For your becoming autum shirtwaist suit make a selection from our new Mohairs if you want something handsome. Just received an excellent line of colored Mohairs flaked with white threads, in new shades of brown blue and green. Don't miss this, only 75c. Just received some of the prettiest Mohairs for autum suits in plain and fancy checks. Price only $1.00.

THE NEW FALL READY-TO-WEAR HATS of the newest creations. Our milliner will arrive next week.

**RENDELL & CO.**

Store closes daily at seven o'clock, except Saturdays at 10 p. m.

## MIDWAY AND VERNON

### Four Corps of Engineers at Work.

### A FAIRLY EASY GRADE

**Sub-Contracts Let for a Portion of of the First Twenty Miles.**

There are now four corps of engineers at work on the Midway and Vernon railway Chief Engineer Lackie left yesterday to go over the proposed route and allot work for the engineers. One party is at present working beween Rock Creek and Westbridge and another party is working from that point up the West Fork towards Wilkinson creek, a few miles above Carmi. Engineer Snow will be in this week to take up the work from Wilkinson creek north over the summit, to meet the party under Engineer Frank Fletcher, now working south from Vernon. This covers the whole territory so far as locating the line is concerned.

Contracts have been let between Midway and Rock Creek and the work of constauction is going along as fast as possible, taking into consideration the difficulty in securing labor. The railway will follow the north side of Kettle river to a point near Westbridge.

For the first sixty miles, between Midway and Carmi, the line will be an easy one to construct, the grade being uniform with few difficulties in the form of rock bluffs. Over the summit between Carmi and Okanagan Mission the usual engineering difficulties in a mountainous country will have to be overcome. From the Mission to Vernon no serious difficulties will be encountered.

Construction on the first twenty miles between Midway and Westbridge will be completed by the end of the present year.

Every man owes it to himself and his family to master a trade or profession. Read the display advertisement of the six Morse Schools of Telegraphy, in this issue, and learn how easily a young man or woman may learn teleg raphy and be assured a position.

## BANQUET TO D. ROSS

### Citizens of the Similkameen Entertain

### IT WAS ALL RAILROAD

**And No Politics—A Most Harmonious Gathering.**

From the Hedley Gazette.

When the friends of Duncan Ross, M. P., in Hedley, decided to give some tangible expression of their appreciation of the services rendered by him in their behalf, they chose a fortunate time in having the event take place during the holiday, for by that means they gave a large number of people an opportunity of attending and joining in the general expression of of approval of his course on the important railway legislation before the house.

The event has come and gone and the Gazett is pleased to say that the local committee who had the matter in charge have fully carried out to the letter, (not their promise, for no promise was asked of them, but) their intention to make the function non-political. If the people of Hedley had been asked to give an unqualified approval of Mr. Ross' course, there were many at the banquet board who, being unable to see eye to eye with him, on all questions of public policy, could not have gone in with full spirit and accord as they were enabled to do in this. But with the broad principle for which he strove in conducting the contest for a competitive railway in Southern British Columbia, there is no man, woman or child in the Similkameen who has at heart the truest interests of the district, but can say that he did right, and it was a gracious thing and a proper thing to let the function take this shape that all might join in honoring him for it.

From the chairman down this idea of a non political gathering was kept in view, and nothing transpired during the whole evening to mar the harmony which was bound to dwell where such an idea predominated. The railway itself and the nature of the fight to procure it, constituted a situation that trenched delicately all along the border line of political strife, but every speaker was determined to give no cause for offence and no one, unless carrying the proverbial chip on his shoulder, could find reason to object to a single thing that was said.

Findlay Fraser occupied the chair and in apt words of greeting explained the object of the gathering, calling to his aid a choice fund of anecdote to illustrate his points.

Mr. Ross in respouding to the toast, "Our Guest," expressed his appreciation of the goodwill which the enthusiastic reception of the toast conveyed. After mutual felicitations, he referred to the V., V. & E. fight and said that the passing of the bill is in itself secondary in importance to the establishment of the principle that the people of British Columbia should have the same privileges that were accorded to other provinces. He related the circumstances under which Manitoba had been emancipated and said that what had been gained for Manitoba by asserting force had been attained for British Columbia in a more peaceable way. He had nothing against the C. P. R., which had done its share in developing the country, and the building of its tracks was a national achievement, but he denied its right to control the destinies of the country. There was more involved in the question than the mere building of the V., V. & E. It meant also the building of the C. P. R. from Spence's Bridge through to Midway, and he foreshadowed the building of a railway from the 49th parallel northward to Dawson. Leaving the railway question he deprecated the curse of sectionalism, which had done more than anything else to keep the province back.

---

Greenwood Methodist church will hold a harvest home social on the 25th.

