Provincial Library apl 27

THE CRESTON REVIEW

VOL. XVIII. CRESTON, B. C., FRIDAY, JULY 16, 1926 No. 22

Kitchener

Mrs. Sid Abar left for the St. Eugenee hospital at Cranbrook on Thursday.

George Wickholm, who is in charge of the ranch at Canyon, was home for the weekend.

P. M. Chernew of Ymir was a business visitor here on Wednesday. T. Stralle of Fernie was in by auto on a business call on Thursday.

Bob, Walter and Billy Long and Ray Crisler of Esickson, motored in on a business visit on Wednesday.

Misses Olga and Elsie Nelson went to Ryan on Thursday, and while there were the guests of Mr. and Mrs. Carlson.

Miss Louise Pendry arrived here on Thursday and has joined the staff at the McConnell Hotel.

Mr. and Carl Anderson, Mr. and Mrs. E. Driffil and Dick Castle spent Sunday at Kuskanook, going up by auto.

G. A. M. Young of Creston was a business visitor here over the week.

Misses Myrtle and Marjorie Strong are spending the summer vacation with there grandparents, Mr. and Mrs. Geo. Strong, at Canyon.

C. H. Robinson, fishery inspector Nelson, was here on Friday, putting cutthroat and lake trout fry in Meadow Creek.

Mr. and Mrs. Hahn of Spokane, Mrs. G. Hahn and Miss T. Duckworth of Seattle, and Miss M. Murphy of Hone, H.L., were visitors here on Friday.

Mrs. Harrison and F. O'Neil of Yahk were Kitchener callers Sunday.

Mr. Rumsey, C.P.R. trainman, and party, of Cranbrook, went on a fishing trip up Goat River for a week, W. Davis taking them up with pack horses.

Mr. Bennett, Chrysler auto dealer, Seattle, was a caller here on Sunday. J. Webster, Swift's man at Cranbrook made a business call on Saturday.

Provincial police H. McLaren, of Creston was here on an official call on Saturday.

Mrs. Walter Walby made a business trip to Creston on Friday, returning on Saturday.

Andy Wickholm has purchased a new Chevrolet car from the Creston dealers, Palmer & Maxwell.

Mrs. Joe Langlois of the Russell Hotel made a business trip to Nelson on Friday, returning on Sunday.

Miss Ester Nelson left on Saturday for Yahk, where she is visiting Miss Josephine Allan, at her home there.

H. H. Redmile and E. W. Thomas went to Creston on Saturday on a fishing trip, returning on Monday morning, bringing back a nice mess of fish.

A. G. Strudwicke of the Leadville Mining Company got back on Sunday from Nelson, where he attended the mining convention. He also visited Riondel, Trail and Rossland.

Mrs. Wm. Arb went to Creston last week on a visit with Mrs. T. Shavalley getting back on Thursday.

Messrs. Joe and Douglas McLaughlin left on Saturday by auto for Saskatchewan. They have been employed for some time by the Sash & Door Company. Here's luck to them.

Cyrille Senesael, who is employed at Lumberton, paid his many friends here a visitor over the weekend.

A party from here took in the dance at Yahk on Saturday night given by the Boundary Orchestra. They were Misses Alice Molander and Edith Geroux, and Jack and Jim Dodds.

Mrs. Jas Carr and children, Mrs. Geo. Johnson and daughter Miss Lyda, were up spending the day with friends making the trip by auto from Creston.

Fritz Molander left for Cranbrook on Monday, where he has secured a job as brakeman on the freight. Also Harry High.

Mr. and Mrs. T. Shevalley and children of Creston were visiting with Mr. Mrs. Wm. Arb last week, taking Miss Marie Arb back with them for a week's stay.

Mr. and Mrs. W. J. Barr and sons, Charles and Robert, of Kimberley, were visiting with Mr. and Mrs. B. Johnson of the Kitchener Hotel last week.

Ray McKelvey, N. Bush and Bert Boffey of Creston were business visitors on Monday. Col. Fred Lister, M.P.P., of Camp Lister, made a business call the same day.

Mr. and Mrs. A. Nolaud were visiting with Mr. and Mrs. A. Simpson—the latter's parents—for a week, coming from Spokane, and leaving Monday, taking Claude Simpson and Wesley Blair with them.

Wm. Malafont of Lewiston, Idaho, who is largely interested in Leadville Mining Company, arrived on Tuesday, proceeding direct to the mine, where he spent his time until leaving on Friday. He expressed himself as well pleased with the showing made. He will be back again in a few weeks.

W. O. Davis made a trip to the Iron Range on Sunday, packing in supplies for Messrs. Young and LaPage, who are doing assessment work on the Hill claims. They expect to be there until the early part of September. We understand engineers are to be in to inspect these claims and hope their report will lead to more extensive development being undertaken.

Harvey ("Scoop") Joyce, who has been employed at the Continental Lumber and Pole Company, Limited, as bookkeeper for some time, left on Wednesday for his home at Edmonton, having secured a position in that city, and we wish him every success. He will surely be missed in the younger set as he was always the best of company.

Foreman Leamy and his road crew are about through with their operations on Newman Street and Aspen Avenue. They have graded the former and put in a four foot board walk from the postoffice to the C.P.R. track, and graded Aspen Avenue from the depot to Water Street. These works are a decided improvement and add greatly to the appearance of the town, as well as being a convenience to our residents and visitors.

A pleasant and successful dance was staged in Hunt's Hall on Saturday, July 3rd. Due to the date being close to the U.S. national holiday a goodly number of visitors from across the line put in an appearance and enjoyed themselves to the limit. Baker street presented quite a busy and gay appearance with cars parked on both sides of the street, all them decorated with Union Jacks and Stars and Stripes. Dancing started about 10 o'clock and kept up with vigor until 3 a.m., everybody having a good time and voting it one of the most successful functions ever seen in Kitchener. There is another dance set for Saturday, July 17th, which should bring another large turnout, due to a new orchestra who, to quote the conductor, are second to none who have ever played at Kitchenkr. Everydady welcome. Come, one and all, and have a good time.

The ratepayers gathered for the annual school meeting at the schoolhouse on Saturday night last, G. A. Hunt presided, and was favored with the largest gathering of the sort ever seen at Kitchener. B. Johnson was re-elected trustee by acclamation, and Mrs. E. Driffl was similarly favored as auditor, replacing A. Howard, whose term had expired, and who would not consent to re-election. The ratepayers are sorry to lose Mr. Howard as he has been a never-stop worker in educational affairs since the school was started, not only as auditor, but in every other way, being one of those who helped erect the school. The hope is expressed that he will shortly resume his usual interest in educational matters. Trustees and teachers are to be congratulated on the success of the past year, and in this connection too hearty commendation cannot be given G. A. Hunt who, as secretary-treasurer, has had much to do in bringing about the present efficiency. He has been board secretary ever since the school was built—in 1918.

Nickel, Fred Lewis School Trustees

Judging by the slim attendance at the annual meeting of the ratepayers of Creston School District on Saturday night, and the harmonious and generous spirit that prevailed, the trustees and staff of teachers may rightfully consider that educational matters have been handled with efficiency and with due regard for economy.

Out of a total attendance of less than two dozen Fred Lewis finally consented to preside and the business of the evening was put through with surprising unanimity, the ratepayers even going so far as to vote $7860.00 to carry on with for the new term when the old board was quite prepared to make $7500.00 do the financing. Most of the additional $360 voted will be used for increases in salaries of janitor and some of the teachers.

The financial statment submitted by the treasurer, Trustee S. A. Speers, showed the year closed with a balance of $1228, despite the fact that last year almost $1000 was spent on painting, plastering and other improvements, and fees from high school pupils from outside points fell off $265.

Two trustees had to be elected. T. Goodwin's three-year term had expired, and he refused to consides re-nomination, while Trustee Speers, who had still another year to put in, also decided to retire, and the meeting elected George Nickel to replace Mr. Goodwin, and Fred Lewis will fill out the one-year remaining of Trustee Speers' term. Dr. Henderson was relected auditor for about the twelfth successive term.

Votes of thanks were carried with unstinted applause for the retiring trustees and the auditor, and announcement was made that on the 10th a letter containing the resignation of Principal Fleming of the high school had been received, making it necessary to get a new staff for the higher seat of learing, as Miss Shannon had previously given notice of her intention to retire

Canyon City

Bob Clayton, who is working at at Kimberley, is home for a couple of weeks' vacation with his parents here.

Jeff. Knott left at the first of the week to take a job as chain man on the survey party Chas. Moore has at work on the old Winlaw limit adjoining Erickson.

Eric Olson, who has been a Spokane visitor got back on Sunday to take part in the twelfth of July celebration at Creston on Monday.

Alf. Nelson is a busin ss visitor at Lethbridge, Alberta, and other prairie points this week, establishing a market connection for the fruit and vegetables going out through the Creston Valley Produce Co.

Mr. and Mrs. Guy Browell were here for a couple of days at the first of the week, coming over by auto from Nelson on Sunday.

Mr. and Mrs. Pepperdine have just returned to Calgary, Alberta, after a weeks' visit with Mr. and Mrs. Jim Bateman.

