RENDELL - & - CO.

NEW GOODS FOR THE MASSES AT RENDELL'S ARCADE.

Last week we received large consignments of New Goods for the Holiday Trade.

Ladies' Japanese Silk Dressing Gowns and Jackets, embroidered in latest designs.

SILK WAISTS

A few of the latest novelties in Silk Waists, hemstitched and tucked taffeta in all shades, you'll find them stylish and fit perfectly three prices we mention are $9.00, $10.00, and $12.00.

Special line of Silk Waists for $3.50 each, regular price was $5.50 and $8.00.

Flannelette Waists, sizes 32 to 38, $1.00 each.

BELTS AND COLLARS

See the latest novelties in Ladies' Featherbone Golf Belts in black and cream at $1.50.

Featherbone Taffeta Collars in all new designs at 70 cts. and $1.50.

CORSETS

W. B. and La Vida Corsets just to hand, This American Corset we make special note and will advertise later, our stock is complete in sizes and styles.

Ask to see the new erect form straight front corset.

Standard Patterns and Fashion Sheets for December now in stock.

MINING REVIEW

Deadwood Rapidly Becoming the Banner Camp.

WORK ON NEW PROPERTIES

Several Mines Approaching the Shipping Stage—A Review of Leading Properties.

To the people of this city particular interest is attached to the development and doings in Deadwood camp. Much is expected of it, and though at the present time there is only one mine, the Mother Lode, that can be classed in the permanent shipping list it will not be many months before others will have reached that desirable stage of development. This is more particularly true of the Morrison; the Crown Silver and Sunset mines, owned by the Montreal and Boston Copper company; and the Marguerite, the property of the Quebec Copper company, limited. To this list the Greyhound, Great Hopes, and Buckhorn will eventually be added. The most important announcement to be made regarding this camp is the early resumption of development on the Ah There, the property of a local company. This means, now that work is in progress on the Butte fraction, adjoining the Greyhound to the north, that five contiguous claims will be undergoing development simultaneously, on what is generally conceded to be one continuous ore belt. Another good item of news was the bonding last week by Harry Shallenberger of the Alameda. The claim is owned by Louis Bosshart, and is believed to be a valuable piece of ground on account of its joining to the south, the Mother Lode group. Little development has been done but if Mr. Shallenberger is successful in lifting the bond he expects to have a considerable force at work exploiting the claim. Outside parties have of recent date been paying particular attention to Deadwood and as there are yet quite a number of good claims lying idle, it offers exceptional advantages for the employment of capital willing to take the risks of developing prospects. In years to come, providing the sanguine expectations of owners of properties in this camp are realized, it promises to become a second Butte in its production of copper-gold ores. Then like that famous camp every fraction and idle piece of ground will be wanted and the speculator of today will reap handsomely on his investment, especially will this be so of claims adjacent and surrounding the Mother Lode. It is natural to suppose that from now on deals will be more frequent.

The Ah There claim belongs to the McRae Copper Mines, limited. About a year ago this company was brought out, the claim purchased and development started. After some surface exploration, tracing the ore body of the Greyhound onto this claim, a shaft was started, a hoisting plant purchased and then came the unavoidable discontinuance for lack of funds. Since last spring no further work was possible until now when the directors of the McRae Copper company and the gentlemen at the head of the Western Copper company, owning the Greyhound, got together and made an agreement whereby the last company undertakes to run a drift from the 100-foot level of the Ah There shaft to connect with the Greyhound shaft.

On the Greyhound the shaft is down 130 feet, with a level penetrating the ore body for 25 feet at a depth of 55 feet in the shaft and a second level opened up at a depth of 100 feet. In this last level the crosscut east was run 40 feet and had just encountered the ore body on its dip, when work was withdrawn from that point and concentrated in obtaining further depth in the shaft. Just now now the shaft is being lined and the station at the 100-foot enlarged. This completed the shaft will be continued on down to the 300-foot level. It will be remembered that in November a deal was consummated whereby William Price, of Quebec, who is at the head of the Standard Copper company, secured control of the shares of this company. The company is capitalized in the sum of $1,500,000. The present board of directors, elected immediately after the sale are: President, Andrew Laidlaw; vice-president, F. Oliver; secretary, E. F. Massam; and William and H. E. Price directors. The concern is in a splendid financial condition and much is expected from the Greyhound. The claim has one of the large surface ore showings of Deadwood camp, being 400 feet in width, and opened up for a distance of 1,300 feet in length by surface cuts.

Adjoining the Greyhound to the north is the Butte fraction owned by a syndicate of Greenwood operators. There has been some surface work performed sufficient at least to demonstrate the continuity of the Greyhound ledge, if it may be so called. Work was started on this claim last week.

The next claim north is the Great Hopes. The development is in charge of Fred Oliver. A force of men have been running a crosscut tunnel for some time which has penetrated the hill 541 feet. From time to time stringers of ore have been cut through but its objective, the big showing disclosed on the surface and partially developed by shaft, has not been reached.

The last claim on this belt under development is the Marguerite, which, with a fraction, belongs to the Quebec Copper company, limited, with registered office in this city. The head office of the company is in Quebec, the board of directors being composed of wealthy manufacturers and bank directors of that city. Andrew Laidlaw is the resident managing director and John Massam, superintendent. The Marguerite is credited with having some of the richest ore in the camp. As an indication of how the ore runs the following figures will prove interesting. In copper the average of 20 assays gave 3.81 per cent, giving a value, figuring copper at 16 cents per pound, of $12.28. An average of 21 assays for silver gave 3 1-5 ounces, valued at $2.04, and the gold contents of 23 samples averaged 2.88, or $5.75. The total average gave $20.07 per ton in all values. The present company started active operations last June in thorough prospecting the property and in the sinking of a new permanent working shaft. This shaft, a double compartment, is located midway between the Nos. 1 and 2 veins, on the east side of the claim. It is down 100 feet. At this depth a level was opened up and a crosscut run east, to a rich ore body containing chalcopyrite in a a heavy magnetic iron gangue, a distance of 90 feet. From this ore some extremely high values have been obtained. The west crosscut is in 65 feet mostly iron sulphide of a low grade. On the third vein on the extreme west side of the claim, a crosscut tunnel has been started to tap the ledge at depth. Recently an order was placed with the local branch of the Jenckes Machine company for a 25-horse power hoist and engine, a No. 5 Cameron pum, hose, wire rope, cars, bucket and the necessary complement of tools. After the installation of this plant development will be more rapid than heretofore, and it is the expectation of the management to be in a position to shortly place the mine on a shipping basis.

In previous articles the Times has noted at length the development of the Mother Lode—the banner mine of the camp. For four years it has been undergoing a systematic and continuous era of development and today has reached the stage where big stopes are being opened up and it is nearly in a position to turn out 600 tons and more each 24 hours, as will be needed when the smelter is blown in. The mine is developed by a main working shaft now down 325 feet, with levels at the 200 and 300 respectively. On the 200-foot level a big ore chute has been opened up for a distance of 400 feet in length and proved by crosscuts to be from 80 to 100 feet in width. On the 300-foot level considerable development has been done and a fine ore chute, if anything richer than that found in the No. 1 level, exploited. At the present time considerable additional machinery, which, when finally in working order, will give the mine the distinction of having the largest and most up-to-date plant in the district, is being installed. Included in this new plant is a cross-compound condensing Corless-valve Ingersoll-Sergeant air compressor, with a capacity from 35 to 40 drills; four large boilers, a hoist and a complete outfit of minor appliances necessary for working the mine on a most economical and profitable scale. When this is done the shaft will be carried on down to the 500-foot level. To date the mine has sent down to the Greenwood smelter something over 4,435 tons of ore.

