SISTERS' HOSPITAL

An Institution Doing a Noble Work.

IT IS WELL FURNISHED

Conducted Under Careful Direction And Provided With Excellent Facilities.

Among the institutions of Greenwood of which the people may be proud and which speaks loud in testimony of the progress of the city, is the Sisters' hospital. It is an institution that has passed through some of the dark years of commercial depression, and like others, that have persistently struggled on, it has weathered the storm, and come out stronger, better equipped and ready to enjoy all the advantages of a new prosperity, for hospitals like everything else are largely influenced by commercial conditions.

THE BEGINNING.

The present hospital began its career of charity and blessing in the summer 1901, when the Sisters of St. Joseph purchased a building formerly occupied as a public school. For some years previous to this a private hospital had been conducted by Drs. Oppenheimer and Jakes in a building on the hill above the city hall. When the Sisters proposed to open theirs an arrangement was made by which the former was closed and the building was divided and turned into dwelling houses. After securing possession of their building the sisters built in addition and rearranged the interior. At that time the financial condition of the order was not particularly strong and had it not been for the encouragement and wise discretion of Rev. Father Bedard, O. M. I., it is doubtful if the project would have been carried into successful effect. Lack of ready means and a strong disinclination to assume large obligations necessitated putting up with the barest necessities. Partitions dividing the wards were constructed of rough lumber without plaster or paper, the furniture was plain and simple, the floors bare and the general furnishings only such as necessity demanded. As time went on and the patronage increased, improvements were gradually undertaken until two years ago the building was thoroughly remodeled and placed in a comparatively up-to-date condition.

PRESENT CONDITIONS.

The present capacity provides for about twenty-five patients. The large public ward contains nine beds and the small public ward four. There are five private wards, all nicely furnished with comfortable bedroom suit, carpets and pictures. The floors of the corridors are covered with linoleum and everything is kept in a perfect condition of order and cleanliness.

Three verandahs provide plenty of outside sitting room, where convalescents may enjoy the sunlight and fresh air. One of the verandahs is enclosed with glass almost like a conservatory, and can be used on chilly days or in stormy weather. Altogether the appointments and home-like appearance of the hospital gives an impression of comfort for the sick and afflicted. The building is equipped with up-to-date sanitary improvements and every precaution is taken to protect patients from any unfavorable conditions and the past record has been most favorable for the treatment of dangerous cases. At the present time there are four patients under treatment--a smaller number than usual. During the autumn and winter months the number is usually much larger. The hospital building is divided into wards, operating room, toilet rooms, private rooms for the Sisters, kitchen and chapel, where divine service is held. There are at present four sisters in charge of the Mother Superior, all trained nurses.

FINANCIAL SUPPORT.

When the hospital was started the city of Greenwood denated $3,000, which was of great assistance. At the present time the employes of the mines and smelters contribute regularly one dollar per month towards its maintenance. This entitles them to free hospital and medical attendance. The provincial government also lends its assistance, allowing one dollar per day for every patient treated up to the limit of $1,000. Besides this of course there is the income from patients that pay the required fees. The finances at the present time are in a satisfactory condition.

While the hospital is not equal in all respects to the model ones of large cities, it nevertheless serves the purpose for which it was started, namely, to provide medical treatment and care for those without a home and for all who desire to make use of the advantages it offers and in this it is fulfilling its mission to the credit of those in charge and of the city in which it is situated.

SUB-STATION WORK.

The West Kootenay Power and Light Co., which is building a sub-station in Anaconda for the distribution of electric power, started work Monday morning. The house on the Smith property has been removed and excavating for the foundation is now under way. Grading is in progress for a spur track, which will be used by the C. P. R. in delivering building supplies and machinery. Machinery and equipment including transformers to the value of $20,000 has arrived in the city ready for installation. The transformers will step down the electric current from 60,000 to 2,000 volts. The building will be 52x56 feet and of most substantial construction.

Trueman, the photographer, is in town and is located near Holmes & Kennedy, Copper street. He will be here till April 23rd. Sit now and get the best in photographs. 32

EASTER DAWN.

Across the East where night's last stars are paling
As morning brightens and shadows softly flee,
The sun mounts high, his golden vestures trailing
Through azure air, o'er earth and sky and sea.
And incense rare from chalices of silver,
Is wafted high by lillies' every breath,
While teaming life in sheath'd bud and blossom
Flings forth in joy, sweet challenger of death.
Oh, wondrous morn! Oh choir of hymning Nature!
Blend Earth and Heaven in triumph's grand accord,
While human hearts, ten thousand times ten thousand,
Bend low in praise before the risen Lord.

—Catharine Gillman Grou, in Pearson's Magazine.

THE CITY COUNCIL

Discusses Power Plant and Waterworks.

MORE MONEY WANTED

Improvements Demand a Large Expenditure—Two Bylaws to Be Voted on by the People.

The city council held another important meeting last Monday night, when the bylaws for the extension of the waterworks system, to include a reservoir on Providence creek, and for an extension of the Greenwood Electric company's franchise so as to allow that company the right to use the city streets for twenty years as an encouragement for the company to build a power plant at Boundary Falls, were discussed. The waterworks bylaw was carefully considered from all points and there was a disposition shown by some of the aldermen to oppose the Providence creek extension and avoid an expenditure of some $9,000 and to confine the efforts of the waterworks department to perfecting the Lind creek system.

The advocates of the Providence creek scheme pointed out that but little more water could be secured from Lind creek and that even if every drop was saved it would be only a matter of time when some other source would have to be tapped. It was again pointed out by the mayor and others in favor of the proposed system that the city was in danger from a shortage of water this summer and that with a supply from both ends of the town an ideal system would be placed at the service of the public. After some further discussion a motion was passed to the effect that the Lind creek system be improved so as to avoid any waste from that source, and Alderman Mathison asked leave to introduce a bylaw to go on with the Providence creek extensions. This was granted and the bylaw passed its first and second readings.

It provides for raising $9,000 by the sale of debentures to be used in constructing a reservoir on Providence creek and for the extension of the water mains north to connect with the reservoir. After the bylaw has passed its third reading at the next council meeting it will be submitted to the people for their ratification.

THE POWER PLANT.

The proposition of the Greenwood Electric company to build a power plant at Boundary Falls, providing the city would give the company a twenty-year franchise to use the streets as at present, was again considered. E. G. Warren, manager for the company, and his solicitor, A. M. Whiteside, were present and discussed the question with the members of the council. The company, through its solicitor, had prepared a bylaw and Mr. Whiteside read it to the council. The context of the bill closely followed the lines of the company's letter read before the council and published in the Times last week. It was to the effect that the company offered to build within eight months from the passing of the bylaw a power plant at Boundary Falls for the purpose of supplying electric light at the following rates: "For incandescent lamps of 16 power, $1.50 per light per month for all-night lights; $1.25 per light per month for shops, business houses and offices, where light is used till 11 o'clock, p. m.; $1.00 per light per month for public dining rooms; 65 cents per light per month for private houses and bedrooms. For street arc lights of nominal 2,000 candle power, $10 per light per month; said street arc lights to be kept lighted from dusk to dawn, and all arc lamps required by the city to be supplied and owned by the company. Thirty-two candle power street lamps at $1.90 per month."

