12 tinted eggs—Mrs W V Jackson.

FRUIT

5-box lot of apples (Speers silver cup) 1 Mrs J W Hamilton, 2 Jas Ccok.
Box Wagners—1 Jas Cook, 2 W V Jackson.
Box Northern Spy—1 Jas Cook, 2 W V. Jackson.
Box McIntosh—1 Miss H Andrew, 2 2 Jas Cook.
Box Wealthy—1 W H Gobbett, 2 Jas Cook.
Box King—2 W V Jackson.
Box Golden Russet—2 Jas Cook.
Box Jonathan—1 WVJackson, 2 Jas Cook.
Box Snow—1 E S Cuming, 2 Jas Cook.
Box Ontario—1 W V Jackson, 2 W H Gobbett.
Box Delicious—1 Jas Cook, 2 W V Jackson.
Box Ribston Pippin—1 W V Jackson, 2 Jas Cook.
Box Spitzenberg—1 Mrs J W Hamilton, 2 Jas Cook.
Box Winter Banana—1 E A Peneon.
Box Gravenstein—2 W B Forward.
Box any other variety—1 W K Brown, 2 W V. Jackson.
Plate Cox Orange—1 E A Penson, 2 W K Brown.
Plate Yellow Newton—1 R J Long, 2 T M Edmondson.
Plate Spitzenberg—1 R J Long, 2 T M Edmondson.
Plate Northern Spy—1 Mrs S Ryckman, 2 Jas Cook.
Plate Wagner—1 Mrs H A Dodd, 2 E Simmons.
Plate Jonathan—1 R J Long, 2 T R Mawson.
Plate Gravensteins—1 WB Forward, 2 W G Littlejohn.
Plate McIntosh Red—1 Miss H Andrew, 2 H Hamilton.
Plate Wealthy—1 H Hugh Taylor, 2 Jas Adlard.
Plate Grimes Golden—1 H Hamilton, 2 T R Mawson.
Plate R. I. Greenings—1 R J Long, 2 W G Littlejohn.
Plate Ontarios—1 W B Embree, 2 M McCarthy.
Plate King—1 Huygens & VanAckeran, 2 W V Jackson.
Plate Delicious—1 R J Long, 2 Jas Cook.
Plate Golden Russet—1 M McCarthy, 2 J M Craigie.
Plate Ribston Pippin—1 W V Jackson, 2 Mrs G Johnson.
Plate Snow—1 Maud Botterill, 2 R J Long.
Plate Winter Banana—1 H Hamilton, 2 H B Downs.
Plate any other variety—1 W K Brown, R J Long.
Plate Hyslop Crab Apples—1 W B Forward, 2 Mrs J H Webster.
Plate Pears any variety—1 Jas Cook 2 T R Mawson.
Plate Italian Prunes—1 Mrs M Young, 2 Stace Smith.
Plate Lombard Plums—1 Jas Cook.
Plate Yellow Egg Plums—1 E Simmons, 2 R S Bevan.
Plate Green Gage Plums—2 J M Craigie.
Plate any other variety Plums—1 Mrs M Young, 2 Mrs S Ryckman.
Plate of Grapes, any variety—1 Geo Cartwright, 2 Mrs Ebbutt.

HONEY

3 jars extracted honey—1 Miss H Andrew, 2 w H Gobbett.

VEGETABLES and ROOTS

25 lbs. Potatoes, any variety—J E Hayden, 2 Mrs. H Christie.
Crate Tomatoes—1 S Moon, 2 Geo Cartwright.
Swede Turnips—1 R Stark, 2 George Cartwright.
Carrots—1 E Simmons, 2 Mrs H A Dodd.
Cabbage, summer—1 T M Edmondson, 2 J E Hayden.
Cabbage, winter—1 T M Edmondson 2 Mrs Jas Maxwell.
Cauliflower—H B Downs, T M Edmondson.
Table beets—1 T M Edmondson, 2 w V Jackson.
Corn, ears—1 w H Gobbett, 2 E Simmons.
Cucumbers—1 E Simmons, 2 Miss H Andrew.
Tomatoes, 6—1 J E Hayden, 2 w B Embree.
Squash—1 w H Gobbett, 2 G Cartwright.
Pumpkin—1 G M Benney, 2 G Cartwright.
Citron—1 S Lewis, 2 E E Cartwright
Onions—2 Mrs J H Webster.
Peas, pods—Jas Cherrington, Rose Cherrington.
Collection vegetables—1 E Simmons, 2 G Cartwright.

Fodder corn, stalks—1 G Cartwright 2 w V Jackson.
Field carrots, white—1 w H Gobbett 2 T M Edmondson.
Mangolds—1 R Stark, 2 Mrs. H A Dodd.
Feed beets—1 G Cartwright, 2 E E Cartwright.

Continued on Page 4

War times are teaching us that there is no economy in buying the cheapest goods nor the fancy high priced ones. We are depending on the solid values of the good standard brands—the brands that were good in peace time and have doubly proved their worth in war time.

Red Rose Tea—costing today only about ¼ of a cent per cup—is one of the solid war time values that anyone can afford—and that everyone will enjoy.

It is truly a war time tea

T. H. Estabrooks Co.

Rapid Growth of Wheat

What a combination of good seed, fertile soil, plenty of moisture and right climate will do is shown in a sample of wheat recently brought to Edmonton, Alberta, from a farm about 20 miles northeast of that city. This wheat was four feet long. It was sown on May 9th and cut on July 15. It therefore made a growth of forty-eight inches in sixty-seven days. This result is hard to beat anywhere.

For Frost Bites and Chilblains.—Chilblains come from undue exposure to slush and cold and frost-bite from the icy winds of winter. In the treatment of either there is no better preparation than Dr. Thomas' Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is instantaneous and its application is extremely simple.

"Age for Wisdom"

Japan, apparently is ruled by old men. Prince Yamatagata, at the age of 83, is still the centre of political influence; Baron Shibusawa, in spite of his 78 years, is constantly dragged from his would-be retirement, and Marquis Okuma, at 79, is still at the vortex of public affairs. It is reported that Japan attempts nothing of any great moment without the assistance of the influence of these three great old men.

Farm Employment Organizations

Each province in Canada has its organization to enroll those who are willing to help on the farms. Make enquiries, and get in touch with your local officers.

THAT CHANGE IN WOMAN'S LIFE

Mrs. Godden Tells How It May be Passed in Safety and Comfort.

Fremont, O.—"I was passing through the critical period of life, being forty-six years of age and had all the symptoms incident to that change—heat flashes, nervousness, and was in a general run down condition, so it was hard for me to do my work. Lydia E. Pinkham's Vegetable Compound was recommended to me as the best remedy for my troubles, which it surely proved to be. I feel better and stronger in every way since taking it, and the annoying symptoms have disappeared."—Mrs. M. GODDEN, 926 Napoleon St., Fremont, Ohio.

Such annoying symptons as heat flashes, nervousness, backache, faint spells, dizziness, etc., can be speedily overcome and the system restored to normal condition by this famous root and herb remedy Lydia E. Pinkham's Vegetable Compound.

If any complications present themselves write the Pinkham Medicine Co., Lynn, Mass., for suggestions how to overcome them. The result of forty years experience is at your service and your letter held in strict confidence.

The League of Nations

To Convince the German People of the Nature of the Conflict

Proposals for a league of nations are scarcely enough in themselves. What would be so infinitely valuable, even as a mere war measure, would be to face Germany with the accomplished fact. A real league of the allies—modest as its design in the first instance might be—would do more to convince the German people of the nature of the conflict to which their rulers have committed them than any amount of argument or invective. It would be based frankly, of course, on the catholic ideal; it would shut out no nation except one that refused to accept it. On the other hand, it would make ultimate refusal nearly impossible. It would demonstrate, as nothing else can, the force of the weapon which the allies command and which scarcely any conceivable military victory can in the very long run avail to shatter.—London Daily News.

Catarrhal Deafness Cannot be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Cure acts through the blood on the mucous surfaces of the system.

We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Cure. Circulars free. All Druggists, 75c.

F. J. CHENEY & CO., Toledo, Ohio

Boys' and Girls' Pig Clubs Popular

Of all the movements that are making farm life more interesting to children none are more popular than pig clubs. With the co-operation of the banks and the government officials many of these clubs have been formed through the three prairie provinces of Canada. Sometimes the children are financed by their parents, in other cases the original capital outlay is furnished by the banks on the children's notes. Feed costs them little or nothing. With ordinary luck it does not take them long to take up their note from the bank, and soon they have a balance of cash to their credit, besides a fine lot of pigs in the pasture at home.

Warts are disfigurements that disappear when treated with Holloway's Corn Cure.

Murdered Five Children

The Hun Infantry Satisfied Their Hunger

Details of the brutal murder of five school children, and the wounding of six others, at Pylsen, on June 21, have only now become known through an interpellation in the Reichstag. It appears that a crowd of women and children, watching the loading of the bread wagon for the Skoda works, began to cry, "We are starving, we also want bread."

Suddenly an infantry patrol appeared and without giving an order to the crowd to disperse, or a single word of warning, fired a volley from behind into the crowd, killing five children between the ages of ten and fourteen, and severely wounding four men and two women. One man died.

The first concrete motor driven vessel ever built in China was launched recently at Shanghai.

"Grey Day"

When Britain's Entry Into the War Took Place

Several correspondents have written to The Sun on the subject of England's day, which will be celebrated, we believe, with appropriate services next Sunday. Yet this very day is an anniversary upon which every Englishman must look with pride. It was on July 30, four years ago, that Great Britain made its reply to the impossible proposals of Germany: that England stand aside and let the brute have its way. In all England's history there is nothing clearer or cleaner than the answer sent by Sir Edward Grey to Berlin:

"His Majesty's government cannot for a moment entertain the chancellor's proposal that they should bind themselves to neutrality on such terms.

"What he asks us is in effect to engage to stand by while French colonies are taken and France is beaten, so long as Germany does not take French territory as distinct from the colonies.

"From the material point of view such a proposal is unacceptable, for France, without further territory in Europe being taken from her, could be so crushed as to lose her position as a great power, and become subordinate to German policy.

"Altogether apart from that, it would be a disgrace for us to make this bargain with Germany at the expense of France, a disgrace from which the good name of this country would never recover.

"The chancellor also in effect asks us to bargain away whatever obligation or interest we have as regards the neutrality of Belgium. We could not entertain that bargain either."

If Edward Grey had never written another line, the message we have quoted would be enough to make safe his place in history.—New York Sun.

CHOLERA INFANTUM

Cholera Infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent all the dreaded summer complaints. Concerning them Mrs. Fred Rose, South Bay, Ont., says:—"I feel Baby's Own Tablets saved the life of our baby when she had cholera infantum and I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Farm Help at Right Time

The Canadian farmer does not want gifts next Christmas. He wants help for the harvest, and harvest time will be soon. 12,000 men are needed for Ontario, 12,000 in Quebec, 10,000 in Manitoba, 20,000 in Saskatchewan, 6,000 in Alberta, and 2,500 in British Columbia. New Brunswick needs all of her own men she can enlist, and has none to spare. Nova Scotia needs all her own men, so does Prince Edward Island. Help will have to come from the towns and cities, and the time to make arrangements is now.

Women and Asthma. Women are numbered among the sufferers from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely without solicitation, show the enormous benefit it has wrought among women everywhere.

Would Loaf in Style

Weary Wraggles—If yer had $50,000, what would yer do?

Tired Tim—Same as now; only I'd do it in an ottermobile.

Minard's Liniment Cures Burns, etc.

Killing the Breeding Stock

The live stock in the countries of the allies in Europe has been decreased by 46,000,000 head since the beginning of the war. 40% of the hogs in France have been killed, and 35% of the sheep. It is estimated by French officials that French live stock cannot be restored to the pre-war basis until from five to ten years after the war.

Ingram's Milkweed Cream

Many women look older than their years largely because they do not take proper care of their complexions. Ingram's Milkweed Cream will keep you looking younger than you are. It keeps the complexion clear and colorful. It keeps the skin soft and in a healthy condition because it has a distinctive therapeutic effect. It tones up the delicate skin tissues. Two sizes, 50c and $1.

For shininess of the nose and forehead try Ingram's Velveola Souveraine Face Powder. It is so fine and delicate in texture that you can scarcely detect it yet it stays on and effectually conceals the minor imperfections of complexion and hides perspiration, 50c. A full line of Ingram's toilet products including Zodenta for the teeth, 25c, is at your drugstore.

A Picture with Each Purchase

Each time you buy a package of Ingram's Toilet aids or Perfume your druggist will give you, without charge, a large portrait of a world-famed motion picture actress. Each time you get a different portrait so you make a collection for your home. Ask your druggist.

