

THE CRESTON REVIEW

Vol. XVII.

CRESTON, B. C., FRIDAY, SEPTEMBER 4, 1925

No. 29

Alice Siding

Mrs. A. W. Mason was an Alice Siding visitor a few days last week, the guest of Mrs. Webster.

Guy Constable left on Saturday for Victoria, where he is looking after affairs for the Creston Reclamation Syndicate.

C. Olsen of Cardston, Alberta, a former resident on Goat River bottom, was an Alice Siding visitor last week, the guest of his brother-in-law, R. Beazer.

Miss Ethel West returned to Medicine Hat at the first of the week, after a two weeks' visit with her parents here.

Haying continues in full swing, and with another week of the present fine weather the local cutters will be about through for the season.

Mr. and Mrs. Beazer and family got away on Saturday on a motor trip to visit old friends at Cardston and other southern Alberta points.

A piano has just been installed in the John R. Miller home, Mr. Miller purchasing the instrument from Rev. J. A. James.

Robert Moore of Dover, Idaho, is a visitor here this week with his mother, Mrs. H. H. Taylor.

A wedding of interest to Alice Siding was solemnized at the manse at Creston on the 26th of August when Rev. J. A. James united Miss Dorothy Barber in marriage with Walter Fawcett of Trail. The couple left the same day on a wedding trip to points east and are to make their home at Trail.

Sirdar

Jerry Cooper of Wynndel has been added to the C.P.R. staff here, and is employed at the roundhouse at present.

There will be the usual 8 and 10.30 a.m. Church of England services at the schoolhouse on Sunday.

The haymakers are working over time on the flats this month and are getting this year's cutting in to stack in prime condition so far.

Mrs. T. Rogers was a between trains visitor at Creston on Saturday. Messrs. Loasby, Brawn and Jim Pasuzzo were business visitors at the metropolis on Monday.

Mrs. Lombardo, sr., with her son, Dominic, are in Spokane this week, where the former is being treated for eye trouble, from which she has been suffering for some time past.

Mr. Brown of the B & B staff is here with a helper making some repairs at the wharf at Kootenay Landing. During the gale a couple of weeks ago

the Nasookin damaged the dock when blown from the moorings.

Mr. and Mrs. C. M. Loasby are now occupying the former Jack Cameron residence, which they have purchased and intend having still further modernized.

The surveyors working on this end of the Grey Creek Boswell road are expected back this week to go over the available grades and make selection of the route that will be used for the road when built.

Mr. and Mrs. H. A. French and party of Porthill, Idaho, were among the Sunday visitors through here en route to Kuskanook. Messrs. Paulson and Joyce of Kitchener also Sundayed at this well known watering place.

School is due to reopen on Tuesday at 9 a.m., with Mr. Hunter of Vancouver in charge. Now the busy season is over it is hoped to be able to shortly get a quorum to elect the 1925-26 trustee board.

The McCabe B & B crew is at present at work at Jerome, Sid, who met with another mishap at Kimberley about two weeks ago, is none the worse for the bang in the head he got and which had him unconscious for some time and necessitated his coming home for a few days to recuperate.

Messrs. Pochin and Hickey of Canyon City had about the best day's fishing of the season at Kuskanook on Sunday, taking home with them some 18 very fine steelhead, as well as some red fish. A photo of the anglers standing at either end of the catch would make good advertising for the fishing in Kootenay Lake.

Canyon City

Geo. Hewitt left at the end of the week for Calgary, Alta., where he has a couple of months carpenter work in sight.

Miss Alice Wood of Fernie was a visitor here last week with her parents, Mr. and Mrs. J. W. Wood.

Mrs. Ted Strong left this week on a visit with her sister, Mrs. Hetherington, at Nanton, Alberta.

Misses Nissie McRobb, Rita Strong and Ruth Clayton are leaving this week to put in the apple packing season at Willow Point and Sunshine Bay on Kootenay Lake.

The tinkle of the wedding bells can be heard again, and next issue we will go Strong on our report of the happy event.

Miss Dorothy Niblow has been guest of Miss Rose Cherrington at Creston the latter part of the week.

The Epworth League's novelty lawn social with cafeteria supper at the Knott home on Saturday evening was quite an all round success. After the outdoor features adjournment was taken to the house where quite an extensive literary and musical programme was given. The affair will net the League treasury at least \$20.

F. Harback of Cowley, Alberta, the Presbyterian student who will have charge of the United Church work here, as well as at Kitchener and Lister, is expected to take charge not later than Sunday 13th, and will give Canyon an evening service. He will most likely reside here.

The hard surface road crew is operating in this section this week and is putting on some needed gravel on the road from the Browell corner down toward the high level bridge.

Mrs. VanAckeran, sr., who has been here since early in 1923 on a visit with her son, G. E., has booked her return passage and will be sailing on the 10th from Montreal for Antwerp, Belgium. It is a business visit, and she plans to return early next year.

Mrs. E. Langston and children have left for Kimberley, where Mr. Langston has just erected a new residence, and where they will reside in future. Mr. and Mrs. Halstead, who are on the Messenger place, will be leaving shortly to spend the winter at St. James, Manitoba, but will be back again in 1926.

Erickson

Mrs. Harrison of Yahk spent a few days at her Erickson ranch last week.

The Church of England Sunday school, which has been holidaying the past two months, will resume operations on Sunday at 2 p.m.

Erickson school is due to reopen on Tuesday, 8th inst. The painting and other improvements are complete, and everything in shape for the opening.

Mr. and Mrs. T. Kirsch of Dover, Idaho, were guests at the weekend of the latter's parents, Mr. and Mrs. Botterill, Mrs. Kirsch, sr., accompanying them.

The C.P.R. have a steam ditcher and crew at work at present at the big excavation at the canyon.

Jim Dodds, who had his leg broken in a baseball game early in June, has not had the recovery from the mishap that was expected, and on Wednesday he went in to Cranbrook for treatment at the hospital.

Mr. and Mrs. and Miss Ruth Klingensmith left last week on a motor trip to Vancouver, where they will spend a short holiday with relatives and friends.

Mrs. F. Clark got back on Thursday last from Cranbrook, to which town she went with her daughter, Neola, who is a patient at St. Eugene hospital.

G. P. Smith, who has spent about five weeks at his ranch here, left at the end of last week on his return to Wetaskiwin, Alberta. He has leased the place for 1926 to Mr. McCallum.

R. M. Telford was a weekend visitor at Cranbrook in which city Mrs. Telford is a patient at St. Eugene hospital, and is coming along nicely after her recent operation.

R. J. Long was a visitor at Vernon a few days at the end of last week on Creston Fruit Exchange business.

A petition is being circulated for signature in this district requesting the Liquor Control Board to take another vote on the beer question at Erickson. 40 per cent. of the voters must sign before the petition will be considered.

Local and Personal

Misses Marion and Ruth Swanson of Burnaby are Creston visitors this week, guests of Miss Lillian Cherrington. The former was on the Burnaby school staff last year but is to attend B.C. University this term, whilst Miss Ruth has just completed her first year in training as nurse at Vancouver General Hospital.

The fellows who believe a beer parlor would make business good in Creston will be interested in the following from the Fernie Free Press: Fernie business men say that business is rather quiet, but it is a poor day at the local liquor store when they don't take in \$500. And then some people wonder why business men generally favor prohibition.

Wm. Ramsay of Nelson, district engineer, was here on an inspection trip yesterday, and in company with foreman Davies had a look over the roads and bridges as far as Goatfell. He also was in conference Wednesday afternoon with the Idaho engineers regarding the point at which the U.S. north and south highway will hit the boundary. The new road will be completed through to B.C. next season.

Rev. J. A. James, who has been in charge of Creston Presbyterian Church for the past five years, preached his farewell sermon on Sunday night and with Mrs. James left on Wednesday for a couple of days visit with Kitchener friends. He takes the service at Cranbrook on Sunday and then leaves for Ontario, where he becomes pastor of the rural churches of Kinlough and South Kinloss, near Lucknow, Bruce county.

Frank Harback, who has been in charge of the United Church work at Cowley, Alberta, this season, is expected to arrive this week to take charge of the services at Kitchener,

Lister and Canyon, and for a starter will give Kitchener morning service and Canyon evening worship. Mr. Harback has been attending the Robertson Presbyterian College at Edmonton, Alberta, but will take the work locally for at least the next twelve months.