Other properties in Deadwood camp under development are the Morrison in the extreme north end, and the Buckhorn in the extreme south. The superintendent of the former mine, Fred Oliver, is at present in Spokane, but has announced that by the end of the year a complete report of development will be given out to the shareholders, as by then he hopes that the Morrison will have been added to the shipping list.

A. E. Bielenberg has a force on the Buckhorn. Work has for some time been prosecuted in the 100-foot level, where a crosscut south is being driven to encounter an ore body, some 160 feet of work having been done in this direction. No work is being attempted at the 200-foot level for the present.

MINING NOTES.

A. E. Bielenberg has bonded the Durango claim in Deadwood camp.

At a meeting of the directors of the Winnipeg Mines, Limited, held at the office of the company, at the mine, Wellington camp, Friday evening, it was decided to notify the shareholders of the levy of the first assessment of one cent per share.

The Ingersoll-Sergeant company have sold to Mr. Keffer, a three-drill Ingersoll-Sergeant compressor for use on the No. 7 property in Central camp. The shipment was made from Rossland stock and has already been delivered at Greenwood.

W. J. Porter, one of the heaviest shareholders in the Brandon and Golden Crown Mining company, limited is at present in Brandon, Manitoba, where he went at the request of some of the directors to lay before the resident stockholders of that city a plan for securing additional capital to continue the development of the property, which has been closed down for some weeks.

L. M. Rice, well known in this city in connection with the construction of the Columbia & Western railway, has issued from his Seattle office a map of the camps of the Boundary Creek district. The map is a large one, and from the author's exceptional opportunities in surveying the country, is a sufficient guarantee of its accuracy. The surveyed claims are given as also the general topography of the district. H. A. King & Co., are the distributing agents for Greenwood.

The past week a far livelier interest has been manifested in shares of local companies than for some considerable time past. Sales of Morrison at 2½ to 3 cents were numerous. Winnipeg was in demand both by local buyers and in the east. The straightforward manner in which the directors are going about to place the mine on a substantial footing is evidentally meeting with the approval of many who have faith in ultimate outcome of the property under good management. The consequence is that the market has felt a buoyoncy in the demand for these shares, prices ranging from 4 to 4¼ cents. Waterloo is the only Camp McKinney stock traded in, at a price around 2¼ cents. There is a generally credited report that the winze being sunk from the 65-foot level is in a good body of quartz. However there seems to be an evident intention by the parties "in the know" not to take the general public into their confidence, with the off chance perhaps that holders will loosen up and that they may be able to reap a good harvest when the "bulls" at the Spokane end feel like pulling the wires for a general boom. The splendid showing being made in the Review mine, in the Myers creek camp, has justified interest in this property and some trading has been done at 5½ cents. From all indications there should be a demand in the near future for shares in several companies operating in Deadwood camp, such as the McRae Copper Mines, owning the Ah There, the Deadwood Copper company, owning the St. Lawrence and others, when work shall again be started on these claims.

SUMMIT HOTEL BURNED

Loss Over $12,000 with Insurance of $7,500.

Summit City suffered by a disastrous fire last Thursday evening in the destruction of the Summit hotel, owned by James McNeil. The building was a substantial two-story frame, plastered throughout and with its furnishings and stock of liquors was valued at over $12,000. With the exception of a few household effects everything was burned. The fire is believed to have originated in the hood over the kitchen range, but this is not certain, as when it was fire noticed by some of the guests, at 8.30 p. m., the kitchen was all in a blaze. There being no fire fighting apparatus of any description at hand the few occupants of the hotel and nearby neighbors devoted all their energies to saving what was possible. At the time of the fire Mr. McNeil was visiting at Eholt and was appraised of the fact by his attention being called to the appearance of a big conflagration in the direction of Summit City. On his arrival the bulding was burnt to the ground. Fortunately Mr. McNeil carried considerable insurance amounting to $7,500, divided among the following companies, the Imperial, Lancashire, Canadian and American. R. S. Day, manager in the province for the Imperial, was up at Summit this week investigating the fire and adjusting the loss.

J. R. Porter, insurance agent of this city, was among the guests, he having gone to see Mr. McNeil with a view to obtaining a renewal of one of the policies which only had a few more days to run before its expiration. Instead of getting a renewal premium his company will be forced to pay out a considerable sum as its proportion of the loss.

THE CITY COUNCIL.

Mayor Hardy presided at the council meeting Monday night and Ald. Bannerman, Sutherland, Galloway, Cropley and Sullivan were present. W. E. Hodges was appointed auditor for the city. Leamy & Gray were paid $250 without prejudice as to their account against the city. A by-law reducing hotel licenses to $300 a year was read a first and second time. Mr. Winnett's charge against M. Eildermann, city driver, was further considered by council but no definite action was taken. A by-law was introduced to increase the fee for peddlers and transient traders up to the limit, viz., $500 per annum. The by-law in reference to laundries will be amended so as to name a section where laundries will be allowed.

POULINIER-NELSON

Yesterday evening, in the parlor of the Hotel Windsor, H. E. Poulinier was united in marriage to Miss Emma Nelson, of Ephraim, Utah. Rev. H. B. Balderson, pastor of the Methodist church, officiated at the ceremony. The bride arrived on yesterday afternoon's train from Ephraim, Utah. Harry is a well known prospector and miner, and his wedding came as a mild surprise to even his most intimate associates. The young couple will reside in one of the cottages at the Mother Lode mine where the groom is an employee.

A DENIAL.

In a letter just received from Mr. W. E. Hodges, of Greenwood, that gentleman sends me a clipping from the Vancouver News-Advertiser, which I enclose. I absolutely deny having made the statements Mr. Stephenson states me to have made, and would be much obliged if you kindly publish this fact. ANGUS K. STUART.

I have added to the equipment of my dental office an apparatus for the administration of

Nitrous Oxide and Oxygen

for dental operations. This is the latest, safest and best method for the painless extraction of teeth or removal of the pulp—destroying the nerve.

WHERE THE MAJORITY IS.

NOTHING will help to allay the senseless race cry quicker, or at any rate, nothing will destroy its effect so soon, as an understanding of the fact—and it is a fact—that the government's majority is not dependent on Quebec. Even were it so Quebec, has as much right to make her voice heard and her influence felt as any other province, but if Quebec were left out of the calculation altogether, there would still be a Liberal majority. But it must never be forgotten, that the apparent hostile majority in Ontario is entirely due to the Tory gerrymander, for by their own admission the opposition has lost 10,000 on the popular vote since 1895. When a fair redistribution on the basis of the next census is made and it will be made before another election, the fact will be patent to the most casual observer that, when able to give an honest verdict, Ontario is Liberal like every other province in the Dominion.

EDITORIAL NOTES.

MUNICIPAL TAXPAYER draws attention to the condition of the cemetery. The city should see that all the ground set apart for cemetery purposes is properfly fenced.

THE following is taken from a letter of Dr. Jakes, published in the last issue of the Greenwood Miner:

"Furthermore, I may state that the list of names to compose the committee, as published by Mr. Ross, does not correspond with the original list presented to him by the friends of compromise, but reads as amended by him."

The list of names to compose the committee was embodied in a communication signed by Duncan Ross and presented by the friends of compromise to Dr. Jakes. That communication is in Times office and any ratepayer is at liberty to compare it with the list published and he will find that no amendment has been made.

