A BARGAIN IN Coal Heaters

We are selling off a good assortment of coal heaters in all sizes at bargain prices. Cold weather will soon be here and you will want a good stove.

SOUVENIR

Stoves and Ranges

Burns Coal or Wood

Large oven and all conveniences. Handsomely mounted with nickel silver.

Souvenir Heaters

All sizes. Handsomely ornamented.

QUEEN HEATERS

In all sizes big and little.

The
Russell-Law-Caulfield, Co. Ltd.

Hardware

Furnishings

Groceries

FALL SUITS

It is time you were placing your order for your FALL and WINTER SUIT. We have them in the best patterns and weights ever brought into this district.

OUR PRICES ARE SURE TO PLEASE.

Copper Street.

Grand Millinery Opening Friday and Saturday

Nothing appeals more to women than Millinery. She recognizes the creating genius that makes for the ideal in Millinery art, realizing this we have spared neither trouble nor expense to secure for our customers the finest range of Fall and Winter Millinery ever shown in Greenwood.

Our grand display includes all the latest and most fashionable Parisian and New York designs, all the most up-to-date colors and shades, and everything in stylish trimmings.

We particularly request that you will visit our show rooms Friday and Saturday, and be convinced that our display is the best in the Boundary country.

Rendell & Co.
Womens' Goods. Men's Goods.

A VIEW OF THE PAST

A Pioneer Writes of Days
Gone By.

BOUNDARY'S PROSPERITY

"Forward" Has Been the Watchword.
—Difficulties Have Been Overcome, Future Is Promising.

A little retrospect is sometimes tonic in its effects. A painting may be a fancy sketch, a photograph can only be the representation of what actually is. The man who looks forward may be unduly optimistic and see things as he would wish them, or he may be unduly pessimistic and see things as he fears they will be. The man who takes a sweep of the backward way, however, sees things as they actually have been, and such a view frequently brings out surprisingly happy results.

Retrospect is like the photograph, a faithful witness to an existent fact. The writer is in a retrospective mood today, and from the high ground of the present turns his vision to the upward way of the past. Eight years is not long in the life of any community. Particularly true is this of a mining camp. In that time millions of feet of lumber may be cut down in the forest, cut up by the mill and carried away to the city and the developing industry be instrumental in converting a wilderness into a thriving milling center.

NOT MADE IN A DAY.

In that time thousands of acres of prairie land may easily be broken and made to produce a million or more bushels of grain destined for the milling centers of a continent. In either case the advance made has the limitations only of men and money. But in a mining district headway can only be made so fast, regardless of resources at command. There are physical limitations to progress, no matter how prodigal capital may wish to be. Only so many men can be used in a shaft, only so many may work in tunnel or drift. Work on a given property must proceed from its initial, and for a long time the number of men employed must necessarily be limited. As the main shaft grows deeper drifts may be run, and more men employed. As the tunnel lengthens numbers may be multiplied. Slow growth can only be the law in lode mining, whereas in clearing the wilderness each tree is an opportunity for a man if need be, and on the prairie an army of men and horses may work side by side.

BOUNDARY HAS PROSPERED.

With all this natural handicap against the rapid development of low grade lode mining, a glance backward

reveals the fact that the progress in mining development in the Boundary has been eminently gratifying regardless of the impatience of the nervous one who wants others to make him rich in a day, or the knee-action of the kicker who wishes he had gone to that green field always somewhere in the distance.

The writer first visited the Boundary eight years ago. From Marcus, the way by the lumbering stage of the day was tedious and tiresome. No Pullman cars rolled into Greenwood and Phoenix and Grand Forks and Midway over the Canadian Pacific. No Great Northern railway touched any point in the Boundary. Grand Forks looked decrepit and dirty, Greenwood was new and raw, Phoenix was wilderness.

On the banks of the Kettle river, where now the Granby, with its eight furnaces, smelts 3,000 tons of ore daily, the fisherman plied his fly, and where the great mines of the company, covering hundreds of acres, employ hundreds of men, the woodchopper then carried on a desultory labor.

The Mother Lode had only the beginning of a shaft and a dozen men or less, while the site of the B. C. Copper Co.'s magnificent works was unattended and the owner found no buyers for his lots.

The hotels of the country were mostly log, and in no sense luxurious. Not a chartered bank did business in the district. Kerosene, foul-smelling and expensive, dimly lit up the more pretentious dwellings, while the tallow dip was good enough for most people.

MODERN CITIES.

Where there were shanties or uncleared lots, today stand hotels with modern appointments. Electric lights make the streets of the towns, and the surroundings of mine and smelter light as day, while power to turn wheels and drive machinery has been brought a hundred miles across mountain and range and deep ravines.

Then the checks of the business men, unbanked for months, were the currency of the district, where today a dozen banks, branches and agencies do a profitable business.

There was little in sight then, but faith was big and hope was strong. A few courageous ones were developing an industry and incidentally making a habitable and prosperous country. Where these men lived for the most part on money obtained elsewhere, today the district's monthly pay roll is a quarter of a million dollars, wealth dug from the mountains, and the productive era of the district has just begun.

ENTERPRISING BUSINESS MEN.

The large business houses of Hunter-Kendrick, Rendell & Co., Russell-Law-Caulfield Co., T. M. Gulley & Co. and A. L. White & Co., carrying an aggregate stock of say \$300,000, have been the outgrowth of improving conditions. Few of the large banks of Canada, now represented in the district, had heard of Greenwood ten years ago, and none of them dreamed then of doing business here today on the deposits of the people.

Churches and schools, and social and improvement clubs have arisen to meet the demands of an improving people. Greenwood provides out of her civic funds to assist a band and a reading room, because the people ask for such improving conditions. Hospitals, with modern equipment and with heroic, self-sacrificing ones to minister to the sick and needy, stand as monuments to the mercy of man and open, hospitable doors to both sick and injured.

What has taken place in low grade mining in these years, will to all appearances be many times multiplied in a similar period in the future, and will doubtless be duplicated in the high grade mines of Greenwood. Of high grade mines we had none eight years ago, while today they are capturing first prizes in the mining competitions at the fairs.

"Progress," in large letters, is written across the face of things in the Boundary, and in the light of already accomplished facts, one must be dull or blind who cannot read the promise of the future.

W. G. GAUNCE.

Lamp oil for use in safety lamps are of two kinds, viz., mineral and vegetable, and all oils at present in use are of these two classes or mixtures of such classes.

AN IMMENSE OUTPUT

Boundary Will Produce 30,000,000 Lbs. of Copper.