F. F. Ingram Co., Windsor, Ontario (94)

Potash Discovered in Alberta

The potential resources of Western Canada are inestimable. Agriculture, mining, lumbering and many other industries are all merely in their initial stages, and the future will see an immense development. A discovery of far-reaching importance is reported to have been made near Czar, Alberta, where large deposits of potash are reported to have been found. Preliminary machinery is already on the ground to make the necessary tests, and important developments are looked for in the near future.

ANY CORN LIFTS OUT, DOESN'T HURT A BIT

No foolishness! Lift your corns and calluses off with fingers—It's like magic!

Sore corns, hard corns, soft corns or any kind of a corn, can harmlessly be lifted right out with the fingers if you apply upon the corn a few drops of freezone, says a Cincinnati authority.

For little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain.

This simple drug dries the moment it is applied and does not even irritate the surrounding skin while applying it or afterwards.

This announcement will interest many of our readers. If your druggist hasn't any freezone tell him to surely get a small bottle for you from his wholesale drug house.

Playing Safe

In the spelling list for a class in a certain Indianapolis school were the words "singing" and "singeing." The class was asked to write sentences using these words to show that they knew the correct meaning of each. One little fellow wrote: "The Italians are a singing nation. The allies will soon be singeing the beard of the kaiser." With sidewise glances he watched the teacher mark his paper and timidly asked: "Is it all right?" "Yes," she said, "but the kaiser has no beard; he has a moustache." "I know, I know, but I wanted 100 on my paper, and I couldn't spell moustache."—The Argonaut.

Minard's Liniment Co., Limited.

Gents,—A customer of ours cured a very bad case of distemper in a valuable horse by the use of MINARD'S LINIMENT.

Yours truly,
VILANDIE FRERES.

Mother Knew

Little Girl (before statue in museum)—Mamma, who's this?

Attendant (after a pause)—That's Mercury, the messenger of the gods. You have read about him, no doubt.

Mother—Of course she has. But, do you know, my little girl has such a very poor memory for Scripture.

Students on the Farm

College students, particularly those who have had experience in farming, should plan their vacations this year helping with the harvest. Things are so serious this year that they can well forego their usual vacation well earned though it be, to aid in the saving of the crop.

SMOKE TUCKETT'S T&B PLUG

Great Opportunity for the Farmers

Allied Europe depends on America for 50% of its food supply. After the war a large proportion of this demand will continue. The whole world is short of food stuffs. The live stock population has been decreased. Russia has been socially disorganized, and is not producing enough to feed herself. Farmers of Canada will have an export market for years, such as for which they have never dreamed.

More Time for Knitting

"I see that fewer pockets in men's clothes have been ordered."

"What's the idea?"

"To save cloth for one thing—also to save our wives' time in going through them."

Women With Weakness Find New Strength

For all special weakness from which girls and women suffer, no surer remedy exists than Dr. Hamilton's Pills; they maintain that bracing health every woman so earnestly desires, they uproot disease and bring strength that lasts till old age.

The blood is richly nourished by Dr. Hamilton's Pills. Appetite increases, weakness and secret ills give way to surplus energy and reserve vigor.

No pale girl, no ailing woman can afford to miss the enormous good that comes from Dr. Hamilton's Pills; get a 25c box today.

THE COMLYN ALIBI

— BY —

HEADON HILL

WARD, LOCK & CO., LIMITED
London, Melbourne, and Toronto

(Continued.)

"Look here, sir, I don't pretend to see your motive for meddling with the affairs of a stranger, but I've had about enough of you," he broke out. "Whatever your game is you have queered your own pitch by what you have just said. Since Morgan was at Hampstead while his wife was being killed in Cornwall there is an end of the matter so far as I am concerned. I will keep my word to him and go through the mill, however rough the consequences may be."

The young baronet's attitude was that of a man who had reached the limit of endurance. There was even a hint of physical menace in the nervous movements of his muscular arms. Professor Zimbalist's strong point was evidently not a robust courage, for he snatched his soft felt hat from the table and made for the door.

"I'm sorry," he panted. "I see that I have made a mistake—well-meant, but lacking in judgment. Good-bye, Sir Anthony."

He was out of the farm house in a twinkling, the skirts of his frock coat flapping in the breeze as he climbed the moorland road that led to Comlyn Court. Presently, as he slacked his pace to get his wind, a dull red spark glowed at the roadside and the aroma of a full-flavored Havana came from the shadows.

"Well, what luck?" a deep voice accosted him.

Professor Zimbalist was evidently proficient in widely different styles of diction. His answer, breathed with unfeigned relief, was couched in the vulgar tongue, free from the flowers of speech which had marked his recent interview.

"Got the juggins on toast," he sniggered. "It was like shoving a penny in the slot to make the little figure work."

CHAPTER VIII

At the Old Tailings

A glowing suset flamed in the western sky, touching the rugged moor with gold, as Mavis Comlyn walked on the uplands behind the Court. In the hollow below the grey front of Merlin Farm, which had its back to the fading glory, frowned up in sombre silence and stabbed the girl's heart with a sudden pang of pain. For the sight of Tony West's half-ruined homestead reminded her of the owner who was not there.

A month had passed since the tragedy at Comlyn Court. Sir Anthony had returned to London on the day after the adjourned inquest, and before leaving he had not come to the dower house to say good-bye. He could hardly have done so, Mavis reflected sadly, after the coldness she had shown him as the result of his evidence.

And how, she asked herself as she looked down at the remnant of his patrimony, could she have shown herself otherwise than cold? To her practical mind his failure to furnish the coroner with details of his whereabouts during those crucial hours could only be due to something of which he was ashamed. Though for one fleeting moment she had thought she recognized him in the conservatory, that supposition had almost immediately been knocked on the head by the fugitive's possession of a key, and, later, by Tony's strenuous denial. But his refusal to disclose where he was during the commission of the crime upset her more than the momentary suspicion had done. Such is the way of women that she would have shielded him from the consequences of murder, but was unable to forgive the secretiveness which she thought could only be due to one cause.

"He must be entangled with some woman, and he cannot prove his alibi without compromising her," the girl assured herself in jealous anger against the only man for whom her maiden heart had ever beat out of its normal pulses.

And now, after he had been gone from Comlyn a month, his continued silence, attributed by her to some shameful intrigue, had strengthened her original view. If he cared, as she cared, he would have taken steps to break down the barrier which her coldness after the inquest had raised up between them. They had been in the habit of frequently corresponding, but no letter had come with an offer of confidence, nor had he made any attempt to re-establish the old relations so dear to her. The only news she had had of the truant came through Jasper Morgan, who had paid two flying visits to London, and had casually remarked that Sir Anthony West was fairly painting the town red.

So her sorrowful eyes gazed their fill at the lonely farm house, and then Mavis turned homeward across the moor. Her way led past an ancient and long-deserted tin mine. The shaft had fallen in under stress of time and weather, and was now only marked by a cup-shaped dent in the level of the moor. It was above ground that the traces of the old workings, once a profitable asset to the Comlyns of Comlyn Court, had survived many years of idleness. Weed-grown, and at first sight a natural upheaval of the earth, the great heap of "tailings"—the refuse from which the ore had been extracted—formed a picturesque mound; while a few stone huts, most of them roofless, also testified to the long-forgotten industry.

The old mine was Comlyn property and being worthless was one of the portions of the estate on which Archibald Comlyn had not succeeded in raising money on mortgage.

As she neared this grave yard of bygone prosperity, Mavis was astonished to see a man on his knees about half way up the heap of tailings. He appeared to be groping with his hands on the surface, turning up pieces of rock and scrutinizing them closely. Just as she recognized him as Jasper Morgan, another man, wearing a flapping frock coat and soft felt hat, came to the door of one of the stone huts and shouted:

"Another result, Jasper! About the hundredth part of a millegramme. We really must get to work."

They both saw Mavis and acted each according to his lights. The man in the doorway of the hut hurriedly retreated inside, and Jasper Morgan descended the mound, lifting his cap as he approached. His coarse, masterful face hinted at rigidly suppressed annoyance, blended with a desire to propitiate and explain.

"Good evening, Miss Comlyn," he began in his deep voice. "You have caught us trespassing, and I offer humble apologies. I am well aware that my lease of the Court confers on me no rights over the rest of your excellent father's property, but my old friend, Professor Zimbalist, is keen on geology, and we are on the prowl after fossils. No harm done, I hope?"

"Of course not," Mavis replied politely. "Father would be only too pleased. Have you found any good specimens?"

"Here, Zimbalist! Come and show Miss Comlyn the last result of our raid on this old dust heap," Morgan shouted.

The Professor emerged from the hut, stepping as delicately as Agag, and carrying in his talon-like fingers a fossilized shell the size of a hen's egg. It was wonderfully clean and polished for a fossil just recovered from the earth, and it must have weighed at least two ounces. The words which Mavis had overheard, "the hundredth part of a milligramme," representing a weight so minute as to convey no meaning to the ordinary person, were the height of absurdity if they had been used in reference to it.

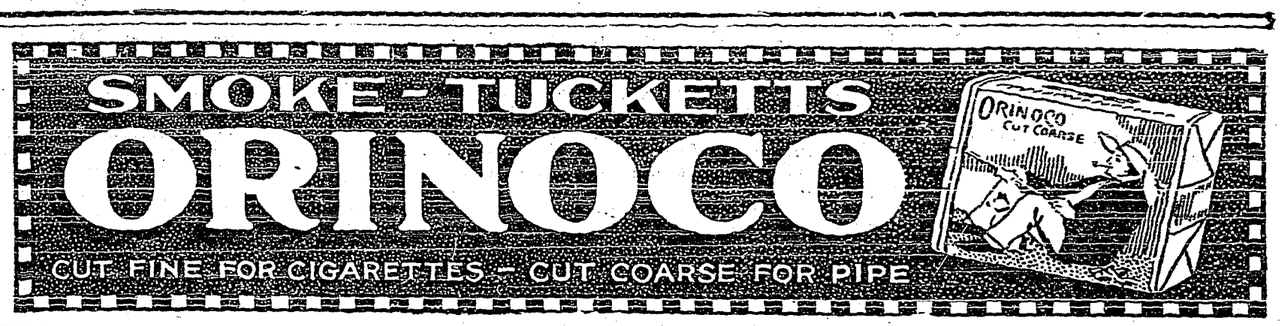
The Alternative To Disarmament

League of Peace the Only Means of Preserving the World

H. G. Wells, who looks far into the future, has written a book "In the Fourth Year, Anticipations of a World Peace," in which he gives an appalling picture of the alternative to disarmament. He says:

"We shall get big land ironclads which will smash towns. We shall get air offensives—let the experienced Londoner think of an air raid going on hour after hour, day after day—that will really burn out and wreck towns, that will drive people mad by the thousand. We shall get a complete cessation of sea transit Even land transit may be enormously hampered by aerial attack. I doubt whether any sort of social order will really be able to stand the strain of a fully worked out modern war."

According to Mr. Wells, therefore, we must have one League of Peace and Germany must be forced into it.



Conserving Food in Britain

Real Wheat Bread Gone But Not Forgotten

The following description of food conditions in Great Britain has been written from London by Mr. Raymond B. Bolton, a newspaper correspondent.

"Every available foot of soil has been or is being tilled. Miniature gardens dot the country from coast to coast. Where a few years ago one would see golf courses . . . one now finds growing things—wheat, corn, barley, rye, oats, garden truck. Thousands of these small gardens have sprung up, fairylike, almost over night. They are tilled by women, children and old men.

"Thousands upon thousands of robust, healthy young women, who have never turned their hands to toil in their young lives, have donned khaki uniforms similar to those worn by their brothers at the front and have gone to the farms, releasing thousands of men who are now able to shoulder the rifle instead of the hoe and the rake. For two years now women have borne an increasingly important share of the work of producing food supplies in the British Isles . . . One does not have to search for proof of a food shortage in England; the proof is on every hand.

"It may truthfully be said that the need of conserving every possible bit of food has gone to the heart of every man, woman and child in Great Britain. Not an ounce of food is wasted. The doctrine of the clean plate is rigidly adhered to. I have, for the past three weeks, made a rigid scrutiny of every plate left in my immediate vicinity by a customer in public eating houses in London after the completion of his meal, and it is a fact that I have not seen one morsel of food left for the garbage pail.

"In three weeks I have not had a grain of sugar. As a substitute, saccharine is offered, which few people use. A limited quantity of sugar may be obtained by procuring a sugar card; but the difficulties which arise through the necessity for obtaining a card and carrying the sugar wherever you go make total abstinence preferable. I cannot actually recall what butter tastes like. For breakfast one is offered margarine, a white, pasty substance which is no more like the margarine one obtains in America than salt is like sugar. This is also rationed. They say butter is rationed, but, whether this is true or not it makes no difference, for the only place where real butter can be obtained is on the farms, and even those who make the butter are strictly limited as to the amount of their own product they are permitted to use. No butter or margarine is allowed for luncheon or dinner.

