THE CRESTON REVIEW

VOL. XXIV — CRESTON, B. C., FRIDAY, SEPTEMBER 29, 1933 — No. 27

Wynndel Fair Entries Double

Community Hall Taxed to Capacity to Hold Wonderful Display in All Lines—1200 Entries Compared with 600 in 1932.

With an entry list of 1200—double that of 1932— and with a gratifying improvement in quality of the display in all departments, Wynndel's 1933 fall fair scored an all round success considerably in advance of the highest expectations of the officers and members of the Women's Institute, who are directly responsible for the exhibition, which overtaxed the space of the Wynndel commodious community hall, in which it was staged on Wednesday, September 20th.

For the remarkable growth in the number of entries credit must be given outside exhibitors who this year, for the first time, were allowed to compete, and the response was notable, particularly in the needlework class, which displayed the handiwork of ladies at Fernie, Trail, Nelson and Creston, along with Wynndel. In the school section competition from Creston was much in evidence.

Notable improvement in quality was in evidence in the fruit, vegetable, field crops, etc., which is directly attributable to the ample water supply now available in Wynndel's irrigation system. The poultry class was also larger than a year ago.

The exhibition was officially opened by Col. Mallandaine of Creston, who congratulated the members of the Women's Institute on the success of their endeavor, stressing the point that at Nelson there had been but 1700 entries, and when this was compared with Wynndel's 1200 it certainly spoke well for the excellent exhibition spirit that pervaded Wynndel citizens generally.

Mrs. F. C. Robinson, president of the institute, thanked all who had helped make the fair a succes, and especially W. J. Cooper for his untiring effort in assisting with the placing of the enhibits. She called attention to the display of indian work collected by Mrs. Dunseath, and the linen chest, which was raffled. The chest was made by C. Hindley, all work being donated.

In connection with the fair was the tea room, which did a splendid trade, as did also the hot dog and candy stalls. The bran tub sold out in record time. The drawing took place on the electric iron; which was won by W. V. Jackson.

In addition to the natural beauty of such an ontstanding display of flowers, fruit, etc., there was an added charm in the large and well arranged display of schook work, and the more practical lines of cooking, canned goods, to say nothing of the ranch displays, and with Creston brass band dispensing lively music the crowd that thronged the main building throughout the afternoon certainly enjoyed the thrill that always accompanies the successful oldtime fair.

This year's judges were C. B. Twigg, district agriculturist, who placed the awards in flowers, fruit and vegetables: Mr. and Mrs. W. S. McAlpine, who judged the canned goods, farm products and poultry; and Mrs. C. F. Hayes and Mrs. M. J. Boyd, who had charge of the judging of cooking and needlework.

Those directly in charge of the fair were the Institute officers: Mrs. F. C. Robinson, president; Mrs. Davidge, vice-president; Miss Olga Hagen, secretary, and Miss Flo. Woods, Mrs. E. Hackett and Mrs. E. Uri, directors. While the outstanding success of the exhibition is, in itself, ample reward, the ladies have the additional satisfaction of knowing the fair passed off without a single complaint from any quarter, was a splendid success financially, has confirmed the faith Wynndel people have always had in their district, and convinced the many visitors that in horticultural endeavor as well as home makers Wynedel takes its hat off to none in this province. Complete list of prizewinners will be found on page four.

Must Control Trucks

Kimberley, B.C.
Sept. 25, 1933.

W. G. Littlejohn,
Creston, B.C.

Dear Sir,—Referen e the article in today's Nelson News with reference to tough distribution of fruit from your district.

We, as an Association, representing the principal retailers in this town and vicinity, are naturally very much interested in this matter, and would be glad to be advised what your attitude is towarding trucking; i.e., ar you going to sell to each and every trucker t at comes along, irrespective of whether he is a house-to-house peddler or whether he is merely trucking the fruit to a legitimate retailer.

We feel, and we feel rightly, that it is not giving a legitimate retailer a square deal to expect him to pay store rent, and all the attendant overhead expenses, and expect him to compete on an even basis with the peddler.

We have no quarrel with the trucker who peddles his own fruit (that is fruit actually raised by him) but we do think that it is going a little too far to have to compete with every Tom, Dick and Harry, who peddles from door to door.

Before going further into the matter we would like much to ascertain your attitude on this question, and trust to hear from you at an early date.

Yours very truly,
KIMBERLEY RETAIL MERCHANTS' ASSN.
per S. McL. Norton, Secy.

Fine Display Indian Work

An outstanding feature of the fall fair at Wynndel on Wednesday was the display of indian work which had been arranged by Mrs. T. Dunseath, most of which was from the United Church mission school, which is called the Ahousaht Indian residential school, located on the Flores Island, about half way up the west coast of Vancouver Island, to the teaching sta of which Mrs. Dunseath has lately been attached.

Everyone's attention was attracted by the c dar chts which was made by Felix Jackson, a 16-year old boy at the school, and which was displayed at Vancouver exhibition last year. The chest is made of red cedar, trimmed with yellow cedar, the wood being obtained on Flores Island and sawn at a local mill. The lid is decorated with a pair of fighting bears, whose expressions are comically lifelike. On the front of the chest may be seen a large thunderbird, the tribal emblem of these indians, a pair of wolfs' head masks, such as are used at ceremonial dances, and a spouting whale A war canoe is painted on the back of the chest, while the handles are cleverly contrived of small canoes.

It took the boy all summer holidays to carve the totem poles that are set in the four corners. These indians have no written language but tribal stories are carved into the totem poles which are thus a record of the ancient deeds and beliefs of these people.

The collection included some pretty baskets of various sizes, some very fine grass mats, bead work, a jardinere and some napkin rings. This work was done by indian women. The three baskets made of birchbark, porcupine quills and sweet grass came from indian school at Parry Sound, Ontario.

The prettiest Easter card was done by Harry Thompson, while two sunset scenes were by Jack Patrick and Roy Alexander. One of the younger boys, John Charlie, is showing a great deal of talent along this line.

Mrs. Dunseath informs that at Ahousaht the girls are given a full course in domestic science, while the boys are taught carpenter work and boat building.

Valley Backing 'Cent-a-Pound'

Following Growers Meeting on Thursday Night Valley Canvassed—Sign Up 100 Per Cent. —Selling Agencies Favorable.

The "cent a pound or on the ground" apple selling plan inaugurated in the Okanagan earlier in the month, is now 100 per cent. effective in Creston Valley, following a meeting and district canvass and sign up at Wynndel on September 16th and 17th, along with a meeting in the Gran i Theatre, Creston, on September 21st, and a two-day canvass completed on Saturday night.

Thursday night's meeting was well attended by both growers and business men, with A. F. Rudd, who was active in the Wynndel movement, requested to take the chair, and Chas. Murrell named secretary. In a brief talk Mr. Rudd told of meeting at Wynndel, followed by canvass, resulting in every grower in that section signing up. He urged similar action at Creston in order to strengthen the stabilization board in the Okanagan, which was solid behind the movement.

The Okanagan plan was outlined in an article in a Vancover daily, and then W. G Littlejohn was called upon to enlarge upon the Okanagan movement, and read a letter from W. E. Haskins, head of the movement in the Okanagan. He also read the agreement put into effect there.

A motion to adopt the Okanagan agreement produced a discussion that covered every phase of marketing, past, present and future, concluding with the naming of a committee Geo. Nickel, H. Young, W. G. Littlejohn, P. Boffey and W. J. Truscott, who conferred for about 15 minutes and submitted a resolution which, in effect said: That growers refuse to pick until selling agencies formulate marketing plan; invoices to be submitted to a stabilization board; refuse to sell to shippers who refuse to come into board; shippers to sell for not less than one cent a pound without authority of the board; no sales without sanction of the board. Prices to be the price to wholesalers f.o.b. Creston.

It was then decided to pass a list for signatnres on the understanding the list would be attached to the resolution. 60 signatures were readily secured and then canvassers were named to cover all points in the valley, as follows: Creston—P. Boffey, P. R. Truscott, L Heric. Erickson—L. Littlejohn, J. B. Holder, W. R. Young. Canyon—H. Young, J. E. VanAckeran, Jas. Turner. Alice Siding—E. Ostrensky, G. Nickel, Jas. Compton.

Representatives from Creston Co-Operatives Fruit Exchange and Long, Allan & Long were present and strongly endorsed the move, Mr. Cooper, for the former, stressing the need for eternal vigilance in handling the trucks, and that the growers see to it that apples "on the ground" stay there and not go out in trucks.

Growers amed to the stabilization board were H. Young, P. Boffey and W. G. Littlejohn, it being understood that the Exchange, Farmers' Institute and Long, Allan & Long would each name a representative, and that an independent be named chairman. After some further discussion the meeting closed, with a hearty vote of thanks to A. F. Rudd for the good work he had done in launching the movement at Creston.

On Saturday night canvassers met and reported the sign up complete, the absentees being three truckers who sell their own fruit, two of whom were out of town. The Exchange and Long, Allan & Long representatives were present and stabilization board matters, more particularly the handling of trucks, discussed.

WEDY., OCT. 4

SIX to EIGHT p.m.

Adults 50c. Children 25c

Everybody Welcome!

Selling agencies urged that tru kers should be sent to warehouses for supplies, but in view of promises made some growers by canvassers that truckers would not be interfered with provided that they paid stabilization board prices no agreement was reached.

In order to give selling agencies representation on stabilization board by each having one of its own growers on the board it was necessary to reconstruct the growers' representation as elected at Thursday night's meeting. All members retired and W. G. Littlejohn remains as for the Exchange, with J. B. Holder representing Long, Allan & Long, and the Farmers' Institute to be consulted before their member is announced.

On Monday night the three selling agencies representatives, and Messrs. Littlejohn and Holder for the growers, were in session at which a circular letter was drafted a d this has gone out to all signers of the agreement at the middle of the week. We understand the stabilization board plans to meet at least once a week—Tuesday—and oftener if necessary for the successful handling of the effort.

Arrow Creek

Ed. Cardinal was a visitor with his brother, Joe, at Kimberley, last week.

Vivian Osborne is almost completely recovered from a broken collarbone sustained some weeks ago.

New settlers continue to come into the Arrow Creek district.

