TARIFF CHANGES

Dominion Cabinet Ministers Visit Boundary District.

DELIGHTED WITH VISIT

Mining Men Present Their Views Regarding Tariff.

Probably the Boundary district and other sections of the province will derive more benefit from the visits of the members of the tariff commission than from any changes that are likely to be made in the tariff. The commission is comprised of Hon. W. S. Fielding, minister of finance, chairman; Hon. Wm. Patterson, minister of customs; Hon. L. P. Brodeur, minister of inland revenue, and John Bain, secretary. Hon. Senator Templeman, as a member of the cabinet, has been invited to take part in the proceedings at the sittings in this province. In addition to securing information relating to the tariff, the members of the commission are anxious to make themselves thoroughly acquainted with British Columbia and its resources. Although a prominent member of the Dominion government since the advent of Liberals to power in 1896, this is the first opportunity Mr. Fielding has had to visit British Columbia. To day he is, as he himself now terms it, an enthusiastic "booster" for British Columbia. His colleagues are equally enthusiastic and it is safe to say that in the future when anything comes up in the house of commons affecting the interests of this province, new and sympathetic champions of the province will be found in the members of the tariff commission.

THE VISIT HERE.

Tuesday the commission arrived in the Boundary after visiting Rossland the previous day. Sightseeing in Rossland, particularly underground, is very fatiguing and Hon. Mr. Patterson found it necessary to go to Banff, there to rest for a few days He was accompanied by Miss Fielding and her cousin, who are traveling with the minister of finance. The minister of customs regretted very much his inability to visit the Boundary, Duncan Ross, M. P., met the met the visitors at Grand Forks, and at Greenwood he was joined by J. R. Brown, M. P. P., and Kenneth McKenzie, president of the Greenwood Liberal association, who extended a cordial welcome. The party proceed to Midway by the afternoon train, and were met at the station by a large delegation of Midway citizens, and representatives of the Midway and Vernon, and V., V. & E. The ministers visited the construction work on both railways and were immediately impressed with the difficulties under which railways are constructed in this countro. Ferry was also visited and visitors noted the contrast between the two railway towns on opposite sides of the international boundary line. Their comments were not unfavorable to Midway. Another surprise was awaiting them at the Lancashire house. They were invited into the dining room and found a gaily bedecked table loaded with good things. Flowers in abundance were tastefully arranged, and these, with home grown fruits displayed as only Mrs. Dowding can, were a joy and a wonder to the visitors. The luncheon was purely informal and no speeches were made. The visitors were then driven to Greenwood.

THE SMOKER.

After dinner at the Imperial, a reception was tendered the distinguished guests in the rooms of the Greenwood club, to which the public were invited. About fifty of the residents of Greenwood and the surrounding district were there to welcome the visitors. A new surprise awaited the ministers. They found that the big mining men were the most versatile fellows in the world. A. W. B. Hodges, who was introduced to them as the general superintendent of the biggest mining enterprises in Canada, was next introduced to them as a skilled musician, who could play the piano, lead the chorus, sing a song or conduct an opera. W. C. Thomas, the Dominion Copper company's superintendent, demonstrated that he was equally at home developing a new vein of ore or an equally new and equally intricate cake-walk. C. Scott Galloway, A. M. Whiteside, J. C. Cornish, J. Kendell and others contributed to the evening's entertainment.

A toast to the visitors was proposed and Messrs. Fielding, Brodeur and Templeman respondod. All the speeches were particularly happy and optimistic. They spoke in a hopeful tone of the future of this great country and they firmly believed that British Columbia was to play no unimportant part in making Canada a great and prosperous country.

A very enjoyabld evening was concluded by a three-round contest between Stowe and Young, which was fast and furious while it lasted.

THE SITTING.

The sitting of the commission was held in the court house at 10 o'clock Wednesday morning, Government Agent McMynn having courteously placed the court house at the disposal of the commission. Mayor Naden, in a neat speech, cordially welcomed the distinguished visitors. Incidentally he pleaded with the commissioners not to forget that the consumers had certain rights and that those rights should not be lost sight of in protecting the manufacturers.

Mr. Fielding, in reply, thanked the mayor for the cordiality of the welcome. He believed the mayor, in discussing the tariff, had laid down a principle which any government could wisely follow.

The smelting and mining industry, represented by A B. W. Hodges, J. E. McAllister, W. C. Thomas, J. R. Drummond Duncan McIntosh and others, presented their views to the commission. The sitting was an extremely interesting one and while it was anticipated it would not last more than an hour it was after one o'clock before the members of the commission were satisfied. The representatives of the big mining companies had prepared a memorial succiently setting forth their demands. This was placed in the hands of Mr. McAllister, who explained their requests and at the same time gave a great deal of information about the conditions under which the industry is being carried on.

Mr. Fielding asked question after question, which were promptly answered. Occasionally the minister of finance would place himself in the position of the Eastern manufacturer, pleading for greater protection in order to draw out the arguments of the mining men. Mr. McAllister had at his side A. W. B. Hodges and W. C. Thomas, who ably assisted him in the discussion by asking many questions The minister of finance at the close of the session stated that it was one of the most important meetings yet held.