The members of Creston and District Women's Institute were out almost in full strength at an afternoon at the home of Mrs. Jas. Cook on Friday at which Mrs. H. Lyne was the guest of honor, the time passing pleasantly at whilst at which Mrs. Mallandaine was the high scorer. Before refreshments the president, Mrs. M. J. Boyd, presented Mrs. Lyne with an umbrella, suitably engraved, as a small token of appreciation of several years of unselfish effort on behalf of the institute. Mr. and Mrs. Lyne are leaving in a couple of weeks to make their future home in Victoria.

There was a fine attendance of members and visitors at the September communication of Creston Masonic Lodge on Wednesday night, the brethren being favored with an official visit from Hon. A. M. Manson, grand master. A first degree was conferred by the officers who were complimented by the grand master on their efficiency in degree work as well as on the general conduct of the lodge. At the close of the session adjournment was taken to the Fraser cafe where supper was served and which was followed by the usual round of toasts and rounded out one of the most successful evenings in recent Masonic history. Accompanying the grand master is Mayor Sutherland of Kelowna, the deputy grand master.

Creston had a brief visit on Monday from U.S. Senator W. Borah of Idaho, who went through by motor to Kuskanook, where he caught the boat for Nelson. Travelling with him were C. W. King, editor of the Bonners Ferry Herald, and A. J. Kent, a resident of the same town. The senator was making a first hand survey of the Kootenay Flats area on both sides of the line, and at Nelson he will inspect the power company's location at Bonnington and the proposed outlet for the flood waters at Grohman Creek. Washington is making an international issue of the proposal of the power company to put in storage works that will raise the level of Kootenay Lake and most likely adversely affect the acreage of flats land already reclaimed near Bonners Ferry.

Lister

At the meeting of the trustees the tender of Johnny Malthouse for the position of janitor was accepted, and he has the room in readiness for the opening on Tuesday morning.

Mrs. Hare, sr., of Creston is a visitor here this week, with Mrs. Knott, at the G. Jacks ranch.

Joe W. Bell paid a short visit here at the weekend, coming in on Saturday and going back the following afternoon.

Harry Beeson and A. Philip, who have been here for a couple of weeks, are leaving on Thursday on the return to work at Klockmann.

Assistant forester Jas. Jory is having things a little less strenuous since the first of the month. All the fires in the district have been trenched in and there is now little danger from them spreading in spite of the prolonged dry spell.

Mr. and Mrs. Geo. Jacks left on Wednesday for Nelson, and will spend a few days visiting with Mr. and Mrs. Hare on their return.

Honey extracting is pretty well over at Lister, and Mrs. Andy Sinclair, who is handling about forty hives for themselves and Joe W. Bell, states that the average will be at least 100 pounds to the hive.

Rev. J. Hardman had his final service, for the present at any rate, on Sunday. Commencing with the 13th, Mr. Harback, the new pastor, will have charge of the fortnightly worship, which is likely to be in the afternoon from now on.

Kitchener

Mrs. B. Johnson has her sister, Mrs. Moran of Spokane, on a visit with her at present.

Quite a few Creston and Erickson were here on Saturday night for the dance in Hunt's Hall, the music for which was by the Idlehour Orchestra of Calgary.

United Church service every Sunday morning will be inaugurated at Kitchener not later than the 13th. The minister is Mr. Harback, a Presbyterian student, who has been in charge at Cowley, Alberta.

Contractor Hendren has the new work well along at the bridge at Meadow Creek, and will complete operations by the middle of the month. The new cribbing that has been put in should afford ample protection against any future floods.

Miss Alice Molander leaves this week to take a commercial course at the Nelson business college.

Miss Helen Heise, who has been visiting with Clara Hunt, has returned to her home in Cranbrook.

Mrs. Spence of Cranbrook, is spending a few days this week with Mr. Spence at the Sash & Door Company plant.

Mrs. B. H. Bentley of Creston was here for the weekend with Mrs. Hunt, on her way to Kimberley, where they intend to make their home.

Miss McGonagal, who has been visiting with Mr. and Mrs. E. McGonagal, returned to her home in Calgary, Alta.

Messrs. Strudwicke, Hunt, Devlin and "Scotty" Miller were at Creston on Wednesday night for the big Masonic Lodge session and dinner, which was attended by the grand master, Hon. A. M. Manson. They made the trip with B. Johnson in his McLaughlin.

"Billy" Wilson of Great Falls, Montana, was a business visitor here the latter part of August when he made an official examination of the Hill claims on Iron Mountain, and is submitting his report to W. R. Wilson of Fernie, who is endeavoring to interest a British syndicate in the starting of a steel plant in East Kootenay.

Reports coming in from Arrow Creek state that fishing is over for the season on that stream. On Wednesday two well known Creston anglers, Mr. Joyce and Jas. Cook, along with the former's father, spent the half holiday on the likely fishing holes and by quick change in a wide assortment of baits such as flies, grasshoppers, beef, bugs and minnows, and the always handy Ajax block and tackle for the bigger one a great catch was had. Judging by the low swing of the Overland on the return trip every member of the Joyce Cook circle of friends at Creston must have had a free fish dinner on Friday. Mr. Joyce, sr., who has achieved considerable fame as a fisherman along the Saugeen, states it was the busiest afternoon he ever experienced at bait passing.

Jacksons

A Romance of the Spanish Main CAPTAIN BLOOD by RAFAEL SABATINI

Copyrighted, 1922, by Rafael Sabatini
"CAPTAIN BLOOD," a Vitaphone picture with J. Warren Kerrigan
in the title role, is an adaptation of this thrilling novel.

CHAPTER XXV.—Continued.

Within an hour, the water-casks at least replenished and stowed aboard, the Arabella and the Elizabeth put to sea upon that angry chase.

"What now, Peter?" cried the young Jeremy Pitt. "Lord, man what is there here to fret you. Surely 'tisn't the thought of Rivalro!"

"No," said Blood quickly. "And for once he was communicative. It may well be that he must vent the thing that oppressed him or be driven mad by it. And Pitt, after all, was his friend and loved him, and so a proper man for confidences. "But if she knew! If she knew! Oh God! I had thought to have done with piracy; thought to have done with it for ever. Yet here have I been committed by this scoundrel to the worst piracy that ever I was guilty of. Think of Cartagena! Think of the hell those devils will be making of it now! And I must have that on my soul!"

Setting a course for Hispaniola, since they judged that thither must Rivalro go to refit before attempting to cross to France, the Arabella and the Elizabeth ploughed briskly northward with a moderately favourable wind for two days and nights without ever catching a glimpse of their quarry. The third dawn brought with it a haze which circumscribed their range of vision to something between two and three miles, and deepened their growing vexation and their apprehension that M. de Rivalro might escape them altogether.

They had Jamaica on their larboard beam some thirty miles to westward, and, indeed, away to the northwest, faintly visible as a bank of clouds, appeared the great ridge of the Blue Mountains whose peaks were thrust into the clear upper air above the low-lying haze. The wind was westerly, and it bore to their ears a booming sound which in less experienced ears might have passed for the breaking of surf upon a lee shore.

"Guns!" said Pitt, who stood with Blood upon the quarter-deck. Blood nodded, listening.

"Ten miles away, perhaps fifteen—somewhere off Port Royal, I should judge," Pitt added. "Then he looked at his captain. "Does it concern us?" he asked.

"Guns off Port Royal . . . that should argue Colonel Bishop at work. I think it may concern us. Anyway, we'll stand in to investigate."

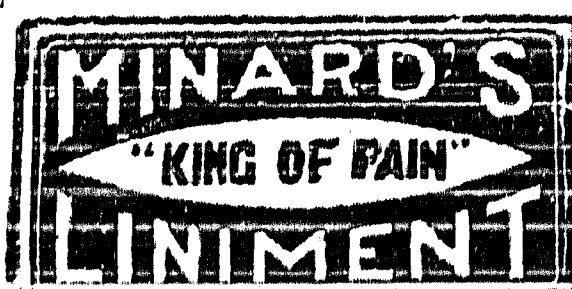

Close-hauled they tacked aweather, guided by the sound of combat, for an hour, perhaps. Then, as, telescope to his eye, Blood raked the haze, the guns abruptly ceased. They held to their course, nevertheless, with all hands on deck, eagerly, anxiously scanning the sea ahead. And presently an object loomed into view, which soon defined itself as a great ship on fire. As the Arabella with the Elizabeth following closely raced nearer on their northwesterly tack, the outlines of the blazing vessel grew clearer.

"An English ship!" he cried.

