SOME RESOURCES OF GREENWOOD

Gold, Silver, Copper and Coal Mines.---Fruit Farms, Cattle Ranches, Logging Camps, Railways, Stages, Good Roads, Live and Energetic Business Men.

That Greenwood is still striving and struggling for a prominent place in the growing list of interior towns, in British Columbia, is a good sign. She will get there, for we never give up, and the present prospect pleases, and only the want of men is vile. The future looms large for the success of her mining industry, for her fertile valleys to become great producers, for the general prosperity of her business men, and there are those left in this district, who, by their patient tenacity have maintained the local prestige, and will, by working together, build up a thriving business circle in the Boundary, with Greenwood for its hub.

Smelters.

There are two big smelter companies, one operating, and one about to operate whose product, blister copper, is the prime source of revenue to this district.

The British Columbia Copper company has a smelter in town, and mines in several of the surrounding hills, and employs about 400 men all told. The smelter was first built ten years ago, but since then the works have been greatly enlarged and brought up to date. In fact, the Greenwood smelter today is as complete and modern a plant as exists on the continent. The capacity of the three furnaces at present in use is to be augmented by enlarging, and additional furnaces are a feature of the further development of this smelting company's program.

The Dominion Copper company smelter at Boundary Falls has been unfortunately idle for the past few months, but now that the entire property of the company has changed hands, including its mines and smelter, and in the change of ownership these valuable assets now belong to an active, energetic mining and smelting corporation, with H. Cook and J. H. Susmann on the directorate, a new progressive policy of operation is to be looked for, which will increase the number of men employed in and around Greenwood, and add to its already noticable growing prosperity.

Mines.

The most important mine in this district is undoubtedly the Mother Lode, situated two miles west of town, in Deadwood camp. This is favorably placed for convenient and advantageous working, and ships close to two thousand tons of copper ore daily to the Greenwood smelter. The Mother Lode is a town of itself, with a population of 250 people, and has a well equipped store and postoffice, a spacious boarding house, adequate lodging houses for the single men, some thirty neat cottages for the married men and their families, a large change room for the men, and an emergency hospital in case of accidents. The mother lode is the principal employer of labor in the Greenwood mining Division.

Besides the Mother Lode, the British Columbia Copper company own and operate the Denoro, Emma and B. C. mines in Summit camp, the Lone Star and Washington mine in Central camp, the Jackpot group of mines in Wellington camp, the Napoleon mine at Boyd's, Washington, and several other minor properties whose ores are shipped to and treated at their smelter in this town.

The Sunset mine, which is the property of the property of the New Dominion Copper company, is situated in Deadwood camp, adjoining the Mother Lode mine on the east, and has been extensively worked by each succeeding owner of the Boundary Falls smelter. This mine, with the Brooklyn, Idaho and Rawhide at Phoenix, forms the chief source of ore supply for the company's reduction works, and has been a great employer of labor in the past; and with the rejuvenation of the Boundary Falls smelter as a going concern, these mines, with several smaller ones in the neighborhood, which belong to the New Dominion, will ship their quota daily, and be the means of materially increasing the yearly tonnage of ores treated in and near Greenwood, and add materially to the monthly payroll of this town.

Of the smaller mining companies there is no end. The Providence mine, situated at the north end of town, is developed to the 400-foot level, and is only awaiting the advent of the principal officers of the company to resume its profitable mining and development. This mine has been the largest shipper of high grade gold and silver ore, has paid most handsome profits, and can be relied upon to employ a number of men in the near future. Mr. Madden, of Chicago, who is daily expected, is the prime mover, and his early arrival here will mark a new tide in the affairs of this rich gold-silver producer.

The Elkhorn mine, adjoining the Providence to the west, has produced some $75,000 in silver and gold values. Those who have the company's affairs in hand are confident that, with the expenditure of a small amount of capital, the near neighbor of the Providence will be shipping its rich ores again this year. Negotiations are pending and an early resumption of work is expected.

On the road to Phoenix, four miles to the east of Greenwood, is one continuous string of high grade mines, of which the Crescent is possibly the best known. This mine in the past was worked by the owner, Colonel Dickason, of Chicago, and is now being operated by two of Greenwood's enterprising citizens, under lease and bond. They are sinking and stoping on the hundred foot level, and are sacking a quantity of ore running well in gold, silver and copper values, which will be shipped to the smelter for treatment. The lessees are setting an example in economic mining to the owners of the many similar mining properties to the east of town, which is the best advertisement the high grade mines close to town can have, and which will undoubtedly be followed by the Last Chance, Prince Henry, Defiance and others.

Considerable development has been done by a local syndicate on the Diamond Texas, to the north of the Providence mine, and although this syndicate have had no great number of men employed, they have exploited their property to a depth of 185 feet. This claim is the extension of the Providence vein.

On the hills to the southeast of the town are the Bay, Tip Top, Trilby, Dynamo, Starve Out and other mines which are being developed by local men and with local money, and which have ore bodies of excellent promise and good values. The E. P. U., close to town, is in the midst of this aggregation of high grade claims. The Tip Top is the oldest location on this hill and is shipping copper ore to the Greenwood smelter. The Bay vein, being worked by Mr. Fuller and his associates, is noted for its free gold ore. The Dynamo is operated by the Portman Brothers, formerly proprietors of the Greenwood brewery, and will make their fortunes when the Argo tunnel has reached a sufficient distance in the heart of the Skylark hills. These mines employ but few men at present, but are slowly but surely increasing their forces and are a steady source of employment to men living here.

This article continued next week.

INCREASED EFFICIENCY

The following extract from "Principles of Mining," by Herbert C. Hoover, just published, so well describes the position of employer and employed that we take pleasure in quoting it.

Labor unions usually pass through two phases. First, the inertia of the unorganized labor is too often stirred only by demagogic means. After organization through these and other agencies, the lack of balance in the leaders often make for injustice in demands, and for violence to obtain them and disregard of agreements entered upon. As times goes on, men become educated in regard to the rights of their employers, and to the reflection of these rights in ultimate benefit to labor itself. Then the men, as well as the intelligent employer, endeavors to safe guard both interests. When this stage arrives, violence disappears in favor of negotation on economic principles, and the unions achieve their real gains. Given a union with leaders who can control the members, and who are disposed to approach differences in a business spirit, there are sounder positions for the employer, for agreements honorably carried out dismiss the constant harassments of possible strikes. Such unions exist in dozens of trades in this country, and they are entitled to greater recognition. The time when the employer could ride rough shod over his labor is disappearing with the doctrine of "laissez faire", on which it was founded. The sooner the fact is recognized, the better for the employer. The sooner some miners' unions develop from the first into the second stage, the more speedily will their organization secure general respect and influence.