The memorial of the mining and smelting men is given below. The greatest stress was laid on the demand for the removal of the duty on powder. Evidence was given to show that a combine existed between the powder companies and that the difference between the price here and in the adjoining states made a difference of nearly $42,000 in mining operations in the Boundary last year. Evidence of the combine was produced by D. W. Cummins of the Dominion Coppea company who put in corresponeence to show that the American representative of the powder companies refused to sell in Canadian territory. The other strong request was a reduction of duty on all articles use in mining and smelting not made in Canada.

Duncan McIntosh briefly stated the case for the high grade mines. Below is the memorial:

To Hon. W. S. Fielding. Hon. Wm. Patterson, Hon. L. P. Brodeur, Tariff Commissioners.

Sirs: The expenditure for mining and smelting in the immediate district which you are honoring today with your visit was, during the past year, in excess of three million of dollars. This industry has been prosecuted for the past eight years without any appreciable return for invested capital. In order that the industry be developed to the extent of even a small part of its resources, more capital is necessary and this can only be acquired by achieved results. We believe that if some features of the existing tariff be brought to your attention that you will see the advisability of reducing the burden in this respect in order to foster an important industry of this country.

We would suggest changes in the tariff upon the following items:

1. Explosives.
2. Structural iron.
3. Bar steel.
4. Mining candles.
5. Rubber hese.
6. Iron pipe.
7. Rails.
8. Steel castings.
9. Machinery.

Concluded on page 6.

Watch Logic

An old worn out watch requires considerable expense to keep it in repair. After years of constant running the delicate parts become worn and weak, and will not do their work properly. The only remedy is to replace it with a new one that carries a guarantee.

VISITING MINISTERS.

The Boundary is sure to be benefitted by the visit of Hon. Mr. Fielding, minister of finance, Hon. Mr. Brodeur, minister of inland revenue, and Hon. Senator Templeman. The latter is no stranger, as he finds time each succeeding year to come here and note the remarkable progress of the district. Mr. Fielding is easily not only one of the brightest men in public life today but takes a leading place in the front ranks of the statesmen whose names are closely identified with the history of Canada. Naturally brilliant, and with a seemingly inexhaustible capacity for hard work, he wants to see everything worth seeing and make himself thoroughly acquainted with every part of the Dominion. Mr. Brodeur is one of the strong men from Quebec, which is today sending to the Dominion parliament a class of members who in debate, in their knowledge of public affairs are the equal if they do not outclass the representation from the other provinces

Canada is growing. The men who are in charge of its affairs are managing a veritable empire. They have seen the Boundary, its mines, its smelters, and they have gone away believing that in the work of making Canada a great nation the exploitation of our low grade mines will play no small part.

The best friends of British Columbia in the Dominion parliament are those who have seen the province. The Times believes the province has found new but powerful friends in Messrs. Fielding, Patterson and Brodeur.

SATISFACTORY RESULT.

Greenwood electoral district is to have a board of license commissioners of its own. The McBride government was forced to yield to the pressure of party friends and others and relieve this district from the peculiar operations of the Grand Forks gang. The new board will be appointed immediately. It is understood that the members thereof are to be Geo. Cunningham, James Kerr and J. R. Jackson. All are men of strict integrity, and with such a board the public have every assurance that under no circumstances can there be a repetition of those recent manipulations which were a disgrace to a British province.

THE PIONEERS.

The Pioneers of Boundary and Southern Okanagan are to be congratulated on the success attending their recent banquet. They are a body of men to whom this district owes much. They are responsible for the initial development which led to making this the most important mining district in Canada, and their work was done amid great hardships and but little encouragement. The organization of this band of men into a society was a happy suggestion and the Times joins with the many other friends of the Pioneers in wishing them prosperity and comfort.

THE determined hostility of the C. P. R. to the Grand Trunk Pacific, which has found open expression in the past fortnight, confirms the West in its judgment that for the present, and for some years to come it will be desirable to continue the Liberals in power. Not until the Grand Trunk Pacific is in operation from ocean to ocean will it be safe to put in office a government which will take its railway policy from E. B Osler, M. P., director of the C. P. R. The disposition on the part of the Conservatives to make it impossible for the G. T. Pacific to compete with the C. P. R. will not be forgotten by the voters.—Winnipeg Free Press.

ANY one who has read the Nelson Tribune for the past month can easily understand John Houston's reasons for getting as far from civilization as possible. It is not to be wondered at that he has hidden in a southern desert.

A FEW years ago the Americans were boycotting the Chinese. This week the Ferry people captured a Midway Chink and he looks so good to them that they won't let him come back.

THE Times may have located the "Calf" but assuredly it was the saintly editor of the Nelson Tribune that branded the maverick.

THE new smelter and Grand Forks are still flirting with each other.

THERE were a number of Liberals in the citp Tuesday and Wednesday.

GRAFT must be scarce with the American customs officials when they hold up a coffin.

Chamberlain's Cough Remedy Aids Nature.