## PRESBYTERY MEETS

### Representatives From All Points in Kootenay.

### TWO CALLS DISPOSED OF

**Ministers Entertained by Ladies of the Church Tuesday Evening.**

The Presbytery of Kootenay convened in the Presbyterian church on Tuesday afternoon at four o'clock. The following ministers were in attendance:

Revs. W. G. W. Fortune, Cranbrook, moderator; R. J. Douglass, Trail, clerk; H. R. Grant, Rossland; T. W. Ferguson, Nelson; E. McColl, Phoenix; J. R. Robertson, Grand Forks; Alex Dunn, Fernie; D. K. Allen, Nakusp; H. Farrer, Kaslo; R. W. Ross, Grand Forks; W. T. Hamilton, Eholt; A. H. Cameron, Midway, W. G. Brown, New Denver, and M. D. McKee, Greenwood.

On Tuesday evening the ladies of the church entertained the members of Presbytery and others at a delightful dinner in the church. Mayor Naden welcomed the Presbytery as representing an important factor in the moral and spiritual welfare of the community. His kindly spirit and hearty welcome were much appreciated by the members of Presbytery, and were reciprocated by a hearty speech by Rev. W. G. W. Fortune, moderator of Presbytery. A special vote of thanks to the ladies of the congregation and friends for the splendid supper was carried on motion of Rev. J. R. Robertson

Home Mission matters are always among the most important for Presbytery consideration. It is expected that all the fields in this Presbytery will be supplied duriug the winter. Rev. A. H. Cameron will devote special attention to Midway and if possible another man will be sent into the district westward. Rev. W. T. Hamilton of Eholt, returns to college to pursue his studies.

Two calls were presented to ministers in this Presbytery. Knox church Kelowna, called the Rev. A. Dunn of Fernie, but as Mr. Dunn did not see his way to accept, this call was declined. Knox church Revelstoke. called Rev. J. R. Robertson of Grand Forks and the Presbytery is to meet in Grand Forks on Tuesday the 26th inst. to consider this call.

A feature of the meetings of Presbytery is always to have a number of special devotinal meetings. On Wednesday morning Rev. W. G- Brown of New Denver gave an exposition of the 23rd Psalm, which was much appreciated. In the afternoon a conference was held when Rev. J. R. Robertson gave an address on "The Kingdom of God" which gave evidence of much thought and study and opened the way for an animated discussion. On Wednesday night a public meeting was held which was very well attended. Two very inspiring and helpful addresses were given by Rev. W. G. Brown and Rev. W. G W. Fortune on the subject "The Value of the Gospel to Society." A pleasing feature of this meeting was the singing of a sacred song by Mr. A. M. Whiteside leader of the Presbyterian choir.

The business of the Presbytery was finished on Thursday at 12 o'clock. A vote of thanks was passed to the pastor, session, managers, ladies of the congregarion and all friends for their very warm hospitality Most of the ministers returned to their homes by Thursday's train.

UNION LABEL

FRIDAY, SEPTEMBER 15, 1905.

ANOTHER stage line from Midway to Greenwood this week.

THE grouse in this district appear to have been fortunate since the season opened.

THERE is very little danger of the editor of the Nelson Tribune making new trails, either mental or otherwise.

THE limit of police patience can be reached. It was reached Sunday forenoon when a female got out on Copper street and declared herself.

NEXT week Colonel Lowery will commence regular monthly shipments of his Claim from Nelson to all parts of the universe excepting Toronto.

THE two new provinces of the Dominion—Alberta and Saskatchewan opened up in business last week, Elections will shortly be held in both provinces, and then the dicision will be rendered as to whether the majority of the people are satisfied with the autonomy bill or not.

HOPES are entertained that the waterworks extension will be completed before the end of the year, but no date has yet been set for turning Lind creek water into the pipes. The system was to have been completed by the 1st of August, but as usual in all great undertakings some of the minor details were omitted.

GRAND FORKS wants another smelter. Other towns also want smelters. Grand Forks wants to borrow $30,000 as a bonus to another smelter. This is unfortunate, as it is said that Grand Forks has already reached the limit of her borrowing power. However, if Grand Forks is considered the most suitable place, the new Dominion Copper company's smelter will be built there whether a bonus is offered or not.

THE Nelson Tribune is in error in regard to the authoiship of the "poetry" which appeared in last week's Times. The Tribune is equally in error in regard to the name of the editor of this paper, which can be found in the usual place on the editorial page. "The Path the Calf Made" was handed in, it looked good to us and was published. It is not the custom among reputable newspapers to steal the editorial utterances of others, and credit miscellaneous matter to a person whose name does not appear as connected with the paper. When the present editor of the Tribune has had more experience it is hoped that the little subterfuges common to the political platform and pulpit will disappear.