A. Bond has disposed of his former Ford car and is now driving the Ford turned in by Rev. J. Herdman at the Palmer & Maxwell garage last week, when he purchased his new Chevrolet.

The Ladies' Community Club have a dance carded for to-night, 16th, at the Community Hall, for which Mrs. Lister's orchestra will supply the music, and the admission will be $1 to gents, and 50 cents to ladies, these charges including supper.

In the list of honor rolls awarded at Canyon school at the end of the term Division 2 omitted to give the name of Master John Spencer, who captured the diploma for Proficiency. This is the second time in succession this distinction has come his way—and he has only been attending school two years. Agnes Johnson also won an honor roll for proficiency this term.

T. Hickey and Jim Byrnes had quite an expensive auto collision on the hill just at the bridge on the Canyon side on Friday in which the Hickey Chevrolet had a wheel taken off, axle bent, fenders wrecked, and the Ford driven by Byrnes was almost as seriously battered up. The latter was driving a load of youngsters home from swimming but, fortunately, no one was hurt.

Lister

H. Umbach of Victoria, the provincial surveyor general, was here on an official visit the end of the week, and was accompanied by Chas. Moore of Creston.

Mr. and Mrs. F. N. Thompson and family left on Thursday for Nelson where the family will make their home for the present, Fred having a position in Trail in sight. It is expected that if the reappraisal details are satisfactorily adjusted Mr. and Mrs. Thompson will again make their home here and will be welcomed back as they have been very useful citicens.

J. L. Whitford of Cranbrook, the Rawleigh products man, was a business visitor here the past few days.

Mr. and Mrs. John Bird and Master Cyril were Tuesday to Friday Nelson visitors, attending the wedding of Cymrid Williams and Miss Muriel Redpath on Wednesday. Both are former citizens of Lister, the bride being in charge of the school about three years ago, while Cym. is a former landowner here.

There was a very slim attendance at the annual school meeting on Saturday night. John Bird was in the chair, and the ratepayers re-elected Mrs. Powers for another three year term, as trustee, with Mrs. Harold Langston chosen as auditor. $245 will have to be raised by way of taxation to finance the school—$25 in excess of last year—some extra money being needed to improve the heating system.

At the Huscroft school meeting adjournment had to be taken till July 20th to finally decide on enlargements to the present school or the erection of a new building to handle the increased attendance. Harry Helme was re-elected trustee, and Mrs. Chas. Huscroft, auditor. $200 will be required for running expenses this coming term.

Erickson

Miss Annie Fraser of Cranbrook is a visitor here at present, the guest of Mrs. Maxwell.

Mr. and Mrs. J. Heric from Michigan arrived last week on a visit with the former's parents, Mr. and Mrs. P. Heric.

Ray McKelvey is the very latest local resident to get into the auto owning class. He is driving a new 1926 Chevrolet, purchased at the Premier garage at Creston last week.

Miss Aubrey McKowan of Cranbrook and Miss Dorthy McKowan of the same town, who has been visiting at Boswell, are here at present on a visit with their grand parents, Mr. and Mrs. Geo. Cartwright.

Mrs. Frank Staples was a visitor with Cranbrook friends a few days last week, getting back on Thursday.

Eric and Gerald Craigie and Alf. Boffey are combining labor and pleasure at Kootenay Bay where they are on a crew putting in some new line at Kootenay Bay for the Dominion telephone company.

Mrs. J. S. Peck and children of Edmonton, Alberta, who are on their way home from a visit at the coast, are here for a few days with Mrs. Peck's parents, Mr. and Mrs. George Cartwright.

At the annual school meeting on Saturday night everything went off quite harmoniously, with R. M. Telford reelected trustee and E. J. C. Richardson auditor. The meeting was quite cheerful in voting the $1700 and authorized the trustees to go the limit in salaries in order to assure a first-class teaching staff.

Wyndel

The Tennis Club held a most successful dance in the M. Wigen packing shed on Saturday night last. The music was supplied by Creston orchestra, and the floor was crowded for every dance.

M. Hagen, who has been working in the Hudson Bay mine at Salmo, is home for a few days with a damaged leg, caused by a rock rolling on to it. No bones are broken, and he expects to return shortly.

Mrs. R. Uri, who has been in the hospital at Nelson for treatment on one of her eyes, returned to her home here on Saturday.

The Tennis Club are having another dance in the old schoolhuuse on Saturday, July 17th. Creston music. Popular prices. Good floor.

The new house of Mr. and Mrs. Jas. Wood was the scene of a very gay party on Tuesday night, when about 70 guests were invited. The evening was spent in dancing and games. A very dainty supper was served about midnight, and the party broke up in the early hours with everyone voting it the most successful party ever.

Wynndel Baseball team had a busy day on Sunday when they played Creston at Creston in the afternoon, coming out on the short end of a 5 to 4 score, in a real good game. In the evening the Sirdar team came up here and a very fine game was played. It had to be called off at end of the fifth inning, however, due to darkness with the score 5 to 4 in Sirdar's favor. The game was continued on Thursday night and was witnessed by fans from Sirdar, Creston and a big turnout from here.

The year end report of Wynndel school is as follows: Division 1: Honor Rolls: Proficiency—David Taylor. Deportment—Alice Davis. Regularity and punctuality—Margaret Joy. Promoted to Grade 8—David Taylor, Fred Wilson, Manuel Irving, Rodolpho Benedetti. On trial—Allan Wood. Promoted to Grade 7—Alice Davis, Lois Cooper, Konstein Wittmann, Whitfield Abbott. Promoted to Grade 6—Mary Abbot, Andy Hagen, Gilbert Payette, Neilson Hagen.

Division 2: Honor Rolls: Proficiency—Hilda Hagen. Deportment—Dorothy Moon. Regularity and punctuality—Kenneth Packman. Promoted to Grade 5—Dorothy Moon, Ellen Hagen, Ruth Joy, Oswald Payette, Florence Schmidt, Billy Wood, Maron Moon. Promoted to Grade 4—Lawrence Davis, Kenneth Packman, Roy Andestad, Margaret Irving, Ned Bathie, On trial—Alice Laverty. Promoted to Grade 3—Hilda Hagen, Bertha Gelette, Ester Wittman, James Wood, Leonard Gelette. Promoted to Grade 2—Alvin Hagen, Elmer Davis, Clara Wittman, Campbell Payette.

This Wonderful Age

Recently within the short space of one week two exploration parties crossed the North Pole without mishap and in comparative comfort, thus realizing what has been the ambition of daring and adventurous men for centuries. Their achievements were rendered possible by the use of the air routes instead of by ship through the icebound waters of the Arctic seas.

Daily communication is maintained between London and Paris by airships carrying passengers and freight, the time schedules being as regular as those of the best managed railways, and a few weeks ago the trip from London to Paris was made in ninety minutes by an airplane carrying a score of passengers and several tons of express freight.

Throughout large sections of the United States mail is now transported by airplanes with the result that important letters are delivered thousands of miles away within a few hours of mailing whereas formerly days were necessary for their despatch. Regular mail services by air are now established and maintained right across the continent, and the number of such routes is increasing every year.

Within the short span of one generation the horse and buggy has been superseded by the automobile with its small, compact internal combustion gasoline engine, as a means of conveyance on our highways, and a day's journey of a few years ago is now only a matter of hours, or even minutes, and hundreds of thousands of people who never dreamed of keeping a horse and buggy now have their horseless carriages.

When the electric telegraph, the telephone, and finally the trans-Atlantic cable came into operation most people felt that the last word in rapid communication had been written, and now almost overnight has come the marvellous development of radio whereby the most remote and inaccessible places in the world can be kept in constant touch with centres of population and activity. The successful flights over the North Pole were known to the world within a few hours. No longer are ships at sea isolated between ports, and one in distress can call others to its assistance just as a sick person in a city can summon his doctor by telephone.

Photographs of scenes in connection with the great British strike were printed in New York papers the following day, transmitted across the Atlantic by radio, and even on these Western prairies these pictures were reproduced within three or four days whereas last year such pictures would not have been available here for two weeks or more.

In another way time and distance and cost of operation are being reduced in the West through the introduction of oil-electric cars on our steam railways, thereby also eliminating the smoke and other discomforts of travel.

For centuries the enormous powers in our great rivers, cataracts and falls have been pure waste because unutilized. Now this cheapest of all known sources of power is being harnessed the world over and placed at man's disposal, with the result that not in cities alone but in the rural home the benefits of electric light, power and heat are available, while all industry has entered upon a new era of expansion.

Within the memory of people still living the tallow candle has given way before the kerosene lamp, and the lamp has been replaced first by the carbon electric light and now by the cheaper, more efficient tungsten lamp. The finest lectures, the best music, the current news of the day is carried by radio into the humblest and most isolated home, and it does not require much imagination to foresee that at no distant date people everywhere will be able to witness as well as hear these far distant occurrences.

Jules Verne's flights of fancy in "Twenty Thousand Leagues Under the Sea" and "Around the World in Eighty Days" are today accepted facts and almost every day happening.

