KNOB HILL

UNIQUE ORE QUARRIES ON THE BIG MINING PROPERTY.

CAPABLE OF GIVING

Enormous Tonnage of Ore—Description of Underground Workings of Granby Mines.

It is almost impossible for any one who has not visited and seen for himself the big open cuts at the Knob Hill mine to form an adequate idea of the extent and astonishing productiveness of these unique ore quarries. Even those who from time to time have seen them can scarcely realize the enormous tonnage of ore they are capable of giving. Seen from above they do not impress the visitor today to anything like the extent they will do after the big cut now being made from the level of the Knob Hill railway spur shall have, some time hence, been advanced into the hill and so give a face of ore, the like of which it may be confidently asserted, is not now to be found anywhere else in Canada, and is not likely to be for a long while. It will be two or three years, in all probability before this open cut or quarry will have a face the full depth available, for the distance from the starting place of the new working, below the big dump of ore taken out in running the long tunnel into the Knob Hill, back to the most southerly face of the quarry, may be roughly stated at about 800 or 900 feet. From the highest point of the present rock-face down to where the ore is now shot down the inclined shafts to the main tunnel below is about 60 feet, and these shafts are 150 feet on the incline, so that from the top of the rock-face referred to down to the tunnel level is somewhere about 200 feet vertical depth. Then the railway track level is about 30 feet lower still, so there is a good margin allowed in these approximated depths when the vertical height of ore that will be available above the railway track level is stated at 200 feet. As to its width, well that can only be surmised by the writer, in the absence of an opening right across it, but it is surely more than enough for the present to state that the prospective surface workings of the Knob Hill mine give an available mass of ore wide enough for a railway track and room for a steam shovel to work on each side to load the ore cars, and with an eventual vertical face of 200 feet of ore. Now this will read like fiction, but the rock and the gradually extending workings are there to be seen by anyone and everyone, the only condition being that no one will attempt to take away the whole "shooting match" in his pocket. In all seriousness, the sight is the most impressive in connection with the mining industry to be seen in the Boundary. Nor is this all, for it must be kept in mind that the level of the Knob Hill tunnel, which is taken as the base of the above picture, is above the collar of the shaft of the adjoining mines, which have large stopes opened at a a level 200 feet still lower, that is to say that were the 200-foot level of the Victoria and Old Ironsides run far enough south to come vertically under the farthest south open ore face on the Knob Hill it would give a depth approximately of between 400 and 500 feet of ore,—it may be deeper. And since the width is not even hinted at here except to now state that it is very wide, it may be claimed in all reasonableness that in describing this mass of ore as "enormous" there is no exaggeration nor the possibility of misleading. There is this further remark to make—the limit of depth is by no means reached, for time and much more work alone will tell how deep the ore goes. So it is that those who think word pictures such as this is are untrue and not warranted by the conditions that exist are simply unable to conceive the extent of the mineral resources of this single group of Boundary mines and need nothing short of ocular demonstration to convince them that it is their limited powers of conception rather than the writer's imagination that is at fault. As to the value—well it must be taken for granted that since the Granby company is still, as it has been doing for months, sending to the smelter without preliminary sorting the whole of the rock broken down in this extensive quarry, it contains sufficient value to make its extraction and treatment a source of profit, else would the management have ere now ceased hauling it for nix.

The underground workings of the Granby mines form too big a subject for more than passing mention in a notice giving the impressions of a visit of only an hour or so's duration, so nothing in the direction of a description of them will be attempted just now. It may be stated that about the surface of the group many evidences of substantial progress are to be seen. A commencement has been made to sink what will eventually be a five-compartment shaft—the main working shaft of the group. A 5x5 Bacon hoist was this week placed in position for doing such preliminary work as hoisting rock and lowering timbers for the time being in sinking this shaft. A more important addition addltion to the mines' plant is the timber-framing machine which should by this time be in operation, its installation having been practically completed when the mines were visited early this week. It is a single end timber framer complete with wedge sawing machine and having a swinging cut-off saw. It is driven by a 45-horse power Meyers cut-off engine which, together with all shafting, pulleys, etc., was manufactured by the Jenckes Machine company, which supplied the whole plant. The timber framer and carriage were made by the Denver Engineering Works and obtained by the Jenckes people from the manufacturers. This new plant is housed in a well-built sawn lumber building, the engine being bedded on a solid rock foundation underneath and the framer on the floor above. A railway track has been run along the front of the building and alongside a strong skidway on which the timbers will be landed and rolled down to the carriage at the lower side whence they will be run on a tram to the framer.

The mines are maintaining a comparatively large output, occasionally sending 1,000 tons a day to the smelter. It is evident that a larger daily output can be kept up whenever the smelter shall be in shape to treat it.

There was something of a jubilation at the Greenwood smelter last Sunday to celebrate the conclusion of the first six months' run of the furnace. Of course there was no stoppage of smelting operations, but the boys found time to put away a couple of kegs of beer.

Take your prescriptions to the Windsor Drug Store, W. E. Anderson, Greenwood.

THE OLD FLAG

PATRIOTIC GATHERING AT MOTHER LODE MINE ON SUNDAY.

BRITISH ENSIGN HOISTED

On Flag Staff at the Mine—Patriotic Speeches by Jno. A. Macdonald and Others.

An interesting gathering toook place at the Mother Lode mine last Sunday evening in connection with the hoisting for the first time of a large new British ensign some of the patriotic workers at the mine had purchased for display on all suitable occasions. These enthusiastic supporters of our country's flag were not content with the small flag that had hitherto been flown from the mine flag-staff on holidays and at such other times as called for a display of bunting, so they decided to purchase, by subscription among themselves, a flag the size of which would better accord with their desires to do honor to the colors of the land of their birth or adoption. Lately a flag, of bunting, 9 feet by 18 feet was received and it was arranged to mark the occasion of its first flying on the mine flagstaff by some little ceremony. Accordingly Mr. Frederic Keffer, general manager of the British Columbia Copper company, and Mrs. Keffer, were invited to be present on the auspicious occasion, and with them went Miss Keffer, of Cleveland, Ohio, who is at present the guest of her brother and Mrs. Keffer. Mr. R. H. Hutchens, mine superintendent, and Mrs. Hutchens, were also guests of "the boys." The only press representative present was Master Robert Keffer editor, printer, publisher and general factotum of the Anaconda News, consequently that diminutive publication secured a "scoop" much to the delight of its youthful proprietor. However, the Times has succeeded in obtaining particulars of the proceedings, as follows:

At half past seven o'clock on the evening above mentioned, between 100 and 200 persons assembled around the flag-staff, in front of the mine dining hall, to take either an active or passive part in the programme that had been arranged (by request) by John A. Macdonald, formerly of Toronto, but for some time past a resident in Fredericton, which is the designation of the village at the mine. Mr. Macdonald is somewhat of a genius in the direction of speech-making and on this occasion this poetical orator, who at every suitable opportunity delights the boys with his flow of words, had carte blanche to indulge his fancy and exercise his pleasing faculties, and it must be said, in common justice to him, that he succeeded admirably, rising to the occasion and infusing a patriotic enthusiasm into the proceedings that added greatly to their impressiveness and importance. His opening oration was distinctly appropriate and interesting, treating of (1) The Flag—its uses; (2) The Flags of the Children of Israel when they left Egypt; (3) The Flag of Old Rome—Spor, the meaning; the Senate and people of Rome; (Here he recited "It's Only an Old Bit of Bunting;") (4) The Color Sergeant at Televera who, mortally wounded, rolled himself up in the flag and then died: (5) The Brazilian railway engineer-in-chief at the time of the revolution, when the armed bands came to the camps they ited the British flag; (Another recita on, "The Flag We Have Learned to Love;") (7) Johnson's narrow escape in Cuba, when the British flag saved him; and (7) The blowing up of the gates of Cashmeer.

The oration concluded, the flag was hoisted. In the words of one who was an active participator in the proceedings, "As the grand old emblem rose slowly up the pole more than a hundred voices joined in the sweet strains of 'Rule Britannia,' and as it reached the mizzen peak and spread itself out languidly on the quiet evening air three rousing cheers and a 'tiger' were given for the emblem of liberty."

Continuing, the enthusiastic scribe tells of the after proceedings as follows: The joyous crowd then adjourned to the Mother Lode hall where a sumptous repast was spread. For over an hour busy tongues played an accompaniment to the plying of knives and forks. Then the chairman, Mr. Macdonald, rose to order and the business of drinking toasts began. Toast No. 1, "The King," with one verse of the National Anthem, was responded to by J. A. Crawford. No. 2, "The President of the United States," by Mr. Keffer. No. 3, "The object of our gathering," by J. A. McKinnon, who for nearly twenty minutes entertained his hearers with his sparkling wit. No. 4, "The Union Jack and the Stars and Stripes," by B. McIntyre. No. 5, "The social aspect of our gathering," by Mr. Burt. No. 6, "The cherishing of our National Sentiment," by A. H. F. Meyer. No. 7, "Our Mining Industries," by Mr. Hutchens; and last, but not least, the eighth on the list, "The Ladies," responded to by Messrs. Wilson, McCelland, Sophie and Graham. These four young gentlemen handled their subject in a manner which showed plainly where their hearts were. A few words spoken by Mrs. Keffer in that lady's usual kind manner were much appreciated by her audience as were also the addresses of one or two other ladies present. At eleven o'clock the happy company, after singing the National Anthem, dispersed. As they wended their way homeward under the brilliant arc lights, Britain's Ensign, which still hung at the top of the staff, bent gracefully downward as if it would fain embrace all who passed beneath its drooping folds.

SMELTER CLOSED

To Make Necessary Repairs After a Splendid Record.

After a most successful run of six months it has been found necessary to shut down for a few days the blast furnace at the British Columbia Copper company's smelter, at Greenwood, so as to allow of the brickwork forming the upper part of the furnace being renewed, the bricks being so afiected by the continuous heat as to have made their replacement imperative. The furnace was blown out yesterday afternoon and today bricklayers commenced to make the requisite renewals.

It is claimed for this single furnace that it has made the best record, as regaads daily average tonnage of ore treated, known in the history of copper smelting. During five months to July 31st its average of ore treated was 371 tons a day. Latterly the average has been materially increased, that for the month of July having been 385 tons per day.

The closing down of the smelter has involved a similar temporary suspension of work at the Mother Lode mine, where all the men directly engaged in stoping and raising ore have also been laid off. The mine ore bins are all filled, as too, are most of those at the smelter, where there is now only room for the ore that is coming in daily from from the B. C. mine, in which shipments there will not be any interruption. A few men are still employed at timbering and other mine work requiring to be done. It is definitely promised that work will be resumed next Wednesday or Thuasday. Meanwhile the repairs at the smelter will be executed as expeditiously as possible, and it is intended to blow in the furnace again on Thursday, or earlier if practicable.

The erection of the second furnace, already arranged for, will in the future obviate the necessity for a similar total suspension, even for a like brief period, of ore-reduction works, for with two furnaces repairs, when necessary, can be made to one whilst the other continues in operation.

J. R. Brown, of McLeod & Brown, barristers, Greenwood, returned to the city on last Wednesday night's train, after an absence in the east of about seven weeks. Before returning Mr. Brown spent a short time at the Pan-American Exposition, Buffalo, where he was much impressed with the value of Ontario's exhibit as an effective advertisement of the resources, especially agricultural and mineral, of that enterprising province.

Mail orders promptly filled—Anderson's drug store.

BEAVERDELL

RENDELL AND BEAVERTON ON WEST FORK AMALGAMATED

BY JOINT STOCK COMPANY

Townsite Owners Decide to Build One Good Town on West Fork—A Promising Outlook.

It is now Beaverdell. There is no more Beaverton or Rendell. The two towns of the West Fork country whose proximity to each other threatened to endanger the future of both have been amalgamated in name and in fact. Beaverdell is, as will be noticed, a union of the first part of Beaverton and the last of Rendell. The combination does not strike one as being as good as either Beaverton or Rendell, but a town has grown to greatness handicapped by a worse name than Beaverdell.

The amalgamation assures a flourishing centre on the West Fork if the country is going to amount to anything and all the signs in a mining district are valueless or the West Fork is going to become one of the most important mining sections of the province.