DOMINION COPPER CO.

Will Produce 8,500,000 Lbs. Alone.
—W. C. Thomas Tells of the Improvements Now Going On.

W. C. Thomas, smelter superintendent of the Dominion Copper Co., predicts that the output of Copper in the Boundary district this year should be over 30,000,000 pounds.

He says: "As is well known, the Boundary ores are of extremely low grade, but the character of the deposits is such that the ore can be mined at a remarkably low cost, principally by quarrying. The ores contain about 26 pounds of copper to the ton of rock, and gold and silver values average about \$1.50 per ton. A smelter recovery of from 21 to 23 pounds of copper is secured and practically all the gold and silver values. Low milling costs, and the fact that these ores are largely self fluxing, enables the smelter treatment of a large tonnage per furnace.

"The Granby Co. has demonstrated, without question, that copper mining in the Boundary is a very profitable operation, even on a low copper market. It is figured that even with copper selling at 13 cents per pound (a price not likely for some time to come) there is a profit of at least \$1 per ton in treating these ores.

"The Dominion Copper Co. has been in operation under the present management for nine months; but we have our mines well developed, with ore blocked out for more than ten years at the rate of 1,300 tons per day, a good smelting plant which we are now materially enlarging, and \$750,000 cash available for the treasury.

"With one new furnace our output will be increased 700 tons per day, which will give us a total capacity of 1,300 tons per day, or an absolute average of 1,200 tons allowing for shut downs.

"This new furnace will be the largest that has been shipped into the Boundary country, being 225 inches by 48 inches, with a depth of 18 feet between floors. It is equipped with the Giroux hot top blast, and will be fed automatically by side dump cars. The furnaces will effect a saving in labor and fuel of about \$100 per day, which is a matter of \$36,000 per year, or one-third of a cent per pound on our proposed increased output.

"With our new furnace we shall be able to produce from 8,000,000 to 8,500,000 pounds of copper per annum.

"At present, the smelter and mines are being operated by steam power. We will shortly be operating entirely with electric power, at a saving in power costs of about \$100,000 per annum.

"With the installation of our new furnace we expect to produce copper at a cost of not over 8 cents per pound, f. o. b., Boundary.

"We do not intend, however, to be satisfied with a production of 8,500,000 pounds of copper per annum. Our mines are capable of producing the equal of any company in the Boundary, and, as we have recently purchased additional property at our smelter site, there is every reason to anticipate that our capacity will be still further increased."

LIQUORS STOLEN

About 5 o'clock Thursday morning, the Vendome hotel, in Anaconda, was broken into and the supply of liquid refreshments stolen. About 4 o'clock the proprietor, Pete Thompson, went to bed, and when his assistant got up at 5:30 he found the door burst open and the bar dismantled. About \$50 worth of goods were stolen. Mr. Thompson notified the provincial police, but as the burglars left no clues behind, it will be difficult to track them.

At the time of the burglary there was a deal on for the transfer of the license from Mr. Thompson to Mike Chapk.

RAILWAY LEGISLATION.

The News, of Toronto, the alleged independent newspaper, has seen fit to suggest that certain western members of the Dominion House of Commons are allied with corporation interests because they "fathered" certain private bills. The article was copied and commented on by the Columbian of New Westminster, and copied by the Gazette of Grand Forks. The member for Yale-Cariboo is charged with having been responsible for four private bills during the recent session, and Messrs. Galliher and Macpherson with an equal or greater number.

So far as the legislation with which the member for Yale-Cariboo was concerned, its history is briefly told. D. M. Eberts, ex-attorney general, and a prominent Conservative, applied, upon behalf of himself and others, for a charter for a railway running northward from Ashcroft to the Yellow Head pass. The legislation was in accordance with the model railway bill. The road intended to be built was exclusively in the district of Yale-Cariboo, and as it is the custom in such cases, the member for the district was asked to take charge of the bill. He did so, and the bill went through its various stages without opposition. Sir Chas. Herbert Tupper was interested in a similar charter and it was also passed without opposition. The Boundary, Kamloops and Cariboo Central Railway company, comprised of Kamloops people, asked for an extension of time and certain trifling amendments, and these were passed without opposition, and the "Hot Air Line" asked for certain amendments which were passed in a similar way, and under which construction is being pushed up the North Fork of the Kettle River. In all these matters, so far as the member for Yale-Cariboo knows, not a single dollar was spent outside of the regular fees charged by parliament. Does the Gazette suggest that under existing conditions surrounding railway legislation the member for Yale-Cariboo, or any other member, should refuse to take charge of legislation affecting his own district?

The truth is, that railway legislation at Ottawa is more or less of a farce and an unmitigated nuisance. There is no good reason why a general railway act should not be passed, and any one or company of men desirous of doing so, should be allowed to build a railway in accordance with the general railway act and without going to the expense of securing legislation which always conforms to a model railway act. The member for Yale-Cariboo has supported every piece of railway legislation that came before parliament on the ground that the mere permission to build a railway should not be considered of any particular value, and that this permission should never be refused.

Mr. Galliher is given credit for

having been connected with a greater number of railway bills than other western members during the recent session. These bills were largely C. P. R. legislation asking for extension of time and amendments to existing legislation for their various roads in Kootenay district. After his stand on the V., V. & E. bill, two years ago, it is scarcely possible that the C. P. R. is particularly friendly to Mr. Galliher, but as the legislation they desired affected his district, he was asked to take charge of the bills and did so.

In the absence of a general railway act there have been numerous applications for railway legislation in the growing west. The number will largely increase, and because western members interest themselves in securing the necessary legislation to build railways, neither the News, the Columbian nor the Gazette have any grounds for suggesting graft when they are only doing their duty to the west and their constituents.

THE ALLURING NORTH.

To show the extent of immigration from the United States to the north country, a valued correspondent of the Times sends the following interesting account of the movement through the Similkameen:

"The familiar sight of the typical prairie schooner, with occasional variations, a few mornings ago, attracted much attention from the settlers near Five Mile. The advance guard of a large party of ex-Idaho settlers were seen coming along the Similkameen road near Princeton. Being interrogated as to their objective point they stated that they were bound for the '54-40' country, but their intentions were peaceful. They were going to wrestle with agricultural conditions, and having had previous acquaintance with the country by means of a trusty representative, they felt well satisfied that they were making a material improvement by the change. In the advance party were six wagons—men,

women and children, all experienced western settlers. A procession of thirty wagons was following. All were from Southern Idaho, where the land conditions were not favorable. They stated to our informant that this exodus was the beginning of an important movement of the western continental population from Idaho, Washington and other overdone states of the west. Between thirty and forty head of horses, in addition to those in use, accompanied the advance party.

