THE CRESTON REVIEW

VOL. XV. CRESTON, B. C., FRIDAY, JULY 6, 1923 No. 23

Canyon City

Now that school has closed Misses Annie Samuelson and Rita Strong have joined the strawberry picking forces at Wynndel for the balance of the season.

Miss Nissie McRobb arrived home on Saturday from Cranbrook, where she has been attending high school this term, and made a most successful past of her first year examinations.

Posters are up for the annual school meeting at the schoolhouse on Saturday evening, July 14th. G. E. VanAckeran is the retiring trustee, and W. Searle's term as auditor has also expired.

Jock McRobb, who has been home from Wardner on the sick list the past few weeks, is around again as well as ever, and left with Charles Pipe for Klockmann, Idaho, where both are now working at the Continental mine.

Sweet clover seven feet high is being cut on the F. Putnam hay field at the corner, and given an average supply of moisture another cutting fully as luxuriant will be harvested.

Hail was in evidence here in the brief storm that passed over the Valley. Some stones as big as cherries were gathered afterward, but the storm was not severe enough to do any damage.

Mr. and Mrs. Leslie McInnes motored up from Wynndel and spent Sunday and Monday on the ranch here.

Now that the School has closed Principal Kolthammer is taking his holidays by working on the planers and box factory at the mill. A change is as good as a rest.

The community picnic on Monday was very largely attended and proved one of the most successful events of the sort ever staged at Canyon. There were games, amusements, sports, etc., in great variety and the only mishap of the day befell Alfred Bond who in competing in the high jump landed on hip on a piece of glass the injury requiring over a dozen stitches to mend. The tug of war between Canyon Heights and New Sweden was won by the former.

Sirdar

Mrs. T. F. Kirkham, who has been a visitor at Sirdar, returned on Sunday.

Mr. and Mrs. A. J. McDonald of Winnipeg, who have been visiting at Sirdar for a couple of weeks, left for their home on Wednesday.

Now that all the work in connection with the fill at the Landing is complete the switch crew commenced day work on Monday.

Miss Schmidt was a weekend visitor at Kitchener returning on Tuesday. We hear she is likely to again be in charge of Sirdar school after summer vacation.

Gus Kay, who has been night operator here for the past month, has gone to Radium where he takes a similar position.

Dominic Pascuzzo had a rush trip to Creston on Saturday in Jack Cameron's car. The unfortunate cut his foot and had to be taken to Dr. Henderson for attention, the wound requiring fourteen stitches.

Mrs. Gus Kay of Cranbrook was a visitor here last week with her husband, prior to his transfer to Radium.

Sid McCabe is expecting to move into his new residence on Shaugnessey Heights by the middle of the month. It is as comfortable a home as can be found in Creston Valley.

E. W. Ryckman of Creston is here at present putting in the hot water heating and bathroom plumbing in the McCabe house and will complete the job this week.

Sid McCabe and crew are barged at Kootenay Landing with pile driver putting in dophins, and will most likely be on the job a full week.

Motor parties at Kuskanook were more numerous than ever last Sunday at Kuskanook and that the climate at that point is really salubrious is indicated in the fact that at Mrs. M. G. Jones' ranch green peas, new potatoes and spring lamb were served for dinner that day and very much enjoyed by her guests.

The North ranch is still a heavy shipper in gooseberries and strawberries, and this week also sees them supplying customers with green peas. By the middle of the month they will probably have cucumbers, too.

Alice Siding

The strawberry crop is going to be bigger than at first estimated. Although the peak of the season is past the daily shipments at the Smith crossing still average 175 crates a day.

The public school closed on Friday for the summer vacation, and Principal Lallamond left the next day for his vacation which will be spent at Nicola.

Frank Simister is back from Butte, Montana, looking after his ranch interests here.

Fred Taylor left on Monday on a business visit to Cranbrook.

The raspberry crop continues to come along fine and with regulation weather these should be on the shipping list by Tuesday.

While the mill at Kitchener is shut down temporarily Jack Smith is making his home on the ranch here.

Goods roads foreman Davies is expecting word any day to shift his operations any day from Erickson to this section, and will probably put the crusher at work on a rock pile this side of the Constable ranch and start puttin down a rolled-in crusher rock highway from that point to connect up with the hard surface road which ends just west of Creston.

Kitchener

Fred Belanger has taken a subcontract from DeWolf & Ham for the construction of one and a half miles of the new Kitchener road east of the Goat River bridge, and will employ about twenty men and several teams.

There was a good turnout of both grownups and children for the school picnic on Friday in the woods adjoining town near the Goat River. School sports of all kinds were in evidence, while some of the elders enjoyed themselves trying to land some of the elusive trout.

Mrs. G. A. Hunt was hostess at a dance in Hunt's Hall on Saturday night, the affair being a sendoff for Miss Helen Hunter, who has been in charge of Kitchener school the past year, and who will attend the University of B.C. next term. A dainty repast was served and the affair was very much enjoyed by all.

A. L. Palmer, fire warden, is at present in charge of a crew at work near Moyie building a new fire trail.

Naugel Pole & Tie Company is shipring on an average at least four teen cars of poles a week at present.

Mrs. Mead and Mrs. Hayes of Creston were visitors here for a couple of days at the end of the week, the former a guest of Mrs. McGenegal, and the latter staying with Mrs. Forrester.

Mr. and Mrs. Forrester are leaving Kitchener this week, the former going into northern B.C., while Mrs. Forrester will visit with her son at Spokane and with a sister in Alberta, going on to join "Cap" as soon as he gets settled. On Thursday afternoon last Mrs. Forrester was guest at a farewell tea at the home of Mrs. McGonegal, the feature of which was the presentation of a well filled purse from both Creston and Kitchener friends, all of whom while sorry at their leaving extend best wishes for future good health and happiness.

A shipment of kiddy cars just opened out at Beattie-Oatways, at $8.50.

BUGGY FOR SALE—McLaughlin top buggy, in good shape, cheap for quick cash sale. Geo. Cartwright, Erickson.

Safe Blowers Get $3.70

Safe blowers badly wrecked the safe in Creston Fruit Growers Union warehouse about two o'clock yesterday morning but were rewarded for their effort by less than four dollars—the cash content of the safe that night. A first-class job was made, the nitroglycering blowing the door off completely, and with so little noise that no one in the neighborhood was awakened. A smaller safe under the sloping desk in the flour and feed office, which contained over $100 was not touched, nor was the cash register. The warehouse at the Imperial Oil Company tank yard was also forcibly entered, no less than four padlocks being removed to effect an entrance. As there was no safe there the burglars after making a search of the books and papers and finding nothing of value scattered them all over the floor before leaving. Both the provincial and R.C.M.P. officers are at work on the case but have very slender clues to sollow.

Lister-Huscroft Picnic

July 2nd wittnessed the most successful picnic ever staged by community effort at this end of Creston Valley, when 300 residents of Lister and Huscroft gathered on the picnic ground at Huscroft for a joint celebration. An excellent time was spent by everyone, and the success of the affair is mainly due to the fact that everyone helped.

There were numerous races for the little ones, with every participant receiving a small prize. Various contests were held for the grownups also.

Greasy pole—John Huscroft.

Girls flat race—Eva Brain, Flossie Evans.

Men's flat race—Walter Long, R. Helme.

Sack race—R. Helme, H. Helme.

Circle relay race—Fred Huscroft's team.

3-legged race—R. Helme and Ruby Lister, Kim Demchuck and Flossie Evans.

Centipede race—Ruby Lister's team.

A bountiful supper was served about 4.30, and there was plenty of ice cream for everybody. Baseball was a feature both afternoon and evening, John and Charles Huscroft being at the head of the two teams. In the afternoon the C. Huscroft had an easy win, but in the evening the decision was entirely reversed. The heavy hitters were John Bird, J. Malthouse, C. Matthews, C. Frampton and Charles Huscroft.

Toward the close of the evening while taking part in the high jump, R. Helme had the misfortune to slip and sustain a fractured wrist. R. J. Long immediately drove him to Creston for medical attention, but the injury was worse than anticipated and Dick had to go on to Nelson for hospital treatment.

Wynndel

Mr. Sheppard and young daughter, Edna, left for Cranbrook on Tuesday to visit Mrs. Sheppard, who is still at the hospital.

Mr. and Mrs. Ken. Dewar left on Tuesday for Bellvue, Alberta.

BIRTH—On June 30th, to Mr. and Mrs. Carl Wigen, a son.

Mrs. and Miss M. Topliss left for Winlaw on Tuesday, but Miss Ella Topliss is remaining for the berry season, and is staying with Mrs. Rosindale.

The Winlaw mill recommenced operations on Wednesday after having shut down for two days for the Dominion Day holiday.

