MINING RECORDS.

The following is a complete list of claims recorded from and including Nov. 1 to Nov. 16, at noon:

WILLIAM CREEK.

Cowling co.—Nov. 2.—John Mitchell, one hill claim on the east bank of William creek, adjoining the Cowling co.'s lower lines.

Ballarat co.—Nov. 3.—D. McDermid, M. McCraig, John McAlister, A. Fletcher, P. Hickey, J. W. Hall, Wm. Dodd, D. Carey, each one interest. Wm. Anderson, Wm. Jeffree, Jos. Evans, John Bowron, Joseph Hough, G. L. Sheppard, F. Neufelder, each a half interest in the Ballarat co. Re-records.

Ballarat co.—Nov. 3.—Recorded in favor of the estate of the late Jno. McLaren, one full interest in the Ballarat co. A re-record.

Ballarat co.—Nov. 5—Donald McEwen, one-half of one full interest in the Ballarat co. A re-record.

Jewell co.—Nov. 6—Henry Jewell and J. D. Treleven, 200 feet of ground on William creek, commencing at the upper line of the Caledonia co., and running up stream 200 feet by 200 feet wide, and joining the Lillooet co.'s west side.

Old Man's co.—Nov. 8—Wm. Martin and John Tregoning, two creek claims on William creek, commencing at the old Never Sweat co.'s lower line and running up stream 200 feet by 100 feet wide, in the Never Sweat co.'s late ground.

The Golden Gate co.—Nov. 10—T. H. Flynn, George Kenny, Thos. McDougall, Jas. Christie and Andrew Christie, five hill claims on the left bank of William creek, commencing at a stake on the west side of Kerr & Son's brewery and running up stream 500 feet, having for a base line the Barker co.'s west side line.

Ballarat co.—Nov. 12—D. R. McDonnell, one interest in the Ballarat co. A re-record.

Adams co.—Nov. 16—Chas. Hine, one interest in the Adams co., lately held by Wm. Fraser.

STOUT GULCH.

Bona Fide co.—Nov. 10—Solomon Jones, one hill claim on the north bank of Stout gulch, commencing at the lower line of the Bona Fide co. and running down stream 100 feet, having for a base line the northern boundary of the Mucho Oro co. To be worked in conjunction and form part of the Bona Fide co.

CONKLIN GULCH.

Ericsen co.—Nov. 15—Henry Meunersdorf, one interest and three quarters in the Ericson co. A re-record.

HARVEY CREEK.

Blackbird co.—Nov. 5—John Cameron, one-half interest. A re-record.

KEITHLEY CREEK.

Nov. 12—Frank Saforcada, one hill claim on the south bank, adjoining the upper line of the Frenchman's claim below the Cascade co.

CANADIAN CREEK.

New Dominion co.—Nov. 10—J. S. Thompson, L. M. Troup, J. McB. Smith, M. H. Ross, A. McPherson, J. D. Loring, Wm. Hitchcock, Wm. Manson, J. O. Floyd, Geo. Ferguson, R. W. W. Carrall, Jas. Christie, Geo. Bickley, W. Brunskill, Jas. Burdick, John McDonald—sixteen claims on Canadian creek, cammencing at the upper line of the Mayflower co., and running up stream 1600 feet.

BEGGS GULCH.

Skym co.—Nov. 15—Wm. Skym and Thos. Howell—two creek claims, commencing at the upper line of the Grappler co., and running up stream 200 feet.

VALLEY CREEK.

Barker co. No. 2.—Nov. 15—Jonathan Nutt, one hill claim adjoining the Barker co. No. 2, to be worked in conjunction and form part of the Barker co. No. 2—a discovery claim, not to interfere with prior rights.

RED GULCH.

Tom and Jerry co.—Nov. 1—Frank Morris, David Williams and John Williams, each one interest. Re-record.

NORTH QUESNEL—NORTH FORK.

South Bank Discovery co.—Nov. 1—John Cameron, Mose Barber, Don McGregor and James Moore, four discovery hill claims on the south or left side of the North Fork Quesnel, commencing about 40 yards above Thos. Grogan's claim on the opposite side and running up stream 600 feet.

Long Bend co.—Nov. 4—John Barker, Tor. McGee, Edwd Kimball and Capt. Mitchell, four hill claims on the north bank of North Fork Quesnel, commencing at a stake at the lower part of the Long bend and running up stream 400 feet, about three miles above Capt. Mitchell's bridge.

BASFORD CREEK.

(Tributary of Peters creek.)

Nov. 1—Edwd Blackwell, John Shaw, Andrew Donohue and B. M. Conway, four creek claims, commencing about 300 feet from the mouth of the creek and running up stream four hundred feet. To be known as the Kamlemhaha co.

LIGHTNING CREEK.

Nov. 2—Daniel Parry, one creek claim, adjoining the upper line of the Great Western co.