He scanned the seas for the conqueror in the battle of which this grim evidence was added to that of the sounds they had heard, and then at last, as they drew closer to the doomed vessel they made out the shadowy outlines of three tall ships, some three or four miles away, standing in toward Port Royal. Pitt, who through the telescope was examining the receding squadron, observed things apparent only to the eye of the trained mariner, and made the incredible announcement that the largest of these three vessels was Rivalro's Victory.

FEET ACHE?

Rub them well with Minard's and know what real foot comfort means.

W. N. P. 1523

boats, laden to capacity with survivors.

CHAPTER XXVI.

The Service of King William

One of the boats bumped alongside the Arabella, and up the entrance ladder came first a slight, spruce little gentleman in a coat of mulberry satin laced with gold, whose wizened, yellow, rather peevish face was framed in a heavy black periwig. His modish and costly apparel had nowise suffered by the adventure through which he had passed, and he carried himself with the easy assurance of a man of rank. He was closely followed by one who in every particular, save that of age, was the physical opposite, corpulent in a brawny, vigorous way, with a full, round, weather-beaten face whose mouth was humorous and whose eyes were blue and twinkling.

As the little man stepped from the ladder into the waist, whither Captain Blood had gone to receive him, his sharp, ferrety, dark eyes swept the uncouth ranks of the assembled crew of the Arabella.

"And where the devil may I be now?" he demanded irritably. "Are you English, or what the devil are you?"

"Myself, I have the honour to be Irish, sir. My name is Blood, and this is my ship the Arabella, all very much at your service."

"Damme! What's to laugh at, you porpoise," spluttered mulberry-coat.

"Blood!" shrieked the little man. "O 'Sblood! A pirate!" He swung to the Colossus who followed him—"A damned pirate, van der Kuylen. Rend my vitals, but we're come from Seylla to Charybdis."

"So?" said the other gutturally, and again, "So." Then the humour of it took him, and he yielded to it.

"Damme! What's to laugh at, you porpoise?" spluttered mulberry-coat. "A fine tale this'll make at home! Admiral van der Kuylen first loses his fleet in the night, then has his flagship fired under him by a French squadron, and ends all by being captured by a pirate. I'm glad you find it matter for laughter. Since for my sins I happen to be with you, I'm damned if I do."

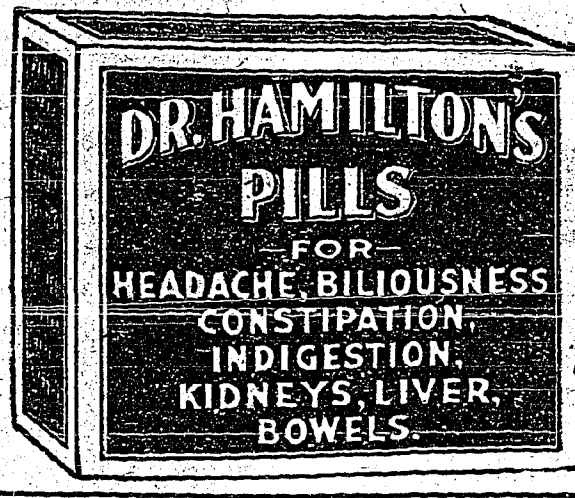

"There's a misapprehension, if I may make so bold as to point it out," put in Blood quietly. "You are not captured, gentlemen; you are rescued. When you realize it, perhaps it will occur to you to acknowledge the hospitality I am offering you. It may be poor, but it is the best at my disposal."

"Damme. Do you permit yourself to be frontal?" he disapproved him. "I am Lord Willoughby, King William's Governor-General of the West Indies, and this is Admiral van der Kuylen, commander of His Majesty's West Indian fleet, at present misthanded somewhere in this damned Caribbean Sea."

"King William," quoth Blood. "And who may be King William, and of what may he be King?"

"I am alluding to His Majesty King William III. William of Orange—who, with Queen Mary, has been ruling England for two months and more."

"D'ye mean, sir, that they've roused themselves at home, and kicked out that scoundrel James and his gang of ruffians?"

"Slife! Hadn't you heard? Where the devil have you been at all?"

Briefly, he gave an account. After that, with renewed assurances that aboard his ship they should be honourably treated, Captain Blood led the Governor-General and the Admiral to his cabin, what time the work of rescue went on.

"Go home, if you will," said his lordship when comfortable. Here is a great chance for you, since you declare yourself sick of piracy. Should you choose to serve King William out here during his war, your knowledge of the West Indies should render you a very valuable servant to His Majesty's Government, which you would not find ungrateful. You should consider it. Damme, sir, I repeat: it is a great chance you are given."

Pitt came in to report that the work of rescue was at an end, and the men picked up—some forty-five in all—safe aboard the two buccaneer ships. He asked for orders. Blood rose.

"I am negligent of your lordship's concerns in my consideration of my own. You'll be wishing me to land you at Port Royal."

"At Port Royal?" The little man squirmed wrathfully on his seat. Wrathfully and at length he informed Blood that they had put into Port Royal last evening to find its Deputy-Governor absent. "He had gone on some wildgoose chase to Tortuga after buccaneers, taking the whole of the fleet with him."

"Is Rivalro aware of this?" Blood cried sharply.

It was the Dutch Admiral who answered him. "Would he go dere if he were not? M. de Rivalro he take some of our men prisoners. Berhabs dey dell him. Berhabs he make dem tell. Is a great obbortunity."

(To be continued)

Honors Memory Of Paul Kruger

Prince Places Wreath On Monument Of Britain's One-time Foe

The Prince of Wales placed a wreath on the monument of Paul Kruger—"Oom Paul"—who was credited with being the soul of the policy that brought on the Boer War of 1899-1902. He was president of the provisional government after the war against Britain in 1881, and in 1883 was elected president of the Transvaal Republic. He held that office as long as the republic stood.

The Prince paid his tribute to the empire's former enemy without any previous announcement or ceremony. He was accompanied by only two members of his staff.

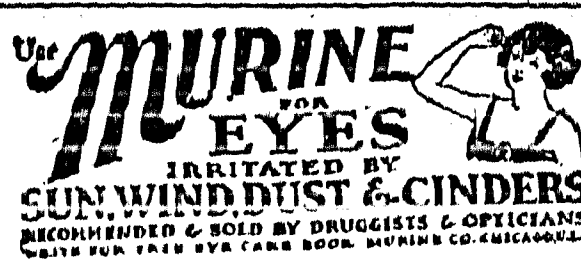

The climax to the Prince's visit to the Transvaal came when Pretoria was superbly illuminated and a symmetrical procession was held in his honor. He was entertained at a dinner given by the administrator to 250 representatives from different parts of the Transvaal.

The Prince, in the course of a speech, expressed the hope of some day being able to visit South Africa again. "Gentlemen," he declared, "it is no polite platitude when I say I will do my best to come back."

Religious Tolerance In Germany

President Von Hindenburg has promised to foster the spirit of religious tolerance in Germany, and conscientiously to respect and protect all creeds. His declaration was made after he had received representatives of the inter-denominational church alliance, composed of German Evangelical, Catholic and Jewish delegations who called to congratulate him upon his assumption of the German presidency.

But for the need of horrible examples many a man's usefulness would never be properly listed.

She Said He Was "Incorrigible"

By Marjorie Bradford, Social Service Council of Canada

A woman brought her son into one of our Canadian juvenile courts a short time ago because, as she termed it, the boy was incorrigible. He would not stay in school and was getting his parents into continual difficulty.

When the boy gave his side of the story to the judge he said that school always gave him a headache.

The boy, on being examined by the court doctor, was discovered to be totally blind in one eye with the sight of the other already seriously impaired. And this poor ignorant mother thought he was "incorrigible." The boy was immediately given treatment which saved and even improved the sight of his eye. If the condition had been known in time the sight of his other eye might also have been saved.

Of 24,000,000 school children in the United States, 6,000,000 are retarded in their studies. And of those 6,000,000 retarded children, 2,000,000 are retarded because of defective eyesight. It is estimated that defective eyesight among school children costs American taxpayers \$130,000,000 a year.

Similar figures for Canada are not available but they are estimated to be relatively the same. That is more than 8 per cent. of our Canadian school children are suffering under a mental handicap because of defective eyesight. I wonder how many of these children have been adjudged stupid or "incorrigible?"