A company has been incorporated under the name of the Beaverdell Townsite company, limited, to take over all the land owned by the Rendell townsite, the Wheatley pre-emption and Mrs. Thompson's pre-emption or the townsite of Beaverton. All the land has been Crown granted. There is about 700 acres available for townsite purposes. The confluence of Beaver creek with the West Fork is the natural point for a town. With the different townsite companies united in building up one town, the prospects for Beaverdell are very bright.

R. Kerr Houlgate, of Vancouver, and C. G. Honge, of Nelson, came in last Saturday night, in connection with the recent deal under which the lines of the Columbia Telephone company pass into fresh hands. On the face of it the business has the appearance of the Vernon and Nelson Telephone company having acquired the opposition company's telephone system, but the above-mentioned gentlemen are very particular to inform people that such is not the case. It matters little to the public of the Boundary district who has control of the Columbia system, but what residents are interested in is whether there will be a monoply or not. They must have faith, though, in the assurances given, until they see whether G. C. Hodge, as district manager for the Vernon & Nelson company will compete very keenly with G. C. Hodge, as district manager for the Columbia Telephone company's successors. Meanwhile, as an earnest of the genuineness of the competition, an advance in telephone rents may be looked for.

A belated individual of the male persuasion who had to tramp into Eholt from Summit camp one night recently insists upon it that there must be mermaids on or in Loon lake. Just after nine o'clock, as he was passing the lake the merry laughter of two girls could be heard coming from out on the water. The night was dark and atmosphere was thick with the smoke from smouldering bush fires, so that the weary wanderer was unable to have the evidence of his sense of hearing confirmed by his sence of sight. He is, however, very positive that the voices and laughter were those of females, and, too, he heard what he took to be the swish of their tails—all the pictures of mermaids he had seen depicted them with flowing hair and tails—as they sportively played about in the water Some otner fellow, who has neither sentiment not imagination says that it was only two girls from the B. C. mine boarding house who were being paddled about on the lake in an old punt by one of the lads from the mine, but the benighted pedestrain is still sceptical, favoring his mermaid theory.

AN INJUNCTION

APPLIED FOR BECAUSE IT WAS ALLEGED A GREENWOOD COMPANY

WAS MAKING TOO MUCH

Wallace-Miller Company, Ltd., Defendants and W P. George, Plaintiff, in Unique Suit.

Greenwood got a free advertisement in Vancouver last week when W. P. George unsuccessfully applied for an interium injunction and the appointment of a receiver to take charge of the business now carried on in Nelson and Greenwood by the Wallace-Miller company, limited. According to the Vancouver Province, the plaintiff claimed that the defendants induced him to buy into the Wallace - Miller company two years ago, by falsely representing their assets as larger than they really were, and that since he became a shareholder there had been no audit of the affairs of the company and no representation of what the profits have been. The business has been enormously profitable, he alleges, though only a much smaller sum than has been made has been divided, and he claims he has not had a share to which he should have been entitled.

He states that he was induced to pay the sum he did to enter the company by the representation that the capital of the company had been increased by regular profits from about $3,000 to $27,000. He states, and in this Mr. Taylor, who represents Mr. George, quoted an affidavit of a Mr. Melville, an accountant, that since then the company made profits of $12,000, plus $3,000 from rents, at the Greenwood branch alone, as well as large profits in Nelson. Of the combined sums, however, only $15,000 has been divided as profits, or at least he has only had a share of that sum.

The defendants state that the facts as represented to the plaintiff at the time of his entrance to the company were absolutely true. There was no misrepresentation whatever, and the plaintiff could have satisfied himself thereof at any time.

In regard to the audit, defendants state that the audit was never asked for. That lately by meeting of the company an auditor was appointed and his report is at hand and ready for inspection. They oppose the application for a receiver.

After a long argument by Mr. Taylor and W. A. Macdonald who represented the company, the injunction and receiver were refused.

Go to Anderson's pharmacy for drugs, toilet, articles, sponges, soaps, perfumes, etc., Greenwood.

KETTLE RIVER POWER.

A despatch from Cascade City advises receipt of the plans of the power house the Kettle River Power company intends erecting there in connection with its electrical power enterprise. The building will be 225 feet in length and will be constructed of brick. It is announced that the work of erection will be commenced without further delay. The Yale-Columbia Lumber company, which has the contract for supplying and distributing the poles for the transmission lines, completed last Tuesday the distribution of the poles between Coryell's ranch, near Columbia, and Phoenix. Distribution along about five miles of the right-of-way immediately west of Cascade will now take place, and the remaining section, the route of which is across the cultivated fields of a number of ranches, will have attention soon after the crops now growing on them shall have been harvested. In all some 2,500 poles will be required for the transmission line between the power house at Cascade and the mines at Phoenix. The poles are about 32 feet in length and nine inches in thickness at the small end, and have been cut in the district.

LAST WEEK'S FIRES.

The forest fires that were burning in several different parts of the district last week destroyed much timber that would otherwise have remained available for mine purposes. Between Hartford Junction and Summit camp a comparatively large extent of country has been fire-swept. Near the Rawhide and Snowshoe mines much trouble was experienced in beating out the flames. The site of what was Stout's saw-mill, near Snmmit City, was too near fire to be safe, but the plant and lumber were removed, so that no damage resulted to them. These were sold to the Yale-Columbia Lumber company, which took the mill plant to Cascade and hauled all the sawn lumber to the railway at the Denoro townsite for shipment by rail when sold to users. Last Friday night S. F. Parish manager, and others at the B. C. mine, had an anxious time, for fire almost surrounded the mine and at times threatened to destroy some of the buildings. As it was some outbuildings caught and two large sows were roasted alive. They were got out of their shelter shed once but made their way back and by this time the place was too hot for a second rescue to be made. A lot of young porkers were kept out of the way of the flames. Two men employed at the mine were scorched when walking towards Eholt. Finding the fire ahead too hot to admit of their getting through they turned back and in making their way along the road towards the mine had the skin of their hands and faces scorched to such an extent as to make it necessary for them to come to Greenwood for surgical attention. Fortunately their injuries were only skin deep, so that no permanent disfigurement is likely to result. As the whole side of the mountain near Eholt meadow was burning fiercely Mr. Ehrlich sent up men to load a lot of hides on a railway car and had the car hauled away, to prevent loss of their value in case the fire caught Burns & Co's. slaughter house premises. He also sent in a force pump and 100 feet of hose and kept the buildings wet whilst the risk of their being ignited lasted. In other parts of the district fires occured, but on the whole there was little damage reported other than that to standing timber. A thunder storm on Tuesday checked the fires in some places but the rain was not general enough to extinguish all of them. With the cooler weather that followed, though, it is probable that the remaining fires will burn themselves out and so put an end to the risk of further destruction from this source this season.

