CRESTON, B. C., FRIDAY, AUGUST 24, 1928

No. 29

Lister

BIRTH—On August 10th, to Mr. and Mrs. John E. Gordon, a son.

D. J. McKee was a business visitor at Ymir a couple of days last week.

Mrs. Jacks and son, Eric, and Mrs. Knott are visiting with Spokane friends this week.

Geo. Hurry and family are just back from an auto trip over the Banff-Windermere Road, and visits at Calgary, Claresholm and Barons, Alberta. George will be returning to Barons in a few days to help with harvest and threshing.

Gordon Hurry of Nelson, who has been on a visit with his father for a few weeks, has returned to work, and is accompanied by his sister, Ivy.

Bill and Harry Demchuk and Jack Cowley left a few days ago for Southern Alberta, where they will stay for harvest and threshing.

Ronald Gibbs of Penticton was a Friday-Saturday visitor with Bert Hobden.

W. H. Dobson, representing the Ogilvie Milling Co., Medicine Hat, Alberta, was a business visitor at Lister on Wednesday.

Mr. and Mrs. Bert Malthouse and family and Mr. and Mrs. Betts and family, all of Calgary, were motor callers here this week, guests of Mr. and Mrs. E. J. Malthouse.

Miss Agnes Robden of the General Hospital nursing staff, Vancouver, is spending a two weeks' vacation with her mother, Mrs. A. Hobden.

Harry Helme and John Huseroff have acquired the stand of timber adjacent to the Huseroff school, and will shortly commence manufacturing it into ties.

At the August meeting of the school board Geo. Mitchell was engaged as janitor for the ensuing term, and it was decided to proceed with some minor improvements on the grounds and buildings.

President Andy Sinclair was in charge of a meeting of the Huseroff-Lister Farmers Institute on August 14th, when much important business was transacted. The authorities are to be asked to see to it that cattle from the flats are not allowed to range in the Lister section during high water as they are doing altogether too much damage to places here. An effort will be made to have a district display at the 1928 fall fair at Creston. Regular meetings are to be held in future—the second Tuesday evening each alternate month, with the next meeting on September 11th.

An Important Experiment

Bringing ten thousand of the vast army of unemployed British miners to assist in harvesting Western Canada's 1928 grain crops is an experiment on a large scale that will be watched with great interest and sympathy not only in Canada and Britain, but throughout the Empire. That it is an experiment confronted by many difficulties and not free from dangers is fully recognized, but in view of Canada's present need for harvest hands, and Britain's serious and apparently unsolvable problem of unemployment, it is one well worth while.

Unquestionably there has arisen a feeling in the Old Land that Canada, with its sparse population and great areas of vacant lands and enormous undeveloped natural resources, ought to come to the relief of Britain and the British people through the acceptance of large numbers of the unemployed, and that in doing so this Dominion would not only render a real service to these workers and the Empire but would ultimately be well repaid through the infusion of so much British blood into the cosmopolitan citizenship of this country.

In Canada itself there are men more or less prominent in the life of the country who are critical of the immigration now coming into the Dominion and who loudly demand that settlers from the British Isles be given a preference over all others, even to the extent of excluding those of other than British birth.

Opposed to these groups is a large body of Canadian opinion which holds that it would be a mistake not only for Canada but for Britain to bring into this Dominion large numbers of the British unemployed who lack the fitness and qualifications which would enable them to make successful citizens in this new land. As the Minister of Labor recently pointed out, it would be no kindness to bring unemployed men from Britain unless there is employment for them here, and that no good service would be rendered the Empire by lessening the number of unemployed in Britain and creating an acute unemployment situation in Canada.

It is recognized, too, that in Canada employment is subject to seasonal changes, and that even under the most favorable and prosperous conditions, a measure of unemployment is inevitable during the winter months. Winter employment is at low ebb in the cities and larger towns during the winter, and unless winter employment on the farms can be secured for them, British immigrants might fare badly, through no fault of their own, or the fault of anybody else. Between April and November, the situation is entirely different with farm work, railway construction, building operations and municipal improvements and works of all kinds under way. December to March is the critical period.

Under the arrangement whereby these ten thousand unemployed British miners are coming to work in the harvest fields, it is provided that the Canadian authorities will do everything in their power to secure winter farm employment for them, but that all those who cannot be so placed, or prefer to return to Britain, must be returned.

For the sake of these men first and foremost, and for the sake of Canada and Britain secondly, it is to be hoped that by far the greater number will be placed in all-the-year round employment. Canada wants these Britishers, and they should be accorded a hearty welcome and every possible chance to make good. In any mass movement of population there is bound to be a number of misfits, chronic grouse, and hopeless incompetents, but the experiment being made should not be judged by these exceptions, but by the measure of success attending the movement as a whole.

Harvest time in the West is a time of stress. It is a strenuous period, when everybody is obliged to work long hours. It is a time when the farmer, anxious to secure in safety the results of a year's labor, is apt to be impatient and exacting, and to these miners unused to long hours and engaged in unfamiliar work, the farmer may appear to be a hard taskmaster. There must be a recognition of these differences and difficulties on both sides. The harvest hand should strive to realize to the full his own inexperience and shortcomings in his new environment and exert himself to the utmost to give satisfaction and make good. The farmer employer, on the other hand, should exercise a maximum of patience and endeavor to teach these men and bring out the best in them in the hope and expectation of encouraging them to do their best and inducing in them a real liking for Canada and a determination to remain and make a success of life in this country.