Medicines that aid nature are always most effectual. Chamberlain's Cough Remedy acts on this plan, It allays the cough, relieves the lungs, aids expectoration, opens the secretions, and aids nature in restoring the system to a healthy condition. It is famous for its cures over a large part of the civilized world. Thousands have testified to its superior excellence. It counteracts any tendency of a cold to result in pneumonia. Sold by all druggists.

VOL. 10, NO. 3, SEP. 22, 1905

B. C. TELEPHONE CO.

New Long Distance System Finished to Greenwood.

The British Columbia Telephone company has made great improvements in its system during the past twelve months in different parts of Southern British Columbia. The service in Rossland was changed last year, a new metallic system being installed and new poles replacing the old ones and the service placed in first-class shape.

Last winter a telephone system was installed at Fernie by the company, which caused considerable excitement in that burg and some litigation between the company and the city. The Crow's Nest Pass Coal company finally purchased the system and the City of Fernie paid all costs of litigation.

Work on the long distance telephone line was commenced the 4th of June of this year, at Laurier on the boundary line, whence it was continued to Cascade, Grand Forks, Phoenix, the work occupying nearly four months. About eleven hundred poles were used in the construction of the new line. These poles are 30 feet in length, not less than 9 inches in diameter at the top and 14 inches at the butt. The butts are treated with carbolineum to preserve the wood. The distance between poles is 150 feet. Each pole carries from two to ten wires. In the cities, of course, more wires are used.

This work has given employment to upwards of twenty men during the four months of construction, and owing to the good management displayed and the skill of the men employed there has been little or no interruption of the service, considering the rough nature of the ground over which the line occasionally passes and the difficulties encountered during the process of transferring the wires.

The work has been carried on under the supervision of G. C. Hodge, district superintendent, with S. S. Irwin directing operations, and it is needless to remark that neither trouble nor expense has been spared to make the the system an up to-date one in every particular.

Work will now be transferred to Nelson, where a new office has been erected, and where the system will undergo a thorough overhauling, as was done last year in Rossland.

CARD OF THANKS.

Mr. and Mrs. W. S. Dale of Carmi, Ill., wish to express their thanks to those in Greenwood who assisted at the funeral of their son, Charles Alfred Dale, and also to the ladies of Greenwood for their kindness to and sympathy with their daughter, Mrs W. W. Wood.

Manager Robert H. Cosgrove of the Spokane Interstate fair has received word of the shipment of a full carload of high-class fireworks from the Pain factory at Manhattan Beach, N. Y. These fireworks will be used to give the "Fall of Port Arthur," which will be part of the night shows of the fair which will be given on the fair grounds in the eastern part of Spokane. The pyrotechnic display will be the most brilliant ever seen west of St. Paul. The night shows promise to be the big feature of this year's fair at Spokane, and are expected to draw bigger crowds than come to the daylight exhibitions.

MINERAL EXHIBIT.

E. E. Alexander, superintendent of the mining department of the Spokane Interstate fair, which is held October 9 to 15, was in the Boundary country of British Columbia last week, interesting the managers of the big mines in the fair. He reports that the mine owners are more interested this year than ever before in the Spokane fair becaure it is known thousands of eastern visitors will be at the fair and mining men as well as others believe a good showing of the resources of the country ought to be made. Those properties which have mining exhibits at Spokane expect to add their newer samples and those which have nothing at Spokane will send ores. The different camps also are interested in the contest for the silver cup which is to be given this year to the camp making the best district exhibit of minerals.

Mr. Alexander will spend most of his time prior to the opening of the fair visiting camps.

Dr. Mecklenburg, the famous eye expert, will be at the Thomas Drug store, Greenwood, Oct. 23-25; Midway, 26 27; Phoenix, 20-22. Save your sight by consulting him. Headaches, cross eyes, short sight, far sight and every defect of the eyes properly treated. Satisfaction guaranteed. Difficult cases especially invited.

W. H. EDMONDS,
District Registrar.

Synopsis of Regulations Governing t s Disposal of Dominion Lands within t e Railway Belt in the Province British Columbia.

A LICENSE to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths excepting those situated West of Yale for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:—

Sawn lumber, 50 cents per thousand feet B. M.

Railway ties, eight and nine feet long, 1½ and 1¾ cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent on sales

A license is issued as soon as a berth is granted but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B. M, for square timber and sawlogs of any wood except oak; from ½ to 1½ cents per lineal foot for building logs; from 12½ to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties; and 50 cents per cord on shingle bolts.

Leases for grazing purposes sre issued for a term of twenty-one years at a rental of two cents per acre per annum,

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for agricultural purposes may be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the District, within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is reduired to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence on and cultivation of the land in each year during the term of three years.

It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property, with buildings for their accommodation will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) or any person who is eligible to make a homestead entry under the provisions of the Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY,
Deputy of the Minister of the Interior.

SYDNEY M. JOHNSON,

THE WASTE DUMP.

Gold is the most malleable of all metals, and those next in order are silver, copper, platinum, iron, aluminum, tin, zinc and lead

The largest municipal museum in world is the American museum of Natural History, New York city. The mineralogical collection alone in this museum has cost upwards of $300,000.

In 1821 Mexico threw open her mines to foreigners, offering special facilities and inducements. The real history of Mexican mines dates from the advent of English and American capital into that country.