COUNCIL OBJECTS.

After the above rates had been read the council made some objection that

Continued on page three.

HIGH GRADE MINES

A Review of the Greenwood Properties.

PROSPECTS ARE BRIGHT

The Future Never Promised Better Things—New Work Starting—More Capital Needed.

Development is progressing rapidly at the Providence mine. Mr. Dermody is back again after a few days' holidays, and is now blocking out ore reserves. A visit to the Providence mine will illustrate what can be done with a comparatively small vein of high grade ore. It is safe in estimating that hundreds of thousands of dollars worth of ore are blocked out in the mine and and this is only done by continuous and deep development.

The Skylark mine, close to Greenwood, is another sample of continuous work, it being the leader in Skylark camp, and is paving the way for the many other high grade claims surrounding it, north, south, east and west. Something has been said of the improvements in equipment and mining, but it cannot be properly appreciated without seeing it with one's own eyes. The mine is so easy to get to—good wagon road, and when you get there Wm. Rowe, the affable superintendent will do the rest. The Skylark is now in its best and largest bodies of ore yet discovered in the mine.

The Crescent mine in Skylark camp, and due north of the Skylark mine, a fine mining property, but not developed much below the grass roots, is still idle. The shaft is down about 130 feet and drifts have been run due north and south at this level, exposing good ore. The Chicago end of the management will be here soon when it is to be hoped that work will begin again.

PRESTON SHIPPING.

The Preston mine, adjoining the Crescent and on a parallel vein, is making a good record. The management is now getting ready to ship the ore taken out in development. This ore will be shipped just as it comes out of the mine. No sorting.

Seven men are working on the Prince Henry in Skylark camp, and lying west of the Skylark and Crescent mines. Much improvement has taken place in the ore in the shaft in the last two weeks. Water has bothered a good deal, but now that the snow has altogether disappeared the water is lessening. Some very high grade ore is being taken out in sinking, which can be seen by taking a jaunt up the hill to the mine.

The E P U and Gold Finch mines, under the management of Wm. Madden, are only doing development work by tunnels to strike the two parallel veins of each mine at depth. It will take some time yet to accomplish this, but time is no object to the owners as they are after depth.

BARBARA STARTING WORK

The Barbara has been idle for a long time but now a company has been incorporated with plenty of capital in the treasury for all equipment and development, and work will be started in the near future. The Barbara is right in town. Good people living on the east side of the claim, it being part of the Greenwood townsite, but not near enough to the workings either to hurt the mine or to be hurt by the mine. The ore is different from most of the high grade ores of this camp, running high in lead, good in sliver and fair in gold, and carrying much concentrating ore in a strong quartz vein, a very easy one to mine and concentrate

The Elkhorn mine in Providence camp and just north of the city limits, is busy getting the shaft down to the 300 foot level. Six men are working night and day. The shaft is now in a granetic rock, having pierced the greenstone, or upper formation, where al the displacements of the veins occur, and no further difficulty is anticipated with faults. It is only a case now of crosscutting to get the vein, and then keep your eye on the Elkhorn, because she is, like all the other developed high grade mines of the camp, a sure thing against faulting.

The Gold Bug is still on the chase for gold. The tunnel is getting into the hill and is now in the vein producing formation, having penetrated the big grano-diorite dike, where nothing lives but hard work and water, but on either sides mineral can be looked for either on the contact or near t.

STRATHMORE AND HELEN.

The Strathmore is making a big shipment of high grade and seconds, and the mine looks good for the future, as it is the intention to develop further and block out ore. Much has been said about the Helen, but there is this still to be said—that if the shaft were sunk in the Helen to a depth of 500 feet or deeper, she will surprise some of the old wise ones. All indications as depth is attained point to deep ore bodies.

The Bay mine is the only altogether gold mine in the camp. Here we have ore in carload lots going $120 gold to the ton and a little silver. The quartz gangue of the vein is a white granular (sugar) quartz, lots of iron pyrites and a typical California and Eastern Oregon gold vein in a grano-diorite formation. Fourteen inches of clean ore is now shown in the shaft; with visibte gold through it. The Bay is in Skylark camp and close to the Skylark mine.

The Tip-Top, adjoining the Mavis on the south, shows up well in the shallow shaft. The ore here is more massive than the Bay or Mavis. Heavy iron and copper sulphides in the same character of quartz. A promising property.

CAPITAL NEEDED.

And when one walks or rides over all the ground lying between all the above mentioned mines that are certainly making records, he wonders why many more properties are not working. Why? We want money. We have shown our faith in working the mines we are developing and for a small town we are certainly risking our all. When you see men putting up half of their earnings every month for assessments on development, it goes to show not only faith but enterprise that is being daily rewarded. In what way? If not in dividends now, in opening up the mines and being rewarded by the great improvement in the ores in development. Let some of our readers, after reading the above, make a systematic round of inspection and see for themselves.

FINE FEATHERS.

The fiat has gone forth that deputy ministers at Ottawa must wear uniforms. Attendance at Rideau hall means gold lace, cocked hats and swords and if an official dares to come in an ordinary open-faced shirt, surrounded by decent black he is held to be either a waiter or social outcast of some other type. The deputies are therefore arrayed like Solomon in all his glory, thus affording in every twenty-four hours a nerve-wracking sartorial contrast. In the morning at their desks they appear in baggy-kneed tweed trousers and no coats at all, at nights they are in civil uniforms of the second degree.—Toronto News.

A BENEFIT CONCERT

Large Audience and Good Program.

RECEIPTS WERE $1,000

Comfortable Sum for Beneficiary—Phoenix Musicians a Success—Concert Appreciated.

It is doubtful if Greenwood ever witnessed a more successful concert than that held Thursday night in aid of W. A. Nicholson under the auspices of the Miner's Union. The people of the city and vicinity responded liberally to the appeal for help for the unfortunate miner and the Auditorium was filled to its utmost capacity. The program was also worthy of the occasion and those who freely rendered their talent are worthy of praise from all concerned. Those who took part were residents of Greenwood, Mother Lode and Phoenix and to those coming from the latter place is due much credit for the success of the entertainment. Messrs. Lewis and James created much merriment with their sketches and amusing allusions to local professional and business men. Their Irish songs and dances were greatly enjoyed especially by the gallery. The Phoenix quartette, including Charles Flood, Robert Thompson John Vivian and Harry James rendered several selections that won for them a leading place among the entertainers. They combined a vocal talent with a degree of stage presence that placed them in a class by themselves,

Among local solists Mrs. Dr. Oppenheimer rendered a selection in a graceful and pleasing manner and coming after the orchestra's overture, formed a suitable introduction to the vocal oart of the program.

The Misses Henwood with their sweet voices charmed the audience with "I've Got My Eyes on You" and they were the first to win a recall to which they responded with an equally popular number. The banjo solo of Mr. Hopkin's was also well received and he was obliged to render a second selection. Mrs. Sidney Oliver and Mrs. W. M. Frith rendered a duet which was much enjoyed and Mrs. Oliver later rendered "Sing Me to Sleep" which was perhaps her best selection.