Pessimists there still are who insist that the world is becoming worse and not better, that mankind is headed for destruction, that with increase of poplaion he world will not be capable of producing enough food to sustain life, that with our prodigal use of fuel these resources will become exhausted and the race will freeze to death, and so on and so forth. Such croakers there always have been, and probably always will be, but their dire predictions always fail to be realized. Man has ever been able to solve the problems confronting him. Necessity has ever been the mother of invention, and at no time in the history of the race has inventive genius been more fertile in practical ideas, nor has science been so consistently employed to achieve important and lasting results.

Predicts Bumper Crop

May Surpass Banner Years in West Says Eastern Man

Returning from a tour of the western provinces Thomas Bradshaw, vice-president and general manager of the Massey-Harris Company, prophesied that 1926 would see a western crop which would rival, if not surpass, the banner years of the past. Not since 1915, he declared, had he seen the wheat crops so well advanced, the farmers in such a flourishing condition and the general tone of the west so optimistic.

A good penman may drive a pen but pencils are better lead.

SPRAINS.

Apply Minard's at once. It draw out inflammation, soothes the muscles and ligaments.

MINARD'S "KING OF PAIN" LINIMENT

Official Fairy Story Teller

The English town of Bradford has an official fairy story teller, who gathers the children about her and relates to them the tales of dwarfs and fairies and to have entertained the young in all parts of the world for hundreds of years. Since Mrs. Mary Bradford, the official story teller, began her work, 12,926 children have sat at her feet and listened to the stories.

Simple and Sure.—Dr. Thomas' Eclectric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Religious Difficulties In Mexico

Unless the government finds some way of granting the request of the British and French legations to permit one foreign priest or minister to officiate for each foreign colony, foreigners of all religions in Mexico must forego church services conducted by a foreign minister.

Argentine Corned Beef

Two hundred thousand pounds of Argentine corned beef arrived in Vancouver for local distribution on board the steamship West Conob, recently. This is the first direct shipment of this commodity to Vancouver.

Japs Like Gold Teeth

Those Who Can Afford Fad Cultivate Perpetual Smile

Whenever a Japanese gets any money ahead he buys himself a gold tooth and cultivates a perpetual smile.

This illuminating and fascinating fashion is looked upon somewhat askance by the Kobe Chronicle, which declares that a prefectural investigation revealed that local dentists last year had used gold valued at 221,226 yen for decorating the teeth of customers.

A movement is under way to start a fashion in plain white teeth.

COLOR IT NEW WITH "DIAMOND DYES"

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings — everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Great Demand For Romanoff Table Linen

Thousands of Pieces Sold to Americans For Souvenirs

Royal napkins and tablecloths belonging to the Romanoff family are in enormous demand in the United States. Entirely new and bearing the coat of arms of Emperor Nicholas, tens of thousands of pieces of this table linen have been sold by the state to American buyers, who sent them home to relatives and friends as gifts. The napkins are of the finest Holland linen, are large enough to serve as tea tablecloths and cost 75 cents each.

A MEDICINE THAT GIVES STRENGTH

New Health Comes to Those Who Build Up Their Blood by the Use of Dr. Williams' Pink Pills.

Dr. Williams' Pink Pills are a strengthening medicine. Surely and effectively they build up the blood, invigorate the appetite, tone up the digestion, give brightness to the eye, color to the cheeks and lips, and quickness to the step. These pills have direct action on the blood, making it a health-bearing stream; thus no part of the body can escape their beneficial action. Weak men and women, boys and girls find new health and strength through the use of this world-renowned blood builder. Mr. N. H. Langville, C.N.R. agent at New Germany, N.S., says:—"In November, 1924, I had a severe illness which left me in a very run-down condition. I got a supply of Dr. Williams' Pink Pills and derived great benefit from them. My appetite improved, and a gain in weight which is now normal I owe to the use of these pills. I can therefore recommend Dr. Williams' Pink Pills as a fine tonic."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. Get a box from the nearest drug store or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Gives A Novel Treat

Mrs. Edward E. Sisson, of South Middleboro, Mass., has been giving her family and friends a novel treat by serving lemonade and lemon pie made from lemons picked from a tree she raised indoors. The tree now has aboue forty blossoms on it.

LEG SORES

ARE CURABLE. If you suffer from Leg Sores or Varicose Ulcers, I will send you **ABSOLUTELY FREE** a copy of my famous book that tells how to be rid of these troubles for all time by using my remarkable painless treatment. It is different from anything you ever heard of, and the result of over 35 years specializing. Simply send your name and address to Dr. H. J. WHITTIER, Suite 29, 421 East 11th Street, Kansas City, Mo.

Fun At the Exhibition

Six Platform Acts Booked For Western Canada Fairs

Six big platform acts for the Western Canada fairs circuit have now been booked and will make their first appearance on the loop in Brandon on June 28.

The Boganny Lunatic Bakers, brought over from London by the Shuberts, will provide a comedy act. The Petleys present an exhibition of trampoline and comedy casting stunts, while the Lime trio give an acrobatic turn. Dennis Curtis brings along a dog and pony show, while the Australian Waites are reputed to be the world's leading whip cracking and boomerang artists. Shorty Flem, the rube cop, will provide all the clowning stunts on the grandstand.

Coal Waste Is Valuable

Can Be Used For Perfumes and Other By-products Say Scientists

Fuel conservation was discussed as a vital problem by practical men attending the eighteenth annual meeting of the International Railway Fuel Association at Chicago.

Science is coming to the aid of the railroads in this matter, the members were told in an open forum meeting on engineering factors. The slack waste in coal is soon to be taken care of by chemical processes and the day is not far off when that waste will be turned into oils, dye, perfumes and other valuable by-products, it was predicted.

For Aches, Pains, The Safe Home Remedy
NERVILINE

When sudden sickness comes, when the kiddies come in with colds, their little chests and throats sore from coughing, quick results always follow a vigorous rubbing with good old Nerviline. If it's Cramps, Colic, Diarrhoea, Nerviline is a wonderful friend; it brings ease and comfort so quickly. For young and old, to overcome the minor ills that constantly arise in the home, nothing compares with "Nerviline."—35 cents at all dealers.

Applies For Patent On New Aeroplane

Military Aviator Claims His Invention Will Not Crash

Bobist, a former military aviator, has applied for a patent on an aeroplane which will not crash. The invention is based on the fact that 90 per cent. of all aeroplanes crash to earth head-on. The invention consists of a series of counter-weights which, in the event of a perpendicular descent, are caused to slide to the rear of the plane, thereby re-establishing its balance, aided by an auxiliary rudder.

A Tower Of Pearls

Japan to Have Interesting Exhibit at Philadelphia Fair

Tokio.—A miniature tower of pearls, both cultured and natural, will form part of Japan's exhibit at the Philadelphia Sesquicentennial exposition. It will have a value of approximately $350,000.

The exhibit is constructed in the shape of a pagoda, is slightly over three feet high and contains 201,230 cultured and 29,270 natural pearls of varying sizes. The display has received the approval of the Empress.

As a vermicide an excellent preparation is Mother Graves Worm Exterminator. It has saved the lives of countless children.

Tighten Border Defences

Rum Running and Smuggling to be Curbed at Border

Border defences against rum running and other smuggling of contraband goods has been so tightened during the last year or so that the spring rush is not the success it formerly was. Promiscuous crossing of the border with cargoes of liquor has been forced to give way to carefully organized rum-running, largely owing to the fact that customs and immigration forces are co-operating in an effort to dam the flow of Canadian liquor into the United States.

Good blood isn't everything. The child of a King must be taught which spoon to use.

Question Of International Law

If Empire Is At War Every Part Is Automatically Involved

The Sydney Evening News editorially states: "Mr. Woodsworth, a Labor member for Winnipeg, who raised the question that Canada should not become involved in empire wars, without deciding the questions at issue for herself, overlooked the fact that by international law when the empire is at war every part of it becomes automatically involved. It is a partnership and any partner can involve the others. The extent to which any Dominion participates is not a matter of compulsion, but of popular will. If Great Britain embarked upon a manifestly unjust war the response of the dominions would be feebler than if the issue were one which had a higher moral warrant. It is true that both Britain and the dominions might be honestly mistaken, but the great point is that in the ultimate analysis, the basis of the empire is the assent of its peoples founded on their behalf in its beneficence and its necessity as a custodian of world power."

Russia Has Large Army

Under Circumstances Other Continental Powers Cannot Consider Disarmament

Russia has one of the largest armies on the continent. She is not a member of the league; she is not on friendly terms with most of her neighbors; she is suspected of fishing in Europe's troubled waters on all possible occasions. Under the circumstances no continental power will consider disarmament while Russia, fully armed, maintains moral and material isolation.—Brooklyn Eagle.

Self-Poisoning Increasingly Common

Modern Living Habits Promote Self-Poisoning — Thousands are Victims

The average man or woman does not enjoy consistent good health. Loss of appetite, headaches, biliousness and a lack of enthusiasm for either work or play are constant complaints.

Scientists have ascertained that such a condition is usually caused by self-poisoning resulting from constipation.