"Bread, yes, the people of Britain eat bread, of a kind. I guess until several years after the war real wheat bread will be an edible gone but not forgotten. At each meal one receives a very small piece of bread about the size of a baby's hand.

"Beef and pork are so scarce that the vision of a steak such as it is to be had in thousands of our metropolitan eating houses would be a sight so rare to the Britisher that he would, I dare say, be too overcome with joy to enjoy properly the tasty viand. Of the flour coupons allowed each person with which to purchase meat, two are good for beef, pork or mutton, while the others are reserved for the purchase of bacon, game and poultry. If one orders cooked beef, pork or mutton, such a small portion is served that the pangs of hunger are far from satisfied. The portion served would approximate a fifth of the meat portion served nowadays in American cafes and restaurants.

"One could very easily eat two meals in succession in London and leave the table slightly minus the self-satisfied feeling begotten by unrestricted eating in any American cafe . . . In addition, one has to pay more on the average for a meal here than in the United States or Canada."

Kultur and Christian Moraiity

Chary About Accepting Some of the Fundamental Doctrines of Kultur

The precious boon of kultur has been possessed by the cultivated German nation for forty years or more, in the flower of its beauty. We are told that this war is a disinterested attempt on the part of the charitable Germans to inflict this priceless gift upon nations who are so abysmally stupid that they cannot recognize its inestimable worth. In common with the other stupid nations, we, in America, have been a little chary about accepting some of the fundamental doctrines of kultur, and we were frankly shocked when the apostle of the superman, Friedrich W. Nietzsche, laid it down as a fundamental doctrine that "Christian morality is the most malignant form of all falschoods; it is that which has corrupted mankind." Somehow we Americans preferred to remain "corrupted," and we now have an opportunity of seeing in Germany how their superangelic doctrine works out in actual facts. After four years of a perfect orgy of kultur it is just beginning to dawn upon the German mind that there was somthing perhaps a little odd, after all, in the superman's scathing comment for Christian morality.

Aviation as a Commonplace

More and more is aviation tending to become a commonplace matter—Major C. K. Rhinehart of the Mineola aviation field is making almost daily air flights to transact official business and returning to the Long Island field in time for evening dress. To facilitate cross-country flying suitable places for landing are being selected. Long Island cities and towns have been asked to set aside for aviators large tracts of land where landing may be made for repairs and oil. It is requested that such fields be supplied with fuel and oil. When an aviator replenishes his supply in this way restitution will be made from the Mineola field. In half a dozen places arrangements for such fields have already been made. —From the Springfield Republican.

The Lightning's Favorites

Different Varieties of Trees Effected By Lightning

"The lightning seems to have its favorite victims among the trees. I have never known it to strike a beech tree. Hemlocks and pines are its favorites in my woods. In other regions the oak and the ash receive the attention. An oak on my father's farm was struck twice in the course of many years, the last bolt proving fatal. The hard or sugar-maple, is frequently struck, but only in one instance have I known the tree to be injured. In this case a huge tree was simply demolished. Usually the bolt comes down on the outside of the tree, making a mark as if a knife had clipped off the outer surfaces of the bark, revealing the reddish-yellow interior. I several cases I have seen this effect. But a few summers ago an unusually large and solid sugar-maple in my neighbor's woods received a charge that simply reduced it to stove wood. Such a scene of utter destruction I have never before witnessed in the woods. The tree was blown to pieces as if it had been filled with dynamite. Over a radius of 50 or more feet the fragments of the huge trunk lay scattered. It was as if the bolt, baffled so long by the rough coat of mail of the maple, had at last penetrated it and had taken full satisfaction. The explosive force probably came from the instantaneous vaporization of the sap of the tree by the bolt."—John Burroughs, in Century.

A Different Kind of George

New Links of Understanding and Sympathy are Being Forged

We may cherish well founded hopes that in the furnace of war new links of understanding and sympathy are being forged between man and man, class and class, and we are coming to recognize as never before that we are all members of one community and that the welfare of each is dependent upon and inseparable from the welfare of all. No protagonist of a futile and meaningless socialism speaks those words, no loud-mouthed politician catering to the "deep peepul" for votes. They come from the lips of His Britannic Majesty—"by the Grace of God King of the United Kingdom of Great Britain and Ireland and of the British Dominions Beyond the Seas, Defender of the Faith and Emperor of India." Who can doubt that they come from his heart? No statesman of his land has seen more clearly than he the meaning of this war, none has understood better that in it "the past and the present are in deadly grapple." It is even a farther cry in thought than in years between the fifth George and his predecessors of that name. The Sailor King is of the present—and of his people.—The New York Herald.

Progressing

Bix—How are you making out on your resolution to economize?

Dix—Fine! I've got my running expenses slowed down to a walk.

Wrap Soldiers' Parcels in PARA-SANI

Heavy, waxed paper in Household Rolls with handsome oak Roller-Box. Every article for overseas should be carefully wrapped in Para-Sani to insure delivery in good condition.

Put an extra wrapping of Para-Sani around the package before putting it in the final covering. Eats and smokes will arrive as fresh as when shipped, if wrapped in Para-Sani.

Use Para-Sani at home for keeping food fresh.

Para-Sani will save many times its cost by preventing waste.

Para-Sani sent prepaid on receipt of price or C.O.D.

4 lb.	Roll with Roller Box	$2.50

THE CRESTON REVIEW

Issued every Friday at Creston, B.C. Subscription: $2 a year in advance; $2.50 to United States points.

C. F. HAYES, Owner and Editor.

CRESTON, B.C., FRIDAY, OCT. 4

Local and Personal

J. T. Hunter, assistant provincial hortioulturist at Penticton, and R. G. L. Clarke, chief fruit inspector for B.C., Vancouver, were among the outsiders here for the fair, and helped with the judging in the fruit and vegetable section.

Marriage and giving in marriage will soon be a lost art in Creston, according to the Review, which says that there has not been a marriage there for seven months. Maybe they are all free lovers down in the neighborhood.—Cranbrook Herald.

Dr. Henderson, H. K. Oatway and Geo. Hendren comprise another motor party to the Cranbrook fair this week. Mr. Hendren will likely stay a day or two for medical attention, as he has been suffering with trouble in his side since coming back from a hunting trip about three weeks ago.

Tuesday afternoon next should be kept clear by all members of the Creston Valley Red Cross Society. The annual meeting of the organization will be held that day, in Speers' Hall. The reports to be presented will undoubtedly show a banner year both in the finance and work sections.

Creston's fair-day effort at collecting funds for the Navy League was most successful. $41.45 being gathered in the three collection boxes, as follows: Misses Jane Long, Alice Heath and Erma Hayden, $11.30; Misses Muriel Hobden and Marion Swanson $6.00, Miss Lillian Cherrington $24.15.

E. C. Gibbs and W. V. Jackson are Cranbrook visitors this week in charge of the fruit and vegetable display the Creston Board of Trade is making at the fair in that city. They have a fine lot of stuff to show as most of the exhibits in these classes at the the Ceston fair were loaned for the Cranbrook show.

Mr. and Mrs. James Stocks left on Tuesday for Toronta, Ont., where they propose spending the winter, and may reside permanently. There was quite a large gathering of friends at the depot to see them off. They have been residents of the Valley for about thirteen years, and enjoy the friendship of a very wide circle of acquaintances.

Erickson

Jas. Anderson, Kaslo's Scotch mayor, was a week-end yisitor with Mr. and Mrs. R. J. Long.

Mrs. Burge of Fassafern, who has who has been with her mother, Mrs. Ryckman, for some weeks past, returned home the early part of the week.

Frank Botterill, who is an appendicitus patient at Cranbrook hospital, and who came through one operation successfully, had to be operated on the second time early this week, and so far as we can learn is also recovering from it in good shape as can be expected.

Miss Mabel Craigie is Erickson's delegate to the Cranbrook fair, and will spend a few days with relatives in that town.

Erickson possibly furnished the youngest exhibitor at the Creston exhibition last week, Maud Botterill having a number of entries in the fruit section—and gathered in a prize or two too.

Three more Erickson pupils started school at Creston this week. They are Beatrice Dodds, who is taking Entrance work, and Teddy and Ivan Staples.

Henry Hamilton is hereby awarded the distinguished conduct medal in connection with fall fair effort. Out of four entries in fruit he captured three prizes—two of them firsts. On eleven entries R. J. Long brought home five firsts and two seconds. E. S Cuming stirred up a lot of talk. His box of Snow apples were certainly there with the size and color.

At Boswell ranchers claim to be growing 20 and 23-ounce Pippins and Gravensteins this year.

The Allan, Rossland's leading hotel, has just made an assignment for the benefit of its creditors.

CRESTON - - B.C.

Is there any Meat in the House?

This is the first question that presents itself to the housewife if an unexpected visitor drops in for a meal. But why worry?

Shamrock Brand Hams and Bacon
Finest Quality Cooked Ham
Lunch Meat
Bologna, &c.

are always to be had here. In meats nothing quite equals 'Shamrock' products.

P. BURNS & Co., Ltd.

Watch for our Announcement Next week.

S. A. SPEERS

Cooking is a Joy With an IDEAL Home Canner and Steam Cooker

You prove the principle this way — set vegetables and custard side by side to cook in the Ideal and the custard will not take on the odor or flavor of the onions. The cooking is done by steam pressure, and all the nutriment and food-value of the food is cooked right into the food.

In the Ideal a full meal from soup to dessert can be cooked over one burner, any kind of stove, any kind of fuel. All the heat necessary is just enough to keep two quarts of water boiling. Food cannot scorch, dry up, over-cook, burn.

Watch for our
Announcement
Next week.

S. A. SPEERS

Sirdar

Last Saturday James Tyo paid another visit to his property just out from Sirdar, this time being accompanied by a Mr. Houston, representing some company as an authority on minerals. We wish him good luck in his dealings.

Several of our citizens paid a visit to Creston fair last Saturday, and voted having a good time at the dance held in the evening. Sorry to hear that the exhibits from Sirdar didn't show up very strong. We hear on the best authority that some of the products grown here were in great shape for obtaining prizes.

It stated that one of the tomatoes grown by Mrs. Arthur North and weighing over two pounds, has been sent to the C.P.R. department of natural resources, Calgary, for exhibit.

Mr. and Mrs. Tom Aspey arrived back in Sirdar on last week-end from Cranbrook, and all are pleased to welcome him home after his long period of sickness, and hope his health will still continue to improve.

Mr. McCabe took a party up to Creston on his speeder on Saturday night to see the fair and incidentally to buy up some of the prize vegetables.

Jim Blair, an old-timer here, has gone to help with devolpment work on the Mulholland mining property at Cultus Creek, which has recently been taken over by the Consolidated Smelting Co. Jim, we hear, has taken a contract on tunnel work.

Our school teacher, Miss Hazel Goodman, has been laid up a few days this week with an attack of la grippe, but at writing is recovering nicely.

Bad news reached the camp this week in the death of a brother of our good friend, Joe Daly; also of the baby boy of the populrr mail clerk, "Doc" Williams. Our sympathy goes out to both in their bereavement.

Mesdames Dennes, Loasby, and McMasters were among the lady visitors at the Creston fair on Saturday afternoon.

SYNOPSIS OF LAND ACT AMENDMENT

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timbered land.

Partnership pre-emptions abolished, but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres before receiving Crown Grant.

Where pre-emptor in occupation less than 3 years, and has made proportionate improvements, he may, because of ill-health or other cause, be granted interim certificate of improvement and transfer his claim.

Records without permanent residence may be issued provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained on these claims in less than 5 years, with improvements to $10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years.

Pre-emptor holding Crown grant may record another pre-emption, if he acquires land in connection with his farm, with actual occupation, provided statutory improvements made and residence maintained on Crown grant land.

Unsurveyed areas, not exceeding 40 acres, may be leased as homesite, title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person as formerly, until one year after conclusion of the present war. This privilege is also made retroactive.

TOWNSITE PROPERTY ALLOTMENT ACT.

Provision is made for the granting to persons holding agreements to purchase from the Crown such proportion of the land, if any, as the payments already made cover in proportion to the sale price of the whole parcel. Two or more persons holding such agreements may group their interests and apply for a proportionate allotment jointly. If it is not considered advisable to divide the land covered by an application for a proportionate allotment, an allotment of land of equal value selected from available Crown lands in the locality may be made. These allotments are conditional upon payment of all taxes due the Crown or to any municipality. The rights of persons to whom the purchaser from the Crown has agreed to sell are also protected. The decision of the Minister of Lands in respect to the adjustment of a proportionate allotment is final. The time for making application for these allotments is limited to the 1st day of May, 1919. Any application made after this date will not be considered. These allotments apply to town lots and lands of the Crown sold at public auction.