The first and second parts of the program were opened by Jellum's orchestra, a newly organized addition to Greenwood's musical circles. This enterprise should be encouraged and with careful practice it should become the leading one in the Boundary. Others taking part were J. Frost and J. Henwood who rendered tenor solos; John Finley, Jr., cornet solo; Sidney Oliver, bass solo. Miss Osier, recitation, W. Ludwig, Irish specialty and Miss Belden, cello obligato. G. R. Naden occupied the chair.

Fred Hazelwood, president of the Miner's Union, on behalf of Mr. Nicholson and the union, thanked the large audience for their kindness and liberality. He stated that over $1,000 had been realized from the concert, all of which would be presented to Mr. Nicholson who would return to his home in the Maritime provinces to be cared for by his parents. After the close of the program the hall was cleared and a large number stayed to enjoy a dance to music provided by orchestra.

FOREMAN FAREWELLED

Mr. Carwile Presented With Address and Fine Jewelry.

J. M. Carwile, who for the past four months has been foreman at the Dominion smelter, left recently for Salt Lake city, where he will probably make his home in future. Before leaving, his many friends at Boundary Falls held a dance in Ryan's hall in his honor and in the course of the evening presented Mr. Carwile with a handsome gold chain and locket as a testimonial of the esteem in which he was held, accompanied by an address, which was read by Grey Pond. The address read:

THE ADDRESS.

MR. J. M. CARWILE:

DEAR FRIEND: We, the employees at the Boundary Falls smelter, at which you have been general foreman for the past four months, desire, on this the eve of your departure from amongst us, to convey to you our deep and hearty appreciation of the fairness, kindness and consideration which has marked all your relations with us your fellow employees.

Your many manly and social qualities and your knowledge of the business entrusted to you won our entire respect and confidence during the short time we have been privileged to work under you at the Boundary Falls smelter.

We regret exceedingly that there is to be a severance of the relations that to us have been so entirely satisfactory, but we trust your new field of labor may prove congenial to you; that you may have that degree of success commensurate with your talents, your industry and your goodness of heart, and in conclusion, we ask you to accept this chain and locket as a parting remembrance from the employees of the Boundary Falls smelter, whose kindest and best wishes go with you

Signed on behalf of the employees of the Boundary Falls smelter,

GREY POND.

WAS SURPRISED.

Mr. Carwile knew nothing of the event and was taken completely by surprise. In spite of his embarrassment he replied in well chosen terms, thanking his friends for their kindness and wishing them all, and especially his successor, many prosperous years. He testified to the loyalty, intelligence and good workmanship of the smelter employees, stating that in all his many experiences he had never had charge of a better class of men.

Mr. Thomas, the superintendent, and Percy Roosa, the accountant, also made brief speeches, expressing their regret at losing their faithful foreman.

Joseph Thompson has been appointed to succeed Mr. Carwile as foreman.

EASTER SERVICES.

Special Music Will Be Rendered—Dinner Monday Night.

The churches are preparing to hold special services for Easter in commemoration of the Resurrection. At the Methodist church Rev. H. S. Hastings will preach on "Immortality" in the morning at 11 o'clock. In the evening at 7:30 the subject will be "He Is Risen." The music will be appropri for Easter.

At St. Jude's church will be, Holy Communion at 8 a. m., evening song at 7:30 p. m. In the evening the choir, which has been holding special practices for the occasion, will render "God So Loved the World." Rev. J. Leech-Porter, will deliver discourses morning and evening on Easter themes.

At the Presbyterian church Easter will be observed, Rev. M. D. McKee preaching morning and evening from the subject "The Risen Lord." The music will be in keeping with the Easter season.

On Monday evening the annual Methodist beefsteak pie dinner and entertainment will be held in the church. An excellent menu is being prepared and dinner will be served from 5:30 to 8 o'clock. A good program has been prepared and among others who will contribute are Mrs. Frith, A. M. Whiteside, J. R. Brown, M. P. P., Mrs. H. S. Hastings, Rev. C. W. Whittaker, Miss M. Green. Miss Henwood, R. Henwood and the choir. Rev. Mr. Hastings will occupy the chair.

CITY COUNCIL.

(Concluded from Page 1.)

they were too high. The 65-cent rate for houses was especially obnoxious, and the business rate of $1.25 per month also met with opposition. Mr. Warren pointed out that these rates were the same as those provided for in the original franchise and that as circumstances permitted these had been lowered until at the present time only in isolated cases were they still charged. The council, however, showed a disposition to demand lower rates rates and after some consideration Mr. Warren agreed to lower the rate to $1.35 per month for 16-candle power incandescent all night lights; $1.10 per month for shops, business houses and offices, and 50 cents for houses and bedrooms. This met with favor and the bylaw passed its first and second readings and will be read a third time at the next meeting, after which it will be submitted to the people.

THE CHICKEN BYLAW.

Amid much amusement his worship the mayor introduced and read his chicken bylaw. It was a new departure for the city fathers to legislate in regard to the feathered flock. They felt quite competent to deal with power plants, waterworks systems, fire alarms and even dog taxes, but when chickens and like live stock demanded their attention they were evidently "not from the country" but thoroughly city bred, and it had been found necessary to apply to such rural communities as Grand Forks and and Nelson for information as to how to deal with the illusive bipeds.

The bylaw was read once—twice and the third and last call will come at some future meeting. It provides a penalty of 25 cents per head—dead or alive—for every chicken, or any of its relations, captured abroad and landed in the city pound, and ten cents per day—if still alive—for every day it remains in the custody of the city.

The members of the council present were Mayor Naden, Aldermen Bunting Mathison, McRae, Wood and Nelson, J. R. Brown, M. P. P., was present in the capacity of city solicitor, in the absence of J. P. Myers-Gray. The council adjourned at 11 p. m. to meet Saturday, April 14. at 11 a. m.

THE O I C STORE

Large Stock of New and Second Hand Goods.

There are few stores where a greater variety of wants may be supplied than at that of Messrs. A. L. White & Co. Any one entering their premises is immediately impressed with the large and varied stock carried at all times. The business at present is run in two departments, the new goods department and the second hand store. In the latter is found almost every article that any one may want in ordinary or even extraordinary pursuit of life, except groceries. To mention everything carried would require a special edition of The Times, but a few of the leading lines will suffice to show wide variety. There are stoves, general hardware, shot guns, kitchen utensils, garden tools, harness, footwear, clothing, pianos, furniture, crockery, Glassware, clocks, pictures, window shades, cuttlery, miners' tools, trinkets and almost everything else that is manufactered, except gunboats and locomotives. It is a stock worthy of inspection for its educative value and the prices tempt one to buy for very cheapness.

In the furniture department where the "clean sweep sale" starts Saturday, April 14th, there is variety combined with quality and uptodateness. It is from here that the home may be furnished complete. Parlor, dining room, bedroom and kitchen furniture of all descriptions. Some special attention is paid to dining room and bed room furnishings. Handsome dressers and stands, chiffoniers, bedsteads and bedding is being offered at attractive prices. In dining room suits there are fine specimens of sideboards, dining room tables and chairs. There are also wardrobes, bookcases, writing desks and bevel-plate mirrors. For the kitchen there are tables, chairs, cabinets, as well as other necessaries. The business man wishing to furnish his office will find a good selection of roller and flat top desks and office chairs. It is not alone in furniture that the stock is replete, but rugs, carpets and art squares are carried in pleasing selections.

