RENDELL & CO

I. O. O. F. GRAND LODGE.

Following are the officers elected for the grand encampment, I. O. O. F., of British Columbia, held in Ladysmith last week:

Thos. Embleton of Rossland, grand patriarch.

A. Henderson of Victoria, grand high priest.

W. Thorp of Nanaimo, grand senior warden.

T. F. Neelands of Vancouver, Grand scribe.

James Stark of Victoria, grand treasurer.

H. T. Fulton of Ladysmith, grand junior warden.

J. A. Dresser of Victoria, grand outside sentinel.

J. A. McKay of Vancouver, grand inside sentinel.

H. J. Raymer of Rossland, grand marshal.

Following are the grand lodge officers elected:

Dr. D. E. McKenzie of New Westminster, grand master.

F. E. Simpson of Cranbrook, deputy grand master.

Thos. Embleton of Rossland, grand warden.

Frederick Davey of Victoria, grand secretary.

H. T. Fulton of Ladysmith, grand treasurer.

Fred Davey of Victoria, grand representative.

Wadds Bros., the well-known photographers of Vancouver and Nelson, will open a permanent studio in Miller's old stand about July 1st. The premises were secured early in May, the equipment has been ordered and is on its way west now. Wadds Bros' long residence in B. C. and the fact that the excellence of their work is well known to every one make any further comment unnecessary.

Whooping Cough in Jamaica.

Mr. J. Riley Bennett, a chemist of Brown's Town, Jamaica, West India Islands, writes: "I cannot speak too highly of Chamberlain's Cough Remedy. It has proved itself to be the best remedy for whooping cough, which is prevalent on this end of the globe. It has never failed to relieve in any case where I have recommended it, and grateful mothers, after using it, are daily thanking me for advising them." This remedy is for sale by al druggists.

ALONG THE KETTLE RIVER

The Railroad Situation and the Benefit the Hill Road Will Be to the Mine Owners and Ranchers West of the Boundary Country

A reporter of The Times returned on Tuesday afternoon last from a trip to the Kettle River country, undertaken with a view to gather information for the special edition of the paper, the preparations for which are now well under way. While in the district referred to our representative heard the opinions of very many of the residents concerning the fight at present waging in the Dominion house between J. J. Hill, championed by Duncan Ross, M. P., and the C. P. R. James J. Hill wishes to build a railway from Midway to the B. C. coast. Some well-informed people say that the proposed line will start from the Emma mine at Eholt and come through Greenwood. As Mr. Hill does not choose to make his plans public at this stage of the game, we are unfortunately not in a position to either corroborate or deny the rumor, all we can do is to hope with the rest of the people of Greenwood that such is the case, and sing with the words of the old pantomime song:

"Oh, let it be soon."

The C. P. R., so we gather from the actions of their pet newspapers and hirelings, object to Mr. Hill's scheme on account of the fact that the proposed road taps a section of country which they have systematically neglected since their advent into this province, and which in spite of this they have the impudence to claim as theirs and theirs only, and that Hill is actually willing to build the road without a bonus. Who ever heard of such a thing? Is it any wonder that the C. P. R. is in arms? The idea of building a railway in British Columbia without a bonus! Really when we look into the matter we are filled with indignation, and pause to wonder why such papers as the Victoria Times and Vancouver World can be found supporting such a preposterous hold-up as James J. Hill proposes to perpetrate on the unsuspecting taxpayers of this glorious province.

We are told that Mr. Hill will never build to a British Columbia terminus at the coast. We wonder why he ever went to such trouble and expense in fighting injunction after injunction at Vancouver, and all the opposition possible to his getting an agreement to use the New Westminster bridge. The C. P. R. is well named the octopus. If it was called the decapod or centipede it would be much nearer the truth.

We read with much pleasure some two weeks ago a splendid apology for the C. P. R. from the facile pen of P. A. O'Farrell, in the Nelson Daily News. In it we are told of the wonderful things the C. P. R. had done for the Boundary country. In spite of this, however, we are reluctantly forced to the conclusion that instead of a benefit the great Canadian company, of which everybody should feel proud, and yet so many feel heartily ashamed, is a terrible detriment. Their supporters almost control our legislatures, they successfully balk financial support to such a road as the proposed Midway and Vernon, for the lack of which the West Fork country is in a deplorable state. They charge $3.02 per cwt. from Montreal to Greenwood, and $2.49 from Victoria to Greenwood. The odd 53 cents is for the extra 2,000 miles of hauling. We could go on but we wish not to give our own opinions, but those of the Kettle river people. There is one gentleman in the Rock Creek district whose conversation simply reeks of railway news. Our correspondent tried hard to occasionally change the subject to that for instance of the advisability of advertising his unsurpassed liquids in the special number. It was no go. He had no heart or ears for other than the ospect of Jim Hill's bill passing the house this session. In our own mind we could scarcely blame him. He with many others has held out year after year, hoping against hope. He has seen the country stagnate for lack of transportation facilities, has seen good mining propositions go begging, has seen men leave the country after holding on to their claims until it was either a case of get out or starve. Is it any wonder these people want to see the V., V. & E. bill pass the house?

Here is a country rich in mineral resources, easily irrigated, plenty of splendid agricultural land, and what is it today? We wish the respective editors of the Nelson Tribune and the Vancouver Province would take a trip through and get wise, we venture to think that they would alter their tune if they could be induced to write what they saw instead of what they were paid to write.