For information apply to any Provincial Government Agent or to

G. R. NADEN,
Deputy Minister of Lands.

Cuticura Heals Sore Red Pimples

Itching, Burning and Irritated. Lost Sleep.

"My face broke out in pimples that would heal up and then break out again. It was very sore and red, and all the time itching and burning, and I irritated my face by scratching. I lost a lot of sleep.

"I had the pimples for over five years. Then I used Cuticura Soap and Ointment, and two cakes of Cuticura Soap and one box of Cuticura Ointment healed my face completely." (Signed) Miss Zoo Parkes, Otterville, Ont., March 13, 1917.

Skin troubles are quickly relieved by Cuticura. The Soap cleanses and purifies, the Ointment soothes and heals.

For Free Sample Each by Mail address post-card: "Cuticura, Dept. A, Boston, U. S. A." Sold everywhere.

Drying Potatoes Wholesale

Dried at Six Plants for the Use of American Soliders in France

Potatoes are being dried at six plants located in New York and Michigan for the use of American soldiers in France. One plant alone employs 200 hands and is putting up 43 tons of raw potatoes each day. It is expected that later in the season carrots and other vegetables will be dried.

At one point in New York state the United States department of agriculture, co-operating with a local vegetable growers' association, is conducting a demonstration campaign on the drying of potatoes into potato flour, to be used as a substitute for wheat. In that section there are many apple evaporators which may be made available for use in drying vegetables, and it is hoped the demonstration will give root to the practice of using the plants in drying the various vegetables grown in quantity on the muck lands of the district.

SAVE THE CHILDREN

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer. In most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets cure these troubles, or if given occasionally to the well child will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the newborn babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Sizing Up Young Hohenzollern

We see that Berlin triumphantly reports the capture of a number of American wagons, and if we'd known that would be so pleasing we would have sent over a cute little red express wagon for the Crown Prince to take sightseeing.—Grand Rapids Press.

Why Waste Straw

Wasting Straw or Hay Now Is Unpardonable

Anyone inclined to kick against prices of feedstuffs in this country, should note the spring Paris market quotations. Wheat straw sells for $53 to $56.40 per ton, rye straw $40.80 to $44.20, oat straw $47.20 to $50.40, hay $68.40 to $73.20 and alfalfa $69.80 to $74.80. Such prices prohibit stock feeding and indicate the necessity for the U. S. to supply all the meat within her power.

Wasting straw or hay when anyone is in such need of it is unpardonable. Baling at stacking time will not only eliminate all possible waste but will decrease the room necessary for its storage.

Stems of hay are hollow evaporating tubes through which more or less of the appetizing ingredients are lost. Just as the cut wheat stubble represents so many little chimneys for the evaporating of moisture from the ground, so the hollow tubes of the hay stems to a degree increase the evaporation leaving the stalk and leaves dry, pithy and tasteless. That is why hay baled at stacking time is eaten by the stock with so much more relish than hay taken from the stack.—Successful Farming.

WOMEN! IT IS MAGIC! LIFT OUT ANY CORN

Apply a few drops then lift corns or callus off with fingers—no pain

Just think! You can lift off any corn or callus without pain or soreness.

A Cincinnati man discovered this ether compound and named it freezone. Any druggist will sell a tiny bottle of freezone, like here shown, for very little cost. You apply a few drops directly upon a tender corn or callus. Instantly the soreness disappears, then shortly you will find the corn or callus so loose that you can lift it right off.

Freezone is wonderful. It dries instantly. It doesn't eat away the corn or callus, but shrivels it up without even irritating the surrounding skin.

Hard, soft or corns between the toes, as well as painful calluses, lift right off. There is no pain before or afterward. If your druggist hasn't freezone, tell him to order a small bottle for you from his wholesale drug house.

The Women of France

In France recently figures showed that there are now 475,000 women at work in munition factories at $2.00 a day plus 50c from the government with 25c additional for each child, if the head of the house is in the army. Thrift is so strong a principle with French women that French banks are carrying larger deposits than ever before, despite the fact that $18,000,000,000 towards the finances of the war came from popular subscription.

Countless have been the cures worked by Holloway's Corn Cure. It has a power of its own not found in other preparations.

Two New Dairy Products

New Creamery By-product Has Been Placed on the Market

A plant for condensing buttermilk has been established at Grand Forks, N. D., and during this year will use 6,000,000 lbs. of buttermilk, making 35,000 barrels of the condensed article. This is part of a chain of buttermilk condensing plants projected for that section.

A new creamery by-product, called casein butter, has been placed on the market, and patents have been applied for. A number of creameries in the western states are already manufacturing under the new patent. It utilizes a by-product and produces a nutritious food product, which appeals particularly at this time.

Minard's Liniment Cures Burns, etc.

Coddling Huns in Britain

We really are an amazing people. Our rather officialdom acts from time to time and in our name with a fatuous mess that makes us seem more amazing than in fact we are. A letter to yesterday's Times very aptly illustrates this characteristic. It tells about a British officer as [illegible] and several [illegible] officers on their way home [illegible] were turned out [illegible] to [illegible] at Folkstone [illegible] to [illegible] and [illegible] Prussian Daily Mail.

World's Hog Shortage

In the United Kingdom there is said to have been a reduction of nearly 24 per cent. in hog holdings [illegible] less [illegible] Denmark of close to 31 per cent., and in France of over 46 per cent. Probably [illegible] point [illegible] could short age in pork for a period long after the war ends.

DOUGLAS' INFANT TABLETS

Something Nice

Sales Manager (of Punko Motor Co.)—Haven't you something nice to say of that car we sold you last fall, Mr. Nutley?

Victim—For publication?

Sales Manager—If you don't mind.

Victim—Well, I don't mind saying that it makes walking a pleasure!—Buffalo Express.

A Ready Weapon Against Pain.—There is nothing equal to Dr. Thomas' Electric Oil when well rubbed in. It penetrates the tissues and pain disappears before it. There is no known preparation that will reach the spot quicker than this magic Oil. In consequence it ranks first among liniments now offered to the public and is accorded first place among all its competitors.

Daylight Saving in Britain

The Obvious Step of Extending the Daylight Saving Act

Indication of the popularity of the daylight saving plan in Great Britain after experience of its results, is given in the proposal now made, for its extension so that another hour may be added to the day, as now determined by the legislation.

The London Daily Mail in a recent issue says:

"The fuel-saving problem is so urgent that the government should, without further delay, take the obvious step of extending the Daylight Saving act by having the clock put forward another hour until the end of August. Simultaneously street lighting everywhere ought to be stopped during the summer.

"When we all put our clocks an hour forward a few weeks ago none of us would be the worse next day. None of us realized it the next day. None this further change; it would be even less inconvenienced by change; it would be even less troublesome than the monthly change of lighting-up and blind-drawing time; and, indeed, a monthly adjustment of daylight saving hours would have much to recommend it.

"Another hour of daylight saving would mean that in the vast majority of homes no artificial light would be needed in the summer months. Here would be an immense saving of fuel. There would be still more evening daylight for the garden or allotment, and food production would be greatly increased.

"The farmers, who might be hampered in their hay and corn harvest by the dews, could start work an hour later. In purely agricultural districts it would involve no great scheming for the village post office, inn, and shops to adopt their hours to local needs.

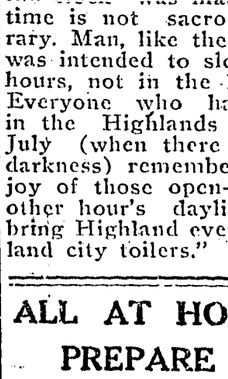
"Man was not made by the clock; the clock was made by man. Clock time is not sacrosanct; it is arbitrary. Man, like the beasts and birds, was intended to sleep in the darkest hours, not in the hours of sunlight. Everyone who has made a holiday in the Highlands in May, June, or July (when there is scarcely any darkness) remembers the boon and joy of those open-air evenings. Another hour's daylight saving will bring Highland evening light to England city toilers."

ALL AT HOME SHOULD PREPARE FOR WAR

The first test a man is put through for either war or life insurance is an examination of his water. This is most essential because the kidneys play a most important part in causing premature old age and death. The more injurious the poisons passing through the kidneys the sooner comes decay—so says Dr. Pierce of Surgical Institute, Buffalo, N. Y., who further advises all people who are past thirty to preserve the vitality of the kidneys and free the blood from poisonous elements, such as uric acid—drink plenty of water—sweat some daily and take Anuric, double strength, before meals.

An-u-ric is a discovery of Dr. Pierce, and can be obtained at drug stores. For that backache, lumbago, rheumatism, "rusty" joints, swollen feet or hands, due to uric acid in the blood, Anuric quickly dissolves the uric acid as hot water does sugar. Send 10 cents to Dr. Pierce for trial pkg.

Thorold, Ont.—"I think Anuric is the best I have ever taken. My kidneys had given me trouble for some time. I would suffer from backaches and also swelling of the limbs. I took Anuric and it has entirely cured me of all my backache and has strengthened my kidneys so I feel safe in recommending it to others who suffer."—Mrs. C. A. Clarke, Box [illegible]



Toronto, Ont.—"For the last eight years I have suffered with kidney trouble and rheumatism. It began with pains in my back and finally left my back and went down into the foot. It developed into a chronic case. I tried every medicine I could hear of and consulted some good doctors, but still I kept on suffering. About a year ago a friend advised me to give Anuric a trial, and am happy to say I am today a well man—never feel any traces of my ailment no matter what the weather conditions may be. Anuric is a real kidney medicine in every sense."—E. F. Garrison, 5 Matilda Court

Frogs Assisted Enemy

Crown Prince Tells Strange Story to the Kaiser

Karl Rosner, a newspaper correspondent who is frequently termed the German emperor's press agent, describes in the Lokal Anzeiger a conversation which he says took place between Emperor William and the German Crown Prince, in which the son told his father a story of the "frogs at the battle of the Chemin des Dames."

The story was told, says Rosner, as the father and son stood on a hill in the battle sector of the army group of General von Francois on June 3. The Crown Prince said:

"It was when the Germans were preparing to storm the Chemin des Dames. The frogs which were found in millions in the marshy Ailette river region, croaked in such a deafening fashion that they enabled the Germans to bring up batteries, ammunition and columns without discovery, and when the attack actually was launched the deafening concert of the frogs prevented the enemy from discovering the position of the German machine guns."

In the course of the same conversation Rosner says the emperor described the occasion at the beginning of last year, when he was asked to give permission for the blowing up of the famous French castle at Coucy-le-Chateau, near St. Quentin. He said he hesitated until his military advisers pointed out that, in the hands of the enemy, the towers of the castle might menace the lives of hundreds of German soldiers. The emperor then remarked: "Would the French act differently in our country? The protection of soldiers is the supreme law of the commander, and no edifice ought to be spared when it is a question of preserving from danger and death the men who are fighting for the Fatherland."

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, corrects these faults of the digestion and serves to restore the organs to healthy action.

Hadn't Been Home

Charlie had been playing truant from school, and had spent a long, beautiful day in fishing. On his way back he met one of his young mates who accosted him with the usual question, "Catch anything?" Charlie, in all the consciousness of guilt, quickly responded, "Ain't been home yet!"—Vancouver Province.

EASIEST CORN REMEDY, PAINLESS---NEVER FAILS

Just think of it—instant relief the minute you put a few drops of **Putnam's Extractor** on your sore corn. **Putnam's** makes corns dry up, makes them shrivel and peel off. It doesn't eat the good flesh, it acts on the corn alone, loosens it so you can lift it out with your fingers. Wonderful; you bet **Putnam's** is a marvel, and costs but a quarter in any drug store. Why pay more for something not so good as Putnam's?

The First U. S. Tank

Has Taken Months to Construct This Monster

The first United States tank has been completed and is now ready for service abroad. It has been appropriately named "America." Others will follow as fast as production facilities will permit.

It has taken months to construct this monster at a total cost of $60,000. Although the government has not permitted its measurements and facts concerning its artillery complement to be published, it will be seen that it is considerably larger in size than the well-known British tank.

Though similar in outline, it is said to have been designed to eliminate the disadvantages of its predecessor and to add new and important features which the British machine lacked.

Minard's Liniment Relieves Neuralgia.

Speed the Happy Day

Some day the new Russia will arise—an intelligent, educated, hard-working, modern Russia, a united, liberal nation. She will look back on the crazy excesses of her revolution as France looks back on those of hers—but with this difference: that whereas France had to fight alone against monarchial Europe, and was [illegible] to the Bastile [illegible] time, Russia had the help of the great liberal countries when she lay at the mercy of her enemies.—Detroit News.