Meteorites are of two classes—the the stone and the iron. The former are about ten times as numerous as the latter. In the iron meteorite, iron usually forms more than 90 per cent of the entire mass, but they are almost invariably alloyed with nickel. In the stony meteorites mineral combinations occur which are peculiar to these bodies and serve as one of the main features in recognizing them when they were not seentat the time of their fall.

At Livet, France, the Keller electric furnaces for smelting iron ore are vat-shaped, and connected at their lower ends by a central well; four are usually grouped together. The current used in tne trial runs varied between $10,600 and 12,000 amperes, at voltages from 63 to 68; and the energy absorbed was 0.25 h. p. year per ton of a white pig iron containing little silicon and manganese, and 0.53 h. p. year for a gray iron more silicious. The coke used averaged 767 pounds per ton of pig iron produced, and the estimated cost of electrodes was 84 cents per ton of iron.

The death rate from coal mine accidents in Japan in 1905 was 1.71 per thousand; in Russia, 2.53, and in the United States, 3.26.

The oldest mineralogical collection in the United States is that owned by Harvard university, the foundation of which collection was begun in 1793.

Smelters in California buy the quartz from the miners for fluxing purposes, paying on assay value. In this way some hundreds of small mines are enabled to run at a profit.

Rocks that show special structure, due to their once having been in a molten state from which they were solidified into their present chaaacter, in Geology are known as igneous They include lava, basalt, granite, etc. Such rocks are not stratified, and may occur in connection with sedimentary rocks of any age, as the igneous rocks have usually been erupted from the interior of the earth and forced upward.

There are now in the United States 352 museums of all kinds, of which 240 are known as natural history museums and 15 as science and fine arts. One hundred and seventy-eight of of these museums are attached to schools and colleges, 32 are controlled by societies, 16 are private or municipal institutions and 30 have been established by the state and federal governments.

There are three important metals that do not occur native—tin, zinc and nickel. Iron occurs native in infintisimal quantities. Native lead is a decided rarity. Quicksiiver occurs native in small quantity. Native zinc was reported from Georgia years ago, native tin was reported occurring in Siberian placers, native nickel was supposed to have been found in New Caledonia. Investigation found these discoveries to have been untrue.

A zinc aoof of the proper gauge weighs from 125 to 180 pounds per 100 square feet; of lead and copper, 800 pounds; of slate, 700 to 900 pounds, and of tiles, 1,500 pounds.

The nitrogenous casein of skim milk is used in the manufacture of a new electrical insulator, called galalite, sold in Germany. It can be tooled easily, and compares favorably as an insvlator with ebonite and porcelain.

Twenty-five years ago the loss in silver-lead smelting was 20 per cent of the content of the ore in those metals; today the loss of lead is seldom in excess of 5 per cent, of silver loss and of gold practically nothing.

Millmen in Gilpin county, Colo., now receive $2.50 per day of eight hours, whereas heretofore they had worked 12 hours at $3. In consequence mill owners have advanced the cost of milling about 12 per cent. per ton, or about $1 per ton, practically making mine operators pay for the change in the millmen's wages.

The silver mines of Schneeberg in Saxony in the fifteenth century produced some enormous masses of native silver, the greatest having been a lump weighing 568 pounds, a mass that even to this day has never been equaled. In 1750 there was taken from a mine near Freiberg a lump weighing 169 povnds. In the Royal museum at Copenhagen is a mass of native silver six feet long, two feet broad and eight inches thick which was taken from a mine near Koenigsburg, Norway.

The famous meerschaum mines near Eskichehir, in Asia Minor, are said to have been first worked a thousand years ago. In a space of six miles there are over 20,000 excavations, and today only a couple of hundred of these are operated, the others being exhausted. Meerschaum is mined in blocks, which are cleaned, scraped and cut with a knife, the mineral being still soft and readily cut into any shape wanted. The annual output of meerschaum does not exceed 150 tons. It is soft when first mined but hardens when dry.

Marbles are rounded balls of broken clay, marble, agate and other mineral substances. In Saxony, where are made millions of these playthings, the mineral most used is a hard, calcareous stone that is first broken up into square blocks with a hammer. These are then thrown 100 or more together into a mill that is constructed of a stationery, flat slab of stone, with a number of concentric furrows upon its face. Over this a block of rock of the same diameter, partially resting upon the small stones, is kept revolving while water flows upon the stone slab. In 15 minutes the marbles are worn completely round, and are ready for market.

Guns, tents, sewing machines and all kinds of house goods for sale or rent. The O I C New and Second Hand Store. A. L. White.

THREE JURORS CURED

Of Cholera Morbus with One Small Bottle of Chamberlain' Colic Cholera and Diarrhoea Remedy.

Mr. G. W. Fowler of Hightower, Ala. relates an experience he had while serving on a petit jury in a murder case at Edwardsville, county seat of Clebourne county, Alabama. He says: "While there I ate some fresh meat and some sous meat and it gave me cholera morbus in a very severe form. I was never more sick in my life and sent to the drug store for a certain cholera mixture, but the druggist sent me a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy instead, saying that he had what I sent for, but that this medicine was so much better he would rather send it to me in the fix I was in. I took one dose of it and was better in five minutes. The second dose cured me entirely. Two fellow jurors were afflicted in the same manner and one twenty-five cent bottle cured the three of us." For sale by all druggists.