THE CEMETERY.

TO THE EDITOR:—As you are an aspirant for the position of chief magistrate of this city, and apparently very conversant with the duties of the present civic administration, can you kindly inform me, through the columns of your paper, the names of the aldermen who constitute the cemetery comtee. My reason for asking is because I desire to draw their attention to the fact: "That in all common charity" is their duty to see that some protection (in the shape of a log fence at least) should be constructed around that portion of the cemetery in which is supposed to be laid the remains of those unfortunates which the pale of civilization debars the privileges of consecrated rest. I observe in that plot one unfortunate mound under the sod of which rests a fallen woman and over which dogs, cattle and wild beasts may roam at will, and I would suggest, that as the city pays for the service of a caretaker, he be instructed to devote sufficient time to remedy the negligence.

I do not claim to assert that the city is entitled to follow my suggestions, but the Good Book says that "Jesus Christ died to save sinners," and surely the cemetery committee of the city of Greenwood, B. C., can condescend to protect from the devastation of beasts the remains of a poor outcast. MUNICIPAL RATEPAYER.

MUNICIPAL ELECTIONS, 1901.

To the Electors of the Municipality of the City of Greenwood:

LADIES AND GENTLEMEN:—I am a candidate for the office of mayor at the approaching municipal election and respectfully solicit your votes and influence. During the campaign I will have opportunities of explaining my views at length. Briefly stated, I am in favor of the following:

The present state of city finances and the stringency of the money market make it impossible to enunciate a well defined policy of public improvements. An adequate system of waterworks is necessary and also some suitable plan of sewering the city, but these and other improvements must be deferred until the city is in a better financial position. I confidently believe that by the exercise of wise judgment, the finances of the city can be placed upon such a sound footing that necessary public works can be constructed without placing excessive burdens upon the present taxpayers.

The credit of the city must be restored and maintained. Litigation should be avoided and I am in favor of an amicable settlement with those who have just claims against the corporation.

If Greenwood is to occupy the prominence to which she is entitled by natural advantage, the city must be brought into the closest touch with the surrounding mining camps. During 1901 every effort should be made to secure the construction of the tramway without imposing additional burdens on the ratepayers beyond those to which they are already pledged.

The strength of every city, particularly one situated in the heart of a mining district, lies in its workingmen and its future depends upon them. I am in favor of recognizing their claims to proper protection. I believe eight hours should constitute a legal day's work and this principal should be adopted by the municipality. Generally speaking, I am in favor of municipal work being carried on by day labor, but in the event of contract work being necessary, I would insist that contractors should pay the current wage.

I am opposed to the employment of Chinese and the encouragement of Chinese immigration and any power granted to the corporation by the Municipal Clauses Act should be exercised to the fullest extent in restricting their employment in the city.

The mayor's time should be devoted to the work of the city. I am not rich enough to do this without compensation and if elected I will expect a sufficient sum to properly represent the city without loss to myself.

The first of each year, estimates should be prepared giving each section of the city an equitable share of the expenditure and these estimates should be religiously followed.

I am your obedient servant,

DUNCAN ROSS.

BEAVERTON NOTES.

BEAVERTON, Dec. 11,—D. W. Smith, proprietor of the Smith hotel, has gone to Greenwood on a business trip, while J.P. Thomas is looking after the interests of the hotel during his absence.

W. Cookson has returned after spending a couple of weeks in Greenwood. This gentleman has the neatest cabin on the West Fork which goes to show he is a mechanic in every sense of the word.

F. C. Boles is also in Greenwood attending the wedding of his sister-in-law, and will return Saturday with Mrs. Boles who has been visiting friends in that city for a month or more.

Al Cameron, who is proprietor of the hotel at West Bridge, dropped in on us yesterday. This was Mr. Cameron's first visit to Beaverton and he was more than pleased with the townsite and surrounding country.—He also visited the Carmi mine and thinks it is one of the finest he ever saw.

Mr. and Mrs. Alex. McKay, father and mother of A. H. McKay, and their grandson, Master Hector Pressley, came in a few days ago from Valley City, N. D. This couple is about 68 years old and rode in over the trail on horse back from West Bridge. They are highly pleased with the country.

We are just informed that the West Fork road is again commenced and a sleigh road will completed to Beaverton. Let the good work go on.

FOR AULD LANG SYNE.

"Should old acquaintance be forgot?" The answer comes mechanically from every Britisher. Nor should new acquaintance be forgot. Remember that on the bloody fields of South Africa your brave soldier boys were on the firing line, flanked by loyal British subjects from Ceylon and India. In the midst of danger, lasting friendships were formed, and you, ladies of Canada, have it in your power to cement those bonds. The green teas of Ceylon and India appeal to you from sentiment. By using them you not only aid your brother colonists, but you get absolutely the best tea. Those of you who drink green Japan teas have a revelation in store if you make the change. Blue Ribbon, Salada and Monsoon packets may be had from your grocer.—Colonist.

TO THE DEAF.

A rich lady cured of her deafness and noises in the head by Dr. Nicholson's artificial ear drums, gave $10,000 to his institute, so that deaf people unable to procure the ear drums may have them free. Address No. 14520C, The Nicholson Institute, 780 Eighth Avenue, New York, U. S. A.

CHURCH NOTICE

Roman Catholic church, Greenwood, B. C., fourth Sunday of Advnt, Dec. 23rd: Holy sacrifice of the mass at 10 a. m.; immediately after mass a general meeting of the ladies and gentlemen of the congregation wil be held in order to be personally introduced to their pastor. 2nd. To devise ways and means to assure the support of the priest and the defraying of the current expenses of the church. 3rd. To organize the Sunday school, the Altar society, the choir and the league of the Sacred Heart.

Sunday school, 2:30 p. m.; evening devotions, 7:30 p. m.

Christmas Day—First mass. 8 a. m.; second mass, 9 a. m.; third mass, 10 a. m.; meeting of the Sunday school children, 3 p. m.; evening devotions, 7:30 p. m.

A NEW PROCESS

Concentration of Ores by the Use of Oil

FULLY DEALT WITH

In a Paper by Chas. M. Rolker, Well Known Mining Engineer, Who Investigated the Process.

Last week the Times drew attention to a new process of concentration by oil. Through the courtesy of Mr. A. L. McEwen, a mining engineer well known here, but at present in Sumpter, Ore., we publish an article recently published in the Mining Journal. The Journal says:

"A paper on this subject was recently read before the Institute of Mining and Metallurgy in London by Mr. Chas. M. Rolker, a well known mining engineer, who has been engaged by an influential mining firm to report on the Elmore concentration process as in use at the Glasdir mines, North Wales. On the report of Mr. Rolker, a small company was formed, called the Ore Concentration Syndicate, Limited, of 4 Bishopgate street, (within) London, E. C., for the purpose of continuing experiments with various classes of ores and introducing the process, where adaptable, into actual operation. The following facts will interest a great many mining men as opening a new method of treatment to certain ores which yield unsatisfactory results by ordinary concentration machinery.

"The process is based on a very curious property of oil and greasy substances of attaching themselves to metallic and bright mineral surfaces in preference to rocky or earthy ones. Experiments and some resulting patents have shown that thin oils will float off metallic surface minerals from a crushed rock containing them, but it was found impossible either by dry, damp, or wet treatment of such ores to prevent an impracticable waste of oil by its attachment to the waste largely, as well as the concentrates. A step in another direction was made at the De-Beers diamond mines, where thick grease is used on a shaking inclined surface, over which the broken rock passes, and to which any diamonds present attach themselves and are picked off at intervals.

