EMPRESS OF IRELAND LOSS RANKS WITH GREAT MARINE DISASTERS OF THE CENTURY

The loss of life on the Empress of Ireland has been equalled or exceeded by only four marine disasters in the last century. These were the loss of the Rhone, Wye, and other vessels at St. Thomas, in the great hurricane of October 29, 1867, when 1,000 persons perished; the burning of the excursion boat General Slocum, in the East river, New York, on June 15, 1904, with an approximate loss of 1000 lives; that most terrible of all marine disasters of modern times, the loss of the Titanic on April 14, 1912, which sank after a collision with an iceberg with 1490 of her company; and the loss of Kike Maru off the Japanese coast on September 28, 1912, with 1000 lives.

Other disasters that approximated in loss of life the fatality list of the Empress of Ireland were the Princess Alice sunk in collision in the Thames river, September 3, 1878, with a loss of 700; the Ertogrul, foundered off the Japanese coast, September 28, 1890, lost 540; the Utopia, sunk off Gibraltar in collision March 17, 1891, with a loss of 574; the Norge, stranded off Rockall reef, June 25, 1894, with a loss of 600; La Bourgegne, lost in collision in the North Atlantic, July, 14, 1898 with a loss of 571; the Japanese battleship Mikasha, blown up on September 12, 1905, with a loss of 599.

NOTICE!

The present Lessee, Editor and manager of the Creston Review, A. B. S. Stanley begs to state that he has not been responsible in any way for the sending out of notices threatening court procedure for delinquent subscribers. He has only had to do with this paper since July 1st 1913.

At the same time he would appreciate it if those who owe from that time would come in to see him about the matter as it costs considerable to get out the paper and money is scarce.

DUCK CREEK NEWS

With weather that could not help but satisfy the most exacting person, the Duck Creek Social Club held their first picnic of the season on Sunday last. Nearly 60 people were present including a party of 17 from Canyon City, Creston, and Erickson. From 11 a.m. until 7 p.m. the crowd enjoyed themselves on the lake and on the shore, some enthusiasts tried fishing, but met with little success. Football and several other games were indulged in as well as the large swing for the children. Through the kindness of Monrad Wigen a great many of the people were afforded the pleasure of a trip on the lake in his motor boat. Great excitement was caused toward the later part of the afternoon when a number of boat races took place, the best race was that rowed by Mr. August Johnson and Mr. John Johnson, who after running the full length of the course almost neck to neck, finished with Mr. August Johnson about 1 foot ahead. Billy Embree and Billy Truscott had a very hard fought race, but we are not yet decided who really won. The management wish to thank all those who so kindly lent their boats for the day and also the ladies who supplied so many good things with which to replenish the inner man.

J. J. Grady was a Creston caller Monday.

Miss Phoebe Butterfield and Miss Emma Johnson who have been in Cranbrook for the last five months, returned to their homes on Monday.

Paul Hagen was a Creston caller Tuesday.

Mrs. Williams was a Creston caller Wednesday.

The Sunday School class of the Roman Catholic Church of Creston were out picnicing at Duck Creek on Wednesday. The Rev. Father John was in charge of the party and to judge from the noise they made as they were driving home we should imagine they had a good time.

Miss Florence Bathie was a Creston caller Thursday.

When you want your next job of printing done, no matter what the job is, bring it to the Review office. We guarantee a first class job and our prices are right.

ALICE SIDING NEWS

Mr and Mrs. Gordon Smith returned from Phoenix, B. C. to visit with his parents Mr. and Mrs. J. Stace Smith.

Mrs. R. Stewart commenced selling strawberries June 1st.

Jack Smith is slashing timber for J. R. Miller.

W. A. Pease has finished work on Little Avenue.

Mr. R. Bahlae of Swift Current, Sask. was here looking over his 40 acres recently purchased from J. F. Rose and making arrangements for a house to live in until he can build. He expects to move his family up here in October.

The ladies of Alice Siding had their regular fortnightly meeting on Wednesday, we expect there was considerable important business transacted.

Buy your fishing tackle from Embree. The trout climb out on the bank for the bait he sells.

CANYON CITY NEWS

Leslie McInnis has moved to camp 2 and is looking after the Canyon City Lumber Co.'s stock park.