Their advance agent had selected a good stock country along the line of the G. T. P., and when asked if any movement of prospectors and mining men were likely to follow this immigration, they said it was very likely that next season there would be a movement of this class. The party were heading for the Cariboo road via Ashcroft."

UNSCRUPULOUS American real estate manipulators are swindling the public in connection with real estate speculations in the vicinity of the western terminus of the G. T. P. Recently the Spokesman-Review contained a full page "ad" offering lots for sale in Port Simpson, the western terminus of the G. T. P. Port Simpson is not the western terminus of the G. T. P. The advertisers know this, and a newspaper of the standing of the Spokesman should warn its readers against the advertisement which it has published.

Wounds, Bruises and Burns.

By applying an antiseptic dressing to wounds, bruises, burus and like injuries before inflammation sets in, they may be healed without maturation and in about one third the time required by the old treatment. This is the greatest discovery and triumph of modern surgery. Chamberlain's Pain Balm acts on this same principle. It is an antiseptic and when applied to such injuries, causes them to heal very quickly. It also allays the pain and soreness and prevents any danger of blood poisoning. Keep a bottle of Pain Balm in your home and it will save you time and money, not to mention the inconvenience and suffering such injuries entail. For sale by all druggists.

TEN YEARS AGO

Interesting Items from the Boundary Creek Times of 1896.

Mr. Keffer has received instructions to proceed no further with work on the Copper until the American Exploration Co.'s expert arrives from New York and submits his report on the property.

Messrs. J. Lund, F. Humphreys, J. Wilbur and E. Keightley are in Vernon in connection with a forgery case. Mr. McColl, K. C., and A. S. Black have been retained for the defense.

Among the best finds of the year Jim Dale's Carmi must be included. A well defined ledge, five feet wide, has been uncovered, the ore being good milling quartz.

Rory McLeod, one of the owners of the Bank of England claim, intends to do more work on the property. A short time ago a second ledge was found from which promising ore has been taken.

John Moran is laid up with a severe attack of rheumatism, but his friends hope to see him around again shortly.

The extortionate charges of the C. P. R. for local trade in B. C. are so well known as to excite no little comment. Here is one more instance: A small box weighing at least four pounds, was billed 80 cents from Vernon to Penticton, perhaps 70 miles, or a five hours' run by steamer. The same package was carried by Snodgrass' stage to Greenwood, 85 miles of the hardest road in the country, for two bits.

AINSWORTH DISTRICT

Review of Mining Operations in Greenwood's Rival Camp.

It will be remembered that the Ainsworth district won the prize at the Nelson fair for the best display of ores representing a district. At the Spokane fair, however, the Boundary display won the silver cup in competition with the states of Washington, Idaho and Oregon, besides British Columbia. The Boundary and Ainsworth districts are doing much to advertise the mineral resources of British Columbia. In the Ainsworth district the Black Diamond Tunnel company has its long crosscut tunnel now in 2,600 feet and has cut four good ledges containing high grade silver. The first vein encountered in the tunnel was what is known as the Highlander ledge, owned by the company of that name. This ledge was crosscut at a depth of more than 1,000 feet below its apex.

The Highlander company has run a drift 700 feet on the vein, encountering a fine shoot of galena ore 400 feet long and from two to five feet in width. Hundreds of tons of ore have been stoped from the galleries above the drift and sent to Nelson, where it has netted above all expenses, \$10 a ton.

The Albion, on the same ledge, 230 feet north from the tunnel, has made arrangements to use the Black Diamond tunnel and the Albion company is drifting on the vein into its property. Some ore from the 340-foot level of the Albion may soon be shipped. This ore lies 600 feet above the drift from the long tunnel, and at that depth is three feet wide.

The cost of transporting Highlander and Albion ore from the tunnel to the lake will be small, for each company owns a gravity cable tramway.

The miners of the Kootenay lake district have begun cleaning up camp preparatory to taking on the rich minerals with which the hills of that section are ribbed.

The cause of the resumption of mining activity there can be attributed largely to the increased market price for lead and silver, and to the reduction in smelting charges in British Columbia. A few years ago it cost \$20 a ton for freight and treatment, while today \$12 a ton will cover the expenses. This rate can have another big slice shayed off before the miners of British Columbia have a service equal to that of the United States.

The Bluebell mine, on the east side of Kootenay lake, is working a large force of men, quarrying out ore which is all shipped to their Pilot Bay concentrator. The Bluebell is probably one of the largest lead properties in the district, for it has a gigantic vein of almost solid galena from 18 to 25 feet in width. It carries very little silver, however.

Ainsworth camp, on the west side of the lake, is nearly opposite the Bluebell and is the oldest mining camp in the Kootenay district, and is noted for the immense amount of ore taken from the surface of its prospects. The veins, in general, are large, with good lenses of

BOUNDARY ORE TONNAGE.

The following table gives the ore shipments of the Boundary mines for 1900, 1901, 1902, 1903, 1904, 1905 and 1906, as reported to the Boundary Creek Times:

ore running through them, the latter ranging from 18 inches to 6 feet in width, and carrying, on an average, 30 ounces of silver, 60 per cent lead and some gold to the ton.

The Krao, located by A. D. Wheeler in 1885, and still owned by him, is attracting much attention on account of the large amount of wire and ruby silver it carries. About 12 tons of ore are being shipped daily, which averages, without concentrating, \$150 a ton, and even though the lowest workings are but 100 feet below the surface.

The Number 1, conceded to be the highest grade mine in the district, is now preparing to ship.

A number of the mines in the district—the United, Maestro, Spokane Trinket, Little Donald and Black Diamond—are being worked under lease, and much ore is being shipped from the surface, though little work is being done on them at depth. Frank McCullough of Spokane, owns the Spokane and the Trinket; and Number 27, Jeannette and the Keystone are owned by A. L. White, and J. M. Moore of Spokane, who are now negotiating with parties who desire to secure the properties by lease and bond.

The Maestro, under lease to Grant King, has taken out eight carloads of ore in the last 60 days that will net him \$6,000, the expense for mining being only \$4 per ton. The Spokane and Trinket, under lease to George Baruhart, are hauling about eight tons of clean ore per day to the wharf.

