Walker's Cheery Copper Weather

MARKET NOT OVERSTOCKED

Consumers Get Ready to Buy Copper—Unmistakable Signs of Clearing Weather

"I feel very confident that there will be decided improvement in the metal market very soon. Unmistakable signs of clearing weather are beginning to appear."

Following the confession that the copper market is decidedly mixed, Geo. L. Walker, the Boston copper authority comes to this cheerful conclusion. Mr. Walker's reasons for so doing are in the following welcome facts.

"Consumers are watching the market a good deal more earnestly than heretofore. It is known positively that a great many of them are all ready to buy copper. There is also basis for the reports that speculative interests are getting together and preparing to take over the surplus copper held by producers if the price is offered down. There is more life and snap to the situation at present, therefore, than at any time previous in two months.

A representative refining interest, who declared that electrolytic copper is obtainable in reasonable amounts at 14 cents, was found to regard the future outlook as hopeful. He thought that the situation might continue nervous for a short time, but that it would soon be better. "There are about 500 buyers of copper in this country, and 700 in Europe," he said. "Their stocks of copper are practically nil. Suppose only 500 of these 1,200 buyers should come into the market and take an average of 100 tons each. This would amount to 50,000 tons, or 100,000,000 pounds. It would not mean much of a buying movement, but it would cut in half the present available supply of copper. If only a few consumers begin buying copper to the extent of their requirements, the price must remain firm around the present level; and if anything should develop that would force consumers to buy, the price will harden.

The reports that China is again buying copper in this country is confirmed. Several purchases have been made and inquiries are now going round for about 1,200,000 pounds more."

Charles Dietz, Hon. President of the Kettle River and South Okanagan Pioneer's Society and one of the first white men in this district, died on the 9th of October in the Old Man's Home in Kamloops. He was in his eightieth year and it was in 1850 when a young man of 22 years, that he rounded the Horn and turned up into the western seas. He had been a sailor but when he reached California the lure of the yellow metal drew him from the seas and he placer mined there for seven years. In 1857 he went to Victoria and came from there by way of Hope, Similkameen and Rock Creek, before placer mining was begun on that creek, on to East Kootenay where he placer mined for several years.

Leaving there he mined at Pind D'Oreilli River for a little while and then returned to Rock Creek and struck White's Bar where considerable gold was taken out. At Camp McKinney he was one of the early prospectors and still held some interests there.

He was a German by birth, being a native of Stettin, Germany. He was born on August 28th, 1828. He will be well remembered by many of the oldest inhabitants of the Boundary.

ANNUAL MEETING

With the exception of John B. Heeny whose place was filled by Judge J. V. O'Donnel of Chicago. All the directors were re-elected at the annual meeting of the Providence Mining Co. on Tuesday last. Mark F. Madden, the president has been in the city all week supervising the plans for the extension work decided upon. The shaft will be sunk 400 ft., farther making a total depth of 1000 feet. Bonds to the amount of \$50,000 will be issued to cover the increased workings. They will be taken up almost entirely by the present stockholders. Mr. Madden left on Friday morning for Chicago. The interests of the Company here will be under the superintendence of W. M. Madden. J. D. Spence was appointed Solicitor for the Company in the place of A. M. Whiteside.

IS IT ANOTHER SMELTER?

The two hundred thousand dollar bond held by F. A. Heinz on the McKinley in Franklin Camp mines expires today, October 18. Considerable interest is excited as to whether the bond will be taken up or not. Several well known prospectors who have properties on the North Fork of the Kettle River claim to have already been approached by parties who are anxious to bond their claims with the understanding that they will be included in the McKinley group. It is also known that representatives of the Butte Millionaire are already up the North Fork and it is claimed that the object they have in view is to bond enough properties to supply a smelter of their own.

MIDWAY & DISTRICT

C. L. Thomet moved into the Swanson building on Sunday last. The house has been entirely renovated from top to bottom, and is now the coziest place in town.

The Sidley mail which has for a long time been carried on the Cudworth stage, is now despatched via the V.V. & E.

W. H. Norris will shortly commence the construction of a five-roomed addition to his residence, the lumber for which was hauled this week.

What appears to have been a bold case of horse stealing occurred in town on Saturday evening last when a mare belonging to A. Restell, who was in J. H. Harrison's office, was stolen. Mr. Restell tethered the animal at the rear of the building, and during his fifteen minutes' absence the animal disappeared, together with saddle and bridle, and no trace of it can be found so far.

It is stated on good authority that a standard gauge spur will be built from Toroda Creek to the Barton mineral claim, situated a short distance south of Ferry on the opposite side of the river. The spur will be built by the Mountain View Mining Company, which has a bond on the property. Considerable development work has already been done, with highly satisfactory results. Mr. Sneed, of Bodie, is the moving spirit in the undertaking, and has interested New York capital in the property.

