Fit-rite Clothing

OUR FIT-RITE CLOTHING is designed to meet the steady growing demand for our best dressers for a grade of ready made garment that shall be equal in fit and finish to the best custom-made tailoring. Fit-rite is not only all the name implies but more, for its perfect fitting qualities together with a conservative adherence to the season's very best models, assures to the wearer the satisfaction of knowing that his clothes not only "fit-rite" but ARE RIGHT in every particular.

Mothers who are in trouble over Boy's Kickers should insist upon having THE LION BRAND. They are made from all-wool cloths, with double knees and double sewn seams.

Then again, the buttons are put on in such a manner that they cannot come off. They are a patent button, and cost three times as much as the ordinary kind.

The Pockets are a heavy drill, and will wear.

Don't You Think You Ought to Ask for THE LION BRAND ?

The Russell-Law-Caulfield Co. LIMITED.

If you are looking for an AMERICAN SHOE we have a swell line in Patent Colt, \$6 and \$6.50; Genuine Kangaroo, \$6; Vici Kid, \$4.50 and \$5; Velour Calf, \$4.50; Box Calf, \$5.50

We also carry a full range of Slater's Invictus shoes.

Our spring samples from the Crown Tailoring Co. are very complete and at Eastern Prices, from \$12 to \$28.00.

PAY DAY BARGAINS

- New Canadian Prints for 8 cts yd.
- Ladies' Shirt Waists for \$1.50
Regular Price was \$3 75
- Children's Shoes, sizes 8 to 2, for 95 cts pr.
Regular Price \$2 15
- Men's Smelter Shoes for \$1.50
Regular Price \$2.00
- Men's Fine Shoes in tan and black for \$2.50
Regular Price \$4 50
- Men's Fine Shirts for 75 cts pr.
Regular Price \$1 50

New Wash Dress Goods For Spring.
New Shirt Waists For Spring.
New Muslin Underwear For Spring.
See Our Big Stock Before Buying the above goods.

INFLUENTIAL VISITORS

Prominent Officials of B. C. Copper Co. go West.

PROSPECTS OF A RAILWAY

More Chicagoans Look Over the High Grade Mines.

There have been a large number of visitors here during the week. On Sunday Mr. F. L. Underwood and Mr. W. H. Thomas, the president and consulting engineer respectively, of the B. C. Copper Co., arrived from New York. On the same day Messrs. W. N. Merriam and J. Killerschorn, of Duluth, arrived. The whole party left for the Similkameen on Tuesday morning followed shortly afterwards by Mr. Allison, the local manager of the Canadian Bank of Commerce. Although nothing really definite is known of the business these gentlemen are visiting the Similkameen, it is fairly safe to assume that it has something to do with the proposed railway construction and the immediate necessity of providing smelter facilities for the mines of Chesaw, Republic and the various camps tributary to the Kettle river and its branches.

That there will be urgent need for a very large smelting plant to treat the immense bodies of ore simply waiting for railways, no one, who has any idea of the great mineral wealth of the country proposed to be served, can doubt for a minute. It is acknowledged on all sides that the B. C. Copper Co. has secured an option on a large tract of land at Midway, presumably for smelter purposes. It is altogether probable that Mr. Underwood's visit may be to look into the feasibility of operating successfully at that point. There is no doubt that Midway offers very many inducements as a smelter site, especially if the Great Northern build both east to here and west to Similkameen as many hope they may yet do. The road from Carlew to Midway is practically finished excepting the actual rail laying, and it is report-

ed on very good authority that the road from here to Midway is settled on.

In the bed of Rock creek are outcroppings of coal. From the work done it is apparent that there are two or three seams of good bituminous coal lying nearly flat and extending over a considerable area. The seams only need prospecting with a diamond drill to prove the existence of a good coal mine. What this would mean to that locality of a smelter at Midway may be estimated from the fact that at present the nearest source of supply is the Crow's Nest, over 400 miles away.

It is most earnestly to be hoped that immediate railway construction will be begun to open up the country west and north of here. The route of the Midway & Vernon railway taps the whole of the Kettle river mining section and would undoubtedly become a very active feeder for any smelter at Midway, if such is really seriously thought of. It is understood that plans for building the road this summer are in an advanced stage towards completion.

There were also two prominent Chicagoans in town on Monday, viz., Messrs. McPherson and Dow. Mr. McPherson is an intimate friend of Mayor-elect Dunne of Chicago and had to hurry away home on Tuesday morning, having been appointed one of the members of the committee to arrange for the entertainment of an eminent Scottish traction expert from Glasgow who is expected to arrive in the big city very soon.