New German Anthem

A plea for a new national anthem is made by the Lokal Anzeiger of Berlin. "It is ridiculous," it adds, "for Germans to give the noblest expression of their patriotism to the tune of 'God Save the King.'"

Nasty Throat Droppings Catarrhal Discharge Quickly Cured

Doctors recommend Catarrhozone, it is nature's own cure. It drives out the germs, heals sore spots, cleans away every vestige of Catarrhal taint.

You send the soothing vapors of the pine woods, the richest balsams and healing essentials, right to the cause of your cold by inhaling Catarrhozone. Little drops of wonderful curative power are distributed through the whole breathing apparatus by the air you breathe. Like a miracle, that's how Catarrhozone cures bronchitis, catarrh, colds, and irritable throat. You simply breathe its healing fumes, and every trace of disease flees as before fire.

So safe, infants can use it, so sure to relieve, doctors prescribe it, so beneficial in preventing winter ills that no person can afford to do without Catarrhozone. Used in thousands of cases with [illegible] failure. Complete outfit $1.00, [illegible] three months, and is guaranteed, lasts [illegible] cure; smaller size 50c, also guaranteed to cure. Catarrhozone [illegible] dealers or [illegible] Ont. [illegible] Co., Kingston, Ont.

English Channel Tunnel Scheme

International Parliamentary Conference Favors Project

Strong support for the English Channel tunnel scheme from the French and Italian delegates was voiced at the International Parliamentary Conference held in London. A resolution in favor of constructing the tunnel was carried unanimously.

It was estimated by the sponsors of the resolution that the passenger traffic from France alone would be 3,000,000 persons annually instead of the 100,000 that travelled by steamer before the war. The probable passenger and freight traffic between Great Britain and the continent was figured at a profit of £1,118,000, or 7 per cent. on the tunnel company's capital of £16,000,000. The tunnel, which should be completed within five years of its commencement, would be worked, ventilated and pumped by electricity supplied from a power station in Kent, possibly ten miles or more inland. It was suggested that the tunnel should be maintained under the authority of the war office, and a dip in the level of the rails forming a water lock, by which the tunnel could, in case of emergency, be flooded from floor to roof for a mile, would be under the control of the commandants at Dover Castle and the neighboring forts.

Against the danger from enemy submarines, depth bombs or mines, the tunnel would be protected by a covering of the chalk bed of the Channel of a minimum thickness of 100 feet. The water dept above the tunnel would at no vulnerable point be less than 180 feet.

State of Ohio, City of Toledo, Lucas County, ss.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE.

Fair Money and Medal Winners

—Continued from Page 1

Pieced and quilted quilt—1 Miss E Smith.

Hooked mat—1 Mrs R Stewart.

Towel with filet crochet—1 Mrs John Hobden, 2 Mrs Jas Cook.

Collection fancy work—1 Mrs Jas Cook, Mrs w w Miller.

COOKING

Pan rolls—1 Mrs E N Holmes.

Buns, bread dough—1 Mrs Payue, 2 Mrs John Hobden.

Bread, standard flour—1 Mrs John Hobden, 2 Mrs Cotterill.

Bread, Graham flour—1 Mrs Whitehead, 2 Mrs Payne.

Rolled oats bread—1 Mrs E N Holmes, 2 Mrs Payne.

War bread—1 Mrs Cotterill, 2 Mrs C G Bennett.

Fruit cake—1 Mrs Payne, 2 Mrs Brousson.

English currant cake—1 Mrs M Young, 2 Mrs. Payne.

Rolled oats drop cakes—1 Mrs E N Holmes, 2 Mrs Fairhead.

Cookies—1 Mrs Cotterill, 2 Mrs E N Holmes.

Ginger snaps—1 Mrs Cotterill.

Lemon pie—1 Mrs Payne, 2 Mrs w w Miller.

Fruit tart pie—1 Mrs H A Dodd, Mrs Payne.

Appie pie—1 Mrs w w Miller, 2 Mrs Payne,

Light cake—2 Mrs Brousson.

Baking powder biscuits—1 Mrs Pochin, 2 Mrs F H Jackson.

Nut loaf, Graham flonr—1 Mrs Payne, 2 Mrs w K Brown.

Ginger bread—1 Mrs Lyne, 2 Mrs Walmsley.

BUTTER and CHEESE

1-pound print butter—1 Mrs Jas Cook, 2 Mrs H A Dodd.

3-pound roll butter—1 Mrs Jas Cook, 2 Mrs Pochin.

Homemade cheese—1 Mrs Walmsley

CANNED GOODS

Canned fruit—1 Mrs H A Dodd, 2 Mrs Fairhead.

Canned vegetables—1 Mrs G Cartwright, 2 Mrs H B Downs.

3 quarts jam—1 Mrs Pochin, 2 Mrs Jas Cook.

3 glasses jelly—1 Mrs Mallandaine, 2 Mrs G Cartwright.

3 bottles pickles—1 Mrs Payne, 2 Mrs. G. Cartwright.

Catsup—1 Mrs Mallandaine, 2 Mrs Jas Cook.

Canned meats—1 Mrs Jas Cook, 2 Mrs Payne.

Collection canned foods—1 Mrs Payne, 2 Mrs Jas Cook.

Alice Siding

Mrs. Andy Miller and Miss Alice Carr are Alice Siding's representatives at the Cranbrook fair this week.

E. Bridge, who has been at coast points for the past few months, returned to the Valley on Thursday last, and states the orchards look more promising here than any other B.C. point he has seen.

Miss Ella Webester of Calgary, Alta. who has been home on vacation for a couple of weeks, returned on Sunday.

Mrs. Baines of Cowley, Alta., is a visitor here this week, a guest of Mrs E. Parker.

Mr. and Mrs. Jos. Morgan, also of Cowley, spent a few days here this week, with Mr. and Mrs. Pease.

Victor Carr made quite a clean-up at the Creston fair in the horse section. With Walter up he also won first money in the pony race, while in the saddle horse race C. Sutcliffe's entry was the last to finish. It takes Alice Siding to furnish the unusual—the fastest and slowest horses at the fair.

Jas Compton loaded out his first straight car of apples on Thursday last. There were over 700 boxes of Wealthys in it.

The school report for September shows an average attendance of eleven pupils, with a total attendance of 208. The monthly award for regularity and punctuality goes to Melville Parker.

Canyon City

Miss Phillips, who has been Mrs. C. Hall's guest for the past five weeks, left for her home at Lethbridge, Alta., the latter part of the week, after a most enjoyable vacation.

Mr. Cleves of MacLeod, Alta., is the latest inyestor in Canyon City property, last week buying ten acaes from the Company in the vicinity of the mill. He intends getting things in shape for living on it so as to be able to go to work on the land in the spring.

Canyon City did its bit handsomely toward the Knights of Columbuf overseas soldiers fund, the contribntion from here totalling $56.

Phonse Huygens is taking his annual vacation this week, and is seeing the sights at Cranbrook fair.

At Creston fair on Saturday, Canyon City was very much in evidence. Mr. Wearmouth had a constant stream of callers to view his glass hive of bees, which were shown in a tent on the grounds. The Company's Holstein cattle, sheep and horses were the feature of the live stock section, while in the buildings Messrs. Mawson, Pochin, VanAckeran and Knott helped out the show to some extent, and got a share of the prize-money. In the ladies' race Mrs. Lyon and Mrs. VanAckeran won first and second money.

The Sept. 19th meeting of the Red Cross Auxiliary was at the home of Mrs. Hall, when sewing to the extent of 24 T bandages was accomplished and the tea receipts were $2.15. On the 26th Mrs. Knott had the Auxiliary meeting—a business session—at which it was decided to have a hallowe'en party at Mrs. Pochin's at the end of the month. The Knott tea was good for $2.50.

Canyon City people will hear with regret that another of our citizens has laid down his life for king and country in the overseas fighting last month in Corp. Bobbie Smith, a former employee at the mill, and a ranch owner here. Word has just come from his old home in Ontario that he was killed in action on Sept. 2nd. The late Smith went overseas about two years ago with an Edmonton, Alta., corps. He was about 30 years old, and came to Canyon City in 1910.

PLANS FOR DEMOBILIZING ARMY WHEN THE DAY OF PEACE ARRIVES

SCHEME FOR RETURNING SOLDIERS TO CIVIL LIFE

Military Authorities In Great Britain Are Already Working On Far-reaching Plans Which Will Facilitate Movement At the Dispersal Depots

A London correspondent of the Associated Press, describing the measures which are being taken in Great Britain to solv: the problem of demobilization, writes as follows:

Although the end of the war may be far distant, plans for demobilization of the British army, when the proper time arrives, are well under way. The military authorities, acting in conjunction with the ministry of labor, are perfecting the scheme by which the soldiers will be returned to civil life with the utmost celerity, and at a camp not far from London there has already been a rehearsal of the methods to be adopted for dispersing the men.

"Big as was the job to get men into the army," said an officer engaged in the work, "it will be a bigger job to get them out of it. But the country may be sure that everything will be done to enable the soldiers to reach their homes and get employment with the minimum of friction."

The scheme is farreaching. The authorities have had to consider not only the situation at home, but also how the plan will fit in with the convenience of France, Italy and the overseas Dominions, and with transport facilities from Salonica, Mesopotamia, Palestine, and from other parts of the world. How long it will take to demobilize the millions of troops is a question to which even those occupied in the task are not prepared to give a definite reply.

Eighteen dispersal depots are to be established in England, Scotland and Wales. Every step has been worked out in detail. Before the men in France are ordered home they will be assembled in the order of the districts from which they came, so that all may be sent in a body direct to the locality from which they joined the army. Each man will take with him his entire kit, including his arms and personal equipment, steel helmet and box respirator. Previously he will have been deprived of his ammunition.

On reaching the dispersal station the men will hand over their equipment. Everything must be given up except the uniform, which the soldier is wearing, and his great coat, although the coat must be returned after the month's furlough to which each man will be entitled. He will be permitted to retain his uniform.

The soldiers will pass through several huts before he is sent on furlough. In one he will be given a protection certificate, containing all particulars regarding his regiment, length of service and destination. In another he will be given an advance on the pay still due him, and post-office money orders in three equal instalments for the remainder.

On application the soldier will be presented with an "out-of-work" insurance policy valid for a year. This will entitle him to receive a fixed sum for a definite period from the post office, if unemployed.

Finally, the men will be grouped in different huts, according to the locality to which they are to be sent. Railroad tickets already will have been made out. Then will come entrainment and the start for home.

Our Coal Resources

Plans for Utilizing the Lignites of Western Canada

A plan for the utilization of western lignites that is likely to have far-reaching results, has been formulated by the Canadian council for scientific and industrial research.

The provinces of Manitoba and Saskatchewan import annually from Pennsylvania about 500,000 tons of anthracite for domestic fuel. There are in the provinces mentioned about 7,000,000,000 tons of lignites of a poor grade, and consequently disqualified from serving as domestic fuel. It has been demonstrated, however, that they can be carbonized and briquetted and that the product thus treated is an equivalent of anthracite.

As a result of these investigations, conducted by the lignite commission, [illegible] recommended that the government establish a plant in southern Saskatchewan to turn out 30,000 tons of this fuel yearly, estimated cost of which [illegible] about. The Saskatchewan government seemed ready to accept the proposal, the Dominion government [illegible] expert to [illegible] consultation to organize the plan at an early date.

A Danish hospital for cripple [illegible] experimenting with electrically heated mattresses for keeping beds at even temperatures.

Immensely Impressed By the Spirit of Britain

World Will Be Safe for Peace as Long as America and Great Britain Stand on Guard

Otto H. Kahn, the New York banker, who, though a native of Germany, has always been sound on the question of the war, recently returned from a trip to the other side and gave a statement to the New York Times, in the course of which he said:

"I was immensely impressed by the spirit of Great Britain and the magnitude and efficiency in all directions of her war effort, which has not, perhaps, been generally appreciated as yet at its full value.

"As a business man, I was naturally able to realize best their organization for the business side of war. They have drafted their best business brains everywhere into the service of the government. Their supply, transportation, manufacturing and salvage systems, for instance, are marvels of business organization.

"Andrew Weir, director general of supplies, and, among other things, in charge of the army salvage system, was good enough to show and explain to me his methods of operation. He told me that in the space of three years he will have saved to the nation through salvage, or, rather, in effect created for the nation, $500,000,000 out of things which formerly went into the scrap heap.