NEW ELECTRIC LAMP

The Osram electric lamp is a new invention on the German market undergoing test. It replaces the carbon filament for glow lamps by fine wires of wolfram, which are claimed to employ only one-third of the energy heretofore required. A test at Charlottenburg showed that after use of 1,000 hours there was an average loss of brilliancy of 6.3 per cent in the case of 25 candle power lamps, and 3.6 per cent in the 32-candle power lamps. Of the 16 lamps under test 11 were not damaged, and were capable of continued use. This new lamp shares with the Osmium lamp the drawback that it can only be used hanging downward, but a technical writer says that it may be assumed with certainty that this disadvantage will be overcome.

At the arsenic plant of the Anaconda Copper company, Montana, eleven to eighteen tons of arsenic are recovered monthly from eleven tons of fine blue dust put through daily. The product is sold readily at 6 cents to 7 cents per pound. The workmen are protected against the poisonous effect of the fumes by the use of cotton in nose and ears, by aspirators worn over the mouth and nose, by not working hard enough to perspire, by washing carefully after working and by anointing exposed portions of the face with freshly precipitated ferric hydroxide rubbed on with the fingers.

SIR CHAS. CLIFTON BROWNE

Cured of Bilious Headache by Bileans.

Sir Chas. Clifton Browne, who has toured considerably in Canada, interviewed at his Deal (Kent), residence, admitted that he had reaped very great benefit from Bileans.

He said: "I have no objection to you stating that I found Bileans a very fine medicine for biliousness, headache and digestive troubles generally. I suffered frequently from bilious headache, and nothing that I have ever yet tried did me so much good as Bileans. I believe they are a good thing and worthy of success."

In those last few words Sir Charles aptly summarizes Bileans: "A good thing." They are compounded from purely vegetable essences, and are the best possible remedy obtainable for headache, debility, dizziness, indigestion, etc. They also operate gently on the bowels, curing constipation, piles, etc. They correct female irregularities and ailments, pains in the loins and bearing down pains. They tone up the whole system and enable it to throw off colds, chills, rheumatism, etc. Anaemic and pale-faced women and girls will find them a veritable boon. Of all druggists at 50c. a box, or post free upon receipt of price from the Bilean Co., Toronto; 6 boxes for \$2.50. Send one cent stamp for sample box.

An Awful Cough Cured.

"Two years ago our little girl had a touch of pneumonia, which left her with an awful cough. She had spells of coughing, just like one with the whooping cough and some thought she would not get well at all. We got a bottle of Chamberlain's Cough Remedy, which acted like a charm. She stopped coughing and got stout and fat," writes Mrs. Ora Bussard, Brubaker, Ill. This remedy is for sale by all druggists.

SUNDAY SERVICES.

CATHOLIC—Church of the Sacred Heart.—Divine service 1st, third and fourth Sunday in each month. Holy mass at 10 a. m.; vespers and benediction at 7:30 p. m.; Sunday school at 2:30 p. m. REV. J. A. REDARD, O. M. I., pastor.

ANGELICAN—St. Jude's. Rev. John Leech-Porter, B. D., pastor. Services at 8 a. m., 11 a. m. and 7:30 p. m.; Sunday school, 2:30 p. m. All seats free. Midway, 2nd and 4th Sunday each month at 3:30 p. m. Phoenix, 1st and 3rd Sunday each month at 3:30 p. m.

METHODIST—Rev. H. S. Hastings, pastor. Services at 11 a. m. and 7:30 p. m.; Sunday school, 2:30 p. m.

A pretty wall paper helps to make a happy home. All colors and shades at Coles & Frith's. 4-5

Score cards for bridge parties executed to order promptly. Times office.

Sewing Machines

The fall of 1906 is here, and with it the fall sewing. Your neighbor is busy, so do not bother her, but call at the Singer Sewing Machine Co. office, Greenwood, and see their stock. You can have a Singer or a Wheeler & Wilson, the two best machines made, on your own terms. \$3 per month will rent or buy the drop head machines.

BELL PIANOS AND ORGANS

Now that the long winter evenings are coming on you need a Piano, and you want the best, so call and see my stock, the largest in the Boundary. I will quote you terms that will surprise you.

Synopsis of Canadian Homestead Regulations.

ANY available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.
Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal lands may be purchased at \$10 per acre for soft coal and \$20 for anthracite. Not more than 30 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

W. W. CORY, Deputy of the Minister of the Interior N.B.—Unauthorized publication of this advertisement will not be paid for. 32-59

Some are here today and away tomorrow. We are here every day, and all the time. City Photo Studio, Deadwood street. 6-7

THE MERCHANT'S CORNER

Some Features of the Retail Business - Credit System.

Retailing today is a broader business than it has ever been before. A merchant in even a small town must measure himself with merchants hundreds of miles away. Consequently he must adopt many of their methods and create new plans of his own.

He must be resourceful to a degree he never has been before. This must be for the reasons given above. When he has for his competitors men who intense in their business to the highest degree he cannot afford to let his business drift and expect results.

Too many men have entered the retail business believing that it is an easy vocation. They think if they can secure a store room and put a few goods into it they will get rich. True, it is easy to rent a room if one has a few dollars and a few hundred or a few thousand dollars will secure a stock of merchandise.

While a merchant is selecting his initial stock he will be surprised what a cordial greeting he will receive from those desiring to sell stocks of goods, but after the store is rented and the stock is in the real battle begins. Then there must be experienced resourcefulness, else the trade does not come and the expenses pile up. The signs of the times are that the merchants who deserve recognition by the public will continue to develop, while those who are adventurers and without experience in creative ability, in fact those who have no talent whatever for retailing, will be eliminated.

CREDIT.

The question of credit—that is, whom you should trust and whom you should not—is a question of the greatest importance in any business, more so now in this age of inflation than ever before.

You will have losses; the best and most conservative houses do, and always will. Losses seem to be as certain and sure to happen as death or taxes, but your aim must be to keep them down to the lowest possible figure.

You will find that there will be a certain amount of uncertainty in some of the credit you extend, but let these cases be few and far between.

THE CREDIT MANAGER.

The extension of credit has today developed into a science, and among large commercial, jobbing and manufacturing houses, one man, called a credit manager, is employed to watch this end of the business alone.

A credit man, to be proficient, must be thoroughly acquainted with the laws of the territory in which his house is dealing, and must keep fully posted on the new laws or amendments to laws and changes.

A wise credit manager will always surround himself with other safeguards for the prevention of losses by reason of bad debts. He will, if he be alert, organize the various houses in his own line into an association for the exchange of credit information, by which organization he and the other members can readily exchange with one another all kinds of information pertaining to a customer's methods of running his business.