Cook's Cotton Root Compound.

The only safe effectual monthly medicine on which women can depend. Sold in two degrees of strength—No. 1, for ordinary cases, $1 per box; No. 2, 10 degrees stronger for Special Cases, $3 per box. *Sold by all druggists.* Ask for Cook's Cotton Root Compound; take no substitute.

The Cook Medicine Co., Windsor, Ontario.

LIQUID VENEER

MAKES OLD THINGS NEW

Liquid Veneer instantly restores the brilliant newness and finish of Pianos, Furniture, Picture Frames Interior Woodwork, Hardwood Floors, and all polished, varnished or enameled surfaces.
It renews and redresses everything it touches. Revarnishing is unnecessary, becauses scratches, stains and dirt instantly disappear, leaving a smooth, brilliant surface.
Liquid Veneer is not a varnish, but a surface food that is absorbed by the old finish, instantly restoring the latter to its original brightness. Easy to use—only a piece of cheese cloth is necessary. Dries instantly.
One delighted customer writes that it is worth $100 per bottle. The price is only 50 cents.

To Charles N. Collins, his heirs and administrators, or to any person or persons he may have transferred his interest in the Hard Cash mineral claim, situate on Wallace Mountain, West Fork Kettle River, in the Greenwood Mining Division of Yale District.

You are hereby notified that we have expended the sum of $500 for work on the above-mentioned claim and $12.50 for recording the same for assessment work for five years, such being required and necessary to hold said claim for the years ending the 2nd July, 1900, 1901, 1902, 1903 and 1904, under the provisions of the Mineral Act and Amending Acts, and if at the expiration of ninety days from the date of first publication of this notice in the Boundary Creek Times, you fail or refuse to contribute your portion of such expenditure together with all costs of advertising, your interest in the said mineral claim shall become invested in us, your co-owners, upon filing in the proper office in that behalf the affidavit required by section 4 of the "Mineral Act Amending Act, 1900."

Dated 9th June, 1905.

GEORGE M. MILLER
WILLIAM KINTZ.

In The County Court of Yale Holden at Greenwood.

IN THE MATTER of the Judgments, Act, and
IN THE MATTER of a Judgment obtoined in an action in this Honourable Court.
Between COSENS BROTHERS, Plaintiffs, and
JAMES WILDER, Defendant.

TO THE DEFENDANT.

TAKE NOTICE that by an order of the Honourable William Ward Spinks, Judge of this Honourable Court, dated the 26th day of July, A. D., 1905,

IT WAS ORDERED that unless cause to the contrary be shewn by the Defendant, on the 5th day of September, A. D. 1905, at the hour of 10:30 in the forenoon, to the presiding Judge in Chambers, at the Court House, in the City of Greenwood, the interest of the Defendant or a competent part thereof, in the following lands, namely: The South West Quarter of Section 18 in Township 67, in the Osoyoos Division of Yale District, British Columbia, be sold by the District Registrar at Greenwood, County of Yale, according to the usual practice, to realize the sum of $109.61, being the amount of debt and costs upon a Judgment obtained by the Plaintiffs (Judgment Creditors) against the Defendant (Judgment Debtor) dated the 17th day of September, A. D 1904, together with interest on the said sum from the said date at the rate of five per centum per annum.

AND IT WAS FURTHER ORDERED that notice of the intention of the said Defendant to shew cause against the said sale must be given by the said Defendant to the Plaintiff's solicitor or his agent twenty-four hours previous to 10:30 o'clock in the forenoon of the said 5th day of September, A. D. 1905, and in default of the service of said notice IT WAS ORDERED that the sale do take place as above directed without further order.

AND FURTHER that a reference be made to the District Registrar of this Honourable Court at Greenwood, B C. to ascertain what judgments form a lien or charge against the said lands and to determine how the proceeds of such sale should be distributed, and to report all such findings to the Court.

AND FURTHER that the costs of and incidental to the application and order be taxed and added to the Judgment debt.

Dated this 1st day of August, A. D. 1905,

[SEAL.] WM. G. McMYNN, Registrar.

PIONEERS' REUNION

Annual Gathering of the Trail-Blazers.

ELECTION OF OFFICERS

Banquet Held at the Lancashire House, Midway.

On Friday evening of last week the annual reunion of the Pioneers of the Kettle River and Southern Okanagan was held in the Lancashire house, Midway.

Previous to the banquet a business meeting was held at which the following officers were elected:

President—John East.

Vice-Presidents—John McLaren, Carson; J. W. Nelson, Greenwood; Hugh Cameron, Camp McKinney, and D. Carmichael, Fairview.

Secretary—J. R. Jackson, Midway.

Treasurer, Jas. Kerr, Greenwood.

It was decided to admit to membership persons coming into the district in 1895 6.