A large force of Italians is at present engaged loading up the steel in the materials' yard west of town, for shipment to Fernie, where there is a shortage of steel for the grade work already completed. This steel was originally intended for use between Keremeos and Princeton.

The Riverview Farm Co. have just received a pair of fine young pure bred hogs from Indiana. They came by express, the charge by the railway company being \$72, which makes the hogs rather costly.

Up to the time of writing nothing has been done in the matter of appointing a postmaster here in place of the late Ed. A. Hain. Apparently the fact that a vacancy exists has been forgotten by the authorities.

R. Meyerhoff, who has been on a visit to Southern Idaho, returned home Sunday evening.

SMELTER CLOSES

Dominion Copper Co. Ceased Operations Tuesday

PRESIDENT MILLER COMING.

Street Rumors Point to Re-Organization—Nothing Definitely Announced

On Tuesday morning, at 10 o'clock, the Dominion Copper Co. at Boundary Falls closed down its Smelter and the Rawhide and Sunset mines which were working up to that time. Manager W. C. Thomas, when interviewed regarding the shut down on Wednesday morning said that it had come as a bolt from the blue on instructions from the president of the company, Senator Warner Miller, of New York, who had wired him to cease all operations until his arrival. Senator Miller with H. N. Melville, one of the directors, will leave New York tonight (Friday) for the Boundary. Mr. Thomas could not offer any explanation of the fact other than the present extremely low prices of copper and the very high operating expenses in the way of labor had compelled them to close down. On Wednesday morning a few men were still being employed about the smelter, dumping the ore into the bins and cleaning up around the furnaces. A considerable supply of coke is on hand. Up to the day of the shut down, 208 men had been employed by the company. Previous to Sept. 21, there were very many more than this. A late report credits Mr. Thomas with saying that the shut down is only temporary, in order to make some necessary repairs.

The rumors on the street are instructive as a canvass of the situation. The opinion that the Consolidated Mining and Smelting Co. will take over the properties of the Dominion Co. gained considerable acceptance yesterday. The tonnage of the smelter here, it is estimated will form over one per cent. of the entire freight haul of the C.P.R. and is a considerable item to that corporation. It was pointed out that such a move would go to prevent the Great Northern from tapping this trade.

The other blue ruin tendency is to lay the situation at the door of financial manipulation. Hard times will have a very appreciable influence upon the chances of President Roosevelt for a third term and it is thought to be the wish of the large financial interests all over the United States to harass the trust-breaking President.

What all these theories really are worth, it is very hard to say. So far as the Boundary district is concerned all the facilities here are such that, given the same labor conditions ore can be mined here more cheaply than anywhere else on the continent and there is every reason to have great faith in the future, immediate as well as distant, of the country.

The Dominion Copper Co. will, it is expected announce their intentions definitely after the arrival of the President early next week.

PERKINS-DAMM.

The marriage took place on Wednesday evening at 7 o'clock, of Benj. Perkins, formerly of Westport, Ont., nephew of the late Benj. Perkins, of Greenwood, and Miss Hanna Damm. The ceremony was performed by the Rev. M. D. McKee. In the evening a wedding supper was served at the residence of Andrew Sater, in whose employ the bride has been. Mr. and Mrs. Perkins will reside at Mother Lode.

MINE IS THE MINE—WHOSE IS THE TIMBER?

W. Chessier, of Eholt, was the defendant in an action brought before Magistrate McMynn on Wednesday by S. McOrmond, also of Eholt. The plaintiff claimed that Chessier entered on his mineral claim and had cut timber. Chessier admitted cutting the timber but claimed that he had done so through a mistake concerning the lines which marked off the claim.

Whether the right of a holder of a mineral claim include ownership of timber upon it, is a point that has never been tested before here. On account of this fact, the Magistrate imposed no penalty but stated emphatically that the defendant had no right whatever to enter on the claim and cut timber. Nor could he remove the timber already cut thereon.

This case is important for the community because it touches a practice all to general. It clearly establishes the fact that the man who enters upon another man's mineral claim to cut and draw wood therefrom is guilty of theft.

Judge Hallett appeared for the Plaintiff, J. D. Spence, for the Defendant.

THE REBEKAH'S DANCE

"Are you sleepy? Never mind. It was the best time of our lives." The sun was just beginning to think of rising when the persistent strains of "Home Sweet Home" warned the young people at the Rebekah's dance on Thursday morning, that it was time for them to go home. The music which was provided by Messrs. McHenry and Moore remains unequalled in Boundary festivities and the dances were thoroughly enjoyed. When it is announced again that the Rebekahs will look after a supper the feast of Wednesday night will be remembered. The decorations were arranged with great taste and after all, it did break up shortly after three o'clock in the morning.