OPTIMISM IN MINING

If an argument were needed to prove that optimism is an inherent element in the make up of humanity, we might profitably turn to the adventurer in the mines. In fact, we opine that this optimistic spirit, this hope for the best which amounts in some cases to a belief that the best will result, is one cause of much unfortunate speculation.

Men do not like to have a dark picture painted for them, or a gloomy future forecast. The truth may be tested and proved in two ways. Put yourself in the position of the honest engineer who finds it is his duty to report adversely on a proposition in which his clients have put much money and more faith. Note how loth they are to accept the decision even though it be the truth; note how they will even resort to efforts to get some little ray of hope from the report which paints the future black; and finally see them sometimes discredit you and seek the advice of a man who, though he may be less competent, is more optimistic. This reluctance to accept a dark view of the situation is a manifestation of optimism.

The other situation which proves the contention is the reverse of the foregoing. Consider the average promoter and his rosy presentation of a prospect to an investor. The latter likes the proposition if for no other reason than it is rosy. He believes that everything that sounds so good must have some merit, and he invests. Either his hope that the investment may prove fortunate finally makes him

believe that it will, or else in a spirit of abandon he merely takes a chance, but always with the hope that it will turn out fortunately. In either event the optimistic presentation of the matter by the promoter gets his money—and this might be true of the project which the conscientious engineer has reported adversely on, and with no discredit to the promoter, he being as a rule not a scientific man.

Fortunately, also, for the progress of mining, one or two rebuffs or failures do not dampen the ardor of the optimistic spirit. The prospector spends his life in hope, his innate optimism assures him that next year he will strike the bonanza, that is always his goal, but is seldom reached. But few pessimists are found among the mining fraternity, in whatever phase of the industry they may play a part. Those who do entertain a spirit of pessimism in regard to mining unusually do so by reason of the extravagance of their optimism in the inception of their venture.—B. C. Mining Exchange.

The essential parts of a motor or dynamo are the same, the principal difference being that the motor requires electricity for its operation, while the dynamo produces it. The essential parts of the dynamo are: The armature, on which are wound the conductors carrying the current, and which revolves; the field magnets, which produce the magnetism to act on the conductors and send or drive them past the poles; the commutator, on which slide the brushes which conduct the current into the mains.

When a neutral or alkaline solution of potassium ferrocyanide is exposed to light, ferric hydrate is slowly precipitated; in presence of alkali sulphide ferrous sulphide is thrown down. No precipitation takes place if the solutions are protected from light; the action is therefore believed to be entirely photochemical.

The electrolytic production of copper direct from the matte consists in first enriching matte to between 72 per cent and 80 per cent copper and then using said matte as an anode in an electrolyte of an acid solution of copper sulphate.

Sick Headache Cured.

Sick headache is caused by derangement of the stomach and by indigestion. Chamberlain's Stomach and Liver Tablets correct these disorders and effect a cure. By taking these tablets as soon as the first indication of the disease appears, the attack may be warded off. For sale by all druggists.

Fine line of China, just the thing to set off the dinner table: Smith & McRae. 5-6.

LAND NOTICE

TAKE Notice that sixty days after date I intend to apply to the Hon. the chief commissioner of lands and works at Victoria, B. C., for permission to purchase the following described lands:

Beginning at a post on the north side of Deep creek on the north side of the West Fork of the Kettle river, about fifteen miles above Westbridge, running thence south 80 chains across Deep creek and West Fork, thence west 40 chains to C. P. R. line, thence north 80 chains, thence east 40 chains to point of commencement.

Dated September 23, 1906. J. H. FRENEY, 58 Yale-Columbia Lumber Co., Ltd., Agts.

COLUMBIAN COLLEGE

New Westminster, B. C.

Receives both ladies and gentlemen as resident or day students. Has a complete business or commercial course. Prepares students to gain teachers' certificates of all grades. Gives the four years' course for the B. A. degree, and the first year of the of the School of Science course, in affiliation with Toronto University. Has a special "Prospectors' Course" for miners who work in B. C.

Instruction is also given in Art, Music, Physical Culture and Education.

Term opens September 17, 1906. For calendar, etc., address COLUMBIAN COLLEGE.

MORTGAGE SALE

UNDER And by virtue of the powers contained in a certain mortgage which will be produced at the time of sale, there will be offered for sale by public auction, by James S. Birnie, at the Victoria Hotel, Copper street, city of Greenwood, British Columbia, on Monday, the first day of October, 1906, at the hour of two o'clock in the afternoon, the following property:

All that parcel or tract of land situate, lying and being in the city of Greenwood, in the Province of British Columbia, more particularly known and described as lot 24, in block 12, according to the map or plan of the subdivision of the "Bark Horse" mineral claim, deposited in the Land Registry office at Kamloops, and numbered twenty-one.

On the property are the Victoria hotel, containing 12 bedrooms, furnished complete, bath room and fixtures, dining room, kitchen and utensils.

For terms and conditions apply to A. S. BLACK, Greenwood street, Greenwood, B. C., Solicitor for Mortgagee.

Dated 23rd August.

Progress and

Development

Progress and development are terms closely identified with life in the West. In a new country people are working daily for the upbuilding of town, city and district, and for the improvement of the conditions under which men and women are called upon to live. Every act of daily life that tends to bettering one's surroundings makes directly or indirectly for the improvement of society generally. In all this the local newspaper plays an important part. Among its local readers it stimulates an increasing interest in their home city, keeping them posted on all local happenings, and becomes a welcome weekly messenger, bearing bright and welcome tidings. Among its outside readers it forms a valuable advertising medium making known the merits, advantages and prospects of the city and attracting thither citizens who want employment, business firms looking for locations, and capitalists seeking investments. In the upbuilding of a town, city or district the local paper is an important factor.

BOUNDARY CREEK TIMES

The Boundary Creek Times aims to do its full and complete share in the upbuilding and improvement of Greenwood and the Boundary district. It is not handicapped in its work by any restraining obligations to any party, clique or corporation, but it is free at all times to rise up and promote the best interests of the City of Greenwood and its people. To do this most thoroughly and satisfactorily the Times must have the support and cooperation of the citizens of Greenwood.