Saturday night will long be remembered in Wynndel, it being the night when Miss Margaret Topliss was guest of honor at a grand social evening held in the old schoolhouse, about 200 people being present. Miss Topliss has, for the past three years, been principal of Wynndel school and has been untiring in her work, and her efforts have been crowned with great success. She has also enjoyed great popularity both with the children and parents, and it is with most sincere regret that the school board has received her resignation. The social was a splendid success, dancing being in vogue most of the evening, the music being by a Creston orchestra comprised of Mrs. Lister, Miss Small and Alex. Lidgate. The presence of Archie Fletcher, Dominion fruit inspector, of Nelson, added greatly to the enjoyment of the evening. The chief feature of the affair was the presentation to Miss Topliss of an address and a case of 72 pieces of Community Plate whose case bore the following inscription: "Presented to M. G. Topliss, June 23rd, 2923, by her Wynndel friends, on the occasion of her marriage." There were 71 subscribers, whose names were appended to the address. The presentation was carried out in quite novel manner. The case was placed on a small wagon very prettily decorated, with mock orange and other flowers and drawn by Marjorie Irving and Kenneth Packman, dressed as bride and groom, preceded by Ruth Joy and followed by Marguerite Joy, who carried boquets with streamers of white ribbon attached to the wagon. The presentation was made by Walter J. Cooper, secretary of the school board. Among the out of town guests was Mrs. G. Topliss of Lebado, mother of Miss Topliss. Great credit is due the canvassers, Mesdames H. J. Irving, T. E. Slingsby, T. Dunseath and H. Rosindale, also to Mrs. Irving and Mrs. Rosindale for the huge success of the social, they having done the lion's share of the work in connection with the same. The piano for the evening was kindly lent by Mrs. E. Wall.

Miss Topliss, principal of Wynndel school, issues the following report for the closing of the term in Division I. Winners of Honor Rolls: Proficiency Elsie Lunt. Perfect attendance and punctuality—Crawford Irving. Deportment—Sylvia Benedetti. Winners of Prizes: Highest average marks in class: Entrance—Dorothy Person. Fifth Reader, Part 2, Howard Slingsby. Fifth Reader, Part 1—Elsie Lunt. Fourth Reader—Gweedow Benedetti. Neatest scribblers—Sylvia Benedetti. Plant making, best progress—Marguerite Joy. Perfect attendance—Else Lunt, Sylvia Benedetti, Crawford Irving. Promoted to Grade 8—Howard Slingsby, Sylvia Benedetti, Adelaide Rosindale, Ervin Davis, Oscar Hagen. Absent from examinations—Barbara Cockle. Promoted to Grade 7 7—Elsie Lunt, Edna Davis, Lena Benedetti, Crawford Irving, Dorothy Payette, Emma Hagen, Fred Hagen, Lloyd Williams, Paul Ofner. Promoted to Grade 6—Gweedow Benedetti, Fred Wilson, Marguerite Joy, Jack Nathorst, Edna Sheppard.

Miss Comfort's closing report for Division II. is as follows: Winners of Honor Rolls—Dolly Moon, Lois Cooper, David Taylor. Prizes for Perfect Attendance—Manuel Irving, Alice Davis, Ruth Joy, Margaret Irving, Kenneth Packman. Prizes for neatness in scribblers—Rudolph Benedetti, Ellen Hagen. Prize for largest collection wild flowers—Olive Sadler. Promoted according to rank: Grade 2—Dolly Moon, Mary Cooper, Maron Moon, Kenneth Packman, Oswald Payette, Ned Batnie, Leslie Sadler. Grade 3, junior—Lois Cooper, Melvin Hagen, Gilbert Payette, Ruth Joy. Grade 3—Alice Davis, Olive Sadler, Andy Hagen. Grade 4—Davia Taylor, Rudolph Beneddetti, Manuel Irving.

Bucking the Barrier

Of the many pictures of the Far North which have been exhibited on the local screen, none come within comparison distance of the newest Dustin Farnum vehicle "Bucking the Barrier," which William Fox has produced and which will shown at the Grand Saturday night.

The tense frigidness of the Klondike gold mining districts is exuded from the shadows on the screen and thrill the onlooker uncannily. The photography, credited to Lucian Andriot, is one of the striking features of the production and in a great measure is responsible for the excellence of the whole.

The virile Farnum portrays the Klondike miner who inherits the large English estate and there finds the woman of his heart, only to lose her and again seek the wastes of the northern drifts. In a temporary blindness during a sleet laden blizzard, the woman returns with a regenerated love and a rehabilitated faith in the man.

Colin Campbell's unique direction is visible in many of the highly dramatic sequences of the film, and to Arline Pretty, leading lady, must go considerable credit.

Lister

Harry Brown has returned for a brief visit after working across the line for a few weeks.

Percy Lye, who has been working as foreman carpenter at Klockmann, Idaho all winter and spring, is home at present looking after his ranch interests.

Charles Frampton is busy with the erection of a new barn for George Jacks to store the hay cut from the old Brown ranch, which George has purchased from the Land Settlement Board.

Charles Huscroft has commenced in the butcher business line, and the demand for meat is so good that he is having a regulation butcher wagon top built on his Ford car, so as to enable him to cover the territory much quicker.

Helme brothers have completed the cut of hay on the Col. Lister and Joseph W. Bell ranches.

Misses Redpath and Hardisty of the Lister school teaching staff, left for their respective homes at Nelson and Victoria on Saturday.

Walter Wright has finished haying the Williams brothers and Conquest ranches.

BIRTH—To Mr. and Mrs. W. H. Hurl, a daughter, on June 29th.

Mr. and Mrs. Jas. Adlard of Creston were Sunday visitors with Mr. and Mrs. R. Stephens.

Word has just been received that A. R. Webb, who left here at the end of the year, is now permanently located at Ocean Falls, where he has charge of the planer room at the mill, supervising a gang of about forty men and thirteen machines. Mrs. Webb and family will join him as soon as he gets the new home ready.

A deputation from Lister and Huscroft met Hon. W. J. Bowser, leader of the Conservative party, on his recent visit here, with the object of buying five acres of land from the Bowser estate at Huscroft, the five acres to be used as a community picnic and athletic ground. Mr. Bowser stated that the land was owned by a company, of which he was a partner, and promised to do his utmost to put the deal through.

The final report of Division I. of Lister school has just been issued by the principal, Miss Redpath as follows: Winners of Rolls of Honor: Proficiency — Frances Malthouse. Punctuality and Regularity—Cora Frampton. Deportment—Doris Millington. The class standings are as shown below. Junior Fourth—Frances Malthouse 705, Cora Frampton 729, Jack Jory 683, Eva Brain 593, Doris Millington out of exams. makes 543. Senior Third—Alex Mitchell 741, Jessie Brain 662, Merle Charleson 622, Annie Yerbury, 585, Albert Mitchell 447. Junior Third—Flossie Evans 562, Freda Lye 537, George Charleson 507, John Malthouse 486, George Chudley 471, Peter McKay 412.

Miss Hardisty's report for Division II, is as follows. Rolls of Honor: Dhportment — Irene Wellspring. Punctuality and Regularity—George Frampton. Proficiency — Gladys Brain. Promoted to Third Reader, second term—Jack Bird, Fred Weston, Charlie Malthouse. Promoted to Third Reader, first term—Gladys Brain, Albert Weston, George Frampton, Fred Yerbury, Agnes Sinclair and Lucy Lye on trial. Promoted to Second Reader — Billy Yerbury, George Mitchell on trial. Promoted to First Reader, second term—May Millington, Wallace Sinclair, Irene Wellspring, Arthur Charleson. Promoted to Phonics—James Lye, Frank Yerbury.

RED ROSE COFFEE

For particular people

All the qualities of superfine coffee—roasted to a turn, *crushed* to small, clean grains—every can perfect coffee.

2C

Heed The Small Things

In these latter days people have become so used to hearing of and talking about millions, especially millions and hundreds, even thousands of millions of national debts, that seldom or ever is the old childhood rhyme of a generation ago heard—"little drops of water, little grains of sand, make the mighty ocean and the beauteous land." And it is a thousand pities that this is so, and it indicates a development of a disregard, even a contempt, for little things; a tendency of the present-day generation which is responsible for much of the extravagance and waste so noticeable in this country in comparison with other lands where for many centuries the people have been taught to live frugally and give heed to the small things.

For months past the newspaper press of the country has been filled with discussions in Parliament, Legislatures, farmers' conventions, and the editorial columns, of the great subject of wheat marketing and the pros and cons of the advisability of a Wheat Board. It is a big subject, involving hundreds of millions of bushels of wheat, hundreds of millions of dollars, tens of thousands of individual farmers, and all the ramifications of the grain trade, grain exchanges, flour milling industry, rail, lake and ocean shipping. Important as this large problem unquestionably is, the regrettable fact is that the attention of the individual, as well as of the public at large, has become so centred upon it in the effort to achieve a big gain that the many small avenues of profit, and ways of stopping numerous small losses, which in the aggregate are after all so very big, are lost sight of and all but ignored.