Due to modern living habits, the natural secretion which promotes regular elimination by softening the bowel contents, is often deficient—especially among middle-aged people. The poison from waste matter remaining in the systems of people thus affected is the insidious enemy of good health.

Such people need *Nujol*, because *Nujol* softens the waste matter and permits thorough and regular bowel elimination without overtaxing the intestinal muscles. It helps Nature help you.

Ask your druggist for *Nujol* to-day—and remember, look for the name "*Nujol*" in red on both bottle label and package.

Tourists In Increasing Numbers Now Coming To Western Canada Are Offered Many Attractions

The mental picture of the Canadian west is a vision splendid. Were an onlooker to view the scene from above Winnipeg, the eastern gateway of the prairies, and have his range of vision sufficiently extended, he would see spread out to the westward a vast, gently rolling, fertile plain, gradually rising to the foothills of the Rocky Mountains, over nine hundred miles way. On the right, the northern edge of the prairies merges into a transition zone of mixed prairie and woodland, commonly called the park belt, and north of this, and stretching away indefinitely, is a belt of forest land, interspersed with lakes and waterways. In the extreme southwestern corner near the Rockies appears a stretch of ranching country. Fed by the melting snows and glaciers of the Rocky Mountains the majestic Saskatchewan drains the whole plain and pours its tawny waters into the inland sea of Lake Winnipeg to be thence discharged through the Nelson River into Hudson Bay. Through the prairie belt extend three transcontinental railway lines with innumerable branch lines crisscrossing in every direction and stretching out into the north country.

The most striking feature of the landscape viewed from above is the vast checkerboard effect produced by the system of surveys which divides the whole country into blocks one mile square, by roadways running due east-west and north-south. In these provinces the Dominion of Canada has the greatest continuous area in the world laid out in astronomically based subdivision surveys.

Dealing with the territory by and large: the prairie is the great wheat producer; the prairies and foothills contain about 15 per cent. of the world's coal reserves; the southwest corner is the ranching country; the forest belt north of the park lands is the chief seat of the lumbering industry, and the home of the fur-bearers; the Laurentian range across the northeast is now the scene of metalliferous mining development; and from the great rivers and lakes come the whitefish and sturgeon which supply the tables of half the continent.

The prairies, which in fifty years have advanced from A Great Lone Land to be the empire's granary, wherein the production of all kinds of grain has attained to the total of almost one thousand million bushels per year, are naturally the centre of interest. In this area which has a population of over two millions are located the capitals of the three provinces and other centres of distribution and manufacturing, the rapid rise of which has been the romance of the past twenty-five years.

The attention of the onlooker is drawn to the all-embracing road system, not by a sight of the roads themselves, for they are, for the most part, so hidden by the tall verdure that the whole country appears to be an unbroken wheatfield, but because of the constant passing to and fro across the landscape of heavily laden farm wagons and of a countless number of motor vehicles of every description. Automobiles are indeed everywhere, for it is not inapt to say that the west appears to have been created for the automobile and the automobile invented for the west. The advantages of this checkerboard road system, which has done so much to assist in the rapid development of the country, are at once appreciated by the visitor, for a glance at a map or a short run along any highway shows him that in whatever direction he desires to travel he can do so as readily as he can take his way about the streets of his own home town. He sees that if he proceeds, say west, he will within a mile come to a road running north and south, and that travelling on this road in either direction for a mile he will reach another crossroad parallel to the first. He need not ask questions. He simply starts his car, makes the necessary turnings and reaches his destination. It is almost impossible to lose oneself.

The tourist has before him one of the most fascinating lands imaginable. Whether he desires to travel by train or steamboat, automobiles or canoe, whether his tastes incline to palatial hotels, bungalow camps, or tents, he will find ample satisfaction for every wish. Hunting, fishing and visiting mining camps are all easily compassed; should he be a canoeist he can drop his craft into the Saskatchewan or the Assiniboine and paddle over old fur-trader routes even to Hudson Bay; or if he sekes a new thrill he can travel in commodious modern steamers down the Mackenzie River system to the land of the midnight sun and the Arctic Ocean.

Where every section has its tourist areas it is possible to mention only a few. In the east there are those about the three big lakes, Winnipeg, Manitoba and Winnipegosis; in the north is the rugged forest country, full of big lakes and rivers, the Mecca of the hunter and fisherman; the Saskatchewan valley is shared by all the provinces; the famous Qu'Appelle valley is in the centre; and along the western edge are the Rocky Mountains and foothills. On this slope of the Rockies are the largest of Canada's national parks, Jasper Park in the north, Banff Park in the centre, and Waterton Lakes Park in the extreme south. All these recreation centres have their appeal and not least these mighty mountains, with their forest-lined valleys, their upland gardens, their glaciers and snow fields, and their uncounted peaks, many of whose summits have never yet been scaled by man and which invite conquest by the energetic and the adventurous.

Married men are nearly all great inventors—of excuses.

Advantages Of Sweet Clover

Seventeen Reasons Showing the Advantages of This Crop

(By Jas. D. McGregor, Glencarnock Stock Farms, Brandon, Manitoba)

1. Sweet clover will grow on practically all soils in Western Canada.

2. Is more easily started than alfalfa or any other clover.

3. Makes good pasture and hay.

4. All kinds of stock soon learn to like it.

5. Seeds heavily in all sections, and seed easily saved.

6. Feeding value equal to alfalfa; better for pasture.

7. Starts early in spring, grows all summer and in late fall.

8. Does not bloat cattle and sheep like alfalfa.

9. A biennial legume—fits well in rotation.

10. Roots are soft, easily inoculated, decay rapidly.

11. As green manure will add more plant food than any other crop.

12. Will smother out nearly all kinds of weeds.

13. Will prepare heavy wet alkali land for other crops.

14. An excellent bee pasture, making white honey.

15. Will grow where other clovers and alfalfa will not: (a) On low, wet, alkali land. (b) On dry, stony, gumbo soils.

16. Alfalfa starts more easily than sweet clover, as the sweet clover roots are softer and more easily inoculatd.

17. Sweet clover is no longer an experiment. Grow it, use it. It is one of God's choicest gifts to man.

Saskatchewan Butter

Interest in Dairying Increasing With Farmers Throughout the Province

With interest in dairying increasing among farmers all over Saskatchewan, creamery butter production in the province during April totalled over 1,050,000 pounds. This is an increase of 325,487 pounds, or a little better than 45 per cent. over the output a year ago.

In the first four months of this year production totalled 3,418,000 pounds, or an increase of 28.9 per cent. over the output during the correspondence period last year.

Four new creameries have been opened in the province this year and five additional plants are now under way.

Insects Wait For Weather

Scientists Say Moth Can Postpone Birthday For Years

Observations made by a British scientist have led to the belief that if the weather is bad the small egg moth can postpone its own birthday for days, months or years. The cocoon of this type is ordinarily due to open in February but if the weather is inclement the birth is usually postponed sometimes for twelve months. Moths have been known to emerge successfully after being imprisoned eleven years.

The bashful lover is always in hot water when trying to break the ice.

Faith In The Future Of Canada Supported By A Reference To Experience Of The United States

Cutworms In the Garden

Poisoned Bran Is Recommended As A Means of Control

Cutworms rank among the worst insect pests of garden and field crops. They are general feeders, attacking all kinds of garden plants, particularly when they are young and succulent in the early part of the season. As a rule, they cease to be troublesome after the end of June. A bulletin on cutworms and their control, distributed free by the Publications Branch, Department of Agriculture, Ottawa, gives detailed information on this pest and describes the means of control. Poisoned bran is the best remedy for cutworms, and it should be applied as soon as their presence is indicated. For small gardens one quart of bran, one teaspoonful of Paris green, and one tablespoonful of molasses, with sufficient water to moisten the mixture, is sufficient. When large quantities are needed use 20 pounds of bran, ½ pound Paris green, 1 quart of molasses and 2 to 3 gallons of water. Mix the bran and Paris green thoroughly while dry, dissolve the molasses in the water and pour it on the mixture, stirring well.

The cutworms hide in the soil during the day and come out to feed at night, therefore, the mixture should be applied immediately after sundown to get the best results. In gardens or fields containing rows of vegetables, it should be scattered thinly along the rows on either side. Flowering plants may be protected by placing a small quantity of the poisoned bran around, but not touching each plant.

Many Prizes For Alberta Corn Show

Will Be Held This Year At Medicine Hat

The provincial corn show for Alberta is to be held this year at Medicine Hat under the auspices of the Alberta Corn Growers' Association. The directors are working out a prize list which will include classes for the following types of corn—yellow and white flints, yellow and white dents, northwestern dent, sweet corn and popcorn. There will also be classes for sheaves. In addition to cash prizes the directors hope to be able to secure several trophies as championship awards.

Vancouver Seeds In England

When many of the gardens in England come into bloom this year, millions of flowers from Canadian seeds will bloom among the plants of the Old Land; for England is turning to the warm climate and rich soil of Vancouver Island for its supply of choicest seeds.

Seven women now hold flying certificates from the Royal Aero Club of Great Britain.

