have penetrated into a large ledge of silver copper ore, in their boring, which has caused very jubilant feeling among the shareholders. We trust it is the old adage verified everlastingly keeping at it has brought success.

The Great Northern railway has put another ore train between Grand Forks and Phoenix, there now being two trains per day steady. These trains are run by Conductors W. F. Smith and A. C. Uren and Engineers Dan Fleming and George Knox, all old and reliable employees of the company.

The Orient Journal says it is reported that the Colonel Peyton group, near the McKinley mine, has been sold to the British Columbia Copper company.

It will be good news to Rosslanders that the Granby company is preparing to start shipments of ore from the Cliff mine to their smelter at Grand Forks. Already a small force of men is busy putting the road around the mine in good order for heavy traffic, and the ore will be taken to the spur on the Great Northern railway near Hunter's warehouse. Arrangements for the haulage of the ore will doubtless be entered into with a local firm. It is hoped that the shipments will be made regularly.—Rossland Miner.

Regulation of Coal Mines.

In the bill to consolidate and amend the Coal Mines Regulation bill, which was introduced in the legislature last week by the premier at Victoria, several changes have been made as compared with the draft measure which was submitted a year ago, and which was then distributed widely throughout the province in order to ascertain the views of those interested in the subject of coal mines.

or manager, and if he is any other person, ten dollars for each offense. The attorney general's department ruled that under the existing act a person might be under ground for more than 8 hours and if he was not employed he was not violating the act.

The Third Degree.

Organized labor in the United States is called upon to exert its influence to secure legislation forbidding the alleged use by police authorities of the "third degree" to secure confessions from prisoners, in a letter sent out from the national headquarters of the American Federation of Labor at Washington and which has been received by the trades councils of the various cities.

Scotland Going Dry.

An unprecedented state of affairs prevails in the distilling industry of Scotland. It has been announced that the North British distillery is to be closed down. This makes the fourth large grain distillery which has ceased operations in Scotland during the last month or two.

Unjustly Accused.

Andrew Carnegie, at a dinner in New York, talked about the Scotch dialect. "It's a hard lingo to understand, he said. 'It often causes awkward mistakes.

Eight Feet of Ore Uncovered in Wilderness of British Columbia.

A deposit of silver-lead ore running approximately \$85 to the ton has been located by John Ableton of Victoria in the Quambi-an district, some miles from Kossilah.

**CONDENSED NEWS ITEMS**

The London Times declares that the United States and Canada have agreed upon a reciprocity treaty. The terms of the agreement are not given.

The Mikado will not accept resignations, but is showing a firm hand in Japan with intentions of stamping out socialism. Of the 24 socialists condemned to death 12 will be given life sentences and the other 12 will be executed.

A brace of correspondents propounded the following: "Two persons start from Vancouver to circle the earth. One go east; the other go west; both travelling at exactly the same speed. Will one arrive back in Vancouver a day before the other or they will both return at precisely the same moment?" At the same moment. The man going against the sun would gain one day and the man going with the sun would lose one day, but this difference would disappear at 180 parallel. It is self-evident that people travelling equal distances at equal rate of speed will do so in the same time, apart altogether from the direction taken.

John Predmore, aged 116 years of La Grande, Ore., according to authentic records from France, died last week. Until a few

months ago he was able to walk into town with a brisk stride. He was injured in a fall several months ago and he never fully recovered. He was a French-Canadian. He has been a resident of La Grande for 60 years and has lived alone since. He was an ardent Catholic and though living alone, "communed" audibly with his God when lonesome or in trouble.

Andrew Carnegie has donated another ten million dollars towards the Carnegie Institute fund at New York.

The finance department of the Dominion Government is waiting the approval by King George V. of his effigy to be used on the new Canadian gold coins. As soon as this is done and the dies are forwarded, the coinage of gold will begin at the Ottawa branch of the royal mint.

The London Morning Standard says enent Sir Wilfrid Laurier and the manufacturers, that conservation of the boundless resources of the Empire is one of those grand ideas which is bringing Canadian policy in line with the developments that are occurring in every part of the Empire. The Standard does not doubt but that the Premier's previous declaration will hold good, but considers that it would, have been much better had the broad outlines of the proposals between Canada and the United States been started, thereby removing the uncertainty of the present situation.

Judge McMahon, the eminent jurist died at Toronto on the morning of Jan. 18th.

The coldest weather experienced for 35 years is the present state of the atmosphere in Nova Scotia.

Hon. J. G. Foster, U. S. Consul in Canada, has been called to Washington, D. C., in connection with the reciprocity negotiations.

The death of Dr. MacKenzie

occured at Rosland last week from pneumonia, resulting from a chill contracted while carrying out his professional duties.

Logging is going on extensively up the Kettle river this winter and it is estimated that seventeen million feet of timber will go out with the spring flood.

F. W. Peters of the C. P. R. stated that the company had recently closed a deal for a plot in a central section of Calgary on which would be erected during the coming season a magnificent hotel at a cost of \$250,000.

A consignment of frozen eggs from Hankow, China, valued at \$100,000 has been ordered out of the Province of Quebec by the board of control. The city chemist of Montreal pronounced the eggs unfit for use as food.

The extensive use of glycerine in the construction of the Panama Canal has resulted in an increase of 50 per cent in that explosive. Burglars complain that the high cost of equipment is seriously reducing their profits. A small haul is hardly worth the powder to blow it up.

The Washington State Legislature has declared war against the germ-laden oysters of the East, and a bill has been introduced making it a misdemeanor to sell oysters on the half shell unless the oysters can show a clear abstract of title to ownership of the shell. Shades of Olympia! Lobsters are quaking in their shells.