Every effort is being put forth to make the Times the class of newspaper the people want. Increasing attention is being continually paid to mining news, especially of that nature that will interest those employed in the work as well as those whose capital is invested in the properties. With this end in view we aim to have

A Subscriber in Every Home

As a result of the efforts that have already been put forth, we believe that an increasing interest is already being taken in its news columns. We have evidences of this from the fact that the subscription list is already growing; the street sales are increasing weekly and the news dealers find more demand for each succeeding issue. This is a satisfactory condition of affairs that acts in two ways. It increases the revenue of the circulation department and it makes the paper a first-class advertising medium for local business men.

In handling local advertising every effort is put forth to protect the Greenwood merchant. The local page is reserved for them and foreign advertising has been repeatedly refused because the advertising manager refused to disturb the positions held by local advertisers.

Business men of Greenwood, we are here to protect and advertise you. We are protecting you! Do you advertise? Read The Times, subscription \$2.00 per year.

TOWN TOPICS

Dr. Mathison, dentist, will return about October 15th.

George Williams spent several days this week up the West Fork.

H. V. Fuller, who has been in Spokane for some weeks, returned home Thursday night.

George B. Paul and family left this week for Spokane, where Mr. Paul has secured a position.

Mrs. J. R. Brown is expected home Saturday from her extended visit with relatives in Ontario.

Mrs. W. H. Jeffery, who is now living at the Crescent mine, has been spending the week with Mrs. and Miss Whiteside.

W. G. Cornish, who exhibited Boundary ores in Nelson and Spokane, has taken the display to the fair at Lewiston, Idaho.

George Cropley has bought out the wood business of Hugh McKee and will run it in connection with his livery business.

Patronize the photographer who is permanently located and is helping to build up our city. City Photo Studio, Deadwood street. 6-7

R. E. Hodgins, formerly with the Russell-Law-Caulfield Co., has gone to Edmonton to join his family, who have been there for some time.

There will be a lecture given in the Presbyterian church on Thursday evening, October 25th, by W. G. Gaunce, on "Westminster Abbey." Admission 50 cents. 6-7

Trueman, of Vancouver, is here. Now is your opportunity for reliable photography and your Christmas photos. Here for two weeks only. Opposite Anderson Bros., Copper street.

Jack Galloway, who is in Vancouver attending college, has been suffering from blood poisoning in the hand. He was obliged to go to the hospital for treatment but is now out again and rapidly recovering.

The Princeton school house has become too small to accommodate nearly all the scholars. The government has been asked to give some assistance, and in the meantime the court house will be pressed into service.

The Odd Fellows have arranged to hold a bowling tournament. Four teams have entered and the first games will be played tonight. They expect to have the rink for their own use one night a week, probably Thursday night.

A new and popular song composed by a Greenwood author, is now on sale at the Thomas drug store. This song is a memento of an awful death suffered by a young lady in the San Francisco earthquake recently. Sale price, 30 cents. 5-6

Mrs. R. K. Stevens, who has been spending the summer at Kilsilano Beach, Vancouver, returned home Thursday afternoon. She was accompanied by her little nephew and niece Stanley and Jeanne Kelloway of Calgary.

Percy Jackson of Midway, was brought to the hospital Tuesday night suffering from typhoid fever. Mr. Jackson had been visiting at Beavertown but is supposed to have been suffering from fever symptoms before going up there.

The work at the Skylark mine is being attended with good results. Recently efforts have been concentrated on a crosscut half way down the shaft. This has opened up a forty-foot stop from which it is expected some 250 or 300 tons of good ore will be taken.

Alex Robinson is busy with his men on the Golconda tunnel. They are now in some fifty-five feet and making good progress. Some time ago they encountered water that hindered progress, but that has passed and the work is progressing better.

The funeral of the late James Buchanan, who died last Friday, of injuries received at the Boundary Falls smelter, was held Thursday afternoon from Gully's undertaking parlors. Deceased was 47 years of age and left a brother. Rev. M. D. McKee officiated.

The Greenwood Amateur Dramatic society are now practicing their new production, "Our Boys," and expect to play it in the Auditorium early in November. This company of local artists will be remembered for their excellent performance "Between the Acts," when they played last June to a crowded house.

BOUNDARY VALLEY LODGE
No. 38, I. O. O. F.
Meets every Tuesday Evening at 8:00 in the I. O. O. F. Hall. A cordial invitation is extended to all sojourning brethren.

N. G. Rec. Sec.

MIDWAY NEWS

Times Correspondent Sends Batch of Interesting Items.

MIDWAY, Oct. 11.—Chief Engineer Hogland, G. N. R., with party of other officials of the road, came in by special and proceeded up the line to Molson on a tour of inspection of the completed part of the new road.

The ditch for Kettle Valley Irrigation Co. is progressing favorably, according to Contractor Lundy. Mr. Lundy let part of a half mile to Mr. Hall, formerly of the G. N. R.

Midway lodge, K. of P., had quite an enjoyable evening lately after completion of the regular business. The members of the lodge intend to have socials through the winter for members and others.

G. A. Rendell's firm have received a large stock of dry goods and ladies' wear this week and are the only firm now who handle ladies' wear in this town since the fire which destroyed the store of Hain & Co.

Mr. and Mrs. Crowell returned last Sunday from their outing of two weeks at the Spokane fair and other towns in Washington, returning with improved health after a well earned vacation.

The house of Mr. Gardom, our genial custom officer, is fully completed after having been plastered, making a very comfortable living house and office for him.

The Ferry hotel was sold on a mortgage sale last Tuesday and bought by Mr. Souls, formerly manager for L. T. Mason. Reports go that Mr. Souls intends to convert the building into a general store.

The attendance at services of the Presbyterian church has increased to quite an extent, some members of the church having formed a choir that would do credit to some large city church.

Two gentlemen connected with Kettle River Valley Irrigated Fruit Lands Co. arrived by Wednesday's C. P. R. train and went by special team to Rock Creek on a tour of inspection. They intend to stay about four weeks and also go up the river on a hunting excursion.

The crew which has been working on the bridge over the Kettle river had to quit on account of inability to get the necessary timber for stringers and upper works, the mill at Columbia having failed to forward the requisite lumber, but everything is prepared to continue work as soon as the lumber arrives, and can be finished in about ten days. In the meantime, wagons have still to cross the river by ford, and foot passengers by a foot bridge.

Customs Inspector Cloute arrived Wednesday by C. P. R. train to inspect offices of the district and make arrangements for new offices at the line of the G. N. R. near Molson, where the railway crosses the boundary line.

A. C. Mills, across the boundary line, has imported a pedigree jack of large size, weighing about 1,200 pounds. Mr. Mills intends to go in the "business" of raising mules.