Castellar co—Nov. 13—E. B. Holt, Denis Byrnes and Frank McBrien, four creek claims, commencing about 75 feet above the mouth of Last Chance creek and running up stream 400 feet.

Clarke co.—Nov. 13—E. B. Holt, one interest lately held by John Hamilton.

DRAGON CREEK.

Musgrave co.—Nov. 8—Geo. Byrnes, Jas. Loring, John Tindall, John McVicker, C. Chisholm, J. G. Goodson and Jas. Reid, seven hill claims on the west bank, having for their base line the western boundary of the Musgrave co. To be worked in conjunction with and form part of the Musgrave co.

Nov. 8—Arnold Wilson, one hill claim on west bank, adjoining the Musgrave co.'s hill claims. To be worked in conjunction with and form part of the Musgrave claim.

Golden Fleece co.—Nov. 15—G. Velatti, Albert Argaut, Martin Bigliel, Thomas Lavery, A. Vignolo, A. Pendola, P. Manetta and E. Phillips, 8 creek claims on the west branch of Dragon creek, commencing at the upper line of the Musgrave co. and running up stream 800 feet.

DAVIS CREEK.

Jimmy Brighton co.—Nov. 13—Wm. Cullis and Thomas Hind, one interest each in the Jimmy Brighton co., together with 50 inches of water to be taken from the meadows. A re-record.

NELSON CREEK.

Halliday co.—Nov. 15—Wm. Halliday, Alex. Halliday, two hill claims on right bank adjoining the upper line of the Littler co.

Nov. 15—John Rustrick, one hill claim adjoining the lower line of the Montgomery co.

Nov. 15—Fred. Mill, George Newlone, two hill claims on the right bank, commencing at the canon and running up stream 200 feet.

LAST CHANCE CREEK.

Gray co.—Nov. 15—George McLeod, Jos. Bell, Jacob Holmes, Martin Cloney, the whole of the Gray co., consisting of five interests. A re-record, together with the Gray co.'s ditch.

CHISHOLM CREEK.

Discovery Quartz co.—Nov. 15.—Robt. J. Halliday and John Love, 2 discovery claims above Jackson's gulch. Not to interfere with prior rights.

WHITE PINE ECCENTRICITIES.

Here is a little chapter from the White Pine News on "fastidious people:"

Some people are so particular about their surroundings that there's no getting along with them. In a new country like this, where every man cannot have a house to himself, it is necessary for people to haul in on the sharp corners of their natural dispositions, and accommodate themselves to an association, sometimes, with those who are not exactly what they would fancy. We heard a man object to Peter Toft's habit of carrying his change of socks, before and after changing, in his pantaloons pocket, to be used occasionally as a handkerchief. Another man up in this camp had a bed in the same room with a man from Sonoma. The Sonoma man had a habit of softening his socks in the morning before putting them on. He was in the habit of going to bed early, so as to give his socks a chance; and then, instead of taking them in shape, after drying, and wearing them rights and lefts, like a Christian, this man from Sonoma insisted on softening his socks every morning. The way he did it was by hammering them on the bed-post till they began to crack, then rubbing them briskly in his hands—washing, like Sir Jacob, "with invisible soap, in imperceptible water." Our friend in the next bed is a late riser. He would be sleeping his best about sock time, but the dust would wake him. The dust each time filled the room worse than the flood of light that Ben Adhem saw. This thing was troublesome, but rooms were scarce. Our friend could get a good sleep in the morning only by getting up in the night and sprinkling down Sonoma's socks, so they wouldn't dry by daylight. But Sonoma concluding that the roof leaked, took to sleeping with his socks under his head, and soon got the room to himself.

The Assinaboine Indians of Montana stole a blanket from a steamer's crew, and soon after the small-pox broke out among them. The Sioux tribe filched the same from them, but received that malignant disease with it, for which they are now going to war with the Assinaboines. This war and the small-pox will save the Indian Agents some trouble.

The Beecher-Stowe-Byron case has excited a warm controversy in France, and a Paris journal makes the following remarks:—Mrs. Beecher Stowe has dashed a bottle of ink on the poet's statue; the stain will never be completely effaced. These are calumnious accusations, of which it is impossible to prove the falsity. But the author of "Uncle Tom's Cabin" has already been as severely judged by public opinion as has been the savage who soiled the Carpeaux group.

LITERATURE IN OREGON.

That the fame of a number of celebrated Poets has not extended to certain sections of Oregon, is illustrated by the following incident:

Pierpont Thayer, the popular reader and actor, while on a recent trip through the valley towns, generally forwarded his programmes, so they would be distributed a day or two before his arrival—the programmes being made up of selections from the poets, and opposite the piece selected was printed the author's name. On his arrival at a certain Yamhill country town, he was met by the landlord of the hotel and a prominent official, and addressed as follows: "Well, Thayer, we are prepared for you—everything is ready—fine hall—good accommodations, etc. But, I say! where is the rest of the Company?" Thayer replied that he constituted the entire Company. "Well," said the official, "we are not to be fooled this way: here's your bill and the Company named, and we either want the entire show, or our money (having sold a good many tickets) must be returned." Thayer tried to convince the party that there must be some mistake—but in vain. He was told that he must either produce the balance of the Company, Longfellow, Macaulay, Pope, Holmes, Reed, Mrs. Norton, Mrs. Hemans, etc., or no other show would be allowed.