"The desire of Great Britain to do everything possible for our boys over there and to make of the present comradeship in arms a lasting, deep and cordial friendship between the two nations is strikingly manifest all throughout the land, from the highest to the lowest. I believe the importance of meeting them in the same spirit, sincerely, wholeheartedly, and without reservation, cannot be overestimated.

"Whatever betide, the world will be safe for peace, humanity and liberty as long as America and Great Britain, understanding and trusting one another, stand on guard. The world will not be safe otherwise for any length of time. If she should be given the opportunity once more, Germany, by subtle and open means may be expected to try again to sow the seeds of dissension between America and England after the war, as she did for many years before the war."

A Case of Mistaken Identity

Lone Fisherman Caused Much Excitement on N. J. Coast

Albert Carlson, a lobster fisherman, was seated in his motor boat about two miles off Monmouth Beach, N.J., the other afternoon with his pots piled up around him so that the outfit looked somewhat like a submarine lying on the surface.

Down the coast well within the three mile limit, came a coastwise steamer ploughing along at about twelve knots an hour. Suddenly, much to Carlson's surprise, a shot was fired from the steamer and a shell dropped a few yards away from his craft. Two other shots immediately followed, one of which swept Carlson's piled up pots away, but left both him and his motor craft uninjured.

The fisherman turned and streaked for the shore as fast as his engine could chug. It was an extremely hazy afternoon and he figured that by the time the third shot had arrived and his pots carried away he was perhaps no longer visible to the steamer. At any rate she ceased firing and was observed by persons along the beach to turn round and head in the general direction of New York.

Then much excitement! Word spread along the nearby coast that there was a German U-boat off shore, and from miles around automobiles raced in with curious parties hoping to see a possible naval engagement.

What they saw was a destroyer come plunging down the coast and search the waters. Overhead flocked hydro-airplanes which had been despatched from Camp Alfred Vail at Little Silver upon getting a report of an enemy submarine. On shore a badly scared lobster fisherman was [illegible] that it would never be safe for him to go near his pots [illegible] Boston Globe.

New On Distributing Warehouse

A contract has just been let for the building of a warehouse and filling station at Calgary, Alberta, by one of the large Canadian oil distributing companies. The cost of the building, which will be of reinforced concrete, is estimated at $80,000. Work is expected to commence immediately.

Fate of "U" Boat Sealed

Italian Naval Officer Says Day of Suppression Is Approaching

A high officer of the Italian navy, interviewed by the Rome correspondent of the Central News, on the subject of the destruction of enemy submarines, said:

"In this war our enemies have deliberately elected to play the part of wild beasts, and they set out to dominate the world by brute force. This is especially true in regard to their submarine war methods. As a result the world had to arm itself against these wild beasts of the sea, and a pitiless chase was begun in order to destroy them.

"Ever since the world began human hunts against beasts have invariably ended in the suppression of the plague, and in this hunt the destruction of the beasts will be complete before the war ends. The Austrian beast has already been eliminated—Austrian submarines are no longer to be met with. The German beast is still active, but it has begun to lose its teeth, and its fate is sealed.

"It has been decided not to publish the statistical results of the campaign of destruction against submarines. Personally I doubt if that is the best method. The hiding of these figures has enabled the rulers of Germany to deceive their people and make them believe that the submarines were achieving their aim. The day when the entente decide to publish the figures of the number of submarines destroyed, the whole world, and especially Germany, will be astounded.

"The mine blockade established by the British in the North Sea has given brilliant results and similar blockades in other waters have also been most successful. Very soon, you may believe me, the German submarine beast will be completely suppressed."

Great'y Increased Wool Production

Considerable Increase Over Last Year's Production

Although it is still too early to determine what the total production of wool in Western Canada this season will amount to, it is evident that there will be a considerable increase over last year's production, and in all probability greater than one of fifty per cent., which was originally forecasted. Grading is now well under way at all the receiving points. Three weeks before the close of the grading at Regina, Saskatchewan, farmers of this province had shipped nearly twenty per cent. more wool than was received at this station during the whole of last year. A considerable quantity of wool is also expected during the last two weeks.

At Calgary, Alberta, about two weeks before the close of the grading season, about fifty per cent. more wool had been received than during the whole of 1917. The total increase there for the year over last year's production bids fair to run around seventy-five per cent. Edmonton, Alberta, too, will have considerably heavier shipments of wool this year. The same remark applies to Lacombe and other small receiving stations in Alberta. Lethbridge, Alberta, which is the headquarters of the Southern Alberta Wool Growers' Association, whose members produce the largest quantity of wool in Western Canada will ship about 1,600,000 pounds of wool, which is about fifty per cent. greater than the total shipments of last year.

The farmers of Manitoba have also considerably increased their wool output, estimates showing an increase of between twenty-five and fifty per cent.

On the whole, very satisfactory progress has been made in the sheep industry since last season. Western Canada is destined to be a great sheep country, and continual progress may be looked for during the next few years, as sheep are becoming more and more popular with the farmers, and the country is capable of supporting many times the number of sheep already here. The rate of progress is only limited by the ability of farmers to obtain sheep.

High Tribute to Brave Men

Act of Superb Courage Saved the Whole Allied Cause

Canada combed her offices, her factories, her farms, for men who had never thought to fight. They had to be taught the rudiments of drill, how to load a rifle, what army discipline is for. Yet in April, 1915, only six months after their arrival in England, they plugged the gap at Ypres for four days after the first poison gas attack and saved the channel ports. Military authorities have repeatedly said that by this act of superb courage they saved as well the whole allied cause. They have further said that it is very doubtful whether any but "raw troops" would have stood firm under such impossible conditions. They were no more than a handful of country boys a mere screen of riflemen. They could have been wiped out any time in an hour by the German masses that pressed upon them. By all the rules of the game, they ought to have fallen back. But as one German officer put it—these "glorious damn fools" did not know that they were beaten.—Philadelphia Public Ledger.

BRUTAL CREED OF THE GERMANS EXEMPLIFIED IN CONDUCT OF WAR

CRIMES SUCH AS THE WORLD HAS NEVER KNOWN

German Brutalities, as Evidenced During the Past Four Years, Are the Direct Expression Of the Beliefs That the Nation Expresses Through Its Military Domination

Captured a German Plane

Australian Airmen Drove a Bosche Two-seater to an Allied Airdrome

A German two-seater aeroplane which had taken part in low flying patrols during the attack on the French and had lost its way, was discovered above the Australian area by our Australian reconnaissance machine coming home from the German lines.

The Australians belonged to the squadron which first met Richtofen's circus and Richtofen's last flight and saved Richtofen's machine and buried Richtofen's body. The German machine yesterday tried to escape, but the Australian headed him off, and shepherded him towards his own aerodrome like a lost sheep.

The German did not apparently relish a duel, and did not fire a shot. The Australian aeroplane steadily drove the German down, keeping about 300 feet behind his tail, with gun ready to fire in case of emergency.

The Australian observer frequently shouted to the pilot: "Fire a burst to make sure." The pilot replied: "No, so long as he behaves properly and goes home to our grounds I will not fire." The German, who subsequently admitted he did not know where he was, made no attempt to fight, and landed in the Australian aerodrome in a considerable state of panic, believing our machine would open fire each moment.

His machine was captured intact for the Australian war museum.

Czecho-Slovak Cause

Bohemians and Their Kinsmen on Side of Allies

Four nations have recognized the Czecho-Slovak cause: Italy at the Rome congress; France by "proclaiming the rights of the (your) nation to independence"; Britain, June 5, by the Balfour statement confirming the recognition "granted by France and Italy," and recognizing the new national council; the United States in the Lansing note of June 28 emphasizing the stand that "all branches of the Slav race should be completely freed from German and Austrian rule."

Known to us as Bohemians, the Czechs are the best educated and in many ways the most progressive element in the Austro-Hungarian empire; the Slovaks, a closely kindred race whom "divide-and-conquer" policies have kept apart from their brotheirs in Galicia.

The Czecho-Slovak armies are mainly formed of Austro-Hungarian troops who have turned this war into a revolution, with freedom as its goal, by espousing the other side. More than 18,000 are fighting Austria in Italy; 300 of these, taken prisoners, were recently hanged as deserters. Others are in Macedonia with the Serbs; still others, formerly in Roumania, are a trained nucleus of the Czecho-Slovak army in France with which the American contingent are associated.

Of 300,000 willing Czecho-Slovak prisoners in Russia, many thousands have died fighting for the entente. Possibly 100,00 are still in arms. The most famous body are the 60,000 men, whoh, under the agreement of the Bolsheviki with their national council, started across Siberia to get to France by way of the Pacific, but who found nearer work in ending the anarchy about them. In all the world today no group of men of such modest size is so placed as to promise such momentous service for humanity and civilization.

Manitoba Cattle Bring Big Prices

A dispersal sale of Aberdeen Angus cattle from the farm of J. D. Macgregor, of Brandon, Manitoba, was the greatest success of any sale of this sort in the history of the Canadian west. Buyers were present from several states and provinces, and they were so keen to secure some of these famous animals that rather than disappoint them more animals were sold than it was originally intended to dispose of. One hundred and thirty-five animals were sold for a total of $91,500. It was truly a dispersal sale, for animals will go to as far distant points as Alberta and Kentucky. The first 60 animals sold for an average of more than $800.

A Question of Right

"Every man has a right to his own opinion," said the argumentative man.

"That's what I say," exclaimed Senator Sorghum, in a tone of slight irritation. "What is the sense of your putting up a discussion in an effort to take my opinion away from me and substitute yours?"—Washington Star.

Every act of the German nation since the war began and including its inception has been the most direct expression of a creed, a creed that has always produced just exactly the kind of action in which Germany indulges. This creed has just been published by the New York peace society in a pamphlet called "The Creed of the Huns," entirely in words quoted from Germans themselves, even the title. (It should be remembered that it was the kaiser himself who first designated the German soldiers as "Huns" in his famous speech to the army sent to punish the Chinese at the time of the Boxer rebellion). Prof. Charles H. Levermore has summed up these various utterances, coming from such men as Frederick the Great, von Clausewitz, William II., Moltke, Trietschke, Lasson, Bernhardi, Bethmann-Hollweg, and the War-Book of the German general staff in the following sentences:

"Article Second.—The state possesses unlimited sovereignty, and is not subject to the moral restraints that should govern the conduct of individuals; therefore, in warfare, any barbarity which is thought to promote or insure the assumption of aggressive power is permissable and justifiable."

This doctrine, expressed perhaps even more epigrammatically by Prince von Bulow in a speech in the Reichstag, "For Germany right can never be a determining consideration," has been instilled into the German people from the kindergarten up. It is the creed of militarism, and military training in Germany is directed to the mind as much as to the legs. For four years now we have seen a great people the willing tools of such crimes and barbarities as the world has never known; the invasion and raping of Belgium, with cruelties piled upon cruelties; the invasion and wanton devastation of northern France; the introduction of the most hellish devices into warfare, such as gases and burning oils; the sinking of ships full of non-combatants and women and children, and manifestations of satanic glee over their fate (medals were struck over the drowning of women and children and distributed all over Germany); the practise of piracy upon the high seas, sinking ships of neutrals in all directions and all places so that no ship of any nation is safe anywhere in the world; the dropping of bombs on children playing on the beach; the deportation of civilians of Belgium and France as slaves into Germany as the old heathen nations used to make slaves of all whom they conquered; the spying upon everybody in all nations; while guests of nations secretly plotting to destroy them; attempting to stir up strife between friendly nations that Germany might profit by their quarrel; finally, the almost unbelievable, deliberate sinking of hospital ships; the practise of any kind of crime as a nation; the lack of any conscience; the inability any longer to distinguish between right and wrong; the indifference to the judgment of the whole world; the calm, purposeful descent to the level of the wild boar, goring his way to his prey. Every civilized man has been wondering and asking, How can any nation sink to the level to which Germany has sunk, do the unutterable things that with her have become a daily habit? The answer is written across the skies: Hold such a creed as the Germans hold and you will do the things the Germans do.—From the Christian Work, New York.

The Worst Still to Come

The power of this country has scarcely begun to move. It is thus far like a great rock that is being loosened at the top of a mountain. Our munitions factories, shipyards, training camps are loosening and starting the power of this land. Wait till it gets really started; wait tih the rock comes crashing down at full speed from the mountain top. Then Prussia will know something about the nation whose men, taken prisoners, were insolently exhibited in the glass cage at Cologne. The Washington Times.

Can All You Can

It would be a thousand pities to produce vegetables or fruit in response to the war garden appeal and then have more on hand than could be used so that quantities would perish. All surplus vegetables over immediate requirements should be canned, dried, and stored away, for winter will follow a season of plenty and all the world will be short of food.

One Cause for Doubt

Mother (visiting camp)—Oh, father, that looks like our boy now!

It does; except that he's working.—Life.