W. Ramm, who has the former Eby place on lease, has completed his shipping of pears for this season, the last going out on the 21st.

Mr. and Mrs. J. H. Osborne are having a visit from his sister and family, from Manitoba.

Mr. and Mrs. Ward of Canyon are now occupying their new home at Arrow Creek.

N. P. Wilson has completed the erection of a new house, which he is now occupying.

Pastor Story of the Full Gospel Tabernacle, Creston, is meeting with considerable encouragement with the Sunday school and church services each Sabbath afternoon at the schoolhouse.

The new store and postoffice at Arrow Creek is well under way. It will be operated by Thomas Marcus, and is located about a quarter mile north of the school. Petition requesting postoffice went in some time ago and is reported as being approved at Ottawa.

Canyon City

The government road grader was at work in this section at the first of the week and has put the highway in good shape again.

Mrs. Strong, who has spent the past few months on a visit in Vancouver, has returned and is again a guest of her son, Norman.

A. D. and Miss Helen Pochin of Nelson are here at present, looking after the picking and shipping of the apple crop.

Messrs. J. Turner, J. E. VanAckeran and H. Young made quick work of signing up Canyon City 99 per cent. for the "cent a pound" marketing plan They made the rounds on Friday and Saturday.

After being on vacation for almost three months the United Church Sunday school resumed operations on Sunday last.

Canyon's flats haymakers have just about given up hope of securing a supply of feed in that quarter this season. With so much rain it is impossible to cut, and the feed that is in coll is suffering badly.

Glen Messinger is at work building a new residence to replace the one destroyed by fire late this spring. It is an "L" shape structure, with the main section 18x24 feet.

Mr. and Mrs. A. Walde and family of Fernie are here for their usual fall vacation with the latter's parents, Mr. and Mrs. J. G. Wearmouth—the twentieth year in succession they have taken this late September holiday at Canyon.

Auxiliary to Sell Poppies

The September meeting of the Women's Auxiliary of Creston Post Canadian Legion was held on September 19th in the Mallandaine hall, with the vice-president, Mrs. C. W. Lowther, in the chair. An interesting feature of the meeting was the reading of a report of the Legion convention at Victoria last month. Mrs. Gerow of Revelstoke, acted as proxy for Creston Auxiliary at this gathering. There was considerable correspondence, amongst which was a message from Mrs. Cox, thanking the women for their kindness during her stay in the hospital. By resolntion Mrs. Mallandaine was elected a life member of the auxiliary. It was arranged to have a whist drive and informal dance on October 4th in the Parish Hall, at which Col. Mallandaine will present the charter to the auxiliary, and badges to the members. Lunch will be served and there will be a charge of 35 cents per person. It was decided to take over the ordering of poppies for Armistice Day and this year the sale of these will be in charge of the auxiliary. These committees were formed: Social—Mrs. Putnam, Mrs. Johnston. Refreshments—Mrs. D. Ross, Mrs. Gardiner. Finance—Mrs. F. Knott, Miss Cannaday. The October meeting will be at the schoolhouse at Lister, with transportation provided by Legion members.

Busy Arranging Basketball Teams

High School Girls' Team Looks Likely Contender in Women's Section—Bearcats, Last Year's Winners, Almost Intact.

With weather conditions spelling the end o outdoor sports for the season, basketball enthusiasts have already commenced to make plans for the winter months. As soon as arrangements for the use of the hall have been completed an open meeting is planned, at which players will receive a report from last year's executive, and an opportunity be given them to make suggestions for the administration of this year's sport.

Entries have already commenced to come in. In the men's section a new team has entered, with H. Corrie acting as manager Centered around some of the stars of last year's Bearcats, champions of the league, it consists of the two Corrie aothers, Bill Bourdon (who played for the Groceteria last year), Bus Ross and Charlie Holmes of the old Bearcats, and Ben Crawford, a former University of Alberta star.

It seems certain that the Imperial Groceteria and the Centipedes will again be contenders for league honours.

The High School squad has also entered, with a number of new players taking the place of last year's graduates.

In the Women's section, the only entries in so far are those of the High School. The Reps., having lost Opal LaBelle and Betty Speers by graduation, will fill in their positions with Fanny Lewis and Ruth Hare, stars of the Highfliers of last year. With Mary Abbott, Agnes Crane, Nell Payne, Irene Bourdon, Molly Moore and Yvonne LaBelle, the Reps should again prove a serious obstacle to their rivals. Last year they lost one game in the whole season.

The former Highfliers have only Dorothy Palmer, Eva LaBelle aud Theo Tompkins left of last year's squad, but have filled up the gap with some of the younger players. They, too, should offer formidable opposition.

Creston Motors will again field a strong team, although its personnel has not yet been announced. At least one other team is sure to enter, and it is expected that there may be two more entries in that division as well.

Lister

Col. Fred Lister is a visitor at Nelson this week.

Dick Helme, whose headquarters is at Vancouver, was a weekend visitor here with his brothers, Harry and Jim.

Mrs. St. Denis of Canal Flats, who has been on a visit with her parents, Mr. and Mrs. J. W. Pendry, left this week on a visit with her sister Mrs. Gallagher, at West Creston.

Rev. C. Baase will be here for the usual Lutheran Church service on Sunday afternoon at 3 o'clock.

The Community Society is having its annual reorganization meeting at the schoolhouse on Thursday night, 28th. Mrs McKee is the retiring president.

Mr. and Mrs. C. H. Phillips of Kimberley were here at the weekend, making arrangements for the picking of their apple crop.

Word has reached here this week of the death at Saskatoon, Sask., of Mrs Dustan, a former resident of Lister, who left here a couple of months ago with her husband to reside in Saskatchewan, after about a year's residence at Lister.

Chas. Seeley and Roy and Clyde Huscroft arrived home at the first of the week from Claresholm, Alberta, where they have been helping with harvest work. There was a snowfall in southern Alberta on Sunday, and this was notlced as far west almost as Fernie.

The Raiders' girls softball team had a good turnout at their dance at the schoolhouse on Saturday night for which music was supplied by the Canyon orchestra, Mr. and Mrs. Kolthammer and Miss Holly Bond.

The first killing frost of the season encountered Sunday and Monday morning, on both of which occasions the mercury went to 22 above zero. The rain of Friday brought snow on the surrounding hills.

WORLD HAPPENINGS BRIEFLY TOLD

An annual license of $100 will be levied on truckers taking large quantities of produce into Calgary from British Columbia and selling direct to retailers.

Col. and Mrs. Charles Lindbergh visited the colonel's cousin in Baarby and planned to continue a flight, which may take them to Soviet Russia. Baarby is in southern Sweden.

An aerial motorcycle, which can ascend from and alight on a tennis lawn or even the flat roof of a large building, has been making trial flights at Hanworth, Middlesex, England.

Robert Augustus Chesebrough, the man who invented vaseline, is dead at the age of 96. He succumbed after a short illness. For 50 years he had manufactured the product he invented.

Spillers, Limited, has decided to close down its Calgary flour mill due to falling off of export trade during the last year, according to J. Gilchrist, of Vancouver, general manager.

After a dramatic race in response to repeated SOS calls, the London vessel, "British Hope," reached an Hungarian cargo steamer, the "Magyar," and rescued the entire crew as the ship was sinking.

One of the richest wheat producing areas of southern Alberta, the Macleod and Aldersyde districts, estimate this season's yield at about 4,000,000 bushels compared to last year's figure of 12,000,000.

Death of Sir Alexander Clegg, 85 prominent British industrialist, was reported from London England. Sir Alexander was president of Barry and Staines Linoleum (Canada) Limited, Farnham, Que.

The Toronto central presbytery of the United Church of Canada, unanimously passed a motion presented by Rev. Dr. George C. Pidgeon requesting an investigation into conditions in federal penitentiaries.

School Guide Now Available

Book On School Administration As Guide To Trustees And Teachers

Trustees, teachers and all persons concerned with education will be interested in a book entitled "School Administration" by A. H. Ball, formerly Deputy Minister of Education for Saskatchewan and N. L. Reid, Assistant Deputy Minister, just published by W. J. Gage & Co., Ltd., Toronto. The book is the result of a need long recognized by those concerned with school administration. As its name implies, it is designed as a guide for trustees, school officials and teachers. At the same time, anyone will find it a reliable source of information on all matters of school law. The authors, by reason of their experience, are familiar not only with the school law and its interpretation but with the problems of trustees, teachers and ratepayers and these are fully dealt with.

The book contains, in all, sixteen chapters on such matters as the yearly history and control of education in the North West Territories, the development of our present educational system, school organization, school elections, qualifications for trustee, duties of trustees and school officials, school support, the teacher's agreement, duties of the teacher, etc. The book discusses, by means of question and answer, definite problems of trustees, parents and teachers. There are some hundreds of such questions relating to calculation of teacher's salary, expulsion of pupils, corporal punishment, ouster of trustee, rights of ratepayers, parents and children. Over fifty of the important school cases that have been adjudicated in the courts are described.

The appendix contains the educational provisions of The British North America Act, The North West Territories Act, The Saskatchean Act and The Provincial Lands Act of 1931, as well as the development of the law relating to separate schools and religious instruction. A complete index makes it easy to look up any point. The book contains a chapter on the Aims and Objectives of the Curriculum by Dr. John S. Huff, Commissioner of Education. The volume should be found invaluable to those charged with the administration of schools. While it has been written as a Saskatchewan edition, much of its contents will apply in any school system.

You can fool some of the people all of the time, and all of the people some of the time, and the rest of the time somebody else will fool them.

There is an angling club in Surrey, England, for bachelor girls only. Now and then a member lands some poor fish and has to resign.

W. N. U. 2043

Grasshoppers!

Fall Work Which May Be Done This Year Preparatory To Next Year's Campaign

The emergency program for grasshopper control in Saskatchewan issued jointly by the Provincial and Dominion Departments of Agriculture, includes the recommendation of lines of action, which should result in very materially reducing the number of young grasshoppers hatched next spring, and so reduce the amount of labour and the cost of next year's poisoning campaign. It may be accepted with the fullest confidence that where the recommended program is fully carried through, not only will the grasshoppers be controlled with splendid effectiveness but the cost of doing so will be only a fraction of the loss which the pest will cause if no control is attempted, or only haphazard methods used.