CURRENT NEWS.

A steam plow has been invented in California with which it is claimed that 40 acres per day can be plowed and seeded.

Drugging and shanghaing in San Francisco is to be stopped in future by shipping all sailors through government agency.

A French savant has discovered that water cresses are advisable food for smokers, as the essence of that plant is an efficacious antidote against nicotine.

An Omaha paper has this startling heading: "Wonderful but true—Three thousand dollars found and restored to the owner—An honest man discovered in Omaha."

The King of Denmark owns a beet sugar factory which uses machinery of his own invention, and yields him an income of 50,000 rix dollars annually.

The London Guardian says that a manuscript in Lord Byron's handwriting will soon be published, and will settle the question raised by Mrs. Stowe.

The railroad companies in the Eastern States have reduced their rates of freight with the object of getting the bulk of the Pacific freight to go per overland railway instead of via Panama.

The London Daily News says it is not true, as generally supposed, that the act of freezing eliminates from water all impure matter. It generally does extrude coloring matter, but not organic impurities; indeed, such matters, although prevented from decomposing by the cold, appear to decompose with redoubled energy, immediately the temperature is sufficient to melt the ice which holds them.

Lord Elcho proposes that in all future contests between England and America, the rifle might be made an auxiliary to the oar. The Americans used to be famed for their excellent sharpshooting, and it would now be interesting to find out whether the representative shots can carry off the palm from our volunteers. Moreover as Ireland and Belgium are represented at Wimbledon, there appears to be no reason why there should not be a Yankee "eight" or "twenty" as well.

THE CARIBOO SENTINEL

SATURDAY, NOV. 20, 1869.

THE CARIBOO SENTINEL

Is published in Barkerville every Saturday. All advertisements intended for insertion, must be delivered at latest at Six o'clock, P. M., the day before publication.

TO ADVERTISERS.

All advertisements (not inserted for any definite period) will be continued until ordered out, and charged for accordingly.

THE MAINLAND FEEDING THE ISLAND.

A very large amount of money goes out of the colony every year for farm produce, cattle and horses. This loss is principally on account of the lower country, where farming and stock-breeding have not attained a growth commensurate with the market. Now, as the islanders and lower mainlanders cannot or will not supply themselves with good beef and mutton, we of the upper country will undertake to furnish a plentiful supply of out better than English meat if they will assist in procuring the means of conveying it to them. At present there are no cheap means of getting our fat animals to the seaboard. To be sure, there is a road to Yale, and steamers plying thence to Victoria, but that is too expensive a way to take animals to the sea. We might get along well enough perhaps if there were a good road or trail from Yale to Langley or New Westminster, but the sending of animals to a market involves the consideration of feed as well as of communication. Until science and enterprise unite and find a lodgment in British Columbia and bring the refrigerating system into practical operation, our beeves and sheep must be driven to market in the old-fashioned way on a road. And where the distance to market is great a road along which feed is obtainable is a pre-requisite condition to the successful attainment of the end in view. We ought to have a continuous road to the seaboard for man as well as beast. The gap between Yale and New Westminster should be filled up, not only for the purpose herein indicated but for every other purpose a road is intended for. When the steamers cease plying between Yale and New Westminster we are almost virtually shut out from the world, imprisoned for no fault of our own, but for the fault of the government—the fault of being too poor to build a road. The government shouldn't be so poor that it cannot build a road. The government ought to regulate matters so that there should be money enough to spare for road-building. More road and less salary. With a road from the broad pastures of the interior to New Westminster, the whole of the lower part of the colony could be supplied with meat. Here, in Barkerville, at the present time, we have an abundant supply of superexcellent beef and mutton, at from eight to fifteen cents per pound. The Lord Mayor of London's festive table never supported better beef than Tom, Dick and Harry can now obtain from Van Volkenburgh in Barkerville. The pasture lands of the colony, extending from Lytton to the base of the Rocky Mountains, are capable of affording sustenance to a thousand times the present number of cattle in the colony. The market, however, is a small one, and the efforts made to stock the country are limited; but if road facilities were available, the market would be largely increased by supplying the lower country, and more energy would thereby be imparted to this important branch of our agricultural resources. Every dollar sent out of the colony for what our own land is capable of producing is not only a direct loss of so much currency, but a customs-registered stain against the country, wrongly suggesting barrenness, and therefore discouraging to immigration. To look at the imports list one would scarcely credit the facf that there are vast tracts of land in British Columbia bearing bunch grass and wild timothy. What will benefit the mainland must produce corresponding good to the island. An outlet for our stock is fast becoming a necessity, and we trust that the islanders will contribute, in legislative effort, toward furnishing complete communication from the interior to the seaboard, which is needed at all times of the year and for all purposes.