THE Nelson News today publishes a dispatch from its Grand Forks correspondent to the effect that the Dominion Copper company has selected its smelter site a short distance north of the Granby smelter. After interviewing Mayor Hammer and a number of other prominent citizens on the subject, we regret to say that the story is, like a great deal of other "stuff" sent out from this town, absolutely untrue. Although it is generally believed that Grand Forks' chances of securing this smelter are excellent, nothing of a definite nature will be known until the council passes the bonus by-law and the Dominion Copper company's surveyors examine the various prospective sites. The News should call "30" on this class of "journalism." The people of Grand Forks do not wish misrepresentations to go abroad. They feel that if the truth is told about the community and its resources that it is the best possible advertisement that could be given it.—Grand Forks Sun.

## MIDWAY NOTES.

From the Star.

The new Presbyterian church will, it is expected, be ready for the initial opening towards the end of the month. probably about the 27th.

Engineer Thomas of the Dominion Copper company was in town Tuesday looking over what Midway had to offer in the way of suitable sites for the proposed new smelter. He appeare. more than satisfied with the locations offered.

Ferry's new cooler is about completed. It contains two cells at the rear of the structure, with offices for the deputy sheriff at the front.

About four and a half miles of steel has been laid so far, according to the statement of one who has just arrived in town from Curlew.

There must be something wrong with that special dispatch from Grand Forks to the Nelson Daily News. We can find nothing to confirm the statement that some people here are threatening to sell liquor without a license. There is, however, a most pronounced type of disgust noticeable here.

The new addition to Crowell's hotel will soon be completed. It gives the hotel a very solid and roomy appearance.

Burns & Jordan's camp, west of town, presents the appearance of an embryo city.

The Townsite company are making arrangements to again open an office in town. They will occupy their old building, and the safe, which since the fire has been in the office of Attorney Leggatt, was moved back to its old quarters.

Sam Flack, who will build Midway's public hall on lots purchased from F. W. McLaine, is at present taking in a supply of ozone at Vancouvdr, from which place he writes that he will start for Midway in a few days.

The new Chinese store and hotel in process of construction on Fifth street more nearly resembles a New York skyscaaper than any building in town.

If anyone imagines the C. P. R. agent and assistant agent have been having a picnic they are badly mistaken. From August 1st to 31st they received no less than 3,800,000 pounds of freight. This also gives some idea of what has been going on in Midway during the same period.

The floating population in town is reduced somewhat compared to what it was a week or two ago. This is doubtless due to the fact contractors are now pushing construction work, and are now using all available help.

Dr. Oppenheimer has been appointed medical health officer of the Midway and Vernon.

## TARIFF COMMISSION.

NELSON, B. C., Sept. 15.—The Tariff Commission will leave Rossland Tuesday morning next for Boundary, going through to Midway on afternoon train. They will return to Greenwood same evening, remaining there for night Wednesday, Phoenix camp will be visited and the night spent at Grand Forks. They will leave for Revelsroke by Thursdays train.

The presence of extensive gold deposits in the gravels of Seward peninsula was first definitely determined in 1898.

## THE WASTE DUMP.

To burn carbon to carbon dioxide two and two thirds its weight of oxygen is necessary.

Some assayers consider sulphuric acid superior to nitric acid for parting low-grade buttons.

Sandstone is hard on diamond drills cutting the bits and rods and wearing the diamonds badly.

For profitable working amber must be found in large quantity, since it is inadmissable to crush the rock containing it.

First class car wheels are made of the best charcoal iron and have exceptionally deep chill. Wheels of this grade should last from 20 to 25 years.

In prospecting a fairly well known region by the use of drills, a solid bit may be used to a point where it is expected ore will be found, after which a core bit is used.

It way be stated that it is impracticable to construct smelting plants of less than 30 tons capacity, The daily tonnage capacity is dependent upon the composition and other characteristics of the ore.

In the Missouri lead districts, the pyrite and chalcopyrite in the drill core is considered an indication of the proximity of lead ore, and it is the common experience that the lead bodies are fringed with pyritic deposits.

Misplaced shafts and tunnels have caused the failure of many a mining company which had otherwise good profpects. As a rule this form of mismanagement has been found due not so much to a deficiency of technical knowledge as to a lack of common sense.

It is estimated that the Irish peat bogs are capable of turning out 50,000,000 tons of fuel for 1,000 years. It is claimed that this fuel is of high calorific value, practically smokeless and yields no clinker. While these estimates and claims may be technically correct, it is doubtful if they could be realized commercially.

Caustic soda, soda ash and tannin will attack boiler scale, and are accordingly used in many boiler compounds. They cannot be given an unqualified recommendation, however, inasmuch as the first and last are more or less injurious to the valves, gaskets and boiler. Sodium triphosphate is is excellent for the purpose, but the cost is usually prohibitive.

One of the most siriking examples of the value of the diamond drill was the discovery of the great deposits of lead ore in southeastern Missouri, Owing to the horizontal structure of the rock formation in that district, and the fact that the ore bodies are overlaid with a stratum of magnesium limestone, there were no outcrops and it is probable that but for the diamond drill these great lead beds would be unknown.