The society was formed at Boundary Falls in March, 1900, the chief promoters being Thos. McAulay, Dr. Jakes, Thomas Walsh, J. W. Nelson, John East and James Kerr. Since then the majority of those who were in the district previous to July, 1904, have become members. The objects of the organization are similar to those of other fraternal organizations—to relieve the distressed, care for the helpless and bury the dead. There has been but one death among the members since the organization was formed that of John Thornton.

THE BANQUET.

About forty members and guests attended the banquet, which was presided over by the retiring president, Mr. P. T. McCallum of Grand Forks. After an excellent repast, the chairman proposed the health of the "King." After the National Anthem had been sung, short speeches were made by R. Gardom, customs officer at Midway, and Gold Commissioner Kirkup of Rossland. Both expressed their pleasure at being present, and the high esteem in which they held the pioneers who did so much in opening up the mining camps of British Columbia.

"The Pioneers and Canada,, brought to their feet Jas. C. Dale and P. T. McCallum. Mr. Dale said he had traveled over most of the Western States from his home in Illinois and had not found a resting place until he reached the Boundary, where he met the most whole-souled people he believed in the world. So pleased had he been with the people and the country that he had become a Canadian. He didn't know much about Canada but he knew all about the the Boundary and her pioneers.

Mr. McCallum—Fellow pioneers, for me to say that I am pleased to be with you to night is to use a common expression, "putting it mildly." In looking over the programme for this evening I find that the first item on the list is the "President's Address." Now, although I am a pioneer, the majority of you know that I am not a speech-maker, but I feel that I cannot allow this opportunity to pass without endeavoring in some way to say a few words on behalf of my fellow pioneers, and the country in which we live.

Were I capable of making a speech or could I find words to express my feelings on this occasion, I feel satisfied that all I would wish to say would fill a volume. Suffice it to say, however, that I am unable to find words to express the feeling of gratitude I owe to my fellow members for the confidence which they placed, and the honor which they bestowed upon me in electing me to the position of president of this honoaable society for the past year.

When I look up n the faces of these who came to the Boundary country during the years of the eighties and early nineties—many of them, as I did myself, on the hurricane deck of a cayuse—and blazed the trails, forded the rivers, hewed out wagon roads over the mountains and through the forests, and endured the harkships and privations of pioneer life, living onbannocks, bacon and beans for months at a time, my heart swells with pride for these men and I feel it an honor to be numbered among them.

These are the men among whom we find the pioneer prospectors who discovered our rich mines, which today have a world-wide reputation. These are the class of men with whom I have been associated and for whom I have done business during the past fifteen years, and although in the early days sf the Boundary country I found it necessary in hundreds of instances to trust these pioneer prospectors for a recording fee of $2.50 and sometimes for a fee of $5.00 for a free miner's license, to their honor be it said I have yet to find the first one among them to defraud me of a five cent piece. I ask you is it not to these men you owe the many comforts and luxuries which you now enjoy, and of which this elaborate repast you so heartily enjoyed this evening is a sample.

These men came here from every point of the compass, and worked hand in hand in assisting to build up the district and Canada—a Canada of which we may all justly feel proud; a Canada which I believe will in the near future take a first rank among the nations of the world; a Canada which justly feels proud of these iron-constituted pioneers, who are as honest and upright as the day is long; a Canada which with open arms invites men of character from all civilized nations of the world to come in and partake of her unlimited resources; a Canada which has produced some of the fairest ladies that have adorned society, as well as some of the brightest and most distinguished men, among whom I may mention the names of Sir Wilfrid Laurier, A. B. Aylesworth, K. C., Christopher Robinson, K. C., and there are are others, not forgetting our own Duncan Ross, M. P.; a Canada which within only the last few years, through the efforts of its pioneers and a free and progressive government, has become a central point of attraction for all the honest home-seekers of the world; a Canada which, would time permit, I would be delighted to tell you of her educational institutions and advantages, of her manufacturing industries, of the immense area of her grain producing prairies, of her beautiful lakes and rivers, of the magnitude of her steamers that plough the the waters of her mighty deep, of her towering mountains and her beautiful valleys, of her mineral wealth and her smelters, of the majestic Norway pines and giant Douglas firs that adorn her beautiful forests, of her fisheries, her dairy products and her fruit, and last but not least of the heroic and noble deeds of her loyal and gallant sons in defense of the empire.

This is the Canada in which I hope to live and die, and when I come to lay my head on the dying pillow, and I am called upon by the Great Architect of the Universe to quit the transitory scenes of this earth, my heart's desire and prayer to God is that six pioneers of the Kettle River and South Okanagan Pioneers' society will lay my weary bones to rest in mother earth, in "God's Acre," which was donated to the pioneers by a pioneer, for the use of the pioneers, and forms a part of the pioneer cemetery on the banks of the Kettle river of the Boundary country, in Canada.

J. W. Nelson sang "The German Emigrant" in excellent style.

"Our Southern Neighbors," was coupled with the names of Dr. Dutton and James Lynch.

Dr. Dutton said that although not a member of the society he was a pioneer of the Okanagan, but unfortunately on the wrong side of the river. He was pleased to meet so many of the old-timers, among whom he had many friends.

Mr. Lynch said he was not a speaker but would give a song, which was heartily applauded.