Dont forget to go to the South End Grocery for fresh eggs, good spuds, good mocha and java coffee, good tea and fresh groceries.

THE CENSUS.

First Official Bulletin Issued by the Census Bureau.

The first official bulletin issued gives the population of the Dominion at 5,338,883, increase of 505,644 over the census of 1891.

The population of the provinces is as follows:

	1891	1901
British Columbia	98,173	190,000
Manitoba	152,506	246,464
New Brunswick	321,263	331,093
Nova Scotia	450,396	459,116
Ontario	2,114,321	2,167,978
P. E. Island	109,078	103,258
Quebec	1,488,535	1,620,974
Territories	66,799	145,000
Unorganized Ter.	32,168	75,000

The populations of the cities of Canada by municipal boundaries is as follows:

	1891	1901
Montreal	220,181	266,826
Toronto	181,220	207,971
Quebec	63,090	68,834
Ottawa	44,154	59,902
Hamilton	48,980	52,550
Winnipeg	25,639	42,336
Halifax	38,495	40,787
St. John	39,179	40,711
London	31,977	37,983
Vancouver	13,709	26,196
Victoria	16,841	20,821
Kingston	19,263	18,043
Brantford	12,753	16,635
Hull	11,264	13,988
Calgary	3,876	12,142
Charlottetown	11,373	12,080
Valleyfield	5,515	11,055
Sherbrooke	10,097	11,765
Sydney	2,474	9,098
Moncton	5,165	9,020

The population by families, compared with 1891, is as follows:

	1891	1901
Canada	921,643	1,042,782
By Provinces:		
British Columbia	20,718	39,000
Manitoba	31,786	48,590
New Brunswick	58,462	62,700
Nova Scotia	83,730	89,106
Ontario	414,798	451,839
P. E. Island	18,601	18,746
Quebec	271,991	303,301
Territories	14,415	29,500
Unorganized Ter.	32,168	75,000
The dwellings are as follows:		
Canada	877,086	1,003,944
By Provinces:		
British Columbia	20,016	38,000
Manitoba	30,790	47,903
New Brunswick	54,718	58,267
Nova Scotia	79,102	85,032
Ontario	406,948	440,418
P. E. Island	18,389	18,539
Quebec	246,644	287,533
Territories	14,129	28,342

The bulletin says: In a few districts the records of the present year are incomplete and the figures for them have been estimated in part. The returns for the extreme northern portion of Quebec and Ontario and for the unorganized territories of Athabasca, Franklin, Keewatin, Mackenzie, Ungava and Yukon have not been received.

Bulletin II will give the population by sex and social conditions.

It is rumored that the result of the census will be to cut down maritime provinces' representation in the house by four and Ontario by five. Manitoba will likely get three more members, the Northwest three and British Columbia one more, which would reduce the present parliamentary representation from 213 to 211. The census of 1891 reduced it from 215 to 213.

ASTOUNDED THE EDITOR.

Editor S. A. Brown, of Bennettsville, S. C., was once immensely surprised. "Through long suffering from Dyspepsia," he writes, "my wife was greatly run down. She had no strength or vigor and suffered great distress from her stomach, but she tried Electric Bitters which helped her at once, and, after using four bottles, she is entirely well, can eat anything. It's a grand tonic, and its gentle laxative qualities are splendid for torpid liver." For Indigestion, Loss of Appetite, Stomach and Liver troubles it's a positive guaranteed cure. Only 50c at J. L. White's, Miller Bros.. or W. E. Anderson's.

DUNCAN ROSS..... EDITOR.

FRIDAY AUGUST 23, 1901.

THE CENSUS.

Some years ago the Toronto board of trade gave a banquet. Hon. Geo. E. Foster, the then minister of finance, was there as was also Sir Wilfrid Laurier, then leader of the opposition. They were to be the two principal speakers of the evening. Mr. Foster was first and he spoke for over two hours, quoting innumerable figures and statistics to prove that Canada was prosperous and to convince his wearied hearers that they were really enjoying good times. Mr. Foster spoke so long that there was a strong suspicion that in addition to demonstrating the prosperity of the country, he also wanted to talk against time and thus prevent Sir Wilfrid from delivering the brilliant address he would doubtless make. The hour was so late that Sir Wilfrid refrained from making a speech, but in a few words he knocked Mr. Foster's labored effort into a cocked hat and made a better impression with the audience than would hours of oratory. "When I am in power," he said, "it will not be necessary to quote figures to prove that you are prosperous. You can put your hands in your pockets and know it."

This incident illustrates the method the Conservatives had of endeavoring to persuade the people that business and the country's progress was satisfactory. In 1891 when the census was taken, the same system was adopted. Factories and industries of all kinds were plentiful in the bulletins issued by the census bureau but comparatively scarce in reality The padding of the 1891 makes the 1901 census a dissappointment. The increase was not what was expected. Notwithstanding the fact that the comparison between the 1901 and 1891 figures is not as was hoped for, the country has had a healthy growth. In the west particularly, the population has greatly increased, the country has been satisfactorily developed and the outlook is bright.

Had the 1891 census been honestly given, the percentage of growth would have been satisfactory, but the errors of ten years ago cannot destroy the growing time. Canada is all right. With its wealth of natural resources, with an enterprising people and with a business government; the census of 1911 will tell a different story.

RAILWAY GRADES.

The editorial utterances of the Tribune are all awry these days. In the days of John's greatness the Tribune was sound on all questions but under the new order of things, the labored effort to prove that railway monopolies and discriminating taxes are right show that an inexperienced hand is at the helm. It requires some capacity and considerable experience to write in the interest of corporations. The Tribune never had that kind of capacity and there has not been sufficient time to acquire the necessary experience. The result is a lack of cogency and consistency. The Tribune argues that because the C. & W. does not haul freight over the mountains between the Columbia river and the Boundary country at reasonable rates, the Times should not expect the V., V. & E. will haul freight over Hope mountains at reasonable rates? The Times expects but little from any railway corporation but it does claim that if railways are forced to build over mountains instead of following the natural highways, the extra cost of running mountain railways will be paid by the users. We do not know what the Hon. Edgar Dewdney will discover in the Hope mountains. He may find a pass that will obviate the necessity for climbing over the mountains, but we do know that the silly cry against American roads, if successful, would force the people into patronizing nothing but high grade mountain roads in Southern British Columbia. Nature, in her wisdom, knew no International boundary line and made her natural highways without referance to the 49th parallel or the advocates or the C. P. R.