NOTICE.

VIENNA BAKERY,
Per J. Dockstader, Mgr.

31-32

Synopsis of Regulations Governing the Disposal of Dominion Lands within the Railway Belt in the Province British Columbia.

A LICENSE to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths excepting those situated West of Yale for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:—

Sawnlumber, 50 cents per thousand feet B.M.

Railway ties, eight and nine feet long, 1½ and 1¼ cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent on sales

A license is issued as soon as a berth is granted but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up to 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B. M, for square timber and sawlogs of any wood except oak; from ½ to 1½ cents per lineal foot for building logs; from 12½ to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties; and 50 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of twenty-one years at a rental of two cents per acre per annum,

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for agricultural purposes may be made personally at the local land office for the district in which the land to be taken is situated or if the homesteader desires, he may on application to the Minister of the Interior at Ottawa, the Commissioner of Immigration at Winnipeg, or the local agent for the District, within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence on and cultivation of the land in each year during the term of three years.

It is the practice of the Department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 20 head of cattle, to be actually his own property with buildings for their accommodation will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) or any person who is eligible to make a homestead entry under the provisions Of the Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

W. W. CORY,
Deputy of the Minister of the Interior.

MINERAL ACT.

Certificate of Improvement.

NOTICE.

"Victor Fractional" Mineral Claim, situate in the Greenwood Mining Division of Yale District. Where located: In Copper Camp.

MORE DISCRIMINATION

It seems that it is not alone in freight rates that Greenwood is suffering in comparison with other towns on the C. P. R. and it is not on freight alone that towns served by both the C. P. R. and Great Northern enjoy advantages. The passenger rates from towns served by the two roads to other towns equally fortunate are the same while the rates from the same towns to others served by the C. P. R. only are much higher, proportionately, and in some cases are actually higher for shorter distances. For instance, the single fare from Rossland to Midway over either the C. C. R. or Great Northern is $4.50, while the fare from Rossland to Greenwood, where no competition exists is $4.90. In other words it costs forty cents more to go to Rossland from Greenwood than it does from Midway. This may be news to many Times readers and it may be well to bear in mind that when in Rossland money can be saved by buying a ticket to Midway and getting off at Greenwood.

The question that concerns the people of Greenwood is how can this be remedied. It is just possible that complaint to to the railway commission would have the desired effect but it is rather too small a matter to trouble that body with. It is a condition, however, that could be made use of in forming another motive for Greenwood wanting the Great Northern to build here

BOUNDARY ORE TONNAGE.

The following table gives the ore shipments of the Boundary mines for 1900, 1901, 1902, 1903, 1904, 1905 and 1906, as reported to the Boundary Creek Times:

PROSPEROUS CANADA.

The announcement from Ottawa that the revenue from customs during the current fiscal year ending the 30th of June will be $44,000,000 is a striking proof of the progress of the country. Ten years ago it was not quite half that amount. The attempt is sometimes made to mislead public opinion into believing that the increase in revenue from customs duties is equivalent to increased taxation. The fact is, however, that when the revenue from that source was in the neighborhood of $20,000,000 the rate of taxation was higher than it is now. The citizen who ourchases, say, $500 worth of dutiable goods pays less in taxation to the government in 1906 than he did in 1896. What has happened is that owing to the prosperity and progress of the country a greater quantity of dutiable goods is purchased. This, instead of a matter for bewailment, is a matter of legitimate pride and congratulation.

Another feature of our statistics which belongs to the same class is the the fact that our total trade for the current year is likely to amount to half a billion dollars. Ten years ago it was $239,000,000. From Washington it is announced that the total trade of the United States for the same period will be three billion dollars. United States commerce, then, is six times greater than that of Canada. But their population is thirteen times greater, so that our trade per head is more than twice as great as that of the United States. This is a very notable fact.

A feature of our finance which should not be lost sight of is that our national debt has only been increased by about two million dollars in the last ten years, while in the preceding decade it had grown by $35,000,000. In 1896 it would have required more than seven years' revenue to equal the national debt. In 1906 about three and a half years' revenue will equal it. The financial outlook of the Dominion is rosy, indeed, and there can be no doubt that much of its progress is due to the fact that it is a cheap country to live in. To maintain that position is the simple task to which statesmen must steadily address themselves.—Toronto Globe.

"REFORMED" SPELLING.

Considerable interest is being taken in the movement to "reform" the spelling of the English language. Andrew Carnegie has donated a fund for the furtherance of "good spelling" and others anxious to promote the "reform" are lending their influence. There is naturally much opposition from the most cultured sections of the literary world and an exchange of dignified bearing publishes the following criticism:

"Mr. Andrew Carnegy has moved in the way ov speling reform, so as to simplify the English langwij, make it easier to read and rite and spel, and lead to the use ov it all the world over. Mr. Carnegy wisht to know what British riters thot ov his skeme, but thay ar not frendly. Some ov them did not blush to skof at it, and call it bad names. Some were modest and confest the old speling was good enuf for them if not too good. Others graspt at the thot of the new speling, and promist to put it in all their buks for $15,000 a year. Altho we are not ourselves experts in the new speling we are willing to welkum it, and are printing this paragraf, drest in the new stile, in our editorial columns for in reasons: to sho our readers how it looks, and to see how we can qualify for the ofis of secretary to the "Simplified Speling Bord," which has just been appointed. The movement is not intirely new, having bin in use for some time by speling reformers like the N. Y. Independent and the Toronto World, papers in the lead in most things. We may say that we are in favor of simplified speling if we can get it. And we see that the Globe is coming out on its side too. It will save us much labor in riting, and be saving on the dikshinary as wel. We havalredy broken the baks ov two ov them lerning to spel. Stil, we are not sure that we can spel any better than Chaucer and Shakspear. And Milton and Bacon, too, had ther own trubles with speling. The Globe wel observs that 'nether the vis inertiae dens ignorans nor the flipansy of the "little lerning" wil long stand in the way ov a very beneficent reformation'."

WINNIPEG has been suffering from a street car strike; only large cities have troubles of that kind.

Chamberlain's Salve
This salve is intended especially for sore nipples, burns, frost bits, chapped hands, itching piles, chronic sore eyes, granulated eye lids, old chronic sores and for diseases of the skin, such as tetter, salt rheum, ring-worms, scald head, herpess, barbers' itch, scabies or itch and eczema. It has met with unparallelled success in the treatment of these diseases. Price 25 cents per box. Try it. For sale by All Druggists.

The examinations for candidates for assayers' licenses will be held in Victoria on the 23rd inst.

Granite chafing dishes so cheap that that every housekeeper should have one. Russell-Law-Caulfield Co.

Rev. Father Bedard is preparing to erect a dwelling house just south of his church for the use of himself and his assistant.