The cultural recommendations include:

1. **Seed Only on Summerfallow,** in so far as this can possibly be done. This is especially important in heavily infested areas. Since grasshoppers do not lay their eggs in fallow land (unless it is very weedy), crop seeded on fallow requires only to be protected from invasion from adjoining roadsides or infested stubble fields. Such protection can be given readily, and cheaply, by properly using poisoned bait. The campaign will be rendered immensely less difficult and costly, and more certain, in any district where crops are sown only on fallow next spring.

2. **Complete All Seeding Early,** at least moderately so. Avoid late seeding of any kind, because during grasshopper outbreaks late crops rarely give a worthwhile yield even of hay, and merely serve as breeding places for further increase of the pest.

Oats and barley for grain, as well as the fodder and food crops, may sometimes be seeded to advantage before all of the wheat is in, rather than being left until the last.

3. **Avoid Seeding Any Stubble,** or limit it to carefully prepared land. Even if moisture is plentiful next spring, the precautions in this respect should not be relaxed in the slightest. Under conditions where the infestation in stubble is heavy and general, it is simply folly to "stubble-in" a crop on poorly-tilled land. Experience has shown that not only is it impractical if not impossible to save such crops, but also that the swarms of hoppers which develop there will devastate adjoining crops which could otherwise be saved. There is a strong probability that poisoned bait will be refused in instances where crop has been carelessly stubbled in.

Particular attention is directed to what immediately follows, as it is here, largely, that the preparatory fall cultivation will apply.

If stubble land must be seeded then do so only after proper tillage to reduce the infestation. Such tillage offers great advantage, even although there is still considerable risk when eggs are abundant. Usually, however, one or two applications of poisoned bait will save the greater part of the crop in suitably tilled land. Possible preparations for stubble land are:

(a) In moldboard-plow land, deep plowing either in the fall or the spring should be used where conditions warrant or permit; fall plowing being somewhat the more effective for grasshopper control. All moldboard plowing for this purpose should be at least 5 inches deep, well turned, using the skimmer if available, and harrowed; spring plowing should also be packed, wherever feasible. Plowing of this type will bury the eggs to sufficient depth that the majority of the newly-hatched hoppers will perish before reaching the surface. Those that do survive are so delayed that the crop gets a better start.

(b) On heavy clay or disc-plow land, where the type of plowing which can be done is neither effective for grasshopper control, nor good general practice, then extremely shallow fall tillage may be used for at least partial destruction of eggs. This should be followed by another very shallow working very early in the spring. The spike-tooth harrow is probably the best implement for this work, where it can be used, but the disc-harrow, one-way disc, or cultivator will serve if they are set as shallowly as they can possibly be operated. It is very essential that any work of this sort be extremely shallow, as the eggs occur mostly in the top half-inch of soil, and the purpose is to break-up the egg-pods or expose them on the surface.

While this practice cannot be depended upon to make heavily infested, weedy stubble safe for seeding, nor in mold-board plow soil, it should prove reasonably satisfactory for moderately infested clean stubble on heavy soil. This type of work reaches its greatest effectiveness if the fall is dry and winter open.

4. **Prevent Migration Of Hoppers From The New Summerfallow To Crops.** It is extremely important to destroy the hoppers hatching in infested stubble that is to be fallowed, and thereby prevent their migration into adjacent crop. This can be accomplished by a combination of tillage and baiting.

First: Plow deeply a guard-strip, 4 rods in width, around the outside of each field that is to be fallowed, either in mold-board or in disc plow land. **This plowing should be done this fall** both because it is more effective and to save time in the spring. In any case the plowing of the guard-strip must be completed well before the hoppers hatch, hence usually not later than May 10th in southern districts. The guard-strip must be kept black until the campaign is over.

Second: A trap-strip, 3 rods wide, consisting of land left unworked, to permit green growth, should be left around the field just inside the guard-strip. Similar strips should be left at intervals of 25 to 30 rods, running the length of the field.

The land between the trap-strips should be surface-worked or plowed so as to completely destroy all green growth, and the tillage should start at the center of each land and proceed towards the trap-strips, thereby forcing the young hoppers to migrate to the weedy traps for food. The first tillage may be done at any time until hatching is well advanced, but must be completed by early June. A second working may be needed to keep down new weed growth, which would harbor late-hatched hoppers.

Third: Poison the trap-strips as soon as they have been harrowed to the three-rod width, choosing the first morning suitable for effective baiting. Additional baitings will be necessary if the strips become heavily re-infested. It is a mistake to delay baiting too long, as the hoppers may bolt to other fields if they become too crowded in the strips, particularly as they approach maturity.

When "strip-farming" is being done it is particularly important to use the above method to protect the crop on the fallow lands. Where the lands are narrow, the plowed guard-strip around each stubble-land need only be about two-rods wide, and the other tillage may be done from the outside towards the middle of each land, leaving a single trap-strip down its center.

It will be noted that in paragraph 4-1, it is recommended that where possible, the guard-strip around next year's stubble be plowed this fall. It should be possible for every farmer to decide what land he will summerfallow next summer and to plow the guard strips this fall as recommended.

Other practices of material importance which may have a bearing on this fall's program of work include:

Fall rye, if not seeded until about the middle of September, may be used with advantage to supply spring pasturage or to be cut for hay. For these purposes it may sown with reasonable safety even on infested stubble. Since the exposed grains of fall rye are eaten very greedily by grasshoppers, however, even when the crop is in the stook, this crop is not dependable for grain during grasshopper outbreaks.

If fall rye is heavily attacked when it first comes up, bait should be used.

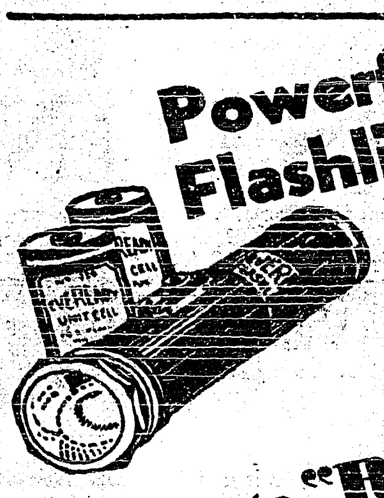
Shallow fall tillage is of value in reducing the infestation along weedy road allowances or on stubble that will later be summerfallowed. It may again be stated that this practice is not sufficiently effective to make infested land safe for seeding (with the possible exception referred to above), but it will aid in lessening chances of invasion and is worth-while doing where feasible and if it will not destroy needed fall and winter pasture. Harrowing egg-beds in sod is also useful in the same connection.

Durum and bearded wheats have apparently suffered considerably less severely than other varieties from the effects of grasshopper attacks at the time the crop is ripening, and Marquis apparently less than Reward. This information may be utilized where seed is available.

This article is drawn up entirely with a view to its effect on farming operations during the balance of the open season this year, and is not the final word on this subject. Further information will be published from time to time, and it is the intention to endeavour to hold meetings in as many school houses as possible, in the severely infested areas during the coming winter.

Farmers should consult with their municipal councils who will be kept advised of developments.

The full "Emergency Program For Grasshopper Control In Saskatchewan" may be procured from: K. M. King, Esq., Entomologist in Charge, Dominion Entomological Laboratory, University of Saskatchewan, Saskatoon, Saskatchewan, or S. H. Vigor, Esq., Field Crops Commissioner, Department of Agriculture, Regina, Saskatchewan.



Powerful Flashlight FREE for POKER HANDS!

ONLY Four complete sets of poker hands will secure you this handy flashlight (complete with batteries). Useful in the car or in the house and but one of the many valuable gifts given in exchange for Turret Poker Hands.

It pays to "Roll Your Own" with TURRET FINE CUT CIGARETTE TOBACCO

Sun ripened mellowness... rich aroma... extra satisfying flavour. That's the Quality you want in cigarette tobacco and that's the Quality you get in every package of Turret Fine Cut. And there's genuine economy too. You can roll at least 50 cigarettes from a 20¢ package.

Civil Service Association

Fusion Of All Employees Connected With Service In Canada

The Montreal Herald says: "A fusion of all employees' associations connected with the civil service of Canada is now taking place and in time it is hoped to have one large central body that will look after interests of all the members.

"Among the associations that will form part of the new association are the Union of Postmen, Amalgamated Civil Service Association, and many others.

The new organization will take the name of the United Association of Civil Service employees and one of the principal objects in view is re-establishment of salaries that were in force before the depression.

"Organization of the central body, and steps taken to get everybody lined up as members, are going ahead rapidly in Winnipeg, Vancouver, Regina, Ottawa, Quebec, Toronto and in Montreal as well as other centres."

Fighting Cancer Menace

Ultra-Violet Light Can Readily Detect Malignant Growth

Even the most minute growth of cancer can be detected readily by the yellow glow it emits under ultra-violet light, Dr. Disraeli Kobak, of Chicago reported to the American Congress of Physical Therapy.

He voiced a hope that through the ultra-violet agency cancer's deadliness may be minimized—first by surer diagnosis in its early stages, then by assurance, upon surgical operation, that every vestige of the cancerous tissue has been removed.

Dr. Kobak, an editor, and member of the Cook County Hospital staff, explained that any substance submitted to ultra-violet rays gives off its own peculiar fluorescent light. Cancerous tissue emits a ghostly yellow glow, instantly distinguishing it from the normal tissue surrounding it and from the benign tumors, which glow in other colors.

Alberta Scholarships

High school students of Calgary, Medicine Hat and Claresholm won the three scholarships granted by University of Alberta annually to students having the highest standing in the examination covering 21 units of university matriculation examinations. They were Miss Bercov, Calgary; Melvin Donald, Medicine Hat; and Gordon L. Burton, Claresholm. The scholarships provide for three years' tuition and student union fees.

Employment in Australia is 25 per cent. greater than a year ago.

A new 100 lire air mail stamp is to be issued in Italy.

SUNDAY SCHOOL LESSON

THE LIFE OF PAUL

Golden Text: "Give diligence to present thyself approved unto God, a workman that needeth not to be ashamed, handling aright the word of truth."—2 Timothy 2:15.