We would like to state that it is our opinion that things will improve this year. Unfortunately our inate love of truth even precludes this source of sympathy. The only thing that will save that country is a railway, and for the sake of the men who have spent their lives in discovering the vast mineral deposits, it cannot come too soon. We believe no right-thinking man in this community opposes the Ross bill. We most earnestly hope not. Some of its opponents make the most ridiculous statements concerning Mr. Hill's intentions. They claim that he does not intend connecting the V., V. & E. to the British Columbia coast cities, Vancouver and New Westminster; that his idea is to take the ores of this country to the neighboring state for treatment; that his only fixed object is to build up American towns to the detriment of our own; that he merely wants the Similkameen and adjacent country is a feeder to his main line, his detractors are going the right way to make it that and that only. J. J. Hill will build into the Similkameen anyway. He has already started for that matter. If the present bill is defeated it simply means that he will not build to the coast, but take all the trade of the more western Boundary country to Spokane via Republic. It means that the Chesaw ores instead of being treated at a point on this side of the international boundary line, as there is every reason to suppose probable if the bill passes, will be smelted on the American side. We believe that J. J. Hill will build west from Midway, and nothing short of a miracle will make us think otherwise. That we are not alone in that view is apparent from the fact that hard-headed business men, as those controling the Eholt Trading Co. are acknowledged to be, are opening a general store at Midway; that P. Burns & Co., some of the principal shareholders in which concern are C. P. R. officials, are doing likewise; that the B. C. Copper company have for many months had an option on a smelter site there; that the same company has taken a working bond on the Sunset group of mines on Copper mountain in the Similkameen; that the same company makes no secret of the fact that they are intensely interested in the doings of Chesaw camp; that the Granby Co. has taken a working bond on the Dividend group near Osoyoos, and last, but not least, that the Great Northern contractors at Oroville are daily expecting orders to start for Midway or Eholt.

We do not know that the road will be started this year, we hope it will, but we are now faced with the fact that the C. P. R. having failed in the commons will put in big licks to get the senate to throw it out. With such men as Senator Templeman to back the bill, and with a Liberal majority in the Senate, the chances are in favor of the bill passing.

The enemies of the Great Northern are very ready to tell their readers and hearers what the Hill lines have done to hurt B. C. They are exceedingly careful, however, not to tell the good his lines have done for the people, of decreased passenger and freight rates, of quicker connections, of better mail

(Concluded on Page 5.)

UNION LABEL — GEOGRAPHICAL — GREENWOOD

FRIDAY JUNE 23, 1905

THE Colville brass band wants to discourse sweet music at Grand Forks July 1st. Fortunately for the Colville brass band Grand Forks has gone out of the summer carnival business.

THE Nelson Daily News is authority for the statement "that the New York end of the Montreal & Boston finances has been satisfactorily arranged and a resumption of operations may be looked for within the next thirty days." It is to be hoped so.

LATE dispatches from Ottawa contain the pleasing information that the V., V. & E. bill will be fought on party lines. As the Liberals have a majority in the railway committee, the house and the senate, there can now be no danger of the measure being defeated.

IF it takes freight 38 days to come from Montreal to Greenwood, a distance of nearly 3,000 miles, or an average speed of 4 miles an hour, it may safely be assumed that there will be few damage cases against the C. P. R. for injured stock. Our great Canadian road may not be speedy but it is safe, sure and cinchy.

WHEN a newspaper man shoots at anything but the truth, he should remember that previous training might cause a slight variation in accuracy of aim.

A CITIZEN this week requested that his name be not published in the Times. This request he has an undoubted right to make, but he is one of the few exceptions among respectable people who do not wish occasionally to see their names in print. There is but one class who, as a rule, have a decided aversion to publicity, and their names appear in the criminal records.

THE Greenwood Times has been enlarged. It seems to be a good thing for a newspaper to have its editor a member of parliament.—Cranbrook Herald.

Possibly, possibly, friend Simpson. Just try being a member of parliament and running a newspaper. It is a double action boomerang. The people at home cannot get rid of the idea that the member is making barrels of money, and therefore the paper does not need prompt settlement of accounts. And then the member, while away attending to his legislative duties, is never quite sure what sort of a mine the printers will spring. This week it may be enthusiastically Grit, next as enthusiastically Tory, next the cash may not come in as promptly as desired, and the Socialist scheme may appeal to their higher intelligence, and the next week the collections may reach the vanishing point, and the scarlet banner of anarchism float over the print shop of the man who is devoting his best energies to giving a daily mail service to the three residents of Deadman's Gulch, or a customs office at Tie Siding. Then there is the local advisory committee, who are the self-appointed guardian angels of the printing office. It is their duty to see that the editorial utterances of the paper are politically orthodox. The member is three thousand miles away and too busy to take much interest in the paper. The printers are too busy getting the paper out and making both ends meet to pay much attention to the member. The receipts are too small to pay an editor, so the news, editorials, etc., are set up or clipped by whichever of the printers has an idea, or the shears, and the time to put it in type. Yes, it is a "good thing for a newspaper to have its editor a member of parliament," so also is it a good thing to be sailing in a rudderless ship in an unknown sea.