The attention of the writer was drawn the other day to a statement by a Saskatchewan Government official to the fact that of fifteen carloads of potatoes bought by Saskatchewan wholesale houses in April, only two were shipped from Saskatchewan points, the remainder being imported from other Provinces, while at the same time there was a surplus of potatoes in the hands of Saskatchewan farmers not being marketed. Why? Why did Saskatchewan wholesalers import potatoes for consumption in Saskatchewan, paying heavier freights on the longer haul instead of buying the home grown product? Because so many Saskatchewan growers are careless of the little things and thus lose their own market. Poor grading of potatoes, diseased potatoes, dirt, improperly bagged, some bags containing 100 pounds, some 90 pounds, are among the reasons given why wholesalers import instead of buying at home. Little things in themselves, but which are costing Saskatchewan farmers heavy loss, and imposing on Saskatchewan consumers an unnecessary expense.

In the same issue of the newspaper in which the above statement appeared was a post office report to the effect that over sixteen million incorrectly or insufficiently addressed pieces of mail matter are handled by the post offices of Canada in a year, and no less than 90 per cent. is due to carelessness on the part of the sender. Apart from the loss thus sustained by the sender and the receiver, this carelessness adds enormously to the expense of the postal service, thus operating to keep up postage rates and increase taxation. Yet each individual act of carelessness is but a "little" matter, although the total runs into those millions of which we love to talk about these days.

The neglect to look after the growth of weeds on an individual farm may likewise seem a little matter, but one or two neglected quarter sections may adversely affect a whole township and reduce the yield of wheat per acre throughout the entire area. The loss of a bushel an acre at one dollar per bushel means a loss for the township of over $20,000. After all, is this a little matter? In the aggregate, could not more be saved our farmers by successfully fighting the weed pest than can be made for them by any Wheat Board?

A smoker carelessly throws away a match or a cigarette stub and starts a prairie or forest fire, and hundreds of thousands, sometimes millions of dollars worth of property is destroyed, yet the original act was such a little, commonplace occurrence! A child is allowed to play with matches, and the home is destroyed! A man or boy carelessly handles a gun—he didn't know it was loaded—and a life is taken or a person blinded or maimed for life!

Who dares say these are little things after all? Yet it is just these little things which are causing the loss of millions of dollars worth of valuable forests in Canada every year, and the loss of much more valuable human lives. Canada's fire loss is rated as the heaviest per capita in the whole world. We are paying for it now, and posterity will be called upon to pay an even heavier price. And the pity, the crime of it is that nearly all of this loss is preventable and most of it due to carelessness, to our criminal disregard and contempt for so-called little things.

One On Father

Youngster.—"Father, that man over there can't hear it thunder."

Father.—"Why, is he deaf?"

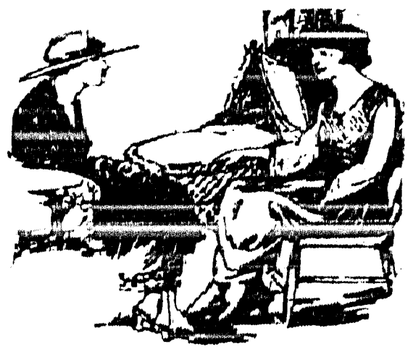
Youngster.—"No, it isn't thundering."—Pearson's Weekly.

Caution—Go Slow!

He.—Why do blushes creep over girls' faces?

She.—Because if they ran they would kick up too much dust?—Parrakeet.

"I Was Terribly Weak After Baby Was Born"



Mrs. H. McClure, Norwood, Ont., writes:

"After my baby was born, I was terribly weak and run down, with pains across my back. I had heard so much of Dr. Chase's Nerve Food that I decided to try it. Three boxes proved enough to make me quite strong and well again. I also used Dr. Chase's Ointment for a rash which broke out on the baby, and the rash disappeared completely in a short time."

50 Cents a box, all dealers, or Edmanson, Bates & Co., Ltd., Toronto

Anglo-American Accord

Relations Between the Two English-Speaking Nations Were Never Better

The Sulgrave Institution of the United States reports that relations are "distinctly" less "friendly." That may or may not be true. So far as fundamental interests go, the relations between the two countries were never better, and for a century they have been better than those of any two other great powers which rub elbows. The best evidence of how fundamentally good they have been is that whenever relations have been tested by really serious disputes the matter has naturally been intrusted to some form of arbitration. Between the two peoples it can truly be said that war has been morally outlawed.

It is therefore not necessary, and probably not useful to sit up nights taking the temperature and pulse of Anglo-American relations. Moods of irritation are bound to come and go, and somehow professional friendship-makers have an unhappy faculty of accentuating as much unfriendliness as they cure. Neither the British nor the American people is given to flattery and unction. They naturally distrust and dislike them. And when they read solemn pronouncements about international relations being deeply affected by moving pictures of American home life they grow very weary at fussy Fanny and meddlesome Matties.—The N.Y. World.

Women's Ailments Caused by Neglect

Proper Treatment Will Quickly Bring Back Robust Health and Good Spirits

Because of their mildness of action no medicine for women can compare with Dr. Hamilton's Pills. The kidneys quickly respond to the remedial action of Dr. Hamilton's Pills and the result is as you would expect—pain in the back and side, shortness of breath and bad color disappear—the functions of the body then operate naturally, congestion and pain are prevented and perfect health returns. Get Dr. Hamilton's Pills today. 25c at all dealers.

One of the strongest characteristics of genius is the power of lighting its own fire.—John Foster.

WOULD NOT BE WITHOUT BABY'S OWN TABLETS

Once a mother has used Baby's Own Tablets for her little ones she would not be without them. They are the ideal home remedy for the baby; being guaranteed to be absolutely free from opiates or other harmful drugs. They are a gentle but thorough laxative and have been proved of the greatest aid in cases of constipation, indigestion, colic, colds and simple fevers. Concerning them Mrs. Ernest Gagne, Beausejour, Que., writes: "I have used Baby's Own Tablets for constipation and colic and have found them so successful that I would not be without them. I would strongly recommend every mother to keep a box in the house." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Consider the lowly postage stamp and learn the secret of success. It sticks to one thing until it gets there.

Worms are encouraged by morbid conditions of the stomach and bowels, and so subsist. Miller's Worm Powders will alter these conditions almost immediately and will sweep the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

What No One Knows

Professor Dunlap, of the Department of Experimental Psychology at Johns Hopkins, has started something. On being asked what the psychology is of the men and women who take part in endurance dancing contests, he asks in return: "Why do fat men take part in races at picnics? Why do people hold pie-eating contests or go in for amateur theatricals or college athletics?" Well, now, it begins to look as if psychology were going to be really interesting.—Providence Journal.

Rogues are always found out in some way. Whatever is a wolf will act as a wolf; that is the most certain of all things.—Fontaine.

THE CANADA STARCH CO. LIMITED

Potential Value Of Immense Salt Deposits Of Northern Alberta

Salt, which is such a vital necessity of our everyday life, has always been a plentiful and cheap commodity in Canada, says the Natural Resources Intelligence Service of the Department of the Interior. In no place, however, has it ever been cheaper and more easily obtained than in the vicinity of Fort Smith, in Northern Canada. Here the Hudson's Bay Company, the various missions and other inhabitants of that district secure their yearly supply simply by gathering it up into sacks and packing it away. The source of this salt is a number of salt springs, which are located along what is known as the Salt River, on the boundary of the new Wood Buffalo Park. This park has but recently been created by the Dominion Government to provide protection to the only remaining herd of wild wood buffalo.

When millions of buffalo roamed freely over practically one-third of this continent extending all the way from Mexico to the Mackenzie River district this locality was a common meeting ground for the buffalo, whence they came to lick up the salt. It was no doubt while following the trail of these majestic animals that the white man first became aware of the existence of these salt springs.

Sir Alexander Mackenzie, on his voyage of exploration through the district in 1789, located and reported upon these salt springs, and Daniel William Harmon, of the Northwest Company, wrote in his journal in 1808, "About sixty miles from this (Chipewyan), down Salve River, there are several places where almost any quantity of excellent, clean, white salt may be taken with as much ease as sand along the seashore. From these places the greater part of the Northwest is supplied with this valuable article."

These springs have always been a source of supply of salt for the white inhabitants of this district and the Lower Mackenzie Valley. The native Indian is not, and has never been, a user of salt to any appreciable extent.

The water from these springs carries an almost saturated solution of pure salt, part of which is precipitated as soon as it comes in contact with the atmosphere, with the result that mounds of salt from three to five feet in depth and in some cases 100 feet in diameter are to be found at the mouths of the springs.

R. G. McConnell, of the Geological Survey, in his report of his explorations in this district in 1887, mentions several salt springs draining into Salt River, near Fort Smith, and says that the salt is remarkably pure.

The deposits vary in size up to 150 tons. From three to five tons are collected annually. The salt has also been tested by both the Department of Mines at Ottawa and the University of Alberta at Edmonton, and has been reported upon as being practically pure. The deposits were recently visited by officials of the Natural Resources Intelligence Service, Department of the Interior, while exploring the present habitat of the wood buffalo. The area in which is found these salt springs is 290 miles north of the present terminus of the Alberta and Great Waterways Railway and is reached by way of the Athabaska and Slave Rivers, lying to the west of the latter river from fifteen to twenty miles in a straight line. Their economic value at present is restricted because of the distance from the outside market and railway transportation. They have, however, a very important potential value in the settlement of this district and particularly in the eventual development of the fish industry of Athabaska and Great Slave Lakes, which contain some of the finest fish on the North American continent.