Lesson: Acts 21:39; 22:3, 27, 28; 26:4-7; Philippians 3:3-6.

Devotional Reading: Psalm 119:9-16.

Explanations and Comments

Paul's Training For Leadership. — The personality of his parents and the atmosphere of his home were among the most potent educative factors in his early life. Long after he had left his home the fundamental principles of domestic education remained stamped in his consciousness.

First and foremost of these principles was the duty and responsibility of parents. Parents ruled by "divine right." The mother kept the home. The chief responsibility for the education of the children fell upon the father as head of the household. On the other hand, the first duty of children was to honor and obey their parents absolutely.

Life in the Hebrew home was a series of object-lessons. Each symbol, ceremony, and festival in family observance exerted an educative influence. The great reservoir of the child's consciousness was stirred at the turn of every event. The order of instruction followed the order of events. Interest and attention was aroused by an appeal to the child's curiosity. The Mesusah, the unusual rites and utter change of food at Passover, the removal of the family to a tent during the Feast of Tabernacles, the candles at the Feast of Dedication, the good cheer and boisterous merriment at Purim, all called forth innumerable questions. The parents, seizing this moment of excited curiosity, imparted that knowledge to the child which was so dear to themselves; the origin of each festival, the meaning of each symbol and ceremony, as the case might be, in the history and religion of their race.

The process of retailing these traditions in story, by word of mouth, accompanied by all the added expressions of the parent's personality, stirred the child's imagination and satisfied his credulity. His whole being was made to glow with loyalty and pride in the traditions of their race.

What a rich and varied influence the Hebrew school system exerted upon the sons of Israel! The ideal teacher, then as now, had a high standard set for him. He must be pleasant, prudent, wise, learned, well read, thoughtful; he must have a good memory; he must know how to frame questions, and answer readily and correctly; he must be open-minded, humble, open-hearted, and practical.

Made Bad Guess

Bad guess was made by an insurance company when it refused a life policy to Mr. M. Cummins, of West Ealing, London, sixty years ago. He and his wife have just celebrated their golden wedding.

Sound Carries In Arctic

In the Arctic regions people can talk to one another quite well when they are as much as a mile apart—the cold, dense air, and the smooth surface of the ice and snow both being helpful to the carrying of sound.

Whether ivy poisoning ever causes death is a question which doctors have not settled.

OCCASIONAL WIFE

By

EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful, falls in love with Peter Anson, fellow student in an art school. She is the adopted daughter of a wealthy family, and he is a poor, struggling sculptor. On their first date Peter spends most of his money to show Camilla a good time, and then decides he must give her up because he cannot stand the financial pace. A chance meeting, however, paves the way for another date. This time they walk in the park. Camilla tells Peter that she is not rich; or, at least, will not inherit the Hoyt fortune. Peter in turn confesses he is practically penniless. They fall into each other's arms. Together, in the park, Peter and Camilla try to arrive at some plan for the future. Mrs. Hoyt, Camilla's foster mother, suspects from Camilla's actions that a romance is brewing. She is anxious to see Camilla wed wealtth.

(Now Go On With The Story)

CHAPTER X.

It was not long after Camilla knew that "Pa" Lorenz was her father that he had been killed in an accident at the foundry, thus taking him out of her life almost as soon as he had entered it. The industrial insurance had saved the family's humble home and with three or four of the children working all the time and living at home, Mrs. Lorenz managed a thrifty existence.

She rather gloried in her newly acquired authority and independence, only partially assumed by young Henry, who had taken his father's place in the shop. He was a subforeman now, and more popular than his father had been. He carried none of his antagonism and resentment of inferiority. He was the readjusted young American. The Lorenzes lived in a section built up of thrifty laboring home owners, where women who had toiled mercilessly in European fields now used electric washers and vacuum cleaners, and found time to chat over back fences and linger for delicious bits of gossip on the street to and from the market.

Their faces grew brighter and their accents less pronounced, as their figures grew more shapeless and their clothes less shabby. Patches of lawn and clipped hedges added dignity to the rows of frame houses that had been built from one blue-print, while flowers and vegetables flourished in the back yards for beauty and economy. Pungent, spicy odors were wafted from open doors and windows to the four winds, and children laughed and cried and played ball in the streets.

Such was the environment that Camilla learned was hers by right of birth; but however hard she might try, she knew that she never could adopt it for her own again. There were times when she wished devoutly that she had not been selected from that wilderness as a rare flower, to be transplanted in the sheltered atmosphere of the conservatory. But her studies at National had dissipated that notion, and her meeting with Peter had totally dismissed it. That was why her sudden change of attitude aroused Mrs. Hoyt's curiosity as to the cause.

No opportunity to follow up her suspicions escaped her vigilant eye. She went into Camilla's rooms often after dinner, especially if Camilla were dressing to go out anywhere. Such circumstances inspire women's confidences. She displayed a growing interest in seeing that Camilla looked just right.

"You seem to be happier of late," she suggested pleasantly, one evening.

"Am I?" asked Camilla. "Yes, perhaps I am. School will be out soon."

"Are you so tired of studying?" hopefully.

"Oh, no. Just anxious for September and the beginning of real work," she replied easily, letting a cloud of rose-tinted suede lace fall over her head and shimmer into folds around her mesh-clad ankles.

For one thing, Camilla rejoiced in spite of her resentment over her false position as Camilla Hoyt—that her wealth provided her with beautiful clothes just now when she wished to appear her loveliest in Peter's eyes. Of course, he would love her just the same if she wore rags—or a shawl—she told herself. Every woman believes in that supposition, but she never dares to put it to the test. A misplaced lock of hair, a shiny nose, an unbecoming gown— she lives in a continual dread of her lover's discovery of these mars to whatever beauty is hers.

"We're walking—it's only across the park."

"May I ask where you are going this evening?" Mrs. Hoyt continued casually.

"The art school classes are having a dance in the auditorium."

"Oh! Is someone taking you?"

"One of the students," Camilla replied easily, but her heart beat furiously at the mere thought of Peter.

"Do I know him?" Family introductions and long acquaintances were of paramount importance in Mrs. Hoyt's social world.

"I don't think so. His name is Anson—a senior."

"Queer name, it sounds—Swedish."

"Is it? I suppose it is. All I know is that he is one of the honor students."

"Is his family—er—prominent?" Camilla knew that was the next item on the questionnaire.

"You mean, has he money? I don't know. It makes no difference whether he has or not, at a school dance. Class dues pay the expenses." She knew what Amelia Hoyt implied, but she maintained a guileless innocence.

Mrs. Hoyt changed her attack. "From the way you are dressing, I thought you were going somewhere important. That is a new frock."

"Yes, do you mind my wearing it?" sweetly.

"No, indeed. You look very lovely, my dear," she assured her hastily. "I should like to meet your friend when he calls for you."

Camilla thought, "She will have to meet him sometime. I can't see him all summer and prevent it. She might even like Peter. I don't see how she could help herself." Aloud, she replied, "If you wish."

Peter looked his best in evening clothes, as all handsome men do and all plain men do not. Camilla was delighted that Mrs. Hoyt seemed to be impressed favorably with him. Of course, her attitude could make little difference in their lives. So far as Camilla was concerned, Mrs. Hoyt had nothing to do with their future. Her own plans had provided for that. Only her approval of Peter would make the summer less difficult when she discovered that Camilla was seeing him often. She would dominate Camilla until the day she left her house, however, independent she might try to be.

"Camilla tells me you are one of the best students at National," Mrs. Hoyt began in the subtle manner which Camilla had learned was the first item in the long questionnaire of character, history, ancestry, social status and financial rating.

Peter was modest. "That may be, but Miss Hoyt only tells nice things about everyone."

"Oh, have you known her for long?"

"Only since I went into Professor Drake's class as a critic."

"A critic?"

"Yes, I had taken his work two years ago. I wanted to find out if I had improved any," his smile was charming, and included Camilla.

She moved toward the hall anxious to escape the rest of the list of questions. "We are late, now, Mr. Anson. I think we had better be going."

Mrs. Hoyt followed them to the door. "Your car—where it is?" She exclaimed with alarm, as if she thought it must have been stolen, when she saw none waiting outside.

"We're walking. It's only across the park," said Camilla, "and Mr. Anson lives near. I insisted that he shouldn't bring a car."

"That's ridiculous, Camilla." She turned to Peter. "You must not humor her queer notions, Mr. Anson."

"I like the walk myself," Peter defended her, bowing a courteous goodnight. "I promise not to keep her out late, Mrs. Hoyt."

"That was sweet of you to let me out about that car," he told Camilla, taking her hand possessively and drawing it through his arm as they walked along the gravel path beside the lagoon. "But that's just it, Camilla. Always, you will have to apologize for me and defend me—"

"Peter! Not always!" she reproached him, stopping suddenly in the path to emphasize her words. "Some day I shall be so proud of you that I shall have to protect you from the admiring throngs."

"But that is so far away, dear. The apologies will come first. I'm just afraid that you will get weary of the prologue and won't want to go on with the story—if there is one.'

"Is that all the faith you have in me, Peter?" she asked sadly.

He was instantly contrite. "Forgive me, darling. I do believe in you, but sometimes I don't dare to trust myself. You are so wonderful. I can't believe it's all true—your loving me like this, you know."

DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-spotted.

"I was heartsick until the happy thought struck me to dye them. I just dyed them a deeper green, and as I used Diamond Dyes they look gorgeous and new. I have never seen easier dyes to use than Diamond Dyes. They give the most beautiful colors—when used either for tinting or dyeing—and never take the life out of cloth as other dyes do."

MRS. J.F.T., Montreal.

Making Liners Cooler

Cunard Company Finds White Paint Reduces Temperature Many Degrees

The Cunard Line has announced that the "Mauretania" had been so well received as an all-white cruising liner that they have decided to paint the liner "Franconia" white before the beginning of her world cruise next January.

H. P. Borer, general passenger manager of the line, said that engineers of the "Mauretania" had reported to him on a series of scientific observations taken on the "Mauretania" during cruises to the West Indies. They took similar readings last year on identical cruises and have reported that the liner is from seven to nine degrees cooler in her white dress.

"I didn't believe it at first," Mr. Borer said, "and thought it as just a stunt. But they produced the figures and scientific data to show that a white ship must be cooler thana black one. So I capitulated."