The Chicago daily News of April 10 has the following concerning this visit: "Mayor-elect Dunne has appointed a committee to arrange for entertaining James Dalrymple, the Glasgow traction expert, on his arrival here. The committee at present is made up of John C. McPherson, Maxwell Edgar, Aldermen Ruxton, Badenoch and Hunter, three Scotchmen of the council, H. M. Ashton and James O'Shaughnessy. Others will be added later. It is planned to have a banquet at the auditorium and a reception. Mayor Dunne will deliver the address of welcome and James Hamilton Lewis will probably be toastmaster."

Messrs. McPherson and Dow were here visiting some of the high grade mines, in which so many men minded men of the windy city are interested.

Mr. Dow is a mining man of wide experience and was so impressed with B.C., this being his first visit, that he said were he not tied up elsewhere he should most certainly come here and operate. He said: "I may come anyway."

Before leaving Mr. McPherson said he understood that Mayor Dunne and Representative Fox, would visit Greenwood very shortly. Mr. Fox is chairman of the naval appropriation bureau and has been appointed by President Roosevelt on the Philippine commission. He anticipates being able to take a run in the Boundary on his way west to take steamship for Manila.

CITY COUNCIL.

At the council meeting Monday night there were present the Mayor and Aldermen Bunting, Caulfield, McNeil and Smailes.

Minutes of previous meeting were read and adopted.

Applications for the position of waterworks foreman were read from W. A. Pferbec, M. D. Hall and George Findlay. Council decided to appoint Mr. Findlay to the position.

From A. D. Hallett, giving names of firemen who turned out to Cropley fire. Recommended paid

City solicitor reported interviewing M. McDonald re land for a dam site and recommended that a settlement be made for \$100. Report agreed to.

Water committee reported main lowered on Silver street.

Clerk was instructed to correspond with makers of hose wagons with a view to exchanging for a lighter rig than one now in use.

Finance committee reported following accounts correct, which were ordered paid:

- G. H. Cropley \$ 40 00
- P. W. George & Co 39 00
- Palace Livery 4 50
- B. C. Times 24 70
- Fire Department 14 00
- B. C. Gazette 5 00
- E. W. Bishop 3 65
- Russell-Law-Caulfield 32 30
- P. Hickey 5 00
- Yale-Columbia Lumber Co. 23 86

The Estimates Bylaw, No. 102, received its third reading.

Council adjourned

For Sale—First-class piano, less than half price. For particulars apply to Wm. Fleming.

Wanted—To borrow \$400 on good security, for one or two years. Apply at this office.

MINING ACTIVITY

J. C. Haas, M. E., Visits Golconda Group.

TUNNEL FINISHED AUGUST 1

Mine Will Probably Start Shipping Next Winter.

J. C. Haas, M. E., of Spokane, arrived in the city Wednesday on his regular fortnightly visit to the Golconda group of mines which are being extensively developed under his direction.

The group is situated in south Deadwood camp, about a mile and a half west of the Republic group and about two and a half miles from the C. & W. Ry. There are six claims in the group viz., Golconda, Cleveland, Laocoon, Wild Rose, Gold Bed and York. The operating company is registered at Sherbrook, Que., and Hon. Geo. E. Foster is heavily interested as is also Rufus Pope and several other prominent eastern politicians and business men.

The operating company, The Golconda Mines, Ltd., are very well fixed financially and are prosecuting the development with vigor. Originally a shaft was sunk on the Golconda on the vein, to a depth of 65 feet but there was so much water encountered that the company decided to run a tunnel to crosscut the ledge at a depth of 275 feet. This tunnel is now in a distance of 350 feet and it is expected that the ledge will be struck 150 feet further on. The tunnel will be completed, according to the present rate of progress about 1st of August next and from there on the work done will be in the nature of opening up the ore body for shipping. Drifts will be run each way along the ore body and a raise will connect with the present shaft so as to ensure thorough ventilation.

The vein runs from two to eight feet in width and carries values in gold only of from \$8 to \$40 per ton. It is expected that the ore to be shipped will average about \$12.00.

The ore is arsenical and iron pyrites and will be shipped to one of the local smelters. The company anticipates possibly installing a cyaniding plant in the future but plans for such have, as yet, not been completed and scarcely seriously considered.

Mr. Haas was asked about the proposed visit here of the American Institute of Mining Engineers and said he would do all he could as a member of that institution to induce as many members as possible to visit Greenwood and the mines tributary. He said he had received a programme of the B. C. visit and June 29th was marked Granby, meaning, of course, that a visit to Grand Forks and Phoenix had been arranged for. It should not be a difficult matter, Mr. Haas said, to get a large number of visitors to extend their journey to Greenwood. In another column the matter has received attention and it is earnestly hoped that some steps will be taken to ensure an official visit from some members of the Institute.