The mortgage deed of All Saint's Church, Cedar Cove, was last week, at a well-attended meeting held in the church, consigned to the flames by Venerable Archdeacon Pentreath. In a short but very interesting address the Archdeacon told the story of the building of the church six years ago. He led his hearers through the history of the parish to the time of the redemption of the mortgage. The handsome gift of \$1500 by a well known lady of the parish settled the fate of the mortgage. The final payment of the debt was made, when \$1870 was tendered in settlement of the loan. The vicar, Rev. H. C. L. Hooper, presided at the meeting.

There is nothing new under the sun. Chew Quan of Canton, who is in America studying machinery and engineering, says: "Chinamen have long been interested in aviation and Chinese history shows that a chiuaman construct-a flying machine about 1000 years ago. It worked all right for a while, then became infested with devils and killed the aviator. For some years nobody wanted to fly again."

Notwithstanding all the extravagance and reckless living of the present time, it is really a saving age. The "save" cry extends all down the line. Save the forests, save the water power, save the nation, save the children, get saved yourself, save your money.

The whole of Canada is much exercised about a report from Washington that wheat will be put on the free list by the trade treaty which is in course of preparation at Washington. **FAMOUS PEOPLE**  
BY FANNIE M. LOTHROP

**MARSHALL SAUNDERS**  
The Popular Canadian Author.

If the temperature of an author's popularity can be measured by the thermometer of sales, then surely the most popular writer in Canada is Miss Marshall Saunders, whose "Beautiful Joe" has sold 400,000 copies, and been translated into Swedish, German and Japanese.

At her grandfather's house in Milton, Nova Scotia, Miss Saunders was born in 1861, the daughter of a clergyman, and a descendant of the John Alden immortalized in verse by Longfellow. Her early days were spent in the beautiful land of Evangeline where the very air seems replete of romance and historic memories. When she was six the family moved to Halifax, and there she received the foundation of her education in private and public schools until fifteen, when she was sent to a boarding school in Scotland and thence to France to put some finishing touches to her education.

On her return to Nova Scotia she taught school for a time and then drifted into literature. Her first short story brought forty dollars, but she soon realized that real success could not be plucked like a rose in a garden; she must pay the price in years of observation, study, training and practice. She spent several years in foreign travel, as a post-graduate course in experience, and then returned to Nova Scotia, ready for the serious work of her life.

In 1894 the American Humane Educational Society offered a prize of \$200 for the best story illustrating kindness to dumb animals. Miss Saunders determined to compete for it. She spent six months in writing a story, the background of which was largely autobiographic and the spirit pervading it her own intense love for animals, the silent appeal of their helplessness finding ever a sympathetic echo in her heart. The committee of award in giving the prize to her book "Beautiful Joe," said: "The author has genius, heart and insight. It is an admirable story and should have an immense sale and become a standard for all libraries" and yet this sweet, sympathetic study of dog life, despite its splendid endorsement, went hanging among the publishers for six months before it was accepted. Miss Saunders having waived her share of the privilege of forfeiting the prize money and retaining her manuscript.

When published it took her place in the very front rank of writers of animal stories. The "Beautiful Joe" is a simple, natural, yet yet humorous story, and a new element in the literature of children. In her additional story "The Dog's Story" she has given a delightful portrayal of the life of the "four-legged friend" of man. Miss Saunders has a gift of facile and natural style and her words are so simple and so true that they find their way into the hearts of all who read them.

**New Scale of Advertising.**

The newspapers of Phoenix, Grand Forks and Greenwood have adopted the following scale of prices for legal advertising for the year 1911:

- Application for liquor license, 30 days, \$4.00.
- Certificate of improvement notices, 60 days, \$7.50.
- Application to purchase land notices, 60 days, \$7.50.
- Delinquent Co-owner notices, 90 days, \$10.00.
- Water notices, 30 days, \$15.00.
- All other legal advertising not included in the above, 12 cents per single column line for the first insertion and 8 cents a line for each subsequent insertion.

Before you take your departure from Greenwood subscribe for your home paper, \$1 for six months, or \$2 a year. You will find it full of interest to you wherever you are.

Chamberlain's Cough Remedy is not a common, everyday cough mixture. It is a meritorious remedy for all the troublesome and dangerous complications resulting from a cold in the head, chest or lungs. Sold by all druggists and dealers.

**The Damper Lever of a MAGNET Wood Furnace**

is where it ought to be—at the front, readily reached without groping in the dark or taking unnecessary steps. A turn of the lever instantly changes the draft so the fire is quickened or checked, at will. Turned on, McClary's Magnet Wood Furnace produces the strongest heat in a few minutes; and the nickelled steel tubes radiate this heat for hours after the draft is shut off. Because of this stored heat McClary's Magnet Wood Furnace is economical and a continuous roaring fire is unnecessary. The heat that goes up the smoke pipe of ordinary wood furnaces, goes into the register pipes of the Magnet. Like the position of the damper, the Magnet Wood Furnace is right all through. Right in principle, right in construction; right in materials. See the Magnet at the McClary agent's in the nearest town. Write to nearest McClary branch for booklet, giving a detailed description. Free, postpaid.

**Piping Hot Water Always Ready**

for every occasion, with the Kootenay Steel Range, without "driving" the fire or wasting fuel. The generous firebox is built so that the water heats very rapidly as it passes through the water front, and gives a plentiful supply. One bath usually empties the boiler heated by an ordinary range with the result that the rest of the family must wait for more water to heat. Not so with the boiler attached to the water front of a

**KOOTENAY Steel Range**

because the Kootenay never fails to heat as much water as is required and as fast as it is used. The nearest McClary Agent will make clear to you the reasons why you ought to own a Kootenay.