CHURCH BUILDING.—The new church (S. Saviour's) now building, promises to be an elegant structure. It is built from designs by the Rev. J. Reynard, which are being ably carried out by Messrs. Bruce & Mann. The style is "Early English," in which architectural effect is attained by due proportion of parts, bold and simple forms, rather than by elaborate ornament. The church will consist of—nave, 30ft.x20ft., and apsidal chancel, 16ft.x12ft. Height of walls, 18 feet; of ceiling, from floor, 23 feet. A schoolroom and vestry complete the building. We congratulate the friends of the Anglican Church on possessing a church so appropriate to their worship. Certainly those who wish to pray, as their fathers prayed, may do so here, in a church which in form, if not in material, will remind them of the village churches of the "fatherland."

An important discovery has just been made in Simla, which is likely, says the Indian Volunteer Service Gazette, to be a source of revenue to the Government. Mr. De Russett, a photographer of that place, has hit upon a vein of the veritable meerschaum, from which the celebrated pipes are made. Specimens of the clay have been tested and pronounced to be even superior to the description generally used in the manufacture of pipes.

It has been proposed in Germany—the land of music, where the scales of training and taste in instrumental performances are much higher than anywhere else—to lay a tax on pianofortes. It is averred that in the Zollverein are not fewer than 400,000 "pianos," upon which, exempting the instruments of professional men—say 30,000—an annual tax of two thalers per instrument would yield nearly three-quarters of a million of thalers.

An enterprising omnibus proprietor in England intends to dispense with horses and use steam engines for drawing his buses. A Scotch road steamer was put on trial recently in Edinburg, and it proved a complete success. With an omnibus attached it went up hill at the rate of seven miles an hour and came down at the rate of nine, and turned in the road with far greater ease than horses, pulled up instantaneously at the word of command and even backed up hill. It then ran through the town, and the dexterity with which it picked its way between strings of cart-horses, omnibuses, and cabs, and the docility with which it stopped and turned whenever it was required, were marvellous.

NEW ADVERTISEMENTS.

S. SAVIOUR'S, BARKERVILLE.

ON ADVENT SUNDAY, (Nov. 28th,) and on following Sundays, Service will be held in the Schoolroom at the usual hours, morning and evening.
The Church will be opened on XMAS DAY
Appropriate Musical Services on the following day.

UPPER BARKERVILLE. m15

THE CARIBOO SENTINEL

SATURDAY, NOV. 20, 1869.

MINING INTELLIGENCE.

STOUT GULCH.

The Mucho Oro co. got a small dividend for last week, and are getting good pay this week. The Jenkins co. washed up nearly 50 oz. for last week. The Taffvale co. washed up 71 oz. for the week, and 33 oz. on Wednesday. The Coombs co. washed up 29 oz. for the week, and have stopped working as usual, but the miners will rock during the close season, by the consent of the company. The Bona Fide co. were to have resumed operations on Thursday.

CONKLIN GULCH.

The Felix co. washed up 28 oz. for the week; and the McDowell co., who were prospecting, got 23 oz. The White Pine co. washed up 34 oz. for the week, and on Tuesday last they got 31 oz. from three sets of timbers.

FRENCH CREEK.

The tunnel of the Cosmopolitan co. has been run 400 feet, according to contract. A new contract will be let to run the tunnel to bed-rock.

VALLEY CREEK.

Billy Barker, the original pre-emptor of the celebrated Barker claim, from which Barkerville derives its name, has struck a prospect in his claim on the hill sloping toward Valley creek, close to the Prairie Flower co.'s ditch. It has long been believed that an ancient channel, to which French, Canadian, Grouse and Antler creeks were tributaries, took its course along the country bordering on Valley creek, and the prospects now obtained go to confirm that belief.—Billy has named the claim and company Barker No. 2, and he is not alone in the opinion that they will prove worthy rivals of Barker No. 1.

CANADIAN CREEK.

The Clear-grit co. are still following up the break or gutter they have recently come to, and find rock on both sides. Operations in the tunnel in this creek are going on well.

MOSQUITO CREEK.

The Minnehaha co. are about closed for the season. The Willow co. are down with their lower shaft and have commenced to take out pay in the upper streak. The Hocking claim has been sold to Chinamen. The Point co. still continue to take out good wages. The Tabb co. are making from $5 to $8 per day. The Discovery co. had been doing well up to the time the frost set in, which prevents them from working as usual. The Holman co. are washing underground and making pretty good wages. Only one man is now at work on the Jeffree claim.

As soon as the mill is ready for work, the Martin co. intend to ship some of their quartz for trial.

RED GULCH.

A company are about to sink a shaft in the old Butcher co.'s ground. The Alabama co. are making small wages. Work is still going on in the Tom & Jerry claim.

WHIPSAW GULCH.