A. D. Pochon had the misfortune of losing a valuable Jersey cow on Sunday.

Charlie Wood returned to his home here.

J. Wearmouth has purchased four head of cattle.

C. S. Hall is ranching again.

We are sorry to hear of Mrs Heald being thrown from a horse on a visit to D. G. Lyons.

The big tie contract the C. C. L. Co. had with the C. P. R. has been cancelled.

The Goat River hills are in bad shape. We have great need of a high level bridge.

Several surveyors have been at work about the Canyon recently.

J. P. Guimond is wanted. We can benefit him when we find him. Communicate 418 Loo Building, Vancouver, B. C.

See E. W. Rvckman for your next job of tinsmithing or plumbing.

QUEBEC IS ACTIVE IN FOREST WORK

The Forest Service of the Province of Quebec now employs a total of six professionally trained forests. Nearly all these men have received their professional training at the Forest School at Laval University, Quebec.

During the summer of 1913, the Forestry Branch had fourteen parties in the field, each in charge of a teachnically trained forester. The undertaken by ten of these parties was a valuation survey of unlicened Crown timber lands. Of such lands, there are approximately 125,000 sqnare miles in the Province of Quebec. The Crown lands under license aggregate approximately 70,000 square miles. The revenue from these landsduring the past year has aggregated nearlv one and three quarter million dollars.

In addition to the ten parties engaged as about, four parties were engaged in an examination licenced lands, to determine the boundaries of permanent forest reserves. It is the policy of the Quebec Govenment to segregate nonagricultural forest lands into permanent forests reserves as rapidly as the necessary information can be secured.—C. L.

George Heald has moved to town and will occupy Reid's house on Fourth St.

Mr. and Mrs. H. B. MacLeod, of Cranbrook, came to town Saturday and spent a day or two looking up the land proposition. They may possibly come here to reside, before long.

D. Logan, of Wardner, brought in a man yesterday who was charged with making away with a saddle and bridle belonging to a local livery man The case will come up in a day or so.

The warm weather at the first of the week brought the water up in the river and the Canyon was at the high-water mark. An old-timer said it was higher than he had seen it in 21 years. The drop in temperature last evening had an immediate effect and now the water is rapidly receding.

George Broderick returned Monday from Kamloops where he was in attendance at the Grand Lodge of the K. of P. as delegate from the local lodge. He says it was a very interesting session and he will have a report for the next meeting which will be held on Monday June 15th.

NOTICE!

I have authorized Lancaster & Co. to issue receipts for all monies paid on accounts due me.

S. A. SPEERS

WEEKLY COMMENT BY OUR EXCHANGES

"Some extremely learned people are now engaged in an effort to determine the exact weight of the moon. When this shall be accomplished others perhaps may undertake to determine the exact value of moonshine."—Christian Science Monitor.

It is quite likely that the conference of mediators to adjust the trouble between the United States and Mexico will prove a failure. The present indications are that the Huerta government will be wiped out of existence long before the peace envoys reach Niagara.—Grand Forks Sun.

Dr. Fry was called to the Idaho Continental mine west of Port Hill the latter part of last week to attend to two men wounded in an accidental explosion. The last 14 miles of the trip was passable not even for a horse and the doctor was thus obliged to cover the distance both ways afoot There are several feet of snow still in that section and the walking so the doctor says was very difficult. One man was so seriously injured that he was in no condition to be brought out, but will probably recover.—Bonner's Ferry Herald.

Notwithstanding the fact that financial conditions are not at present favorable to any comprehensive program of public works, the road extensions and improvements to be made this year in the Revelstoke district are extremely substantial and will constitute a genuine improvement to the already excellent system of roads in the district. Not only will the improvenments and extensions to the road system be considerable, but they will be permanent. One feature of the roads constructed in the Revelstoke district is their substantial character. There are no better roads in the interior of the province than these built under the superintendance of Mr. Edward Trimble.—Mail-Herald.

Already interest is being manifested in the Trail Fruit Fair which will be held on Sept. 17-18. The apple-packing contest has been decided upon, three awards being offered, 1st $15.00, 2nd $10.00 and 3rd $5.00. Nerlick & Co., of Toronto have donated a cut glass bowl. Hunter Bros. of Rossland, will donate a special prize, as will also W. H. Gunning, of Rossland; Nelson Hardware Co. Nelson, and Henry Birks & Sons, Ltd., Vancouver. E. G. Prior & Co Ltd. of Vancouver, have donated a spray pump to the value of $10. A desk set has also been donated. Three entries have already been made in live stock. The prize list book is expected to be to hand shortly.—Trail News.