CITY COUNCIL

At the meeting of the Council on Monday night last, there were present, Mayor Bunting, Aldermen Desrosiers, Sutherland, Nelson and Sullivan. It was decided that the reservoir on Providence Creek be not completed on account of the lateness of the season. A complaint had been laid with the members of the Council that run-ways were too frequent on the streets. The Chief of Police was instructed to see that the By-law governing the leaving of horses on the streets be enforced.

Following accounts were ordered paid: Pacific Coast Pipe Co. \$405.85 E. W. Bishop. 90.35 Babar & McKay. 27.50 W. H. Moore. 4.55 Thos. Park. 5.50 The Lodge. 5.00 Greenwood Waterworks Co. 133.25

A little silver button, on which a dancing bear on a pole has ended, is on exhibition in the window of P. W. George & Co. It is from a sample of ore taken from the Duncan mine, the property of the Wallace Mountain Mining Co. This particular piece of ore when assayed was worth more than \$9,000 to the ton. The assay was made some weeks ago on the basis of 68 cent silver. Look for it. This is what the Boundary can do.

Nothing has yet been done towards securing a railway station for Anaconda. A little concerted action on the part of the citizens in the form of a petition might do much toward convincing the C.P.R. of the need for at least a flag station here. — Anaconda News.

Charles Angrove, an old timer miner of the Boundary is ill with lung trouble in the hospital at San Andreas, Cal. Angrove left Greenwood only about the first of September last and as he was one of the first miners to come into the district will be well remembered. He was last employed at the Mother Lode Mine.

A JAPANESE VISITOR

Examines Smelter and Mines Here

MINING IN SUNNY JAPAN

Low Wages—More Men—Manufacture Copper Products at Mines

An interesting visitor at the Smelter and mines of the B.C. Copper Co. on Tuesday and Wednesday was F. Yamada, engineer of the Ashio Mine, mined and owned by the Furukana Mining Company of Tokio. The properties of the Furukana Company are situated about 80 miles from Tokio and comprise about 30 mines. In many respects the methods of working differ from those used here although the process of smelting and converting is done right at the mines themselves. Labor is on the contrary very cheap, although this year, the men's wages have been raised to 40 cents for a day of eight hours.

"We have no coke shortage in our mines," said Mr. Yamada. Mr. Taranosuki who owns all the stock of the company, is the owner of all the mines in the district. Mines are not mixed up the way they are here. "We have a great deal of coal in this district and from some of it, we get a plentiful supply of coke."

The largest of these mines produces 20 tons of copper a day. The ore carries about 4 per cent. in copper. It is concentrated to 11 and 12 per cent. before it is smelted. About 1,200 tons of copper ore is shipped from the mines yearly.

"The veins in our mines are not so regular and are thinner than here," said Mr. Yamada. "The convolutions of the earth's crust are smaller and more irregular than this country."

Another interesting fact about the Furukana mines is that they have 2 Electric Refining processes each capable of handling about 12,000 tons a day and 2 wire manufacturing plants operating on their own limits. About 10 per cent. of their output is made into wire. A great deal of the rest is exported, now mainly to South China and India. Formerly a market was found for some of it in Hamburg, Germany.

Mr. Yamada is a graduate of the Imperial University, Tokio. He came to Canada to inspect some mines located in the Queen Charlotte Islands. He spent some days at Rossland and Trail, and after leaving the Boundary is going south into the copper fields of Arizona and Montana.

A NEW COMPRESSOR

The installation of a new compound duplex air compressor at the Crescent Mine was completed this week by E. G. Warren of the Electric Light Co. The machine will make 800 cubic feet of air per minute and will handle approximately six 3/4 inch machines. It is driven by a 125 horse-power induction motor. The motor is three phase and operates at a pressure of 2,200 volts. Power will be supplied by the West Kootenay Power and Light Co. and as soon as some pump fittings which are necessary to supply water to cool the jackets of the compressor arrive, the machine will be put in immediate operation. The mine is now equipped with a six-drill compressor, an electric hoist and an electrically driven ventilating fan. The shaft has been sunk already about 250 feet and it is expected that the increased equipment will bring some surprisingly good results for Crescent stockholders.

THE PROTECTION OF THE CHILDREN.

Attention was called rather forcibly on Monday Afternoon to the fact that the City By-laws governing the leaving of horses untied upon the streets were not being enforced. Within an hour or so, two horses went careering down Copper Street on and away from the sidewalks, free and driverless.