The Republic of Panama retains the right to all mines within its limits, even should the vein or drift lie below the surface of private property. The owner of such property has the right only to the surface and the subsoil belongs to the nation. However the owners of land overlying mines which are ceded or leased by the government have a right to remuneration for the use of the surface of the land by the prospector as provided by law.

A Hungarian chemist has recently discovered a process for rendering building materials proof against the effects of time. It asserted that the substance, which he has named zorene, doubles the density of stone and renders it waterproofr The discovery is the result of a long series of experiments made on some specimens of mortar in Grecian ruins, showing a remarkable preservation. The following experiments are illustrative of the effect of zorene: A piece of ordinary and easily breakable slag after emersion in zorene defied the full blow of a hammer. There was the same effect no ordinary bricks and a block of red jarrah wood All three were then immersed in water for a long time. When taken out and weighed with delicate scales the presence of a single particle of added moisture could not be detected. Two pieces of steel submitted to an ammonia test equal to five years' exposure to the air emerged from the bath as they entered it. An ordinary table knife which had lain open five months did not show the slightost stain. Professor Brunn asserts that he will be able to make roads dust, germ and waterproof, thus giving a commercial value to hundreds of millions of tons of slag which is now useless in the mining and smelting districts. His discovery will at the very least double the life of the metals exposed to the air, such as in bridges, railroads, vessels and tanks.

Drill holes sometimes run through very porous spots which rapidly absorb the water rising from the bit so that it never reaches the surface. Various means are used to stop the leaks in these holes; mixtures of bran, sawdust or manure mixed with water being poured into the holes.

The greater part of the world's consumption of quicksilver is satisfied by the older mines. Besides the older Almaden mines, worked by the Rothschilds under a renewal government agreement for ten years from 1900, there are commercial deposits in the provinces of Almeria, Granada and Oviedo in Spain.

Recent experiments in the preservation of steel favor the use of a coat of adhesive material, followed by parafine paper which is then painted. Results are pronounced excellent.

By heating the air blast the capacity of a smelting furnace is nearly doubled over that of a cold blast furnace.

Mrs. C. G. Brown of Spokane who is in charge of the art department of the Washington State exhibit at the Lewis & Clarke exposition, has returned to Spokane to prepare for the art exhibit which will be given this year at the Spokane Interstate fair, October 9 to 15. Her work at Portland will give her many ideas which she will use to make the art department at Spokane better than it ever has been. The management of the fair has permitted Mrs. Brown to offer a fine premium list for the art students. It can be secured by addressing Mrs. C. G. Brown, Pennington hotel, Spokane, or Robt. H. Cosgrove, manager of the fair.

NOTICE IS HEREBY GIVEN that a duplicate Certificate of Title to the above hereditaments will be issued at the expiration of one month from the date hereof, unless in the meantime valid objection to the contrary be made to me in writing.

Land Registry Office, Kamloops, B. C., August 18, 1905.

W. H. EDMONDS,
District Registrar.

---

**Synopsis of Regulations Governing t s Disposal of Dominion Lands within t e Railway Belt in the Province British Columbia.**

A LICENSE to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths excepting those situated West of Yale for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:—

Sawn lumber, 50 cents per thousand feet B. M.

Railway ties, eight and nine feet long, 1½ and 1¾ cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent on sales

A license is issued as soon as a berth is granted but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.

The dues payable under a permit are $1 50 per thousand feet B. M, for square timber and sawlogs of any wood except oak; from ½ to 1½ cents per lineal foot for building logs; from 12½ to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties; and 50 cents per cord on shingle bolts.

Leases for grazing purposes sre issued for a term of twenty-one years at a rental of two cents per acre per annum,

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more thau 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for agricultural purposes map be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the District, within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is reduired to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence on and cultivation of the land in each year during the term of three years.

It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property, with buildings for their accommodation will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) or any person who is eligible to make a homesteod entry under the provisions 0f the Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY,
Deputy of the Minister of the Interior.

SYDNEY M. JOHNSON,

Frank Spearing of P. W. George & Co., Greenwood, and Bertha Mary Lawrence of Ely, Cambridgeshire, England, were married in Nelson, Thursday, the 7th inst., by Rev. J. T. Ferguson. The Times extends best wishes to the bride and groom.

A good place to stop when in Greenwood is the Queen's hotel. Good board and room. Rates to suit the workingman's pocket. D. Manchester, prop.

### CHEAP RATES TO COAST.

Are you going to Portland fair? If so, why not go while the Dominion exhibition is on at New Westminster, and take in both fairs for the price of one? The Canadian Pacific railway will issue tickets to Portland and return at $21.15, good for 30 days, and to New Westminster on Sept. 25th to Oct. 4th, inclusive, good to return to October 11th, for $19.35 from Greenwood, with corresponding rates from other Kootenay points. Commencing September 26th and continuing daily until October 26th, sleeper will be run between Arrowhead and Vancouver for the accommodation of Kootenay passengers. For tickets, reservations, etc., apply to any C. P. R. agent or write to J. S. Carter, D. P. A., Nelson, B. C.