The "Mauretania," still one of the swiftest liners afloat despite her age of more than a quarter of a century, has proved popular in the cruises trade. On September 27 the ship will be sent to England for a month for reconditioning. In November the liner will be back again for a series of cruises to last until April.

THE RHYMING OPTIMIST

By Aline Michaelis

THE FADED TAPESTRY

Her life is like a faded tapestry
Whose colors have grown paler with the years;
Of every one-time vivid flower and tree
The shadow only, dim and vague, appears.
Day after day has shed its rays thereon
And the caresses of those golden beams
A part of sapphire, rose and jade have won;
The picture now as pale as moonlight gleams.

A faded tapestry, which takes from time
An added beauty as the seasons go;
So softened, rendered mystic and sublime
With loveliness no crude, new thing can show,
We see her life grown fairer at the end,
Which glamour years, and years alone, can lend.

Changed Into Land Animals

Royal College Of Surgeons Experimented With Mexican Fish

Fish have been changed into land animals by members of the Royal College of Surgeons, in London, England.

The fish selected for the experiment were Mexican salamanders, which normally spend their lives in water.

They were fed with thyroid gland and a month later the gills and tailfin had completely disappeared, eyelids developed—and the salamanders struggled from their tank on to the shore.

NERVOUS WOMEN
Take Lydia E. Pinkham's Vegetable Compound
"I am so nervous it seems as though I should fly" . . . "My nerves are all on edge" . . . "I wish I were dead" . . . how often have we heard these expressions from some woman who has become so tired and run-down that her nerves can no longer stand the strain.
No woman should allow herself to drift into this condition if she can help herself. She should give Lydia E. Pinkham's Vegetable Compound a trial. For nearly sixty years women have taken this wonderful tonic to give them renewed strength and vigor.
98 out of every 100 women who report to us say that they are benefited by this medicine. Buy a bottle from your druggist today . . . and watch the results.

Use ST. CHARLES MILK
and your pies, puddings and desserts will have a new delicious melt-in-your-mouth flavor. Try it for creaming soups and for vegetables, in fact whenever a recipe calls for milk. It makes all good cooking BETTER!

Little Helps For This Week

"If we love one another God dwelleth in us, and His love is perfected in us."—1 John 4:12.

"And he that keepeth His commandments dwelleth in Him, and He in him. And hereby we know He abideth in us by the Spirit He hath given us."—1 John 3:24.

Abide in me; o'ershadow by Thy love
Each half-formed purpose and dark thought of sin;
Quench ere it rise each selfish, low desire,
And keep my soul as Thine, calm and divine.

The spirit of love must speak the words and work the works of love. It cannot exist and give no sign, or a false sign. It cannot be a spirit of love, and mantle into irritable and selfish impatience. It cannot be a spirit of love, and at the same time make self the prominent object. It cannot rejoice to lend itself to the happiness of others and at the same time be seeking its own. It cannot be generous, and envious. It cannot be sympathizing, and unseemly, self-forgetful and vain-glorious. It cannot delight in the rectitude and purity of other hearts, and yet unnecessarily suspect them.—J. H. Thom.

Has Slim Chance Now

If Motor Cars Speeded Up Pedestrian Will Have Hard Time

The pedestrian has a hard enough time as it is; he must hop quickly with a car coming dead at him at 40 miles per hour: If the speed of the car were stepped up to 125 miles per hour he would have no chance whatever. If he stood still he would be struck so hard that identification would be difficult; if he jumped with sufficient agility to escape he would have to strain his back and injure his arches for life. The extent of the jump which he makes today would be a futile gesture. The leap which would deliver him from a car speeding at 40 miles per hour would be of no use whatever when pitted as a safety measure against one speeding 125 miles an hour.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED
Wake up your Liver Bile
—No Calomel necessary
For you to feel healthy and happy, your liver must pour two pounds of liquid bile into your bowels, every day. Without that bile, trouble starts. Poor digestion. Slow elimination. Poisons in the body. General wretchedness.
How can you expect to clear up a situation like this completely with mere bowel-moving salts, oil, mineral water, laxative candy or chewing gum, or roughage? They don't wake up your liver.
You need Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure results. Ask for them by name. Refuse substitutes. 25c. at all druggists.

"My telephone does so much for me"

"I would not want to be without my telephone," said Mrs. Partridge. "It does so much for me. It runs errands for me—a telephone call brings things from the store when I don't want to go myself. My friends are widely scattered, but my telephone, at a moments notice, brings them to me for a chat. And believe me, it's quite comforting to know that there's a telephone handy in case of sudden illness. fire or burglary."

LAND REGISTRY ACT

(Section 160)

IN THE MATTER OF Parcel "B," Block 13, of Lot 812, Plan 730-A, (D.D. 6107 1).

Proof having been filed in my office of the loss of Certificate of Title No. 6107-1 to the above mentioned lands in the name of John Herbert Gobbett, and bearing date the 22nd September, 1919. I HEREBY GIVE NOTICE of my intention, at the expiration of one calendar month from the first publicatio hereof to issue to the said John Herbert Gobbett a Provsional Certificate of Title in lieu of such lost Certificate.

Any person having any information with reference to such lost Certsficate of Title is requested to communicate with he undersigned

DATED AT NELSON, B.C., this 26th day of September, A.D. 1933.

A. W. IDIENS, Registrar.

Date of first publication, Sept. 29, 1933.

FORM No. 13.
(Section 39.)

LAND ACT

Notice of Intention to Apply to Purchase Land

In the Nelson Land Recording District of West Kootenay and situate on west side of Slocan River, at Shoreacres, B.C.

TAKE NOTICE that Wm. J. G. Oliver of Shoreacres, B.C.; occupation, rancher; intends to apply ror permission to purchase the following described lands: Commencing at a post planted on west side of Slocan River on the line between D.L. 302A and D.L. 303 about six chains east of the north-west corner of S L. 2 of D.L. 302A; thence 20 chains west; thence 20 chains north; thence 25 chains more or less east; thence south following west bank of Slocan River to post of commencement; and containing 40 acres more or less

WILLIAM J. G. OLIVER,
Dated August 7, 1933. Applicant.

AT THE HOSPITAL

Mrs. O. Parry, is improving.

Birth—On September 21st, to Mr. and Mrs. D. H. Putnam, a son.

Charles Kuhn of Boswell is undergoing treatment.

Mrs. J. C. Ink of Crawford Bay is a patient this week.

Geo. Faulds of Kitchener relief camp is a patient.

O. Pratt is improving.

Mrs. Chas. Hindley of Wynndel was a patient for a day.

Albert Sherwood was able to leave on Saturday, much improved.

Trinity S.S. Rally Day

Trinity United Sunday School rally day exercises were held on Sunday morning. A good turnout of parents and scholars aided materially in the presentation of the service, the theme of which was "Serving Jesus Today." The beginners and primary classes, under the leadership of Misses Edith Cook and Florence Connell, gave a chorus song, "In the Early Morning," in which the youngsters excelled themselves. A groug recitation, "What can a Little Chap Do," (Oxenham) was creditably given by seven of the intermediate class boys in J. A. Avery's care. The story, "Truly Brothers," given by Miss Cook, was closely followed by the juniors, particularly. With Miss Jean Avery at the orgaa the hymns were heartily sung. The musical setting of the Lord's Prayer was used, following the responsive readings snd prayers. The superintendent, W. J. Truscott. presented "The Way of Ko Sen," a story with a Chinese setting, followed by a short talk on "A Local Church Enterprise," in which the speaker indicated the place of the Sunday school in the community, with its manifold and far-reaching activities. The service included the promotions for the year, with the prize giving for attendance to be conducte l at an early date, which will be announced.

Erickson

Peter Heric was a Fernie visitor at the weekend.

Robert and Otto McMaster of Cranbrook were visitors for a few days at the first of the week.

Ray Crisler is back from a business visit at Vancouver.

Several from here were at Wynndel for the fall fair on Wednesday last. W. V. Jackson had the lucky ticket on the raffle of an electric iron.

It is understood that T. J. Marcus has secured the contract of carrying mail from Creston to Arrow Creek, where a postoffice will be opened in October.

Mrs. W. V. Jackson had considerable success with her entries at the Wynndel fair making a particularly good showing in canned goods, with firsts on pears, cherries and tomato iuice.

Erickson schooi children had some entries at the school fair at Creston on Saturday, towards which the board made a granc of $5. In keen competition Margaret Bundy won second for map of South America.

The continual rainy weather is holding up apple picking. As yet the Macs are not all harvested.

Messrs. J. B. Holder, L. Littlejohn and W. R. Long were through here on Friday and Saturday getting signatures to the agreement to sell apples on the "cent a pound" deal, which was organized at Creston on Thursday.

Wynndel

Mr. and Mrs. G. McInnis and Mary were auto visitors at Nelson last week, for the fall fair.

A special meeting of the Women's Institute is called for Thursday, 28th, to close fall fair business, and if possible hold the drawing for linen chest.

Sid. Rogers of Sirdar has been in charge of the senior room at the school for the past two weeks, due the i disposition of Principal McGregor.

Haying has been completely held up with so much wet weather. It is very doubtful if much feed will be harvested this year. The road on the slough is in bad shape, cars cannot cross the mudholes.

Friday morning a fierce wind struck this section and did quite a bit of damage, breaking young trees and scattering apples and other unpicked fruit.

Old man winter is making an early appearance. Following Saturday's rain snow was in evidence far down the mountain side on Sunday, and is still there.

The home of Mrs. Matt. Hagen, on Friday afternoon, was the scene of a farewell and surprise party for Mrs. F. C. Robinson, president of the Women's Institute, who leaves shortly to make her home in Nelson. Mrs. R. C. Eakin, on behalf of the members, presented Mrs. Robinson with a pendant, as a slight token of their appreciation of what she has accomplished since taking the office of president about 21 months ago, and expressing the regret all feel in the loss her removal will cause. In replying Mrs. Robinson thanked the members for their co-operation, and even though in Nelson she would help in any way possible, and hoped progress will still continue as there was a deserving objective in view—the furnishing of a ward in Creston hospital, a splendid start having already been made. Tea was served by the committee in charge. Those present were Mesdames P. Hagen, R. C. Eakin, A Benedetti, M. Wigen, T. Slingsby, M. Hagen, V. Johnson, Moon, Hackett, Davidge, E. Uri, R. Andestad, D. Butterfield, C. Gregory, A. Glasier, J G. Abbott, E. Towson, C. D. Oglivie, W. J. Cooper, E Wall, R. Clarke, and Misses D. Butterfield, S. Benedetti, O. Hagen, D. Moon, and the guest of honor, Mrs. Robinson.