Usually at that time in the afternoon there are, it is said, some twenty or more children playing or in charge of Nurse girls on this section of the street. The danger to them and to human life generally is too easily and too lightly passed over. The time for the removal of the danger is now, and not after some serious accident has taken place.

We understand that the thing has been brought to the notice of the Council and that the Chief of Police has been notified to see that the By-Law is enforced.

It is now the duty of the people of the city and particularly of drivers and owners of horses to assist the Chief in the keeping of the law, and protect the public against injury in this matter.

THE GENTLE OCTOPUS
 Latest advices tell us that the furious energies of the C.P.R.

Telegraph Company are being repressed and that it is quietly withdrawing from the fray with the Western newspapers. The old news service is being restored unconditionally to the newspapers outside of Winnipeg at the same rates as were in force before Aug. 1st.

The only difficulty that still awaits adjustment is the fixing of the relations between the C.P.R. and the Western Associated Press, to which most of the new papers of Western Canada now belong. This is to be gone into in a conference between representatives of the two organizations, and with the resumption of amicable relations between the newspapers and the telegraph company it is expected that no difficulty will be experienced in reaching a satisfactory arrangement.

As usual the "Canadian Pacific Railway at headquarters" disclaim any knowledge of the change which has caused the trouble.

One result of the agitation against the immigration of Asiatics is that all the world is now talking of and writing about British Columbia. In a recent issue the New York World says: "The gentle Hindu is having a bad time of it in the Northwest. He is imported into Vancouver, where as a subject of King Edward he would seem to have a good right to go. Vancouverites chase him across the line into United States and the people of Washington chase him back. Statesmanship and brickbats are working here at cross-purposes."

Last week the Phoenix Pioneer announced a Liberal convention for Yale-Cariboo to be held at Vernon on Wednesday November 13th. We believe that it was at one time thought wise to hold a convention at Vernon on this date but all arrangements leading to it have been cancelled for some time. It is not at all likely that any Liberal convention will be held in this constituency this fall.

THE BOUNDARY
 A Unit with the Inland Empire—What it Does, Boundary Will Do.

Geo. L. Walker, Editor of the Boston Commercial, last summer made an extensive trip over this country and in a recently published review of the Inland Empire Electrical Railroad System has some things to say of its resources and of its future. The article is written with reference mainly to the country more immediately surrounding Spokane but includes as well the Boundary District of British Columbia.

Inexhaustible Natural Resources.
 "The Inland Empire, as the Spokane country is known locally, comprises 150,000 square miles and extends for a distance of 150 to 200 miles in all directions from Spokane, an area three times that of the New England States. Spokane is the chief metropolis between St. Paul and the coast cities and is the natural, as well as commercial, distributing point of this vast area.

This Spokane country is not dependent upon any one resource, but has a wonderful diversity of natural advantages. Its forests in 1906 produced 1,250,000,000 feet of lumber, the output of 400 sawmills, valued at over \$30,000,000. Its wonderful mineral deposits in the famous Coeur d'Alene 100 miles east, and in the Boundary country of southern British Columbia have figured largely in prosperity and growth of Spokane."

The Boundary Mines.
 "The output of the Boundary mines, 150 miles to the north of Spokane is \$15,000,000 per annum in copper and gold. This district in 1906 produced 1,175,000 tons of ore. The famous Granby mine alone had an output of over 20,000,000 pounds of fine copper and paid net profits of \$1,823,617."

One of the things we are most likely to forget in the presence of rich mineral deposits is suggested in Mr. Walker's emphasis on the agricultural resources of the country. As the country develops and comes more and more to a commercial basis, it will be found that the valleys of Southern British Columbia will have resources of this kind which only a few observant people now recognize. Mr. Walker says:

"The most important resource any country can have, however, is agriculture, and Spokane's territory is well provided for along this line. In the production per acre of wheat, oats, barley and potatoes the records of the United States Agricultural department show that Washington and Idaho lead all the other states of the Union.

"Although the Inland Empire country is located comparatively far north as judged by eastern standards, its climate is tempered by the winds from the warm currents of the Pacific, and its winters are exceedingly mild. While the Great Lakes farther east are covered every winter with three or four feet of ice, Coeur d'Alene which is in practically the same latitude, remains open all the year round. Steamboats ply back and forth every day in January, the same as in July.

Fertile Soil, Climate Ideal.