Victor Carr was in town on business to-day. Everything points to a bumper crop out his way.

FOREST PRODUCTS LABORATORIES

It has been estimated that in converting logs into finished lumber and lumber products, the waste amounts to over 50 per cent of the bulk of all trees cut for lumber. This equivalent to an annual loss of from $10 to $15 for every man, woman and child in the country At present it is impractible from a financial standpoint to reduce this waste as there is no market for the tree tops, culls and weed-trees left in lumbering operations and only a very limited one for the bark, slabs sawdust, ekgings and trimmings of milling operations.

The department of the Interior is recruiting the staff of its Forest Products Laboratories recently established in connec ion with the Forestry Branch, with skilled mechanical and chemical engineers and by constant experimentation it is hoped to find a commercial use for these products.

Already a good start has been made The laboratories, which are operated in connection with McGill University contain the most complete equipment on the continent for making timber tests. It is planned to submit each Canadian wood to over a thousand tests in order to establish as complete tables of the mechanical properties of these woods as now exist for steele and co crete. When these tests are published as accurate information as can be obtained will be at hand with regard to such questions, for instance, as to how great a weight a wooden column of a particular species will stand without risk of breaking how great a burden can be carried by a beam of a certain species of wood of given dimensions, and other similar questions.

Timber has often been shunned as a structural material material because no reliable figures regarding its strength were available, and when complete tests have been made it is regarded as certain that a demand will be created for some of Canada's tree species whice are now left in the woods as valueless.

The Forestry Branch of the Department of the Interior, Ottawa, of which these laboratories are one development has recenty issued a circular describing the various lines of investigation to be followed at these laboratories. Not the least important will be to develop chemical methods for utilizing minor wood wastes and another circular by the engineer in charge of this work deals with the general aspect of the subject. A large percentage of the small sized waste wood can be utilized by the process is not very efficient. The manufacture of ethyl alcohol and producer gas from sawdust has already been feasible, and the securing as Superintendent of the Laboratories of John S. Bates, B. A., B. Sc., one of the foremost authorities on wood-pulp manufacture in, America, ensures the development of this Branch of Wood Utilization.

—Send for our prices on furniture, we pay the freight. C. C. S.

Ike Lewis made a flying trip to town Monday. He reports plenty of water down his way although not as much as last year.

A. D. Robarge left today for Portland, Ore. to take in the Rose Show. He informs us he has bought a place on the West Arm, near Willow Point, and will take possession in a few weeks.

Miss Bradly, who returned to town early in the week, is again installed in the Fruit Growers Union as chief clerk for the season. Miss Bradley was real glad to get back to Creston again although she reports a very pleasant holiday with friends in Washington.

SOIL LEADS ALL IN FERTILITY

In a letter to Chas. G. Reeder of Spokane, Prof. Thos. Shaw, agricultural expert for the Great Northern Railway company, speaks in glowing terms of the agricultural possiblities of the Kootenai valley. He says, "Once provide drainage for this land and it would not be easy to over estimate its value". The letters follows:

"In the valley of the Kootenai river between Bonners Ferry and the Canadian boundry are some 30,000 acres of valley land which are subject to annual inundation from the overflow waters of the river. One peculiar unfortunate condition pertaining to the submergence of this land is the season of the year at which it comes, more commonly in late June and July, so late that it is not possible to sow any grain crops that will mature the same season. A second condition equally unfortunate is the depth of the submergence and its continuity. Some seasons the overflow submerges much of the land to the depth of several feet, and the water covers the land usually for several weeks. This means that no kind of cultivated crop plantee before the time of the submergence can continue to live. The amount of similar overflow land on the Canadian side is even greater.

"The cause of the overflow is the impounding of the water of the river in the Kootenai Lake, which is a river lake. The cause of the impounding of the water is a largely filled channel some five miles in length which prevents the water from flowing out with sufficient quickness into the Columbia river. The remedy is the lowering of the outlet by dredging to an extent that will prevent the impounding of the waters. Some estimates make the charge for such dredging at $20.00 per acre for the reclaimable land, other estimates have placed it higher. However, it is an international question and to accomplish it the sanction of both governments would probably have to be secured.