Admiral Sturdee's White Feather

Naval Hero Equipped As Slacker By Ultra-Patriotic Woman

Admiral Sir Doveton Sturdee, who died in England this spring, was the admiral who chased and defeated the squadron of Admiral Von Spee off the Falkland Islands, the second year of the war. When, after that battle, he returned to England early in 1916, he followed the custom of every other officer of his time and went straight into muff. At that time ultra-patriotic young ladies were infesting the streets of London and other English cities, thrusting white feathers into the hands of able-bodied men who seemed to be shirking their responsibilities in not volunteering for service. As Sturdee was walking down Whitehall on his way to the admiralty, he was held up by one of these young women, who gravely presented him with a white feather, which she deftly thrust into his coat lapel, and exhorted him to turn into the adjoining recruiting office at Scotland Yard without delay. Thus equipped as a poltroon, the hero of the biggest naval victory since Trafalgar marched down Whitehall to talk over the details of the affair with his colleagues of the admiralty.—Argonaut.

The Village Blacksmith

Effort Being Made In Britain To Prevent Passing Of This Picturesque Figure

Strenuous efforts are being made in agricultural districts of England to save the picturesque old-fashioned village blacksmith from passing into oblivion. The smith of England today is not "tolling and rejoycing" to draw undue attention to himself, but is "sorrowing" a great deal more than in the days when Longfellow idealized him—all because of the advent of the automobile and the motor tractor.

In their desire to "save" the village blacksmith the Hertfordshire county council members announced recently particulars of a plan designed to keep alive the decaying industry which has been so hard hit by the modern organization of the big manufacturers and their agents who supply standardized parts of farm implements and machinery on lines of mass formation. The ministry of agriculture too has become interested in the scheme to prevent the passing of the blacksmith and has agreed to co-operate in the movement.

Natives In Congo Superstitious

The natives in the Congo region are firm believers in demons and witches. The number of people annually put to death owing to this horrible superstition is unknown, for the witch-doctors pursue their dreadful trade in secret, but it is believed to be very large, for no mercy is shown to anyone convicted of witchcraft.

Pig iron prices are off a dollar, may be due to the supply of bride's biscuits coming in June.

Submerged Village Re-appears

Roofs Of Swiss Houses Visible After 300 Years

After 300 years, a submerged Swiss village in the upper valley of the Saas has re-appeared, owing to the low level of the waters of Lake Autrona. The original catastrophe was caused by a landslide from the Monte Pozzoli, which destroyed 42 houses of the village of Antrona Piana, together with the inhabitants and their cattle. As a result of the landslide a lake was then formed, but owing to the waters now receding the roofs of the old dwellings are again visible.

STOMACH TROUBLE DUE TO THIN BLOOD

It Usually Disappears When the Blood is Made Rich and Red

Thin blood is one of the most common causes of stomach trouble. It affects the digestion very quickly. The glands that furnish the digestive fluids are diminished in their activity, the stomach muscles are weakened and there is a loss of nerve force. In this state of health nothing will more quickly restore the appetite, digestion and normal nutrition than good, rich, red blood.

Dr. Williams' Pink Pills act directly on the blood, making it rich and red, and this enriched blood strengthens weak nerves, stimulates tired muscles, and awakens to normal activity the glands that supply the digestive fluids. This is shown by an improved appetite, and soon the effect of these blood enriching pills is evident throughout the whole system. You find that what you eat does not distress you, and that you are vigorous instead of irritable and listless. If your appetite is fickle, if you have any of the distressing pains and symptoms of indigestion, you should at once take Dr. Williams' Pink Pills and profit by the better condition in which they will put your blood.

These pills are sold by all dealers in medicine, or you can get them by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

War and the Auto

In 1924, 19,000 human beings were killed and 450,000 were injured by the automobile in these United States.

This casualty toll of 469,000 Americans levied by the automobile in the year 1924 is numerically 50 per cent. greater than was the total casualty toll for the American armies and navies in the nineteen months while the United States was at war with Germany.—Louisville Courier-Journal.

We didn't know a couple were married until we saw them yawning.

PAINS IN BACK AND SIDES

Ended by Taking Lydia E. Pinkham's Vegetable Compound

Fuslier, Sask.—"For two or three days every so often I would have such pains in my back and sides that I could not do anything—could not even lie quietly in bed, and my head ached, too. I was this way about three years, but was worse about I was married. I was on a farm with not a house nearer than five miles and there was not a person to advise me, as my folks live in Manitoba. My sister-in-law told me about Lydia E. Pinkham's Vegetable Compound and told me to try it. I took her advice and have been thankful for it ever since. After taking the medicine for three months I can say it has helped me a lot and I am doing fine. I am glad to recommend the Vegetable Compound to others and you may publish my testimonial."—Mrs. HELEN BALANOFF, Fuslier, Saskatchewan.

Often some slight trouble will cause a general upset of the system. Such symptoms as nervousness, painful times, irregularity, backache and headache indicate some form of female weakness.

Women so bothered should give Lydia E. Pinkham's Vegetable Compound a trial. This dependable medicine has helped thousands of women and it is reasonable to expect that it will help you. Try it today. Your druggist sells this medicine.

C. F. HAYES, Editor and Owner.

CRESTON, B.C., FRIDAY, SEPT. 4

WHAT OTHER PAPERS SAY

15 Draining 16,000 Acres

With the filing of a petition in district court here this week for the organization of a drainage district in the Myrtle creek section, five miles west of Bonners Ferry, the area of Kootenai Valley land reclaimed and proposed for reclamation totals approximately 16,000 acres. Since the successful diking and drainage of District No. 1 here three years ago, four new districts have been organized without opposition, while prior to reclamation work in District No. 1 there

was much skepticism and opposition throughout the valley.

The petitioners in the new district are Z. J. Foust, 320 acres; J. H. Washburn, 120; J. G. Jones, 320; August C. Hess, 160. In addition to these, other land owners have signified their willingness to consent to a reclamation program. Among those are the trustees of the Reeder estate, 1120 acres; J. T. Lawless, 170; J. H. Harrington, 160, and George Irving, 114. There are also 80 acres of state school land in the district, bringing the total acreage to 2564. The total cost is estimated at \$125,000. The hearing on the petition has been set for September 14, at 11 o'clock a.m.

Actual diking operations are now under way in districts 3 and 4. The contract in both districts was awarded to Morrison & Knudson of Boise. The steam shovel for District No. 3 was unloaded at the S. I. spur near Deep creek last week and was moved across Deep creek and Myrtle creek to the lower end of the dike right of way, where it is now in operation. The right-of-way is practically all cleared, according to Harvey Slack, superintendent of construction. The steam shovel work is in charge of H. W. Puckett.

District No. 3 has an area of approximately 1200 acres. District No. 4, known as the Copeland Bend district, is the largest of the Kootenai Valley projects, with a total of 6400 acres. District No. 5 was reclaimed this spring just in time to keep the high water from the land. One thousand acres are now under cultivation in this district. A. Klockmann, of the Idaho Continental mine, is practically sole owner of this district.

District No. 2, containing about 700 acres, has been organized for some time, but the contract for the work has not been let. It is now planned to start work in time to have it completed this fall.

Another district in which a majority of the land owners have sought reclamation for years is the old No. 5 district, which several years ago went through the preliminary work only to find out that the Indian lands, of which there are several hundred acres in the district, could not be taxed. Plans are now being taken up with the Indian department to make provisions for the inclusion of this land in the drainage program or as an alternative, permitting the sale of the lands by the Indians.

It is argued by those in favor of draining the district that there is no possible way to realize a profit from the lands at present, owing to the spring floods of the Kootenai river, which inundate the entire valley, excepting the diked districts. A small revenue is obtained from cutting wild hay and rushes, whereas if the land was diked, big crops of timothy, grain and other produce could be grown, yielding a large profit per acre. There are fully 4000 acres in this district.

The cost of reclamation in the various districts averages about \$45 per acre. Counting what has been completed, together with work now under way and proposed for the next year, upwards of \$1,000,000 will have been spent for Kootenai Valley reclamation by the end of the present year.—Bonner's Ferry Herald.

Courier: Here in the city of Cranbrook are grown sweet peas so transcendently beautiful, so positively true to type and so radiant in coloring as to defy competition.

Cranbrook council is very much worked up over the fact that there is a leakage of 16 per cent. between the amount of electrical energy the city buys from the Bull River power company and the amount of "juice" that the city is able to deliver to users in the city.

Letter Stationery

... the Printed Sort

FREQUENTLY EVERY GROWER has correspondence to attend to where he wishes he had business (printed) stationery to use.

His lack of it is probably due to the fact that he thinks it expensive.

We can supply you with Printed Letter Paper at a price just a little higher than you pay for pads at the store.

We can supply them padded with a plain duplicate sheet interleaved in case you wish to make a copy of your letters.

Printed Envelopes are comparatively as inexpensive, and their use assures you of the letter reaching the party or being returned to you.