"The states of Washington, Idaho and Oregon, and the fertile valleys among the mountains of British Columbia just to the north, are destined to grow rapidly in importance. This section is capable of supporting a tremendous population. The soil is as fertile as the climate is ideal. It is a land of high mountains, some of them capped with perpetual snow, providing bountiful rivers for irrigation and power, and encouraging rain fall to such an extent that a very considerable portion of the area produces excellent crops without the aid of irrigation.
 "It is a country of lakes as well as rivers, of heavy timber, of gold, silver, copper, lead and gold. It seems to share every natural advantage that can be enumerated. It has the resources, and the market is at hand. The food supply

for the great mining camps of the Northwest and of all Alaska will be raised in this country, and a goodly portion of the shining gold accumulated by successful Alaskan miners is already being used to purchase and develop homes in the cities of Spokane, Tacoma, Seattle and Portland.

THE FUTURE OF COPPER

Daniel Guggenheim, head of the American Smelting and Refining Company is reported to have discussed the future of the copper situation a day or two ago in Salt Lake City when there on a tour of inspection of the company's plants in the west. Mr. Guggenheim says the Garfield plant of the company, near Salt Lake, and the plant at Ely, Nevada, will be crowded to their fullest. Speaking of the recent curtailment of copper output he states that this was a natural outgrowth of the fact that the world is doing about 5 per cent. too much business for the money it has. He does not anticipate serious hard times, and declares that as soon as business shrinks to a par with the amount of capital to be invested, the financial situation will be relieved. Copper, he says, is as good as ever, and as soon as money is freer the demand for copper will be greater than ever."

AT THE CHURCHES

ANGELICAN—St. Jude's. Rev. John Leech-Porter, B. D., pastor. Services at 8 a. m., 10:45 a. m. and 7:30 p. m.; Sunday school, 12 p. m. All seats free

PRESBYTERIAN—Services will be conducted morning and evening, 11 a. m. and 7:30 p. m. Rev. M. D. McKee, Pastor.

METHODIST—Rev. F. J. Rutherford, B. A., will conduct services as usual at Methodist Church morning and evening Sunday School at 2:30.

CATHOLIC—Church of the Sacred Heart.—Divine service 1st, third and fourth Sunday in each month. Holy mass at 10 a. m.; vespers and benediction at 7:30 p. m.; Sunday school at 2:30 p. m. Rev. J. A. BEDARD, J. M. I., pastor.

CROSS OF HONOR AWARDED TO PABST

"Blue Ribbon" Carries Off Grand Prize for Highest Quality at World's Competition.

MEDALS FROM BELGIUM

Rare Trophies Won at the International Hygienic and Pure Food Exposition at Antwerp.

MILWAUKEE, Wis., Oct. 5.

Valued above the other hundreds of awards voted to the Pabst brewing company by national and international exhibitions held at various times in the past few decades, a collection of awards which was received by Col. Gustave Pabst from Antwerp will occupy a higher place in the esteem of the company than all the other medals in the Pabst collection.

The awards were brought to Milwaukee by special emissary from the International Hygienic and Pure Food exposition at Antwerp, Belgium, and include the cross of honor of Belgium, known as the grand prize of the exposition, a gold medal and a diploma elaborately studded with seals of noted Europeans, and setting forth that Pabst "Blue Ribbon" beer of quality, received the highest award for purity and excellence at the great exposition held in Antwerp. The awards were made only after the severest tests, known to enlightened science, and demonstrate, under the signatures and seals of the jury and commissioners, that the product of the Pabst Brewing company stood alone among hundreds of other beers submitted at Antwerp for the exhaustive tests of experts.

The arrival of the special messenger from Belgium was an event at the offices of the Pabst Brewing company, and already the medals have been exhibited to many Milwaukeeans interested in the excellence of this city's product as compared with that of the best known breweries in two hemispheres.

GET HIGHEST POSSIBLE HONORS.

The gold medal, which is about two and a half inches in diameter, bears on one side the head in relief of King Leopold of Belgium, who was the patron of the exposition at Antwerp. On the other side is a likeness, also in relief, of the huge building at Antwerp in which the pure food and hygienic exhibit was held.

The cross of honor, or grand prize, is of beautiful design, somewhat similar to other high European orders. It bears decorations of oak leaves set in gold and red enamel. In the middle of the medal proper is the coat of arms of the city of Antwerp. The medal is attached to the crown of Belgium, which in turn is suspended from a ribbon of the tri-color of Belgium.

DIPLOMA OF BEAUTIFUL DESIGN.

The diploma setting forth the fact that "Blue Ribbon" beer was awarded the grand prize at the Antwerp exposition is a beautifully designed document bearing four idealistic figures. The entire wording is in the French language, the court language of Belgium. The body of the diploma sets forth that the "diplome de grand prix" has been awarded to the Pabst Brewing company of Milwaukee. The array of official signatures is the chief feature of the document. The diplo-

ma is signed by the president of the jury which awarded the honors, by the lord mayor of the city of Antwerp, honorary member, the administrator general, and president of the committee of commercial patronage.