"Mr. Elmore hit on the idea of mechanically mixing a thick residual oil with a flowing stream of pulp from a stamp battery or other wet pulverizer. He found by experiment that the use of a helical trough within a revolving cylinder furnished with baffle plates at intervals, produced so thorough an agitation of oil and water as to insure contact between the oil and minerals to which it is capable of attachment. Experiments on the length of cylinder necessary to get a high extraction then led to the adoption of three cylinders, one above the other, driven by worm gearing. After trying many methods of separating the oil from its collected minerals, it was found that this could be done most perfectly by a centrifugal hydro extractor, which yields the concentrates in an almost dry condition, and returns the oil free from mineral, to re-circulate in the cylinders. The novelty of the Elmore process consists, therefore, in the intermixture of oil with crushed ore and water, and then separating the oil from the collected minerals by a specially constructed centrifugal separator. As stated already, previous attempts to use oil had been mechanical and commercial failures while the present improvement has not only been fully worked out in detail, but is now established on on a regular commercial scale by the treatment of 50 tons of ore per day at the Glasdir mines, in North Wales, where about 5,000 tons have already been crushed and the concentrates sold to smelters.

"At the Glasdir mines the plant consists of two five-feet Huntington mills, which crush wet to 30 mesh. The pulp flows direct to two sets of three each revolving cylinders, entering the upper one, where it is joined by a small stream of thick mineral oil, and passing out at the lower end of the cylinder, when it drops into a small pointed settler box. The water and ore pass out at the bottom of the settler into the second cylinder, and the oil with its collected mineral flows off the top to the hydro-extractor for separation of the concentrates. In the second cylinder oil is again added, the discharge again passes to a settler, and the pulp from its bottom to the third cylinder for the addition of more oil. The final discharge of the third cylinder goes to a much larger and more perfect settling box to fully float off all the oil. The oil from the three settlers passes to a hydro extractor with a solid basket and projecting flange above. The mineral packs on the inside of the basket, and the oil overflows by the top around the flange, to be pumped again into circulation through the mixing cylinders. When the centrifugal machine is fully charged with packed concentrates it is stopped and these are dropped through a large opening in the bottom of the pan, and are treated to a further draining with addition of hot water in a second centrifugal machine, this one being filled with a perforated basket.

"The ore successfully worked at the Glasdir mine consists of a fine impregnation of iron and copper pyrites in a hard black slate. It contains, on the average, as worked, only about one per cent of copper and one dwt. of gold per ton. An elaborate and expensive concentration mill was erected by a German firm to treat this ore, and it was a complete failure, both mechanically and commercially. The tailings were full of fine float mineral, and the concentrates were imperfectly cleaned. It was following the failure of this concentration mill that the oil process was developed by successive experiment, and having in this case proved the advantages of the method over well known concentration machinery, trials have since been made on a variety of ores from different parts of the world to determine new fields for its application.

"Some copper ores from South Africa which have been very wastefully treated in the past, owing to difficulty in concentration, caused by the presence of magnetite, have been in small tests enriched from 6 per cent to 40 per cent of copper. Another copper ore from Mexico, where the presence of heavy garnets interferes greatly with concentration, has given very promising results by yielding a concentrate of 23 per cent copper from mill tailings. In both these cases the final tailings after the oil process was quite poor. Free gold seems easily caught by the oil even when quite coarse, although there may be no advantage on such material over existing processes. Some of the copper ores from the Mount Lyell district seem well adapted to the treatment, and experiments with telluride ores from Western Australia are being made which appear very promising.

"Generally, it would seem that the process has a future in cases of difficulty by water concentration arising from brittleness or lightness of minerals to be separated, or from heavy gangue accompanying the minerals, such as have spar, magnetite, garnets, rhodonite, etc. It does not seem to matter how finely the mineral breaks; if it is a mere scum on the water surface, contact with the oil in agitating cylinders seems to be insured. Where water is scarce the process has a great advantage, for the rock can be crushed with the minimum quantity for a concentration plant, and by settling can be used over and over again, a little muddiness of the returned water being no disadvantage. In practice it has been found at Glasdir that very little attention is required for the control of the process, that considerable variations in quantity of oil supply and temperature are allowable, and unskilled labor can be made available. The plant is much simpler than that of an ordinary concentration mill, is not expensive to install, is subject to little or no wear or tear, and can be put below any wet crushing machinery. Material as coarse as 20 mesh can be concentrated.

"As regards the cost of treatment, this may be taken as the same as equal in labor to equivalent concentration plant (the cost of crushing is, of course, common to both), plus the cost of oil and any royalty for use of process. The loss of oil has been found to be in Wales, one and one-forth gallons per ton of ore treated, and may be taken as varying according to ore and other conditions between one and two gallons per ton.

"By the Elmore process, at the Gladir mine, between 70 and 80 per cent of the values are saved."

SAYS HE WAS TORTURED.

"I suffered such pain from corns I could hardly walk;" writes H. Robinson, Hillsborough, Ill., "but Bucklen's Arnica Salve completely cured them." Acts like magic on sprains, bruises, cuts, sores, scalds, burns, boils, ulcers Perfect healer of skin diseases and piles. Cure guaranteed by Miller Bros., druggists, 25c.

MUSIC LESSONS

Miss Flesher is prepared to take pupils in piano or organ instructions after the 1st of October. Apply at the home of Mrs. C. Æ. Shaw.

In connection with the Christmas and New Year's holidays the Canadian Pacific railway will put into effect the usual local holiday rates of single fare for the round trip. Passengers can purchase tickets on the following dates: December 22nd, 23rd, 24th and 25th, good to return January 3rd; and on December 29th, 30th, 31st and January 1st, good to return on January 3rd.

NOTICE is hereby given that application will be made to the Legislative Assembly of the Province of British Columbia at its next session for a private bill to incorporate a company to build, equip, maintain and operate a line or lines of railway of standard gauge from a point at or near the junction of the Cold Water and Nicola Rivers, thence following the Cold Water River up stream about 22 miles, thence running easterly through a natural pass from the Cold Water River to the divide to the west fork of the Otter River, thence down the west fork of the Otter river to the main river, thence following the Otter river to its junction with the Tullameen river to Otter Flat, thence following the Tullameen river down stream to its junction with the Similkameen river at or near Princeton, or as an alternative route from the said junction of the Cold Water and Nicola Rivers following the valley of the Nicola river to Nicola lake, thence along the south shore of the said Nicola Lake to Quilchena creek thence following the valley of the Quilchena creek to the divide of One Mile or Graveyard creek, thence down the valley of One Mile or Graveyard creek to Princeton at the junction of the Tullameen and Similkameen rivers aforesaid, thence from Princeton following down the valley of the said Similkameen river to a point west of Osoyoos Lake, thence in an easterly direction to the Osoyoos river, crossing the said river above Osoyoos Lake or at other convenient points, thence in an easterly direction to the divide of Rock creek, thence down one of the tributaries of the Kettle river to the valley of the Kettle river, thence following the Kettle river down stream to the town of Midway, thence from the said town of Midway along the valley of the Boundary creek to the City of Greenwood and from the said City of Greenwood in a southeasterly direction to the City of Grand Forks with power to construct, operate and maintain branch lines to Aspen Grove Camp to the Tullameen River camps and to Copper and Kennedy Mountains and other points and with power to construct operate and maintain all necessary bridges, roads, ways and ferries and to construct, acquire, own and maintain wharves and docks in connection therewith and to construct, own, acquire, equip and maintain steam and other vessels and boats and operate the same on any navigable waters and to construct, operate and maintain telegraph and telephone lines along the routes of said railway and its branches or in connection therewith and to transmit messages for commercial purposes and to collect tolls therefor and to generate electricity and supply light, heat and power and to acquire and receive from any government, corporation or persons grants of land, money, bonuses, privileges or other assistance in aid of the construction of the company's undertaking and to connect with and enter into traffic or other arrangements with railway, steamboat or other companies and for all rights, powers and privileges necessary in or incidental to the premises and for other purposes.