It is always interesting to read the views of publicists in other countries on economical conditions in our own and particularly so when those views are of an optimistic and encouraging character. It is refreshing, therefore, to read in a United States contemporary, a statement of faith in the future of Canada, supported by reference to experiences which the United States itself underwent before it reached its present progressive and happy economical condition.

A member of the Canadian Parliament, writes the Detroit News, states that "Canada is a vassal of the United States," reporting him as saying, "We are paying tribute to the United States to the extent of $350,000,000 every year, $200,000,000 of which we pay in imports and $150,000,000 on money, borrowed, on which the News comments editorially, as follows:

"If that constitutes vassalage, then the United States was the vassal of the rest of the world, chiefly Europe, for almost 100 years; for it was not until about 1880 that our exports began regularly to exceed our imports in value, and it was considerably after that date that we ceased to pay Europe huge dividends on borrowed capital.

"If Canada is spending $200,000,000 a year for American goods, it is a sign that somehow or other she is making the money to pay for them. She is farming, manufacturing, exporting, creating wealth; and part of this wealth she exchanges for American products. Why does she buy these goods? Because she is not self-sufficient. Would she gain by making these goods for herself? Not unless she could make them more cheaply than she can buy them.

"If Canada is spending $150,000,000 a year for money borrowed from the United States, she is pursuing the same course we followed while we had immense undeveloped resources and small accumulations of capital. We borrowed money where we could get it, and paid high interest on it; but we put that money to very good use. If Canada is doing the same with the capital she has borrowed from the United States, she is following a successful example. She should be thankful, for by putting that money to productive work she will one day emerge from the state of 'vassalage' that seems to worry the worthy member of parliament.

"One has but to cast an eye over the map of Canada—a vast territory with extraordinary possibilities—and think of what the people of the United States did to the 'Great American Desert,' to see that any Canadian who is pessimistic about his country is—well, to say the best, he is short of vision."

Sunflowers For Silage

The Effect of Sunflowers on the Following Crop

Sunflowers have gained considerable promise as a silage crop during the last few years, owing largely to their hardiness which allows them a longer growing season than corn and makes them a more certain crop. They require less moisture than corn and make a good substitute for it in districts in which the summer season is comparatively short, the nights cool and the precipitation scanty. There has been some doubt, however, as to the effect of sunflowers on the succeeding crop, as little was known of their plant food requirements. In order to determine their effect on the following crop an experiment was conducted at the Rosthern, Saskatchewan, experimental station. Corn and turnips were used for comparison. In the two years of the experiment, wheat and barley, following turnips, showed somewhat higher yields than when they followed sunflowers. The difference was considerably more striking when corn was used, 19.6 bushels of wheat being produced following that crop compared with 11.8 bushels fololwing sunflowers. As the experiment has lasted only two years, no definite conclusion can be drawn, but it would seem that sunflowers are more exhausting to the soil than either corn or roots.

Map of a portion of the three Prairie Provinces showing the net work of main motor highways and railways which covers this area.

C. F. HAYES, Editor and Owner.

CRESTON, B.C., FRIDAY, JULY 16

Another Federal Election

Canadian government affairs are again under the management of the Conservative party, with Rt. Hon. Arthur Meighen as premier, and announcement due this week as to who will constitute the cabinet.

The change from King to Meighen came in dramatic fashion. On June 28th, Premier King asked the governor general for authority to dissolve parliament and bring on a general election to end a situation that had developed from bad to worse in the administration of Dominion affairs.

The governor-general refused Premier King a dissolution, presumably on the assumption that the then premier did not command majority support in the house, although the King government had never been defeated on a division. Premier King resigned, and then ex Premier Meighen was called upon to form a cabinet, which he did—in a sort of a way.

On July 1st Mr. Meighen's 'shadow' government was defeated on a vote on a motion that stated that whereas the Meighen cabinet had taken office contrary to the Canadian constitution they were not entitled to handle public funds.

Premier Meighen at once asked for a dissolution of the house, was given it by the governor-general and it is expected the necessary general election will be held in September.

Without any detail the foregoing are the important events that brought on the present election and it is well that these incidents be not overlooked because, at this distance, it looks as if the governor-general's refusal to give Mr. King (who had never been defeated) a dissolution, and within 48 hours to give Mr. Meighen (who had suffered defeat) the right to call an election, will be a considerable factor in the campaign, and a factor fraught with consequences that it would be well to have absent in a campaign where the chief effort is to restore stable government.

In connection with this feature both sides can cite precedents without number to show that the governor-general acted according to constitution and vice versa, but on the face of it it must be admitted that the affair smacks of favoritism and both the Progressive and Liberal leaders are capitalizing the incident in the manifestos and interviews they are giving out from time to time—some of the former party being most outspoken in stating the unfairness of his excellency's action.

Just at present the weather is too hot, and most people are too busy, to permit of a local situation disclosing itself, but it looks safe to predict that when polling day comes around the West Kootenay electorate will have opportunity to choose between at least candidates carrying the Liberal and Conservative banners.

Never since the riding was created have the Liberals had a chance to do battle under ordinary conditions. In 1917 the introduction of the Unionist idea crippled the Diberal candidate, whilst in 1921 they were let down badly by their first choice candidate Dr. Hamilton, who muddled along and finally retired a few days before nomination, and had it not been for the gameness of R. B. Staples who stepped into the breach, the Liberals would have had no name to put their X after in December, 1921. In 1925 the Liberals were unofficially behind L. W. Humphrey, the defeated Farmer Labor nominee.

In Creston there is much enthusiasm in the Liberal ranks, and reports from other quarters are all to the effect that a fight must be made, and already the names of a couple of likely looking standard bearers are mentioned.

Fishing Regulations

Now that the trout fishing season is under way in such auspicious fashion may be a good time for anglers to read, mark, learn and inwardly digest the regulations governing fishing as given out by C. H. Robinson, fishery inspector for the Kootenays, as follows:

"In angling or trolling, no person is permitted to use more than one rod with one line attached thereto, or more than one line held in the hands.

"The daily catch limit remains at 25 fish per day, including all species of trout. No trout of any kind under eight inches in length can be taken from the water, and if an undersized catch is made, the fish must immediately be returned to the water alive and uninjured.

"In handling undersized fish, care must be taken to see that the hands are wet, otherwise the fish will probably not survive.

"No trout weighing under three pounds can be bought, sold or exposed for sale in British Columbia. This regulation does not apply to the Dolly Varden variety, known generally as char.

"In computing the daily catch, one day means from sunrise to sunset, and not from a certain hour one day to the same hour the next day.

"The annual angler's permit fee for non-residents is $10, 'non-residents' meaning any person domiciled in British Columbia for a period of less than six month."

Fishermen are reminded that the season on Summit Creek does not open until July 1st, and that Rod and Gun Club members are keeping strict watch on the stream to see the opening date is respected.

FORM No. 13.
(Section 39)

LAND ACT

NOTICE OF INTENTION TO APPLY TO PURCHASE LANDS

In Land Recording District of Kootenay, Group One, and situated in the vicinity of Kitchener, B.C.

TAKE NOTICE that WILLIAM LEE HATHAWAY, of 310 Sansome Street, San Francisco, California, U.S.A., Manager, intends to apply for permission to purchase the following described lands:

Commencing at a post planted at the intersection of the westerly boundary of Sub-Lot 14 of Lot 4592 with the northerly boundary of Sub-Lot 13 of Lot 4592 in Group 1, Kootenay District, thence north 20 chains more or less to the north-west corner of Parcel 3 Hathaway land; thence west 100 chains more or less to a post marked 10, Sub-Lot 13 of Lot 4592; thence south 20 chains more or less to a post marked 9, Sub-Lot 13 of Lot 4592; thence east along the nortnerly limit of said Sub-Lot 13 for 100 chains more or less to the point of commencement, and containing 200 acres more or less.

WILLIAM LEE HATHAWAY.

Dated 5th June, 1926.

CRESTON MERCANTILE COMPANY

LIMITED

Beer Analyzed By Experts

ALL the Beers purchased by the Liquor Control Board of B. C. from the Vancouver Breweries Limited, Rainier Brewing Co. of Canada Limited, Westminster Brewing Co. Limited, Victoria Phoenix Brewing Co. Limited and the Silver Spring Brewery Limited, who are all members of the Amalgamated Breweries of B. C., for sale at Government Liquor Stores and the Licensed Beer Parlors, have been and will be analyzed from time to time by different expert firms of the continent for the protection of the public.

THE substance of these various analyses instigated by order of the Liquor Control Board shows that the Beers are perfect, the taste agreeable and malty. The foam is creamy and stands up well. The alcohol by weight is about 4.25 per cent. and the extract 5.49 per cent. with an original gravity of about 15.20. These analyses indicate further that the Beers are of good quality, wholesome and free from any foreign substance.

TO make a good Beer with such health-giving qualities it requires a skilled brewmaster and an up-to-date hygienic plant, such as maintained by the above mentioned Breweries. These plants are open for inspection and visits of the public are gladly solicited. Only the best materials obtainable are used in the manufacture of the Beers.