ONE of the peculiar arguments used against the Hill road is that the ore will be hauled from the Similkameen to the Everett smelter for about $1.20 a ton. This, in the event of a local smelter not being built, would be an excellent thing for the Similkameen. But the qustion of transportation to Everett of the Similkameen ores is one for discussion years hence. The Great Northern is now building from the Boundary, where there are smelters, to the Similkameen. The distance is 140 miles from the Greenwood smelter to the Sunset group of mines on Copper mountain. Mines and smelter are operated by the B. C. Copper company. The C. P. R. is building from Spence's Bridge on the main line into the Similkameen. From Copper mountain to the Greenwood smelter over the C. P. R. would be over 1,000 miles, or to any other smelter point over the C. P. R., not less than 500 miles. The Great Northern is building in a direct line from the Boundary smelters to the mines of the Similkameen. The C. P. R. is constructing its road in the opposite direction. Between the smelters and the mines the Great northern will have a distance to haul ores about one seventh that of the Canadian Pacific. Which can give the best rates to mine owners, the short or the long haulage? It is only necessary to point to the Slocan to show the results from C. P. R. monopoly. There nearly all the mines have been closed down as a result of excessive freight rates. A little over a year ago a carload of ore was shipped from the Handy group, on the Lardo-Gerrard branch, over the C. P. R. to Nelson, a distance of about a hundred miles. The freight charges were $15 per ton—a prohibitive rate. The same may be said of the whole Lardeau and Poplar country. Medium grade ores cannot be shipped over the C. P. R. from districts in which that company has a monopoly. The average of the Similkameen ore is low grade and will not stand high freight and treatment charges. The ore cannot be hauled toand treated in the Trail smelter at a profit. So it is either a short haulage or shut down. Over its proposed route from the Similkameen the C. P. R. cannot give the short haulage neccessary. The Great Northern can. The Great Northern route means development of the medium and low grade mines of the Similkameen. The C. P. R. means stagnation for the mining industry of that section. The one means hundreds of miners working and a market for the produce of the ranches of the district; the other means a "walk" for the low-grade mine owners and the small farmers. The one prosperity; the other bankruptcy.

Slag cement is the product obtained by pulverizing without calcination, a mixture of blast furnace slag and slaked lime.

THE PROVIDENCE.

As we go to press this morning the affairs of the Providence Mining company are being aired in the police court. A number of the employes of the mine having been arrested on the charge of obstructing work. This is the result of dissensions among the directors.

SIWASHES FROM ALL OVER.

Through various Indian agents and missionaries, representative of nearly all the British Columbia tribes, the fact that the Dominion Fair is to be held in New Westminster this year, has become widely advertised among the Indians of the province and the presence of thousands of them on the banks of the Fraser during the great national exhibition is already assured.

The fair management has set aside $2,500 for prizes for Indian exhibits and sports and there promises to be something doing in lively fashion among the redskins every day of the big fair. The sports will include all sorts of canoe races on the river, foot and horse races and tug of war on land, in which the females as well as the males will participate.

Ten Indian bands have already entered the musical competition.

The braves and their wives and families from the most remote parts of the province will also go to New Westminster by their own primitive modes of conveyance, and to some of them this means perilous trips by water that cannot be made in less than about two months.

While in New Westminster the Indians will be the guests of the government and the management of the fair.

The woman was tired and discouraged,
She had been cleaning house all day;
And she found that some of the furniture
Looked ready to throw away.
"Use JAP-A-LAC," a neighbor said;
"It will work wonders for you."
She did, and now that furniture
Looks just as good as new.
For sale by The Hunter-Kendrick Co.

A Safe Cough Remedy for Children

In buying a cough medicine for children never be afraid to buy Chamberlain's Cough Remedy. There is no danger from it and relief is always sure to follow. It is especially valuable for colds, croup and whooping cough. For sale by all druggists.

FROM THE WASTE DUMP

Coal has never been found possessing crystalline structure.

The finest known specimens of crystallized galena come from out the lead and zinc mines of Missouri and Kansas.

The term fold in geology is used to denote an inclined position into which various disturbances may have moved rocks previously horizontal. Even very brittle rock may be thus folded, rather than broken, under a severe, steady pressure.

The less water, ash and sulphur in coal the better the coal. The water must be evaporated before the coal burns, the ash represents inert matter and sulphur represents one of the most objectional additions to any coal. A first-class coal should not contain over seven per cent of ash, and a good gas coal ought to carry less than seven per cent sulphur.

The wastage of heat energy under the present methods is appalling. About 65 per cent of the heat energy of coal can be put into the steam boiler and from this only 15 per cent of mechanical power is obtained. Thus about nine-tenths of the original heat in coal is wasted. Proceeding farther and putting mechanical power into electricity, only from 2 to 5 per cent is turned into light; or, in other words, from coal to light we get on an average only about one-half of one per cent of the original energy, a wastage of 99½ of every 100 pounds of coal used. The very best possible with the largest and best machinery is a little more than one pound for every hundred consumed.