Northern Alberta, however, has many other salt deposits, the most notable of which, from the standpoint of possible commercial development, are those at McMurray, near the end of steel of the Alberta and Great Waterways Railway. According to test borings made by the Alberta Government in 1919 and 1920, there is from twenty-five to forty feet of rock salt of commercial value at a depth of 631 feet. At least fourteen feet of this deposit occurs in the form of transparent, colorless rock salt. This boring was made to a depth of 685 feet. It is reasonable to expect, from the conditions at the bottom of the boreholes, that there may be even a greater thickness of rock salt below the depth reached.

Omitting the salt used for the gulf and sea fisheries and for chemical industries, Canada in 1921 used 41 pounds of salt per person. A conservative estimate, therefore, of Alberta's salt consumption might place it at 25,000,000 lbs. With almost an equal consumption in each of the adjoining provinces, Saskatchewan and British Columbia, a ready home market is available for any development which may be undertaken of these deposits.

Select Bacon Hogs

Necessity of Producing Type That Suits the English Market

In the Canadian hog industry today the first necessity is a far greater production of the select bacon hog of the type, quality and conformation that suits the English market. This alone is the hog that can be converted into the "Wiltshire side." In the last two years the Dutch producer and packer have obtained a firmer grip on the English bacon trade. They were able to get this trade by everlasting improvement in swine and steady aim in producing an improved bacon hog to yield superior bacon in sufficient numbers to guarantee consumers an unbroken supply of uniform quality. The aim was high quality, smooth, even fleshing and a well-balanced side—a side that would be pleasing to the wholesaler and retailer and would command top, or near top, prices in England. These were the reasons why Denmark supplied Great Britain last year with 39 per cent. of the bacon imported while Canada supplied 11 per cent. at prices that were 25 to 40 shillings a hundredweight under the Danish. This would indicate that ceaseless co-operation is wanted on the part of our producers, breeders, Dominion and provincial livestock departments, and packers to further the definite policy by which our handicap may be overcome.

Canada's Export Of Meat

Big Gain Shown in First Three Months Of Year

Canada exported to Great Britain during the first three months of this year 3,645,100 lbs. of beef against 1,889,200 lbs. in the corresponding months of last year, 27,074,000 lbs. of bacon against 24,639,700 lbs.; and 1,202,000 lbs. of pork against 120,000 lbs. She exported altogether in the first quarter of this year against the same period last year 6,493,500 lbs. of beef against 3,688,600 lbs.; 27,396,800 lbs. of bacon against 24,947,800 lbs.; and 1,644,800 lbs. of pork against 655,200 lbs. There was a drop to 31,800 lbs. of mutton compared with 1,110,100 lbs.

880 Settlers From U.S.

Bringing with them effects valued at $78,852 and monetary wealth totalling $342,832, approximately 880 settlers from the United States came to Canada between Kingsgate and North Portal during April, according to the latest reports.

The Japanese begin building their houses at the top. The roof is first built and elevated on a skeleton frame. Then it affords shelter to the workmen from storms.

Hoppers and Sawflies

These Insects Cause Most Trouble in Stubbled-in Crops

Nearly all of the stubbling-in of crops is done on the open prairie. Grasshoppers and sawflies, our two greatest field crop insect pests, are practically confined to this same region. It is well known that both insects cause the most trouble in stubble-in crops. Grasshoppers would undoubtedly diminish greatly in numbers if no crop were put in on stubble, while sawflies, if not entirely wiped out, would become negligible in numbers. This depends, of course, on the care taken in otherwise preparing the land for crop.

Plowing should be done carefully and more than five inches deep. A skimmer or jointer should be used. If spring plowing it should be packed immediately. Sawfly puparia and grasshopper eggs are now resting in the stubbles and if not disturbed by deep plowing and packing this spring will emerge in countless numbers in June and continue to multiply and re-infest the grain crop.

Where at all practicable farmers should by all means stop the stubbling-in practice if sawflies and grasshoppers are plentiful. Just what will happen if the present plan is followed is hard to foretell although it is almost a certainty the losses from insects (as well as weeds) will continue to rise. The farmer has to choose between these things and the relative immediate merits of stubbling-in and fall or spring plowing.

Scheme to Irrigate Plain of Jordan

Vast Areas of Fertile Soil Can Then Be Cultivated

The Dead Sea soon will come to life and the land which in Joshua's time "flowed with milk and honey" is to come into its own again," according to Albert Hlorth, outlining a scheme for the irrigation of the plain of Jordan between the Lake of Genesareth and the Dead Sea to the members of the Victoria Institute in London.

Wild areas, he said, were covered with fertile soil suitable for cultivation, and irrigation was only needed in those districts. The irrigation scheme proposed was to build canals on both sides of the River Jordan and parallel with it. Throughout their length the canals would be furnished with suitable outlets for the distribution of water over the plains sloping toward the River Jordan. As a source of energy, there is planned a hydro-electric plant on the western shore of the Dead Sea, which would receive its energy from the Mediterranean through a tunnel under Jerusalem.

The scheme, added the lecturer, was far from new—it was probably some 2,000 to 3,000 years old—but its realization had neither been demanded nor had it been feasible until just now.

Commemorate Memory of Priests

To commemorate the memory of the priests of the Oblate Order, who gave so extensively of their services to colonize the country, several stations on the extension of the Canadian Pacific Railway between Kipawa and Les Quinze, Que., will bear the names of members of that missionary organization. In addition to the priests, the name of the first bishop of the area will be perpetuated in a community to be known as Latulippe.

No Evidence That Grasses Cause Spread Of Rust In Wheat

It is well known that stem rust is the cause of very serious losses of wheat. Since many grasses are susceptible to rust it would be of interest to know just what grasses are attacked and what part they play in the spread of rust, and if they help to carry the rust over the winter. Much study has been given to this phase of the rust question in Western Canada, and the statements following are based on these. They refer only to the form of rust attacking wheat and barley. The stem rust of oats will not spread to wheat, states W. P. Fraser, Plant Pathologist.

The grasses that rust readily are wild barley (or skunk grass, as it is sometimes called), western rye grass, which is commonly used for hay in Western Canada, and the wheat grasses, including western couch grass, which has been introduced into Western Canada, is not attacked by the wheat form of stem rust. Another grass that rusts heavily, is Macoun's wild lyme or rye grass. Many other grasses are attacked, but either they are not common or not very susceptible. The grasses which rust heavily help to produce a greater number of red or summer spores, and thus aid in the spread of rust. Where barberries are present, grasses usually grow near them, and the rust appears on the grasses first and then spreads to wheat. This spread can be easily avoided by the destruction of the barberries.

Do the grasses aid in carrying the rust over the winter? It has been shown that the summer or red spores of the rust can live over the winter, under the sheaths of the grasses and in sheltered places. They have been found to remain alive well into the spring, but there is no other evidence that the infection of wheat comes from grasses. It seems probable if they were an important source of early infection that rust would appear first on grasses and spread to wheat, especially as the young grasses appear before wheat, but this is not the case, so far as observation has gone. Grasses such as wild barley that were heavily rusted the previous season, have been watched for several years in many places in the spring and early summer, but all the observations showed that rust appeared first on wheat and spread to grasses. When rust first appears, the wheat generaly shows a slight amount of rust over large areas, which suggests that infection came from spores carried by the wind for some distance rather than from grasses nearby.

Briefly, then, there is no certain evidence that grasses carry the rust over the winter, though it is possible they do in a few cases. There is no evidence to support the view that grasses are mainly responsible for the appearance of rust in spring. In Canada, so far as our information goes, some other source is responsible for the over-wintering and origin of the rust outbreaks each season.

Excavating In Upper Egypt

Famous Airman Made Track Across Desert to Reach Siwa

Mummies claimed to be between 3,000 and 4,000 years old, much older perhaps than Tutankhamen—have been found in Upper Egypt by Major W. T. Blake, the airman who last year attempted to fly around the world.

Major Blake arrived in London recently. "We went 200 miles west of Alexandria," he said, "and then crossed the open desert due south to Siwa, which for a long time was the headquarters of the Semussi.

"Rock tombs abound in the neighborhood of Siwa. We opened several and found mummies in every tomb. They were very badly preserved. In many cases only the bones were left.

"No execavation work has been done in the region owing to the difficulty of reaching Siwa. Hundreds of tombs lie unopened.

"Siwa itself is a collection of mud huts, built on a conical hill, in the midst of a growth of date palms. We had to make our own track acros sthe desert to reach it."

Just a Straight And Simple Story

MR. CLEARY TELLS OF DODD'S KIDNEY PILLS

They Relieved His Kidney Trouble and Other Sufferers Can Learn from His Experience How They Can Find Relief.