The crying need of labor unions, and of some employers as well, is education on a fundamental of economics too long disregarded by all classes and especially by the academic economist. When the later abandons the theory that wages are the result of supply and demand, and recognize that in these days of international flow of labor, commodies and capital, the real contralling factor in wages is efficiency, then such an educational campaign may become possible. Then will the employer and employee find a common ground on which each can benefit. There lives no engineer who has not seen insensate dispute as to wages where the real difficulty was inefficiency. No administrator begrudges a division with his men of the increased profit arising from increased efficiency. But every administrator begrudges the wage level demanded by labor unions whose policy is decreased efficiency in the false belief that they are providing for more labor.

TEN YEARS AGO

(From Boundary Creek Times of Aug. 19, 1899.)

J. C. Keffer and Miss Keffer, of Cleveland, Ohio, are visiting Mr. and Mrs. Frederic Keffer at Anaconda.

Paul Johnson, M. E., is here. The smelter will be built at the mouth of Copper creek, within the city limits.

James Wilkes, organizer for the Western Federation of Miners, is in town for the purpose of organizing the miners.

Gilbert Mahon and Mr. Norborn drove to the Jewel mine on Wednesday to select the site for the cyanide plant.

A. S. Black, C. Scott Galloway and J. H. McFarlane have applied for the incorporation of Greenwood lodge, A. F. and A. M.

Theo. Kruger, customs officer at Osoyoos, died last week after a prolonged illness. He had lived there for forty years, and leaves a wife and large family.

J. P. McLeod, B. A., the well known barrister, and Miss Kate M. McKenzie were married in St. Andrew's church, New Westminster, on August 10. They will reside at Midway,

Seasonable goods—very cheap at the sale—Barclay & Co.

E PLURIBUS UNUM MINE

Within two hundred yards of the Times office is the E Pluribus Unum mine, operated by Mayor Bunting and his associates, forming a local syndicate, who have been working quietly, systematically and continuously for the past three years.

They have bored the hill for a distance of 1200 feet, and are now 340 feet below the collar of the old shaft, and the indications are that they will strike the vein of rich gold ore almost any day.

The E. P. U. was located by Thos Kearns is May 1898, on a quartz vein carrying high values in gold and silver, and in November of that year Charles Pittock, of the Gem Resturant, took a bond on the property for a goodly figure. He sank on the vein to the 100-foot level, stoping and shipping a large quantity of high grade ore to the Trail smelter, which netted $66 per ton to the fortunate owners. In 1904, W. T. Hunter, of the local branch of the Hunter Kendrick company, bought the E. P. U. the E. P. U. fraction and the Lancaster fraction, and after considerable further development had been done Mayor Bunting organized a syndicate of local men who secured the property in 1906.

The tunnel on the E. P. U. is the longest in the Boundary, and will give depth and a fine gravity system for the handling of the out put. Wm. Lawson and T. Thompson are working there at present, only hand labor being employed, the former having worked in the tunnel since the Bunting syndicate secured the property. Much water has been encountered which indicates a near approach to the vein. Much local interest is taken in the work of this enterprising syndicate, and everyone will be glad to hear of their persevering efforts meeting with a large reward. About 75 per cent of the values in the E. P. U. ore are in gold. The syndicate is out debt and has money in the treasury, and is in every way in a most healthy condition, and well deserving of local support, and it is source of pride to the town.

MIDWAY NOTES

Haying is over.

School starts on Monday.

Local apples are on the market.

A night shift has been put on at the Bruce mine.

Thos. Hardy is expected home, and not alone, this week.

Paul Heilscher is an applicant for the position of postmaster.

W. H. Norris has built a woven wire fence round his fruit ranch.

The trustees are making improvements in the school building.

A. A. McPhail has been appointed school teacher at Anaconda.

W. Powers has bought the livery stables and is doing a rushing business.

Mrs. Charlie Melville has gone to the coast to join her husband and sons there.

H. Eldridge, druggist and postmaster, left for the east on an extended tour on Wednesday.

On Tuesday a farewell concert was given to Rev. J. Wilkie. A big program was arranged, and everyone had a good time.

METALS.

New York, August 19—Silver, 51; Electrolytic copper, 12.65 to 12.85, firm.

London, Aug. 19—Silver 23½; lead, £12. 10s.

Aug 19—Closing quotations on the New York curb and Spokane exchange:

	Bid	Asked
B. C. Copper	7.00	7.25
Granby	95.00	105.00

RE MIDWAY VERNON RY

The following letter from Mr. John Oliver, M. P. P., has been received by Mayor Bunting, and should be of interest to all those who hold accounts against the first extempore builders of the Midway Vernon railway. It will be remembered that some ten miles of grading was more or less completed, between Midway and Rock Creek, and that the wages of the men and the bills for supplies were allowed to remain unpaid to this day.

Mayor Bunting, Greenwood, B. C.:

SIR—Reverting to our conversation on the 15th inst., in respect to moneys owing to workmen, who have been employed upon construction work on the Midway Vernon railway, it is quite clear from the reading of the Midway and Vernon Subsidy Act that if the railway company failed to pay its workmen, the Government would be entitled to retain a sufficient amount of the subsidy to secure the payment of the workmen's wages. This provision would be binding upon the company, its contractors, successors or assigns.

As to the moneys owing by the company or its contractors for supplies, the provisions of the Subsidy Act does not make this a charge against the subsidy, nor do they empower the Government to retain any part of the subsidy for the purpose of meeting these obligations.

In view of the circumstances surrounding the construction of this road, and of the fact that there is reason to believe that the disabilities of the company were to some extent caused by the action of the Government in casting doubts upon the rights of the company to receive the subsidy, I think it would be well for the government to consider the advisability of so amending the Subsidy Act, that not only the wages of the workmen, but that all moneys owing to the citizens of British Columbia, for supplies furnished in connection with the construction of the road, should be a charge against any Provincial Subsidy which the company would be entitled to receive. I would favor such an amendment. I am yours truly,

JOHN OLIVER.