Mr. McAlister, smelter manager of the B. C. Copper Co is posted, according to Mr. Haas, for membership, and Mr. Keffer told the writer last week that he had personally invited several of his friends, members of the Institute, to visit the company's smelter and mines and he believed there should be no difficulty in getting a fairly large delegation to attend.

Fred Whitwell is opening up a large quartz lead on the Maori group situated on Providence creek, about two miles above the Providence mine. The claims are splendidly situated, the Great Northern branch to Phoenix running through the properties. The lead is from 6 to 8 feet wide and assays have given good gold values.

A match between a team of Knights of Pythias and one from the I. O. O. F. lodge will try their skill at Swain's bowling alley the coming week.

A SUGGESTION.

On June 27th next the American Institute of Mining Engineers will pay Nelson a visit. We do not know whether any steps have, as yet, been taken by the local members of the Institute, if any exist, to have the visiting members visit Greenwood or not. If not we venture to suggest that they be taken at once in order to secure this most desirable end. The Institute meets at Vancouver in June and after the convention the members to visit the Yukon and various B. C. mining points. Perhaps the Board of Trade will undertake the necessary arrangements. Such a visit, if it can be possibly secured, would prove of inestimable benefit to the mining country tributary to our own city.

About Rheumatism.

There are few diseases that inflict more torture than rheumatism and there is probably no disease for which such a varied and useless lot of remedies have been suggested. To say that it can be cured is, therefore, a bold statement to make, but Chamberlain's Pain Balm, which enjoys an extensive sale, has met with great success in the treatment of this disease. One application of Pain Balm will relieve the pain, and hundreds of sufferers have testified to permanent cures by its use. Why suffer when Pain Balm affords such quick relief and costs but a trifle? For sale by all druggists.

Interesting Letter From
Ottawa.

THE TRUTH ABOUT MGR. SBRETTI

Explains Why Manitoba Wanted
More Territory.

OTTAWA, April 13, 1905.—A new issue has been raised by the Conservative party. It is a desperate party these days. Desperate measures are resorted to and the services of desperate men are utilized in the effort to compromise the Laurier government and secure some political advantage for the thrice defeated Tory party. From Halifax, N.S., to Victoria, B.C., the newspapers of the country have been filled with lurid pictures of the alleged interference of the papal ablegate in the politics of this country. An effort was made by the Tory press and the Tory politicians to connect Sir Wilfrid Laurier and his government with the negotiations between the papal ablegate and the members of the Manitoba government.

It is risky to do things after the fashion of George Eulas Foster but the risk is sometimes worth taking. Geo. Eulas Foster has a penchant for analysis. Let us analyze this brand new conspiracy.

In Manitoba they have a Conservative government. R. P. Roblin is premier. Robert Rodgers is Minister of Public Works and Colin Campbell Attorney-General. The Roblin government has been connected with some railway deals which will not bear a too rigid inspection. The more railway deals a Tory government gets mixed up in, the greater becomes the thirst for that sort of thing. The Roblin government has been negotiating another railway deal which has for its object the construction of a railway from Winnipeg to James Bay. Mr. Roblin was anxious to give a land grant to the promoters of the road and for this reason it was desirable that the boundaries of Manitoba should be extended to James Bay.

Sometimes the common people do not take kindly to railway deals and Mr. Roblin took the additional precaution of trying to secure some additional favorable public opinion. He went to see His Grace, the Archbishop Langevin of St. Boniface. He suggested to His Grace that the Roblin government would be pleased to have the support of the Roman Catholic church in Manitoba and was prepared to make concessions favorable to the Catholic minority in Manitoba. His Grace had some experience in the past with Conservative politicians and he took the precaution to secure a letter from Mr. Roblin setting forth what he was prepared to do for the Catholic minority.

Mr. Campbell, attorney-general, Mr. Rogers, minister of public works, came to Ottawa to interview the government in reference to the extension of the Manitoba boundaries. Archbishop Langevin knew they were coming. He advised the papal ablegate, Mgr. Sbrretti that they were coming. He considered this his duty in the interests of the Catholic minority of Manitoba. He told the papal ablegate of the conferences between Roblin and himself and forwarded him a copy of the amendments Mr. Roblin was prepared to give. His Grace did more than this. He told the ablegate something of the men from Manitoba. He advised that Campbell was a big enough risk but under no circumstances should he have anything to do with Bob Rodgers. So the papal ablegate invited Campbell but did not invite Rogers. He discussed with Mr. Campbell the condition of the Catholics of Manitoba, so far as education is concerned and suggested to him that Manitoba could not expect the Catholics immediately outside of the boundaries of that province to be anxious to join the province while the school laws remained as at present. What followed is now well known to the public.