A flux is a substance or mixture added to assist in the fusion of minerals. The most used flux materials are limestone and fluorspar. Much attention is given to fluxes in iron smelting, because on their character depends to a considerable extent the complete separation of the metal. To accomplish this the flux must be such that it will combine with the earthy matter of the ore, and form a slag which must not be too refractory or fusible. Thus if an ore abound in clay or sulphur, lime or limestone, and possibly sand must be added; otherwise the quartz is slagged by combining with part of the iron, which is thus lost. At times ores are so selected that the earthy matter present may flux each other, but this requires skill and experience In pottery there are numerous fluxes, but most all consist of litharge or red lead, with sand or boracic acid.

At a cost of $2,500,000, and after five years' work, 170 acres of the richest iron deposits in England have been reclaimed from the sea on the Cumberland coast, by means of a semi-circular sea barrier, almost 7,000 feet long, 210 feet wide at the base, 83 feet on top and 40 feet high. An old sea wall, constructed in 1890, 600 yards farther inland, made 5,000,000 tons of ore available, but eight years later a bed of quicksand established connections between the underground workings and the sea, and the occurrence indicated the importance of a larger area being inclosed if the work in the mines was to be carried on with safety. The first outer bank of the new wall is of rubble limestone, protected on the seaward side by 25-ton concrete blocks distributed irregularly, so as to break the force of the waves, and carried ten feet above the high water of the ordinary spring tides. The inner bank is also of limestone of less dimensions, while the center is of clay filling with a puddle core, into which is housed the top of the piling under the bank, forming a submarine cutoff from further trouble from quicksand.

Sprained Ankle, Stiff Neck, Lame Shoulder,

These are three common ailments for which Chamberlain's Pain Balm is especially valuable. If promptly applied it will save you time, money and suffering when troubled with any one of these ailments. For sale by all druggists.

On Saturday last Samuel Smith, employed by P. Burns & Co., and Miss Lillian Bentley were married at Nelson. Miss Bently came from Dewsbury, Yorkshire, England, and the groom met her at Nelson. The young couple will reside at Anaconda.

The Providence mine is—well, we don't just know who, which or what is it at present. A few legal gentlemen are prospecting the property before a justice of the supreme court today. A full force of miners are kept at work, so the question as to which party will have control does not affect the working force.

Lead and zinc are the most important of the base metals.

A considerable amount of pumice stone is used in the manufacture of oilcloth, it being used to impart smoothness to the thick coats of paint laid on the oilcloth.

Close to 5,000 tons of lead are annually consumed by the Chinese in the manufacture of the so-called tin foil, or sheet lead that is used for the lining of tea chests.

Our Factory Knows No Substitute For LEATHER

NOTHING but good honest leather can find a place in a Leckie Boot.

What's the use of any thing else for a Western Miner, Logger or Prospector? When far away from the busy haunts of man he needs footwear that will not go back on him.

Leckie boots are just such Boots. They are a western product for western people.

For sale by all dealers.

DEPRESSION IN THE SLOCAN.

The depression in the silver-lead mining industry in the Slocan district in British Columbia is arousing the ire of the leading spirits of that community, if the tone of the local technical press is to be taken as an indication. The Slocan district is primarily the silver-lead district of British Columbia, and within its boundaries is mined most of the output of silver-lead ores and also the dry silver ores. In the face of these facts it is rather remarkable that the leading industry should suffer; but an inquiry into the reasons seems to place the trouble in what the Sandon Mining Standard is pleased to term the "lead-pipe cinch" of a railway corporation.

In 1892, which was the first year of activity in this district, Mineral Industry reviewed the condition then existing, and showed that the high transportation charges were prohibitive, being as high as a total of $50 per ton from mine to smelter. At that time and for a number of years afterward the Slocan ores were marketed in the United States. They were bought by Montana and Colorado smelters and the competition to secure them was very keen. Leadville carbonates could no longer be looked to as the basic supply for Colorado smelters, and labor troubles had curtailed other sources of lead.