"The Mining Industry" called W. G. Gaunce to his feet. Mr. Gaunce, in what was the speech of the evening, told of the results to the district and the mining industry of the world from the efforts of the pioneers, and paid a high tribute to the energy and perseverence, under almost insurmountable difficulties, of the prospectors of the West.

Jas. Kerr sang a Scotch song which was enthusiastically received.

T. J. Hardy was called on to reply to "Commerce," but slipped out, as also did Thos Walsh.

"The Ladies received short speeches from C. E. Moe of the Eastern Townships Bank, and Hugh Cameron of Camp McKinney.

Dr. Newcombe spoke for the "Tenderfeet," and C. M. Crouse and J. W. Grier responded to the "Press."

Mr. Wethell of the Midway company made a short speech, and a vote of thanks was tendered Mrs. Dowding for the excellent banquet.

The balance of the night was spent in listening to songs, recitations, etc., the entertainers being Messrs, James Kerr, Crouse, Lynch, Powers, Wethel, McCallum and Haynes.

The next reunion will be held in Creenwood.

The ladies of the Catholic church intend giving a dance in the Masonic hall next Friday evening, Sept. 29.

For Sale—A large Victor safe in good condition. For particulars apply to the Yale-Columbia Lumber Co.

J. S. Carter, district passenger agent of the C. P. R., O. H. Becker. traveling freight agent, were in the city Wednesday.

Editor Keffer of the Anaconda News returned this week from a visit to the Portland fair. On the trip the editor discovered Vancouver, Wash.

A. B. W. Hodges, general superintendent of the Granby company, attended the sitting of the tariff commission here on Wednesday.

Greenwood Socialist League No. 9 are fitting up new quarters on south Copper street.

Mrs Jakes and Mrs. F. W. McLaine left Tuesday morning to visit friends in Spokane.

W. B. Wilcox of the Phoenix Pioneer was in the city Wednesday attending the session of tariff commission.

For Coal and Wood Heaters and Cooking Stoves that will burn your neighbors' wood, see A. L. White, the O I C New and Second Hand Store.

O. I. Ostroski and R Breslauer of Spokane were visitors in the city this week. Both gentlemen were among the pioneer business men of Greenwood.

H. L. Johnson, roadmaster on the Kootenay division has resigned to accept the position of divisional engineer with the Canadian Northern company at Winnipeg. P. J. Gallaher, road master on the Boundary branch succeeds H. L. Johnson, and is himself succeeded by L. Doolan of the Nakusp and Slocan branch.

Harvest Home services will be held in the Methodist church next Sunday evening. Suitable decorating is being done for the occasion. The pastor will preach at both services. On Monday evening, the 25th, the annual entertainment and tea is to be given in the church. A good programme is being arranged for and a very enjoyable time is anticipated. Tea served from 6.30 to 8.30 p. m.

Ah Tub, a Midway laundryman who had been soliciting business in Ferry, Wash., was captured last week by the U. S. officials and is being held for ransom or deportation. The brothers and cousins of Mr. Tub are making strenuous efforts to settle the matter locally, for if Tub is deported the cost to return him in good condition from China will be in the neighborhood of a thousand dollars. The case was not presented to the tariff commission.

TARIFF CHANGES.

Continued from page 1.

1. Explosives—The purchase of dynamite in carloads in this district costs: 40 per cent, 15 cents per pound; 60 per cent, 16½ cents per pound; 60 per cent, 18 cents per pound, laid down here.

Freight on explosives amounts to 2 cents per pound from Pacific coast points in Canada, and the duty is 3 cents per pound. The last item amounting to the cost of 5 cents on every ton of ore mined in this country. The explosive which costs 15 cents per pound laid down here, costs 12 cents per pound laid down in the mining district of Salt Lake, Utah.

We would suggest that the duty on explosives coming into this country be removed.

2. Structural Iron—On this there is a duty of 35 per cent, which is apparently no protection, as on the last work of any size done in structural iron in this section, an American firm, making two profits to the contractors and sub-contractors, was able to construct the work with the high duty paid and still undersell the Canadian manufacturers.

We would therefore suggest the reduction in this item to 20 per cent,

3. Bar Steel—Upon bar steel, such as is used for drills and smelter bars, there is a duty of 5 per cent. As suitable steel for this purpose is not manufactured in Canada, we would suggest the removal of the duty on this commodity,

4. Mining Candles—We would suggest that the duty of 25 per cent on mining candles be reduced one-half. Candles suitable for the work are not manufactured in Canada, as evidenced by the fact that with a 25 per cent duty added the candle expense is less than using those of Canadian manufacture.

5. Rubber Hose—We would suggest the reduction in the duty on rubber hose from 35 to 20 per cent for the same reasons as described above.

6. Iron Pipe—By far the greater part of pipe used comes under the dutiable size of two inches in diameter, and we have been unable to procure a suitable pipe, as it always splits in the weld. The duty is 35 per cent and we would suggest a reduction of 10 per cent in this item.

7. Rails—We would ask that the duty of $7 per ton be removed when the rails are used for mining and smelting purposes only.