But there is another phase of the situation which is well worth describing. Mr. Rodgers has ambitions. They are not very creditable ambitions under the circumstances, but he still has them. He wants to be premier of Manitoba. To be premier of Manitoba Mr. Roblin must be displaced. Mr. Rodgers conceived a unique plan of action. Ascertaining from Mr. Campbell what transpired at the conference with the ablegate and knowing that Mr. Roblin was committed to Archbishop Langevin he decided to ride the Protestant horse in Manitoba. He started on this mad career by publishing interviews in which he mendaciously endeavored to compromise Rt. Hon. Sir Wilfrid Laurier. What was his object? He hoped that the truth would come out. He hoped that the tale just told would be worked back from Mgr. Sbrretti to Archbishop

Langevin and from Archbishop Langevin to R. P. Roblin. The cry then would be Roblin must go and the going of Roblin would mean the coming of Rogers.

This new conspiracy recalls a similar conspiracy in the Tory party and it is peculiarly fitting that George Eulas Foster who was chief of the nest of traitors in 1896 should be chieftan for Mr. Rogers in 1905. It is not surprising that W. F. MacLean, who is always out with his knife and is never particular whether he sticks it into a Grit or Tory, should be found boosting the Rodgers' game in the House of Commons.

Mr. Foster in his cold blooded way told parliament the other day that so long as grass grew and water ran he will not be found fighting for principle against the workers of the people. It might be added that so long as grass grows and water runs Mr. Foster will always be found continually connected with all conspiracies within his own party. YALE-CARIBOO.

In a recent issue of the Winnipeg Free Press a very appreciative article appears concerning Dr. James Douglas a copper mining magnate and a native of Quebec.

Thirty years ago Dr. Douglas, then a young man, left Canada to seek his fortune in the United States. He is now president of the Copper Queen company in Arizona and of the El Paso and Southwestern railway, some 400 miles long which links the various holdings of the big mining concern and unites them with the Southern and Union Pacific lines.

The output of the mines is now 100,000,000 pounds of copper annually. When Dr. Douglas took charge of the original Copper Queen, its output was ten pounds for every ton now produced in the properties over which he now holds sway. The owners were offered lands adjoining their original veins; they asked Dr. Douglas to examine them and report. He found nothing of particular value on the surface, but the veins of the Copper Queen were so large and rich that he was sure that they must extend to the adjacent property. As this was offered for only \$40,000, he recommended a purchase. His employers bought and they never made a better bargain.

And yet there was a time, in 1884, when disaster and loss seemed close at hand. Both old and new veins seemed all but worked out, and no new leads could be discovered. With courage characteristic of the man, Dr. Douglas kept on prospecting, when, one day, just as even he was well nigh ready to abandon hope, he came upon a wonderfully rich deposit. This for some months yielded no less than twenty-three per cent. of pure metal, quite fifteen times as much as does ordinary ore. Of course, to such a bonanza there were limits; and, while the ore, as in all other mines, grew leaner, it became harder to treat. As lower and lower depths were reached their ore was found to carry much combined sulphur. Could this ore be dealt with so as to compete with ore less troublesome? Yes. Simply by burning the sulphur out of the ore with a stream of heated ore, on much the plan by which Bessemer burned out carbon from pig iron until in his converter only steel remained behind. This process reduces to minutes what formerly required hours, replaces hand labor by machinery and is now conducted with allied tasks at the town of Douglas, Arizona, where every detail of the plant marks the highest plane of efficiency and skill. Where this town now stands, with its population of seven thousand souls, there was four years ago nothing else but a tent, used as a saloon!

In 1885 the nearest railroad station to Bisbee, the site of the original Copper Queen, was Fairbank, and teaming for the intervening 37 miles cost \$7 a ton. Today the El Paso and Southwestern railroad, owned by the capitalists who control the Copper Queen, charges but 22 cents for freighting a ton of ore these 37 miles. So much for the economy of the iron horse as against the steed of flesh and blood. A bold piece of engineering is displayed in the line leading to the Detroit mine one of the properties under Dr. Douglas' care. In a distance which, as the crow flies, is little more than a mile, this road rises 500 feet by four loops stretched out as a huge spiral. To this mine perched on a range of hills absolutely arid, water has to be pumped from the San Francisco river, to a height of 1,500 feet. Both here and at the mines in Mexico, Dr. Douglas has installed Crossley gas engines of high economy; they yield a horse power for an hour with either a pound and a quarter of coal, or two pounds and three-quarters of air-dried oak.