Pointe Bleue, Que.—(Special).—Simple and straight to the point is the statement of Mr. Louis Cleary, of this place. He has tried Dodd's Kidney Pills and found them good and he wants everybody to know it. Mr. Cleary says:

"Before taking Dodd's Kidney Pills I was not able to walk. Thanks to your pills I am now perfectly well. I find them very good." One simple statement like this is worth a dozen learned dissertions on Kidney disease. It tells the sufferer from Kidney trouble just what he or she wants to know—that relief can be found in Dodd's Kidney Pills.

For Dodd's Kidney Pills are no experiment. They are purely and simply a Kidney remedy. The reason why they relieve Rheumatism, Lumbago, Diabetes, Bright's Disease, Heart Flutterings, Dropsy, Pain in the Back, and other diseases is that all these are caused by disordered Kidneys

Dodd's Kidney Pills make men and women feel young again because they spread good health all over the body.

If you haven't used Dodd's Kidney Pills for Kidney troubles, you should do so at once. Hear what your neighbors have to say about them.

Exports of Wheat and Flour

Total exports of wheat for the fiscal year ending March were 166,294,000 bushels, or 57,000,000 bushels more than during the preceding period, the value being $56,000,000 greater. Exports of wheat flour during the same period were 7,255,000 barrels, an increase of 2,350,000 over those for the preceding period, the value being $40,922,968, or $9,441,000 greater.

He (who is going abroad to seek his fortune).—"You'll be true to me, won't you, darling."

She.—"Yes, George, if—if you're successful."

Wood is extremely scarce in Eskimo-land; that which drifts in from the sea is eagerly seized.

Mexico has certain localities where rain has never been known to fall.

CRESTON, B.C., FRIDAY, JULY 6

Associated's Policy on Border Line Problems

One of the interesting subjects in which the Executive Committee were called in conference by A. M. Pratt, Manager of the Associated Growers of B.C., was a statement issued by him defining the position of the Associated should conditions confront the co-operative where the net returns to its members on any proposed offerings would likely result in red ink charges instead of profitable returns to its members.

This report was discussed carefully and unanimously endorsed with the request that it be given due publicity. The statement as approved follows:

In anticipating the many different problems that might come up, with the purpose of establishing well defined policies for any occasion that may arise, the question has been wisely raised as to what course the Associated proposed following should conditions exist where there was a strong liklihood of red-ink charges resulting in the handling of any particular product, grade, size or lot.

It is far easier for a Co-Operative Organization to shape its policy as to red-ick possibilities along the lines of least resitance, knowing that nearly every human being naturally considers his own property, whether it be children, fruit or vegetables, as being as good or better than anybody elses. The strong temptation exists to throw caution to the wind, hope for the best, tell the grower a fairy tale and handle the difficulty by receiving and shipping something that in the privacy of his own mind, the local Manager knows has every liklihood of returning red ink. It is also very human to postpone trouble even if we know it grows by the postponement. It takes a strong man to say and do disagreeable things even though the disagreeable thing at the time is far better for the grower-member than the grief that comes later.

There are many growers who will kick harder over what to them seems an arbitary action taken for their own good than they would over red-ink that costs them real money due to their over-confidence in their own product, variety, low grade, or poor size, condition etc., as the case might be.

It is the duty of the Associated Growers of B.C. and its various Locals and shippers to handle the entire product of its members in such a manner as to realize the greatest possible net returns on each pool as to variety. Regardless of grade, variety, condition or market, every pound of fruit produced should be handled, provided chances favor realizing anything for the grower in net returns, with the understanding however, that low grade, off size, or poor condition fruit will not be shipped in any pool where the total returns in that variety pool would be reduced by so doing. For instance it is absolutely necessary to restrict the shipment of culls, even though a slight margin might possibly be realized, if these culls so demoralize the market on the better grades as to lose more than is gained by such low grade shipments. It is not within the province of a growers co-operative organization to attempt to deliberately create an artificial market by destroying or witholding the better grades, sizes, etc., of any variety, unless the market becomes so demoralized as to indicate greater chances for red-ink than credits.

It is, however, the unpleasant duty of any shipper, manager, or staff of the Associated, as far as can be foreseen, to decline to permit any member doing something through the pools of the Associated that will result in a charge instead of a credit as the result of his action. Should the member, however, be willing to assume all financial risks under such an emergency, and satisfy his Local Manager as to financing individually any loss that might result, that member could with the particular case in question have it handled for his own individual account instead of through the pool, provided the quantity involved is sufficient to warrant recording separately.

Under the trying emergencies we are touching upon, it is world-wide practice of many competitors to deliberately build up false hopes and even offer to pay for the product, particularly if the competitor knows that the grower is under contract precluding his accepting his offer. His assurance costs him nothing and he thereby hopes to gain the good-will of the growers in the co-operative institution. Where the offer is bona-fide, it should at once be submitted by the members of the Local who under

Canada Confident of the Future

CANADA is endeavoring to regain her after-the-war stride in the midst of many difficulties, — debt, deflation and depression being some of them.

Quack remedies and academic theories beset her path on every side. Some suggest that our debt worries can best be eased by going further into debt. Others preach blue ruin, decry their own country and indulge in mischievous propaganda generally, while still others look for a new social order or some miraculous sign to indicate a better coming day—all this in apparent forgetfulness of the fact that just as there was no royal road to win the war, there is now no royal road to pay for it or regain our former buoyancy, vigor and confidence.

Some are leaving Canada hoping to escape taxation, only to find there is no escape anywhere. In seeking for easy remedies too many of us overlook the fact that the greatest remedy is honest, hard work faithfully and intelligently performed, accompanied by old-fashioned thrift.

It takes time, it takes patience, it takes grit. But every Canadian knows in his heart that Canada is coming through all right.

Our Experience Proves It

Look back over the path Canada has trod. The French Colonists, cut off from civilization by 3,000 miles of sea, faced a continent—a wilderness—without the aid of even a blazed trail. They had to fight savages, frosts, scurvy, loneliness and starvation.

The United Empire Loyalists subdued an unbroken forest in one generation, growing their first wheat amid the stumps and snags of the new clearing.

The Selkirk settlers came to Manitoba when the prairie was a buffalo pasture, and grew wheat where none had grown before and where those who knew the country best at that time said wheat would never grow. To-day the Canadian prairies grow the finest wheat in the world.

In proportion to population Canada stands to-day among the wealthiest nations in the world, with average savings on deposit per family of $800. Canada's foreign trade per head of population stands amongst the highest of the commercial nations, being $192 per capita in 1922-23, as compared with $135 in 1913-14, the "peak" year before the war.

New Opportunities for Canada

In Canada, although prices in the world markets fell below war level, our farmers reaped last autumn the largest grain crop in Canadian history, and Canada became the world's largest exporter of wheat, thus in large measure making up for lower prices.

Last year, Great Britain, after an agitation extending over thirty years, removed the embargo on Canadian cattle, and a profitable and practically unlimited trade is opening up for Canadian stockers and feeders.

"The 20th Century belongs to Canada"—if Canadians keep faith.

The next article will suggest practical opportunities for profit making on our Canadian farms.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished, but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.50 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisee of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for five years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or in trust, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS.

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING.

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

GRAND THEATRE SATURDAY, JULY 7

IT IS YOURS

Five-sixths of the timbered area in B.C. belongs to the People.

Each year, it is increasing in value as the more accessible timber is cut.

In 1922 there was received from the sale of such timber the sum of $620,000.

This helped to keep your taxes down, and to build up the Province.

Green Timber is British Columbia's assurance of Perpetual Prosperity.

Why Burn It?

Associated's Policy

[Continued from Page 4

the direction of the Central will arrange for the sale, subject of course to the regulaa pro-rata charges of the organization. In this way the grower as well as the Co Operative body carries out the true process of their institution. The competitor becomes a legitimate speculator and a bona fide sale is made with the purchaser assuming such risks as may be involved.

This analysis of policy in such matters is given as interpretation of the Associated's attitude on their Membership Contract as covered in Clause 4, Section (a) reading as follows:

"To dispose of any and all such fruits and vegetables in whatsoever way it shall judge to be the best advantage of the grower."

And Clause 8, reading: "The Co-Operative shall from time to time make rules and regulations regarding harvesting, handling, delivering, standardizing, grading, classifying and packing fruits and vegetables and other matters pertinent hereto, and shall provide inspectors to enforce said rules and regulations, and the grower and Local each agrees to accept the grading and standards established by the Co-Operative. The determination of the Co-Operative as to Grades and standards shall be final."

And (d) as follows: "Fruits or vegetables unfit for shipment must be refused and rejected by the Local, and the Manager of the Local shall be the sole judge of such unfitness. Such rejected fruits or vegetables may not be offered for sale elsewhere by the Grower."

Furthermore any grower may have the privilege of securing special permit from his Local to make gifts to his friends or dispose in a small way of a part of his crop when the Local Manager is convinced that it will be unquestionably consumed locally in his own community. Any abuse of this privilege would naturally restrict further privileges being granted.