No trouble at all to show you samples, and quote you such moderate prices.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, jumpers and travellers, up to ten head.

NEWS OF KOOTENAYS

Fernie limits its autoists to 20 miles an hour within the city limits.

Green cooking apples netted Penticton growers as high as \$1.45 a box this year.

For the first half of the year Trail's share of the B.C. liquor profits totalled \$4275.

This year the Penticton apricot crop was about 700 boxes, as compared with 5500 in 1924.

Kaslo has another resident dentist, Dr. Allen of Victoria, who opened for business last week.

Up till August 20th the Courier claims 1480 tourists registered at the tourist camp in Cranbrook.

At Rossland the cemetery is in such bad shape that some of the headstones are practically hidden by the growth of brush and weeds.

WATER NOTICE DIVERSION AND USE

Take notice that G. P. Horsley, whose address is Nakusp, will apply for a license to take and use 75 cubic feet per second of water out of Goat River which flows westerly and drains into Kootenay River at Creston, B.C. The water will be diverted from the stream at a point 100 feet downstream from the C.P.R. bridge on Block 20, of Lot 812 and will be used for power purposes upon the area described as the undertaking of the Company, within a radius of twenty-five miles of the power site. This notice was posted on the ground on the 11th day of August, 1925. A copy of this notice and an application pursuant thereto and to the "Water Act" will be filed in the office of the Water Recorder at Nelson. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

GEO. P. HORSLEY, Applicant.
Date of first publication of this notice is August 14, 1925

Kimberley is now claiming a population of 3000.

The Press thinks Kimberley should have an express delivery service and a postoffice building. 01

Contractor Rawlings hopes to have the new Ainsworth-Queens Bay road completed by Christmas.

At Fernie there is such a rush to get street paving done that the city is working two shifts of men at present.

The country around Vernon supplied at least 350 men for the prairie harvest up till the end of August.

Hon. J. H. King, minister of public works, has definitely announced that he will run in East Kootenay.

The hospital at Nakusp has received a cheque for \$181—the first six months' share of the 1925 liquor profits.

Customers of the co-operative store at Nakusp were last week given a free roast of pork—so long as a 307 pound carcass lasted.

Due to a lack of irrigation water the Herald claims the apple crop at Penticton has slumped 10,000 boxes since the first of August.

The Herald says that 75 per cent. of the autoists passing through Bonners Ferry are Canadians either going or coming from visits at coast points.

The Elk Lumber Company has presented a boiler worth at least \$500 to the swimming pool in Fernie, to be used for heating the pool water.

The new 600 h.p. Deisel engine for Revelstoke's electric light plant will cost just over \$40,000.00 installed, and will be delivering the "juice" before Christmas.

At Grand Forks police court fines have been so generous to date that enough revenue has already been received to pay all expenses of the police force work this year.

The Herald estimates that when the 16,000 acres of dyked lands are fully reclaimed the work will represent an expenditure in the Bonners Ferry district of at least \$1,00,000.00.

To handle the grain crops from the reclaimed lands at Bonners Ferry a milling plant consisting of a roller mill, corn cracker and cleaning and separating mill has just been erected.

Local and Personal

The list of awards for the 1925 Creston fall fair are now available and can be had at the secretary's office at the Imperial Bank, the Bank of Commerce Jackson's store, or the Review.

Police court fines for August totalled \$50, of which amount \$25 came from a drunk, \$20 on a conviction for chicken poisoning, and \$5 from a gentleman pleading guilty to driving to the common danger.

The five members of the session of the United Church will be officially installed at the evening service on Sunday, September 20th. Rev. Dr. Ferguson, former Presbyterian superintendent of missions, will officiate. On the afternoon of that day he will also conduct the opening services at the new United Church at Wynndel.

J. G. Smith arrived from Nelson on Saturday for his annual outing at haymaking on the flats with his son, Fred. J. G. hopes that with about 10,000 acres of the flats drained, he will have the pleasure of harvesting a few oldtime crops of timothy, similar to those he took off in Hastings county, Ontario, before migrating west at least a quarter century ago.

Motor license fees continue to hold up the receipts at Creston provincial police office. Even this late in the year \$150 was gathered in from this source during August, for which month the total intake was \$322. The hunting and fishing licenses accounted for \$110, of which \$80 was for two big game and fishing licenses to two Californians who were going north to hunt.

School will open for the fall term at 9 a.m., Tuesday, September 8th. There will be three new faces on the staff, Miss Shannon in the high school, and Misses Jerome and Hardy who replace Misses Vickers and Laxton. Miss Jerome will be here only till the new year, when Miss Vickers is due back from her visit to England, and will assume the work of vice-principal.

Canada's Tied-Up Resources

(Third Article)

In all articles appearing in this column, it is sought to be optimistic and constructive, rather than pessimistic and destructive, because only so can any service of real value to the community be rendered. Having in the previous two articles on "Canada's Tied-Up Resources" outlined the situation which confronts every citizen and lover of this Dominion—and an extremely critical situation it unquestionably is—some attention should be devoted to finding a solution, if, indeed, one can be found. But found it must be if Canada is not to continue in the doldrums for many years to come, cheated of the position among the nations of the world which Nature intended (through the variety and abundance of its gifts) this country to occupy.

The first essential to a solution is an awakening of the people of Canada to a full realization of their country's present position in respect to its resources. A second, and equally important essential, is frankness and courage on the part of public men of all parties in facing and grappling with the problem confronting Canada.

It is necessary that present shibboleths, pet policies, and partizan nostrums be completely scrapped and relegated to a forever buried past. Instead of continuing to waste time debating in just what manner the stable can best be locked now that the horse is stolen, each interested citizen in Canada should unite with other interested citizens in an endeavor to, if possible, recover the stolen horse.

The battle for and against embargoes, or export duties, on pulp wood and pulp, on waterpowers and electric energy, on nickel and other ores, is being waged with vigor. It is largely beside the mark. At best embargoes and export duties are but half measures and likely to result in reprisals. They do not go to the basic root of the whole trouble, namely, that an enormous amount of Canada's natural resources have passed from Canadian ownership and control into foreign control, and that control is being exercised to the detriment of Canada, checking development, employment, growth of population and industry, and making full prosperity impossible.

The last thing to be advocated in this column is repudiation of obligations, whether national or entered into through private contract. Consequently no such thing is expressed or implied. It must be recognized, however, that when the natural resources of any country—the property of all the people—pass into private ownership and control, there also passes to the new owners an obligation to the people and country who were the original owners. That obligation, expressed in written contract or not, is that the resources in question shall be developed for use of the people as a whole, thereby providing for their wants and advancing the welfare of the country at large. If this obligation is not carried out honestly and to the full ability of the new owners, then the original owners have right and justice on their side in demanding either the discharge of such obligation or a return of the property.

With such huge issues at stake as the success of our railways, the prosperity of all our industries, employment for our people, increased population and wealth necessary to carry our national burdens and pay off our war debt, with, in fact, the whole future of Canada as an economic and national unit hanging in the balance, the people of this Dominion dare not allow its national and natural resources to remain indefinitely tied up awaiting the convenience of foreign interests for their development for use.

The Dominion Parliament and the Legislatures of those Provinces which have control of their natural resources would be acting well within their undoubted rights if they gave notice to all holders of undeveloped natural resources that development must be begun and prosecuted with vigor, not a mere surface scratching but real development consistent with the nature and extent of the resources held, and that, failing such development within a stated time, title to all such resources would revert to the people as represented by the Crown.

Such action could in no sense be construed as repudiation; it would rather be a proper enforcement of the rights of Canada and the Canadian people, and a very necessary recognition of Canadian manhood and independence and emancipation from a galling servitude which, if continued, sounds the death-knell of the Dominion.

The largest smokable cigar ever made was presented to a New York politician. It was twenty-eight inches in length and weighed more than five pounds.

Female moths have the strange power of being able to "call" their mates from miles around. Scientists have never yet obtained a satisfactory explanation of this mystery.

Fletcher's CASTORIA

MOTHERS—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Charles H. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

Britain Makes Another Payment

Washington Receives Over Sixty-Eight Million For Semi-Annual Interest

The U. S. treasury received payments from Great Britain, Finland, Hungary, Lithuania and Poland on account of their funded indebtedness to the United States.

The British payment, a semi-annual remittance on interest, amounted to \$68,310,000. It was paid in 2% per cent. treasury certificates with a \$75.94 payment in cash necessary to adjust the interest accrued.