Are You Using Wild Fruits?

Fruit is going to be scarce this year. Winter was hard on fruit trees and the small fruits have not beeen plentiful so far. In England the crop for jam making is also reported short, and the soldiers require vast quantities of jam. People who live near wild berry patches should make a point of picking all they can. Get the children out in the berry patch. Wild raspberry jam and wild blueberry jam are two great Canadian delicacies. Use wild fruit and there will be more tame fruit for the canneries to ship as jam to the soldiers.

Small but Potent.—Parmelees Vegetable Pills are small, but they are effective in action. Their fine qualities as a corrector of stomach troubles are known to thousands and they are in constant demand everywhere by those who know what a safe and simple remedy they are. They need no introduction to those acquainted with them, but to those who may not know them they are presented as the best preparation on the market for disorders of the stomach.

Now Do This or Fight

Having read our little screed on "Work," the other day, F. J. B. sends us the following highbrow definition: "Work is the compulsory expenditure of psychological or muscular potency in activities devoid of immediate pleasurability, but characterized by financial advantageousness."

Minard's Liniment for Sale Everywhere.

Growing Popularity of School Fairs

The director of school agriculture for Saskatchewan reports that more interest is being taken in the school exhibitions this year than ever. The first exhibition was held at Melfort, in 1909, the following year there were two; in 1914 the number had increased to fourteen, and last year there were 129. This year there will probably be about 200 school fairs and Manitoba will also have a large number.

In a Real Sense

"Father," said vivacious Vivian as she lay in the hammock on Palm Beach Hotel piazza, "this place seems just like home."

"Yes, it's the dearest spot on earth," promptly replied father, putting away his fountain pen after writing a check for that week's board bill.—Truth.

The Wear and Tear on that boy of yours during the active years of childhood and youth necessitates a real building food.

Grape-Nuts

supplies the essentials for vigorous minds and bodies at any age.

"There's a Reason"

Canada Food Board License No. 2-026

W. N. U. 1224

War Gardens in Canada

Enthusiastic Response to Appeal for Planting War Gardens in the West

Frederick Abraham, hon. chairman of the vacant lot and home garden section of the Canada food board, reports that there has been enthusiastic response to the appeal for the planting of war gardens throughout the west.

"The British Columbia war gardens could supply the prairie provinces with fresh vegetables for many months in the year," says Mr. Abraham, "if the transportation problem could be solved. I believe this is only a question of time. Everything seems to grow in greater abundance in British Columbia, and many of the vegetables have two crops in the season."

Mr. Abraham reports that the school children of British Columbia have joined the school garden plot movement with splendid enthusiasm and the crop produced will make a material difference to the local supply.

DOUGLAS' INFANT TABLETS TRADE MARK REGISTERED
FORMERLY HENNEQUINS
FOR BABIES AND SMALL CHILDREN

Contain no harmful drugs. 25c per box or 5 boxes by mail on receipt of $1.00.
Douglas & Co., Napanee, Ont.

The Gallant Eighth

My brother wrote me about a dinner some of the soldiers gave for two visitors at camp, members of a famous Canadian regiment, who were home on sick leave.

The sergeant had been carefully coached about giving the toast, but became flustered, and this is what he made of it:

"Here's to the gallent Eighth, last on the field and first to leave it."

Silence reigned, and then the corporal came gallantly to the rescue.

"Gentlemen," he began, "you must excuse the sergeant; he never could give a toast decently; he isn't used to public speaking. Now I'll give a toasts: Here's to the gallant Eighth, equal to none."—From the Chicago Tribune.

Thousands of mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

A Chronic Trouble

"Did you tell old Moneyrocks that he must give until it hurts?"

"No. That wouldn't have made any difference with him. Anything he gives hurts."—Life.

PUTNAM'S FINE FOR CORNS THAT ACHE

Even a drop or two of Putnam's Extractor takes the sting out of a sore corn. Mighty slick work Putnam's does on a crusty old corn. You see Putnam's shrivels the corns up quickly, transforms it to a bunch of dead skin, loosens it from the toe so you can pick it off, roots and branches, with your fingers. It's painless—that is why Putnam's is so popular. It does really cure quickly—that's why you should take a quarter to the drug store today and get a bottle of Putnam's Extractor.

The Resources Of British Columbia

Forest Wealth Provides for About a Quarter of the Revenue of the Province

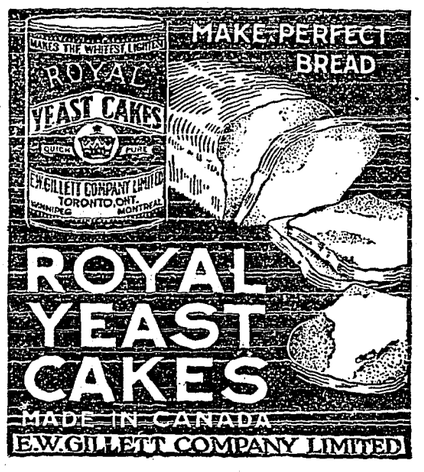
The economic resources of British Columbia are very simply but clearly shown in a recent industrial number of the Financial Post of Canada. The value of forest products in 1917 is given as $48,913,155, an increase of 38 per cent. over the output of 1916; the manufacture of paper and pulp increased by 85 per cent. The forest wealth provides for about a quarter of the revenue of the province.

Agricultural production in 1917 is shown as valued at $37,661,850; an increase of 17 per cent. over 1916, notwithstanding the large number of agriculturists serving their country in the military field. That the standard of quality has been maintained is shown by the numerous awards won in Great Britain, the U.S.A. and Canada.

As regards fishery production the province of British Columbia is credited with 40 per cent. of that of the entire Dominion. Its value was $15,311,954, being three-quarters of a million more than that of 1916. The total pack amounted to 1,557,485 cases.

From the mines of British Columbia is also derived a wonderful value and variety of economic ores, and yet these [illegible] only a "scratching of the upper crust." The output for 1917 was $37,182,000.

British Columbia is also a manufacturing and trading centre for the world's exploitation in many fields of industry; its waterways, harbors, rivers of mighty volume and railway facilities are even today shown by a return of $60,000,000 as the value of industrial wealth in 1917.



Small Fruits Grown Very Successfully

What Can Be Done in the Growing of Small Fruits in Western Canada

An excellent illustration of what can be done in the growing of small fruits in Western Canada are some strawberries that are at present being displayed at Edmonton, Alberta. These berries, which were grown within a few miles of the city, are of large size and excellent flavor—qualities in which they compare very favorably with those which are imported from the coast in large quantities.

There is no reason why farmers in the prairie provinces of Canada should not grow all the small fruit they require. They have also an excellent market for their surplus in the growing cities and towns.

Wild fruits grow abundantly in many parts of the country, and are used freely by people in these localities. Saskatoons, raspberries, strawberries, black currants, gooseberries, wild cherries, bush and low bush buffalo cherries, cranberries and blueberries furnish fruit in their season.

There is no doubt that with the further development of the country fruit growing will receive more attention than it has hitherto received from the farmers of Western Canada. Horticultural societies exist at many points throughout the country and hold meetings for the discussion of topics relating to the industry, and exhibitions for the purpose of encouraging the efforts of those already engaged and stimulating the interest of others in this very worthy enterprise.

Minard's Liniment Relieves Neuralgia.

A Controlled Press

When we grow impatient over the faults of our press it might be well for us to think of what the controlled press of Germany is doing to the German people. Meanwhile we read of ally pamphlets being discharged or dropped in the German lines. We are inclined to think this a waste of paper. Better results are to be hoped for from the penetration of news from Switzerland. But the only thing that can convince the German people is some great blow which even the controlled press cannot conceal; this and the steady pressure of privation and loss of life.—Chicago Tribune.

The difference between see and saw is intense.

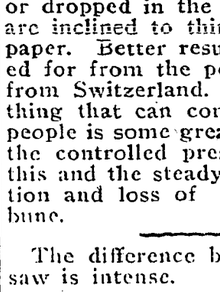
"WHO WILL WIN THIS BATTLE?"

Your kidneys are the filters of the body. If they become inactive and fail to eliminate the waste matter, they are apt to throw the whole mechanism of the body out of order, thus toxic poisons can accumulate in the system and be as deadly as snake venom.

Besides causing the minor ailments of rheumatism, sciatica, lumbago and backache, neglect of the kidneys is apt to develop into more serious diseases, such as diabetes or stone in the bladder.

Rid the body of toxic poisons—clean the bladder and kidneys and cure the twinges of rheumatism with Anuric and you win the battle of life.

Anuric was first discovered by Dr. Pierce, and has benefited thousands of sufferers as well as appeased and eliminated the ravages of the more serious kidney diseases. Now procurable at any good drug store, or send Dr. V. M. Pierce, Invalids' Hotel, Buffalo, N. Y., or branch office, Bridgeburg, Ont., 10 cents for trial package.



Thorold, Ont.—"I was wonderfully helped by taking 'Anuric.' For about three years I had kidney trouble and rheumatism. I also had backache. My limbs would swell and I had rheumatism in my arms and hands. My hands would swell and joints would be so [illegible] and stiff I could scarcely do my work. They would pain me something awful. I doctored but without relief. At last I saw 'Anuric' advertised. I began its use and two bottles completely cured me of all my rheumatism, and I think it was permanent for that was a year ago and I have never had any return of this ailment. I have never found a medicine so good as 'Anuric'."—Mrs. E. H. Hutty.

Women On the Land

Plenty of Room for War Service on Part of Town Girls

The women on the land at present number hundreds of thousands, without counting farmerettes. The farmers' wives and the farmers' daughters have been hard at work all year; their day is never ended, milking, feeding poultry and pigs, butter making, handling eggs for market etc. Their chores are innumerable and in addition to that they have their own kitchens, their own households and their own family tasks, cares and responsibilities. At harvest time they have the additional burden of feeding the harvest hands. There is plenty of room for war service on the part of town girls who want to help in the war in volunteering to help farmers' wives on the neighboring farms during harvest rush. This would release the farmer's wife from her household duties and add her effective labor for outside work in aid of her husband who will be hard put to it to get in his crops this season. Helping the farmer's wife this year is just as important as any other war work that women can take up.

FIGHTING FOR HAPPINESS

When you get into a frame of mind that makes life seem one tiresome duty after another, with no pleasure in it; when ill-health seems to take all the joy out of life and you worry over things that are really not worth worrying about, then your nervous system is becoming exhausted, and you are on the way to a general breakdown in health. In this condition your health and happiness is worth fighting for and good, rich, red blood is what your system needs. It is a hopeless task to try to restore your health while your blood is deficient either in quantity or quality. And remember that no medicine can be of any use to you that does not build up your weak, watery blood.

To build up the blood and strengthen the nerves there is one remedy that has been a household word for more than a generation—Dr. Williams' Pink Pills for Pale People. It is the actual mission of these pills to make new, rich, red blood, which strengthens the nerves and tones the entire system. They give you a new appetite, make sleep refreshing, put color in the lips and cheeks, and drive away that unnatural tired feeling that oppresses so many people. If you want to experience new health and happiness give Dr. Williams' Pink Pills a fair trial.

You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Food Prices Abroad

In Paris beef can be obtained with difficulty, and costs 60c a pound or more. In Italy beef sells from 79c to 82c per pound, and veal 66c to 79c.

If Miller's Worm Powders needed the support of testimonials they could be got by the thousands from mothers who know the great virtue of this excellent medicine. But the powders will speak for themselves and in such a way that there can be no question of them. They act speedily and thoroughly, and the child to whom they are administered will show improvement from the first dose.

A Ducal Conscript

Added Proof of the Democratic Spirit in Britain

"How really democratic an institution conscription is," says the Dundee Advertiser, "has been proved to demonstration by the news that the Duke of Argyll—the great Maccallum Mhor himself—has reported at Stirling for medical examination, has been passed Grade I., and has drawn from the national funds a sum representing three days' military pay to atone for inroad on the ducal leisure which was involved in a journey from Inverary.

"His grace is just 46, and a bachelor, and therefore he will be unable, before the tribunal, to make any appeal on personal grounds, so that we may reckon confidently on hearing that he is in khaki one of these fine days. But, however, that may be, the mere fact that he has undergone the ordeal of medical examination will be a great comfort to all his contemporaries. They will be able to boast, after they have themselves undergone the same experience, that they have been 'treated like a duke.'"

Minard's Liniment Cures Dandruff.

Sure, He Did

Intimate Friend (laughingly)—Imagine a degree being conferred on a man that never saw the inside of a college.

The Kid. Can [illegible] LL.D. Quit yer kiddin'! Where do you suppose they decorated me—out on the lawn?

FACE A FRIGHT WITH PIMPLES

Also On Back. Kept Awake. Cuticura Healed at Cost of 75c.