THE Brewing capacity of the above Breweries, members of the Amalgamated Breweries of B. C., is about eight times as large as the present output, which gives best assurance to the public of receiving only fully matured and properly aged Beers for many years to come.

Local and Personal

Mrs. M. Cannady and family, who have been living at Moyie for the past six months, have returned to Creston and are occupying the residence of the late Fred Little on Fourth Street.

The twelfth of July has got in class with Chautauqua as a rain producer. This section was favored with a couple of satisfactory showers Monday afternoon and early Tuesday morning.

The peak of the raspberry season is past. The crop this year will be as large as the Valley has ever harvested, running to about 6000 crates, and prices will be up to the usual big-season average.

A brand new six-foot walk has just been put down on Fourth Street from the old Speers' store corner to the Ding laundry building, and certainly makes the travelling very much more comfortable.

The charivari squad were out on Friday and Saturday nights for the time-honored serenade of the newlyweds, Mr. and Mrs. John Cooper, but the financial returns were considerably below expectations.

Andy Wickholm of Kitchener was a business visitor here on Thursday last and made the purchase of a 1926 Chevrolet at the Premier garage, making a total of eight new cars disposed of by the firm this season.

Kuskanook is beginning to deserve its summer title of Creston-on-the-lake. Within the week sites have been cleared and tents put up for summer outings there by Messrs. Hare, McLaren and Speers.

J. C. Cummings, a Cranbrook civil engineer, with a crew of about six men, started work this week on the survey of the indian lands located on Kootenay Flats. They have a cook with them and are camped on the work.

Mr. and Mrs. McIntyre and family, Drumheller, Alberta, reached Creston by motor on Sunday, and are to make their home at Creston for the next few months, having leased the residence of C. B. Graland on Grandview Heights.

The last lawn social of the season is that of Friday, 16th, at Trinity United Church parsonage grounds, commencing at 5 o'clock. There will be ice cream, raspberries and cream, tea and light lunch, as well as a sale of home cooking.

Thursday, July 29th, has been named for a convention of West Kootenay Liberals to select a standard bearer for the forthcoming federal election. Creston Liberals are meeting in a few days to select delegates to attend the convention.

Creston public library is expecting a big supply of new books from Victoria before the end of the month. Now is a good time to join and take advantage of this splendid supply of reading. $1 will pay your membership till the end of December, 1926.

The Rod and Gun Club's miniature rifle range on the club lot on Barton Avenue was officially opened on Tuesday night, when Commissioner Geo. Johnson fired the opening shot at a practice shoot attended by half a dozen of the club members.

According to the horticultural department census there are 37 acres planted to tomatoes in the Creston district this year, along with an acre in cabbage and another acre of cucumbers. Last year the tomato area was put down at 25 acres.

Creston is experiencing the hottest July in its history. Following a couple of 100 in the shade touches on the 4th and 5th, the mercury went it one better on Saturday, 10th, when 101 in the shade was recorded on the official thermometer at Dr. Henderson's.

Village clerk Taylor had a substantial deposit to make at the bank on Tuesday, having on Monday received a government cheque for $418, being Creston's share of the 1926 provincial motor licenses. This amount is earmarked for highway improvements.

The diversion on the transprovincial highway at Arrow Creek, which has been under construction for the past ten weeks, will be completed and ready for the tourist traffic by the end of this week. The finishing touches in the way of gravelling are are being put on now.

The new school board has lost no time in filling vacancies in the high school teaching staff, having secured Miss Florence Cowling, B.A., of Vancouver for assistant principal. She has had previous experience and comes well recommended. Salary will be $1600, same as that paid Miss Shannon.

Creston Valley Conservative Association executive had a short session on Monday night to make preliminary arrangements for the coming federal campaign, and named President Mallandaine and Secretary J. W. Hamilton as representatives at the meeting of the West Kootenay executive at Nelson on July 16th.

G. H. Fleming, who has been in charge of Creston high school for the past two years, has resigned to become assistant to the high school principal at Cranbrook, at an advanced salary. With the principal's resignation the trustees are now faced with getting a entirley new staff as Miss Shannon resigned some weeks ago.

Provincial police H. McLaren informs us that the supply of tags to be worn by dogs outside the municipality have just arrived and requests dog owners to come in at once and secure the necessary license which cost $1 for males and $2 for females. Adorned with these out of town dogs will not be interfered with by the village dog catcher.

The terrific heat that prevailed on Sunday kept down the attendance at the Orange church service at Chrsit Church on Sunday evening. About 35 members of the L.O.L. and L.O.B.A. were out along with the usual congregation that filled the Church to capacity. Rev. S. Newby delivered a timely address on the topic, "The Sacredness of Toleration."

Creston Indians were the big winners in the horse racing that featured the celebration at Bonners Ferry on July 4th. Andrew Paul's Schoolboy captured two firsts and a second. Hay Louie's Idaho Boy took a first and second, and Skinny's Nellie E. annexed a first and third. David Luke got a second with Alice Buckskin, and Joseph a third with Silver Queen.

Creston was on the main line of the C.P.R. on Thursday and Friday last when, due to a washout east of Revelstoke, all the main line passenger traffic was routed over the Crow both east and west, a total of ten trains going through here. The washout was a serious one for the fruit shippers as during the holdup in traffic sixteen cars of raspberries and cherries stacked up at Revelstoke and as soon as the line was opened these were made into a special train and sent on to Calgary, where all of it had to be sold due to its being in too poor shape to go further east.

CHURN FOR SALE—Barrel churn, suitable for one or two cows, $5. Victor Carr Creston.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

WORLD HAPPENINGS BRIEFLY TOLD

Prince Christian Kraft, Hohenlohe-Oehringen, Duke of Ujest, and rated the wealthiest man in Germany, is dead.

A deadlock has been reached over duplication of the Pacific cable from Fiji to Canada, and Imperial Conference may not deal with matter.

A shipment of two hundred thousand pounds of Argentine corned beef has arrived in Vancouver for local distribution. This is the first direct shipment of this commodity to Vancouver.

Fifty head of livestock were cremated in a fire that destroyed a stock barn operated near MacDonald, Man., by Stewart and Cameron, Limited, of Winnipeg. The loss will run into thousands of dollars.

No official confirmation is available from governmental circles to the cabled report from London that Viscount Willingdon would be Canada's next governor-general, succeeding Lord Byng of Vimy.

It is stated in Manitoba Government circles that an effort will be made to enlist the support of Ontario in the fight being waged by the three prairie provinces for "blue sky" legislation to control sales of shares.

Spain's representative informed the commission charged with studying reorganization of the League of Nations Council that unless she is accorded a permanent council seat Spain will be convinced that it is not useful to collaborate longer with the league.

Answering a question in the House of Commons, Hon. Charles Dunning, minister of railways, stated that the government had no information of any proposal by the Canadian Pacific Railway to construct a new line from Winnipeg to the Pacific coast.

Are Your Nerves On Edge?

Photo by Micklethwaite

"I know of nothing better as a tonic and nervine than Dr. Pierce's Favorite Prescription and I can highly recommend it as such," said Mrs. Jessie Chapman who resides at 12 Frichot St., Toronto, Ont. (Picture above.) "I had become in a run-down state of health, my nerves gave way and I could not sleep. I grew very weak and my back ached severely. But, after taking just a few bottles of Dr. Pierce's Favorite Prescription I was feeling excellent, my backaches disappeared, my nerves were in splendid condition and my general health was improved in every way. There could be nothing better for the ailing woman than Dr. Pierce's Favorite Prescription."

All dealers. Extra large bottles, liquid $1.35; Tablets $1.35 and 65c.

Write Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., for free advice.

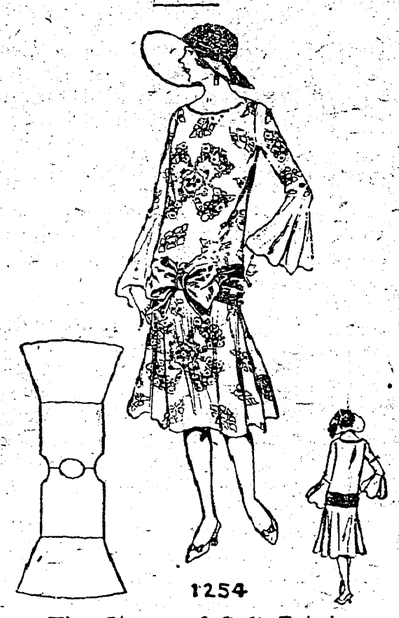
A Canadian Ambassador

American Paper Thinks We Should Have a Representative in U. S.

It is years since it was arranged that Canada should have an ambassador to the United States. The Canadian Government has announced at different times that the appointment was upon the point of making. It has been asserted by friends of that government that the ambassadorship would be assigned so soon as the right Canadian could be had. Either the right Canadian is "a white blackbird" or "a shrinking violet," for there are 9,000,000 Canadians and among them there must be some man capable enough and not too modest to serve Canada at Washington.

As a matter of business alone the Dominion needs an American ambassador. Canada is too old and great, its interests too numerous and important, for the British ambassador to represent it indirectly, when Albania, Egypt and Haiti have representatives of their own in the United States. No British ambassador can handle Canada's business at Washington as advantageously to Canada as could a representative of the Ottawa government.—Chicago Journal.