Dated at Vancouver, B. C., this 10th day of November, 1900.

WILSON & SENKLER,
Solicitors for the Applicants.

NOTICE.

Notice is hereby given that application will be made to the Legislative Assembly of the Province of British Columbia at its next session for an act to incorporate a company with power to construct, equip, maintain and operate a single or double line of railway of standard or narrow gauge for the purpose of conveying passengers and freight, from a point on Burrard Inlet at or near the City of Vancouver, thence via the city of New Westminister in an easterly direction along the south side of the valley of the Fraser river to some point on the said Fraser river between the junction of the Chilliwack river with the said Fraser river and the town of Yale, thence in an easterly direction along the valleys of the Chilliwack, Coquhalla, Tulameen and Similkameen rivers or some of them or the tributaries thereof or some of them by the most feasible route to a point between Penticton and the international boundary on the watercourse connecting Okanagan and Osoyoos Lakes thence by the most feasible route to a point on the Kettle river at or near Rock creek, thence by the most feasible route to a point at or near Midway, thence by the most feasible route to a point at or near the City of Grand Forks, with power to construct, equip, maintain, and operate, from any point on the said railway, branches and extensions of the same of not more than thirty miles in length, and roads, bridges, ways, ferries, wharves, docks, and coal bunkers; with power to build, own, equip, operate and maintain steam and other vessels and boats, telegraphs, telephones, and tramway, aerial or otherwise and to carry on a general express business either as separate undertakings or in connection with the said railway and the said branches and extensions; with power to generate electricity for the supply of light, heat and power and dispose of and deal with the same at a profit in any of the districts or localities through which the said railway, branches and extensions pass; with power to expropriate lands for any of the purposes of the company and to acquire lands, bonuses, privileges, or other aids from any government, municipality, or other persons or bodies corporate; with power to construct, equip, acquire, lease, maintain, and operate smelting, reduction, refining, concentrating, or other works for handling and treatment of ores; with power to acquire and operate coal lands and dispose of the proceeds thereof; with power to acquire, construct, and operate hotels; with power to make traffic or other arrangements or amalgamate or connect with any railway, steamboat, or other company, or lease, purchase, or otherwise acquire the assets of any such company; and with power to build wagon roads to be used in the construction of said railway and its extension and branches and in advance of the same and to levy and collect tolls from all parties using and all freight passing over any such roads, or any such aforesaid docks, wharves, railways, ferries, or vessels owned or operated by the company whether built before or after the passage of the act hereby applied for and with all other usual, necessary or incidental rights, powers or privileges as may be necessary or incidental or conducive to the attainment of the above objects or of any of them.

HUNTER & OLIVER,
Solicitors for the Applicant.

BUREAU OF PROVINCIAL INFORMATION

IN ORDER that the Government may be in possession of definate information with which to supply those seeking investments in this Province, I am instructed to invite particulars from those who have properties for sale, and who may feel disposed to forward such particulars to this office for the purpose in question.

In view of the proposed early re-organization of the Agent General's Office in London, England, the desirability of having on file a list of farms and other properties for sale, with full and accurate details, is obvious. Properties submitted may include farms and farm lands, industrial or commercial concerns, timber limits, water powers, or other enterprises affording opportunities for legitimate investment.

It is not proposed to recommend properties to intending investors, but to afford access to the classified lists and all available information connected therewith, and to please enquirers in communication with the owners.

The fullest particulars are desired not only of the properties themselves, but the localities in which they are situated, and the conditions affecting them. For this purpose printed schedules will, upon application, be forwarded to those desirous of making sales.

R. E. GOSNELL,
Secretary, Bureau of Provincial Information.

NOTICE OF FORFEITURE.

To C. A. Peterson, late of Eholt Creek in Yale district

Sir: You are hereby notified that we have expended $100 in labor and improvements upon the "Silent Friend" Mineral Claim, situate in Long Lake camp, formerly Gold Drop Camp, in the Kettle River Mining Division of Yale District in British Columbia, as will appear by a Certificate of Work recorded December 1st, 1899, in the office of the Mining Recorder for the said Kettle River Mining Division, in order to hold said claim under the provisions of Section 24 of the Mineral Act, such being the amount required to hold the said claim for the year ending 10th May, 1900.

And if at the expiration of ninety (90) days of publication of this notice you fail or refuse to contribute your proportion of the expenditure required under said section 24, together with all costs of advertising, your interests in said claim shall become vested in the subscribers (your co-owners) under Section 4 of the "Mineral Act Amendment Act, 1900.

Dated at Greenwood, B. C., this 9th day of November, 1900.

THURSDAY, DECEMBER 20, 1900.

WHERE THE MAJORITY IS.

NOTHING will help to allay the senseless race cry quicker, or at any rate, nothing will destroy its effect so soon, as an understanding of the fact—and it is a fact—that the government's majority is not dependent on Quebec. Even were it so Quebec, has as much right to make her voice heard and her influence felt as any other province, but if Quebec were left out of the calculation altogether, there would still be a Liberal majority. But it must never be forgotten, that the apparent hostile majority in Ontario is entirely due to the Tory gerrymander, for by their own admission the opposition has lost 10,000 on the popular vote since 1895. When a fair redistribution on the basis of the next census is made and it will be made before another election, the fact will be patent to the most casual observer that, when able to give an honest verdict, Ontario is Liberal like every other province in the Dominion.

EDITORIAL NOTES.

MUNICIPAL TAXPAYER draws attention to the condition of the cemetery. The city should see that all the ground set apart for cemetery purposes is properfly fenced.

THE following is taken from a letter of Dr. Jakes, published in the last issue of the Greenwood Miner:

"Furthermore, I may state that the list of names to compose the committee, as published by Mr. Ross, does not correspond with the original list presented to him by the friends of compromise, but reads as amended by him."

The list of names to compose the committee was embodied in a communication signed by Duncan Ross and presented by the friends of compromise to Dr. Jakes. That communication is in Times office and any ratepayer is at liberty to compare it with the list published and he will find that no amendment has been made.

THE CEMETERY.

TO THE EDITOR:—As you are an aspirant for the position of chief magistrate of this city, and apparently very conversant with the duties of the present civic administration, can you kindly inform me, through the columns of your paper, the names of the aldermen who constitute the cemetery comtee. My reason for asking is because I desire to draw their attention to the fact: "That in all common charity" is their duty to see that some protection (in the shape of a log fence at least) should be constructed around that portion of the cemetery in which is supposed to be laid the remains of those unfortunates which the pale of civilization debars the privileges of consecrated rest. I observe in that plot one unfortunate mound under the sod of which rests a fallen woman and over which dogs, cattle and wild beasts may roam at will, and I would suggest, that as the city pays for the service of a caretaker, he be instructed to devote sufficient time to remedy the negligence.

I do not claim to assert that the city is entitled to follow my suggestions, but the Good Book says that "Jesus Christ died to save sinners," and surely the cemetery committee of the city of Greenwood, B. C., can condescend to protect from the devastation of beasts the remains of a poor outcast. MUNICIPAL RATEPAYER.