JAYNES—PROUT

On the 12th of August, Arthur Jaynes, one of our popular local merchants, was married to Miss Annie Prout, at the parsonage of the First Methodist Episcopal church, in Spokane. Both Mr. and Mrs. Jaynes have been residents of Greenwood for a number of years, and are well known to all. Mr. Jaynes, with his father, conducts the grocery business of F. Jaynes & Co., on Copper street, and Mrs. Jaynes was for some considerable time in the office of the B. C. Telephone company here.

On their arrival in town on Monday evening from Spokane, the happy couple were the recipients of a serenade from the Greenwood band and members of the fire department, whom Mr. Jaynes entertained in the old time-honored way. The small boys were also regaled with soft drinks and ice cream, and everyone wished the bride and bridegroom every happiness in their wedded life, in which the Times most heartily joins.

A HORSE THIEF

On Monday last, one Viel Marcus, was arrested by Chief Constable Bunbury in the Bank of Commerce. He had been up the Kettle river and helped himself to a horse belonging to a man called Waddell, at Steve's lumber camp, and a saddle belonging to Steve. While trying to pass a forged check at the bank, he was recognized, and the telephone brought the chief to the scene, with the result that Viel is in jail. The case was remanded to allow the prosecution time to procure evidence.

BORES

There are two important and welcome bores in Greenwood. At the north end of town is the Greenwood-Phoenix tunnel, which under the management of Duncan McIntosh has penetrated the hills to a distance of 250 feet by hand labor and is now to be energetically driven by machine drills, the compressor being installed at the present writing. Backed by Chicago capital, this tunnel will develop the mountains between Greenwood and Phoenix, and open up four miles of mineralized country, and will undoubtedly prove a blessing to the whole district.

The Argo tunnel, being driven at the south end of town, is in nearly 200 feet and will develop the Skylark camp hill, east of town, with its numerous richly mineralized claims. Here, too, machinery has been arranged for to supplement hand labor, and every effort is being made to expedite the work. This tunnel work is being executed entirely by local capital, and as a purely local enterprise is deserving of especial success.

But Greenwood has other bores, born, not made, who develop no mineralized areas, employ no labor, create no payroll. Pessimists, knockers and chronic kickers are in this class. True, there are not many, but here they are, and it is up to all to discourage their hand to mouth work.

A bore is a bore, and then some. Everyone who continually cries hard times; everyone who knocks the good work of those whose efforts to benefit the town and its many legitimate enterprises and businesses are apparent if possibly futile; everyone who kicks because times don't improve at once, and cannot see that improvements must come slowly to prove lasting, is a Bore.

It does not augur well for the welfare of any community to allow bores the same rights and privileges that belong to the hopeful and energetic. A pessimistical view of things is inherent in a few. They cannot help it. If it sunshines they find it too hot, and the cool, calm, balmy evenings are too cold. Nothing suits the pessimist. "The country," he persists, "is going to the dogs," so he brings the dogs half way. "We must all die," so he urges the harnessing of the horses to the hearse. "What's the use of doing anything, hoping anything, being anything?" So he lives up to it, doing nothing, hoping nothing, and being nothing.

The knocker hammers his little spike into the wheels of every effort to improve conditions. He spares no deal, no scheme of improvement, no program of useful endeavor. He drives a bargain with himself to hamper and thwart every hopeful, useful movement on the part of his fellow man, and, like the proverbial dog in the manger that he is, won't let the other fellow eat the provender he cannot himself digest, not if he can help it. Screaming at his own misfortunes, he would preach the misfortune of others. May he have a small congregation and no offertory.

The chronic kicker is the last of the three greater bores, who has kicked, is kicking, and always will kick at good, bad and indifferent, at the best and the worst, whose mind is made up of soulless boots in myriad to land a kick at anything and everything but himself. He cannot allow an opportunity to pass by unkicked, and with puerile snickers at the fresh, the beautiful and the green in life and nature, he finds pleasure only in the withered limb, the blasted and the dead. And even these decadent reminders of bygone beauty and usefulness do not please him, and nothing but the grave will keep his feet still and end his confounded kicks.

To elaborate on bores would be easy, but would only be thrusting boredom on our readers. so—Nuf Sed.

ADVERTISE

That it pays to advertise judiciously may be taken for granted. The Boundary country has so much to advertise—mines, smelters, prospects, fruit farms and farm products generally, and the Interstate fair affords the needed opportunity. It will be held in Spokane next month, and now is the time to get the exhibit in readiness, and it is not too soon to appoint some live representative to collect the various exhibits, take them to the fair, secure a good site and show the Spokane people what we in this mining district have to offer the public. Every camp and every mine, as well as every cultivated valley, should be represented. Those who do not advertise their goods should not kick at want of a good chance to show their wares in Spokane this September. Spokane will be the mecca of hundreds of mining engineers and others who are looking for new fields for investment. The American Institute of Mining Engineers will meet in the following week in Spokane and much good will come to this section by the display of a first-class exhibit, so get busy and send your share of Boundary products in good time to the superintendent of the mineral department. We would urge the immediate formation of an exhibit committee to handle this Boundary advertisement, and the appointment of a representative to visit the fair and go there with the goods.

OUTLINES OF CURRENT EVENTS

All the vessels of the Spanish navy have received orders to concentrate at Melilla, Morocco.

Eight C. P. R. special policemen were wounded in the strikers fight at Fort William last week.

Orville Wright has stated that he or his brother could fly a thousands miles in their Aeroplane at a forty-five mile speed.

Two thousand acres of land on the shores of Whatshan lake, for for the sum of $45,000 spot cash has just changed hands.

Admiral Lord Charles Beresford will officiate at the opening ceremonies of the Canadian National Exhibition in Toronto.

The baloon Sirius has succeeded in flying over the Alps under the the pilotage of Mr. Spelterine, who had with him three passengers.

Nothing definite has been decided as to the date of the opening of parliament but either November 11 or 18 appear to be the most likely dates.

Despite his protests, Armed Mirza, the young Shah of Persia, will be officially married soon, and his household has been arranged. The Shah is 11 years old.

The four protective powers, who have guided the destiny of Crete in recent years, have ordered her to lower the Grecian flag, and will send warships to enforce this order.

A severe earthquake shook central Japan last Saturday. All rail. road communication in the affected area is interrupted. Details are meagre owing to the damage to the telegraph system,

Earl Grey Governor General of Canada, who is in the Yukon, is delighted with that vast gold-bearing section of the Dominion and is being received royally at Dawson and other Yukon cities.