### NELSON FAIR.

For this event, which takes place September 20th, 21st and 22nd, the Canadian Pacific railway will issue tickets Calgary, Macleod, Midway, Penticton, Rossland, Trout Lake City and intermediate points to Nelson and return on September 18th to 21st, inclusive, good to return to September 25 at rate of single fare.

The combined output of all the dredge manufactories is at present about one machine a week. Preparations are rapidly being made, however, to increase this capacity. It is considered that the increasing popularity of dredging has resulted in placing enough orders to keep the manufacturers busy for four or five years.

A not infrequent source of accident in British collieries is due to the engine man starting the engine before receiving the proper signals. A recent electric device designed to prevent this form of accident makes it impossible to start the engine until a circuit is completed by the man at the top or bottom of the pit.

Natural cements set more rapidly than Portlands, and do not attain so high a tensile strength except after long periods, when they may exceed that of Portlands.

Picrite is a new British explosive which consists of barium nitrate two parts, potassium nitrate four parts, picric acid four parts. It will not explode by the action of heat alone under 360 degrees C.

The weight of the rope used in hoisting has great influence in determining the size of the engine. In the case of flat rope its weight is frequently greater than the remainder of the total load.

An anemometer is an instrument used to ascertain the velocity and quantity of air passing a given point. It consists of a small finely poised fan, the shaft of which is connected to the works of the indicating dial.

The great silver mines of Potosi, Bolivia, were opened in 1545, an Indian having made the discovery of ore by having accidentally exposed native silver in lumps, in the roots of a bush that he had pulled from the ground. It is estimated that since the discovery of the Potosi mines $2,000,000,000 worth of silver has been extracted.

In the latest match making machine the wood from which the match splints are made is pine plank, two inches thick, which, after thorough drying, is resawed into lengths from one and seven-eighths to two and one-half inches, representing the lengths of the matches to be made. The knots and cross-grained parts are cut out of the blocks and these blocks are put into the automatic feedes of a machine, the parafine and composition for the head of the match having been properly prepared and placed in their respective receptacles, where they can be replenished without stopping the machine. The knives or dies that cut the match splint from the blocks are so placed in head block of the machine that then the splints are cut they are separated by a quarter of inch, and placed or set in cast iron plates made into an endless chain by link attachments. At each revolution of the maching 44 matches are cut and set, the machine making from 175 to 200 revolutions a minute. From the cutting end of the machine the endless chain moves along over a drying or heating block prepared for this purpose where the match splint is heated to a degree nearly equal to that required to melt parafine so that the parafine may not chill on the stick when the splint passes through it, but that the end may be thoroughly saturated. The chain moves on to the composition rollers where the match receives its head, and then comes into contact with blasts of cool dry air for an hour and a half when it returns to the place of beginning, just before reaching which the matches are punched out of the chain by an automatic device into small paper or strawboard boxes varying in size containing 465 to 500 matches, the boxes having been fed into a machine automatically. Two million or more paper or strawboard boxes are consumed each day in the packing of matches in America. One million and a half pounds of chlorate of potash are consumed annually in the manufacture of matches.

### THREE JURORS CURED

**Of Cholera Morbus with One Small Bottle of Chamberlain' Colic Cholera and Diarrhoea Remedy.**

Mr. G. W. Fowler of Hightower, Ala. relates an experience he had while serving on a petit jury in a murder case at Edwardsville, county seat of Clebourne county, Alabama. He says: "While there I ate some fresh meat and some sous meat and it gave me cholera morbus in a very severe form. I was never more sick in my life and sent to the drug store for a certain cholera mixture, but the druggist sent me a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy instead, saying that he had what I sent for, but that this medicine was so much better he would rather send it to me in the fix I was in. I took one dose of it and was better in five minutes. The second dose cured me entirely. Two fellow jurors were afflicted in the same manner and one twenty-five cent bottle cured the three of us." For sale by all druggists.

As a striking example of the degree of efficiency that may be attained in in judging the values of ores by inspection, may be cited the practice in vogue in the Linares district of the Spanish lead mines. Assaying is practically unknown there and is not practiced at the mines. The employees have from long experience learned to recognize slight differences in the grade of ores, and even buy concentrates from leasers on the basis of their appearance.

Every man owes it to himself and his family to master a trade or profession. Read the display advertisement of the six Morse Schools of Telegraphy, in this issue, and learn how easily a young man or woman may learn telegraphy and be assured a position.

**Cook's Cotton Root Compound.**

The only safe effectual monthly medicine on which women can depend. Sold in two degrees of strength—No. 1, for ordinary cases, $1 per box; No. 2, 10 degrees stronger for Special Cases, $3 per box. *Sold by all druggists.* Ask for Cook's Cotton Root Compound; take no substitute.