TRACKMEN'S STRIKE.

The Canadian Pacific railway is described as Canada's national highway. It has been aided and encouraged by public money until there is scarcely a place of any importance in the whole country that cannot be reached by the C. P. R. Under such circumstances the public have a direct interest in anything that retards traffic on the system, that makes it dangerous and generally disarranges trade throughout the country. For weeks the trackmen on the C. P. R. have been out on strike. They want higher wages. The trackmen may have been badly advised in their strike. They had to contend with all the forces of a powerful company who used all the newspapers controlled by them and the C. P. R. telegraph system for endeavoring to create a prejudice against the striking men. There is one fact that stands out in connection with the strike and that is that the trackmen in the west do not get a living wage. A man can't keep a family on $1.30 a day in B. C. and pay the C. P. R. from $5 to $10 a month house rent. Chinamen may be able to do it but a white man hasn't the the capacity for economizing to this extent.

The strike has caused vexatious delays to business men and others using the C, P. R. Travelling on the road is risky, trains are late, goods are delayed. General business is suffering. The men and the company so far have been unable to reach an agreement. In the interests of the public the government should step in and adjust the matter.

TWO PER CENT. TAX.

The Nelson Tribune is wrong again. To belittle the extent of the two per cent. tax it claims that the cost of transportation and smelting $5 ore in the Boundary district is $3.75 and that the two per cent. tax is paid on the balance only, viz. $1.25. Five dollar ore cannot stand a custom charge of $3.75 for freight and treatment and this is the reason that companies owning low grade mines are erecting their own smelters. Both the Greenwood and Granby smelters are treating ores for a much less figure than that quoted by the Tribune and with increased capacity Mr. Paul Johnson claims the Mother Lode ore can be treated for $1 yer ton. The freight rate is about 25 cents a ton. The rank injustice of the tax is further demonstrated by this very matter. The government assessor will not allow companies owning mines and smelters to charge the smelter custom rate for treating their own ores but must put in returns of the actual cost of smelting, so that a fine is placed upon companies enterprising enough to build smelters so that a profit may accrue from their low grade ores.

The Tribune states that "working mines at a loss is ruinous to owners and gives the province a bad name." Quite true. But working mines at a small margin of profit is a good thing all round and this would in many cases be possible were it not for the descriminating operations of the two per cent. tax.

EDITORIAL NOTES.

JNO. A. MACDONALD is to be congratulated upon the success attending his efforts in connection with the patriotic gathering at the Mother Lode. Like his great namesake he proclaimed his love for the old flag under which Canadians have been contented and happy. Life in the west has a tendency to destroy sentiment abd such gatherings do much to remind us that we have a country and a flag of which we should all be proud.

THE Grand Forks News last week insinuates that Greenwood decided to celebrate Labor Day after Phoenix had announced a celebration. Greenwood gave way to Midway on Victoria Day, Grand Forks on Dominion Day, and being the most important city in the district, her citizens met and decided to hold a celebration on Labor Day, the only general holiday left during the year when a celebration could be held. Phoenix then decided to celebrate. Had the citizens of Greenwood known that Phoenix intended to celebrate, they would no doubt have again given way, for they have always dealt generously with sister cities. Having anuounced the celebration, however, they could do nothing but make the biggest and best holiday ever celebrated in lhe Boundary. The leading citizens of Phoenix admit that their holding a celebration is a mistake but a few hot-heads and sore-heads succeeded in having their way. There is nothing but the best feeling between Greenwood and Phoenix and we hope it may continue. Next year we do not think the double celebration will be repeated but Greenwood and Phoenix will have different celebration days. It is too much to expect however, tqat the chief town of the district is going to allow the other towns to take all the holidays and leave Greenwood without a celebration at all.

LOCAL AND PERSONAL

Prescriptions filled correctly—Anderson's pharmacy.

A celebration is to be held at Keremeos on Labor Day.

H. B. Munroe has received a fresh consignment of choice confectionery.

T. D. Pickard has been appointed secretary of the New Fairview Corporation.

Grapes, nectarines, water melons, canteloupes; fresh fruit of all kinds at Semerad's.

Father Pat is reported to be out in the mountains on a vacation hunt for big game.

When you have time call on Allmacher & Wilson. We want to show you what we have in Flannel Suitings.

Harry C. Adams, now employed at the Mother Lode mine, has been laid aside for a while with an injured knee cap.

We receive consignments weekly of the famous Okanagan fruit. Prices to suit those who want to put up fruit. C. V. Semerad.

Hon. R. McBride, provincial minister of mines, and Dennis Murphy, M.P.P., were expected to reach Princeton about last Saturday.

From the Similkameen Star it is learned that R. H. Parkinson and F. Mortimer Lamb have been down with fever at Pairview.

F. H. Oliver, managing director of the Morrison Mines, limited, came in from Spokane on Wednesday night's train, on his periodibal visit to the Morrison mine.

R. J. Coulter, of the Greenwood branch of the Bank of British North America, left for the coast last Saturday on a vacation trip. Mr. J. Wood, of Victoria is here as relieving officer.

Good progress is being made with the work of construction of the new wagon road to Long Lake camp from Eholt. It is stated that the new road from Summit Citp to Phoenix has been completed and is now in use.

Mr. and Mrs. J. L. White, who only recently returned to Greenwood from a month's visit to the Slocan, will shortly leave on a trip to Ottawa, which was Mr. White's home in past years. They will take in the Pan-American exposition before they return west.

A recent visitor to the Winnipeg mine says that work is being done but the foreman was not at liberty to talk about the results obtained lately, so that the report of a recent strike at the 400-foot level could not be confirmed. It is very probable that ore has been encountered at that deqth, as reported, for it was thought that an ore shoot would be met with when the running of the crosscut at that depth was determined upon.