Twelve thousand Spaniards have lost their lives in Morocco in the recent fighting, and their are many homes in Spain who mourn the loss of some member or members of their families in the riots at Barcelona and other cities in Spain. There is a grave danger of the revolutionary movement sweeping the entire Kingdom.

Upon the invitation of the Regina City Council and the Board of Trade of that city it has been decided to hold a special meeting of the Canadian Forestry Association there on Sept. 3rd and 4th next.

The army of Roghi, the formidable rebel subject of the Sultan of Morocco, has been defeated by the Imperial troops, who captured his wives. Roghi himself escaped to the mountains. Many of his followers are reported killed or wounded.

A serious explosion on a Russian submarine on Saturday last caused several workmen to be hurled into the water. But two men were killed at the time, but the death list will probably be increased, as some of the men are gravely injured.

Wireless messages from New York are received or interpreted daily by a military station on the Eiffel Tower at Paris, and occasionally radio-telegrams have also been received from Canada, which is believed to form a record in wireless telegraphy.

If the gigantic chimney recently completed at Great Falls, Montana, could be laid down on the ground it would form a tunnel through which three railroad tracks of standard gauge could be laid, side by side. It is 506 feet in height. Its cost was $250,000, and was built for the smelter of the Boston and Montana Consolidated Copper and Silver Mining company.

The B. C. Timber and Forestry Commission will attend the meetings of the First National Conservation Congress of the United States, to be held in the Auditorium of the A. Y. P. E., at Seattle on August 26, 27, 28. They will hold a meeting at Kamloops on September 7, and at Grand Forks on the 18th of September. All interested in our timber reserves should attend.

Next winter you can get ice for yourself, but now you must phone B51 for it.

VANCOUVER MILLING & GRAIN CO. LTD. TRADE MARK V VANCOUVER, CANADA

WOULD YOU WIN A 109-Piece Dinner Set

And at the same time secure the best flour sold in the Province of British Columbia today? Each month we are giving away ten dinner sets to those who are fortunate enough to secure from the sacks of Royal Standard Flour the coupons bearing the winning numbers. Many lucky ones have already secured a dinner set—you may be the next.

But whether you get a dinner set or not, Royal Standard Flour is always a winner. Selected wheat, scientific milling, careful packing and storage, marketing so that it will reach you at perfection's highest point, make Royal Standard the acme of goodness in a flour. Insist upon your grocer carrying it.

MANUFACTURED BY

Vancouver Milling & Grain Co.

LIMITED

VANCOUVER, B. C.

The Alaska-Yukon-Pacific exposition has repaid 40 per cent on the $350,000 bonded indebtedness, which indicates that it will quit with money in the treasury. With the steadily growing attendance, its receipts are growing right along. By the end of the week the 2,000,000 mark will have been passed. Two months more remain for the show to continue, which makes it certain that as many more people will see it. There are three big days ahead. They are Concessionaires day, Seattle day and Taft day. Half a million are expected on these three days. The daily average now exceeds 25,000, so that the fair is exceeding all expectations from an attendance standpoint. This is due to the fact that it pleases everyone. Knocks are so scarce that it seems the hammer has become an obsolete plaything.

The Times of the 28th November, 1814, was the first newspaper printed by Steam power.

A word to the wise is not only sufficient; it is altogether too much.

Do you eat enough of this

The great benefit in health and strength that always is enjoyed by regular eaters of good oatmeal is known the world over. Every year there are more and more eaters of Quaker Oats, which is recognized in this country and in Europe as the one perfect oatmeal.

All the experiments of the government food experts and the athletic trainers of one of our great universities prove that cereal eaters are the strongest and healthiest, and Quaker Oats stands at the head of the list of cereal foods. It is not only the best food, but it's the cheapest food on earth. Eat it daily for breakfast. It's one of the best foods in the world; produced in Canada by Canadians.

For city trade Quaker Oats is packed in the regular size packages, but for those who are not conveniently near the store for daily shopping the large size family package is just the thing. The large package contains a piece of handsome china for the table.

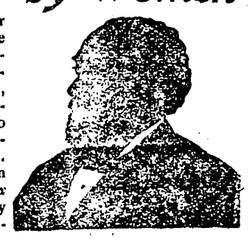
Honored by Women



When a woman speaks of her silent secret suffering she trusts you. Millions have bestowed this mark of confidence on Dr. R. V. Pierce, of Buffalo, N. Y. Everywhere there are women who bear witness to the wonder-working, curing-power of Dr. Pierce's Favorite Prescription—which saves the *suffering sex from pain*, and successfully grapples with woman's weaknesses and *stubborn ills*.

IT MAKES WEAK WOMEN STRONG
IT MAKES SICK WOMEN WELL.

No woman's appeal was ever misdirected or her confidence misplaced when she wrote for advice, to the WORLD'S DISPENSARY MEDICAL ASSOCIATION, Dr. R. V. Pierce, President, Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets induce mild natural bowel movement once a day.

Copper HANDBOOK.

(New Edition issued March, 1908.)
Size: Octavo. Pages: 1228.
Chapters: 25.

Scope: The Copper Industry of the World.

Covering; Copper History, Geology, Geography, Chemistry, Mineralogy, Mining, Milling, Leaching, Smelting, Refining, Brands, Grades, Impurities, Alloys, Uses, Substitutes, Terminology Deposits by Districts, States, Countries and Continents, Mines in Detail, Statistics of Production, Consumption, imports, Exports, Finances, Dividends, etc.

The Copper Handbook is concededly the

WORLD'S STANDARD REFERENCE BOOK ON COPPER

The Miner needs the book for the facts it gives him regarding Geology, Mining, Copper Deposits and Copper Mines.

The Copper Consumer needs the book for every chapter it contains. It tells what and explains how and why.

The Investor in Copper Shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper mining shares.

Price: $5.00 in Buckram with gilt top, or $7.50 in full library morocco.

Terms: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?

restored the bandage to her eyes had again welled over him.

"I am not excusing Hugh now," she went on wildly. "He has gone beyond excuse or forgiveness. He is as dead to me as though I had never known him, though the word you spoke an hour ago made me his wife. I shall have that to remember all my life—that and the one moment I had waited for so long, for my first sight of his face and my bride's kiss! I must carry it with me always. I can never wipe that face from my brain or the sting of that kiss from my lips—the kiss of a forger, of my husband!"

The old man groaned. "I didn't know he had seen her!" he said helplessly. "Jessica, Hugh's sin is not Sanderson's fault!"