Kitchener

Mrs. B. Johnson and son, Robert, were Nelson visitors a few days last week, taking in the fall fair in that city. They returned on Friday accompanied by Mr. Johnson, who had been holidaying for a couple of weeks in that section.

Miss Olga Nelson returned last week from Spokane, where she had been on a visit.

Ted and Niles Bush of Kellogg, Idaho, were here at the weekend on a visit with friends.

F. Pym of Cranbrook, district forester, arrived on Monday on a business visit.

Homer Geroux and Clive Bateman of Moyie were visiting friends here on Monday.

Miss Jessie White, principal of the public school, spent the weekend on a visit with friends at Creston.

There was a dance at Hunt's Hall on Friday night with music by Walde's orchestra, and a very fine midnight lunch.

The first snow of the season arrived on Saturday morning, and the mountain is still covered. This was followed by a heavy frost on Monday night.

Sunday morning Kitchener Sunday school was organized at a quite well attended meeting at the schoolhouse. The following are the teachers and officers: Rev. F. G. M. Story, superintendent; Mrs. Perkins, senior class teacher; Mrs. Abar, junior class teacher; Mrs. G. A. Hunt and Miss Clara Hunt, assistant teachers; Mrs. Molander, superintendent of cradle roll department; Mrs. Bialr, organist; Frank Abar, secretary-treasurer. Sunday school will meet each Sunday at the schoolhouse immediately before the church service (at 10.30), with church service at 11.15 a.m. Mr. Story's subject will be the "Beast Vision of Daniel," and will be illustrated by a large drawing

Sirdar

Misses Rosie and Annie Pascuzzo were visitors at the home of Mr. and Mrs. VanAckeran, at Canyon, during the week.

J. Harlow and Chas. Wilson were business visitors at Camp Lister on Saturday.

Fishing is good at present. Several fiue bass have been caught in the best of condition.

Mrs. Genest of Nelson was a visitor at the Pascuzzo ranch on Sunday.

The water guage at Slough bridge reads 3.50, a fall of 0.45 for the week. Despite the heavy rains the fall has been steady.

Sanca mines are at present erecting bunk and other outhouses at the mines for the convenience of the workmen.

The Associated Fruit Growers of Boswell shipped a car of Gravenstein apples from the quarry siding, Atbara. This car was for Calgary.

Mr. Leshaw and party were hunting in the vicinity at the end of the week.

W. Cartwrighc, game warden, was a business visitor to Sirdar and vicinity.

Haymaking is still held up and there is a very scant chance of any hay being got here this year.

Local fruit growers are busy shipping, mostly in small lots so far. The crop especially in quality, is very good.

Hunters report a large influz of both geese and ducks with the result that bags are considerably larger than last week The newcomers are very wild and hard to get.

Mr. and Mrs. John Harlow and little daughter, who have been the guests of Mr. and Mrs. J. S. Wilson, have left for their home in Nelson after a two weeks vacation here.

The road grader is at work grading between the camp and Kuskanook. With so much moisture the grader seems to do a much better iob than in the drier times, and a splendid surface is the result.

The presence of the new game warden, along with the publicity as published in the Review, seems to have had a good effect and the ethics of sportsmanship is being exercised on a higher plane than in the past.

Miss Rosie Pascuzzo entertained at the tea hour on Wednesday her invited guests were Mrs. John Harlow of Nelson, Mrs. J. Pascuzzo, Mrs. J. S. Wilson, Mrs. Colombo, Miss Margaret Rogers and Mrs. Martello.

The earliest snow experienced in this district for a considerable number of years fell on the 19th, and again on the 24th, both Sugarloaf and Mount McGregor being coated to a very low level. This, together with the unusually loud honking of the geese, indicates an early winter, according to several old timers.

OUR K.B.O. BROADCAST

Bonners Ferry high school has 262 students already enrolled. A year ago the number was 251.

Invermere's 23rd annual fall fair this year had 735 entries and the attendance was the best ever.

Bonners Ferry 9-o'clock curfew is again operating after being discontinued for the summer months.

At Bonners Ferry the village tax rate this year is 18 mills. This does not include the school levy.

Cougar are again so numerous in the Kootenays that a bounty of $10 a head will be paid this season.

Almost 200 pioneers sat down to the banquet of Rossland Old-timer's Association Labor Day evening.

For the first time in several months there were no prisoners in Bonners Ferry jails a few days last week.

Bonners Ferry hunters regret that the open season on grouse and pheasants will last but two weeks—October 1st to 15th. The duck season does not open till October 16th.

For August no births were officially recorded at Nakusp, with but one death and one marriage license issued.

Highest aggregate score for creamery butter at the Vancouver exhibition last week was made by Vernon creamery.

To the end of August 66 per cent. of 1933 taxes are paid at Salmon Arm. A year ago payments were 70 per cent.

Shipments of ore to the smelter at Trail for the past four months show an increase of about 15 per cent. as compared with 1932.

The Free Press states that assurance has been received at Fernie that $5 per child will be paid by the government for shoes to enable needy children to attend school.

Men Make The State

Picking up a copy of the Moose Jaw Times the other day, the writer's attention was drawn to an article entitled "Men Make Cities" which opened by quoting the following inspirational lines of an unknown poet taken from the September issue of The Rotarian:

Cities are what men make them,
What men demand they shall be;
Slothful, sloven, and sleeping,
Progressive, beautiful, free.
If the hearts of the builders are noble,
In one with the day and the need,
They will build into grandeur and greatness,
For so it was decreed.

These lines, it is stated, were inspired by the achievement of Atchison, Kansas, as told by Ed. W. Howe, editor of the Atchison Daily Globe. Atchison is one of the smaller cities, but in twelve years it has evolved from a bankrupt, tax-broke city,—"slothful, sloven and sleeping,"—into one that is "progressive, beautiful, free," with its bonded debt cut 70 per cent. and even while this fine record was being made its tax rate was reduced by 35 per cent.

"How was it done? In 1920 a group of citizens, noting the seriousness of the situation, started a movement to save the city, a new idea took hold of the administration, expenses were cut, and plans formulated to enable the taxpayers to handle the load and reduce the bonded debt and the overhead, and the creditable record was not interrupted through three years of the hardest times ever known, largely because lost courage and confidence was restored.

The Rotarian magazine tells the story in an editorial challenge to Rotarians in every city to be up and doing for the welfare of their home town,—to study its problems and to act. The Moose Jaw Times applies it directly to its own city and declares the challenge comes at this time not only to Rotarians but to every member of every service club of Moose Jaw.

The writer of this column in passing the story along would make bold to still further enlarge the field of its application from city or town to the citizenship of every community, large or small, because it is just as true that men,—and women,—make rural communities and little villages as it is that they make cities. It is also true that in these days our rural communities, hamlets and villages are confronted with problems, which, considering their population and resources, are just as heavy and serious as those of the larger cities,—perhaps even more so.

Furthermore, because of the very nature and extent of the world-wide depression which has developed, all communities, large and small, find themselves much in the same position. One cannot in their emergency turn to another because all are adversely affected, and while the willingness to assist may be there the ability to do so is lacking. So communities are thrown back on their resources to a greater extent than formerly.

Again, this has resulted in much purely voluntary work by individuals and organizations being restricted, leading to both individuals and communities turning to and relying upon the State to take over and assume their problems. The net result is a weakening of the morale of the individual, a loss of courage and confidence, the development of habits of slothfulness, and a deterioration of initiative and enterprise. Instead of men adhering to the truth that they make cities and nations, thousands are adopting the false theory that cities and nations make men, and that, instead of it being the duty and responsibility of men to order their lives and make their communities, it is the duty and responsibility of the State to order the lives and control the actions and destinies of the individual, thus reversing the order of the citizens controlling and directing the State.

Observant men and women are more and more coming to the view that the time has arrived to call a halt to this increasing reliance upon the State, and to renewed belief in the truth that, like the citizens of Atchison, Kansas,, they must save themselves and their city by action on their own part; that instead of allowing their difficulties and problems to swamp and overcome them, they must overcome their problems and surmount their difficulties. It can be done. It has been done times without number by individuals and communities in the past.

Indeed, if it is not done both the individual and the community, large or small, faces ultimate disaster. The individual will find himself submerged and his individuality largely gone, while the community will end up in complete bankruptcy and the loss of its local freedom and autonomy.

On the other hand, if the men,—and women,—of a community, be it a small village or a large city, bestir themselves, face and study their problems, and proceed to grapple with them one by one, they will be surprised how much they can accomplish. It will mean the abandonment of existing policies of drifting with the adverse tides. It will mean the lopping off of this expenditure and that; it will mean the application of the most rigid economy in all public administration; it will involve a more active participation by the individual citizen in effecting community savings; it will necessitate community sacrifices for a time just as thousands of individuals have had to make individual sacrifices. But it will mean ultimate success both for the community and the individuals who constitute and make the community.

In a word, it means a return to the proper and sound conception,—that men make cities, not cities make men. And in using the term cities the application is to all organized communities whether rural or urban, large or small.

South Shields, England, is building 142 houses for the aged.

A solution of bicarbonate of soda will make an excellent white ink.

Any Looseness of the Bowels Is Always Dangerous

When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the discharges checked before they become serious.

To check these unnatural discharges there is a remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 88 years. It is rapid, reliable and effective in its action. A few doses is generally all that is required to give relief.

Get it at your drug or general store; put up only by The T. Milburn Co., Limited, Toronto, Ont.

British Railway Regulation

No-Smoking Order In Compartments To Be Enforced

In future all passenger coaches on the London, Midland and Scottish Railway will bear a distinctive label, "smoking" or non-smoking." About 19,000 vehicles, with a seating capacity of more than 1,000,000 will have to be dealt with. Probably a year will elapse before the change-over is complete.