S. B. F. Steit of Vancouver, representing the Bell Piano and Organ Co., spent a few days in Greenwood early in the week.

Oscar Karlson sustained painful injuries this week while working at the smelter. He is now under treatment at the hospital.

Something new and good. Asbester Sad-Irons. Splendid thing for domestic ironing. Russell-Law-Caulfield Co.

Mr. and Mrs. Thomas Williams contemplate moving to Cranbrook about May 1st, where Mr. Williams has secured a position in a store.

P. J. Dermody is applying to the lands and works department of the provincial government for permission to purchase 80 acres of land in the Lillooet district.

Mr. Higman, who for some time past has been employed in the engineering offices of the B. C. Copper Co., left Thursday for Edmonton where he proposes going into the engineering business for himself.

Mr. Kinney and family, formerly residents of Greenwood, but who have been living for some time in their former home in the Maritime provinces, have returned and have taken up their residence in the city.

Lt. Col. W. H. Glossop of Vernon visited Greenwood early in the week. The colonel is one of those interested in the Midway fruit lands and was here on business for the new irrigation company.

The Boundary Falls stage line, which has been recently acquired by D. A. Bannerman, is running on the following time table: Leaves Boundary Falls 9 a. m., 4 p. m., and 7 p. m.; leaves Greenwood 12:30 noon, 6 p. m. and 10 p. m.

Work at the Dominion smelter is is steadily going on in preparation for the large improvements planned for this summer. Part of the electrical machinery has been delivered and will be installed as soon as possible. The C. P. R. has commenced work on the new spur between the dump yard and the creek. This when completed will greatly facilitate the handling of the matte.

Dr. Simmons, Dentist; Open evenings.

The Sally mine made a shipment of twenty-two tons this week.

Save money by buying your base ball goods at Smith & McRae's. 32-33

Two carloads of ore were shipped from the Strathmore mine this week

Film and plates developed and printing done at Smith & McRae's. 32.33

A coal seam six feet thick is reported to have been discovered near Midway.

Mrs. M. D. McKee leaves Saturday on a two weeks visit to Nelson and Slocan City.

Fishing tackle, lines, leaders, flies, etc. Large variety at Smith & McRae's. 32-33

No shipments were made from the Skylark mine this week but preparations are under way for a shipmenet next week.

It is reported that active work is about commence on the Snowshoe mine. This is considered one of the best properties in the vicinity of Greenwood.

The latest B. C. Gazette announces the incorporation of "The Mother Lode Stage Company, Limited." with a capital of $1,000, divided into ten shares of $100 each.

Furnished house situate on Long Lake street near Methodist church, to rent for summer manths. Apply on the premises or to J. R. Brown, Wallace-Miller block, city. 32-33

The Greenwood Electric Company have several men at work cleaning out the dam at Boundary Falls. This work was started some time ago in order to have it completed before the water got too high, and if the city endorses the new power plant scheme the work done will materially facilitate the construction of the new plant.

Francis M. Lamb, provincial land surveyor, brother of H. Mortimer Lamb, who is well remembered as the first editor of the Times, is visiting in the city. Mr. Lamb has been connected with the B. C. Mining Exchang of Vancouver, but he is now devoting his attention to land surveying and will probably locate permanently in Greenwood.

1906 Wall Paper arrived. Send for us and get a price on your entire job. Smith & McRae. 32-33

SNOWSHOE STARTING.

Active Work Will Start and Shipments Resumed.

A. I. Goodell, formerly superintendent of the Bonudary Falls smelter, but now in charge of smelter at Northport, visited Greenwood this week and while here paid a visit to the Snowshoe mine, in which he is interested. As a result of his visit work on the Snowshoe will be started again after having been closed down since December, 1903. The mine will be in charge of Mr. MacMillan of the Le Roi mine.

The Snowshoe is recognized as one of the important mines of the Boundary and during the four years, from 1900 to December, 1903, that it was operated, almost 100,000 tons of ore was shipped. Considerable development work has been done. In 1903 700 lineal feet of driving, crosscutting and raising was accomplished, while the main three-compartment incline shaft was deepened fifty feet, reaching the 350 foot level. There are numerous ore faces accessible, the workings are conveniently arranged, with ore bins and trackage facilities and adequate power and the output should be large. At one time as many as 100 men were employed and it is expected that a large number will be put to work again.

MIDWAY NOTES.

A Customs Office Wanted—Farmers' Meetin—Personals.

MIDWAY, April 12.—Efforts are being made by the Midway Liberal association to have the customs department appoint a customs officer at the international line on the Myers creek road. The travel between reservation points and Canada by this route is very heavy and the business interests of the Boundary would thus be better safeguarded than at present.

The Kootenay Farmers' institute meets in Midway tomorrow. Deputy Minister of Agriculture J. R Anderson and others will be present.

W. A. Wright, who will probably be manager for the Kettle Valley Irrigated Fruit Lands company, is contemplating making Midway his headquarters

Mr. Eldridge is making satisfactory progress towards recovery.

H. Ellis visited Nelson early this week.

A. Winter and family were guests at the Queen's, Nelson, early this week.

The center piers of the footbridge have been strengthened to withstand the force of the rising waters by more additions of rock. It is expected that the bridge will sustain a severe strain when the Yale-Columbia Co's log drive comes down.

H. H. Pannel is enlarging his poultry business by the erection of a new hennery 100 feet long. The new structure will be a model of its kind and when completed Mr. Pannel will have one of the most complete premises of the kind in the Boundary. He has now five large incubators in operation with an output of 1,000 chickens per month.

PHOENIX NOTES.

E. A. Black is erecting a new building on Knob Hill.

Rev. C. Wesley Whittaker has been offered a four-months' vacation, for a visit to relatives in England, if he will consent to remain with the Methodist church of Phoenix another year.

The contractors, William Flemming and James Murdock, have a gang of men at work on the Twin creek ditch for the flume between Church and Second streets.

W. S. Macey & Co., Ltd., are being incorporated for the purpose of taking over the business of W. S. Macey and W. M. Law. The capital will probably be about $50,000. Mr. Macey now has charge of the Granby, the Skylark and the Pathfinder boarding houses.

OBITUARY.

The funeral of Archie McDonald, who died in the Sisters' hospital of complications on the 9th inst., was held Thursday afternoon under the auspices of the Miners' union. The remains were taken from Gulley's undertaking parlors to the Catholic church, where services were held. The following members of the union acted as pall bearers: Robert Campbell, Clay Mauntell, William Armstrong, John Cavanaugh, Rodger Mead and Erastus Day.

"Some weeks ago during the severe winter weather both my wife and myself contracted severe colds which speedily developed into the worst kind of la grippe with all its miserable symptions," says Mr. J. S. Egleston of Maple Landing, Iowa. "Knees and joints aching, muscles sore, head stopped up, eyes and nose running, with alternate spells of chills and fever. We began using Chamberlain's Cough Remedy, aiding the same with a double dose of Camberlain's Stomach and Liver Tablets, and by its liberal use soon completely knocked out the grip." Sold by All Druggists.

IN HARDWARE

GARDEN SEEDERS—Sows the lawn or plants the seed in the garden.