The total payment from Finland, \$133,650, was made in cash. Hungary funded half of its third semi-annual payment of interest, and paid the other half, \$14,905.69 in cash. Lithuania also funded part of its first annual installment on principal and interest, and turned over to the treasury \$75,225 in cash, of which \$45,225 was for interest and \$30,000 for principal. This payment also was in cash.

The first payment on account of the Polish Government amounted to \$500,000, but approximately \$136,000 was turned over to the treasury last January, and the remainder was remitted on June 15 in cash.

2 Years' Backache Subdued by "Nerviline"

"Backache was the bane of my life, and for two years I was so lame as to be unfit for work," writes E. S. Sloan, from Georgetown. "While in Smith Bros' Drug Store, I heard of Nerviline being a wonderful pain-destroyer, so I decided to try Nerviline. Thanks to Nerviline, my two-years' backache was rubbed away, and to-day I am perfectly well."

All those who suffer from weak, aching backs, those whose muscles are stiff, whose joints are swollen, let them try Nerviline—the liniment that never fails. 35c at all dealers.

Grain Inspections At Calgary

Since the beginning of the present shipping year, approximately 28,000,000 bushels of grain have been inspected in Calgary. Of this quantity 24,000,000 bushels were wheat.

BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fevers, and making teething easier. Concerning them, Mrs. Saluste Pelletier, St. Dumas, Que., writes:—"I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Canal Saves Auto

An auto standing on a street at Phoenix, Arizona, suddenly burst into flames. The owner pushed it into an irrigation canal. The flames were extinguished, another car pulled it out, and he drove off with only slight damage.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

New Grain Act

Would Make Provisions Uniform Throughout the Dominion

Concurrent legislation to make provisions of the new Grain Act uniform throughout Canada and place them beyond question on the ground of constitutionality, should be asked of the Provincial Governments, especially those of the western provinces. This is the tenor of a resolution adopted by the agricultural committee of the house at Ottawa.

The resolution was sponsored by J. L. Brown, Progressive, Lisgar, Man. It asks the Federal Government to take up with the Provincial Governments the advisability of passing such concurrent legislation at the earliest possible date.

Very often a sound investment is just a bit of speculation that turned out all right.

Farthest North Surveys

Department of the Interior Lays Out Plots at Six Posts in Arctic Archipelago

Six different posts in the Franklin district of Northern Canada have now been surveyed for the Royal Canadian Mounted Police or for trading companies, as one of the results of the 1923 and 1924 Arctic expeditions under the North West Territories and Yukon branch of the department of the interior.

Plans of these surveys are prepared by the topographical survey branch from the surveyor's field notes for filing with the registrar of the North West Territories. These surveys were made at Craig Harbor, Dundas Harbor, Strathcona Harbor, Ponds Inlet, Cumberland Sound and Rice Strait, by F. D. Henderson, D.L.S. The last named post on Ellesmere Island, being only 750 miles from the North Pole, is the most northerly point at which any official survey has ever been made.

Canada's Problems

Sir Robert Falconer Addresses Educationists at a Dinner in London

Many educationists of note attended the dinner given by the Canada Club of London in honor of Sir Robert Falconer, president of the University of Toronto.

Sir Robert submitted that Canada's three greatest problems were: First, the internal unification of the Dominion; second, her future population; third, the complaint that Canada is reserved in her attitude towards Britain and the empire.

The western and maritime provinces are just now loudly expressing discontent and it is certain that they have received less from confederation than they legitimately expected, he stated.

Soft corns are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

Speculate On Canada's New Governor-General

Officials in London have already formed definite views as to the qualifications necessary for the important and responsible post of governor-general of Canada. The name of Prince Henry is again being mentioned, and it is noteworthy that he alone of all the Princes was present with his august father when the latter opened the new Canadian building on Monday, June 29, while his interest in all things Canadian has been patent for some time past. One thing can be definitely said with regard to the appointment, if Canada has any particular predictions for any particular person they have only to explain their preference in order to have it carried into effect. It is admitted that it will be a difficult task to find a man outside the royal family who is invested with sufficient prestige and influence to make the bonds between the motherland and Canada more secure.

Life was safer when all the hooling was done by geese.

Minard's Liniment For Neuralgia

Warren Harding Memorial

Statue to be Unveiled at Vancouver in September

An international memorial which in many ways is unique, will be unveiled in Vancouver on September 17 next, to perpetuate the remembrance of the late President Warren G. Harding's visit to Canadian soil in July, 1923. The unveiling will take place after the international convention of Kiwanis Clubs under whose auspices the memorial is being erected. Although the statue was first ordered to be built by a committee acting on the initiative of the Kiwanis Club of Vancouver, the subscription list was open to clubs in the United States as well, with the result that the objective of \$25,000 was soon over-reached and the United States clubs insisted that they bear the entire expense, the amount subscribed by the Canadian clubs being returned to them.

The memorial will mark an event of which history offers no duplicate—that of a United States president making an address on Canadian soil during his term of office. President Harding visited Vancouver for a few hours on his way south after visiting Alaska in July, 1923, and was given an impressive reception. His address, in which he made an eloquent plea for continued friendship between the English-speaking peoples and practically between Canada and the United States, was listened to by over 20,000 people and aroused considerable interest throughout the British Empire.

Wise and experienced mothers know when their children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is absolute in clearing the system of worms and restoring those healthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

The most perfect form of flattery is to say to people what they think of themselves.

Approximately 18,000,000 automobiles are in operation in the world.

It has been in use for over 80 years; its action is pleasant, rapid, reliable and effectual, and relief comes promptly.

"Don't accept a substitute." The genuine is put up only by The T. Millburn Coy. Limited, Toronto, Ont.

W. N. U. 1623

Introduction Of Garnet Wheat May Be Fraught With Great Possibilities In Future

The Dominion cerealists, recently addressing the agricultural council of the House of Commons, speaking of a new wheat developed at the experimental farms, made the statement: "The production of Garnet wheat may possibly in the near future replace the famous Marquis wheat. This new wheat has capabilities of high production in seasons of drought, ripens earlier than Marquis, even in wet weather, thereby escaping the possibilities of rust and frost, and it is hoped that Garnet wheat may extend the wheat growing area many miles farther north."

In an appreciation of Marquis wheat, it is difficult to grasp the full significance of this. Marquis wheat, developed by Charles Saunders, who was recently granted a pension of \$5,000 per year by the Canadian Government for his invaluable contribution to the continent's agriculture, and was awarded the gold medal by the Royal Society of Canada, has to some extent revolutionized wheat growing in America. In the past twenty years it has placed millions of additional dollars in the pockets of Canadian and United States farmers. The statement forces attention to what has been accomplished in wheat growing in Western Canada.

The development of the raw plains of the west into a productive territory known familiarly as the "Granary of the Empire" has been rapid and sensational. In the early eighties, when the Canadian Pacific Railway first thrust its steel into the area and government and railway advertised the area as a grain-growing territory, the possibilities of wheat production were regarded very sceptically, and many authorities stated dogmatically that it would never be produced economically there. In 1924, forty years later, Canadian wheat acreage was 22,505,000 and the estimated spring wheat production 271,622,000 bushels. This compared with an acreage of 59,659,000 and a production of \$72,673,000 in the United States in the same year. Canada's yield in the past year was equal to nearly 12 per cent. of the world's wheat crop grown in 31 countries, as recorded by the International Institute, as against 32 per cent. in that of the United States crop.

In 1911 Canada first entered the international lists with her wheat, since when she has failed in only one year to carry away the world's championship, when she had the consolation of knowing that the winning Montana farmer had produced his crop from Canadian seed. The yield of wheat in Canada is consistently higher than in other countries of similar conditions. The world's record wheat crop was grown in Alberta in 1923, when 108,443,000 bushels were produced on 5,958,361 acres, an average of 28 bushels to the acre of wheat weighing 61.45 pounds to the bushel.

Hog Feeding Experiment

Self-Fed and Trough-Fed Hogs Are Compared

In feeding experiments with Berkshire hogs, conducted at the central experimental farm, tests have been made of the relative merits of self-feeding and trough-feeding. According to the report of the Dominion animal husbandman for 1924, in these tests the self-fed hogs made the greatest gains, but they consumed more feed and cost more per pound of gain. They were thicker and heavier at the shoulders than the trough-fed lots, but the latter produced a more desirable type of bacon carcass.

Easily Explained

Two Irishmen stood in front of a drug store in Dublin. In the window was a display of rubber gloves.

"Now I wonder what is them things for?" asked one of the Irishmen.

"Oh," replied the other Irishman, "ye can put them things on an' wash yer hands without gettin' yer hands wet."