"The soil is silt that has been carried down from higher levels. On digging down into it several feet, no change could be noticed by the eye in its composition. Beyond all question it is possessed of great fertility and of great wearing power. Owing to its mechanical condition it could sustain the deepest rooted plants as alfalfa. It should produce several crops of this great forage plant every season and for an almost indefinite period without fertilization. It would produce crops of clover of all the useful kinds in great luxuriance, also timothy, orchard grass, rye grass, meadow fescue, red top and Kentucky blue grass. Permanent pastures could thus be laid down that would equal the best of those in England, not only in productivity but also in permanence. This land would grow any of the kinds of grain produced in temperate climates. The only danger that could arise would be injury from an excess of straw. It would grow such forage crops as corn, millet and kindred crops excellently well, and would also produce enormous crops of potatoes. It would also be a paradise for small fruits and larger varieties should it be desired to grow them. Once provide drainage for this land and it would not be easy to over estimate its value."

C. F. Hayes, of Edmonton, was in town Wednesday and Thursday talking business to the Creston Printing and Publishing Co.

THE CRESTON REVIEW

The Creston Review

Published every Friday at Creston, British Columbia, by the Creston Printing and Publishing Company, Ltd.

The Review is the acknowledged advertising medium of the Creston valley, circulating in nearly one thousand homes throughout the Creston district and reaching out in a broad manner into other communities. Our advertising rates are based on the scale of the Kootenay and Boundary ... ters' Board of Trade. Land purchase and land lease notices, $7 for statutory time. Display advertisements, $1 per inch per month; other advertising 10 cents per line first issue and 5 cents per line in succeeding weeks. Subscription rates $2.00 a year in advance. Our columns are open to contributions dealing in matters of local interest and the welfare of the community. Contributions must be brief and signed.

A. B. S. Stanley - - - Lessee, Editor and Manager

One of these days the militants will touch the mob on its tenderest spot and there will be such an upheaval that no public man will dare to whisper political equality for a generation. The outrages these lunatics are perpetrating are making it impossible for any political party to take up the cause of women suffrage without risking annihilation. The militants profess to scorn man-made laws. But there is another law they might find more difficult to ignore, a mob-made law, in which not only men but infuriated women will have a hand.—Victoria Times.

While attempting the arrest of a tramp yesterday a C. P. R. detective took a chance for his life, the Weary Willie drawing a gun and pointing it at the officer. A quick move and the weapon was knocked from the tramp's hand. Most likely this was all that prevented another tragedy.

The dective presented his prisoner to the magistrate, after due consideration, decided that a month in jail would be about the limit of punishment which the offence warranted.

Next thing we know some magistrate in a similar case somewhere will be letting the prisoner go free and ordering the police officer to pay him a gratuity for life for having failed to pull the trigger.—Calgary Herald.

Speaking in the legislature, Lorne Campbell, M. P. P. for Rossland, stated that the prospector had been driven out of the country, and he urged measures to encourage a renewal of prospecting. The fact that the mines of British Columbia continue to distribute a quarter million dollars every month in dividends, or rather better than the old-established gold camps of Colorado, does not prove anything contrary to the statement of the member for Rossland, says the Omineca Herald. Present dividend payers were prospected and developed at that stage of British Columbia's history, when mining was in its infancy and its extent unproven, and the prospector shared the hardship common to other callings in the pioneer days. But with the development of country, through government assistance to agriculture and other commercial activities, those really really responsible for the present proud position that mining occupies in the province have never been encouraged, in fact the many petty obstacles strewn along the path of the prospectors have been irritating and increasingly discouraging.