GARDEN HOSE—Both rubber and cotton in all lengths.

REFRIGERATORS—Lined with white enamel, four trays for meats and vegetables. Two swing doors with locks. A handsome piece of furniture

ICE CREAM FREEZERS—American Twin and White Mountain Freezers in all sizes; two flavors at once

CREAM SEPARATORS—For dairies, strong and handy.

CHURNS—Barrel Churns in all sizes.

WASHING MACHINES—Sunlight and Reacting, very strong and durable. Both round and square.

IRON PUMPS—Force Pumps and Pumps for cisterns.

LAWN MOWERS, GARDEN RAKES, SPADES, SHOVELS, HOES

And a full line of Garden and Farming Tools.

THE MERCHANTS CORNER

Spring styles in neckwear.

Broad four-in-hands are still selling at retail, and there is some call for them at wholesale for immediate delivery. But it is only in in cheap grades that scrafs 2¾ and 3 inches wide are wanted. In fact, the cheaper the grade the broader thescarf, and the better the trade the narrower the scarf. General tradewant scarfs 2¼ and 2½ inches wide and in the department stores in particular. It is declared that when it comes to asking $1.50 and $2 for a scarf people will not pay these prices for narrow neckwear: hence they adhere to these medium widths for business reasons. The better class furnishers, however, are selling regular and folded four-in-hands, 2 and 2¼ inches wide and reversible four-in-hand 1¾ and 2 inches wide.

Ties.

Broad batswings and graduated end ties are meeting with sale in medium, as well as fine qualities There is a tendency fancywards in ties, particularly the batswing, and in the qualities retailing at $1 and $1.50. which show end weave effects in patterns and colors different from the body designs and weaves. There is also a batswing novelty out in delicate tins of solid ottoman weaves with a jardiniere stripe running through the center of tie, a floral jacquard stripe in a color contrasing with the light tint of the ground.

Easter Neckwear.

In former season, when the colors in neckwear ran to dark shades, white and pearl were favored in Easter cravats. Either is still safe for the man who has any doult about what would otherwise be becoming to him. But there are a great many delicate tones in vogue and any one of the fashionable tints will be correct, so long as it is in harmony with dress ensemble. Preferably the cravat for Easter should be an Ascot, though it may property be a folded four-in-hand worn as a once-over.

H.B.K. BRAND

BIG SHIRT

Made big enough for a big man to work in with comfort. Has more material in it than any other brand of shirt in Canada. Made on the H.B.K. scale it requires 39½ to 42 yards per dozen, whereas common shirts have only 32 to 33 yards.

That's the reason why the H.B.K. "Big" Shirt never chafes the armpits, is never tight at the neck or wristbands, is always loose, full and comfortable and wears well.

Each shirt bears a tiny book that tells the whole history of the "Big" Shirt, and also contains a notarial declaration that the H.B.K. "Big" Shirt contains 39½ to 42 yards of material per dozen.

Sold at all dealers but only with this brand:—

H.B.K. BRAND

HUDSON BAY KNITTING CO.

Montreal Winnipeg Dawson

WARNING. GLANDERS.

IN districts where the existence of Glanders is suspected and especially in neighbourhoods where actual outbreaks have occurred the adoption of the following precautions by owners of horses and others interested will do much to prevent the spread of the disease and the establishment of fresh centres of infection.

1. Horses or mules having a nasal discharge or other suspicious symptoms should not be admitted to livery or feed stables or yards, blacksmith shops, church or school sheds, railway stock yards, private stables or other places where they are likely to come into direct or INDIRECT contact with animals of the equine species.

2. All stables, yards or sheds used for the accommodation of horses or mules should be regularly and frequently cleansed and disinfected in the manner described below.

3. After cleansing the premises thoroughly, and burning all debris, the interior should be well gone over with hot steam, or boiling water, adding to the latter at least one quart of crude carbolic acid to each five gallons after which the entire surface should be thickly coated with a thick solution of fresh lime wash, to which crude carbolic acid has been added in the above mentioned proportion.

Outbuildings, fences and tying posts with which infected animals have been in contact should also, when possible, be thoroughly treated in a similar manner.

All ordinary harness and stable utensils, which have been in contact with infected animals or infected premises, should be thoroughly soaked in a hot solution of crude carbolic acid of a strength of one part to twenty.

Materials which might be injured by the above treatment such as valuable harness, robes, cushions, etc., which have been in contact with infection should be placed in an air tight room and fumigated with Formaldehyde, after which they should be thoroughly cleaned.

4. In stables where outbreaks have occurred or where diseased animals have, inadvertently or otherwise, been stabled, even temporarily, the cleansing and disinfection should be especially thorough and in such cases it is safest to remove and burn feed boxes and mangers when of wood; iron articles can be rendered harmless by passing them through fire or by immersing them for some time in boiling water. All litter from suspected animals should be burned or carefully fenced until used.

5. Farmers and others should, whenever possible, avoid admitting strange horses or mules to the premises occupied by their own animals especially of the same species. It is a good plan to reserve an isolated building for outside horses or mules, but where this is impossible they may be accommodated in cow stables, cattle not being subject to glanders infection. Such horses and mules should be watered from special pails, which, together with all other stable utensils used on or about them, should be carefully cleansed and disinfected before being used for other animals. Stalls occupied by strange horses or mules should be well cleansed and disinfected and, if at all possible, left unoccupied for some time.

6. When new horses or mules are purchased in or from districts where glanders exists, they should, unless carefully tested with Mallein prior to purchase, be stabled apart and closely watched for some time before being brought in contact with other animals of the equine species.

7. It must be borne in mind that while nasal discharge, or ulceration, enlarged glands, the presence of farcy buds, unaccountable swelling of the limbs and general unthriftiness often characterize cases of Glanders, the disease exists in many animals without, for the time being, any external manifestation whatever, the only means of detection in such cases being the Mallein test, and that these occult or latent cases are in some respects the most dangerous because unsuspected. Our experience shows that it is possible for animals of this class to convey infection to others without themselves developing acute symptoms. It is therefore plain that great caution should be exercised in the purchase or banding of strange horses or mules especially in those districts where the disease has become established.

8 The carcases of animals dying from or slaughtered as being affected with Glanders should, when possible, be burned or, failing this, buried at least six feet beneath the surface.

9. Owners of premises where outbreaks have been dealt with should bear in mind that Inspectors cannot recommend release from quarantine unless disinfection has been carried out in a satisfactory manner and that compensation for animals slaughtered cannot be paid until a certificate of cleansing and disinfection has been received by the Minister of Agriculture.

10. Horse owners should have no hesitation in reporting to this Department or to its Inspectors the existence of actual or suspected cases of Glanders. The disease has been spreading rapidly of late years and it is a matter of public interest that every fresh centre of infection should be discovered and dealt with as promptly as possible.