8 Steel Castings—These are not manufactured in Canada of a size required in the work. We would therefore request the removal of the duty of 25 per cent on rough and 30 per cent on finished steel castings.

9. Machinery—In the free list of machinery for mining and smelting we would suggest the addition of "blast furnace slag trucks, which are to be hauled by mechanical power." We would also submit that it is of no service to admit blast furnace water jackets free, as it is impracticable to import water jackets without the parts to which they must fit. The clause should read "blast furnaces complete." The same applies to converter machinery, changing the words converting to metallurgical process in iron or copper to read "Converting machinery for iron or copper."

It is our opinion also that repair parts for all machinery on the free list should be admitted free.

10. Lumber—The operators of the mining and smelting industry of this section are averse to the placing of duty on rough lumber coming into the country.

In conclusion, we would remind you that we are so far from all bases of supplies and our expense of transportation so heavy that every consideration which can be given your honorable body to assist in the development of one of the principal resources of the Dominion of Canada should be received with approval by the country at large.

All of which is respectfully submitted,

THE GRANBY CON. M. & S. CO. LTD.
A. W. B. HODGES, Gen. Supt.
THE B. C. COPPER COMPANY, LTD.
J. E. MCALLISTER, Manager.
THE DOMINION COPPER CO. LTD.
T. R. DRUMMOND, Manager.

After the sitting the members of the commission, Senator Templeman, Mr. Bain, Mr. Hodges, Mr. Thomas, and Mr. Ross were the guests of Mr. and Mrs. McAllister at luncheon. The B. C. Copper company's smelter was also visited and the party then drove up the hill to visit the Granby mines at Phoenix.

AT PHOENIX.

Under the guidance of Mr. Hodges the guests visited many glory holes drifts and tunnels. They were simply lost in amazement at the magnitude of the operations being carried on. To complete the long list of surprises an electric car was provided and the visitors taken underground through a tunnel for a distance of nearly a mile, the whole tunnel being in ore.

Late that night the tired but enthusiastic visitore went to Grand Forks on a special train placed at the disposal of the commission by Ben Campbell, the general traffic manager of the Great Northern.

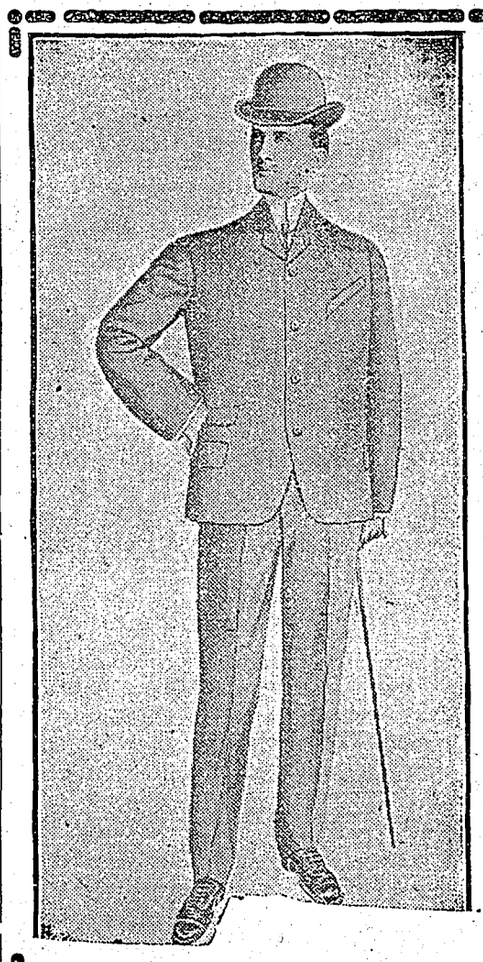
The party was met at the Yale by Mayor Hammer and several of the prominent residents of Grand Forks and a brief reception was held. Next morning the Granby smelter was visited and in the afternoon the visitors saw some of the fruit-growing possibilities of Kettle river valley. The afternoon train was taken to Robson. A brief rest will be taken at Banff before proceeding to the coast.

NOTES.

Accompanying the commission is O. S. Hammond one of the bright newspaper men of the capital. He represents the Toronto Globe and is sending a series of interesting letters from the west.

The official stenographers of the party are Geo. Simpson and R. C. Dunbar of the Hansard staff. The staff is responsible for the best parliamentary report extant and they are among the best men of the staff. In addition to being good stenographers, they can tell a good story, sing a good song and are all around good fellows.

The secretary of the commission is John Bain. There isn't much of him but his head, but even in the civil service it is headwork that counts. He is private secretary to Mr. Patterson and assistant customs commissioner. No man knows the intricate workings of the tariff act better than he does, and no one is more obliging or accommodating in office.



Where

ARE YOU GOING TO PURCHASE YOUR

Fall Clothes ?

TALK THIS QUESTION OVER CAREFULLY

Determine which store can reasonably do the best for you. Such talk will bring you here. We court discussion and investigation. We are now ready for fall buyers. Our variety is fascinating. Styles were never before so elegant and effective. And low prices prevail—prices consistent with high grade goods. It is not a question of value in our store—you know you will get your money's worth. You have only to please your fancy.