"We have had many complaints," said an official, "about people smoking in non-smoking compartments. They take the view that as smoking is not definitely forbidden they may smoke if they wish to do so. When the new labels are affixed on one will be allowed to smoke in a non-smoking compartment, even if other passengers say they have no objection. Smoking is allowed in 75 per cent. of the coaches and it is not proposed to alter that propotion."

Other railway lines in the United Kingdom have carriages labelled in various ways, meant to indicate they are either for smokers or non-smokers.

CAST OFF UGLY FAT

Woman Loses 28 lbs. in 3 Months

"Three months ago," a woman writes, "I was persuaded to try Kruschen Salts to reduce my weight, which was 222 lbs. I had tried other things, but all to no avail. Now I know that Kruschen Salts are different. In three weeks I lost 5 lbs., and I felt five years younger. I really must say I feel a different woman. I have now lost 28 lbs. to date." —(Mrs.) S.G.B.

If you are overweight take one half-teaspoonful of Kruschen Salts in a glass of hot water before breakfast every morning. There will be no rapid or alarming loss of weight, but just a steady decrease of that flabby fat which is as unhealthy as it is unsightly. Kruschen is a scientific blend of six mineral salts found in the waters of those European spas that have been used by generations of overstout people to reduce weight.

Rising Tide Of Fascism

Warning Is Sounded By Secretary Of Workers' League

Warning against the "rising tide of Fascism," as exemplified by the Blue Shirts of Canada, was sounded by J. C. Wilson, of Winnipeg, National Secretary of the Workers' League, at an open meeting of returned soldiers at Windsor, Ont.

"I understand the slogan of the Blue Shirts is 'Join us and get a job,' but that does not amount to a hill of beans," Mr. Wilson said. "In Winnipeg we formed the Old Contemptibles and had the same slogan. The only job offered us was police duty during trouble, a job now filled by 62 members of the Canadian Legion.

"There is no job for them except as storm troops for a Fascist government. That is their role, the same role as Fascists in Vancouver, strong-arm squad of Winnipeg, and Steel Helmets of Montreal.

"The time has come when you, as your economic needs, as the only affiliations, must unite and fight for your economic needs ,as the only effective weapon to combat the rising tide of Fascism and possible war in six months."

Pains After Eating? Try This!

Pains after eating are generally due to an excess of acid in the stomach that forms gas and causes belching, heart burn, bloating; sour stomach and indigestion. Bisurated Magnesia taken after meals will give such quick and pleasing relief you will be surprised. Any druggist will tell you ordinary Bisurated Magnesia is fine for sour acid stomach conditions. It should be in every home. It works.

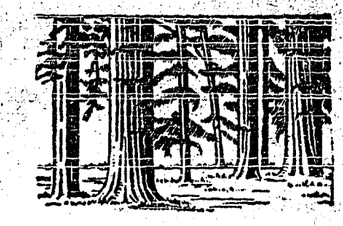
Tomb Of Viking Chieftain

Discover Grave Of Warrior Buried 1,000 Years Ago

The tomb of a Viking chieftain, buried more than 1,000 years ago, was recently found at Laangtora in central Sweden. The find clearly showed the warrior was of high rank and furnished an interesting example of the burying customs of his day. He had been interred with full armor and with a fine sword, evidently made in the south of England.

The sword hilt was decorated with silver ornaments, on one of which some magic runes had been engraved.

Longest Lived Trees



Older than the pyramids or sphinx of Egypt —Older than the first city built by Cain— Many of the "Big Trees" of California may have been seedlings when Adam walked the earth. English Oaks are also noted for their long life—trees are now standing which were large enough to cut for lumber when the mailed Knights of William the Conqueror landed in the year 1066.

EVEREADY

LONGEST LIVED RADIO BATTERIES

It's long life that saves money on battery upkeep. You get longer life from Layerbilt Batteries because they are crammed full of power-producing material. No waste space in the flat layers. Investigated Northern Lights

Scientists Have Spent Fifteen Months At Fort Rae

Aurora borealis flash across the northern sky some 60 miles above the eath, according to calculations made by members of the British polar year expedition who arrived at Edmonton by aeroplane after 15 months spent at Fort Rae, North West Territories, studying weather conditions in the far north.

Five members of the party, A. Stephenson, who was formerly with the Wilkins expedition in Greenland, P. A. Sheperd, R. Morgans, W. A. Grinstead and J. E Kennedy arrived in a MacKenzie Airways aeroplane piloted by Matt Berry. Dr. J. M. Stagg, leader of the expedition, returned by river boat with the valuable instruments used in investigations.

Results of their observations will not be revealed until the voluminous data on meteorology, terrestrial magnetism, aurora and atmospheric electricity ae analyzed after their return to England, the scientists stated.

"We simply made the observations and collected the data," Mr. Grimstead explained. "The results of our work will come out later."

In all, 4,000 double photographs of the northern lights were taken by means of cameras on either end of a telegraphic line placed 20 miles apart. Cameras and instruments were focused on a star and the photographs taken instantaneously. Thus by means of triangulation the distance and action of the northern lights could be estimated.

CREAMED CELERY AND GREEN PEPPER

One and half cups celery (cut in one-inch pieces); 1 green pepper; 3 tablespoons butter; 3 tablespoons flour; ½ teaspoon salt; ⅛ teaspoon pepper; ⅔ cup evaporated milk; ¾ cup water; 6 slices toast.

Cook celery until tender. Drain and mix with sliced green pepper. Melt butter in double boiler. Add flour and seasonings. Blend thoroughly. Add gradually evaporated milk and water, stirring constantly until mixture thickens. Cover and cook ten minutes longer in double boiler, stirring occasionally. Add celery and green pepper. Serve on toast if desired. Serves six.

A Profitable Proposition

One rural subscriber who was renewing his subsciption the other day to the Pictou, Nova Scotia Advocate, pointed out that he would not miss one issue of The Advocate henceforth as a result of a recent experience. "Why," said he, "if I hadn't been getting your paper I'd have missed a sale the other day at which I made several dollars on the purchase of a cow. I made enough to pay for the paper for two or three years in the one deal."

Better Conditions Due To General Upswing

Improved Business In Canada Not Credited Wholly To N.R.A.

Figures issued by the Dominion Bureau of Statistics indicate business conditions in Canada have progressively improved since March of this year, before the National Recovery Act was passed in the United States.

Although officials of the Canadian Manufacturers' Assaciation would not express an opinion as to whether the increase in Canada's export trade as reported from the Department of National Revenue at Ottawa, was due to influence of the N.R.A., Dominion statistics indicate it was not a major influence.

Physical volume of business, industrial production, manufacturing in the Dominion, along with export trade started on an upward trend in arch, improving steadily in following months. Canada's trade "low" was reached in January-February.

Although some credit is given the National Recovery Act by manufacturers at Toronto, for improved conditions, owing to the influence of conditions in America on Canadian trade, it is considered improvement is principally due to a general upswing in world conditions.

Dairy For Prince Albert

Believing Prince Albert is headed for better times, F. R. Glass, of Kerrobert, announced his plans to establish a dairy there for the retail distribution of pasteurized milk and cream. He has acquired 1,300 acres near the city and built a barn to house 40 Holstein cattle he intends to bring from Kerrobert, where he now operates a dairy.

WIDER POWERS FOR DOLLFUSS ARE INDICATED

Vienna.—It was authoritatively announced that Chancellor Dollfuss was taking over complete executive control of Austrian affairs, including the army, the police and the gendarmerie in a new "cabinet of personalities."

It was explained the new Dollfuss cabinet will be formed on the basis of elimination of all political parties. Cabinet members who belong to parties will be shelved, and parliament will lay down mandates.

It was not as yet definitely disclosed whether the Heimwehr (home guard) will remain a part of the political picture. A new cabinet list, however, was expected.

Shortly after the announcement a Christian-Social meeting under the chairmanship of Karl Vaugoin, minister of the army, and—an ironic coincidence—Princess Starhemberg, mother of the Heimwehr leader, wound up by issuing a communique to the effect that the party was solidly behind Dollfuss and "the Christian corporative authority state."

This was exactly the same phrase used by Dollfuss on September 11, when he set forth his conception of the new Austrian state, which precipitated a wordy battle between Prince Starhemberg and Vice-Chancellor Winkler.

Northern Air Route

Winnipeg Expected To Be In Important Position In Trans-Atlantic Service

Ottawa, Ont.—While it is too soon to predict the role that Winnipeg will play, it is learned here on official authority that negotiations for a trans-Atlantic air service are now rapidly reaching a final stage. The three countries that will co-operate in this venture are the United States, Canada and Great Britain and the route will be north across Labrador or Hudson Bay to Greenland, thence to Iceland and to the British Isles.

The negotiations are now proceeding at London, where the Canadian government and, probably, the Canadian Airways, are represented. The United States participant is the Pan-American Airways, Limited, and the British negotiator is the British Airways.

An announcement of the plans for an early trans-Atlantic service is expected within six weeks.

It is not known here if the plans will call for a branch line from Chicago to Winnipeg and thence northeast to tap the main line, but it is said that this possibility is being considered.

Kitsilano Boys' Band

Have Accepted Invitation To Play At Crystal Palace, London

Vancouver, B.C.—Kitsilano Boys' Band, which won honors across continent, has accepted an invitation to play next summer in the Crystal Palace, London, England, according to the band's calendar for 1934.

The youthful musicians took the Pacific northwest and British Columbia honors in 1931-32-33, the Canadian championship at the Canadian National exhibition in 1932 and the world's championship in their class at a Century of Progress Fair in Chicago recently.

Record Price For Beef

Springfield, Mass.—A new record price for beef steak on the hoof was paid at the baby beef auction at the Eastern States exposition, when the grand champion owned by Theresa Grassi, of Pine Plains, N.Y., brought $11.15 per pound at auction. This compares with a previous record of $8.30 paid at the East St. Louis Fair last year.

Blame For Reichstag Blaze

London, Eng.—An international legal commission which has been holding an inquiry into the Berlin Reichstag fire last February, found that grave grounds existed for suspecting that the building was set afire by the Nazis rather than by the Communists whom the German Government has accused.