MUNICIPAL ELECTIONS, 1901.

To the Electors of the Municipality of the City of Greenwood:

LADIES AND GENTLEMEN:—I am a candidate for the office of mayor at the approaching municipal election and respectfully solicit your votes and influence. During the campaign I will have opportunities of explaining my views at length. Briefly stated, I am in favor of the following:

The present state of city finances and the stringency of the money market make it impossible to enunciate a well defined policy of public improvements. An adequate system of waterworks is necessary and also some suitable plan of sewering the city, but these and other improvements must be deferred until the city is in a better financial position. I confidently believe that by the exercise of wise judgment, the finances of the city can be placed upon such a sound footing that necessary public works can be constructed without placing excessive burdens upon the present taxpayers.

The credit of the city must be restored and maintained. Litigation should be avoided and I am in favor of an amicable settlement with those who have just claims against the corporation.

If Greenwood is to occupy the prominence to which she is entitled by natural advantage, the city must be brought into the closest touch with the surrounding mining camps. During 1901 every effort should be made to secure the construction of the tramway without imposing additional burdens on the ratepayers beyond those to which they are already pledged.

The strength of every city, particularly one situated in the heart of a mining district, lies in its workingmen and its future depends upon them. I am in favor of recognizing their claims to proper protection. I believe eight hours should constitute a legal day's work and this principal should be adopted by the municipality. Generally speaking, I am in favor of municipal work being carried on by day labor, but in the event of contract work being necessary, I would insist that contractors should pay the current wage.

I am opposed to the employment of Chinese and the encouragement of Chinese immigration and any power granted to the corporation by the Municipal Clauses Act should be exercised to the fullest extent in restricting their employment in the city.

The mayor's time should be devoted to the work of the city. I am not rich enough to do this without compensation and if elected I will expect a sufficient sum to properly represent the city without loss to myself.

The first of each year, estimates should be prepared giving each section of the city an equitable share of the expenditure and these estimates should be religiously followed.

I am your obedient servant,

DUNCAN ROSS.

BEAVERTON NOTES.

BEAVERTON, Dec. 11.—D. W. Smith, proprietor of the Smith hotel, has gone to Greenwood on a business trip, while J.P. Thomas is looking after the interests of the hotel during his absence.

W. Cookson has returned after spending a couple of weeks in Greenwood. This gentleman has the neatest cabin on the West Fork which goes to show he is a mechanic in every sense of the word.

F. C. Boles is also in Greenwood attending the wedding of his sister-in-law, and will return Saturday with Mrs. Boles who has been visiting friends in that city for a month or more.

Al Cameron, who is proprietor of the hotel at West Bridge, dropped in on us yesterday. This was Mr. Cameron's first visit to Beaverton and he was more than pleased with the townsite and surrounding country. He also visited the Carmi mine and thinks it is one of the finest he ever saw.

Mr. and Mrs. Alex. McKay, father and mother of A. H. McKay, and their grandson, Master Hector Pressley, came in a few days ago from Valley City, N. D. This couple is about 68 years old and rode in over the trail on horse back from West Bridge. They are highly pleased with the country.

We are just informed that the West Fork road is again commenced and a sleigh road will completed to Beaverton. Let the good work go on.

FOR AULD LANG SYNE.

"Should old acquaintance be forgot?" The answer comes mechanically from every Britisher. Nor should new acquaintance be forgot. Remember that on the bloody fields of South Africa your brave soldier boys were on the firing line, flanked by loyal British subjects from Ceylon and India. In the midst of danger, lasting friendships were formed, and you, ladies of Canada, have it in your power to cement those bonds. The green teas of Ceylon and India appeal to you from sentiment. By using them you not only aid your brother colonists, but you get absolutely the best tea. Those of you who drink green Japan teas have a revelation in store if you make the change. Blue Ribbon, Salada and Monsoon packets may be had from your grocer.—Colonist.

TO THE DEAF.

A rich lady cured of her deafness and noises in the head by Dr. Nicholson's artificial ear drums, gave $10,000 to his institute, so that deaf people unable to procure the ear drums may have them free. Address No. 14520C, The Nicholson Institute, 780 Eighth Avenue, New York, U. S. A.

CHURCH NOTICE

A NEW PROCESS

Concentration of Ores by the Use of Oil

FULLY DEALT WITH

In a Paper by Chas. M. Rolker, Well Known Mining Engineer, Who Investigated the Process.

Last week the Times drew attention to a new process of concentration by oil. Through the courtesy of Mr. A. L. McEwen, a mining engineer well known here, but at present in Sumpter, Ore., we publish an article recently published in the Mining Journal. The Journal says:

"A paper on this subject was recently read before the Institute of Mining and Metallurgy in London by Mr. Chas. M. Rolker, a well known mining engineer, who has been engaged by an influential mining firm to report on the Elmore concentration process as in use at the Glasdir mines, North Wales. On the report of Mr. Rolker, a small company was formed, called the Ore Concentration Syndicate, Limited, of 4 Bishopgate street, (within) London, E. C., for the purpose of continuing experiments with various classes of ores and introducing the process, where adaptable, into actual operation. The following facts will interest a great many mining men as opening a new method of treatment to certain ores which yield unsatisfactory results by ordinary concentration machinery.

"The process is based on a very curious property of oil and greasy substances of attaching themselves to metallic and bright mineral surfaces in preference to rocky or earthy ones. Experiments and some resulting patents have shown that thin oils will float off metallic surface minerals from a crushed rock containing them, but it was found impossible either by dry, damp, or wet treatment of such ores to prevent an impracticable waste of oil by its attachment to the waste largely, as well as the concentrates. A step in another direction was made at the De Beers diamond mines, where thick grease is used on a shaking inclined surface, over which the broken rock passes, and to which any diamonds present attach themselves and are picked off at intervals.

"Mr. Elmore hit on the idea of mechanically mixing a thick residual oil with a flowing stream of pulp from a stamp battery or other wet pulverizer. He found by experiment that the use of a helical trough within a revolving cylinder furnished with baffle plates at intervals, produced so thorough an agitation of oil and water as to insure contact between the oil and minerals to which it is capable of attachment. Experiments on the length of cylinder necessary to get a high extraction then led to the adoption of three cylinders, one above the other, driven by worm gearing. After trying many methods of separating the oil from its collected minerals, it was found that this could be done most perfectly by a centrifugal hydro extractor, which yields the concentrates in an almost dry condition, and returns the oil free from mineral, to re-circulate in the cylinders. The novelty of the Elmore process consists, therefore, in the intermixture of oil with crushed ore and water, and then separating the oil from the collected minerals by a specially constructed centrifugal separator. As stated already, previous attempts to use oil had been mechanical and commercial failures while the present improvement has not only been fully worked out in detail, but is now established on on a regular commercial scale by the treatment of 50 tons of ore per day at the Glasdir mines, in North Wales, where about 5,000 tons have already been crushed and the concentrates sold to smelters.