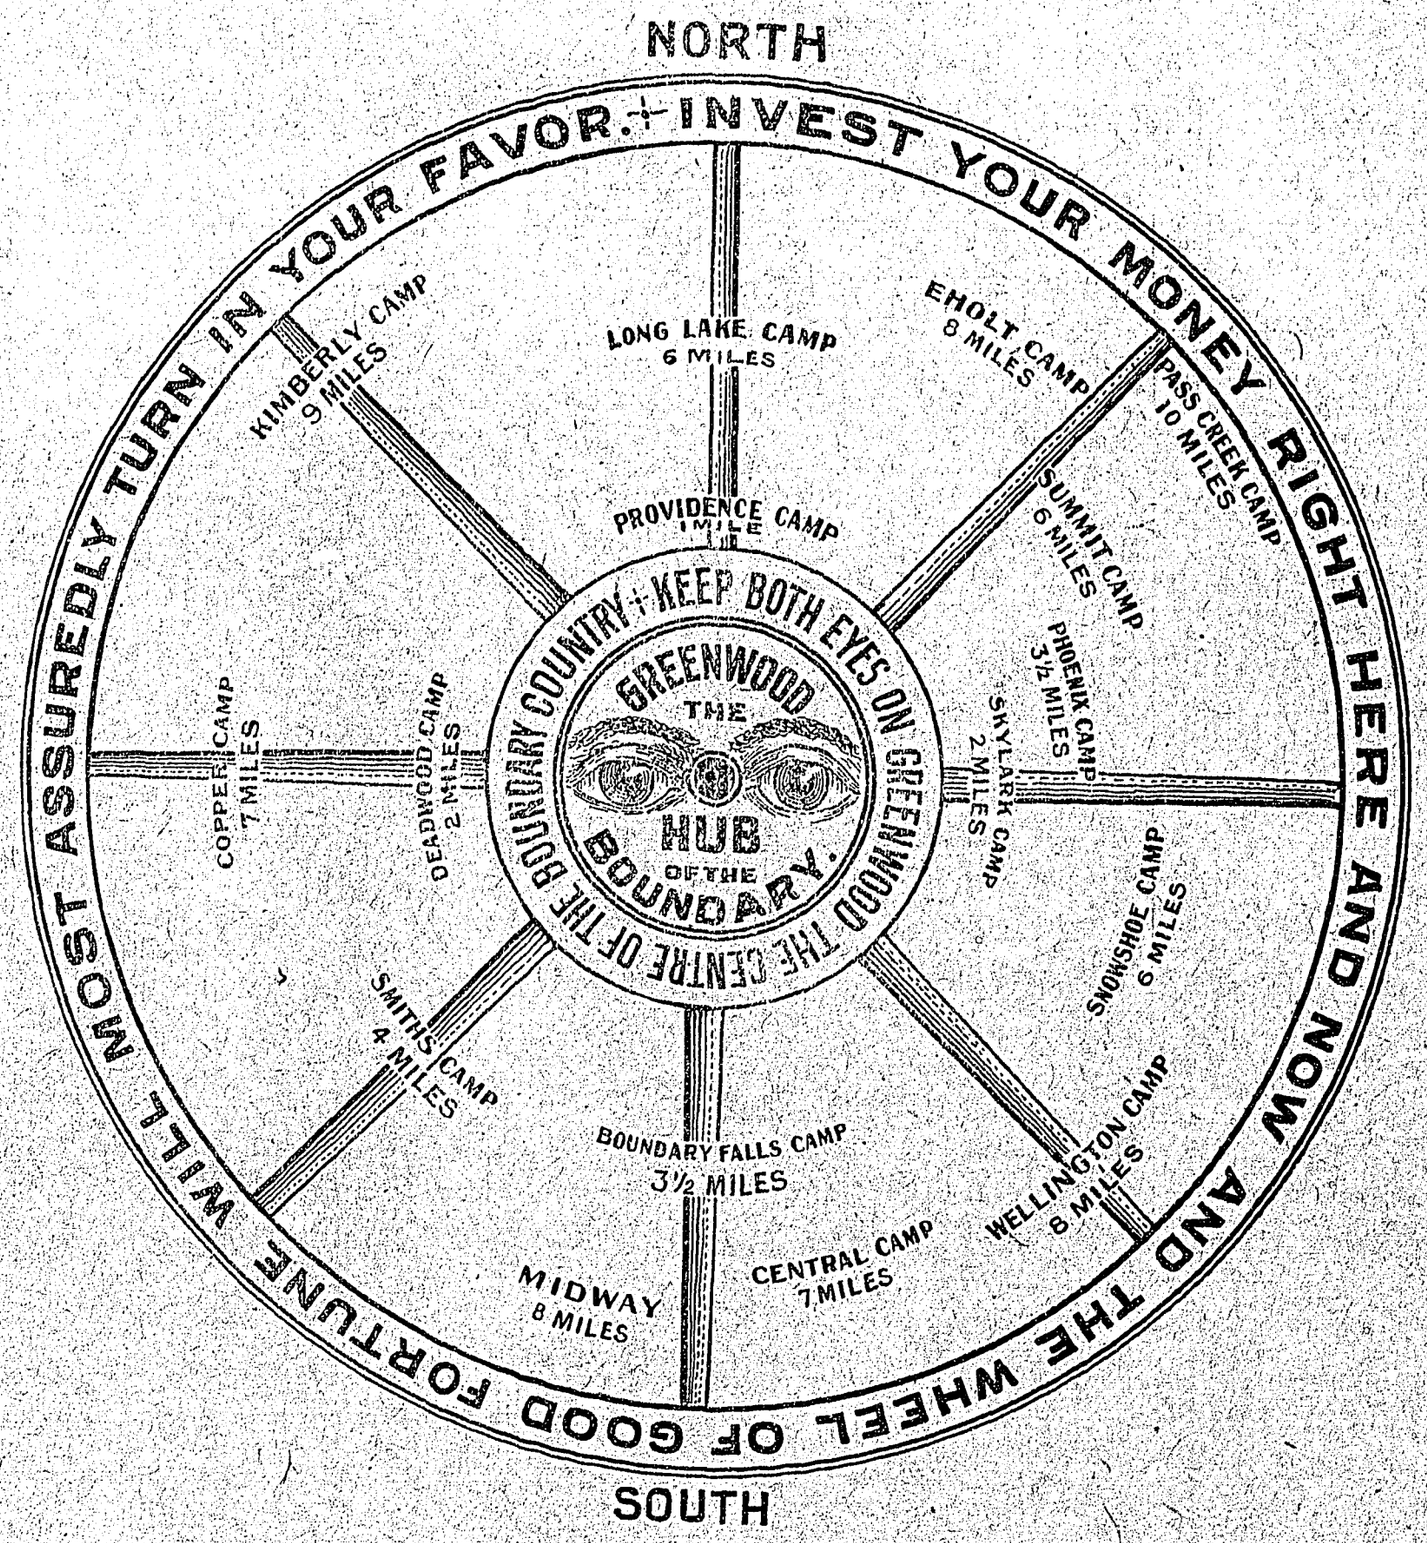
Mexican lead ores were later shut out by a heavy duty, so that the American smelters were forced to look abroad for their supply of lead. This they did so vigorously that the bulk of the tonnage of the Slocan was diverted to that country.