The foregoing generally deals with conditions that will be the rare exception rather than the rule this year, and because such conditions are frankly mentioned, it does not indicate that our members should be in the least disheartened. The very fact such possible emergencies will be dealt with firmly, and with the steadfast purpose of doing everything possible to avoid waste, useless expense in packing or selling, and that all members will be required to live up to their contracts in time of stress insures a solid front and united effort that is certain to bring the greatest possible results to all members.

WILDER ANTHONY

Canadian Rights Arranged With Publishers, F. D. Goodchild Co., 266 King St. West, Toronto.

(Continued)

"I didn't have time last night to tell him," Dorothy interposed.

"A number of my boys got into a shooting affray with some herders," Trowbridge explained. "Two of the boys were hurt and one of the herders, I understand, was badly shot."

"Too bad," Wade commented. "Confound it, Lem, what are these fellows thinking of? They must know that our patience won't last always, and when it breaks we're ten to their one."

"Well"—Trowbridge deftly flecked his cigarette stub over the porch railing—"I'm through now, Gordon. I've given my men orders to stand for no more nonsense. I've told them to shoot at the drop of the hat, and I'll stand behind 'em, law or no law. The next time there's trouble, and it's likely to come any hour, I'm going to lead my outfit into a fight that'll be some fight, believe me. And I'm not going to quit until every sheep man in the county is headed East on the run."

"We'll be with you," Wade said heartily. "Tip us the word and we'll be right after you."

Trowbridge nodded.

"I'll take you up on that, Gordon. Not that we need help, you understand, but because it'll be best for us to present a united front in this business. United, we stand; divided, we fall; that's the word, eh?"

Dorothy leaned forward, with an anxious look.

"Oh!" she exclaimed. "I hope neither one of you will get shot."

Trowbridge made her a bow from his chair.

"We'll try not to," he said mockingly, and she was obliged to join in the general laugh.

"If you feel that you ought to do it, of course you will—fight, I mean," she said, helplessly. "But I think it's dreadful, all the same."

"What has Thomas done about me?" Wade asked. "I understand that he's holding quite a bunch of warrants up his sleeve?"

"I don't think he's done anything, and I don't believe he's anxious to," Trowbridge answered. "He's shown some courage, that fellow, in the past, but I always thought he had a yellow streak in him somewhere. I don't think you need fear him much."

"Well, I'm glad to know that, not that I've been very uneasy, but we've had to keep a pretty close lookout here, and it's doubled us up uncomfortably. I want to go out to my timber claim this afternoon, and but for what you've said, I know Bill would insist on going along. Now I can leave him here to attend to his work."

Dorothy was opposed to the idea and she said so, but her opinion was overridden by the two men. Trowbridge declared that there was absolutely nothing to fear from Sheriff Thomas, at least immediately.

"I'm positive of that," he summed up. "If there was any new move on foot, I'd have heard of it."

"That may be," Dorothy argued, "but you know Senator Rexhill is behind him to urge him on."

"That's another man we ought to run out of this neighborhood," Trowbridge declared. "The only trouble is that the old fox has laid so low that we haven't anything definite on him. We can suspect all we like; but when it comes right down to facts, he has us guessing. We can't prove a thing against him, and he's too big game to flush without powder. Well, we'd better be off."

"Stay a while," Wade urged. "It's early yet. I didn't mean to hurry you when I spoke of going out to the claim. I've got plenty of time."

"I haven't told him about the gold," Dorothy whispered, as he helped her into her saddle. "I thought you might want to keep it quiet for the present."

"Sure, we'll tell him," he said, pressing her hand. "We're all on the same side in this business."

He explained his good fortune to Trowbridge, who was delighted and enthusiastic over the prospect of the vein impinging upon his own range.

"Well, that is some luck, eh?" Trowbridge skillfully managed his horse, which was high-spirited enough to still be sportive in spite of the long ride of the morning. "Every cloud's got a silver lining, as the poet says. And another thing, it shows Rexhill's real motive, don't forget that. Oh, we'll get 'em by and by. Sure thing, we will. Well, so long."

"So long, Lem! Call on us when you want us."

"Good-by!" Dorothy waved to him as the horses sped away in the direction of Crawling Water.

Wade watched them out of sight, and then entered the house to tell Santry that he would not be needed on the afternoon trip to the timber claim. The old man growled a little at the idea of Wade going alone, but he finally gave in.

"I'll take my gun and keep my eye peeled," his employer promised. "If I can't stand off trouble until I get home, or you can get to me, I'll lose my bet. You've got your work to do, Bill. If you're going to nurse me all the time, I'll have to get another foreman to run the crew."

He rode away, then, toward the foothills, confident of his ability to look after himself in case of trouble. There was nothing in the peaceful aspect of the range to suggest an enemy, but he kept his rifle ready and his ears and eyes open. Once he paused abruptly when a rabbit jumped out of a clump of quaking-aspens, a hundred yards ahead, only to chuckle at his own over-caution.

The sun, which was still high, was shining as only a Wyoming sun can shine, from out of a blue-vaulted canopy, flecked with fleecy clouds. Swinging from the tops of the sagebrush, or an occasional cottonwood, yellow-breasted meadowlarks were singing sweetly. At intervals a flock of curlews circled above the rider, uttering their sharp, plaintive cries; then they would drop to the ground and run rapidly to and fro on their frail, stilt-like legs, their long ungainly bills darting from side to side in search of food.

Over the plains, from which Wade now turned, hundreds of red and white cattle, their hides as sleek as velvet, were grazing, singly and in scattered groups, as far as the eye could see. Toward its mouth, the valley was spotted with many fenced alfalfa fields, and traversed by irrigation ditches; while to the right, in the direction in which Wade now rode, rose the timber belt. A fresh, soft breeze, fragrant with the odor of clean, damp earth, rustled the leaves of the cottonwoods, some of which were of enormous size, as the horseman pushed his way farther into the shadow of the mountains.

After a careful scrutiny, which satisfied him that the vicinity harbored no enemies, he dismounted, but still actuated by caution, kept the bridle reins looped over his wrist, as he searched for further evidence of gold. Unlike Santry, the ranchman was not trained in the ways of prospecting, and he began to regret that he had not allowed the foreman to accompany him. He followed what he thought were promising signs deeper into the silence of the tall timber, and finally dropped on his knees to make sure of some outcroppings of quartz near the base of a huge bowlder. He was so crouched when a sudden movement of his horse warned him of danger; but he had not time to strike before a crushing blow on the head, delivered from behind, shook him to the very marrow of his spine. With a low groan, he toppled over on to his face, senseless.

"Have you got him?" Moran peered around the side of the bowlder, and smiled exultantly when he saw Wade's still figure. "Throw him across your saddle," he commanded, "and follow me."

CHAPTER XV.

The First Clew

"Let's see!" Trowbridge reined in his horse and meditated, when he and Dorothy had covered several miles of their ride back to Crawling Water. "Jensen was shot around here somewhere, wasn't he?"

"I think it was over there." She pointed with her quirt in the direction of a distant clump of jack-pines. "Why?"

"Suppose we ride over and take a look at the spot." He smiled at her little shudder of repugnance. "We haven't any Sherlock Holmes in this country, and maybe we need one. I'll have a try at it. Come on!"

In response to the pressure of his knees, the trained cow-pony whirled toward the jack-pines, and Dorothy followed, laughing at the idea that so ingenuous a man as Lem Trowbridge might possess the analytical gift of the trained detective.

"You!" she said mockingly, when she had caught up with him. "You're as transparent as glass; not that it isn't nice to be that way, but still you are. Besides, the rain we've had must have washed all tracks away."

"No doubt, but we'll have a look anyhow. It won't do any harm. Seriously, though, the ways of criminals have always interested me. I'd rather read a good detective story than any other sort of yarn."

"I shouldn't think that you had any gift that way."

"That's got nothing to do with it," he laughed. "It's always like that. Haven't you noticed how nearly every man think's he missed his calling; that if he'd only gone in for something else he'd have been a rattling genius at it? Just to show you! I've got a hand over at the ranch, a fellow named Barry, who can tie down a steer in pretty close to the record. He's a born cowman, if I ever saw one, but do you suppose he think's that's his line?"

"Doesn't he?" she asked politely. One of the secrets of her popularity lay in her willingness to feed a story along with deft little interjections of interest.

"He does not. Poetry! Shakespeare! That's his 'forty!' At night he gets out a book and reads Hamlet to the rest of the boys. Think's that if he'd ever hit Broadway with a show, he'd set the town on fire."

When Dorothy laughed heartily, as she now did, the sound of it was worth going miles to hear. There are all shades of temperament and character in laughter, which is the one thing of which we are least self-conscious; hers revealed not only a sense of humor, rare in her sex, but a blithe, happy nature, which made allies at once of those upon whose ears her merriment fell. Trowbridge's eyes sparkled with his appreciation of it.

"Well, maybe he would," she said, finally.

"Maybe I'll make good along with Sherlock Holmes." He winked at her as he slipped from his horse's back, on the edge of a rocky knoll, fronting the jack-pines. "This is the place, I reckon." His quick eyes had caught a dark stain on a flat rock, which the rain and failed to cleanse entirely of the dead herders' blood.