The Hit-or-Miss co. and the Discovery co. are making from $4 to $5 per day.

COULTER CREEK.

The Discovery co. have laid over their claim and will commence hydraulicing in the spring.

NELSON CREEK.

A company are reported to have struck a good prospect in a tunnel, the first, we believe, that has been run on this creek. Mining on this creek has hitherto been principally, if not solely, confined to ground-sluicing, and this strike may lead to more thorough operations.

CHISHOLM CREEK.

The quartz ledge on this creek, which attracted considerable attention several years ago (specimens having assayed in Victoria as high as $500 to the ton), has been taken up again with the intention of working it. The Gold Commissioner, the other day, showed us about 75c. worth of gold pounded out of six pounds of rock.

DRAGON CREEK.

The Discovery co. intended to have commenced washing yesterday.

PINE CREEK.

This creek lays between Harvey and Keithley creeks, and is a tributary of Cariboo Lake. A prospect has been obtained recently and several claims recorded.

REMOVAL.—Mr. P. McEntee has commenced work in his new and large shop in Barkerville, near the theatre, where he will carry on his blacksmith business at the same rates as before. He only charges $3 per set for horse-shoeing, and all other kinds of blacksmith work at corresponding rates.

FIRE.—On Wednesday last, between six and seven p. m., the building used by William Dixon as a stable, cowhouse, caught fire and was burned almost to the ground. The fire commenced by a candle falling on the hay in the upper story. The Fire Brigade turned out and got their hose to work, but it was too short, and could only be used to protect the adjoining buildings. A stiff breeze blew the sparks from the fire over several houses, but the snow on the roofs and the steady stream from the firemen's hose prevented further conflagration. The firemen also brought out their hooks, ladders and buckets, and plied them vigorously and effectively until the flames were completely subdued. The animals were gotten out and saved, but the building, with the exception of the first floor and foundation, was destroyed. The hay might have been worth $500, and was burned and rendered unfit for use. The next day another building was commenced. This fire showed the imperative necessity of maintaining the Fire Brigade, and the property owners and tradesmen must have been convinced that their monthly subscriptions for that purpose have been well bestowed. More, however, is yet needed to equip the Brigade thoroughly, more hose is requisite, and we trust that government will provide for another grant, and be as liberal toward the fire department here as they have been towards other fire departments in the colony.

THE TAFFVALE CLAIM.—This claim, on Stout gulch, yielded $60,087 from September, 1867, to August 31st, 1868, and until the close of the season, the following sums were taken out weekly:

$2402 75	$2053 00	$2706 50
1824 50	3623 89	2882 08

And $500 50 during the following week, when no more work was done until May 3rd, 1869. Since then, the following are the weekly receipts from the claim:—

$1775 50	$2467 83	$2698 25
4837 66	1563 76	2165 50
3929 77	1852 72	2128 50
5525 25	1386 69	1696 25
6685 80	1070 49	788 25
6712 10	2439 67	1535 75
2908 04	1175 00	1466 00
2908 04	2266 00	720 50
2098 50	3176 00	1172 50
4285 50	2789 25	

The following amounts represent the dividends paid monthly to the holder of one interest in the claim:

May . .	$2023 77	August . .	$642 66
June . .	1392 63	September,	1044 00
July . .	594 68	October .	395 21

For the present month a dividend of $300 is anticipated if the claim shall be worked during the next week. There are eight interests in the claim. The company worked at different times during a period of five years prior to striking pay, and their drain and lower shaft cost $9000. The current working expenses have averaged about one-third of the yield of gold. We are indebted to Mr. Henry Brackman, the courteous secretary of the company, for these particulars.

NOTICE.—The following notice appears in the Canada Gazette:—"Public notice is hereby given that an application will be made to the Parliament of the Dominion of Canada, at the next session thereof, for a charter to construct a Railway from Fort Garry, on the Red river, in the North-West territory, westward to the confines of British Columbia, and eastward to such point of connection with existing railways in the Province of Ontario as may be found most desirable, with power to construct a branch of the said railway from Fort Garry to such point on the frontier of the United States, at or near the Pembina, as may be deemed most advisable. The said charter will be asked for in the name of the Canada Pacific Railway Company. N. B.—The Canada Central Railway Company is already provisionally organized." Another notice also appears in the Gazette from the Dominion Pacific Railway Company, who contemplate building a railway to the Pacific Ocean.

THAT SLEIGH ROAD.—A correspondent called attention in our last issue to the necessity for a sleigh road from Barkerville to Dragon creek. We understand that the Gold Commissioner is quite willing to have such a road made, providing there be or is likely to be a sufficient number of miners on Dragon creek to justify the necessary expenditure, and that the miners themselves will render some assistance in the work, as was done recently in the case of the Keithley and Harvey creeks trail. Under any circumstances, however, a road should be made toward Dragon creek by government, not for that creek alone, but for opening up all that section of the district in which Dragon creek is situated, but it ought to be something better than a mere temporary convenience.