In her bitter words was an injustice as passionate as her pain, but for her life she could not help it. She was a woman wrenched and torn, tortured beyond control, numb with anguish.

To Harry Sanderson her words fell with a wholly disproportionate violence. It had never occurred to him that he himself had been individually and actively the cause of Hugh's downfall. The accusation pierced through the armor of self esteem that he had linked and riveted with habit. The same pain of mind that had spurred him on that long ago night to the admission she had heard had started to new life a bared, a scathed, a rekindling sin.

Showered blow upon blow on the hard clay.

"It is all true," he said. It was the inveterate voice of conscience that spoke. "I have been deceiving myself. I was my brother's keeper! I see it now."

She did not catch the deep compunction in the judicial utterance. She stood an instant quivering, then turned and, feeling blindly for the door, swept from their sight.

White and breathless, Jessica climbed the stair. In her room she took a key from a drawer and ran swiftly to the attic studio. She unlocked the door with hurried fingers, tore the wrappings from the tall white figure of the prodigal son and found a heavy mallet. She lifted this with all her strength and showered blow upon blow on the hard clay, her face and hair and shimmering train powdered with the white dust, till the statue lay on the floor, a heap of tumbled fragments.

* * * * * * *

Fateful and passionate as the scene in the library had been, her going left a pall of silence in the room. Harry Sanderson looked at David Stires with pale intentness.

"Yet I would have given my life," he said in a low voice, "to save her this!"

Something in the tone caught the old man. He glanced up.

"I never guessed," he said slowly—"I never guessed that you loved her too."

But Harry had not heard. He did not even know that he had spoken aloud.

David Stires turned his wheel chair to the Korean desk, touching the bell as he did so. He took up the draft and put it into his pocket. He pressed a spring; a panel dropped and disclosed a hidden drawer, from which he took a crackling parchment. It was the will against whose signing Harry had pleaded months before in that same room. The butler entered.

"Witness—my signature, Blake," he said and wrote his name on the last page. "Mr. Sanderson will sign with you."

* * * * * * *

An hour later the fast express that bore Jessica and David Stires was shrieking across the long skeleton railroad bridge, a dotted trail of fire against the deepening night.

Chapter 7

HARRY SANDERSON as he walked slowly back from a long ramble in knickerbockers and Norfolk jacket over the hills was not thinking of the sights and sounds of the pleasant evening. He had tramped miles since sundown and had returned as he set out, gloomy, unrequited, a follower of baffled quest.

Set back from the street in a wide estate of trees and shrubbery stood a great white porched house. Not a light had twinkled from it for nearly a year. The little city had wondered at first, then by degrees had grown indifferent. The secret of that prolonged honeymoon Harry Sanderson and the bishop alone could have told, for the bishop knew of Hugh's criminal act. He was named executor of the will that lay in the Korean chest, and him David Stires had written the truth. His heart had gone out with pity for Jessica, and understanding. The secret he locked in his own breast, as did Harry Sanderson, each thinking the other ignorant of it.

Since that wedding day no shred of news had come to either. Harry had wished for none. To think of Jessica was a recurrent pang, and yet the very combination of the safe in his study he had formed of the letters of her name! In each memory of her he felt the fresh assault of a new and tireless foe—the love which he must deny.

Outcast and criminal as Hugh was, castaway, who had stolen a bank's money and a woman's love, he was still her husband. Hugh's wife! What could she be to him? And this fevered conflict shot through with yet another pang, for the waking smart of compunction which had risen at Jessica's bitter cry, "You helped to make him what he has become!" would not down. That cry had shown him in one clarifying instant the follies and delinquencies of his early career reduplicated as through the facets of a crystal, and in the polarized light of conscience Hugh—loafer, gambler and thief—stood as the type and sign of an enduring accusation.

But if the recollection of that wedding day and its aftermath stalked always with him—if that kiss had seemed to cling again and again to his lips as he sat in the quiet of his study—no one guessed. He seldom played his violin now, but he had shown no outward sign. As time went on he had become no less brilliant, though more inscrutable; not less popular, save perhaps to the parish heresy hunter, for whom he had never cared a straw. But beneath the surface a great change had come to Harry Sanderson.

Tonight as he wended his way past the house in the aspens, through the clatter and commotion of the evening, there was a kind of glaze over his whole face—a shell of melancholy.

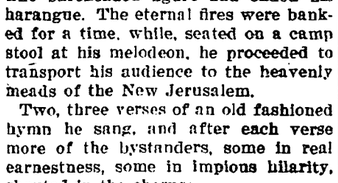
Tomorrow began Harry's summer vacation, and he had planned a month's pedestrian outing through the wide ranch valleys and the farther ranges, and this should set him up again.

Now, however, as he walked along he was bitterly absorbed in thoughts other than his own needs. He passed more than one acquaintance with a stare of nonrecognition. One of these was the bishop, who turned an instant to look after him. The bishop had seen that look frequently of late and had wondered if it betokened physical illness or mental unquiet. More than once he had remembered, with a sigh, the old whisper of Harry Sanderson's early wildness. But he knew youth and its lapses, and he liked and respected him. Only two days before, on the second anniversary of Harry's ordination, he had given him for his silken watch guard a little gold cross engraved with his name and containing the date.

At a crossing the sight of a knot of people on the opposite side of the street awoke Harry from his abstraction. They had gathered around a peripatetic street preacher, who was holding forth in a shrill voice. Beside him on a short pole hung a dripping gasoline flare, and the hissing flame lit his bare head, his thin features, his long hair and his bony hands moving in vehement gestures. A small melodeon on four wheels stood beside him, and on its front was painted in glaring white letters:

HALLELUJAH JONES.
Suffer me that I may speak, and after that I have spoken mock on.
—Job xxi. 3.

From over the way Harry gazed at the tall, stooping figure pitilessly betrayed by the thin alpaca coat, at the ascetic face burned a brick red from



"Woe to them that are at ease in Zion."

exposure to wind and sun, at the flashing eyes, the impassioned earnestness. He paused at the curb and listened curiously, for Hallelujah Jones with his evangelism mingled a spice of the zeal of the socialist. In his thinking the rich and the wicked were mingled inextricably in the great chastisement. He was preaching now from his favorite text: "Woe to them that are at ease in Zion."