Dr. Douglas is on the board of Queen's college, Kingston, Ont., his alma mater; he has rendered generous aid toward Morris college in Quebec, where a few days ago he delivered a stirring address. Four years ago McGill university, Montreal, conferred upon him the degree of doctor of laws. He has remained a British subject through all the years of his residence in the United States, and regards with keen interest the proposals of Mr. Chamberlain for a closer knitting together of the various parts of the empire. Personally Dr. Douglas is

Rheumatic Pains Quickly Relieved.

The excruciating pains characteristic of rheumatism and sciatica are quickly relieved by applying Chamberlain's Pain Balm. The great pain relieving liniment has been the surprise and delight of thousands of sufferers. The quick relief from pain which it affords is alone worth many times its cost. For sale by All Druggists.

No Time Equal to the Present

Never in the history of the Boundary has the district had a brighter outlook than today. With the successful development of the immense large bodies of low grade ore and the enlarged and much improved facilities for treating at a very small cost, the continued opening up of new high grade properties and their successful and profitable operation has made the Boundary famous as a mining centre, and every day adds more to the list of new finds and bigger values. It is readily admitted that Greenwood is the Eldorado of the Boundary with all roads leading thereto, and surrounded as it is, with such magnificent resources is destined in a few years to be a second Butte. If you therefore want to participate in its future prosperity, now is the time to invest both in mines and real estate. For **NINETY DAYS** we intend giving you a chance to make a safe and profitable investment. Every lot we own will be put on sale at rock bottom prices during the above period. Prices ranging from \$50.00 up, at terms to suit the purchaser. Make your selection and make it early.

Synopsis of Regulations Governing the Disposal of Dominion Lands within the Railway Belt in the Province of British Columbia.

A LICENSE to cut timber can be acquired only at public competition. A rental of \$5 per square mile is charged for all timber berths excepting those situated West of Yale for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:—
Sawn lumber, 50 cents per thousand feet B.M.
Railway ties, eight and nine feet long, 1 1/2 and 1 3/4 cents each.
Shingle bolts, 25 cents a cord.
All other products, 5 per cent on sales.

A license is issued so soon as a berth is granted but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.

The dues payable under a permit are \$1.50 per thousand feet B. M., for square timber and sawlogs of any wood except oak; from 1/2 to 1 1/2 cents per lineal foot for building logs; from 12 1/2 to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for rail-

way ties; and 50 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of twenty-one years at a rental of two cents per acre per annum.

Coal lands may be purchased at \$10 per acre for soft coal and \$20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for agricultural purposes may be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the District, within which the land is situated, receive authority for some one to make entry for him.

A fee of \$10 is charged for a homestead entry.

A settler who has received an entry for a homestead, is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property

with buildings for their accommodation, will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) of any person who is eligible to make a homestead entry under the provisions of the Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the Act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY,
Deputy of the Minister of the Interior,
Ottawa, February 4th, 1905.

A Safe Cough Remedy for Children.

In buying a cough medicine for children never be afraid to buy Chamberlain's Cough Remedy. There is no danger from it and relief is always sure to follow. It is especially valuable for colds, croup and whooping cough. For sale by all druggists.

NOTICE OF FORFEITURE.

To John Nelson, J. A. Manson and H. Magnuson or to any person or persons to whom they may have transferred their interest in the Morning Glory and Rainstorm Mineral Claims situate on Cedar Creek, main Kettle River, in the Greenwood Mining Division of Yale District.

You are hereby notified that we have expended the sum of \$400 for work on the above mentioned claims and \$10 for recording the same for assessment work for two years, such being required and necessary to hold said claims for the years ending the 6th of June, 1903 and 1904, under the provisions of the Mineral Act and Amending Acts and if at the expiration of ninety days from the date of first publication of this notice in the Boundary Creek Times, you fail or refuse to contribute your portion of such expenditure together with all costs of advertising, your interest in said mineral claims shall become invested in us, your co-owners, upon filing in the proper office in that behalf the above as required by section 4 of the "Mineral Act Amending Act, 1901".

Dated 3rd March, 1905.

LOCAL MEMBER REVIEWS SESSION

Interesting Interview with J. R. Brown, M. P. P.

MEMBER EXPLAINS HIS POSITION

Gives Good Reasons for Voting Against Smelter Act.

A reporter of the Boundary Creek Times called on J. R. Brown, M.P.P., to hear what he had to say in respect to the session of the B. C. legislature which has just closed.

Mr. Brown said while some important bills were passed yet as stated in the leading article in the Victoria Colonist on the 8th day of April last, the day when the house adjourned, the session was a disappointing one, owing to the failure of the government to bring down any railway legislation.