It now seems that the active campaign for lead in this country was a contributing factor to the domination of the Slocan mines by the Canadian Pacific railway, from which that district is apparently suffering today. For, with their lead market in Colorado, it is apparent that the Canadian Pacific railway could haul the Slocan ores but a small percentage of the way, and that it was consequently contributing heavily to the business of its competitor in this country. Naturally the prospect of degenerating into a feeder to a competing line was anything but pleasing to the Canadian Pacific railway, and it began to devise schemes for relief. The most feasible scheme was to establish metallurgical works at home to consume the output of the home mines. This proposition would enable the railroad to control the silver-lead industry, and at the same time receive the commendation of all patriotic Canadians for establishing an industrial center at home. The consumation of the idea resulted in the location of the metallurgical works at Trail.

But one more stroke would have been necessary to complete the establishment of home industry, viz.: fair transportation rates to the mining companies. There appears, however, to be little disposition on the part of the Canadian Pacific railway to voluntarily remedy this trouble and, in the meantime, a district which could be more prosperous, suffers from depression. The situation seems to show clearly the enormous power possessed by a transportation company in forcing or retarding the growth of the mining industry.

In mining, the foot wall of a vein is the rock boundary of its lower side, on which a miner would stand when breaking down the ore.

No Time Equal to the Present.



Never in the history of the Boundary has the district had a brighter outlook than today. With the successful development of the immense large bodies of low grade ore and the enlarged and much improved facilities for treating at a very small cost, the continued opening up of new high grade properties and their successful and profitabl operation has made the Boundary famous as a mining centre, and every day adds more to the list of new finds and bigger values. It is readily admitted that Greenwood is the Eldorado of the Boundary with all roads leading thereto, and surrounded as it is, with such magnificent resources is destined in a few years to be a second Butte. If you therefore want to participate in its future prosperity, now is the time to invest both in mines and real estate. For NINETY DAYS we intend giving you a chance to make a safe and profitable investment. Every lot we own will be put on sale at rock bottom prices during the above period. Prices ranging from $50.00 up, at terms to suit the purchaser. Make your selection and make it early.

RALPH SMAILES,

AGENT FOR THE GREENWOOD TOWNSITE COMPANY.

Just What Everyone Should Do.

Mr. J. T. Barber of Irwinville, Ga., always keeps a bottle of Chamberlain's Colic, Cholera and Diarrhœa Remedy at hand ready for instant use. Attacks of cholic, cholera morbus and diarrhœa come on so suddenly that there is no time to hunt a doctor or go to the store for medicine. Mr. Barber says: "I have tried Chamberlain's Colic, Cholera and Diarrhœa Remedy which is one of the best medicines I ever saw. I keep a bottle of it in my room as I have had several attacks of colic and it has proved to be the best medicine I ever used." Sold by al druggists.

ROCK CREEK NOTES.

Placer miners of the old days say that never since the great Cariboo excitement in 1848 has there been such a light snowfall as was experienced last winter. They state further that the prospects for placering this fall are very bright, and that there is sure to be a big rush for locations on the Fraser river bars, some of which are bare for the first time in 42 years. While this may be very good news for placer miners it is the direct reverse to mine owners and operators in the Boundary country, especially to those who have to depend on electrical power generated from the Cascade Falls of Kettle river. As stated elsewhere in this issue, a Times reporter visited Rock Creek this week and there saw enough of the height of the river in comparison to the heights at similar periods in previous years to fully bear out the claim of the placer miners. Rock creek rises in the Camp McKinney district and has been worked for coarse and fine gold for many years. Last fall there was quite an excitement and a lot of work was done at the mouth of the creek. This year it is anticipated that the biggest excitement on record will take place, as it is quite unlikely that unless an uncommonly severe rainfall is forthcoming the creek will practically dry up by the end of the summer. It is believed that if bedrock could once be reached good values would result and a very determined effort was made to that end last fall. The water, however proved too much for the parties trying and the excitement died a natural death. If the water gets as low as there is every reason to suppose it will this fall, another effort will be made and probably with success.

There is good reason for saying that Camp McKinney will be idle this summer. It appears that Coal Baron Dunsmuir owns some of the claims the big company must have in order to continue their prospecting, and as James is not anxious to sell unless at his own figure, it seems unfortunately, altogether likely that no work will be done at all this year.

Across the river from Rock Creek there exist some very promising claims of almost pure chalcopyrite. Unfortunately so far the main lead has not been discovered and no work is being done on the properties now, as the owners argue, "what is the use, even if we had the best chalcopyrite in the province we couldn't ship it."

On Nicholson creek, farther north over the first divide, there are some very good properties. Work on these has also been abandoned for the same reason. Many of them have fine showings of graphite, although so far not enough development work has been done to prove whether it exists in sufficiently large quantities to be worth working.