The Cook Medicine Co., Windsor, Ontario.

LIQUID VENEER

MAKES OLD THINGS NEW

**Liquid Veneer** instantly restores the brilliant newness and finish of Pianos, Furniture, Picture Frames Interior Woodwork, Hardwood Floors, and all polished, varnished or enameled surfaces.
It renews and redresses everything it touches. Revarnishing is unnecessary, becauses scratches, stains and dirt instantly disappear, leaving a smooth, brilliant surface.
**Liquid Veneer** is not a varnish, but a surface food that is absorbed by the old finish, instantly restoring the latter to its original brightness. Easy to use—only a piece of cheese cloth is necessary. Dries instantly.
One delighted customer writes that it is worth $100 per bottle. The price is only 50 cents.

You are hereby notified that we have expended the sum of $500 for work on the above-mentioned claim and $12.50 for recording the same for assessment work for five years, such being required and necessary to hold said claim for the years ending the 2nd July, 1900, 1901, 1902, 1903 and 1904, under the provisions of the Mineral Act and Amending Acts, and if at the expiration of ninety days from the date of first publication of this notice in the Boundary Creek Times, you fail or refuse to contribute your portion of such expenditure together with all costs of advertising, your interest in the said mineral claim shall become invested in us, your co-owners, upon filing in the proper office in that behalf the affidavit required by section 4 of the "Mineral Act Amending Act, 1900."

Dated 9th June, 1905.

GEORGE M. MILLER
WILLIAM KINTZ.

### In The County Court of Yale Holden at Greenwood.

IN THE MATTER of the Judgments, Act, and
IN THE MATTER of a Judgment obtained in an action in this Honourable Court.
Between COSENS BROTHERS, Plaintiffs,
and
JAMES WILDER, Defendant.

TO THE DEFENDANT.

TAKE NOTICE that by an order of the Honourable William Ward Spinks, Judge of this Honourable Court, dated the 26th day of July, A. D., 1905,

IT WAS ORDERED that unless cause to the contrary be shewn by the Defendant, on the 5th day of September, A. D. 1905, at the hour of 10:30 in the forenoon, to the presiding Judge in Chambers, at the Court House, in the City of Greenwood, the interest of the Defendant or a competent part thereof, in the following lands, namely: The South West Quarter of Section 18 in Township 67, in the Osoyoos Division of Yale District, British Columbia, be sold by the District Registrar at Greenwood, County of Yale, according to the usual practice, to realize the sum of $109.61, being the amount of debt and costs upon a Judgment obtained by the Plaintiffs (Judgment Creditors) against the Defendant (Judgment Debtor) dated the 17th day of September, A. D 1904, together with interest on the said sum from the said date at the rate of five per centum per annum.

AND IT WAS FURTHER ORDERED that notice of the intention of the said Defendant to shew cause against the said sale must be given by the said Defendant to the Plaintiff's solicitor or his agent twenty-four hours previous to 10:30 o'clock in the forenoon of the said 5th day of September, A. D. 1905, and in default of the service of said notice IT WAS ORDERED that the sale do take place as above directed without further order.

AND FURTHER that a reference be made to the District Registrar of this Honourable Court at Greenwood, B C. to ascertain what judgments form a lien or charge against the said lands and to determine how the proceeds of such sale should be distributed, and to report all such findings to the Court.

AND FURTHER that the costs of and incidental to the application and order be taxed and added to the Judgment debt.

Dated this 1st day of August, A. D. 1905.

[SEAL.] WM. G. McMYNN, Registrar.

## IT IS TOO BAD.

Those of us who have worried lest, in the bickerings of politicians over the admission as states of New Mexico and Arizona, the name of the latter might somehow disappear from the map, will note with unaffeted grief that a double calamity of just this sort has happened up in Canada. There the territories of Athabasca, Assiniboia, Saskatchewan and Alberta have been made into two provinces and the names of them are Saskatchewan and Alberta, the other pair suffering extinguishtment which is a cruel loss and a great pity. What the process or motive of selection may have been is not revealed. In the case of Alberta one can guess that the queer brand of respect for lovalty indigenous in Canada caused reluctance to abandon the name which, though euphonious enough, is certainly the the very worst, since the least characteristic of the four.