J. G. RUTHERFORD,
Veterinary Director General.

Progress and Development

Progress and development are terms closely identified with life in the West. In a new country people are working daily for the upbuilding of town, city and district, and for the improvementof the conditions under which men and women are called upon to live. Every act of daily life that tends to bettering one's surroundings makes directly or indirectly for the improvement of society generally. In all this the local newspaper plays an important part. Among its local readers it stimulates an increasing interest in their home city, keeping them posted on all local happenings, and becomes a welcome weekly messenger, bearing bright and welcome tidings. Among its outside readers it forms a valuable advertising medium making known the merits, advantages and prospects of the city and attracting thither citizens who want employment, business firms looking for locations, and capitalists seeking investments. In the upbuilding of a town, city or district the local paper is an important factor.

BOUNDARY CREEK TIMES

The Boundary Creek Times aims to do its full and complete share in the upbuilding and improvement of Greenwood and the Boundary district. It is not handicapped in its work by any restraining obligations to any party, clique or corporation, but it is free at all times to rise up and promote the best interests of the City of Greenwood and its people. To do this most thoroughly and satisfactorily the Times must have the support and cooperation of the citizens of Greenwood.

Every effort is being put forth to make the Times the class of newspaper the people want. Increasing attention is being continually paid to mining news, especially of that nature that will interest those employed in the work as well as those whose capital is invested in the properties. With this end in view we aim to have

A Subscriber in Every Home

As a result of the efforts that have already been put forth, we believe that an increas interest is already being taken in its news columns. We have evidences of this from the fact that the subscripiion list is already growing; the street sales are increasing weekly and the news dealers find more demand for each succeeding issue. This is a satisfactory condition of affairs that acts in two ways. It increases the revenue of the circulation department and it makes the paper a first-class advertising medium for local business men.

In handling local advertising every effort if put forth to protect the Greenwood merchant. The local page is reserved for them and foreign advertising has been repeatedly refused because the advertising manager refused to disturb the positions held by local advertisers.

Business men of Greenwood, we are here to protect and advertise you. We are protecting you! Do you advertise? Read The Times, subscription $2.00 per year.

FINANCING A MINE.

Examples of Extravagance and Bad Management.

While no hard and fast rules can be laid down for the financing or development of a mine, there is a common danger point, that, paradoxical as it may seem, is reached from two totally different directions. One is a combination of lack of money and bad management. The other is where an abundance of money with indifferent management becomes an equal menace to the success of the property. Generalizations are not always convincing, even though they may be deduced from a long observation of concrete instances. To illustrate this, I will detail the experience of one very wealthy company which for a number of years carried on an extensive scheme of development and equipment that must have cost, approximately, a quarter of a million dollars.

AN OBJECT LESSON.

The manager was a gentleman of ability, integrity and some experience, but who did not highly esteem money, per se, and was unable to size up the proposition apparently from an economic point of view. He drove long tunnels, sunk shafts and made surface improvements without regard to their cost, and seemed perfectly satisfied for a number of years to make his operations an object lesson of model development. This he did in so far as the work of timbering and driving, and the installation of machinery, went; but in the respect that the work done had for its object the production of returns for the money invested, he failed.

The most elaborate plans for future development were outlined, and in some instances ore bodies were opened, raises, stopes and levels run through them; but no effort was made to utilize them. Elaborate testing was done for the purpose of determining a suitable treatment process, so that the early mistake made by the management in building a mill not adapted to the ore, and which was afterwards dismantled, need not be repeated. But apparently the conflicting results of the tests secured did not furnish the manager conclusive evidence as to the kind of mill needed, with the result that the property is still far short of a development that has an adequate economic value for the amount of money expended, although approximately $700,000 worth of ore has been put in sight.

MERE PROSPECTING.

The lesson of this is if he had been supplied with less money, carte blanche, his plans for dead work would have been less elaborate, and he might have made a greater effort to utilize some of the ore reserves encountered, and also have endeavored to make a record for production, with a start towards dividends, instead of attempting to see how much work could be done merely to explore over 500 acres of mineral territory in a manner that was little better than mere prospecting.

Some of the eastern men who put up this money were quite satisfied that if all of the members of the syndicate owning the property had been equally willing to continue on this elaborate scale, the property would become a bonanza. But they were mistaken in their calculations, as to do this the amount of money expended would have made at least an approximate return to the original investors. And it is hardly fair to suppose that simply as a business proposition, irrespective of the amount of money involved, shrewd business men would be willing to continue to pay out money without seeing any prospect of an adequate return.

The chief mistake made in the development of this property was that it was developed entirely along sentimental lines. That is to say, the confidence which the directorate reposed in their manager was born chiefly of a sentimental regard for him as a man, and their knowledge of the fact that he was thoroughly honest.

He showed good faith, too, by putting in some money himself to back his judgment. But if these men had been more cold-blooded and critical, the money would have been expended to better advantage, or the development would neve been stopped long before so large an amount had been used without an adequate showing or return.

OTHER CASES

In other cases, notably in Cripple Creek and Leadville, where properties were opened by the original discoverers in such a way as to afford excellent promise of becoming bonanza producers with development, capital has been brought in and expended with equal recklessness, and perhaps far less honesty, simply because the mines produced very largely and in some cases actually created dividends in spite of extravagant management.

Of course, only very rich mines can stand such a total disregard of business principles for a limited time, and unless a change is made must come to grief and be recorded as failures, where success is due.

So many things are embraced under the head of "good management" that it is not easy to clearly include them all in the brief limits of an article of this kind. But in a general way the term may be said to cover good practical mining and business judgment. This makes it possible for the manager possessing these traits to secure efficient foremen, and carefully watch the progress of development, so that with money he may, in a reasonable time, create a continuously profitable producing proprty.

It goes without saying that such a man will not undertake to expend a considerable sum upon a property that does not justify the expenditure, if, in addition to practical mining experience, he has some technical knowledge and business training. If he is merely a dreamer who is ready to "hope all things and believe all things" because of a few good assays and fine surface croppings, he may have to endure all things in the way of disappointment and failure. But the redeeming feature of any mining investment, where the original basis of the proposition is one of merit, is its ability to sustain and recover from greater loss in a shorter time than almost any other industry, for the reason that if payable ore is in the property it can be got, if persistence, money and good judgment are used. When it is obtained it becomes a source of revenue that does not depend upon the contingency of competitors in a similar line, nor the finding of a market for its output, as is the case with ordinary industrial enterprises.

I have in mind another company which has been carefully and economically developed with an expenditure of possibly one-half of the amount used in the first named property, covering a period of ten years. This has been managed in a most systematic and and thoroughly businesslike manner, and produced probably two-thirds of the amount expended in order to avoid sacrificing the stock.

This was a mistake from an economic point of view, for the reason that owing to the large amount of money necessary to open this property thoroughly, it would have really been better to sell more stock and allow the ore exposed to remain in the mine. Because there is a greater value, relatively, to the ore in the stopes, in the eyes of the investor, than there is in the examination of the settlement sheets of the smelter for the same ore. If this company had left the ore in the mine and sold stock on the strength of the reserves, it could have taken the money so received and opened up immense new ore bodies, which by a long and painful struggle were finally uncovered within a comparatively short distance of where work was stopped several years ago, because of lack of money, and for the reason that the plan of development was at that time considered inadequate to its scope. As a consequence a new shaft was sunk, a new shaft house built and hoisting plant and other machinery installed. This not only involved a much larger outlay than the comparatively small amount then required to penetrate the ore bodies only recently uncovered, but it has involved the delay of several years' time, The outcome, of course, of this development, will be an immensely valuable property. If this manager had at any time within the past eight or ten years $50,000 at one time at his command, he would have been able to repay in all probability the entire capital stock of his company in dividends within four or five years from the time he received it. But in spite of delay, in spite of the lack of money, his enterprise is a triumph of business management and good mining practice, and shows the importance of sticking to a mining investment even under discouraging circumstances; because a good mine is a lifetime proposition, and one such will reward its owners abundantly for a hundred failures.