Just west of Rock creek an immense dike of diorite crosses the country to the north. A belt of serpentine also exists and some beautiful specimens were obtained on the river bank. This rock will be used for marble work some day, as it is capable of being worked to a beautiful finish, and will be very valuable for mantles, tiles and general ornamental stone work.

To those more interested in fishing than in mining it must be said that the fishing is not yet at its best. Old fishermen say that too much feed is coming down the river, but that in a week or so they will bite much better. The best bait appears to be a brown hackle fly with a grasshopper on the hook. When it gets dusk this can be changed to a coachman, as the fish see it better than the brown hackle. Some good bags were taken last Sunday, one gentleman getting about thirty pounds.

Henry Nicholson, the deputy mining recorder at Camp McKinney, was visiting Rock Creek at the same time as the Times reporter. Mr. Nicholson is an old timer in the country and Nicholson creek is named after him. In case two and two should be put together, the information concerning Camp McKenny did not come from him, but from parties more directly interested in the properties themselves.

There are plenty of rattlesnakes about, but if one is careful there is little danger from them, as they rattle before striking. Our correspondent states that he saw only two, two groundhogs, several million gophers and a large coyote. What things you do see when you haven't got a gun. The coyote sat on his hunkers about one hundred yards away and sat gazing at the West Fork stage in which the traveler returned to Midway.

The Rock Creek and West Fork people consider that they have a very grave grievance in the mail service, or rather in the lack of the same. The West Forkers are the worst off, as they only get the mail once a week, on Saturday. The Rock Creekers get the West Fork mail on Tuesday morning and sort it. A letter posted at Beaverdell on Tuesday arrives in Greenwood 24 hours after the stage which brings it as far as Rock Creek. A splendid mail service, nearly as good as that between Phoenix and here.—A. W.

Cuban Diarrhoea.

U. S. soldiers who served in Cuba during the Spanish war know what this disease is, and that ordinary remedies have little more effect than so much water. Cuban diarrhœa is almost as severe and dangerous as a mild attack of cholera. There is one remedy, however, that can always be depended upon, as will be seen from the following certificate from Mrs. Minnie Jacobs of Houstan, Texas: "I hereby certify that Chamberlain's Colic, Cholera and Diarrhœa remedy cured my husband of a severe attack of Cuban diarrhoea, which he brought home from Cuba. We had several doctors but they did him no good. One bottle of this remedy cured him, as our neighbors will testify. I thank God for so valuable a medicine." For sale by all druggists.

ALONG KETTLE RIVER

(Continued from Page 1.)

service, of increasing prosperity everywhere from opening up of new lands, both mineral and agricultural.

What has the Great Northern done for Greenwood? The nearest point it touches is Phoenix. To that point there is daily connection by Royer's stage with the morning train to Spokane. By going this route a passenger is in Vancouver or Victoria the following afternoon at about 3 o'clock. Leaving by the C. P. R., about seven and a half hours later, you arrive in Vancouver 21 hours later than by the Great Northern, and at Victoria 27 hours later. Grand Forks has mail service over the Great Northern and gets coast letters one full day ahead of the Greenwood people.—A. W.

When illuminating gas was first introduced its use was confined to shops and factories, house owners having had the idea that it was a very dangerous substance. It is a fact that in several states protests were made to the legislative bodies against the manufacture of gas.

A Good Family Liniment.

Every family should be supplied with a bottle of Chamberlain's Pain Balm. For cuts, bruises, burns, scalds and similar injuries, which are of frequent occurrence, there is nothing so good. It soothes the wound and not only gives instant relief from pain but causes the parts to heal in about one-third the time required by the usual treatment. As it is an antiseptic all danger from blood-poisoning is avoided. Sold by all druggists.

For Sale—First-class piano, less than half price. For particulars apply to Wm. Fleming.

WALL PAPERS, ETC.

TOWN TOPICS

Mrs. Geo. B. Paul is visiting friends in Spokane.

Smith Curtis of Rossland was in the city this week.

The newest Canadian souvenir jewelry at Thomas Drug.

Pianos and sewing machines for sale or rent at the O I C, A. L. White & Co.

E. G. Warren left Tuesday for New Westminster. He will return in about a week.

Buggy, with tongue and shafts, in good condition, for sale cheap. Inquire at this office.

Mrs. S. A. Grierson and children left Tuesday on a four-weeks' visit in Duluth, Minn.

The Boundary Falls sawmill is being taken down and shipped to Five mile on Slocan lake.

Mrs. E. B. Dill left Sunday for a month's camping on the West Fork near Beaverdell.

Houses furnished or unfurnished. Apply to F. W. Hart, corner Deadwood and Copper streets.

The Thomas Drug Co. have moved their place of business in Midway to the Terry building.

Mrs. King. Rees and family left last week for a visit to friends in Boston and other eastern points.

Mrs. J. R. Saunders and baby came in Saturday from Spokane. Mr. Saunders met them at Marcus.

It is said that the Elkhorn deal is now practically through and work will be resumed in a few days.

J. F. and Mrs. Robillard returned to Trail last week, after a short visit to Mr. and Mrs. J. J. Caulfield.

The Eholt Trading Co. are fitting up the old Advance building in Midway and will open a general store

Just in—another lot of those swell hand bags at Thomas Drug.