The first half of a 20-drill air compressor is being installed at the Brooklyn mine, in Greenwood camp. The Dominion Copper company is pushing on with the development of this mine, but it is reported that work is not now being continued on the company's neighboring Idaho claim. The shaft and tunnel of the Rawhide having been connected, a drift is now being run on the vein, which was cut by the shaft at a depth of about 70 feet.

Anthony J. McMillan, managing director of the company owning the Snowshoe group, near Phoenix, was up at the mine last Friday and Saturday. He was accompanied by J. W. Astley, the company.s consulting engineer, and together they made a thorough examination of the mine. On Sunday they came down to Greenwood and next morning took train for Rossland. Mr. McMillan is expected to return next week, when it is not unlikely he will be free to state what the intentions of the directors are in the direction of more extensive development work. A prospect shaft is being sunk on the Fairplay claim, which is one of the Snowshoe group.

The Boundary Pioneers' Association will hold its semi-annual dinner and reunion at the Pioneer hotel, Greenwood, on the evening of Monday, September 2. There would in any case be many of the old-timers in the city on the occasion of the Labor Day celebration, arranged to take place on that day, but now there will be an inducement for even more of them to put in an appearance. It was organized two years ago and held its first reunion at Boundary Falls with Tommy Wake as host. Its next meeting was held at Midway, where Tom McAuley "treated them white" and last time the veterans met it was at Camp McKinney, with Hughie Cameron brewing their liquor for them. Now it is Billy Nelson's turn to take a deal, and every Jack one of his old-time friends is to have a full hand, and stomach too, for that matter.

"Flints Emulsion of Cod Liver Oil —the best—Andersons the Druggist.

T. A. Milde, of the Mother Lode mine was married a short time since by Rev. W. A. Robins, M. A., in Greenwood, to Miss J. A. Harris, of Wolfville, Nova Scotia. Mr. and Mrs. Milde have made their home at the mine. Mr. Milde has now ceased visiting Copper camp regularly. Ostensibly he went over to Mr. Harris' pre-emption to see whether his dog Ladysmith, notorious for having swallowed some dynamite, and sent away from the mine to prevent a repetition of the indulgence in such elevating food—had yet suffered a recovery. Finally the dog was brought back to the mine, and incidentally, Miss Harris deserted her brother and, having first changed her name, went along too. It is anticipatthat such good treatment under the new regime as will obviate the necessity for his again taking his food with a stick in it.

Ice cream and fresh candies at the Greenwood Candy Factory, C. V. Semerad, proprietor.

THEIR SERET IS OUT.

All Sadieville, Ky., was curious to learn the cause of the vast improvement in the health of Mrs. S. P. Whittaker, who had for a long time, endured untold suffering from a chronic bronchial trouble. "It's all due to Dr. King's New Diseovery," writes her husband. "It completely cured her and also cured our little grand-daughter of a severe attack of Whooping Cough." It positively cures Coughs, Colds, La Grippe, Bronchitis, all Throat and Lung troubles. Guaranteed bottles 50c and $1.00. Trial bottles free at J. L. White's, Miller Bros., and W. E. Anderson's; drug stores.

CURIOUS CRITICISM.

The Colonist Pokes Fun at Smith Curtis' Discovery.

The coast papers have been making much of the statement that Smith Curtis, M. P. P., had on his own accord found a pass through the Hope mountains and that he had recorded the fact together with the rather suggestive warning "and don't you forget it." Coast papers of all shades of politics have been seriously discussing the matter with the result that the enterprising member for Rossland has been proved a pathfinderly one and a charlatan by the other. Even the venerable Colonist has been mixed in the matter with the result that it gives half a column of flippantly funny nonsense, that during these days can be read without profit but with considerable diversion. The Colonist says:

An ancient poem records the fact that

The King of France
With twice ten thousand men
Marched up the hill, and then—
Marched down again.

We do not know what particular king of France performed this ever-to-be-remembered deed, but Mr. Smith Curtis takes no chances of being forgotten. He walked up the hill and down again, and inscribed the fact upon a tree, adding the warning to all succeeding generations, "And don't you forget it." For some years past we have been occasionally reminded of a certain immortal sweet Alice, but in her case the legend is "Don't you remember," and she alas now lies under a stone of grey granite. Our latest hero is very much alive, and no Ben Bolt will have to be reminded of his existence. The hour is ripe, we suggest for some poet to arise and give to the world a ballad of his great achievement. Our own poetical licence has expired or we should attempt something after this style:

"And don't you forget it," Smith Curtis he said,
Smith Curtis who sought route for rail,
As he wrote down the date on a blazed cedar tree
Which stands near the old Dewdney trail.

The theme is a wide and inspiring one. We suppose that not more than several thousand people have gone over Hope mountains between the beginning of the world and the date of these presents, as we used to say in the old guarantee deeds, but not one of them has essayed to achieve a glorious immortality with the aid of an axe and a lead pencil. The more or less immortal George Washington has gone down to posterity because of a performance of his with a hatchet on a cherry tree. It is not recorded that George expressed in lead pencil on the freshly cut wood a desire that his deed should not be forgotten, but he lived in other days than these. He had to trust to the memory of his countrymen, but if Mr. Curtis had done it, he would have discounted his immortality, and enjoyed it in advance. "What's all the world to a man, when his wife's a widow?" asked the gentleman from Cork. Of what value to a man is it to have some one a century or so after he has gone out of the world discover something that he has done and make a fuss over it. The time to be immortal is when you are around to enjoy the sensation. Thus Mr. Smith Curtis has been truly wise in his day and generation in writing his wish not to be forgotten upon the highest point he could find. If time and space would permit, we would attempt to portray the event. Doubtless "the shades of night were falling fast" when the man from Rossland inscribed "his strange device" upon the side of a tree. He bore no banner. No maiden begged him to

"Stay and rest
Thy weary head upon this breast."

He feared not "the pine tree's withered branch;" he scorned "the awful avalanche," as with one eye on the summit of the trail and the other on political possibilities he, like Gray's ploughman, plodded his weary way.

And the name of the mountain was Hope, and from the summit thereof the Pilgrim looked upon the promised land, but being a man of much wisdom, and knowing that like Moses he might not enter therein, he took his pencil and wrote upon a tree, "Don't you forget it," and the words remain thereon until this day.

NOTICE OF FORFEITURE.