"IDEAL Fashions" by Jean Belle Hamilton



1254

The Charm of Soft Fabric

New frocks are soft and fluttery with flowered materials and flares. The frock presented here is sure to take the eye of the miss and little woman. First, because of its arresting simplicity of line, and second, because of the loveliness of its material. A wide ribbon sash is tied at the low waistline, where rippling skirt joins slender bodice. The batteau neck is finished with a narrow binding of the same plain material as the flaring sleeves. No. 1254 is in sizes 16, 18 and 20 years. Size 18 years (36 bust) requires 4¾ yards 36-inch figured crepe, and ⅜ yard georgette crepe; ribbon for sash 2¾ yards 5 inches wide. Price 20 cents.

The secret of distinctive dress lies in good taste rather than a lavish expenditure of money. Every woman should want to make her own clothes, and the home dressmaker will find the designs illustrated in our new Fashion Book to be practical and simple, yet maintaining the spirit of the mode of the moment. Price of the book 10 cents the copy.

May Salvage Turco-Egyptian Fleet

In Navarino Bay, in 1827, the Turco-Egyptian fleet was sunk in a naval battle. The Greek Government has issued a proclamation inviting salvage firms to submit tenders for the raising of the remnants.

Happiness comes to you as a result of earning it, not as a result of willing it.

A gallon of sea water contains approximately a quarter pound of salt.

Minard's Liniment King of Pain

Says He Felt Drunk Most Of the Time

Brooklyn, Mr. Fred G. Marquart writes:—"I felt drunk most of the time. My head was dizzy. I couldn't think clearly. One day I dropped a coin and when I stooped to get it I got so dizzy I almost fell. I later found out that the cause of this condition was constipation. This was overcome by a short course of Carter's Little Liver Pills. My appetite has doubled, and my dizziness has entirely left me."

Carter's Little Liver Pills move the bowels and relieve the system of its poisonous matter.

Would Substitute Law For War

Women of Britain Joining in Peacemakers' Pilgrimage to London

"Law, not War," has been adopted as the slogan of the Peacemakers' Pilgrimage of the women of Great Britain who assemble in Hyde Park, London, June 19. Some of the pilgrims from Scotland plan to walk most of the way.

There will be five main routes for pilgrims to travel, all centring on London. Local committees in Scotland and England have been formed to mobilize the pilgrims and escort the marchers. The meeting, expected to be attended by 100,000 women, will demand that law be substituted for war; that the British Government agree to submit all international disputes to courts of arbitration or conciliation, and shall further take the lead in the proposed disarmament conference.

London Dealers Sell Wonderful Jewels

Gems Worth Millions Property of Mysterious Eastern Potentate

Jewels valued at $5,000,000, the property of an eastern potentate, whose identity is kept a close secret, are being sold in London. Gems worth $250,000 already have reached London, and mostly were disposed of by dealers. Another $2,500,000 shipment is expected to arrive within the next few months.

One of the most beautiful jewels in the collection awaiting sale in London is a stomacher of diamonds, emeralds and rubies. It is composed of more than 2,000 stones, the centre one being a magnificent oblong emerald, surrounded by diamonds and linked up by three rows of diamonds with drop emeralds from which to hang uncut emeralds.

Could Hardly Live for Asthma, writes one man who after years of suffering has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless has been his suffering. This matchless remedy gives sure help to all afflicted with asthma. Inhaled as smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

Population of British Columbia

British Columbia's population has shown considerable increase since the census of 1921, according to figures compiled by government officials on the basis of school population. The total population of the province, set at 524,000 in 1921, is now nearly 600,000, these figures show.

Power From Ocean Tides

Preliminary permits for the hydro-electric development on Passamaquoddy Bay, Maine, involving the utilization of the Bay of Fundy tide, was issued by the United States federal power commission to Dexter P. Cooper, Inc., New York City.

40—A small body of water.
43—A contract.
45—The name of a popular opera.
47—A rodent.
49—Wicked.
51—Myself.
52—That Man.

Handshaking Is Hard Work

Prince of Wales Not Only One to be Incapacitated by Custom

The decision to abandon the White House custom of indiscriminate handshaking was bound to be made sooner or later, for it had become a menace to the health of both the president and his wife. At the first reception after the war President Harding shook 6,500 hands at the rate of 30 per minute. President Wilson wished he could get a glove with steel fingers. The wife of President Cleveland found her right hand getting larger than her left as the result of much democratic salutation, and took violin lessons to reduce the disparity. Mrs. Harrison, after the first experience, evaded the ordeal by holding a fan in one hand and a bouquet in the other. We remember how the Prince of Wales was similarly incapacitated during his visit to Canada by the too hearty grip of welcome.—London Daily Chronicle.

Cheapest of all Oils.—Considering the qualities of Dr. Thomas' Eclectric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

France Exports Briar Root

Briar roots, used for making smoking pipes of a popular variety, is so much in demand in America that it is necessary to import huge shipments from France to take care of the demand. As a result France in one year shipped briar root valued at 80,000,000 francs to America.

Some men are so sympathetic that they will even share your last dollar with you.

Quick Relief From All Kidney Trouble

Dodd's Kidney Pills Are Excellent For Backache, Lumbago, Gravel, Bladder Trouble, Sciatica and Rheumatic Ailments

P. E. I. Man Used Them For Pains Across the Back and Found Relief.

Tignish, P.E.I. — (Special). — Just why Dodd's Kidney Pills are so popular all over the Dominion is shown by the statement of Mr. J. F. Perry, a well-known resident here.

"For a couple of years I was troubled with a pain across the back. When I stooped down I had a hard time straightening myself up again. After taking a few boxes of Dodd's Kidney Pills I feel a whole lot better."

That Mr. Perry's trouble came from his kidneys is evidenced by the relief he got from Dodd's Kidney Pills. They are purely and simply a kidney remedy. They heal and strengthen the kidneys and put them in shape to strain all the impurities from the blood in a natural manner.

Dodd's Kidney Pills relieve kidney trouble, no matter where or in what form it is found.

Candelilla wax, used in making candles and polishes, is obtained from a weed which grows abundantly in Northern Mexico.

Strange, Romantic Love Adventures of the Flapper you know!

Joanna

by H. L. GATES

Copyright 1925 by H. L. GATES

Published by arrangement with First National Pictures, Inc.

CHAPTER V.—Continued)

"Say, you!" she said, her lips set, "you're just about the same as a new run in an old pair of stockings to me, but you're running the wrong way. We're saying goodbye now, and we'll probably never say hello again, but I'd like you to remember that you were in on the start of something today that's going to have a big finish."

He made no reply, but just looked at her, somewhat sorrowfully. She added, irrevelantly it seemed:

"And it didn't start the way you think and it won't finish the way you expect, take it from me!" Then, her flowers hugged close, she went into the house.

Mrs. Adams was a dear old soul, or a mean old termagant, according to whether you owed your room rent or not. Not that she was so much different, under the latter circumstances, but the general aspects of her seemed different. As a matter of fact, she was good for four weeks of arrears for any girl and after that, why, as many more as a girl required if she was in real hard luck and actually trying to get out of it. Joanna, herself, had once comforted a girl friend, who had mortgaged her room rent for two weeks ahead on a dress she couldn't afford with: "Never mind, dearie! The first week's the hardest. After that she'll pray for you, and I guess that won't do you any harm, either."

Mrs. Adams was breathless with curiosity when Joanna faced her in the drab room which gained its proper designation from the iron clad rule which the landlady laid down meticulously to each new lodger: "My young ladies receives their company of the other sex in the drawing room only!" Her young ladies customarily referred to the big front room downstairs with the two spindle legged gold chairs and the three overstuffed things in faded red, as "the drawing room only." Joanna, speechless for a moment, shoved her flowers into the landlady's arms. At the same time she noticed that the old lady had taken off her apron. She'd never seen Mrs. Adams, except on Sundays, with her apron off. It gave her something easy to talk about as a starter:

"I didn't know it was you getting out of the automobile," Mrs. Adams explained. "And I wasn't taking chances. That's my rule; when an automobile comes to my house off comes my apron. I was properly raised in my young days!"

She allowed a tear or two to escape over the flowers, marvelling at the assembly of so many geraniums, also a beloved memory of girlhood, in one bunch. Then she was ready to be told about the car, and the absence from the store, and the reason for the gift of blossoms.

Joanna made her put the flowers in water, turn down the gas in the oven so that whatever was cooking there wouldn't burn, put her broom out of the hall so it wouldn't worry her, and sit down. Then she told her.

The girl began slowly, deliberately, with infinite detail, an account of the summons conveyed through "Good Morning," and her reflections while she waited in Mr. Graydon's office. Then her words hurried; she became excited; she talked fast; she got up and stood in the middle of "the drawing room only" and talked with her arms as well as her lips. She was just about to arrive at the bank, in her recital, when Mrs. Adams, who had been listening pacidly, interrupted:

"Tell me; where'd you get that new coat, Joe? It's mink ain't it? And it's real mink, too, or I've lost my eyesight."