Harry smiled grimly. He had always been "at ease in Zion." He wore sumptuous clothes. The ruby in his ring would bring what this plodding exhorter would call a fortune. At this moment Hede, his dapper Finn chauffeur, was polishing the motor car for him to take his cool evening spin. That very afternoon he had put into the little safe in the chapel study $2,000 in gold which he had drawn, a part for his charities and quarterly payments and a part to take with him for the exigencies of his trip. The street evangelist over there preaching paradise and perdition to the grinning yokels often needed a square meal and was lucky if he always knew where he would sleep.

The thread of his thought broke. The bareheaded figure had ended his harangue. The eternal fires were banked for a time, while, seated on a camp stool at his melodeon, he proceeded to transport his audience to the heavenly meads of the New Jerusalem.

Two, three verses of an old fashioned hymn he sang, and after each verse more of the bystanders, some in real earnestness, some in impious hilarity, shouted in the chorus:

"Palms of victory!
Crowns of glory!
Palms of victory I shall wear!"

Harry walked on in a brown study, the refrain ringing through his brain. At the chapel gate lounged his chauffeur awaiting orders.

"Bring the car round, Hede," said Harry, "and I shan't need you after that tonight. I'll drive her myself. You can meet me at the garage."

The study was pitch dark, and Rummy halted on the threshold with a low, ominous growl as Harry fumbled for the electric switch. As he found and pressed it and the place flooded with light, he saw a figure there, the figure of a man who had been sitting alone, beside the empty hearth, who rose, shrinking back from the sudden brilliancy.

It was Hugh Stires.

Chapter 8

HARRY SANDERSON stared at the apparition with a strange feeling, like rising from the dead. The aristocratic features were ravaged like a nicked blade. Dissipation, exposure, shame and unbridled passion had each set its separate seal upon the handsome countenance. Hugh's clothes were shabby genteel and the old slinking grace of wearing them was gone. A thin beard covered his chin, and his shifty look, as he turned it first on Harry and then nervously over his shoulder, had in it a hunted dread, a dogging terror, constant and indefinable. From bad to worse had been a swift descent for Hugh Stires.

The wave of feeling ebbed. Harry drew the window curtains, swung a shade before the light and motioned to the chair.

"Sit down," he said.

Hugh looked his old friend in the face a moment; then his unsteady glance fell to the white carnation in his lapel as he said, "I suppose you wonder why I have come here."

Harry did not answer the implied question. His scrutiny was deliberate, critical and inquiring. "What have you been doing the last year?" he asked.

"Why did you leave it?"

"A little of everything," replied Hugh. "I ran a bucket-shop with Moreau in Sacramento for awhile. Then I went over in the mining country. I took up a claim at Smoky Mountain. That's worth something or may be sometime."

"Why did you leave it?"

Hugh touched his parched lips with his tongue. Again that nervous, sidelong look, that fearful glance over his shoulder.

"I had no money to work it. I had to live. Besides, I'm tired of the whole thing."

The backward glance, the look of dread, were tangible tokens. Harry translated them.

"You are not telling the truth," he said shortly. "What have you done?"

Hugh flinched, but he made sullen answer: "Nothing. What should I have done?"

"That is what I am now inquiring of myself," said Harry. "Your face is a book for any one to read. I see things written on it, Hugh—things that tell a story of wrongdoing. You are afraid."

Hugh shivered under the regard. Did his face really tell so much?

"I don't care to be seen in town," he said. "You wouldn't either, probably, under the circumstances." His gaze dropped to his frayed coat sleeve. In his craven fear of something that he dared not name even to himself and in his wretched need he remembered a night once before when he had sidled into town drunken and soiled to a luxurious room, a refreshing bath, clean linen and a welcome.

"You're the only one in the world I dared come to," he said miserably. "I've walked ten miles today, for I haven't a red cent in my pocket, nor even decent clothes," he ended.

"That can be partly remedied," said Harry after a pause. He took a dark coat from its hook and tossed it to him. "Put that on," he said. "You needn't return it."

Hugh caught the garment. In another moment he had exchanged it for the one he wore and was emptying the old coat's pockets.

"Don't sneak!" said Harry with sudden contempt. "Don't you suppose I know a deck of cards when I see it?"

The thin scar on Hugh's brow reddened. He thrust into his pocket the pasteboards he had made an instinctive move to conceal and buttoned the coat around him. It fitted sufficiently.

"Look here, Harry," he began, "you were a good fellow in old days. I'm sorry I never paid you the money I borrowed. I would have but for—what happened. But you won't go back on me now, will you? I want to get out of the country and begin over again somewhere. Will you loan me the money to do it?"

Hugh was eager and voluble now. The man to whom he appealed was his forlorn hope. He had come with no intention of throwing himself upon his father's mercy. He had wished to see anybody in the world but him.

"If you will, I'll never forget it, Harry!" he cried. "Never, the longest day I live! I'll use every dollar of it just as I say! I will, on my honor!"

"Honor!" he said. "Have you enough to swear by? You are what you are because you are a bad egg. You were

(Continued next week.)

The scent of new mown hay may seem good to the rancher, but Greenwoodites love the smell of sulphur.

The first Chinese child born in the Okanagan country is the son of Lum Lock, of Kelowna.

MINES AND MINING

Platinum to the value of 9,758,000 rubles was exported from Russia in 1908.

Africa is now producing approximately 40 per cent of the world's yearly output of gold.

Mining concessions in Egypt are issued in the form of leases and may be of unlimited size.

The contractors have commenced to deepen the 900 foot shaft on the Josie mine at Rossland to the 1,200-foot level.

J. S. Airheart and others have acquired the Highland mine and mill near Nelson. A force of 35 men will be employed.

Twenty-four men are employed on the Lucky Jim mine at Kaslo. This mine is shipping 200 tons daily to the United States.

John Seward has assumed charge of the New Dominion Copper company's affairs. He is busy examining the various properties of the company and will become a permanent resident of Greenwood.

Glowing reports have been received at Buluwayo, of the discovery in the Abercorn district of British Central Africa, of gold deposits similar to the Rand formation, which are said to extend over an area of six miles.

The Colonial Gold Mining Co., owning the Apex group at Hedley, have their headquarters at Manchester, N. H., and are developing the several veins on their property with a force of 15 men. Hallet R. Robbins is the managing engineer.

A curious source of wealth is reported by the French consul at Mongtze, in upper Tonkin. It lies in wood mines. The wood originally was a pine forest, which the earth swallowed in some cataclysm. Some of the trees are a yard in diameter. They lie in a slanting direction and in sandy soils, which cover them to a depth of about eight yards. As the top branches are well preserved, it is thought the geological convulsion which buried them cannot be of very great antiquity. The wood furnished by these timber mines is imperishable, and the Chinese gladly buy it for coffins.