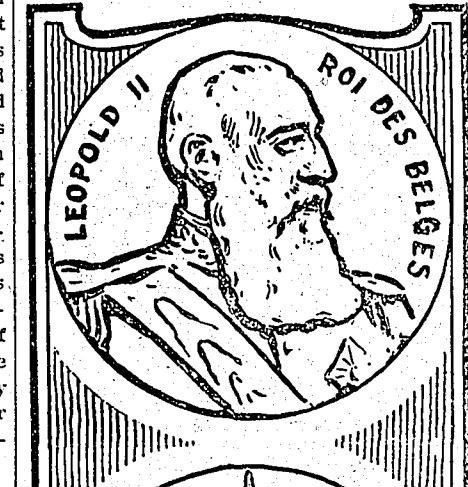

The signatures of the exposition officials are verified and attested to by the minister of foreign affairs of the Royal Belgium government. All these signatures are in turn attested to by the vice and deputy consul general representing the United States government at Antwerp, the two certifications being written in the lower margin of the diploma and accompanied by the respective seals of office.

The background of the middle portion of the diploma sets forth in dim outline a view from the harbor of the port of Antwerp, showing the great shipping interests and in the extreme background the famous cathedral of Antwerp with its high steeple.

With the rising interest, much greater in European countries than in the United States, in pure foods and the general subject of hygiene, the International Hygienic and Pure Food exposition has assumed an important place. To-day its exhibits are the Mecca for thousands of manufacturers, scientists, legislators and workers for the public good from every corner of the world. The awards of the juries are made with such unmistakable impartiality and are so decidedly announced for or against certain food products that the knowledge gained from a visit to the exposition serves as absolute protection against fraud.

The exposition is held annually at different cities decided upon by the board of

COPIES OF THE GOLD MEDAL.

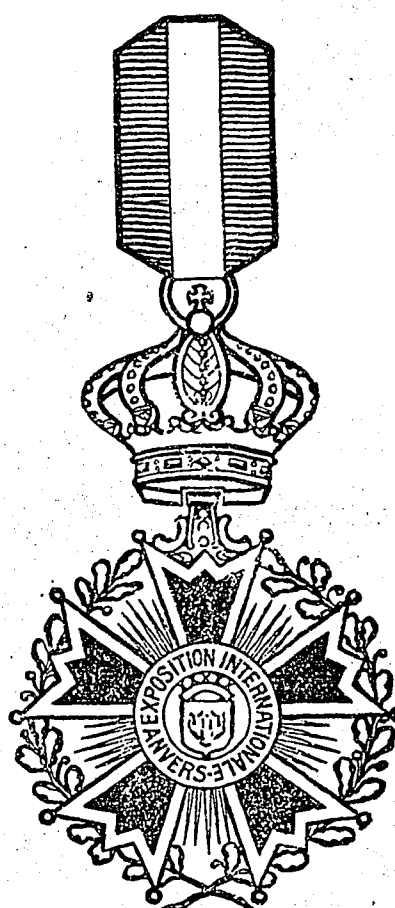

One Side Contains the Head of King Leopold of Belgium and the Other the Famous Exposition Building.

commissioners. In 1906 it was held in Paris, this year in Antwerp and next year it will be held in another city of the continent or in Great Britain. Crowned heads of Europe unite in aiding its welfare, and every civilized country each year sends its most noted scientists to participate in the gathering together of experts from all parts of the world. In Europe the exposition is annually given the greatest publicity throughout the different centers of population, it being the understood object to apprise the people of what is good and what is not good for their general welfare.

The expositions of 1906 and 1907 were attended by thousands of tourists from America, the recent rise of public interest in the subject of pure foods encouraging investigation in the products of the world brought together in one vast exhibit. The department of brewing at the Antwerp exposition was one of the chief features. The fact that the first beer was brewed in what is now the kingdom of Belgium added to the interest in the exhibit and inspired wonderful showings from the different interests of the world. All the

different nations participating in the gathering, the members being selected with special view to their peculiar fitness to judge of the merits of the products coming under their examination. One of the noted members of the jury which undertook the stupendous task of testing the bottled beers and awarding prizes was Prof. Alfred Jørgensen of Copenhagen, Denmark, than whom there is no better known authority on the subject of scientific and hygienic brewing. Others on the jury were men of undoubted ability in their line. The fact that the host of exhibitors in the department of brewing unanimously approved of the membership of the jury bespeaks their ability.

It is probable that the awards now in the care of the Pabst Brewing company will be placed on exhibition at an early date. It being the desire of the officials to permit the public at large to examine the medals and diploma signifying the excellence of Pabst Blue Ribbon Beer.