When Dorothy saw it, too, her mirth subsided. To her mind, the thought of death was most horrible, and especially so in the case of a murderous death, such as had befallen the sheep men. Not only was the thing forrible in itself, but still more so in its suggestion of the dangers which threatened her friends.

"Do hurry!" she begged. "There can't be anything here."

"Just a minute or two." Struck by the note of appeal in her voice, so unlike its lilt of the moment before, he added: "Ride on if you want to."

"No," she shuddered. "I'll wait, but please be quick."

It was well for her companion that she did wait, or at least that she was with him for, when he had inspected the immediate vicinity of the shooting, he stepped backward from the top of the knoll into a little, brush-filled hollow, in which lay a rattlesnake. Deeply interested in his search, he did not hear the warning rattle, and Dorothy might not have noticed it either had not her pony raised its head, with a start and a snort. Glancing over her shoulder, she saw the snake and called out sharply.

"Look out, behind you, Lem!"

There are men, calling themselves conjurors, who perform prodigies of agility with coins, playing-cards, and other articles of legerdemain, but they are not so quick as was Trowbridge in springing sidewise from the menacing snake. In still quicker movement, the heavy Colt at his side leaped from its holster. The next second the rattle had ceased forever, for the snake's head had been neatly cut from its body.

MRS. BUDGE SO WEAK COULD HARDLY STAND

Tells How Lydia E. Pinkham's Vegetable Compound Restored Her Health

River Desert, Que.—"I used to have a severe pain in my side. I would be unable to walk fast and could not stand for any length of time to do my ironing or washing, but I would have to lie down to get relief from the pain. I had this for about two years, then a friend told me to try Lydia E. Pinkham's Vegetable Compound as she had had good results. I certainly got good results from it, too, as the last time I had a sore side was last May and I have not had it since. I am also glad of having good nursing for my baby, and I think it is your medicine that helped me in this way."—Mrs. L. V. BUDGE, River Desert, Quebec.

If you are suffering from the tortures of displacement, irregularities, backache, headaches, nervousness, or a pain in the side, you should lose no time in trying Lydia E. Pinkham's Vegetable Compound.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent you free upon request. Write for it to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario. This book contains valuable information that every woman should know.

WORLD HAPPENINGS BRIEFLY TOLD

The Paris Chamber of Deputies voted in favor of daylight saving.

A monument to the memory of 1,500 Winnipegers who lost their lives in the Great War, was unveiled recently.

Radio telephone connection with moving railroad trains has met with a successful tryout in Germany.

Five companies of the Royal Canadian Naval Volunteer Reserve have been formed and others are almost up to strength.

Representative Burton, of Ohio, who favored reciprocity with Canada in 1911, declared he still believed in it, but saw no prospect of bringing it about.

Col. H. A. Mullins, veteran livestock dealer, of Winnipeg, declared his belief that tonnage is available for all the store cattle that Canada wants to send to Great Britain this year.

SUFFERED SO FROM HEART AND NERVES LIFE WAS A BURDEN

Mr. A. H. Lee, Beamsville, Ont., writes:—"I am delighted to let you know what I have to say regarding the good Milburn's Heart and Nerve Pills did me.

A short time ago I suffered with heart and nerve trouble, and was so bad I could not sleep, only about two hours each night. My heart was so bad I had spells when driving on the road and would faint away, and neighbors would carry me in from my wagon. I also took these spells in the night and during my daily work on the farm. My nerves were so bad I would jump out of bed, and was then compelled to walk the floor before I could settle down again, but after taking a few boxes of

MILBURN'S HEART AND NERVE PILLS

I can honestly say I am a relieved man. I now feel in the best of health, in fact, the best I've been in for three years, and can do any class of work with pleasure where before life was a burden to me."

Shackleton Memorial

An influential committee has been formed to establish a fund to finance the erection of a memorial to the explorer, Sir Ernest Shackleton, who died in the south seas while on a tour of exploration about a year ago.

MRS. HENRY McDONALD

This Article Will Interest Every Mother!

Toronto, Ont.—"Dr. Pierce's Favorite Prescription is the greatest help in motherhood of any medicine I have ever known. I am the mother of six children and I suffered greatly each time except the last one, when I was advised to take Dr. Pierce's Favorite Prescription, which I did, and I got along just fine; felt well and strong and had practically no suffering, and had a grand baby, that has always been very healthy. I regained my strength very quickly afterward. I was so thankful to have been advised of this medicine, it gave me such wonderful help."—Mrs. Henry McDonald, 3 Wilmot Avenue.

Health is of vital importance to every mother. Do not neglect the most valuable asset you have. Get this Prescription of Dr. Pierce's from your neighborhood druggist, in tablets or liquid, or send 10 cents for trial package to Dr. Pierce's Laboratory in Bridgeburg, Ont.

Where Does Responsibility Rest

More Care Should Be Taken In Issuing Motor Licenses

In Philadelphia an automobile got on the sidewalk and killed a young woman. When the driver was arrested it was found that he was a paralytic, utterly helpless as to one leg and partially so as to one arm. It was further disclosed that he had been thus crippled from childhood. Yet the state of Pennsylvania had issued him a license to drive an automobile. On his trial his infirmities were pleaded in his behalf, but he was sentenced to imprisonment for from four to six years. "The case raises the question," properly comments the New York Herald, "as to whether the responsibility for this fatality was exclusively that of the partially-crippled driver or whether some share of it should not fall upon those who created the conditions which permitted the issuance of a license to one in his condition."—Buffalo Express.

Pain In the Muscles, Stiffness In Joints,

— Quickly Subdued By Nerviline

Those who have tested out numerous liniments will agree that where something is needed to dislodge a deep-seated, more or less chronic condition there is nothing to compare with Nerviline. It's because Nerviline penetrates so deeply, because it has about five times the strength of the ordinary oily preparation, it has come to be known as **King over all Pain.** For Rheumatic conditions, muscular and joint stiffness, Nerviline works wonders. A trial proves this. Get a 35-cent bottle from your dealer to-day.

Household Hints

Valuable Recipes For the Busy Housewife

Date Salad

1 cup dates, 1 cup diced celery.

3 tablespoons Sun-Maid seeded raisins, 1-3 cup cheese (grated Amer.).

3 tablespoons walnut meats.

½ cup boiled dressing.

Mix together the cheese and the chopped nut meats and raisins. Stuff the dates with this and allow to stand for several hours. Slice the dates, dice a cupful of celery and add all to the dressing, mixing thoroughly. Serve in nests of lettuce. An equal quantity of sweet or sour cream may be combined with the dressing if desired.

Fruit Tapioca

½ cup pearl tapioca, ¼ cup almonds.

2½ cups cold water, ¾ teaspoon salt.

1 inch stick of cinnamon, ¼ cup sugar.

½ cup currant jelly, ¼ cup citron.

¼ cup sherry wine or fruit juice.

¼ cup Sun-Maid seeded raisins.

Soak tapioca in cold water over night or for several hours. Cook in same water in double boiler with salt and cinnamon until transparent. Remove from range and add currant jelly, sherry wine or fruit juice, almonds (blanched and shredded), raisins (cut in pieces), and citron (cut in thin slices). Sweeten to taste. Turn into a serving dish, cool slightly, and serve with thin cream.

A man thinks he is entitled to some sort of twilight zone between prickly heat and frozen feet."—Detroit News.

Minard's Liniment for Distemper

CANADIAN PACIFIC EXCURSIONS TO PACIFIC COAST

A change of scene and air will help you to retain your good health, make you more fit mentally, give you a knowledge of the beauty and vastness of your country, which possibly you never realized before, and add to the joy of living. A trip to the Pacific Coast through the magnificent Canadian Pacific Rockies, with a stop-over at Banff, Lake Louise and Glazier, where beautiful Resort Hotels are maintained, or a visit to the delightful moderate priced Bungalow Camps, will give you this change. Summer Excursion Tickets are on sale daily, May 15th to September 30th, to Vancouver, Victoria and other Pacific Coast points, which will allow stop-over and bear return limit until October 31st.

Spend this Summer's Vacation in a trip to the Pacific Coast, and when you go travel Canadian Pacific.

FACE BROKE OUT WITH PIMPLES

Hard, Large and Red. Cuticura Healed.

"My face broke out with pimples that were hard, large and red. They festered and scaled over, and itched and burned causing me to scratch them. I tried several different remedies but they did not help any. I read an advertisement for Cuticura Soap and Ointment and purchased some, and after using them about a month I was completely healed." (Signed) Miss Catherine I. Carter, Aberdeen Hospital, New Glasgow, Nova Scotia.

Cuticura Soap, Ointment and Talcum promote and maintain skin purity, skin comfort and skin health often when all else fails.

Sample Each Free by Mail. Address: "Lymans, Limited, 344 St. Paul St. W., Montreal." Sold everywhere. Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Soap shaves without mug.