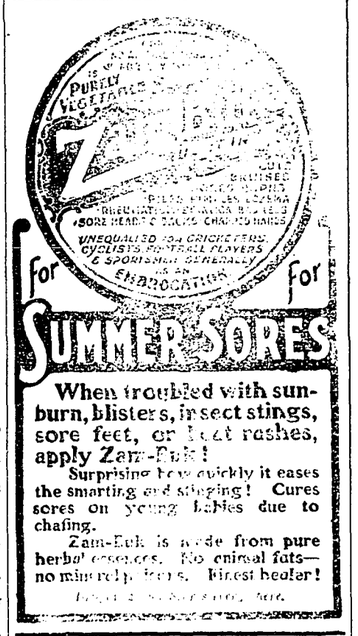
The Athabasca mine, near Nelson, has resumed operations and will employ 25 men. A. W. Constans, one of the new owners, will be manager of the mine and mill. The Athabasca, which is situated on Toad mountain, in view of the city, is one of the oldest properties of the district, having been located in the early nineties, one of the original owners being George Neelands, of Nelson. Mr. Neelands and his associates sold out to the Athabasca Gold Mines, Ltd., a company in which English capital was largely interested. An up-to-date plant was installed and gold to the value of $400,000 and $500,000 recovered.

A rich gold strike is reported on the Embarras river, a stream which empties into the McLeod river twelve miles southwest of Edison, on the Grand Trunk Pacific, and 126 miles west of Edmonton. It is claimed the strike will show $150 to $300 to the pan. The Embarras river, which has never been explored, has its headwaters in the mountains south of the Yellow Head pass, and it is from the mountains that the gold is washed down. Under the placer mining law the discoverer of a mine may stake 1,250 feet along each bank of a river and 1,000 feet on each side of the center of the creek. Three claims have been staked by H. T. James, Ben Farnier and Jim Hopkins, who expect to find fortunes.

A Swedish company has been formed under the name of "Kolm," to acquire Dr. Gustaf Helsing's patents for the production of uranium and radium from kolm and other raw material, to acquire property and claims, and carry on other work in connection with the discovery. "This wonderful material, radium, as we know it, is yet only to be found in minute quantities, and great efforts are being made the world over to find new radium sources, hitherto without success. Radium remains, therefore, at the enormous price of 300,000 kroner for a single gram. The company bases its undertaking on the mineral 'kolm,' from which it takes its name—a kind of coal which occurs in alum schists in the Silurian formations of Westmanland and Nerika, and in stretches of a kilometre long. The kolm is first burned. The ash contains 2.5 per cent uranium, and from uranium there is, theoretically, obtained a millionth part radium. It has been observed that uranium is nearly always accompanied by radium in the same proportions. It is, therefore, anticipated that a ton of kolm will give five mg. of radium sulphate."

In the most magnificent pageant ever seen in the West, 25,000 Masons from all parts of the Pacific coast, will parade the grounds of the Alaska-Yukon-Pacific exposition on Shriners' day, Wednesday, August 25th. Over a half million dollars worth of costumes alone will be used in the procession. Camels, elephants, and a whole menagerie of animals of various kinds will be used in the parade. At night a burlesque parade will be held on the Pay Streak, in which fire effects will play a prominent part.

Belgium is rich in stone and marble. The quarrying industry employs over 37,000 men, and the annual output exceeds $12,000,000.



Synopsis of Canadian North-West

HOMESTEAD REGULATIONS.

ANY available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate. Entry by proxy may, however, be made on certain conditions by the father, mother, son, daughter, brother or sister, of an intending homesteader.

The homesteader is required to perform the conditions connected there with under one of the following plans:

1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal.—Coal mining rights may be leased for a period of twenty-one years at an annual rental of $1 per acre. Not more than 2,560 acres shall be leased to one individual or company. A royalty at the rate of five cents per ton shall be collected on the merchantable coal mined.

W. W. CORY,
Deputy of the Minister of the Interior

N. B.—Unauthorized publication of this advertisement will not be paid for.

WATER NOTICE

NOTICE Is hereby given that an application will be made under part V. of the "Water Act, 1909," to obtain a license in the Similkameen Division of Yale District.

(a.) The name, address and occupation of the applicant. Thomas Williamson, Westbridge Dale District, B. C., rancher.

(b.) The name of the lake, stream or source (if unnamed the description is). A small creek known as Williamson creek, which rises east of Lot 1464, in said district, and runs westerly through part of said Lot 1464, and empties into the Kettle river.

(c.) The point of diversion is about 100 feet easterly from where said creek crosses the east boundary of said Lot 1464.

(d.) The quantity of water applied for in cubic feet per second). Four.

(e.) The character of the proposed works. A dam with pipes, flumes and ditches to distribute the water.

f.) The premises on which the water is to be used (describe same). That portion of said Lot 1464, in said Division, lying easterly from the Kettle river.

(g.) The purposes for which the water is to be used are agricultural purposes (irrigation and domestic purposes).

(h.) If for irrigation describe the land intended to be irrigated, giving acreage. The portion of said Lot 1464 lying east of said Kettle river, and containing about 80 acres.

(i.) Area of Crown land intended to be occupied by the proposed works. None.

(j.) This notice was posted on the 9th day of August, 1909, and application will be made to the Commissioner on the 20th day of August, 1909.

k. Give the names and addresses of any riparian proprietors or licensees who or whose lands are likely to be affected by the proposed works, either above or below the outlet. Columbia and Western Railway company, over whose lands pipes or ditches will run for about 100 feet before reaching east boundary of said Lot 1464, and on whose lands a dam may be built. THOS. WILLIAMSON,
49-10 Westbridge, Yale District, B. C.

TOWN TOPICS

Mrs. Geo. Pierce is visiting friends at Denoro.

J. A. Tuzo is a visitor to town from the West Fork.

Charlie Russell returned from the Forks on Monday.

Arthur Graham and family have settled in Chilliwack.

Fred Holmes has gone to the coast for a month's holiday.

Harry Simmons returned from the Arrow lakes on Tuesday.

John McKinnon of Rossland was a visitor to town this week.

The three children of Mr. and Mrs. Bunbury are in the Hospital.

Jack Lucy is doing assessment work on the Smuggler fraction.

The hay crop this year on the Eholt meadows is exceptionally big.

Mrs. Proctor is the guest of Mrs. Brymner at New Westminister.