Enthusiasm sometimes carries people away only to leave them to return in disgust.

When a girl is in love she doesn't carry his letters in her pocket.

W. N. C. 1683

A Never-Ending Warfare

Man Will Always Have to Fight Insect Enemies

A never-ending warfare, without peace or armistice, must be carried on by mankind against his insect enemies, says Capper's Weekly. If insect pests had their own way unchecked even for a single season they would seriously endanger, if not wipe out, the world's food supply. For example, a single pair of potato bugs starting in the spring, if permitted to reproduce without hindrance, would increase to 60,000,000 of their kind before frost of the same year. Certain plant lice or aphids produce at the rate of thirteen generations in a season. The boll weevil destroys 3,000,000 bales of cotton annually.

Contrary to human progress in other lines, advancing civilization is helping to propagate and multiply these insect armies. Commerce between nations and increased travel between sections of the same nations have spread these pests everywhere. Congress at its last session voted \$2,500,000 to the United States department of agriculture to fight injurious insect life under the direction of Dr. Leland O. Howard, chief of the bureau of entomology.

Facts About the North

Where They Grow 419 Bushels of Potatoes to the Acre

The writer of the article in the Edinburgh Review, in which the area for profitable settlement in Canada north of the American border was put at less than a hundred miles, should read the report of the experimental sub-station at Fort Vermilion, Alberta, for 1923. It has been summarized in a bulletin issued by the federal director of publicity. This point is over seven hundred miles beyond the boundary line, but wheat there yielded, nine varieties being sown, from thirty-seven to fifty-nine bushels per acre. As much as 419 bushels of potatoes was obtained per acre, and even one variety of garden corn produced a fair percentage of fully matured, though rather small crops. There were good crops of beans and other common vegetables, rapid growth made possible by long hours of warm sunshine.—Edmonton Journal.

New Zealand's Foresight

Has Realized Wisdom of Husbanding Her Forest Resources

The time-honored plan of using timber regardless of consequences is passing away. New Zealand has realized the wisdom of husbanding her forest resources none too soon. While much good work has been done by the state forest service, there is still room for more appreciation of the need for care and economy, and for more vigorous action toward securing them. On returning from the Empire forestry conference in Canada, the director of state forests said he was "more than satisfied New Zealand must grow her own wood supplies or go without."—Auckland Weekly News.

The Human Factor

Discussing the human factor in industrial accidents, Mr. W. H. Cameron, managing director of the Chicago National Safety Council, tells of a colored sweeper in a woodworking establishment who became curious about a silently whirling saw. He put out his finger to see if the edge was really serrated. It was, and in explaining to the foreman a few minutes later how he lost the tip of his index finger, he said: "Yeah, ah jest stuck out my finger like dis—for de Lawd's sake, dere goes anudder!"

"Music Turner" Invented

Notice of the incorporation of a limited company with head office in Saskatoon for the acquiring of the patent rights of an invention for turning sheet music, manufacturing the article and putting it on the market, appears in the issue of the Canada Gazette of June 6. The device was invented jointly by J. P. Ross, of Gravel, Sask., and W. W. Eves, and in use the machine will turn sheet music by the player merely touching a lever with his knee or foot.

Why Barley Is Bearded

Provision Made By Nature To Protect the Grain

In nature there is a reason for everything, even though we may not be clever enough to find it. Since your first encounter with barley beards, you may have asked what useful purpose those things could serve.

Recently Joe Robinson, a farm crops man at the Iowa State College, answered the question. Because such remarkable things as developing a spineless cactus have been accomplished with plants, he was asked why a satisfactory beardless barley could not be found.

As anyone knows who has had barley beards in his clothing, they are very brittle and scratchy, readily breaking into tiny pieces, each one capable of mischief. This brittleness is due to the high percentage of silicon or sand in the beards. Now if the beards are removed the silicon continues to be collected by the plant. In the absence of the awns or beards, this sand material is left in the straw and particularly in the little stems that attach the kernels. These stems then become so brittle that the grain shatters too easily to be harvested. Thus it seems that the beard serves as an outlet for an element that would otherwise damage the crop.

Of course, there are beardless varieties of barley, but as yet they have not given general satisfaction. It seems that nature intended barley to wear a beard and any attempts to remove it throws the plant out of balance.

Use Canadian Coal

Government Would Evolve a Scheme To Relieve Fuel Situation

An important statement was made in the House of Commons recently by Hon. George P. Graham, minister of railways and canals, in the course of the debate on the export of power from Canada. His statement dealt with the dependence of certain parts of Ontario and Quebec upon the imports of coal from the United States. He spoke as follows:

"I am glad to say that our discussions are temperate in this matter. We in Ontario and a portion of Quebec and in parts of the west, depend largely for our coal upon the United States. Our anthracite has all to be brought in from the United States, and year after year when there is a scarcity we send our representatives over there to see that we get a square deal and up to date the United States has given us a square deal in giving us our share of anthracite, even though they were pressed very hard on the other side of the line to shut off our supply of anthracite. I might say that I am in hope, and the government are in hope, that before long we may be able to evolve a scheme which will relieve the situation to a large extent so far as anthracite is concerned, by the use of our own coal both in the east and west for the manufacture of coke. If that can be done, we shall be in a different position from what we are today."

Aristocratic Four-footed Immigrant

This highly bred Spaniel dog was raised by the Duke of Hamilton and is valued at \$700. He is the winner of many prizes and was despatched from Glasgow by the Dominion Express Company on the Canadian Pacific Line, "Metagama" to Canada. He is going to a well-known sporting gentleman of Winnipeg and looks as though he will not leave many chances for prizes in the dog shows of the west. However high his breeding he is evidently not too proud to be of assistance to fellow-immigrants and is here seen carrying a useful bit of information in the form of a placard as to money orders.

Homesteading Is Still A Very Important Phase Of Western Land Settlement

When Horses Should Have Special Care

Harvest Season Unusually Hard On Neck and Shoulders

Horses will soon be on the mowing machines, and later will be doing their share on the self-binders. Perhaps no work that the horses are called upon to do is harder on the necks and shoulders than these very operations. On this account, every precaution should be taken to keep these parts of the animals in prime condition.

The first essential is the well-fitting collar. Next, after the well-fitting collar, comes the clean collar. The collar should be neat-fitting to every part of the shoulder, so that there is no rubbing or chafing. Where there is a really good collar-maker available, he should be consulted, as skilled vision and skilled fingers can save no end of suffering and loss. When the horse has finished his turn at the mowing machine, he should have his shoulders washed out and thoroughly dried. A little salt (at the rate, say, of a tablespoonful to a pint) should be added to the water. The shoulder should be thoroughly dried after the washing. If the shoulder should have the skin broken, there is but the one humane procedure, and that is to cleanse the broken flesh and to allow it to heal. The aim throughout is to keep the skin healthy and free from inflammation, owing to undue or uneven pressure.

The matter of the proper fitting of the collar should be looked after at least daily, as horses' necks change in size with working or with change of work, according to the pressure or the change of motion applied to the collar. An ounce of precaution in collar trouble is worth several tons of cure.

Milk Good For Poultry

Keeps Fowls Healthier and Acts As a Tonic

Is milk a substitute for a 20 per cent. meat mash as a feed for chickens? According to the results of an experiment conducted by the poultry department at South Dakota State College, it is. "If a farmer has milk, he ought to feed some of it to his chickens," states G. L. Stevenson, head of the department. "Milk can be fed to chickens to better advantage than to hogs and older calves. Furthermore, it will pay anyone to buy milk for the young chicks."

The results of the experiment show that although milk is a substitute for meat mash if both the meat mash and the milk have to be purchased, the meat mash will supply the necessary protein to the chickens for less cost. A point in favor of the milk, however, is that it keeps the fowls healthier. The lactic acid in the milk seems to act as a tonic.

That homesteading is still an important phase of Canadian land settlement and that the day of the acquisition of free western land is by no means over, though lying farther and farther from existing railway lines each year, is made evident in the last report of the federal department of the interior. This shows that in the last fiscal year a total of 3,843 homestead entries were made in Western Canada, 1,699 being in Saskatchewan, 1,326 in Alberta, 652 in Manitoba and 186 in British Columbia. A homestead consists of a quarter section of 160 acres of land, so that this method of land acquisition alone in the past year resulted in the settlement on 614,880 acres. To this should be added soldier homestead grants which made an additional 113,600 acres, bringing the total settlement upon free government land in Western Canada up to 728,480 acres. This is not a bad showing in view of the state of immigration in that year and the reputed apathy towards land settlement.