"My face and back were all broken out with pimples, and my face was a fright to look at. The pimples festered and were scattered, and were so itchy that I scratched until the skin was sore and red. They kept me awake at night.

"When I saw Cuticura Soap and Ointment advertised I thought I would try them. I was completely healed after using one box of Cuticura Ointment and one cake of Soap." (Signed) Miss Mary Hastedt, Cottam, Ont., August 19, 1917.

Keep your skin clear by using Cuticura Soap and Ointment for every-day toilet purposes. Nothing better.

For Free Sample Each by Mail address post-card: "Cuticura, Dept. A, Boston, U. S. A." Sold everywhere.

In Happy Germany

The increase of criminality demonstrates the demoralization brought by the war, which is described by fools as a rejuvenating bath. Self-sacrifice and patriotism perhaps are still found in the trenches, but in the invaded regions looting begins to rear its head, culminating at home in the most repulsive profit-snatching.

Everybody cheats, steals and grabs, from jailbird to court chamberlain, who cheats the needy worker at home out of his scanty earnings and pockets millions—and the longer the war lasts the worse it becomes. — From a speech in the Reichstag by Braun, a Socialist Deputy.

Look for the words "Chemically self-extinguishing" on the box.

Fall Fair Was Grand Success

Success—done in great big capital letters—was written over every feature of Creston Valley Agricultural Association's first annual fall fair, which was held here on Saturday last. In the 197 sections, besides about 40 special prizes, there was invariably a splendid lot of entries, the weather was ideal, and the crowd in attendance large.

President Rodgers presided over the opening ceremonies, with Hon. John Keen, M.P.P., and R. G. L. Clarke, B.C. fruit inspector, doing the honors at the Auditorium, and Mrs. and Mr. Keen performing in like manner at Mercantile Hall—all speaking briefly and appropriately. This matter having been attended to the halls were thrown open for public inspection, and were thronged all afternoon and part of the evening—the display of fruits and vegetables drawinfi numerous encore look.overs.

The livestock was shown on the lot next the bank where a temporary corral had been put up, with stalls along the garage, while the poultry was shown in a tent in the same locality. Pens were also built for the accommodation of the sheep and pigs, with the grounds nicely levelled up to make the getting about comfortable.

From 3.30 until almost 6 a list of races for the youngsters, along with a couple of horse races and jumping contests attracted the crowd, the run being from Crawford's corner to the postoffice. In the pony race Walter Carr was winner, with Ollie Christie and Walter Long on Geo. Johnson s ponies, second and third. In the running race the Indians got the money, Hay Louie finishing in front, with Skinny second, while in the jumping the C. Sutcliffe entry came first, and Skinny again second.

A dozen different race events were pulled off, including a hundred yards dash for both Indians and squaws, which were the speed events of the day. The other events were evenly divided between the girls and boys, with cash-on-the-spot prizes paid. Owing to an insufficiency of pies only ten entries could be taken for the pie-eating contest, which was witnessed by a large crowd. Harvey Gobbet was the winner in this, storing half of a good size apple pie in less than two minutes, with John Gibson second, Willie Smith third, and Gilmonre Taylor fourth.

All told there were over 900 entries and it was specially gratifying to note that they came from all points in the Valley; E. Simmons showing what the across-Kootenay country could do by carrying off a number of prizes in flowers, fruits and vegetables.

Mr. Wearmouth of Canyon City helped entertain the crowd with his glass hive of bees at work, which was shown in a tent. Of course everybody wanted to see the queen and Mr. Wearmouth was undoubtedly the busiest man at the fair watching the honeymakers and answering a dozen questions at once. Mr. Sheppard, the Kootenay inspector, was in attendance, and gave a demonstration on beekeeping.

The association is indebted to Mr. Sewell, the Delco electric light system representative, who set up one of these well-known outfits on Friday afternoon, furnishing excellent light for the Auditorium both nights and Saturday afternoon.

Partially due to the fact that the ladies were too zealous in getting together entries in fruit, the show in the ladies' departments this year was below the 1917 standard, more particularly in the cooking section, in some of which there was no competition whatever, while there was also a falling off in the juvenile section as well.

Fancy work, however, pretty well held its own, and there was, generally speaking, the keenest sort of competition throughout. Specially interesting was the five pieces of crochet where Mrs. Edmondson beat Mrs. Watson by the closest kind of a margin, and the Birks special for a knitting bag where Mrs Cook got the red ticket in a show of work that attracted much attention. And in the R. F. Green special for house dress Mrs. Cherrington, who carried off first prize, and the four others had a show of dressmaking that was much admired by all.

In the preserves and canned goods an exhibit that caught everybody's attention was Mrs. Mallandaine's collection of canned wild fruits, which included raspberries, strawberries, cranberry and elder berry, made up in jams, jellies and preserves. Mrs. M. Young had a box-full assortment of sun-dried fruits including pears, peaches, plums, cherries and apricots that looked good, and tasted right, demonstrating that with a little care and attention evaporated fruits of these kinds can be prepared locally of as good quality as the imported stuff.

The judging in the ladies' section was done by Mrs. Rutledge of Cranbrook and Mrs. C. O. Rodgers; who had the fancy work and sewing, while Mrs Chalmers of Thrums and Miss Dobbin, a visitor with Mrs. Bennett, handled the cooking, preserves and canned goods. In the butter and cheese Mr. Parham of the experimental [illegible] awards.

The Auditorium was crowded to capacity to hold the exhibits in fruits and vegetables. One side of the building was required to hold the latter, while the box fruits filled the other side, and the plates filled two tables full length of the hall down centre.

In the boxes prizes were offered in seventeen different varieties and with the exception of [illegible] Grimes Golden there were two or more exhibits in each section, while in the 21 sections of plates nineteen had the keenst kind of competition, the absentees being Tolman Sweet in which no award was made) and the Rome Beauty.

Possibly the chief interest centred in the 5-box lot display in which the Speers' silver cup figures as the prize and which was won by Mrs. J. W. Hamilton, who beat the previous holder, Jas. Cook, by the fewest of points. Mrs. Hamilton also got away with the special offered for the best colored box of apples in the show.

Apples that were at their best at this time all showed to fine advantage more especially as to color, with the Winter Bannas, Greenings, Snows, and Delicious in the box lots outrivalling even their respective varieties in the matter of size it might be said. In the McIntosh class it is noteworthy the K. Andaew ranch got away with the firsts in both the box and plate lots.

On the vegetable side the same excellence was in evidence in practic-everything shown, with celery and red cabbage apout the only items missing. The fodder corn on display showed wonderful growth both as to length and bulk, while Sam Moon's prize-winning crate of tomatoes was as near perfection for color, pack and uniformity of size as one could wish to see. The judging in these classes was done by Mr. Hunter of Penticton, fruit inspector Clarke of Vancouver, and the Kootenay horticulturist, E. C. Hunt of Nelson.

The poultry displa y was largely made up of the children's competition, which was entirely of Rhode Island Reds, and which the judge, Mr. Waby of Enderby, said was the superior of most of the children's poultry competitions he had judged this season.

The show of live stock was favorably commented upon by all. The number of entries was quite large and the quality of the animals shown was revelation to all. For a first exhibition of the sort in the Valley those in charge were highly pleased with the showing. The Bankers' calf competion was very closely contested, Judge Waby finally handing the red ticket to Bob Crawford, with Harold Speers a close second. The boys and girls also had a creditable show in pigs. The Bank of Commerce medals were carred off by Geo. Johnson for best beef-type cow and by W. V. Jackson for the best dairy cow. Jas. Compton got the honors on the registered Holstein cow, while in general purpose team and general purpose ranch horse Victor Carr took both firsts. C. O. Rodgers got both first and second on heavy draft team, and certainly the two pairs hiched up as a four-horse team caught the fancy of everybody as they started out on trip home at night. H. E. Waby of Enderby made awards in stock, pronouncing the exhibit as the best all-round that he ever seen at a first exhibition in the interior.

Local and Personal

Creston Board of Trade meets in October session on Tuesday night.

YOUNG PIGS FOR SALE—$4 each. Hilton, Attwood Ranch, Creston.

WANTED—Heavy-milking, fresh or nearly fresh, milch cow. W. V. Jackson, Creston.

LOST—In Creston, on Sept. 28, purse containing small sum of money and national registration certificate. Reward at REVIEW Office.

Mr. and Mrs. S. A. Speers and A. L Cameron autoed to Cranbrook on Wednesday to take in the fair, and are expected home to-day.

Mr. and Mrs. Chester Paulson of Spokane were among the out-of-town visitors at the fair on Saturday, makinfi the trip here by motor.

Owing to an abundance of reading matter and limited space available we are compelled to hold over till next issue the list of K.C. contributors.

LOST—About Aug. 15th, English field spaniel, black with one white spot. Answers to name of Prince. Notify to T. Baines or REVIEW Office.

Mrs. R. W. Chalmers of Thrums, who helped make the awards in cooking, etc., at the fall fair last week, was Mrs. Ebbutt's guest while in Creston.

Rev. W. F. Campbell, M.A., of Toronot, is due here to-night, to address a meeting in the Presbyterian Church on Lord's Day Alliance work.

The Red Cross ladies had a busy day of it serving refreshments in Speers' Hall on Saturday afternoon and evening, their cash intake being close to $100.

The October meeting of the Women's Institute is scheduled for Friday afternoon next, when a paper on some practical topic by Mrs. A. Smith will be the feature.

Sunday will be harvest thanksgiving day at Christ Church, with both morning and evening services, with the collections to go to the overseas chaplains' fund.

C. G. Bennett is now enjoying the customary two weeks' vacation, and with Mrs. Bennet a motor trip to coast points, going by way of Spokane.

Mayor Anderson of Kaslo was among the distinguished out of town visitors at Creston's fall fair on Saturday, remaining over the week-end with Valley friends.

D. Wadds, the Trail photographer, opened for a few days' business here the latter part of the week, but found things rather slow and left for home again on Wednesday.

Mrs. (Dr.) Rutledge of Cranbrook, who was one of the judges in the ladies' department at the Creston fair, was a guest of Mrs. C. O. Rodgers during her stay in town.

While the list of lands to be sold for taxes in the Nelson district looks formidable enough, the list of such lands offered in the Cranbrook assessment district is easily twice as large—and then some.

The fair night dance in the Parish Hall on Saturday was very largely attended, the young folks finishing off the fair day celebrartion with a hop to Creston orchestra music that went from 8 to 12.

Another motor party to the Cranbrook fair this week was made up of Mrs. C. O. Rodgers, Mrs. F. H. Jackson and Miss A. Doyle, with Floyd Rodgers handling the wheel of the McLaughlin car.

The RedCross intake at the Tuesday afternoon session is $11.75, made up as follows: Memberships $4; donations from Mrs. Edmondson $5, Mrs. Chalmers $1, S. Fraser $1, and the usual Tuesday collection 75c.

Amongst the Cranbrook visitors at the fair on Saturday we noticed Mr and Mrs. R. Eakin and E. H. McPhee. The former made the trip here by auto covering the eighty miles in just slightly over four hours.

Commencing Tuesday, October 15th, new working hours go into effect at the C.P.R. station here. On and after that date freight and express business can only be transacted from 7.30 to 5 o'clock, with the usual noon hour from 1 to 2. On Saturday the closing hour is 1 o'clock. These hours will positively be adhered to—station employees can appreciate an eight-hour day the same as other people.

TO every home there comes a time when every thought, every hope, every prayer for the future centres on the recovery of one loved one. In that hour of anguish, every means to recovery is sought—the highest medical skill, trained nurses, costly treatment. Does the price matter ?

★ ★ ★ ★

It may be so great as to stagger the imagination—a sum beyond the possible.

But does anyone ask, "Can we do it ?"

Money or no money, they do it. And somehow they pay.

It may mean doing without things they think they need. It may mean privations, sacrifices, hardships. They make unbelievable savings, they achieve the impossible, but they get the money to pay.

★ ★ ★ ★

To-day in this critical period of our nationhood, there is imperative need for MONEY—vast sums of money.

Only one way now remains to obtain it.

The nation must save, every community, every family, every individual Canadian must save.

If anyone says "I cannot save" let him consider to what extent he would pinch himself to relieve the sufferings of a loved one at home; and surely he would not pinch-less for our fighting brothers in France.

Without suffering actual privations, nearly every family in Canada can reduce its standard of living, can practice reasonable thrift, can make cheerful sacrifice to enrich the life-blood of the nation.

You who read this, get out pencil and paper NOW. Set down the items of your living expense. Surely you will find some items there you can do without.

Determine to do without them.

Start TO-DAY. Save your money so that you may be in a position to lend it to your country in its time of need.