ATTENTION, FIRE BRIGADE!—You are requested to meet this evening, at half-past seven, at the Hall, in uniform, to proceed in a body to the Theatre.

COURT PROCEEDINGS.

(Before C. Brew, Esq., Gold Commissioner and County Court Judge)

SATURDAY, Nov. 13, 1869.

H. Steele (colored) vs. L. Nufon.—This was an assault case.

Plaintiff testified that on Wednesday evening, the 10th inst., he was coming up the street in Richfield, when he was suddenly assaulted by defendant, hit over the head several times with a bludgeon and knocked down; believed he would have been killed if Mr. McLane had not been there.

John McLane (colored), sworn—Defendant came to his house in Richfield on the evening of the assault and called witness out to speak with him; went out and found defendant standing there; while they were talking Steele came up, and as soon as he came near enough, defendant hit him several times with a club and knocked him down; witness went to separate them and defendant ran away.

Defendant gave evidence to the effect that he came to McLane's house to engage him to haul some wood, and, as he had previously had a difficulty with Steele, took a stick along to protect himself. While he was talking with McLane, Steele came along and attempted to lay hold of him; he stepped back, drew his cudgel and gave him (Steele) a "tip;" struck him three times; ran away because there was a gun in the house and he was afraid of them firing on him; got two men to come down with him, for fear the gun might be used.

Defendant was committed for trial at the assizes. Bail was fixed at two securities of $250 each and defendant in $500.

FRIDAY, Nov. 19, 1869.

A few unimportant cases were before the court to-day. In one of them the plaintiff swore one way and the defendant precisely the opposite. The Judge postponed the case for further evidence.

PEACE RIVER.—We have studiously refrained from giving publicity to all that we have heard respecting the new diggings recently discovered near Finlay's branch of Peace river, because we did not wish to become responsible for statements which had not any reliable source. We are well aware that nothing can stop a "rush" when the "fever" has set in, and our cautiousness was not, therefore, exercised with the object of preventing the same; but in the event of Peace river turning out another Big Bend, we would be free from any blame. While, however, we have followed a non-committal course, and have recommended patience until some confirmation of the reported rich strikes are obtained, we are quite certain that the reports lately circulated by men going down the country, to the effect that the reported discoveries are bogus reports, have no foundation in fact. We are quite certain that gold, in moderate quantities, at least, was found by the Peace river prospecting party, and are willing to believe that they did not exaggerate the facts in saying that they obtained 35 oz. to the hand. Indeed, if there be any inaccuracy in the published report of the prospecting party, we are inclined to think that it would be found in an underestimate of the amount of gold, rather than the reverse, because they seemed to be so extremely anxious to avoid creating any "excitement" about their discovery. The fact of the immediate return of the party is not likely to be accepted as ground for believing that there was anything bogus about their report; and, indeed, nobody here entertains a doubt that gold diggings have been found as stated. The public committee is composed of men possessed of more common sense and integrity than is sought to be implied by the alleged fabrication of bogus reports for the purpose of creating a "rush" for the temporary profit it would bring. What we have published in relation to Peace river we believe to be substantially true. We have seen part of the gold, and there is none so nearly like it in Cariboo that would deceive the eyes of the many persons here, who also saw the metal, as to the place from whence it was taken. It is scarcely worth while, however, to enter into details about this matter, as we are quite confident that the reports circulated along the road, as above-mentioned, are merely the slanderous machinations of malignant tongues, and no one who considers all the known facts and circumstances connected with the Peace river party will doubt the essential part of the question thus raised, namely, that new gold mines have been found as reported. The promoters and organizers of the late expedition must naturally feel chagrined at the odium that is attempted to be cast upon their praiseworthy efforts to develop our mineral resources, but they may rest assured that the slanderers will meet with no more success than that of enjoying the contempt they deserve.

EXPRESS.—The mail may be expected here on or about the 24th.

MINING RECORDS.

WILLIAM CREEK.

Lillooet co.—Nov. 18—David French, a strip of ground situated on Williams creek, commencing at the upper line of the Lillooet co., and running up stream about 75 feet to the lower line of the Caribo co., in width from base to base of side hills. To be worked as part of the Lillooet co's ground.

STOUT GULCH.

Mucho Oro co.—Nov. 16—Samuel Roberts, David Edwards, Jas. Innis, Thos. Lavery and Robt. C. Orr, five hill claims on left bank, commencing at the Jenkins co's upper line and running up stream 500 feet. A re-record of the Mucho Oro co's hill claims.

VALLEY CREEK.

Garibaldi co.—Nov. 18—Wm. T. Crossley, Thomas Anderson and Angelo Belmano, three hill claims on Steel's trail, Valley creek, commencing about 500 feet at the French creek side of the Barker co. No. 2, and running up stream 300 feet.

PINE CREEK.