Now that the time is drawing near when the Duke of Connaught will retire from the office of Governor-General, it may not be amiss to mention that a fear, expressed by not a few people at the time of his appointment, has not been borne out by facts. It was thought by many people that the presence of a member of the Royal Family in Rideau Hall might have an effect upon social conditions that would be the reverse of beneficial. That some people would have been glad to have surrounded the Duke and Duchess with an exclusive circle may be taken for granted, but it very soon became apparent that Their Royal Highnesses had no mind for that sort of thing. While animated by every due sense of its own dignity, the Royal House is democratic in the best sense of the word. Its members put on no side. Many are the antedotes of the late King Edward which show this to be true. Those who remember King George when he was here, know that he is a plain simple, sincere gentlemen, having no undue sense of his personal importance, and animated by a strong sense of duty. We had a news item recently about the Prince of Wales which shows him to be just a decent wholehearted fellow, assuming nothing because he happens to be heir to the crown. The impression conveyed by the Duke of Connaught is that he is a man who has no other idea than to discharge his duty as he undertakes it. In this respect he has set Canadians a very excellent example. So far from any evil effects of a social nature having arisen out of his sojourn here, quite the contrary has been the case. His social influence has been altogether of a leveling character, a leveling upwards not downwards, for he has shown us that the son of a queen, the brother of one king and the uncle of another is nothing else than quiet gentleman, trusting to worth, not to position as his claim to merit. Canada will be none the worse for such a lesson as he and the Duchess have unconsciously taught the people.

NEWS NOTES FROM FORESTRY BRANCH

There is a flourishing forest school in the Philippines, and 28 men were graduated with the class of 1913.

To secure a merit badge in forestry, boy scouts are required, among other things, to identify 25 kinds of trees.

Canada cuts about two million cords of pulp wood annually, about half of which is exported for manufacture in the United States.

In general it may be stated that the most dangerous forest fire periods in the west are in middle and late summer; in the east they are in the spring and fall.

The next Canadian Forestry Convention will be held at Halifax, N. S., September 1 to 4, 1914. This will be the first Canadian Forestry Convention ever held in Nova Scotia.

The Dominion Forestry Branch and the British Columbia Forest Branch each employ about thirty technically trained foresters. The Province of Quebec employs sixteen, and Ontario two. Nova Scotia has provided by law for the appointment of a provincial forester, but the appointment is still pending. New Brunswich needs a provincial forester, and has the matter under consideration.

SYNOPSIS OF COAL MINIG REGULATIONS

Coal mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands

W. W. CORY,
Deputy Minister of the Interior.

WATER NOTICE

Application for Licence to take and use Water will be made under the "Water Act" of British Columbia, as follows:—

1. The name of the applicants are, Wm. H. Reed and Wm. Mather.

2. The address of the applicants is Creston.

3. The name of the stream is Lizzard Creek. The stream has its source in Rolf mountain, flows in a westerly direction, and empties into Kootenay Flats at Wynndel Junction.

4. The water is to be diverted from the stream on the South side, about five hundred feet from the C. P. R. track.

5. The purpose for which the water will be used is irrigation

6. The land on which the water is to be used is described as follows:—Block 126 K. V. Lands, Block 129A, K. V. Lands, the north 18.35 acres of lot 8645 G I Kootenay

7. The quantity of water applied for is as follows:— one half cubic feet per second.

8. This notice was posted on the ground on the sixth day of April, 1914.

9. A copy of this notice and an application pursuant thereto and to the requirements of the "Water Act" will be filed in the office of the Water Recorder at Nelson. Objections may be filed with the said Water Recorder, or with the Comptroller of Water Rights, Parliament Building, Victoria, B. C.

FIFTH BRIGADE OFF FOR MEXICO

The Fifth U. S. Army Brigade embarking on army transports at Galveston for Vera Cruz. Four transports were used, the Kilpatrick being the largest, carries most the equipment and the army mules. The Fifth is composed of four full regiments and is commanded by General Frederick Funston. The brigade embarked with full field equipment and provision for a long campaign. Rear Admiral Fletcher in command of the fleet at Vera Cruz will co-operate with Gen Funston, but Gen. Funston being of higher rank, he will have supreme command on shore and will have full charge of both soldiers and marines as well as of the operations of the landed blue jackets until the later are withdrawn to their ships, just as Gen Chaffee was in command of the American soldiers and marines landed in China during the Boxer troubles twelve years ago. To reinforce the Fifth Brigade, the First Battalion of the Fourth Field Artillery with 15 officers and 900 enlisted men is also enroute to Vera Cruz.

SECRETS OF SUCCESS

"What is the secret of success? asked the Sphinx.

"Push," said the Button.

"Never be led," said the Pencil

"Take pains," said the Window.

"Always keep cool," said the Ice.

"Be up-to-date," said the Calendar.

"Never lose your head," said the Barrel.