"At the Glasdir mines the plant consists of two five-feet Huntington mills, which crush wet to 30 mesh. The pulp flows direct to two sets of three each revolving cylinders, entering the upper one, where it is joined by a small stream of thick mineral oil, and passing out at the lower end of the cylinder, when it drops into a small pointed settler box. The water and ore pass out at the bottom of the settler into the second cylinder, and the oil with its collected mineral flows off the top to the hydro-extractor for separation of the concentrates. In the second cylinder oil is again added, the discharge again passes to a settler, and the pulp from its bottom to the third cylinder for the addition of more oil. The final discharge of the third cylinder goes to a much larger and more perfect settling box to fully float off all the oil. The oil from the three settlers passes to a hydro extractor with a solid basket and projecting flange above. The mineral packs on the inside of the basket, and the oil overflows by the top arouud the flange, to be pumped again into circulation through the mixing cylinders. When the centrifugal machine is fully charged with packed concentrates it is stopped and these are dropped through a large opening in the bottom of the pan, and are treated to a further draining with addition of hot water in a second centrifugal machine, this one being filled with a perforated basket.

"The ore successfully worked at the Glasdir mine consists of a fine impregnation of iron and copper pyrites in a hard black slate. It contains, on the average, as worked, only about one per cent of copper and one dwt. of gold per ton. An elaborate and expensive concentration mill was erected by a German firm to treat this ore, and it was a complete failure, both mechanically and commercially. The tailings were full of fine float mineral, and the concentrates were imperfectly cleaned. It was following the failure of this concentration mill that the oil process was developed by successive experiment, and having in this case proved the advantages of the method over well known concentration machinery, trials have since been made on a variety of ores from different parts of the world to determine new fields for its application.

"Some copper ores from South Africa which have been very wastefully treated in the past, owing to difficulty in concentration, caused by the presence of magnetite, have been in small tests enriched from 6 per cent to 40 per cent of copper. Another copper ore from Mexico, where the presence of heavy garnets interferes greatly with concentration, has given very promising results by yielding a concentrate of 23 per cent copper from mill tailings. In both these cases the final tailings after the oil process was quite poor. Free gold seems easily caught by the oil even when quite coarse, although there may be no advantage on such material over existing processes. Some of the copper ores from the Mount Lyell district seem well adapted to the treatment, and experiments with telluride ores from Western Australia are being made which appear very promising.

"Generally, it would seem that the process has a future in cases of difficulty by water concentration arising from brittleness or lightness of minerals to be separated, or from heavy gangue accompanying the minerals, such as have spar, magnetite, garnets, rhodonite, etc. It does not seem to matter how finely the mineral breaks; if it is a mere scum on the water surface, contact with the oil in agitating cylinders seems to be insured. Where water is scarce the process has a great advantage, for the rock can be crushed with the minimum quantity for a concentration plant, and by settling can be used over and over again, a little muddiness of the returned water being no disadvantage. In practice it has been found at Glasdir that very little attention is required for the control of the process, that considerable variations in quantity of oil supply and temperature are allowable, and unskilled labor can be made available. The plant is much simpler than that of an ordinary concentration mill, is not expensive to install, is subject to little or no wear or tear, and can be put below any wet crushing machinery. Material as coarse as 20 mesh can be concentrated.

"As regards the cost of treatment, this may be taken as the same as equal in labor to equivalent concentration plant (the cost of crushing is, of course, common to both), plus the cost of oil and any royalty for use of process. The loss of oil has been found to be in Wales, one and one-forth gallons per ton of ore treated, and may be taken as varying according to ore and other conditions between one and two gallons per ton.

"By the Elmore process, at the Gladir mine, between 70 and 80 per cent of the values are saved."

SAYS HE WAS TORTURED.

"I suffered such pain from corns I could hardly walk;" writes H. Robinson, Hillsborough, Ill., "but Bucklen's Arnica Salve completely cured them." Acts like magic on sprains, bruises' cuts, sores, scalds, burns, boils, ulcers Perfect healer of skin diseases and piles. Cure guaranteed by Miller Bros., druggists, 25c.

MUSIC LESSONS

Miss Flesher is prepared to take pupils in piano or organ instructions after the 1st of October. Apply at the home of Mrs. C. Æ. Shaw.

In connection with the Christmas and New Year's holidays the Canadian Pacific railway will put into effect the usual local holiday rates of single fare for the round trip. Passengers can purchase tickets on the following dates: December 22nd, 23rd, 24th and 25th, good to return January 3rd; and on December 29th, 30th, 31st and January 1st, good to return on January 3rd.

Solicitors for the Applicants.

NOTICE.

Notice is hereby given that application will be made to the Legislative Assembly of the Province of British Columbia at its next session for an act to incorporate a company with power to construct, equip, maintain and operate a single or double line of railway of standard or narrow gauge for the purpose of conveying passengers and freight, from a point on Burrard Inlet at or near the City of Vancouver, thence via the city of New Westminister in an easterly direction along the south side of the valley of the Fraser river to some point on the said Fraser river between the junction of the Chilliwack river with the said Fraser river and the town of Yale, thence in an easterly direction along the valleys of the Chilliwack, Coquhalla, Tulameen and Similkameen rivers or some of them or the tributaries thereof or some of them by the most feasible route to a point between Penticton and the international boundary on the watercourse connecting Okanagan and Osoyoos Lakes thence by the most feasible route to a point on the Kettle river at or near Rock creek, thence by the most feasible route to a point at or near Midway, thence by the most feasible route to a point at or near the City of Grand Forks, with power to construct, equip, maintain, and operate, from any point on the said railway, branches and extensions of the same of not more than thirty miles in length, and roads, bridges, ways, ferries, wharves, docks, and coal bunkers; with power to build, own, equip, operate and maintain steam and other vessels and boats, telegraphs, telephones, and tramway, aerial or otherwise and to carry on a general express business either as separate undertakings or in connection with the said railway and the said branches and extensions; with power to generate electricity for the supply of light, heat and power and dispose of and deal with the same at a profit in any of the districts or localities through which the said railway, branches and extensions pass; with power to expropriate lands for any of the purposes of the company and to acquire lands, bonuses, privileges, or other aids from any government, municipality, or other persons or bodies corporate; with power to construct, equip, acquire, lease, maintain, and operate smelting, reduction, refining, concentrating, or other works for handling and treatment of ores; with power to acquire and operate coal lands and dispose of the proceeds thereof; with power to acquire, construct, and operate hotels; with power to make traffic or other arrangements or amalgamate or connect with any railway, steamboat, or other company, or lease, purchase, or otherwise acquire the assets of any such company; and with power to build wagon roads to be used in the construction of said railway and its extension and branches and in advance of the same and to levy and collect tolls from all parties using and all freight passing over any such roads, or any such aforesaid docks, wharves, railways, ferries, or vessels owned or operated by the company whether built before or after the passage of the act hereby applied for and with all other usual, necessary or incidental rights, powers or privileges as may be necessary or incidental or conducive to the attainment of the above objects or of any of them.

HUNTER & OLIVER,
Solicitors for the Applicant.

BUREAU OF PROVINCIAL INFORMATION

IN ORDER that the Government may be in possession of definate information with which to supply those seeking investments in this Province, I am instructed to invite particulars from those who have properties for sale, and who may feel disposed to forward such particulars to this office for the purpose in question.

In view of the proposed early re-organization of the Agent General's Office in London, England, the desirability of having on file a list of farms and other properties for sale, with full and accurate details, is obvious. Properties submitted may include farms and farm lands, industrial or commercial concerns, timber limits, water powers, or other enterprises affording opportunities for legitimate investment.

It is not proposed to recommend properties to intending investors, but to afford access to the classified lists and all available information connected therewith, and to please enquirers in communication with the owners.

The fullest particulars are desired not only of the properties themselves, but the localities in which they are situated, and the conditions affecting them. For this purpose printed schedules will, upon application, be forwarded to those desirous of making sales.