John and Mrs. McKenzie of Rock Creek were the guests of Mr. and Mrs. Kenneth McKenzie the past week.

Geo. Cunningham, acting government agent, visited Midway Saturday to inspect the work being done on the Norris bridge.

Mr. and Mrs. Manchester of the Queens hotel and Miss Manchester left Tuesday for a month's visit to the Portland Fair.

Cole Murchison of Fernie is in the city looking up a business location.

The Sally mine at Beaverdell employs 27 men and is making regular weekly shipments to the smelter.

The government is planking the Norris bridge across the Kettle river at Midway. Jos. Welmhurst has charge of the work.

There will be a debate in the Methodist church Monday evening to decide which is the most beneficial to the world—Jap or Russ.

Mrs. Kenneth McKenzie and Miss McKenzie leave tomorrow for Nova Scotia, where Mrs. McKenzie will visit during the summer.

The public school closes today, and J. L. Watson, the principal, leaves this afternoon for the East to spend the vacation at his home near Owen Sound, Ontario.

There will be a grand fete in aid of St. Jude's church on Dominion Day. The fete will be held in the grounds near the C. P. R. depot.

Alderman Parker is taking a short vacation in Spokane and other points in the State of Washington. Jack Scott, late of Fernie, is filling his position.

Jim and Geo. Foulds are training for the drilling contest at Nelson on Dominion Eay. Work on the Highland Queen has been suspended until after that date.

The Anaconda News will shortly be enlarged to an eight page paper. This week a supplement was printed in order to handle the increased advertising space taken.

J. W. Nelson came out of the hospital Sunday, three weeks and two days after the operation for appendicitis was performed. It will, of course, be some time yet before he regains his strength.

Val Haynes of Penticton was a visitor in Midway and Greenwood the past week. He says Penticton has become a very lively town, and a large number of people are settling along the Okanagan river.

A number of the residents of Greenwood will journey to Republic to help celebrate the Fourth of July, and the baseball nine will probably accompany them. The Citizens' band will furnish music for the occasion.

The British Columbia Telephone company now has a force of fifteen men at work rebuilding the line from Cascade to Greenwood. Heavy cedar poles are replacing those that have been in use for a number of years.

F. Keffer, general manager of the B. C. Copper company's mines and smelter, left on Saturday for New York to consult with the directors of the company. It is rumored that the company is negotiating for other properties in the district, and in case the deal goes through will increase the capacity of the Greenwood smelter.

A card has been received at this office announcing the marriage, on the 24th inst. of Wm. Fowler and Miss Bessie Fowler at Nether Blackhall, Invrurie, Scotland. Mr. Fowler was the first to bring the high-grade ores of this district to public notice, and was one of the original promoters of the Providence mine. His many friends in Greenwood wish Mr. Fowler even greater success in his new venture than he had in the Providence, and that time in its annual cycles may not fail to bless him with regular dividends.

The lacrosse and baseball teams of have arranged for matches here on the first of July. The Grand Fork lacrosse and the Phoenix baseball team will be here on that day. It is probable that other athletic events will be arranged for. If the two teams would erect a booth and furnish refreshments they could manage to raise sufficient funds for athletic events in a small way. Arrangements might be made by some of the Ladies' societies of the city to furnish lunch for visitors, as the local hotel men do not care to take any active part in the celebration of Dominion day.

REMINDERS FOR SUMMER!

Grocery Dept.

—A FEW—

SUGGESTIONS

IN our lines we carry none but the best.

GOOD Toot Brushes from 15 cents to 50 cents.

HEADACHES are often caused by weak eyes. Come and have your eyes tested free.

TRY and remember our store when in need of drug sundries.

The first issue of the Oroville Weekly Gazette, published by Fred J. Fine, has been received. It is a four-page six-column publication, well patronized by advertisers, although all of the eighteen saloons doing business in the town are not advertising. Before the first issue of a newspaper the editor should come to an understanding with the saloon men—have them declare their intentions as to whether they intend to live and let live or hog the whole thing. If there is one class of business that should, out of gratitude, if for no other reason, support the newspaper, it is the saloon.

Miss Fisher returned to her home in Colfax, Wash., Tuesday last. Mrs. Julius Ehrlich and child accompanied her and will spend the summer with her father and mother, Mr. and Mrs. A. Fisher.

A letter has been received from Bob Jacobs who is at Harleyburg, Ont., in what he says is the "richest camp in the world." He also sends a photograph representing himself and Jack Empey in an attempt to penetrate a hard lime formation with hammer and drill. To show the strenuousness of the work they are engaged upon they are both stripped to the waist. It would perhaps have appeared more realistic had they extinguished the fire before the photo was taken. It might also not be out of place to suggest that a 7 or 8-pound hammer is a more effective weapon than a prospector's pick in forcing a drill into hard rock. Bob says that Roy H. Clark, Bob Longley, Fletcher, and Jack King are in the camp, and John Cormick, H. B. Munroe and Duncan Ross are expected shortly. In conclusion he says he and Empey expect to "clean up some coin" on their property.

Webb's Chocolates

JUST IN a fresh Consignment.

We have shipments coming regularly every month, so that they are always fresh and toothsome. We have them in bulk, also in ¼s, ½ and 1 pound boxes.