Favors Tariff Act

Controlled Inflation And Lower Tariffs Favored By U.S. Official

Chicago.—Secretary of Agriculture Henry Wallace told the United States Grain Dealers' Association that he still favors controlled inflation.

Along with this he criticized high tariff psychology and warned that attempts to fix prices "without control of production is doomed to failure."

"Most of the price fixers are also inflationists," he said. "If the purchasing power of farm products does not improve during the next three months, the price fixers and inflationists will have great power in congress this winter and there will be passed legislation which will make the Agricultural Adjustment Act seem extraordinarily conservative."

Secretary Wallace said he looked for decidedly higher agricultural prices within a few months, but that he felt the improvement might come to a sad end if "we are not prepared to meet the peril produced by the following forces." He said these were:

"First, America is a creditor nation to the tune of $1,000,000,000 annually, but, as a nation, she has a debtor psychology. Second, the American people are still essentially high tariff in their attitude. Third, the American people are disillusioned about lending money abroad, and it will be difficult to float foreign loans in their present temper.

"These three forces mean that for the time being our people are profoundly nationalistic, and that as long as they are operating on this basis, we should go at it whole-heartedly to put our internal economy on a nationalistic basis, reducing our crop land acreage by 40,000,000 acres.

"If we persist in our high tariff policy or even in a half-way modification of it, and at the same time collect in full the money which is owed us abroad, and refuse to lend money abroad, it will take superhuman efforts on the part of the agricultural adjustment administration year after year to keep down our acreage to a point which will afford a living price to American farmers."

Empire News

Clearing House For Empire News Is Suggestion Made

Toronto, Ont.—National press associations in each of the Dominions, freely exchanging news of the empire, were held up as a prospect to hope for in a committee of the British Commonwealth Relations' Conference.

It was suggested if South Africa, Australia and India could set up co-operative associations as in Canada and New Zealand, the road would be prepared for the establishment in London of a clearing-house for this empire news, in which the press of the United Kingdom would be invited to participate.

Would Provide Work

Big Reconstruction Project Advocated In Winnipeg

Winnipeg, Man.—A city home reconstruction project, which would provide work for thousands of Winnipeg building tradesmen, is advocated by the civic town planning and zoning board and the Winnipeg building trade council.

The project was discussed at a conference here, and under the plan the Dominion and provincial governments would be asked to finance a scheme for remodelling old, run-down homes in some of the poorer districts of Winnipeg.

American Section At Geneva

Geneva, Switzerland.—The American Minister to Switzerland, Hugh R. Wilson, practically living in Geneva, and with five members of the consular staff headed by Prentiss B. Gilbert, devoting themselves exclusively to League of Nations questions, the league decided to inaugurate a special American section.

Boy Takes Long Journey

Edmonton, Alberta.—Adopted by his aunt and uncle, Mr. and Mrs. R. A. Blench of Edmonton, eight-year-old Walter Houghton, travelled alone from Cape Town, South Africa, to the Alberta capital after his mother and father had died. The boy said he enjoyed the 13,000 mile trip and is eager to see his first snowfall.

Cotton mills in France are increasing working hours.

NEW DEPUTY MINISTER

Dr. R. E. Wodehouse, Executive Secretary of the Canadian Tuberculosis Association, who has just been appointed Deputy Minister of Pensions and National Health for the Dominion.

Bernt Balchen In Hospital

National Flyer Has Operation For Appendicitis

Cape Town, Union of South Africa.—Bernt Balchen, the noted flyer, well known in Canada, underwent an appendicitis operation described as completely successful

The mystery of his whereabouts which caused Sir Hubert Wilkins and his shipmates some hours of inquiry was cleared up by a statement that when he left the ship he met a friend taking dinner at a hotel. It was explained he spent the evening in his friend's company and returned shortly before midnight, going to bed quite ignorant of the excitement created by his "disappearance"

Railway Fares

Scaling Down In Prices Seen, And Excursions May Be Permanent Plan

Calgary, Alberta.—Rumored consideration of a scaling down of railway fares in United States is subject to close observation by Canadian railway executives, E. W. Beatty, president of the Canadian Pacific Railway, said here.

"The question of lower fares is a matter of development and depends on future traffic," Mr. Beatty stated. "But I believe, judging by the manner in which they have been patronized in the past few months, excursions have come to stay."

Morphine Case

Victoria, B.C.—Sacks of dried poppy heads were stacked in the court room as material evidence as the trial of a Hindu named Beru on a charge of possessing morphine began. Royal Canadian Mounted Police recently seized a truckload of poppy heads from city and Saanich lots and this was the first case arising out of the seizure. The case was adjourned.

No More Free Gas

Say Joy Riders From Alberta Obtaining Free Gas From B.C.

Victoria, B.C.—Joy riders from Alberta have been obtaining free gasoline in British Columbia, according to Hon. W. M. Dennies, British Columbia Minister of Labor, just returned from a trip to the Okanagan and Kootenay districts.

Mr. Dennies said families were driving across the inter-provincial line in old cars and asking for free meals and a supply of gas to move onward. Most municipal officials found it cheaper to speed them on their way with gas instead of harboring them.

The minister said word apparently spread to the prairies and increased the flow of ancient cars from Alberta into the southern section of the province.

Mr. Dennies issued orders no more free gas be supplied to prairie itinerants.

Growth Of Empire Trade

Exports For August Of Very Encouraging Nature

Ottawa, Ont.—Exports to British Empire countries in August, exclusive of those to the United Kingdom, totalled in value $4,074,000. This was an increase of $622,000 over August last year and the highest since November, 1931, when the total was $4,372,097, according to the Dominion Bureau of Statistics.

The largest export last month was to Australia, valued at $966,000, an increase of $101,000, in which lumber from British Columbia played a conspicuous part.

Exports to the Irish Free State, Newfoundland, Bermuda, the British West Indies, the British countries of Africa, British Guiana, Hong Kong, Palestine and British Oceania, all showed gains last month.

Find Free Gold

Ore Body Is Discovered In Stevenson Lake Area

The Pas, Man.—Predictions made last year that the next big gold finds would be recorded at Oxford Lake and vicinity have been borne out by a number of stakings in the Stevenson Lake area about midway between Oxford House and Island Lake, according to word received here.

Among those in the field is James R. Criderman, of the Criderman mines, Central Manitoba, and well known in Ontario and Quebec.

Free gold is spattered over a wide area. Assays run up to $120 per ton. Claims extend three miles along Stevenson Lake shore.

Studying Tax Problems

Winnipeg, Man.—J. A. Byng, commissioner of income taxation for Saskatchewan, was in Winnipeg to consult with D. C. Stewart, Manitoba administrator of income taxation, concerning means of eliminating overlapping taxation as respects individuals subject to taxation in both provinces.

CABINET TROUBLE MAY UPSET DOLLFUSS

Dr. Englebert Dollfuss, Austria's "pocket" Chancellor, has been waging a strong fight against Nazi encroachment in Austria, and now reports from Vienna state the diminutive leader is having troubles in his Cabinet. Here we see the Austrian Chancellor (right), a packet of concentrated dynamite, standing beside Baron Franchestein, one of his right-hand men.

FOUR NATIONS MAY AGREE ON ARMS CONTROL

London, Eng.—Broadly outlined, the aims of the British government on the disarmament question are understood to be the application of the principle of armament limitation to all nations and the avoidance of new competition in armaments.

At a special meeting the cabinet reviewed the situation and heard the report of Captain Anthony Eden, under-secretary for Foreign Affairs. The net result of the cabinet's deliberations, the Canadian Press was authoritatively informed, was to leave the ministers firm in their contention that the adoption of a disarmament pact was imperative.

Paris, France.—A united disarmament front of Great Britain, United States, France and Italy, based on the French plan for armaments control, was believed by French officials to be near.

While British quarters were reticent pending the outcome of a cabinet meeting at London, French officials maintained the points of view of the four powers were close enough to enable an accord. This, it was believed, would include the control scheme, sanctions against any nation violating a disarmament agreement, and limitations of armies and guns.

Study Cosmic Rays

U.S. Army 'Plane Carries Instruments Four Miles Above Earth

Riverside, California.—Using army bombing 'planes to carry their sensitive instruments nearly four miles above the earth, Dr. Robert Millikan, noted Pasadena scientist, and his assistant, Dr. Victor Neher, have resumed their efforts to learn more about the cosmic ray.

An army pilot, garbed in 25 pounds of winter flying clothes and equipped with oxygen breathing facilities which he is compelled to use about 15,000 feet, flew the instruments to 19,000 feet recently.

The 'plane remained at that altitude an hour and 15 minutes and at 15,000 feet for a similar period. Dr. Neher said he plans several flights daily for two weeks.

Similar tests were conducted on behalf of Dr. Millikan in Northern Manitoba in 1932. On that occasion a Royal Canadian Air Force 'plane made altitude flights after being fitted out as an aerial-laboratory.

Warning Is Given

Heavy Penalty For Melting Down Gold Coins

Ottawa, Ont.—A warning to those who might be tempted to melt down gold coin in order to secure the high price now prevailing for the raw metal, is contained in a statement issued by the Department of Finance.

Section 25 of the Currency Act provides that the penalty for illegally dealing with such gold coin shall be a fine not exceeding $250, or imprisonment for not more than 12 months, or both fine and imprisonment.

Made Dangerous Trip

Edmonton, Alberta.—Four Edmonton youths have completed the treacherous 250-mile canoe trip down the Saskatchewan River and tributaries from Rocky Mountain House to this city. The dangerous waters upset their canoe once, the occupants narrowly escaping death. The canoeists are Bert Wilson, his brother, Howard, Robert Brown and Allan Bralles.

B.C. Lumber Export

Vancouver, B.C.—Export of board feet of lumber from British Columbia in August set a new high record, according to figures issued by the Pacific lumber inspection bureau. The figure was 75,132,000 feet against 73,077,000 in August, 1929, the highest previous month. In August, 1932, export only totalled 27,405,000 feet.

Relief Camps

Edmonton, Alberta.—Officials of the Department of Defence at Ottawa are conferring with Alberta Government officials on the opening of single jobless relief camps in this province, to be under the defence department's supervision.