It is gratifying to find that the English-speaking races continue to preserve their majority in Western Canadian land settlement. Though nearly thirty nationalities are represented in these homestead filings last year, Canadians led with 1,277 entries, followed by citizens of the United States with 639 and then those from the British Isles with 576. These three classes accounted for nearly 70 per cent. of the total registrations. More than four hundred of the British settlers were English and more than one hundred Scottish, whilst the leading states in the forty-two represented were Minneapolis, North Dakota, Iowa, Illinois, South Dakota, Wisconsin and Michigan.

Homesteading has unquestionably been a great factor in the settlement of the great agricultural tracts of Western Canada, the extent of government land so occupied to date being 54,000,000 acres. Following this has been the settlement upon western lands effected by the Canadian Pacific Railway, which has accounted for another approximately 30,000,000 acres. That homesteading continues to be a factor in western land settlement is evident from the observation in the department's report that in the last year newly surveyed lands in fifty-nine townships were made available for homestead entry, thirty being in Manitoba, ten in Saskatchewan, and nineteen in Alberta.

Land settlement in Western Canada is more systematized and regulated today than it has ever been, a situation forced on the country by steadily increasing settlement. In addition, new homestead districts are being made available by survey each year.

Round Up Valuable Animals

Many Horses and Cattle Are Impounded in Saskatchewan

Hundreds of horses and cattle have been impounded in Saskatchewan, including a number of valuable Clydesdales and Percherons.

This is the season of the year when poundkeepers are busy. Advertisements under the Stray Animals Act in the Gazette have multiplied ten-fold, nearly a thousand animals being advertised as impounded. Agricultural experts attribute the increase at this season to the fact that with the crops above the ground there is a general disposition on the part of the rural population to see that stray animals are rounded up out of harm's way where they will do no damage to the growing crops.

Should Not Be Strange

The Anglican Bishop of Quebec says Cardinal Beign calls on him every year and he calls on the cardinal, and relations are courteous and friendly. The significance of such a statement is that it is regarded by some newspapers as a fine example to other provinces. A resident of Mars might think that after 2,000 years of Christianity it might be taken for granted that two distinguished followers of its founder could meet occasionally and maintain friendly and courteous relations.—Chatham News.

In 1877 all the telephones in the world were made by two men in a little shop in Boston.

Prevent Forest Fires

It Pays!

Local and Personal

FOR SALE—Gasoline Coleman Quick Lite lamp \$5. Mrs. Lyne, Creston.

The new Chore ball or Chore ring to clean pots and pans at V. Mawson's.

V. MAWSON
CRESTON

Miss Rose and Jim Cherrington, jr., were visitors with Nelson friends a few days the fore part of the week.

Mrs. Fralick, who has been in Nelson on an extended visit with friends, returned to Creston at the end of the week.

There has been a considerable harvest this year of the excellent crop of wild cranberries along the Kootenay River.

There will be English Lutheran service at the home of Mr. Reinwald, Sunday evening, September 6th, at 8 o'clock.

FOR SALE—Some slightly used Matriculation books, going at a reasonable price. Apply by mail to Evelyn Hurry, Creston.

Mrs. Lyne has some High School books to dispose of and will give them to any pupil in Creston school who will fetch them.

Mrs. R. Stephens and Mrs. F. H. Jackson, who have been away on an extended visit at coast points, arrived home this week.

Mrs. Stanley Hendren and young daughter arrived back from Vancouver on Monday, accompanied by her sister, Miss D. Moul.

The annual report of the Inspector of Municipalities gives the population of Creston village as 429. The village area embraces 430 acres.

Textbooks, scribbles, pencils, paints, pens, drawing paper, loose leaf books and leaves and all other school supplies at Creston Drug & Book Store.

The Junior Guild Christ Church have their September meeting on Saturday afternoon, 5th, at 8 o'clock, at the home of Mrs. E. W. Payne.

Monday is Labor Day—a statutory holiday, and all places of business in town will be closed. The postoffice wicket will be open from 5 to 6 p.m. only.

The game regulations for 1925 have been issued, and the season will open as usual on the 15th of September. The deer limit has been raised to three—all bucks.

All members of the Presbyterian Ladies' Aid are requested to attend the September meeting, Friday, 4th at Mrs. Beninger's apartments at the Creston Hotel.

WANTED—Apples, tomatoes, cranberries, and onions, in car lots. Don't sleep at the switch, write or wire us at once. Langstaff Coal Company, Moose Jaw, Sask.

Howard Allan of Trail was a week end visitor with Mr. and Mrs. Cherrington, en route to Saskatchewan to help with the harvest on the Allan farm near Regina.

Miss Kelly of New Westminster, who has spent the past two months here with her brother, G. H. Kelly of Creston Drug & Book Store, left for home on Wednesday.

Village clerk W. O. Taylor had a few days vacation at the end of August, which he spent on a fishing trip at Kootenay Lake, stopping with Sam Bysonth at Kuskanoak.

Mr. and Mrs. B. A. MacDonald and family of Summerland, who have been here for the past month on a visit with

her parents, Mr. and Mrs. J. W. Dow, left for home on Friday.

There is a decided scarcity of Indians about town this week, the reds being at Bonners Ferry for a big celebration in which all the Kootenay and Montana tribes are participating.

Mr. and Mrs. C. Head of Rossland were visitors with Mr. and Mrs. Herdman a few days at the end of the week. Mr. Head is in charge of the manual training work at the Rossland school.

The September session of Creston Board of Trade is announced for Tuesday night, and it is hoped there will be a large turnout as considerable business of importance has to be disposed of.

Due to a shortage of space we are compelled to hold over till next week a letter from Hilton Young in reply to the recent communication of O. M. Samuelson on the export liquor house situation.

Mrs. Bert Nelson and two children, who have been holidaying at New Denver, went through on Thursday last to Kimberley to join Mr. Nelson who is with the provincial police in that town.

According to the report of the Inspector of Municipalities for last year of the five villages in the province Creston enjoys the lowest tax rate of them all. The grand total of Creston's assessment is shown as \$344,306.00.

Mr. and Mrs. Howie of Owen Sound, Ontario, are Creston visitors this week, with their son-in-law and daughter, Mr. and Mrs. M. R. Joyce. They are en route home after spending the summer at Alberta and B.C. points.

K. Kleist left at the first of the week for an extended visit with friends in the district around Yorkton, Sask. He is still going on crutches due to the break of his right leg early in June, but hopes to come back as spry as ever.

The Presbyterian Sunday School and friends had their annual picnic on Wednesday afternoon at Glengariff Grove. There was a full turnout of youngsters and an enjoyable afternoon was spent with races and other amusements.

Insp. Dunwoody of Nelson, who is in charge of the provincial police of Kootenay-Boundary, was here on an official visit Wednesday. There is no date yet as to when the police uniforms will arrive but it will likely be next month.

Any person wishing to join the Fifteen Hundred Club Fernie District may do so by making application to A. E. Davies, Creston. This is the cheapest insurance in existence, so don't delay as this Club is filling up very fast, and you may soon be placed on the waiting list.

Mr. and Mrs. T. Lytle of Crawford Bay were here a few days at the end of the week, looking up a house as it is his intention to move the family here for at least the winter. He will re-open the jewelry store about the middle of the month.

E. H. Small of Cranbrook, Indian agent for the Kootenays, was here a couple of days the fore part of the week looking after haying matters, as well as rounding up the young reds who are eligible to attend the Mission school near Cranbrook.

The first of the month saw forest fire fighting crew reduced to about fifteen men, all of whom are up Summit Creek. The two fires up the Klockmann trail are out and the other blazes are so well trenched about that little danger is looked for from them.

The Women's Institute September meeting is announced for Friday afternoon, September 11th, at 8 o'clock. Mrs. Cherrington will report on the recent provincial W.I. convention at the coast, and the balance of the afternoon will be given over to social features.

Bonners Ferry Herald: Jimmy Lockhead of Creston, B.C., who has brought his string of horses here for several years past, announces that he has acquired several new horses and that he will be here to enter for the \$1000 purses which the local fair association will put up.

An egg plant weighing almost 2½ pounds and measuring 10 inches about the girth has attracted a lot of attention in the Mercantile window the past week. It is the product of the Edmondson ranch along the K.V. and those who profess to know something about egg plant say it is an exceptionally large sample.

Guy Constable got away on Saturday for Victoria, where he has been in session with the minister of lands in connection with the offer of 10,000 acres of Kootenay Plate lands which