Discovery co.—Nov. 18—Hugh Doak and Martin Anderson, two discovery hill claims on right bank, pointing on Cariboo lake; also 150 inches of water, to be taken from Pine creek, about a thousand feet above the upper line of the Discovery co. Said co's ground is situated about half a mile from the mouth of Pine creek, running up stream 400 feet.

Kirwin co.—Nov. 18—P. Kirwin, Hugh Doak, Martin Anderson, J. K. Barker, N. Gardell, Jas. A. Magwood and Nic. Bailey, seven creek claims, situated immediately above the canyon and running up stream 700 feet.

A NEW IDEA.—Messrs. Brown and Adair have opened negotiations for the purpose of procuring a steam-engine to work their claim on Conklin gulch. It is to be capable of raising a ton of dirt and pumping a six-inch stream. With this engine they intend to commence a new system of mining. At least, it is new for Cariboo. Instead of the ordinary shaft, they will run an incline and use large cars for carrying the dirt to the surface. The pumping apparatus and engine will supersede the expensive tunnel. A great economy of labor is calculated to be obtained by these means, and ground which will not pay when worked in the usual way will yield a good profit over expenses. It is only by the introduction of steam and iron machinery that we can look for any great development of our mining resources.

MOSS.—Mr. Cowley, of the Rocky Point company, Grouse creek, has collected a sample of the various kinds of moss found in Cariboo, and preserved them in a large glass case. They form a magnificent natural picture. It is curious how so simple a thing as moss, grouped in variety, presents such beautiful contrasts in color and form. Mr. C. has, during the past summer, discovered a variety of indigenous fruits, and among them was a splendid sample of red currants.

THEATRICAL.—To-night the Cariboo Amateurs will perform the amusing comedietta entitled "To Oblige Benson," and the laughable farce, "The Limerick Boy." The Fire Brigade will attend. A lively house and a lively entertainment may be expected.

INSTRUCTION.—Mons. B. Deffis desires us to state that he intends opening Evening Classes for instruction in Arithmetic, French, Spanish, English Grammar and English Composition. He will give also private lessons in the dead languages, &c., if desired. The classes will be opened on the 15th November next, at half-past 7 o'clock, p.m. The terms will be $12 per month, payable in advance. Parties desirous of going through a regular course of lessons are requested to give him their names before the 5th of November next, so that he may have time to organize the classes and send down to Victoria for books. No application will be received after the 10th November. Mons. B. Deffis is well known in this colony as an efficient professor of languages. Having had several years experience in teaching, his mode of tuition will be found easy and effective. This is a good opportunity afforded miners to employ profitably the long winter evenings.

NEW WINTER STOCK—C. McCallum would inform his friends and the public that he has just received a considerable addition to his stock of Coats, Pants, Vests, Canvass Pants, Blue Overalls and Jumpers; Heavy Overshirts, Baltic Shirts, English and Oregon Underclothing, Woollen Scarfs; English, Scotch and Oregon Socks; Cloth, Ringwood and Aberdeen Gloves; Kid Mitts, lined; Neck Ties, Turkish Towels; Cambric Handkerchiefs, and an assortment of Felt Hats. All the above goods will be sold cheap for cash. Pants and Vests made to order. Parties wishing to have their clothing made to order by A. Gilmore, Victoria, may have their measures taken by Mr McCallum, in order to secure a good fit.

HAVE FAITH IN ONE ANOTHER.

Have faith in one another,
When ye meet in friendship's name;
For the true friend is a brother,
And his heart should throb the same.
Though your path in life may differ,
Since the hour when first ye met,
Have faith in one another,
Ye may need that friendship yet.

Have faith in one another,
When ye whisper love's fond vow;
It will not be always summer,
Nor be always bright as now.
And when winter comes o'er ye,
If some kindred heart ye share,
And have faith in one another,
Ye shall never more despair.

Have faith in one another,
For should doubt alone incline,
It would make the world a desert,
Where the sun would never shine.
We have all some transient sorrow,
That o'ershadows us to-day;
But have faith in one another,
And it soon shall pass away.

Have faith in one another,
And let honor be your guide,
And let truth alone be spoken,
Whatever may betide.
The false may reign a season,
And oh! doubt not that it will;
But have faith in one another,
And the truth shall triumph still.

SATIRICAL.—The Nevada county papers are indulging in friendly sarcasms upon the leading towns in that county. The Grass Valley Union says of Nevada City: "It is said that the jingle of a half dollar can be heard from one end of the town to the other when that bell is not ringing. If a man goes to Nevada City with two half dollars in his pockets, the natives there will see to it that he does not get lost before he parts with the coin. The population entertain him till that is gone. That's what Nevada City is built for. The stranger there is the only quartz mine they have. They crush and clean him out in the most complete manner."

SCALAWAGS.—Scalawags are a class of politicians that sprung up at the South since the war. They are distinguished from the carpet baggers in the fact that they are native and to the manor born, while the carpet-baggers are intruders from the Northern States, who have come down to forage on the country. The scalawags, however, are much the meaner, for they would prey upon their own people—their kindred and brothers. The term scalawag is a word used by dealers in cattle. It applies to the mangy, scurvy animals in the herd that are neither ornamental nor useful.—[S. F. Examiner.