The saving of Saskatchewan by the same officials that spared Alberta is, indeed, remarkable, since the chances were that they would be duly inappreciative of its rugged grandeur and intimate congruity with the stern Northwest. Saskatchewan is not beautiful to the eye, sweet to the ear or smooth to the tongue, but it is a most glorious name, nevertheless, and its retention was a demonstration of wisdom that makes almost pardonable that of Alberta, or would if Athabasca and Assiniboia, each a linguistic gem of purest water, had not been dropped into oblivion. The abandonment of names like those, possessing every known and imaginable merit, was, in these days when the English speaking nations seem quite to have lost the nominative faculty, nothing less than crimtnal—it was, indeed, more than crimidal, for it was stupid. The Canadians may think that what they call or do not call their provinces is no business of ours, but it really concern us in half a dozen ways, first of all as loving neighbors and not last of all as neighbors who just possibly may, in some bright future help to break down an absurd and useless division that now exists between peoples obviously destined to coalesce in brotherhood. So even today we have a right to mourn for Athabasca, to shed a salty tear for Assiniboia, to exult over the perpetuation of Saskatchewan, and to sniff disdainfully at Alberta.—New York Times.

## IMPROVEMENTS IN GROUNDS.

Many improvements and changes are being made this year at the grounds of the Spokane Interstate fair. The track has been worked until it is finer than ever. The grand stand has been painted, the office arrangement is entirely different and the midway and ground arrangements have been changed. They are far more commodious than they were in the main exposition building. The midway will be south of the main exposition building with a broad street through it. Concessions will be placed along the track fence opopposite the exposition entrance. The machinery exhibits will stand about where the dog show tent stood last year, the kennel club will move west a short distance, the W. C. T. U. headquarters will be built where the old band stand stood.

Men with whistles, buzzers and banners advertising the Spokane Interstate fair to be held this year from October 9 to 15, are going through the country. They hang the banners and give the whistles and buzzers to the girls and boys.

## HIS DIFFICULTY.

I know that daily exercise
Is what I greatly need,
At 5 a. m. I ought to rise,
I sleep too late, indeed.
I could get up before the sun
And take a little trot
Around the block, it's good to run,
But then I'd rather not.

I know that coffee, also tea,
And alcoholic drink,
Are very, very bad for me,
They are for most, I think.
I might abjure those habits vile
That noble brain besot
And drink cold water all the while,
But then' I'd rather not.

I know quite well it is not good
To live on butcher's meat.
A purely vegetable food
Is what we ought to eat.
A firm and manly will it takes—
And that is what I've got—
To give up cutlets, chops and steaks,
But then' I'd rather not.

I might reform in many ways,
There's need of it, I know,
And possibly one of these days,
An altered man I'll grow.
But ample time you must allow,
For, after all, great Scot,
I want some slight enjoyment now,
That's why I'd rather not.

—Chicago News.

As a striking example of the degree of efficiency that may be attained in in judging the values of ores by inspection, may be cited the practice in vogue in the Linares district of the Spanish lead mines. Arrangements are being made for the organization of a lodge of Knights of Pythias at Midway.

Miss Henderson's millinery opening on Wednesday and Thursday was well attended by the ladies of the city.

R. Parry came in from Beaverdel llast week, where he was doing assessment on his claims for the past three months.

Fifteen parsons-and-a-Salvation-captain visited the city this week. No serious disturbances have been reported.

The E. P. U. mine has been closed down for a few weeks to make necessary repairs to the machinery and tramway.

George Andrews returned last week from a trip through the Similkameen and as far as the summit of Hope mountain.

Mrs. Ed Stirling won the tea cloth in the drawing at the hospital this week. The cloth was beautifully embroidered.

Assistant Superintendent Williams of the Greenwood smelter and Mrs. Williams left Tuesday last to visit tne Portland fair.

Here is a straight tip. The new Dominion Copper company's smelter will be built at Boundary City, just 21 miles from Grand Forks.

D. Carmichael, a cook, better known as "Scotty." died suddenly at Westbridge Saturday, and was buried at that place Monday.

Miss Young of Winnipeg has taken charge of the millinery department at Rendell & Co. See special display of pattern hats next week.

J. S. C. Fraser, manager of the Rossland branch of the Bank of Montreal, was in the city Wednesday and Thursday of last week.

Captain Bassingthwaight of the Salvation Army, Rossland, was in the district this week collecting for the social work of the Army.

H. H. Pannel of Midway leaves next week on a three-months' visit to his old home in Strathroy, Ont.

J. McDonell of Anaconda has started a daily stage line between Greenwood and Midway, leaving Greenwood at 9 a. m. and Midway at 5 p. m.

P. M. Arthur and A. R. Pope arrived in the city Saturday and have accepted positions on the engineering staff of the Midway and Vernon.

Since last issue Dr. Spankie has received the following contributions towards the ambulance fund: Mayor Naden, $10; Dr. Oppenheimer, $5.

A woman who was intoxicated and created a disturbance on Copper street Sunday morning, was fined $10 and costs Monday by the police magistrate.

A slight error occurred in the item referring to the Wabash in last week's issue. Work is being continued on the claim by Mr. Drum's partners in the lease.

The waterworks extension does not appear to be "nearing completion" very rapidly. For some cause known or unknown to those in authority work has been suspended.