Cross of Honor.

great breweries of Germany, America, England and other countries made efforts to excel in their exhibits, and when the time came for the highest awards interest was at fever heat.

The tests of the hundreds of samples of bottled beers were most severe. The jury which made the exhaustive tests of the brewery products was made up of scientists, university professors and chemists of note appointed by the Belgian minister of education.

SUBJECTED TO HEAT AND COLD.

The jury's task was a severe one, the tests of each beer extending over a considerable time. Pabst "Blue Ribbon" beer, along with the other varieties, was subjected alternately to extreme degrees of heat and cold. Of all the beers so tested Pabst "Blue Ribbon" was the only one found upon examination to retain all the properties originally contained in the brew. It was finally determined that the "Blue Ribbon" beer took first place among all the other varieties submitted by American and European breweries. Consequently the highest possible honors of the exposition were awarded.

The fact that the American beer took first place was all the more remarkable from the fact that it was necessarily transported a great distance, a factor that might ordinarily have been a decided handicap against other beers sent to Antwerp. The time that the beer was in transit from the brewery in Milwaukee was something like four weeks, and it is generally accepted theory that beer loses through transportation. The Pabst beer apparently was unaffected. Its durability and pureness were found upon examination to be without fault.

The exposition at Antwerp this year was held during the months of June, July and August, the months in which the tourist travel is largest. It was opened by King Leopold, under whose protectorate it was held, the various monarchies and the French republic appointing delegates to represent them in the international show. The exhibits were placed in the great building erected several years ago at Antwerp and designed especially for large expositions of the nature of the pure food show. The juries appointed to make tests in the several departments of the exposition were appointed by the Belgian minister of education with the approval of the different nations participating in the gathering, the members being selected with special view to their peculiar fitness to judge of the merits of the products coming under their examination. One of the noted members of the jury which undertook the stupendous task of testing the bottled beers and awarding prizes was Prof. Alfred Jørgensen of Copenhagen, Denmark, than whom there is no better known authority on the subject of scientific and hygienic brewing. Others on the jury were men of undoubted ability in their line. The fact that the host of exhibitors in the department of brewing unanimously approved of the membership of the jury bespeaks their ability.

It is probable that the awards now in the care of the Pabst Brewing company will be placed on exhibition at an early date. It being the desire of the officials to permit the public at large to examine the medals and diploma signifying the excellence of Pabst Blue Ribbon Beer.

LIND-MELLBERG

The home of Mr. Dagman of Anaconda was the scene of a quiet but pretty wedding on the evening of Wednesday October 9th, when Mr. Alfred John Lind, foreman at the B.C. Copper Co's smelter and Miss Gerda Theresia Mellberg of Anaconda were united in marriage by Rev M. D. McKee.

Mr. and Mrs. Lind are widely known and highly respected in the city and they have the very best wishes of a host of friends. They will live in Greenwood.

THE USES OF COPPER

The average man, if asked to name, offhand, the uses of copper, would be likely to reply that the metal was used mainly for coining pennies and making wire, yet these uses employ barely more than a quarter of the copper that is produced. On second thought he might smile at naming copper coinage as an important consumer of the metal, yet his first thought would be nearer right than his second, for the Chinese Empire has used 50,000 tons of copper for making new coins within the past two years, thereby increasing the circulation medium of the country to the extent of 4 ounces for each inhabitant—for while 50,000 tons of copper is a large quantity of metal, sufficient to load 1,000 freight cars of the heaviest type used on American railroads, it is but a quarter of an avoirdupoise pound per capita when divided among 400,000,000 people.

Only the expert or those engaged most actively in the copper industry have the slightest idea of the diversified uses to which copper is put. Copper enters into almost every form of human activity, and the multiplicity of its uses is most surprising. Electric light, power and traction are immense consumers of the metal in the form of wire, and telephones and telegraphs find it indispensable, yet electricity requires only a trifle more than a quarter of the metal made. The engineering trades consume more than half of all the copper produced, mainly in the form of brass, but there are about a score of friction metals and alloys, each having its specific use, into which copper enters as a component part.

MUSICAL.

MRS. MURRAY, Graduate in Vocal and Instrumental Music is prepared to receive pupils in Piano and Voice. Latest Conservatory Methods Taught. For further particulars and terms apply at Studio in Miller Block room 1.

NOTICE TO CREDITORS

NOTICE is hereby given that on the 14th day of September 1907, it was ordered by His Hon. Judge Brown, Local Judge that A. C. Sutton, Official administrator in and for the Grand Forks and Greenwood electoral Districts be administrator of all and singular the estate of Edward A. Hain formerly of Midway B. C., deceased, intestate.