It was stated in the speech from the throne that important railway legislation was under consideration. As the session advanced and no measures were brought down by the government to provide better transportation facilities for any part of the province the inability of the McBride administration to deal with such a serious problem became more and more apparent. The leader of the opposition in a vigorous speech on the budget debate endeavored to spur up the government to do its duty to the province. He assured the government of the active co-operation of the opposition in putting through any fair and reasonable measure which would insure increased railway communication. On subsequent occasions Mr. Macdonald assailed the government for its evident intention to prorogue the house without placing before it any measures that would tend to railway construction. Mr. Brown pointed out the crying necessity of a railway from Midway to the coast and how argently it was demanded by the people in the Boundary and Similkameen district as did also Mr. Shatford, member for Similkameen. Nothing, however, was done by the government whether from fear of the Socialists or from other causes, he was unable to say.

One of the most important bills brought before the house was the act providing for an 8-hour day in smelters introduced by Mr. Hawthornwaite. It was defeated by a vote of 26 to 12. While recognizing that 12 hours work even if not continuous is excessive he voted against it as did other Liberals for the following reasons:

(1) The time was inopportune as there had not been any demand by employees upon their employers to grant a reduction of hours and consequently it would be well to allow them an opportunity to endeavor to arrive at an agreement respecting same before resorting to legislation.

(2) That such a measure, if passed, might precipitate an industrial crisis and thus defeat the very object it had in view, namely, bettering the condition of the workmen.

(3) That as the proposed act was not to come into force until the 1st of March, 1896, if the employees and employers failed to arrive at a settlement as to a reduction of working hours before next session of the house an act could then be passed which would come into effect as soon, or nearly as soon, as the proposed act.

Another important act was the School Act. This was very vigorously opposed by the opposition and although it was greatly modified and some of its objectionable features removed in passing through the house it is still, Mr. Brown thinks, a piece of unwise and pernicious legislation. It was passed for the purpose of relieving the provincial treasury of \$80,000 or \$90,000 a year and probably it will have this effect. But it will also discriminate against the poorer school districts. It will reduce the salaries of teachers, particularly in rural schools and consequently lower the standard of qualification. It imposes onerous conditions on trustees such as providing the provincial assessors with the names of all persons who own any property either real or personal in their districts. The government made the mistake of attempting to imitate the school system in some of the settled provinces of the east where the conditions are altogether different.

The amendment to the Assessment Act passed last session is another act of importance. It was passed mainly for the purpose of correcting the mistakes and anomalies in the act of last year and most of its provisions are in the right direction.

The attorney-general seems determined to leave his mark on B. C. legislation and introduce a large number of acts into the house. Among these were the County Court Act, Bills of Sale Act, Fraudulent Preferences Act

and Land Registry Act.

Quite a number of acts were slaughtered by the sudden closing of the legislature. Among these was an act introduced by the leader of opposition to provide for the settlement of disputes with regard to coal and oil licenses. This act was amended in committee at the last sitting of the house and consequently could not go through the final stages the same day if any member objected. Mr. Hawthornwaite objected although he had not previously opposed the bill and although requested by the attorney-general to withdraw his objection refused to do so consequently the bill was killed which is much to be regretted.

In the matter of appropriations Greenwood riding gets \$3000 which is \$500 more than last year. This amount is not sufficient and even in proportion to what other constituencies get is about \$1000 less than it should receive.

The session closed with the government in power but it is weakened and discredited on account of its failure to initiate any policy for the development of the province. Many Conservatives at the coast regard it with disfavor on account of its truckling subservience to the Socialist wing of its followers which makes it a Conservative government in name only and in reality a hybrid combination for the purpose of retaining power.

ATHLESTAN PAID FOR

Montreal & Boston Co. Pay Three Months Before Due.

On Friday last, shortly after going to press with the last issue of the Times, a telegraphic transfer of \$20,000 was placed to the credit of the Athlestan Mining Co., Limited, and Messrs. C. D. Hunter and G. H. Collins, Phoenix; W. T. Hunter, of this city, J. Hunter, Rossland, and C. S. Stawson, Spokane, as their interests appeared. The payment was made by the Montreal & Boston Consolidated on account of the purchase of the Athlestan and Jack Pot fraction and was the final payment.

The Athlestan is a comparatively high grade property situate to the south-east of the Winnipeg mine, under bond by the Granby Consolidated, about three miles east of Phoenix. Portions of the following claims intervene between the Winnipeg and the Athlestan: Calumet, Hecla, Blue Nose fraction, Butte and Glenora.

The Athlestan was operated by the vendors for about two years previous to the sale last summer. Altogether about 12,000 tons of ore was shipped netting excellent returns. The C.P.R. spur to the Winnipeg is the nearest railway point, though the G. N. Phoenix spur is not far away. At present the property is not being operated.