New Electric Conductor

Can Use Column of Water Instead of Wires to Transmit Power

It is reported that a European inventor uses a column of water instead of an electric wire to transmit electric power. The current passes through the water with the same facility whether the water is in motion or stationary, and can be delivered at any desired frequency, or in more than one phase. Used for drilling granite in Cornwall, England, the special tools designed for the water wave impulses deliver 80 per cent. of the generated power, whereas the compressed air tools deliver only 10 per cent.

PAIN AFTER EATING

Proof That the Stomach is Weak and Needs Toning Up

Generally speaking, a person in good health can digest most foods. If not, and there is pain after eating, the stomach has lost tone and is too weak to do its work. In that case your stomach needs strengthening and the way to do this is to build up your blood with Dr. Williams' Pink Pills.

There cannot be good digestion without a sufficient supply of good red blood, and there is nothing better than Dr. Williams' Pink Pills to renew and enrich the blood. That is why they have proved so successful in thousands of cases of indigestion. Mr. D. J. Shaw, Selkirk, P.E.I., has proved the value of Dr. Williams' Pink Pills in a severe case of indigestion and relates his experience for the benefit of other sufferers. He says:—"I suffered from indigestion for a number of years. My case was so bad that words fail to describe it. My appetite was gone, constipation was present, and my nerves were all on edge. I could not sleep well at night, and the world was a dark spot to me. I tried a number of remedies, but without any benefit. Then Dr. Williams' Pink Pills were recommended, but without much faith, after so many failures, I decided to try them. After taking three boxes I noticed a change for the better. Then I got three boxes more, and found I had a genuine remedy. I continued the treatment, took moderate exercise, could take good plain food without suffering as formerly, and proved that these pills make good blood, and that this good blood will restore the stomach and nerves. Anyone suffering from stomach or nerve troubles will make no mistake in giving Dr. Williams' Pink Pills a fair trial."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

On the paper money issued by Lobejun, a small town in Saxony, appears the drawing of a man displaying his empty pockets.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

Quaint Institution In London

Church for Deaf and Dumb Soon to be Closed

One of London's quaintest institutions, the deaf and dumb church of St. Saviour's, is soon to disappear. So far as known, it is the only church in the world devoted exclusively to worship by the deaf, dumb and the blind. The increased real estate value of the site upon which this unique institution is built has made it necessary to to close its doors, but it is hoped to re-establish it in a more modest part of London.

The foundation for the modest church was laid by the late King Edward in 1870, and it became familiar to the hundreds of thousands of Britons who pass along one of the busiest and noisiest thoroughfares of the capital. Yet it is doubtful if a tithe of those passers-by even thought to step inside to witness one of the deaf and dumb services.

Great Britain is one of the most advanced nations in the care and education of its deaf and dumb. Recognizing the truth of Dr. Samuel Johnson's statement that of all physical deprivation, the deaf and dumb is "the most desperate of human calamities," the state now provides for the whole of the educational needs of this afflicted class of the population up to the age of 16 and gives them assistance in after years.

Murdered!

Put right out of business, a whole family not of good honest folks, but of Corns—sore troublesome corns that sting and bite. Putnam's Corn Extractor is the only painless sure relief for corns, it never fails, 25c everywhere.

British Columbia Raises Goats

There are approximately 5,000 goats in British Columbia which have increased to these proportions from an original herd of 200 head imported from the United States in 1917, whilst a goat breeders' association in the province formed in the same year with a membership of 176, now has more than 400 adherents.

Useful in Camp.—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Eclectric Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pains in the muscles, and should a cut, or contusion, or sprain be sustained, nothing could be better as a dressing or lotion.

Only a Youngster Yet

A London, England, man, aged 93, still an active membsr of a manufacturing firm, wrote to a paper there objecting to their referring to him as an old man.

Nation-wide Fame—There is scarcely a corner of this great Dominion where the merits of Dr. Thomas's Eclectric Oil have not been tried and proved. It is one of the world's most efficient remedies for sore throat, lame back and many other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can also be taken internally.

Egyptians Live On Vegetables

The food of the lower classes in Egypt is almost exclusively vegetable.

Minard's Liniment for Falling Out of Hair

A few weeks spent in the average boarding house will convince almost any man that he ought to have a home of his own.

HOW'S THIS?

HALL'S CATARRH MEDICINE will do what we claim for it—rid your system of Catarrh or Deafness caused by catarrh. We do not recommend it for any other disease.

HALL'S CATARRH MEDICINE is a liquid, taken internally, and acts through the blood upon the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions.

All Druggists. Circulars free.
F. J. Cheney & Co., Toledo, Ohio.

Cost Of Living

The average cost of the weekly budget for a family of five in Canadian cities was $10.64 at the beginning of April, as compared with $10.79 at the beginning of March. The budget cost is for twenty-nine staple foods at average prices in some sixty cities. The same foods in April a year ago cost $10.26, compared with $7.41 in April, 1914, and $16.92 in June, 1920.

When a man insists on proving the truthfulness of his remarks always let him do it.

NOT SICK ONCE IN FOUR YEARS NOW

Mrs. Smith Declares Health Has Been Perfect Since Tanlac Ended Stomach Trouble

"For ten years hardly a day passed that I didn't suffer from stomach trouble, but I took Tanlac four years ago and haven't had a sick day since," is the remarkable statement made recently by Mrs. Thamar Smith, 85 McGee St., Toronto, Ont.

"The little I managed to eat simply tortured me with pains in the pit of my stomach, and gas pressed around my heart causing it to skip beats until I thought it would stop altogether. I was as nervous as a witch, and lost so much sleep that I was dark and swollen under my eyes. I was so weak and run down I could hardly walk a block or do my housework, and was almost in despair.

"Tanlac certainly was a God-send in restoring me to such perfect health, and I think it's the greatest medicine ever made. Nearly everybody else on McGee Street seems to have used the treatment, and are praising it too."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Radio Replaces Signal Gun

Trinity House authorities, who have charge of lightships and lighthouses around the English coast, have decided to fit all important lightships with wireless apparatus, thus displacing the signal gun which has been used for so many years to call the lifeboat or warn ships of their danger.

Mrs. H. S. McCreath and children left on Saturday for a two months' visit with friends at the old home in Kincardine, and other Ontario points.

The July meeting of Creston Women's Institute on Friday next will be an evening session at which musical members will be a prominent feature.

Messrs. C. W. Allan and W. R. Long, and Misses Long and Barrigan were motor visitors to Cranbrook for the Bonners Ferry-Cranbrook baseball game on Dominion Day.

The Methodist Sunday School bible class had their annual picnic on Dominion Day, when there was a large turnout of members for a most enjoyable outing at Arrow Creek.

Miss L. L. Cleveland of Toronto, Ontario, is a visitor with her sister, Mrs. W. H. Gobbitt. Miss Cleveland is a graduate nurse and will spend quite an extended holiday in Creston.

Strawberry shipments continue heavy from all points in the Valley and with showery weather prevailing it now seems certain that the early season's estimate of a crop of 22,000 crates will be realized.

Misses Wade, Vickers and Creighton of the public school teaching staff got away on Saturday for the summer vacation, which they are spending at the coast, with the latter attending summer school at Victoria.

The annual school meeting posters are up. The session will open at 7 p. m., at the schoolhouse, Saturday, July 14th. S. A. Speers three-year term as trustee has expired, and a successor will have to be elected.

Rrsidents are reminded that the half-yearly term at Creston public library commences at July 1st, and those wishing to join can do so for the balance of the year for $1.20. Last week a fresh supply of 150 new books were placed on the shelves.

President Bennett of the board of trade, along with C. F. Hayes and Major Mallandaine, were Creston's representatives at the official opening of the Banff-Windermere road at Kootenay Crossing, forty miles north of Invermere, on Saturday. They made the trip by motor, returning on Monday. The opening was very largely attended, almost 500 motor cars being parked for the ceremony, with almost 200 of them coming from Alberta points.

Good roads foreman Albert Davies' garden is leading the procession for early vegetable production this year, green peas and new potatoes both being on the dinner menu for June 26th. He got about five pounds of fine spuds from one root that morning from potatoes planted on April 26th on his property next the English Church, and which has had little attention since the fire. In the matter of green peas this beats Kuskanook by at least four days.

An important ranch property deal was closed at the end of the week when Mrs. John Hobden exchanged her twenty-six acre improved property adjoining town with O. O. Rodgers for the 160 acre Fraser farm near Porthill, Mrs. Hobden and family taking possession of their new home on Wednesday, with the intention of going extensively into cattle and dairying for which the Fraser farm is admirably adapted. Mrs. Hobden and family moved to their new home on Monday.

7.30 p.m.	3 p.m.

Are You Loyal to B.C.?

A big majority vote was cast when nearly 4,000 growers of fruits and vegetables decided by written ballot and a five-year tight contract that British Columbia growers have their own co-operative organization that would represent the industry.

Nearly 90% of the B.C. Growers are already members. Recognized loyalty to B.C., in this common problem will certainly and rapidly increase this membership towards the ideal 100%, as any grower who thoroughly acquaints himself with its purposes will recognize in this movement his duty to himself and his fellow growers.

It is a duty and a privilege.

Be a part of us. Talk it over.