"Make light of everything," said the Hammer.

"Aspire to greater things," said the Nutmeg.

"Be sharp in all your dealings," said the Knife.

"Find a good thing and stick to it," said the Glue.

"Do the work you are suited for," said the Chimney.

See E. W. Ryckman for your next job of tinsmithing or plumbing.

MINERAL ACT

(FORM F.)

CERTIFICATE OF IMPROVEMENTS

NOTICE.

Blue Stone and Black Stone Mineral Claims situate in the Nelson Mining Division of West Kootenay District.

Where located:—On Sheep Creek, adjoining the Nugget Mine on the north.

Take Notice that I, A. H Green, acting as agent for Pierre Dionne, Free Miner's Certificate No. 61291B, intend, sixty days from the date hereof, to apply to the Mining Recorder for certificates of Improvements, for the purpose of obtaining Crown Grants of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificates of Improvements.

Dated this 30th day of April A. D. 1914.

A. H. GREEN

To the People of Creston

Have you given us a trial order yet? If not, why not. If we cannot give better satisfaction than the firm you are dealing with, we don't ask for your business.

If you can save money by dealing with us, then it is a matter of dollars and cents. Sentiment should never enter into a business transaction.

It is a man's right, or to put it stronger, it is his duty to his family to deal where he can get the best value for his money.

Money is tight and we think we can help you to make it go further.

Try us and See.

Lancaster & Co. General MERCHANT

HOW MUCH DO YOU KNOW ABOUT CANADA

Canadians, as a rule, know to little of their own country. To know Canada, even in a general way, from coast to coast and from to the boundary to the northern limits of settlements, is a big order, but it is one to which every citizens of this country should apply himself. The study of the Dominion is not only interesting; it is decidedly profitable. It increases the pride of the reader in his own land, and it reveals to him possibilities of which he has never dreamed, but which he may himself realize—if he will.

These remarks are suggested by the perusal of a volume entitled "The Western Provinces of Canada" which contains as much solid information concerning the great territory in which are included Manitoba Saskatchewan, Alberta and British Columbia, as can be crowded into 112 pages of closely printed but very readable matter. The book contains detailed information concerning the provinces mentioned, covering such points as area, climate, precipitation, products, etc There are tables showing the grain production every year since 1901, and the average prices of wheat, oats, barley, and flax for the last six years. The plan of Western land survey is explained; the homestead regulations are included, and a vast amount of information concerning the raising of live-stock, and other branches of diversified farming A full explanation is also given of the Canadian Pacific Railway's policy of selling lands to actual farmers on twenty-year terms, and assisting with a loan for improvements to the extent of $2,000.

The book which is illustrated with twenty photographs and a 15x30 map of the Western provinces, has just been issued in a second annual edition of 400,000, of which 200,000 have been shipped to Great Britain, and another 100,000 will be distributed through the C. P. R. Montreal office Some idea of the magnitude of this edition can be gleaned from the fact that if the pages were placed end to end in one continuous strip, that strip would reach 2,200 miles—that is to say, as far as from Montreal to Calgary. If the whole edition were placed in one pile, copy upon copy, the whole height would be 6,510 feet—eight and three-quarter times the height of the Woolworth Building in New York the highest building in the world. Twelve and a half miles of wire were required for stitching the copies together, and two cars to bring in the paper, which weighed some sixty tons.

This book will be sent absolutely free, postage paid to any reader of this paper who will write for it to the Publicity Branch, Department of Natural Resources, Canadian Pacific Railway, Calgary, Alberta. If you have friends in other countries whom you would like to interest in Canada, copies will be sent to them free upon request to the above address.

Let us do your printing for you. Prices right and satisfaction guaranteed The Creston Review.

A strawberry festival and Ice Cream Social given under the auspices of the Ladies Aid of the Presbyterian Church, will be held in the Mercantile Hall on Wednesday, June 24, commencing at 7p m.

The Indians continue their depredations in this district. The latest is the theft of a new-born calf from a rancher whose place is across the river. Property is not safe when the red men are about and we suggest to keep everything under lock and key.

W. A. Nisbet, of Cranbrook was in town yesterday as attorney for the boys who were accused of stealing a boat. He succeeded in having the punishment reduced to a lecture which was administered by E. J. Cartmel, of Nelson.