Born—To Mr. and Mrs. J. McDonnell, Saturday, August 14th, a son.

J. H. Lock, manager of the Bruce mine was a visitor to town on Tuesday.

A Purvis, C. P. R. Superintendent, paid a visit to Greenwood on Wednesday.

Born—To Mr. and Mrs. Bedard, Anaconda, Monday, August 9th, a daughter.

Bert Taylor and family have returned from their camping holiday at Rock Creek.

Bert Logan and Alex Broomfield are camping and fishing up the main Kettle river.

W. L. Hogg, an old-timer, who has been visiting J. W. Nelson, returned east on Sunday.

A. H. Noyes returned from an extended trip east on Sunday. Mr. Noyes is planning a trip north this week.

J. MacKinnon, of Trail branch, is relieving manager H. F. Stow, of the local branch of the Bank of B. N. A.

The Greenwood tennis club dance on Wednesday evening was well attended and was much enjoyed by all present.

Rev. and Mrs. Venables are spending the close of their vacation at the coast with Mrs. F. M. Elking in Vancouver.

Mr. and Mrs. C. H. Fair and Mr. and Mrs. H. F. Stow are off tomorrow to the West Fork for a fishing and camping holiday.

Pete Boydonick, who was injured by falling down a chute at the Mother Lode mine on Wednesday, was taken to the Hospital.

C. E. Shaw returned from the West Fork country on Sunday. He is surveying the Windfall and Prince fraction for the B. C. Copper Co.

P. G. Morev came in from Ymir on Monday, and will move to the Jewel mine where he is interested in the erection of the new slimes plant.

Mr. and Mrs. B. W. Lincoln, were visitors to Greenwood this week. Mr. Lincoln is chairman of the Protective committee of the Dominion Copper Co.

The B. C. Copper company have taken a bond on the Sappho claim near Midway, and will commence development at once. There is a fine showing of copper ore.

K. C. B. Frith drove a birthday party to Long Lake on Sunday. They took with them 200 trout from Boundary Creek to place in the lake. Dad owns to more than 23 years but denies that he is fifty.

The fire department were called out to a fire at Aanconda on Monday afternoon. The fire was in a small shack, and was all but out when the brigade arrived, thanks to the strenuous effort of Robert Keffer.

A general meeting of the Conservative association of Greenwood Riding will be held in the old Times building, in the Rendell Block, Greenwood, on Friday, August, 27, at 8 p. m. There will be business of importance.

F. H. Shepherd, of Nanaimo, chief inspector of mines, and J. McGregor, district inspector, were visitors to Greenwood this week. Mr. Shepherd is visiting the larger mines in the interior and states that he finds conditions as good as reported.

RIVERSIDE BONDED

The Riverside claim near Rock Creek, was bonded this week by John H. Arnold, an attorney of Columbus, Ohio, for the sum of $16,000, from the Perkins estate. The bond calls for the erection of a concentrating plant to be put on the property before January 1, 1910. The payments extend over two years. The claim has had considerable development work done on it by the previous owner, and also by Sater & Johns, of the Norden hotel, who formerly held a bond on the claim.

A SAD ACCIDENT

On Sunday last, Stewart McGuire, manager of Love's drug store in Phoenix, was drowned in Loon lake, near Eholt. With a party of friends he had ridden to the lake, and went into the cold water too soon after his hot ride, with the sad result that he became weak, and in spite of the efforts of his companions to save him, he was drowned. McGuire's home is in Reyelstoke, where his remains were shipped for the last sad rites.

Application for Transfer of License

Take notice that I intend to apply to the Board of License Commissioners of the city of Greenwood at their next sitting for a transfer of my interest in the liquor license now held by me for the Windsor Hotel, situate on lots 31 and 32, in block 7, plan 21, city of Greenwood, B. C., to Charles McClung.

Dated this 5th August, 1909

JAMES H. GOODEVE

SPOKANE INTERSTATE

All who are interested in mining property in the Boundary should make early preparation to exhibit their ores at the fair to be held September 20-25 inclusive. The mineral department of the Spokane Interstate fair has become more important each year, and the management has determined that this year will be the greatest in all its history. Thousands of eastern people will visit the fair and the mining industry will have greater space than ever before. Every camp in the Pacific Northwest is invited to participate. In addition to unusually liberal prizes, every effort will be made to feature this department.

Freight charges will be paid on all exhibits addressed to the Spokane Interstate fair, which are left in the permanent mineral exhibit. Express charges will not be paid. Former exhibits barred from competition for prizes in all classes.

Address L. K. Armstrong, superintendent, 615 Hyde block, Spokane, Wash., early as to space and other details.

We can supply your wants in House-furnishings. A. L. White, Phone 16.

Ladies white waists bargain prices. Barclay & Co.

Ice equally suitable for refrigerators or ice cream. Phone B51.

GREENWOOD and MIDWAY STAGE

Leaves Greenwood at 7 a.m. to connect with Spokane train; and at 2 p.m with Keremeos train.

J. McDonell.

WATER NOTICE

NOTICE is hereby given that an application will be made under Part V. of the "Water Act, 1909," to obtain a license in the Similkameen Division of Yale District.

(a.) The name, address and occupation of the applicant: Patrick Burns, of the city of Calgary, in the Province of Alberta, wholesale butcher.

(b.) The name of the lake, stream or source (if unnamed the description is): A spring arising on the land of the applicant near its northwest corner, and the water from which, in its natural course, sinks into the ground a short distance from such spring.

(c.) The point of diversion: At such spring.

(d.) The quantity of water applied for (in cubic feet per second): Four.

(e.) The character of the proposed works: A pipe leading from the point of diversion, with branch pipes and open ditches.

(f.) The premises on which the water is to be used (describe same): Subdivision "A," being parts of the northeast quarter and the north half of the southeast quarter of Section 29, and a part of the south half of the southeast quarter of Section 32, in Township 70, in said Similkameen division.

(g.) The purposes for which the water is to be used: Are to supply to and in connection with stock yards and a slaughter house on said Subdivision "A."

(h.) Area of Crown land intended to be occupied by the proposed works: None.

(i.) This notice was posted on the 28th day of July, 1909, and application will be made to the Commissioner on the 9th day of September, 1909.

(j.) Give the names and addresses of any riparian proprietors or licenses who or whose lands are likely to be affected by the proposed works, either above or below the outlet. None.

P. BURNS,
47-40 Calgary, Alberta.