To J. A. Drain and C. Hoffman, both of the City of Spokane in the State of Washington.

Sirs:

You are hereby notified that I have expended $100.00 in labor and improvements on the "Alice Maud" Mineral Claim situate in Smith's camp in the Kettle River Mining Division of Yale District in British Columbia, to count as an assessment on said claim, as will appear by a Certificate of Work recorded 23rd March, 1901, in the office of the Mining Recorder for the said Kettle River Mining Division of Yale District, in order to hold said claim under the provisions of Section 24 of the Mineral Act; such being the amount required to hold the said claim for the year ending 23rd March, 1901.

And if at the expiration of 90 days of publication of this notice you fail or refuse to contribute your proportions of the expenditure required under Section 24, together with all costs of advertising, your interests in said claim shall become vested in the subscriber [one of your co-owners] under Section 4 of the Mineral Act Amendment Act, 1900.

Dated at Greenwood, B. C., this 26th day of July, 1900.

W. T. SMITH.

MINERAL ACT.

To Sam Breslauer and others inetrested in the Henrietta Mineral Claim, situated near Beaverton in the Kettle River Mining Division of Yale District:

TAKE NOTICE that I have caused to be done on the Henrietta mineral claim, situated near Beaverton, in the Kettle River Mining Division of Yale District, the work required by Section 24 of the Mineral Act, for the year which has expired, and have expended for such work and for recordidg the certificates thereof the sum of One Hundred and Two Dollars and Fifty cents, ($102.50), and if at the expiration of ninety days from the date of the first publication of this notice you fail to contribute your proportion of such expenditure, namely, the sum of Fifty-One Dollars and Twenty-Five Cents ($51.25), together with all costs of advertising, your interest in said mineral claim shall be liable to forfeiture, as provided by the "Mineral Act Amendment Act, 1900."

Dated this 5th day of July, 1901.

CHARLES PHIPPS.

NOTICE OF FORFEITURE.

To:

D. R. Campbell and A. C. McKenzie, late of Greenwood in the Kettle River Mining Division of the Province of British Columbia, and to any other person or persons interested or claiming any title to the "Queen Bess" mineral claim, situate in Long Lake Camp (formerly called Gold Drop Camp,) in the said Kettle River Mining Division.

You are hereby notified that Frank B. Goetter of Colville, Wash., U. S. A., and W. G. McMynn, of Greenwood aforesaid, have expended in labour and improvements the sum of one hundred dollars upon the said "Queen Bess" mineral claim, and $2.50 for recording the same as will appear by a Certificate of Work recorded on the 13th June, 1901, in the office of the mining recorder of said Mining Division at Greenwood aforesaid, in order to hold the said claim under the provisions of section 24 of the "Mineral Act", such being the amount required and necessary to hold the said claim for the year ending the 1st day of July, 1901; and if at the expiration of ninty days of publication of this notice you fail or refuse to contribute your proportion of the expenditure required under the said section 24 of the "Mineral Act", together with all costs of advertising, your interest in said claim shall become vested in the said Frank B. Goetter and W. G. McMynn [your co-owners] under section 4 of the "Mineral Act Amendment Act 1900".

Dated ot Greenwood, aforesaid, this 8th day of August, A. D., 1901.

FRANK B. GOETTER,
W. G. McMYNN.

LOST—A cheque for fifty dollars drawn on the Royal Bank of Canada, Grand Forks, by the V. V. & E. railway company in favor of James Leckie and numbered 219. Finder will please return to H. B. Munroe, Greenwood Parties are cautioned against using same as payment has been stopped.

ROBERT WOOD'S TRIP.

He Talks Hopefully of His Many Mining Enterprises.

At the Queen's hotel during the last few days has been stopping Mr. Robert Wood of Greenwood, B. C. Mr. Wood, who is now a man of between 50 and 60 years of age, is one of the sturdy, courageous, far-seeing pioneers who several decades ago left the East to lay the foundations of Canada's growing industrial empire on the Pacific coast. Mr. Wood was in the Cariboo gold rush in the early sixties, and has been identified with the opening up of several districts of interior British Columbia.

One of the greatest monuments to his far-sightedness is the populous and busy town of Greenwood which is named after him. Less than ten years ago Mr. Wood went into the narrow canyon of the Boundary creek, in Southern British Columbia, and, at a point where the trails from several important mining camps met, he started a general store in a log cabin. He cut down the woods around his shack and established a townsite. The mines developed apace, and the log cabin before long became the nucleus of a little settlement. Then the C. P. R. came in, the mines were equipped with machinery, smelters were built, and now Greenwood is an up-to-date place of 3,000, boasts a dozen hotels, an electric light plant and other modern conveniences.

Mr. Wood was practically the original owner of the whole of the Greenwood townsite, and he always has his hands full of various enterprises relating to the development of the country around Greenwood. In fact his visit to Toronto is merely an incident in a journey he is making to England with a view to furthering some of these enterprises.

Among these enterprises is the Vancouver and Boundary Creek Mining and Development company, limited, which owns a large number of gold, copper and coal properties in Southern British Columbia, and especially on the West Fork of Kettle river. Here the company has opened up a number of very promising propositions.

Perhaps the biggest proposition Mr. Wood has in hand just now is a plan for the construction of a line of railway joining the C. P. R. at Midway with another branch of the C. P. R. at Vernon. This line will run through a tract of valuable mineral country lying between Rock Creek and the head of the West Fork of Kettle river, and would also make tributary to the Boundary a large area of agricultural land lying south of and around Vernon. Mr. Wood has a charter from the British Columbia government for this line, and if it is built, as he hopes, Mr. Wood's plan is to establish a smelter at Rock Creek, where he already controls a large-sized block of coal lands. His idea is to bring the ores down from the West Fork of Kettle river to Rock Creek for treatment.

Besides being important locally, this Midway-Vernon line would solve the problem of giving the Boundary country and Southeastern British Columbia a direct line to Vancouver and the Pacific coast.

Another enterprise in which Mr. Wood and colleagues are interested and have under way is hyraulicking on a large scale on Rock creek, which flows down from Camp McKinney into the Kettle river. They are building heavy dams and putting in automatic sluice gates, and expect to make a big thing when the equipment is completed. As is well known, Chinamen and others have for well nigh half a century successfully worked Rock creek placer diggings by hand.