The barn of A. C. Mills is looming up rather large and will accommodate quite a large herd of cattle and horses. It presents quite an imposing appearance, as barns go at present. The carpenters and painters are still busy at it.

Several of the engines and crews of the G. N. R. have been removed from the Midway yard to Molson for further construction work, as the tie and rail laying between Midway and Molson is finished. There is now all the appearance that trains will run through to Molson in a very short time.

WALKER-HORRIDGE

A quiet wedding took place at the National hotel Thursday afternoon, when Thomas Walker and Mrs. A. Horrridge, both of Rock Creek, were married. The bride and groom were supported by Mr. and Mrs. La Fleur of Malo, Washington. The ceremony was performed by Rev. H. S. Hastings in the presence of a few friends.

Molybdenum free from carbon can be produced by electrolyzing the molten double chloride of molybdenum and sodium. The fusion point of this salt is over 300 degrees C, but it does not emit perceptible fumes under red heat.

ANNUAL MEETING

Mark F. Madden of Chicago, president of the Providence Mining Co., arrived in town the other day and will attend the annual meeting of the company to be held next Tuesday. Mr. Madden was seen by the Times' representative just after he had visited the mine, and he expressed himself as highly pleased with the work that is being carried on and with the results that are being obtained.

GRANBY REPORT

Big Boundary Company Produces Splendid Results.

The report of the Granby Co. for the year ending June 30, 1906, makes a most creditable showing. The company produced 19,939,004 pounds of copper, an increase of 5,701,382 pounds over the preceding year. It also produced 315,947 ounces of silver and 50,020 ounces of fine gold. Its gross income was \$4,751,059, an increase of over \$2,000,000. Net profits amounted to \$1,823,617, or \$1.35 per share on its outstanding capital.

The net cost of the company's copper was 8.35 cents per pound. It was sold at an average of 17.78 cents per pound. A total of 832,346 tons of ore was smelted, indicating an average recovery of 22 1/2 pounds of copper per ton of ore. The company expended \$105,975 for new constructions, paid \$350,485 for additional mining properties and carried \$300,968 to its surplus, making its total surplus \$2,547,739, or nearly \$2 per share on its outstanding 1,350,000 shares of stock.

As stated previously, improvements and extensions are now under way at the Granby smelter which will increase its capacity to between 30,000,000 and 35,000,000 pounds of copper annually. It is now clearly demonstrated by what was done last year that with this larger volume of production the company's copper will be made at a cost of not over 8 cents per pound. The enlargement of its furnaces, now under way, will be completed this month. On an output of 30,000,000 pounds of copper annually, sold at 20 cents per pound, Granby will be able to earn more than \$2.50 per share over and above all operating expenses and its current construction account. With such earnings the company's stock will be entitled to sell at between \$15 and \$20 per share.

It is stated that Granby's new stock, one share of which will take the place of each ten shares of that now outstanding, will be listed on the New York Stock Exchange. Friends of the company believe that Granby's new stock will sell at \$200 within a year.

MIDWAY & VERNON

The meeting of those interested in the Midway & Vernon, which was to have been held in Victoria last Wednesday, has been postponed till October 17th. Word to this effect was received from Ralph Smailes last Thursday. Mr. Smailes did not give any reason for the postponement of the meeting. It is probable that the eastern parties were unable to reach Victoria in time.

WINDSOR CAFE

In order to supply a growing need for an all night dining room service, Ernest J. Cartier, proprietor of the Windsor hotel, is now keeping his cafe open at nights. An excellent menu is provided and quick service for short orders. The change is proving a great convenience to the public and the cafe is receiving a large patronage.

Torments of Tetter and Eczema Allayed.

The intense itching characteristic of eczema, tetter and like skin diseases is instantly allayed by applying Chamberlain's Salve, and many severe cases have been permanently cured by its use. For sale by all druggists.

Elkhorn Beer

Is unexcelled, as is evidenced by its popularity in all the towns of the Boundary.

For Sale at all Leading Hotels Either Draught or Bottled.

WILL SOON RUN TRAINS

Passengers Will Soon Be Carried Between Spokane and Molson.

Mr. and Mrs. D. A. McBride of Rock Mountain, visited Greenwood Wednesday. They report railway work progressing steadily in the vicinity of their place. It is on their place that the "big loop" occurs, and work on this has been going on most of the summer. The rails have been laid past McBride's place to Molson. The road bed requires considerable work yet, but it will be finished before long. part of the equipment for a passenger train has been taken over the road and it has been stated that a passenger service from Spokane to Molson will be started next week. It is thought, however, that such a prediction is a little premature, and that it will be November 1st, at least, before passenger trains are running.

Mr. McBride reports that mining operations will receive a decided stimulus through the starting of the railway and that several mines will make shipments.

STRATHMORE CUPS

Splendid Trophies Won for High Grade Minerals

Alex Miller went down to Spokane last week to see the fair and also to secure the silver cups won by the Strathmore ore. He brought these back with him and they are now on view in Galloway's grocery store. The Granby cup, won at Nelson for the best display from any individual mine, is made of sterling silver mined, smelted and refined in British Columbia. The metal was treated at the Trail smelter and afterwards made into a handsome cup by a silversmith. The Spokane cup, also awarded to the Strathmore for the best display, is a heavy quadruplicate piece of silverware of beautiful finish and design. Mr. Miller will have the cups suitably engraved and sent to Chicago as examples of the trophies Greenwood ores can win.

MAKES FAST RUN

Fire Brigade Gets to Fire in One and a Half Minutes.

The fire brigade was given a test run Tuesday night, and the manner in which they acquitted themselves was a surprise to most of the people on the street, and rather a credit to the boys themselves. While the members of the brigade were going about their usual evening diversions some one thought it would be a capital idea to ring in an alarm and test the efficiency of the fire department. Accordingly a fire was lighted at the corner of Center and Copper streets and an alarm sent in. There were only three or four of the boys in the hall at the time, but what they lacked in numbers they made up in speed, for in one and a half minutes from the sounding of the alarm, the hose reel was at the scene of the blaze.

When the boys found it was a false alarm they did not attach the hose to the hydrant, so it is not known what they can do in this respect.

Six work horses for sale. Horses wintered and pastured by Stooke Bros., 5 miles north of Midway. tf

COURT PROCEEDINGS

Numerous Cases Disposed of Before Judge Clement.