R. E. GOSNELL,
Secretary, Bureau of Provincial Information.

NOTICE OF FORFEITURE.

To C. A. Peterson, late of Eholt Creek in Yale district

Sir: You are hereby notified that we have expended $100 in labor and improvements upon the "Silent Friend" Mineral Claim, situate in Long Lake camp, formerly Gold Drop Camp, in the Kettle River Mining Division of Yale District in British Columbia, as will appear by a Certificate of Work recorded December 1st, 1899, in the office of the Mining Recorder for the said Kettle River Mining Division, in order to hold said claim under the provisions of Section 24 of the Mineral Act, such being the amount required to hold the said claim for the year ending 10th May, 1900.

And if at the expiration of ninety (90) days of publication of this notice you fail or refuse to contribute your proportion of the expenditure required under said section 24, together with all costs of advertising, your interests in said claim shall become vested in the subscribers (your co-owners) under Section 4 of the "Mineral Act Amendment Act, 1900.

Dated at Greenwood, B. C., this 9th day of November, 1900.

THOMAS McDONNELL,
SPENCER BENERMAN,
JOSEPH A. FRANK,
HALLETT & SHAW, Solicitors.

All kinds of Taxidermist work done by T. B. Winnett, Silver street. tf

J. S. Harrison, deputy mining recorder at Westbridge, has gone on a visit to his old home in New Brunswick.

Sixty-five dollars will buy a good pipe tone organ. Greenwood Music Store.

J. C. Clute, inspector of customs, and C. E. Renouf who is collector of customs at Dawson, was in the city this week inspecting the local customs office

Have you called on Sprott & Macpherson in their new stand in the Wallace-Miller block, Copper street.

J. H. Wilbur, on the road for Samuel May & Co., the leading billard manufacturing concern in Canada, was in the city this week. While here he refitted the pool table in the Armstrong hotel.

Come early and select your Xmas cards and calenders at Coles' book store.

Camp McKinney was represented in the city the past week by the following, who made the Imperial hotel their headquarters while here: J. J. Kingsmill. Charles H. Flood; Henry Nicholson and Donald A. Ross.

The best fresh candy, fruits of all kinds, smokers' supplies at Watson's, Copper street.

The Ladies' Aid of the Methodist church will give a big old fashioned Grandmas Xmas spread in the dining hall of Mrs. Larkin's new building, Copper street, on Christmas day. The dinner will be served from 12 o'clock noon to 7:30 p. m.

Magic lanterns, toys, sleighs, etc., at Coles' book store.

Father J. A. Bedard, O. M. I., the new pastor of the Catholic church, was accorded a warm welcome by his congregation last Sunday after the morning service when he was made acquainted with the members.

Dr. Mathison, dentist, over Bank of Commerce. Both 'phones.

P. E. Seelye, of Spokane, representing the Alexander-Dalley syndicate of mining investors who are heavily interested in copper properties around Houghton, Mich., was here last week on his way to the Similkameen to examine copper claims.

Large collection of sheet music at 5, 10 and 15 cents. Greenwood Music Store.

Among the social events during the month will be a masquerade dance to be given by the ladies of the Skookum Tillicum Quadrille club on the evening of the 28th inst. The affair will be held in the dining room of the new Windsor hotel.

R. Smailes returned last week from the coast. Mrs. Smailes, who was ill all summer, had a successful operation performed at the St. Joseph's hospital, Victoria, and since then is rapidly recovering.

A.A. Crowston's stores, Government street, for groceries, provisions, produce. Headquarters for green fruits. tf

For fine sleighs or cutters call at Winnett's carriage works, Silver street.

Thos. Pascoe, one of the pioneers of Boundary, returned this week from England. Mr. Pascoe received the congratulations of his many friends as he was accompanied by his wife whom he married in the old country. They will reside in the city.

Don't forget the South End Grocery store when buying fruit and groceries. Wm. Graham proprietor. tf

Leather portfolios, purses, and all the poets in elegant bindings at Coles' book store.

G. Arthur Rendell, the popular Eholt merchant, was injured while driving home from the B. C. mine last week. In the dark his team ran against a wire line and the sudden stop threw Mr. Rendell out over the dashboard. His face was badly bruised but he is rapidly recovering.

Nothing better for a Xmas present than a Waterman Ideal fountain pen. (Your money back if not satisfactory.) Can be procured Coles' book store.

Sprott & Macpherson wishes their many patrons a merry Xmas and a happy New Year.

One of the neatest and best arranged establishments in the city for Xmas trade is that of G. F. Williams, Copper street. There are many of these dainty and also useful articles that are so suitable for Xmas presents. In the millinery department Miss McDermott has a great variety of the very latest fashions.

Nitrous oxide and oxygen for painless extraction of teeth at Dr. Mathison's. tf

It will pay you to visit Coles' book store if you are looking for Xmas presents.

At the Swayne house Saturday evening last, Rev. B. H. Balderston united in marriage Henry Johnston and Miss Dora Palmer. Mr. Johnston is a trusted employe at Cameron's blacksmith shop and also a member of the Greenwood fire department.

Fancy chinaware at prices within reach of everybody at Coles' book store.

FOR SALE—A safe. Apply G. R. Naden.

All members of the Ross campaign committee are requested to be present in the committee rooms next Tuesday evening. Friends of good municipal government cordially invited.

J. J. Caulfield, Chairman. T. B. Winnett, Secretary

We still have a few nice Xmas novelties left and would be pleased to show them to you. Yours very truly, Sprott & Macpherson.

A splendid view of Greenwood at 15c, two for 25c, at Coles' book store.

Richard McArthur and his mother are visiting C. J. McArthur and J. J. Caulfield. Mr. McArthur is a pioneer of the Yukon and s pent last summer at Nome to which district he will return next summer. He is a magnificent specimen of manhood—one of the best type of those hardy argonauts who braved the trials in the northern country for the yellow metal.

For fine trade nothing equals Health Brand Underwear.—Rendell & Co.

A splendid line of children's books at Coles' book store.

The first meeting of the Board of License Commissioners appointed under the Liquor License Act, 1900, was held at Grand Forks on Saturday 15th inst. There were present Commissionsrs E. Jacobs, Greenwood, (chairman); H. Cannon, Grand Forks; W. B. Townsend, Rossland; Chief License Inspector, I. A. Dinsmore, and License Inspector D. J. Darraugh. There were in all 45 applications for licenses, of these 33 renewals, seven licenses for houses previously licensed to other applicants, and four for new houses were granted.

FOR RENT—Unfurnished rooms very cheap. See Smith & McRae.

ON THE FIRING LINE.

Ladies of Canada:

Side by side stood Canada's noble sons with the best brawn of Ceylon and India in the recent unpleasantness. The slogan was "help one another," and no one forgot the watchword. You, ladies of Canada, have the power to wage a relentless warfare on the impure teas that come into your homes from China and Japan, and at the same time assist your brother colonists who produce the pure Ceylon and India teas. If you drink Japan tea, try Salada, Monsoon or Blue Ribbon packets of Ceylon and India green teas.—Colonist.

FOR SALE—Household furniture, including two bed-room sets, carpets, etc. Apply Greenwood Steam Laundry.

FOOD CHANGED TO POISON.

Putrefying food in the intestines produces effects like those of arsenic, but Dr. King's New Life Pills expel the poisons from clogged bowels, gently, easily but surely, curing constipation, biliousness, sick headache, fevers, all liver, kidney and bowel troubles. Only 25c at Miller Bros.

WANTED—A furnished house of five rooms. Address K. L., this office.