G. C. Hodge. Steve Irwin and Willie Howarth of the B. C. Telephone construction line, were in the city yesterday. The line will be completed to Greenwood next week.

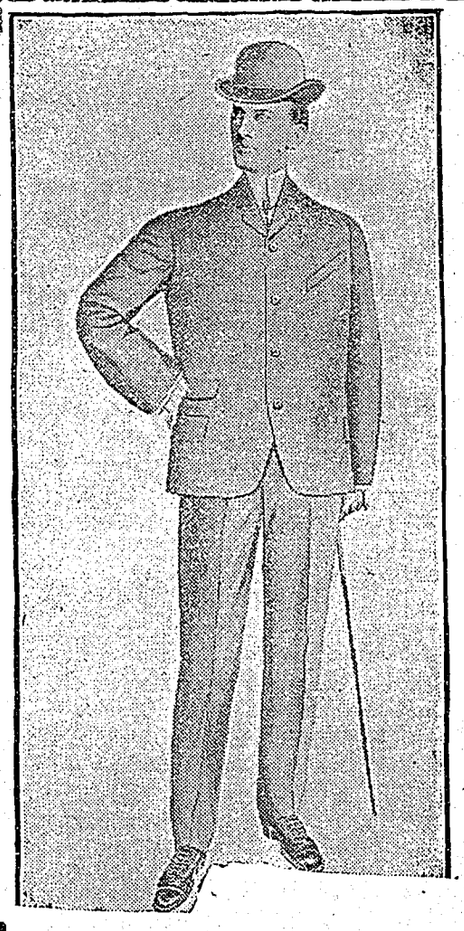
Large numbers of men have arrived lately to work on the Midway and Vernon and V. V. & E., and the camps along the line of construction on both roads are rapidly filling up.

Mrs. J. M. Sutherland and Miss Madge Sutherland, New Carlisle, P. Q., mother and sister of T. F. Sutherland, arrived in the city this week and will spend the winter here.

Ed Angrignon of New Denver spent the past week visiting his brother John Angrignon, foreman at the Providence mine. While here Mr. Angrignon took a number of photographs of the city and the mines suarounding it.

The Old-Timers' Association of the Boundary and Okanagan will hold their annual reunion and banquet at the Lancashire hotel, Midway, this evening. There will, of course, be a real old-timers' time.

J. O. Thompson, with the Russell-Law-Caulfield Co., left this week for Carmi on the West Fork to develop the Lillie, owned by himself and Wm. Morton. It is the intention to sink from the 50 to the 100-foot level.



Where

ARE YOU GOING TO PURCHASE YOUR

Fall Clothes?

TALK THIS QUESTION OVER CAREFULLY

Determine which store can reasonably do the best for you. Such talk will bring you here. We court discussion and investigation. We are now ready for fall buyers. Our variety is fascinating. Styles were never before so elegant and effective. And low prices prevail—prices consistent with high grade goods. It is not a question of value in our store—you know you will get your money's worth. You have only to please your fancy.

WHITE BROS.

Mrs. Whiteside returned the past week from a three months' visit to coast cities including the Portland fair. Miss White of Toronto, who accompanied Mrs. Whiteside, joined a Toronto party of tourists at Nelson Thursday last, with whom she went East.

J. S. Colbach of Nelson, lately appointed superintendent of the Carmi, arrived in the city Monday and left for the West Fork Tuesday. Mrs. Colbach accompanied him. Until he has thoroughly examined the Mine Mr. Colbach was unable to state what the future policy of the company would be.

Frank Mosher and his partner, as well-as-prospecting, have been making trails on the West Fork, They cut a trail from China creek to the summit of the divide between the West Fork and Kelowna, a distance of about thirty miles. This is more work than the provincial government has done in the West Fork district the present season.

Miss Bessie West, who is lame, was in the city yesterday raising money for her education, and succeeded in gathering in a few cartwheels. She has been working the same game in British Columbia towns for the past eight years. It might be inferred from this that her education was lamentably neglected during her youth. Her visits to Nelson have been so frequent that the chief of police had to request her to leave a few days ago. She then promised to go to Spokane, but it is quite evident that she got on the wrong train.—Grand Forks Sun.

**Cured of Lame Back After Fifteen Years of Suffering.**

"I had been troubled with lame back for fifteen years and I found a complete recovery in the use of Chamberlain's Pain Balm," says John G. Bisher, Gillam, Ind. This liniment is also without an equal for sprains and bruises. It is for sale by all druggists.

The Coming of Autumn

AND WINTER

With their long dark evenings, makes one stop and think how they can be best spent for profit and pleasure. Why not improve your time by taking up music, or, if you are a player, please your friends by entertaining them musically.

WE CARRY A VERY GOOD LINE OF

Guitars, Mandolins, Banjos, Violins, Flutes, Piccolos, Cornets, Autoharps, Mouth Organs, etc. Self instructors for each instrument