At the sitting of the court last week a number of cases came up before presiding Judge Clement. One of the most important was that of W. H. Jeffery vs. James Sutherland. The plaintiff brought action for the recovery of \$450 for services in inspecting and reporting on the Elkhorn mine. The case occupied a large share of the court's time and judgment was given for the plaintiff with costs. A. M. Whiteside for plaintiff, J. P. McLeod for defendant.

James McCreath brought action against Mrs. Catherine McKelvie of Phoenix, for goods supplied to the Dominion hotel. Judgment for the defendant with costs. A. S. Black for plaintiff, D. Whiteside of Grand Forks, for defendant.

In the case of Murdock McIntyre vs. John Allen, the former, who lives in Phoenix, brought suit for damages to rig. Judgment for plaintiff. J. R. Brown for plaintiff, J. P. McLeod for defendant.

Rex vs. Crouse, was an appeal by the prosecutor, Austin Harris, on behalf of the British Columbia Pharmaceutical association from the decision of Stipendiary McMynn dismissing charge of Crouse keeping open shop contrary to the provisions of the Pharmaceutical association. The case out of which this last action arose, was tried in August and the defendant was given judgment. The association appealed the case and last week Judge Clement reserved judgment. The case involved a great deal of technical argument. A. M. Whiteside for appellant, J. P. McLeod for respondent.

A large number of applications were received from residents desiring to become British subjects.

WEST FORK ITEMS

Times Correspondent Sends in Budget of Mining News.

(Crowded out last week.)
The Carmi mine is working fairly well, and from the looks of the bunch of good stuff cleaned up every night it looks as if the mine is going to prove a big winner. At the present time about fifteen tons of ore is being milled per shift.

Messrs. Pope & Arthur are building a residence in Carmi in contemplation of railway work in the near future.

Among recent visitors to the town were Alex Bloomfield, of Midway; Mr. Kennedy, of Holmes & Kennedy, and Mr. Jackson, of T. M. Gulley & Co.

The Sally mine has a force of sixteen men at work and from present appearances they will be shipping ore again in a short time.

The Duncan is working six men and is taking out ore regularly, and by the time the snow flies good things will be heard of this most promising mine.

J. W. Nelson of Greenwood, made his regular trip of inspection to the Rambler mine recently and was well pleased with the progress being made on that valuable property. He thinks they will be shipping again by snow fall.

W. A. Keith & Co. are doing a nice business at the Beaverdell store. Herb Holmes is assisting with the work and he is kept busy delivering goods to the various mines supplied by the firm.

Robert Wood is visiting the Sally and is the busiest man in the camp just now.

The steadily increasing travel on the West Fork roads is proving a boon to the hotels along the way. Mrs. Smith is kept pretty busy at the Beaverdell hotel looking after the comfort of her numerous guests.

E. Smith, trapper, has gone to the head of the West Fork to begin his winter's work hunting the wild. He will not return till spring.

GOING TO ALASKA

D. A. Bannerman, who has sold out his livery business, is closing up his affairs in preparation for a trip to the far north. He has a brother in Sitka, Alaska, and a sister in the Klondyke. He has not seen his sister for twenty years, and has seen his brother only once in that time. He will visit them both and will also visit Kai-en island, with a possible view to investing in property. He expects to leave early in November.

First-Class Meals

NATIONAL HOTEL CAFE
K. BURCHAT and C. DUBEK, Prop's.

TRIED AT GRAND FOPKS.

Before Judge Clement, in Grand Forks, on Tuesday, the case of R. Gregor vs. J. W. O'Brien, owner of the Anaconda and Arlington hotels of Greenwood, came up. Suit was brought through the failure to make payments. Defendant's evidence went to show that he was heavily involved, and that he was doing everything he could to meet his obligations. The judge stated that the defendant must be treated as a man earning \$90 per month, out of which he had to support a family. Decision was reserved.

THE COPPER MARKET

NEW YORK, Oct. 11.—Copper continues firm and is steadily gaining in price. Lake is selling at 20 1/4 and 20 1/2 cents, and electrolytic at 20 1/4 cents per pound for delivery up to the end of this year. The price of both grades is approximately 20 cents, also, for deliveries during the first two months of next year. The character of the market seems to confirm the opinion expressed some time ago that consumers have planned to use more copper during the coming six months than the mines will be able to produce. It is believed that a very large amount of copper could be sold at 20 cents per pound. Some of the producing companies which have not sold their entire December product are asking 20 1/4 cents to 21 cents per pound. Other producers are out of the market entirely.

AMPUTATION AVOIDED

Zam-Buk Cures Extraordinary Case of Chronic Ulcer.

Kingston Lady Cured After Having Bad Leg for Five Years.

A powerful example of the healing virtue of Zam-Buk is provided by the case of Mrs. Lizzie Gilmour, who resides with Mrs. Waithen in Princess street, Kingston (Ont.): "Five years ago," she says, "I bruised my left leg just above the ankle, causing an ulcer which developed into a very serious wound. There was soon an ulcerated sore around my limb like a bracelet. The foot and ankle were swollen to nearly three times the normal size, and I had to give up wearing a shoe. The pain was terrible. I had medical attendance, and was also treated by a New York doctor, but I got no ease. Then I went into a hospital and was there for nine long months. While there it was at one time thought advisable to amputate the limb, but this was not done, and at the end of nine months I left the hospital. Soon afterwards the ulcer was as bad as ever, and as I thought of all the pain and suffering I had gone through I felt absolutely discouraged.

"At this stage I read in the newspaper about Zam-Buk. I determined to make one more attempt to get a cure. The first few applications brought me the only relief from agony I had had for a long time. The swelling went down as I persevered with the Zam-Buk treatment and the ulcer took on a cleaner and more healthy appearance. All the poisonous matter was cleaned out by the balm, and the ulcer then began to heal. New pink flesh has now grown where before was a raw and inflamed sore. Eight boxes of Zam-Buk have done the work! I can now walk about, and go up and down stairs, and I cannot feel too grateful for what Zam-Buk has done for me. I deem it my duty to let others who suffer as I have suffered, know of this excellent preparation."

Zam-Buk cures eczema, abscesses, ringworm, scalp sores, and all skin diseases by a process of clearing out the poisonous secretions and building up new healthy tissue. It is also a cure for cuts, burns, bruises, sore feet, chafing sores, chapped hands, etc. It stops bleeding, eases the itching and smarting of piles, and in a hundred ways is the handiest and best household balm. All druggists sell at 50 cents a box or direct from the Zam-Buk Co., Toronto, on receipt of price. (6 boxes for \$2.50). Send one cent stamp and full name and address and a free sample box will be mailed to you.