The payment made was not due until July 10th next and indicates the intention of the Montreal & Boston Consolidated to pay outright, and at once for all the purchases made last summer.

The payment was celebrated here by a quiet dinner party at the Imperial hotel on Friday evening last.

TIP TOP SOLD FOR \$15,000

Part Cash Balance in Three Months. Owned by Local Parties.

The Tip Top, one of the claims in Skylark camp and adjoining the Mavis to the south, was sold last night to W. S. Macey of Phoenix for the sum of \$15,000, part cash, balance within three months. The deal was put through by Gaunce & Wickwire, mining brokers of this city. The late owners were J. C. Haas, M. E. of Spokane, who has been in town for several days, Randolph Stuart and H. R. Elliott.

The Tip Top contains the Mavis leads, which are being extensively developed by a syndicate of young men, employees of the Granby Consolidated who have taken a bond on the property and have uncovered two very promising veins running right across the claim about seventy-five feet apart. The only assays taken give values in gold only of \$30 per ton.

The sale of the Tip Top is very significant of the favor the high grade claims are finding with Phoenix people. Ever since the Skylark proved such a bonanza, claims have been obtained as fast as offered, and the prospects are that the coming summer will see an immense amount of development work done and a large tonnage of high grade ore shipped for treatment at the various smelters.

Chamberlain's Colic, Cholera and Diarrhoea Remedy.

The great success of this preparation in the relief and cure of bowel complaints has brought it into almost universal use. It never fails, and when reduced with water and sweetened is pleasant to take. It is equally valuable for children and adults. For sale by all druggists.

Chamberlain's Cough Remedy the Best and Most Popular.

"Mothers buy it for croupy children, railroad men buy it for severe coughs and elderly people buy it for la grippe," say Moore Bros., Eldon, Iowa. "We sell more of Chamberlain's Cough Remedy than any other kind. It seems to have taken the lead over several other good brands." There is no question but this medicine is the best that can be procured for coughs and colds, whether it be a child or an adult that is afflicted. It always cures and cures quickly. Sold by All Druggists.

Horse for Sale for Keep.

Left in charge of the undersigned by Alfred Swinlorne, November 1st, 1903, one pinto horse, not branded. Will be sold to pay charges for keep after thirty days from date. Charges \$2.00 per month. Rock Creek, B. C., April 1, 1905. EDWIN HATTON.

TOWN TOPICS
Wanted—Furniture and cook stoves H. J. Clint, Copper street.
Mrs. A. W. Strickland of New Denver, is visiting her sister Mrs. E. G. Warren this week.
Special Easter sermons and special Easter music in the Methodist church next Sunday.
In the police court last Monday morning, Judge Hallett levied an assessment of \$20 upon Fred Hazelwood for scratching and otherwise disfiguring the face of a Chinese laundryman.
The waterworks bylaw passed on Thursday afternoon by 42 votes for and none against. This is the first bylaw that has passed unanimously since the incorporation of the city of Greenwood.

every 30 they owned in the old company. In order to ship ore the new owners will have to build a spur of railway.
George Spendler was in town on Saturday last and told the Times representative about a group of claims he and Gilbert Gunderson, mine host of the Victoria, were interested in. The group is in Pass creek camp, some three miles from Eholt, and one and a half miles from Long Lake. The group consists of four claims, Minnie, Golden Horn, No. 5 fraction and Wonderful. Most of the work so far done has been on the Minnie, where there is a shaft 65 feet deep and 89 feet of tunnelling. The ore body is very wide, over 84 feet, and runs \$8 on the surface and as high as \$18. Two feet of the ore on the foot wall is very high grade and altogether there is a splendid showing. There is enough work done to crown grant the claims, but the partners do not seem to be very sure of their plans for the coming summer. They will do some work, but how much they do not yet know.

thirteen hours less by way of Spokane and Seattle than via Robson and Revelstoke. When the new service is put on between East Kootenay and Spokane through Jennings, the time from Fernie to Victoria will be twenty-four hours less than by way of Nelson and C.P.R. To take another illustration by the new route it will be possible to leave Fernie, go to Spokane and return by G.N.R. in 24 hours; it takes at least 72 hours by way of Nelson. No doubt the Corbin road will improve this, but the C.P.R. do not lead—they follow. It is the same tale in the Similkameen—opportunities let slip, a country wearied with waiting, and an alien company building in first. What is the matter? This is the question that everyone is asking—and Jim Hill is answering it in a practical manner.—Nelson Tribune.