Every person indebted to said deceased is required to make payment forthwith to the undersigned and every person having in possession effects belonging to deceased is required forthwith to deliver same over to the undersigned.

Every creditor or other person having any claim upon or interest in the distribution of the estate of the deceased is required before the 20th day of November 1907, to send by registered letter addressed to the undersigned, his name and address and full particulars of his claim or interest and a statement of his account (verified by statutory declaration) and the nature of the security if any held by him.

After the 20th day of November 1907, the administrator will proceed with the distribution of the estate having regard to those claims only of which he shall then have had notice.

Dated at Grand Forks, B. C., the 10th October 1907.

A. C. SUTTON, Official Administrator Grand Forks, B. C.

SIMILKAMEEN LAND DISTRICT.

District of Yale.

Take notice that George H. Wilson, of Park Rapids, Minn., occupation, timberman, intends to apply for permission to purchase the following described land, near North Fork of Koot Creek:

Commencing at a post planted 40 chains northward from the north-east corner of Henry Strauss' purchase applied for; thence north 120 chains; thence east 40 chains; thence south 120 chains; thence west 40 chains to point of commencement, and containing 480 acres, more or less.

GEORGE H. WILSON, By Henry Strauss, agent.

Date, August 21, 1907.

LAND REGISTRY ACT.

TAKE NOTICE that an application has been made to register Edmund T. Wickwire as owner in Fee Simple, under a Tax Sale Deed from George Blisset Taylor, Collector of Municipality of the City of Greenwood, to Edmund T. Wickwire, bearing date the 16th day of August, A.D. 1907, of all and singular that certain parcel or tract of land, and premises situate, lying and being in the City of Greenwood, in the Province of British Columbia, more particularly known and described as—Lot Nine (9) Block Ten (10) Map Thirty-four (34) in City of Greenwood.

You and each of you are required to contest the claim of the tax purchaser within forty-five days from the date of the service of this notice upon you, and in default of a caveat or certificate of his pendency being filed—and in default of redemption—within such period, you will be forever estopped and debarred from setting up any claim to or in respect of the said land, and I shall register Edmund T. Wickwire as owner, thereof.

Dated at Land Registry Office, Kamloops, Province of British Columbia, this Twenty-Ninth day of August, A.D. 1907.

W. H. EDMONDS, District Registrar.

THE COPPER HANDBOOK

(New edition issued Nov. 15, 1906)

Is a dozen books in one, covering the history, Geography, Geology, Chemistry, Mineralogy Metallurgy, Terminology, Uses, Statistics and Finances of Copper. It is a practical book, useful to all—and necessary—to most men engaged in any branch of the Copper Industry.

Its facts will pass muster with the trained scientist, and its language is easily understood by the everyday man. It gives the plain facts in plain English without fear or favor.

Its lists and describes 4626 Copper Mines and Companies in all parts of the world, descriptions running from two lines to sixteen pages, according to importance of the property. The Copper Handbook is conceded to be the

WORLD'S STANDARD REFERENCE BOOK ON COPPER

The Mining Man needs the book for the facts it gives him about mines, mining and the metal.

The Investor needs the book for the facts it gives him about mining, mining investments and copper statistics. Hundred of swindling companies are exposed in plain English.

Price is \$5 in Buckram with gilt top; \$7.50 in full library morocco. Will be sent, fully prepaid, on approval, to any address ordered, and may be returned within a week of receipt if not found fully satisfactory.

James Dale, guard of the quarantine, had the unpleasant duty to perform of holding up Moses Burns, one of the oldest of the old-timers on Wednesday Morning.

Work is in progress on the excavations for the foundation of the new compressor to be installed at the Mother Lode mine, and a start will soon be made on the necessary stonework.

The present compressor building will be remodeled so as to accommodate the new machine in addition to the old; thus providing a complete compressor plant in duplicate, and obviating any shut-down for lack of air.

Methodist Church Holds Anniversary Services at which \$370 is Subscribed - Dinner Enjoyed by All

The anniversary services held this week in the Methodist Church were an unqualified success. On Sunday, Rev. R. N. Powell of Nelson was the preacher.

At the close of each service. Mr. Powell made a blackboard appeal for the removal of the entire debt on the church property.

One feature of the evening service was the solo of Mrs. Murray. Her singing was much appreciated by the audience.

From 5.30 until after 8 o'clock Monday Eve, dinner was served to more than 200 people who seemed thoroughly to enjoy the occasion.

The entire services were marked with great enthusiasm and though as usual in such things a great deal of work fell upon a few people, the minister and workers of the church are much pleased at results which greatly exceeded their highest hopes.