"Sure it's real," Joanna assured her. "It's the only real thing Cohen had in his shop—it's what he's done business on all season. Cost a thousand bucks and that's what I'm coming to. When I got to the bank—!"

"You say you had a thousand dollars to pay for that coat Jo?" Mrs. Adams interrupted again.

"You say you had a thousand dollars to pay for that coat, Jo?" Mrs. Adams interrupted again.

"In five hundred dollar bills! Cohen's eyes almost exploded. And I've got some more in my handbag, and one of them's for you, but never mind the coat till I get out of the bank, will you?"

Carefully with constant repetition, and with infinite detail, Joanna completed her story. When she had finished she was flushed, excited, crying again. She'd rubbed her lips with the back of her hand so much, in her nervousness, that the scarlet was blotchy, and the tears had played havoc with her eye lashes. She sank down in a chair and finished with a pose that she instantly recognized as a good one, and one she'd remember for some future occasion—arms stretched down beside her and palms turned out with fingers spread.

"Now that's my story for you to stick to and what do you know about it?"

Mrs. Adams didn't know what to know about it. When Joanna came to the million dollars the landlady patted her hair and tucked in a grey wisp that hung down behind; but when the girl came to the end she was silent, motionless, and she kept her hands folded in her lap.

Joanna went over and kissed her on the top of her head lightly. She didn't respond to that, which Joanna understood. It was a lot of news that had been thrown at her.

"Now I'm going upstairs and try to cry," said Joanna, gathering her new coat on her arms and giving the bundle that held her old one a kick into a corner where she could salvage it later. "And if I can't cry I'm going to laugh. If I can't do that either I'll try standing on my head and see if I can figure things out that way." She didn't notice a sad little shake of the head which the landlady sent her way.

She turned to the door, but stopped, and opened her bag. She selected the crispest of the five hundred dollar notes, went over to the grey-haired Mrs. Adams, showed her the size of it, and then crumpled it in the old lady's toil worn fingers. Mrs. Adams, with wet, troubled eyes, looked into the girl's face, and would have said something, but Joanna stopped her by putting a hand over her mouth.

"Just keep the lid on the 'don't want to take it' stuff," she said. "I know you couldn't think of accepting it, and it isn't coming to you, and I only owe you for two weeks—but I've got to give something to somebody, haven't I?"

She was going out the door when she stopped again, and turned around. Mrs. Adams still was looking at her dully. She struck a pose that, she concluded, was particularly appropriate for the framing of a doorway—body leaning against one side of the door frame, hand stretched across to the other, and her chin turned across a shoulder into the room:

"There's one thing you can do, Mrs. Landlady-mine," she said. "You can hold in the news till I get ready to spread it, and you can keep your other flappers out of the 'drawing room only' for tonight, because my John's coming around on his regular date and when he gets here I'll need the whole darn room for a lot of heavy stuff."

(To be continued)

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

She Wanted It Cheap

She (enthusiastically).—Oh, I would have given anything in the world for that vase.

He.—Well, why didn't you buy it?

She.—Buy it! Why the man wanted five dollars for it."

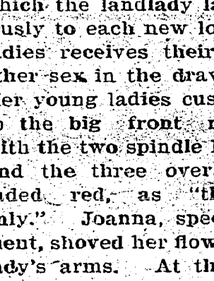
RESTORED TO GOOD HEALTH

Mother of Eleven Children Praises Lydia E. Pinkham's Vegetable Compound

Her Interesting Experience

Buckingham, Quebec.—"I am the mother of eleven living children, and my baby is five months old. I am only 38 years old and I have taken Lydia E. Pinkham's Vegetable Compound for weakness and my nerves. I knew of it from my sister, Dame Edouard Bellefeuille of Ramsayville. For five years I was in misery and was always ready to cry. Now I am so happy to have good health. My daughter, who is 18 years old, has also taken it and will be happy to recommend it to all young girls."—Dame WILLIAM PARENT, Box 414, Buckingham, Quebec.



Why suffer for years with backache, nervousness and other ailments common to women from early life to middle age, when Lydia E. Pinkham's Vegetable Compound will give you relief?

In a recent country-wide canvass of purchasers of Lydia E. Pinkham's Vegetable Compound, over 250,000 replies were received, and 98 out of every 100 reported they were benefited by its use. C

Still Enjoying Life at 84

Thanks To That Wonderful Remedy

MILBURN'S HEART AND NERVE PILLS

Mrs. F. H. Miller, 1843-11th Ave. East, Vancouver, B.C., writes:—"Five years ago my husband suffered terribly with severe attacks of palpitation of the heart and smothering spells, and two doctors stated that he could not possibly live six months.

A friend recommended Milburn's H. and N. Pills, with the result that my husband is still enjoying life at the age of 84 years.

He has improved so wonderfully that he can now climb the stairs without having those awful pains in his heart."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

May Restore Ancient Legend

Facts That Would Almost Prove Moon Has Effect On Plants

The old belief, always scoffed at by scientists, which led some farmers, religiously, to plant their crops in certain phrases of the moon, may yet receive some support. Some time ago scientists began to discover that certain living creatures, notably some kinds of seaweed and some species of ocean dwelling worms, possessed a distinct lunar periodicity. They fruited or bred or came to the surface or did other quite definite things in exact correspondence with the phases of the moon. It seemed almost as though they had an almanac. Now there has come to light another fact that seems likely to explain this one.

It has been found that the kind of light called polarized light is more effective in certain of the chemical processes of life than is ordinary light. Moonlight is partly polarized. It is composed in part of this same kind of light which scientists now find peculiar in its actions on living matter. Possibly moonlight really does have a different effect on plants and animals than does sunlight decreased to the same intensity. This would explain the apparent moon knowledge of the sea worms and the sea weeds. It would restore another ancient legend of mankind to an honored place among the truths of observation.

Has Unique Privilege

One Englishman Can Keep Hat On in King's Presence

To Michael Constantine de Courcy, Baron Kingsale, belongs the unique privilege of being the only man in the United Kingdom who may, if he so elects, keep on his hat in the presence of the King of England. A hereditary prerogative granted to Sir John de Courcy in the reign of King John, for conquering Ulster, is the reason the peer enjoys this curious privilege. Historical records show the permission to have been exercised only five times, the last instance being in 1859, when John de Courcy, successor to Gerald, Lord Kinsale, stood with his head covered in the presence of Queen Victoria.

Little Helps For This Week

Verily I say unto you, whosoever shall not receive the kingdom of God as a little child, he shall not enter therein.—Mark x., 15.

Do like a child, and lean and rest
Upon thy Father's arm;
Pour out thy troubles on His breast,
And thou shalt know no harm.
Then shalt thou by His hand be brought
By ways which now thou knowest not,
Up through a well-fought fight,
To heavenly peace and light.
—Paul Gerhardt.

O Father, who are in all perfect beyond the longing of Thy children—and we are all and altogether Thine—Thou wilt make us pure and loving and free. We shall stand fearless in Thy presence, because perfect in Thy love. Oh! let the heart of a child be given to us, that we may arise from the grave of our dead selves, and die no more, but see face to face the God of the living.—George MacDonald.

Find Roman Ruins In Sussex Village

Archeologist Assisted In Excavations By College Students

Students from Oxford and Cambridge passed their spring vacation in assisting S. E. Winholt, the archeologist, in his excavations near Pulborough in Sussex. It has now been definitely established that the site of the explorations saw some 2,000 years ago a road connecting the early Roman road of State Street with the main road to London. Masses of archaic pottery have been brought to light, probably belonging to the first century A.D., and iron finger rings and funeral urns have also been discovered. A pre-Roman beehive, quern and a number of flint instruments have also been discovered.

Rockefeller Withdraws Offer

John D. Rockefeller, Jr., has cabled King Fund withdrawing his offer of a gift of $10,000,000 for the erection of a museum in Cairo. The Rockefeller offer has been attacked in Egyptian circles, and there has been a dispute over the conditions of the proposed grant.

Objects To Parole System

Prisoner's Temporary Good Behavior Does Not Warrant Freedom

Any bad man is likely to be good while he is locked up in prison. That he behaves while locked up is no reason why he should be pardoned or paroled. It needs something more than temporary good behavior to warrant the freedom of a man who has been confined by order of a judge and jury. There is some expiating to be done.—Los Angeles Times.

THOUSANDS OF THANKFUL MOTHERS

Strongly Recommend Baby's Own Tablets to Their Friends

Once a mother has used Baby's Own Tablets for her little ones she would use nothing else. The Tablets give such results that the mother has nothing but words of praise for them. Among the thousands of mothers throughout Canada who praise the Tablets is Mrs. David A. Anderson, New Glasgow, N.S., who writes:—"I have used Baby's Own Tablets for my children, and from my experience I would not be without them. I would urge every other mother of young children to keep a box of the Tablets in the house."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach; drive out constipation and indigestion; break up colds and simple fevers and make teething easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Among the good that die young in this hard-boiled age is good manners.

It is estimated that over 3,000,000 bicycles are used in Japan.