Two shifts of men are working on the Highland Queen engaged in running a tunnel to tap the ledge at a depth of about 75 feet. The ore will be struck in ten days time and from then on active development will be started.
F. W. McLaine reports real estate sales active; during the week past he sold Dr. Schon's residence and several lots in Midway. Buyers are much in evidence for Midway property, the reports of possible smelter construction is evidently having its influence.
Next Monday evening the Methodists of Greenwood will give a beef steak pie supper and concert in the church. Admission 50 cents. Already a large number of tickets have been sold and it is fully expected that in every way the supper and concert this year will surpass those of former years.

Since the item appearing in last week's issue was written concerning the Republic group, a very fine vein of ore has been uncovered and sampled by W. T. Smith on the Hidden Treasure, the claim nearest the C. & W. R. The lead is clearly defined, with walls of schist and diorite and is apparently continuous through the None Such and Last Chance. Judging from the trend of the formation the new vein is about fifty feet to the north of the vein at present being opened up on the None Such, and it is Mr. Smith's intention to crosscut from the None Such tunnel to the north in order to prospect the new discovery. As soon as possible a shaft will be sunk on the Hidden Treasure, and when a depth of fifty feet has been attained a tunnel will be run to the east to open out on the hill not far above the railway track. The ore so far exposed gives good values in gold, copper and silver and the body is at least six feet wide.

NOTICE.
I have had stray animal on my place since middle of October last, viz. a red heifer coming three year old, no visible brand or mark of any description. If not claimed within three week from date of this insertion will be sold to pay expenses.
Dated this 3rd day of March, 1905.
THOS. WISTED, Rock Creek

The rate of taxation for general fund purposes has been reduced this year 8 mills on a much lower assessment. Few cities in B.C. can say that the taxes are being lowered, and it is a matter for congratulation to think that we have a council here who are handling the finances of the city so economically.
T. F. Sutherland, B. Sc., the assayer has published a most complete circular containing amongst other items, the price of metals (April 1905), lists of non-metalliferous and metalliferous minerals, country rocks their characteristics and minerals and their identification. Mr. Sutherland intimates that he will willingly send a copy to anyone wishing for same.

Geo. R. Naden, mayor of Greenwood, and F. Keffer, the general manager of the B. C. Copper Co.'s affairs in that district, were Chesaw visitors Monday and Tuesday. These gentlemen were here for the purpose of looking over the Grant and on Tuesday took a trip up on Copper Mountain and put that fine property through a most thorough examination. It stood the test fine and has many more compliments from experienced mining men added to its already long and glowing record. Mr. Naden is a man of wide mining experience and Mr. Keffer, being for years at the head of the famous Mother Lode mine and the B. C. Copper company's smelter at Greenwood, places them in a position to know a good property when they see it, and the high compliments which they paid the Grant on their return were indeed encouraging. The Grant ore is considered by the B. C. company a fine fluxing product to be used at the smelter with the ore from their mines in the Boundary district. The gentlemen speak in the highest terms of our camp. On their return trip they took about 50 pounds of Grant ore for a test. At present the outcome of their visit here can not be foretold but we look for good results. Should this company—or any other company—take the Grant and work it the effect on this camp would be marvellous.—Myers' Creek News.

The Very Best Remedy for Bowel Troubles—No Family Can Afford To Be Without It.
"I regard Chamberlain's Cholera, Cholera and Diarrhoea Remedy as one of the very best remedies for bowel troubles," says Mr. J. W. Hanlon, editor of the Despatch, Ocilla, Georgia. "I make this statement after having used the medicine in my family for several years. I am never without it." No family can afford to be without a bottle of this remedy in the house. It is certain to be needed sooner or later. For sale by All Druggists.

We should like to suggest to the chairman of the Streets' committee that it would be a great convenience to attendants of the Methodist church if the side walk up from Copper street were cleared of about 500 packing cases. They are not only very annoying to pedestrians but are a very poor advertisement for strangers. In Victoria if any such infraction of streets bylaw happened the delinquent would be fined if he left the cases on the street over night.
We have received a very beautiful 48 page folder, published by the Great Northern Railway Co., entitled "A camera journey to the Lewis & Clark Centennial Exposition," bound in a handsomely engraved cover and exquisitely printed and illustrated. Each page is printed on a buff tint and the whole work reflects the greatest credit on the publishers and the printers, The Pioneer Press, St. Paul. The size of the booklet is very convenient, 5 inches by 7, and copies can be obtained by application to any of the railway company's principal offices.
Advices received here on Wednesday stated that the Montreal & Boston Consolidated have purchased the Morrison mine, situate about one mile from the Mother Lode to the south and east. It is understood that the shareholders of the Morrison Mines, Ltd., get one share of Montreal & Boston stock for