Without mentioning any names I will say that I know several large properties that have, within the past ten or fifteen years, returned in dividends the entire original capitalization, and are still producing at a rate that promises to yield from 50 to 100 per cent more within the same time.

In some of them, notwithstanding that immense sums have been produced, many mistakes have been made. Yet the ability to see and correct them, involving in some cases a complete change of managers, has kept them in the list of dividend payers, and created a standard value for mining investments that no money panics or political upheavals can affect.—P. A. Lenord in Mining World.

VESUVIUS VOMITING.

Mount Vesuvius, Italy, is in a state of fierce eruption and towns and villages within a radius of several miles are threatened with total destruction. Sand and ashes have fallen to a depth of six feet and buildings are collapsing under the heavy strain. It is estimated that twenty million dollars worth of damage has been done and that half a million people have been rendered homeless. The disaster threatens to equal that of A. D. 79, when Herculaneum and Pompeii were buried.

THE MODERN NEWSPAPER.

I do not hesitate to declare, and I am prepared to prove by extract if required, that the great, dignified journals of the past exist only in the imagination of those who talk and write about them. Distance in this matter lends great enchantment. The general contents of the daily press years ago would greatly surprise the present day reader of newspapers. Only thirty years ago many newspapers were accustomed to print topics now unmentionable. The modern newspaper has many faults, but it is at least decent, and it does not give the rest of the world the impression that English life largely centers round the divorce court and the prize ring.—Sir Alfred Harmsworth.

WEST FORK NEWS

Good Times Ahead for Miners and Merchants.

F. F. Ketchum of Beaverdell is spending a few days in Greenwood on business as well as pleasure. He believes this city has a good future and expects to see it grow steadily larger and more prosperous. Speaking of Beaverdell he expressed the belief that when the Midway and Vernon railway is finally completed the town would become the leading one between Rock Creek and Kelowna. "We are in the center of a large mining district that has proven to be rich and easily worked and with adequate transportation facilities great development will certainly follow," said Mr. Ketchum. "The mines are the chief source of our wealth and they are not only good but they are numerous. Prospecting and development work is being continually prosecuted and we only need a railway to start many of them making shipments. As it is, he continued, the Rambler and the Sally have proven that shipments can be made profitable under present conditions." Speaking of the Washington-Idaho, Mr. Ketchum said he believed it would prove a property of great value when work has been extended to deeper levels. Development work on this mine is going on steadily.

Commercial conditions in the West Fork country are steadily improving. The population is steadily increasing and trade is growing in volume. Mr. Ketchum runs a general store in Beaverdell, where he has been located during the past five years. During that time the district has passed through periods of depression, but the present conditions are better than ever before and the future promises better still.

MORE WORK STARTED.

Active Operations Will Begin on Three Good Claims.

J. J. Farrell, well known in Greenwood and vicinity, who came into the Boundary country years ago before the first trails were opened, arrived home this week from the east, where he has been spending the past four months. Mr. Farrell spent some time in the state of Wisconsin and in the city of Brantford, Ontario. He found the people taking an increasing interest in Greenwood and vicinity. The success of the Granby company has gone far to strengthen confidence and awaken interest. Mr. Farrell is interested in several claims in Wellington camp, especially the Butter Cup, Bay Horse and Iron Clad. It is his purpose to thoroughly inspect these and begin active operations in the near future. Considerable work was done some time ago and a large quantity of ore was taken out but no shipments were made. A busy summer is expected and Mr. Farrell expects to add these to the Boundary shipping list.

GLANDERS.

In another column will be found the announcement of the department of agriculture regarding glanders. Any one who owns or drives horses will do well to read the instructions given as to how animals afflicted with the disease should be cared for and the precautions necessary to prevent contagion. The ravages of the disease among the horses of the Okanagan valley some months ago is a warning to owners to take all steps necessary to protect their stock, and the instructions given by the department are timely and valuable.

ORE SHIPMENTS.

The ore shipments from some of the mines this week show a heavy increase over last week. The Sunset jumped from 875 tons to 1,155, while the Raw hide almost doubled its output. The Granby mines increased 2,442 tons and others smaller increases. The Sally has been added to the list and others are expected next week.

WELL SATISFIED.

EARN CASH

In Your Leisure Time

If you could start at once in a business which would add a good round sum to your present earnings—WITHOUT INVESTING A DOLLAR—wouldn't you do it?

Well, we are willing to start you in a profitable business and we don't ask you to put up any kind of a dollar.

Our proposition is this: We will ship you the Chatham Incubator and Brooder, freight prepaid, and

You Pay No Cash Until After 1906 Harvest.

Poultry raising pays.

People who tell you that there is no money in raising chicks may have tried to make money in the business by using setting hens as hatchers, and they might as well have tried to locate a gold mine in the cabbage patch. The business of a hen is—to lay eggs. As a hatcher and brooder she is outclassed. That's the business of the Chatham Incubator and Brooder, and they do it perfectly and successfully.

The poultry business, properly conducted, pays far better than any other business for the amount of time and money invested.

Thousands of poultry-raisers—men and women all over Canada and the United States—have proved to their satisfaction that it is profitable to raise chicks with the

No. 1— 60 Eggs
No. 2—120 Eggs
No. 3—240 Eggs

CHATHAM INCUBATOR AND BROODER.

"Yours is the first incubator I have used, and I wish to state I had 52 chicks out of 52 eggs. This was my first lot; truly a 100 per cent. hatch. I am well pleased with my incubator and brooder. THOS. MCNAUGHTON, Chilliwack, B.C."

"My first hatch came off. I got 170 fine chicks from 190 eggs. Who can beat that for the first trial, and so early in the spring. I am well pleased with incubator, and if I could not get another money could not buy it from me. Every farmer should have a No. 3 Chatham Incubator.—F. W. RAMSAY, Dunnville, Ont."

"The incubator you furnished me works exceedingly well. It is easily operated, and only needs about 10 minutes attention every day. R. MCGREER, MOOSE JAW, Assa."

The Chatham Incubator and Brooder is honestly constructed. There is no humbug about it. Every inch of material is thoroughly tested, the machine is built on right principles, the insulation is perfect, thermometer reliable, and the workmanship the best.

The Chatham Incubator and Brooder is simple as well as scientific in construction—a woman or girl can operate the machine in their leisure moments.

You pay us no cash until after 1906 harvest.

Send us your name and address on a post card to-day.

We can supply you quickly from our distributing warehouses at Calgary, Brandon, Regina, Winnipeg, New Westminster, B.C., Montreal, Halifax, Chatham. Address all correspondence to Chatham. 314