BRAZILIAN LONGEVITY.—Custodio Jose Moreira died recently in the town of Franca, aged 135 years! He was in the habit of working steadily until within the last eight years; his nourishment was scraped cheese, wine and sugar. The Anglo-Brazilian Times states that D. Sabina Maria de Lemos, mother of the Baron do Rio Verde, died in May last, in Minas Geraes, aged 115 years, leaving over 300 descendants, down to the fifth generation.

DRAMATIC.—As an instance of the value of dramatic talent in London, it may be mentioned that Mr. Toole has just paid Mr. Byron £650 as the minimum price of a three-act domestic drama. In the event of the drama having a long run, the author is entitled to receive still further sums.

PHYSICAL CHANGES.—Jersey and Guernsey are slowly sinking. Their places will some day be marked by light ships anchored to what is now fertile soil. Meanwhile, new islands rise in another hemisphere, and Chile and Sweden are being slowly elevated to attain a height no man can guess.

WANTED TO FORK OVER.—An Australian shepherd, writing home to his mother, says: "Good fat mutton is very plentiful here. I often wish I had a fork long enough, so that I might stick a piece on the end for your dinner."

INVITED THEM.—A girl in Pitsfield was struck dumb by the firing of a cannon. A number of married men have in consequence invited the artillery companies to practice near their premises.

WOMEN RATEPAYERS.—By the new Municipal Franchise Act, all women householders, in England, whose rates have been paid, have a right to vote in the election of town councillors in the (present) month of November.

OBITUARY.—General Perronet Thompson is dead. He was famous in England as one of the champion corn law repealers. At the time of his death, a few weeks ago, he was 86 years old.

HOW IT GOT UP.—"Pompy, de corn's up!" "Why, I only planted it yesterday!" "I know dat; but de hogs got in last night, and guv it a lift."

MISCELLANEOUS.

A projéct is on foot in Italy to cut a ship canal through the peninsula, between Rome and Ancona. The cost is estimated at $60,000,000.

In consequence of Mrs. Stowe's beastly story, there has been a great run on Byron's works, especially on the "naughty" poems. "Don Juan" goes like wildfire, and "Parisinia" is much called for. The worst of all this is the fact that young ladies of 16 or 17 years are most numerous among the applicants for these works.

The female jumpist, of Dorchester, Kate Murphy, who recently won a purse of $250 by outjumping a man named Flynn, jumped another match last week for a purse of $400. Her opponent on this occasion was one of her own sex, a Maggie Fisher. Murphy was the favorite at two to one. The costumes of the jumpists were as follows: Murphy, a red waist, a white merino skirt and a blue velvet cap; Fisher, green trunks, buttoned at the knees, white stockings and garters. Fisher first jumped 10 feet 9¼ inches. Murphy cleared 11 feet 3 inches. On the second trial Fisher made 11 feet 1½ inches, and Murphy 11 feet 2¼ inches. So Murphy took the purse of $400. The match came off near Boston.

About thirty-six years ago, an inventive Yankee published a pamphlet giving a wonderful account of the discovery, by Sir John Herschel, of men in the moon. The pamphlet sold by hundreds of thousands in England, and the author netted a little fortune. Professor Ainslie, of Wayne county, Pennsylvania, goes a step farther than the pamphleteer of thirty-six years ago, and professes to have discovered inhabitants of the sun, by the help of photographic pictures taken during the recent eclipse. "The figures," says the Professor, "were figures of men and women, apparently engaged (the men) in the same work as we, namely, taking astronomical observations, most likely of the earth." The Professor has not published a pamphlet on his discovery, but he has any number of photographic pictures for sale, in which the females of the sun are seen, with "fiery curls," and "seated upon rocks of diamond shape." Manufactures have not made much progress in the sun, for the females appear nude, but that may be attributed to their being in too much heat.

There are very few, if any, white men in this city who are prepared to admit equality between themselves and the Mongolians. Party ties may oblige them to swallow certain doctrines in reference to this race, but in their hearts they reject them. But if their pride is wounded at being put on an equality with the Mongolians how much more keenly must they not be stung when they learn that the Mongolian considers himself absolutely superior to Freedom's Defenders. Yet this is absolutely so. We paid Chinatown a visit some time since, and were shown into a large dark room, used for drying tea; and on inquiry were informed that the leaves we saw spread out to dry were those collected about the Chinese quarters. We were told they were quite good; that they had only undergone one process of drawing, and that when prepared and turned out for the market, Americans could not tell the difference. Besides this, John and his mooneyed sisters drink tea very strong, and they claim they never extract all the "color" from the leaves. The rather fastidious epicures of the Radical party will scarcely credit the fact that the subjects of his Celestial Majesty consider the second run of the teapot good enough for them.—[San Francisco paper.