Mr. Wood will stay in Montreal a day or two on his way to England, his object being to see Mr Shaughnessy of the C. P. R. in connection with his proposed railway.—Toronto World.

Enas McCormick who was connected with Butler's saddlery in this city for some time has purchased the business of R. E. Doran at Moose Jaw, N.W.T., and is prepared to quote prices for all kinds of harness, saddles, carriages and farm implements. *

Ralph Smailes has returned from a business trip to the coast.

J. E. Hemenaway was in the city from Phoenix on Monday last.

For Rent—A new store building on Copper street. Apply at Times office.

Nitrous oxide and oxygen for pain less extraction of teeth at Dr. Mathison's.

Andrew Laidlaw and W. T. Smith returned from the West Fork on Saturday last.

For Rent—Four room house furnished, all conveniences. $12. Apply at Times office.

There is considerable traffic to the West Fork country, Wilkins' stage being loaded on each trip.

Robert Wood and John Hamill sailed for England last week after spending some time in Toronto and Montreal.

The steamer Islander, the crack steamer of the C. P. R. fleet, struck an iceberg in Alaskan waters and sank shortly afterwards. Over 20 persons were drowned and 113 saved. Over $235,000 Yukon gold was also lost.

A. A. Munroe of the Montreal and Boston Copper company, and Harry Johns of the Sunset mine were in Nelson this week in connection with the contaact made with the Hall Mines smelter for the treatment of Sunset ore.

Andrew Laidlaw on Wednesday last received the first payment on the bond given by Chicago capitalists on Similkameen coal land. The payment was for a substantial sum and the syndicate will immediately begin development work.

A. B. C. Davis, assayer and chemist at the Pyritic smelter has purchased the assaying business of Guess Bros., who were the pioneer assayers of the Boundary district. Mr. Davis has had a long and successful experience in the business. He was assayer and metallurgist for the Cleopatra smelter at Ouray, Col., assayer and metallurgist for the Bona Vista smelter and chief superintendent and metallurgist at the Boston Gold-Copper smelter, Leadville. He came north to take charge of the labortary at the Pyritic smelter. With a well equipped office, Mr. Davis is in a position to do prompt and accurate work.

The regular meeting of the city council was held Monday evening. In the absence of Mayor Jakes, Ald. Ross was voted to the chair, with Ald. Naden, Caulfield, Sullivan and Kirkwood present. The contract for Washington street bridge was awarded to Bunting and Dempsey they being the lowest tenderers. The pound bylaw was finally passed and is now law. It was decided to publish notice to tax payers drawing attention to the fact that one sixth rebate is allowed if taxes are paid before November 1st. Several accounts were passed for payment and the council adjourned.

THE R. BELL.

The R. Bell mine was shut down last Tuesday after having been in continuous operation for more than a year. No reason has been made public for this suspension of work, which it is hoped will be but temporary. During the last two or three months about 500 tons of ore have been shipped to the Granby smelter and it has been generally understood that this ore was about the richest yet sent out of the district in quantity. John Hanly, who has all along been in charge of the property, is about to pay a visit to Salt Lake City, where some of the men interested in the claim live.

If you want nice soft drinks call at South End grocery.

THE POWER OF INK.

An expert, says the Outlook, was recently faced by this question: "Here is an advertisement for a trouser-stretcher costing a few shillings. The advertisement occupies half a page in a journal where advertisement space fetches £70 per page. Do the owners of this paltry article pay £35 for that one advertisement?" The expert answered thus: "A certain firm who sell a certain liquid in shilling bottles have a gross turnover per annum of £30,000. Each of the two partners last year drew £7,000 in profit. Office expenses account for another £1,000, and the cost of the liquid—which is mostly in the bottles—is also £1,000. Total £16,000; leaving £14,000. And the whole of that £14,000 goes in advertising. It is the basis of the business; lessen it even by £1,000, and the profits are correspondingly reduced." Wherein there is food for reflection, and that there are still some merchants who do not advertise.

"Bromogrip cures colds—25 cents—Anderson's Pharmacy.

TENDERS WANTED.

Tenders will be Received for Sinking Shaft at Mother Lode Mine. For particulars apply at General Office of

B. C. COPPER COMPANY,

Anaconda.

MINERAL ACT.

To Randolph Stuart, J. C. Haas, I. H. Hallett, Walter D'Eath and others concerned:

TAKE NOTICE that I have caused to be done on the Diamond Joe, Doubtful, May Day and Deer Trail mineral claims, situated in Greenwood camp, in the Kettle River mining division of Yale district, the work required by Section 24 of the Mineral Act, for the year which has expired, and have expended for such work and for recording the certificates thereof the sum of four hundred and fifteen dollars ($415.00); and if at the expiration of ninety days from the date of the first publication of this notice, you fail to contribute your proportion of such expenditure, namely, Randolph Stuart, J. C. Haas, I. H. Hallett and other parties interested, the sum of $83.00 for one-fifth interest in said mineral claims, and, Walter D'Eath, the sum of $83.00 for a one-fifth interest in said mineral claims, together with all costs of advertising your interest in said mineral claims shall be liable to forfeiture, as provided by the "Mineral Act Amendment Act, 1900."

Dated this 12th day of June, 1901.

JOHN W. POWELL.

FOR SALE OR RENT.

Four roomed house for sale or rent. One single seat top buggy and one double seat top buggy for sale. Apply at B. C. Hotel. tf

MINERAL ACT, 1896.

Certificate of Improvements.

NOTICE.

"QUEEN OF SHEBA" mineral claim, situate in the Kettle River Mining Division of Yale District. Where located: In Copper camp, adjoining the "Jumbo" and "Harqua Hala" mineral claims.

TAKE NOTICE that we, Thomas McDonnell, of Greenwood in the said district Free Miner's Certificate No. B. 40,302 and William Graham McMynn, of the same place, Free Miner's Certificate No. B 40,601, intend sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 10th day of August, 1901.

THOMAS McDONNELL.

W. B.

Erect Form Corset.

THE "W. B. ERECT FORM"

embodies those cardinal truths of Corset making which the designer has striven to reach since the days of Elizabeth. It is the logical perfection of the Corset idea, hygienic, graceful, exquisite it its lines,

It is positively the only proper model for straight form and princess gowns,

For grace and style of figure
For perfect ease and comfort
No Corset equals the