These British miners, if, as a harvest hand, they have a man seeking to do Farmers, too, should co-operate to the fullest extent possible with the Dominion and Provincial Governments in finding winter employment for his best and make good, arrangements should, if possible be made to retain him throughout the winter and until work becomes plentiful in the spring of the new year.

Judicially handled, and with everybody striving to do his best, this experiment with British miners may well prove to be a turning point in the history of immigration to Canada. The British Government is now training an additional 21,000 miners and their families for agricultural life in the Dominions. If the coming ten thousand harvesters make a success of this undertaking, and if the Canadian people unitedly help them to do so, this country will undoubtedly receive the bulk of these other 21,000 partially trained men and women. Canada wants them, and our people should do everything in reason to encourage them to come here.

The present movement presents a golden opportunity, therefore, to those who have been outspoken in their criticism of past immigration efforts from Britain. It is now up to them to throw themselves with equal vigor into the task of finding permanent work for the thousands who are now or shortly will be in our midst.

Big Land Deal

Ten Thousand Acres Of Farming Land Purchased In Wainwright District

What is stated to be the largest land deal ever consummated in Northern Alberta was completed here when the Mid-West Development and Finance Corporation purchased 10,000 acres of choice farming land in the Wainwright District at a price of \$200,000. There are 3,000 acres under cultivation and the land is laid out in twenty units which are being rented by progressive farmers.

ST. VITUS DANCE

A Trouble That Usually Attacks Young Children

St. Vitus Dance is the name generally given to a disease described by medical men as chorea. This trouble usually attacks young children, though older people may be afflicted with it. The most common symptoms are a twitching of the face and limbs. As the disease progresses the twitching takes the form of spasms, in which the jerking motion may be confined to the face or all the limbs may be affected. Frequently the patient is unable to hold anything in the hands or walk steadily. In severe cases the speech is often affected. The disease is due to debility of the nerves and relief comes through an enriched blood supply. Dr. Williams' Pink Pills have been most successful in reaching this trouble through their specific action on the blood, which it enriches and purifies. The following instance proves the value of Dr. Williams' Pink Pills in this trouble. Mrs. Thomas Bowen, Bath, Ont., says: "Dr. Williams' Pink Pills have been in use in my family for years and always with good results. I believe they saved the life of my only son. At ten years of age he grew very nervous and the trouble developed into St. Vitus Dance. His legs and arms would jerk and twitch, then his speech was affected, and his condition was pitiable. Just then there came to me a little book telling of Dr. Williams' Pink Pills and I decided to give them to him. By the time two boxes were used there was an improvement in his condition and by the time six boxes more were taken all traces of the trouble had disappeared, and he was well and strong. I have also given the pills to my growing girls, and I know of no better strengthening medicine. I may add that the same applies to grown-ups as well."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Travelling Clinic

Government Clinic Pays Visit To Peace River District

A Government travelling clinic has been operating in the Peace River District this season. At five population centres a total of 314 children were examined in 10 days. A total of 124 minor operations were performed, 279 children given dental examinations, 144 extractions performed, and other dental treatment given to 128 children.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

Gasoline Tax Revenue

In the first two months, May and June, in which the three-cent gasoline tax was in force in Saskatchewan, \$325,000 was collected, it was officially announced. When the gasoline tax act was passed at the last session of the Legislature, it was estimated that the revenue to the province would be, for the full year, \$700,000.

Laying Heavy Steel Rails

C.P.R. Replacing Rails With Heavier Steel On Maple Creek and Brooks Subdivisions

Good progress is being made with the relaying of steel on the Canadian Pacific lines in the Calgary division during the past few months. One hundred and thirty-five miles of new rail has been laid on the Maple Creek subdivision, that is between Medicine Hat and Swift Current, while the relaying is now going on in the Brooks subdivision, between Calgary and Medicine Hat.

The relaying consisted of the replacement of 80 and 85 pound steel by rails weighing 100 pounds per foot. The heavier rail is necessary in view of the increased speed of the trains and their greater weight.

As mentioned above, 135 miles of heavy rail have been laid on the Maple Creek subdivision. On the Brooks subdivision the mileage of heavy steel will be about 130. It is estimated that the cost of relaying the track is approximately \$1,000,000 per hundred miles, thus the work on the Calgary division this year will cost the Canadian Pacific Railway a total of about \$2,065,000.

Water Power Installation

Two Million Horsepower To Be Added Within Next Few Years

Two million horsepower will, it is estimated by the department of the interior, be added to the water power installation in the Dominion within the next few years. This new work will require a direct investment of at least \$200,000,000.

The annual statement of the Hon. Charles Stewart, minister of the interior, with regard to the progress of water power development issued at the beginning of the year predicted an addition of 378,000 horsepower to the total installation in the Dominion during the first six or seven months of 1928. A mid-season review of conditions now indicates that during the whole year as much as 550,000 H.P. will be added, either in new development or in addition to existing stations.

HON. PHILIP ROY RECOMMENDED AS ENVOY TO PARIS

Ottawa.—Hon. Philippe Roy has been recommended by the Dominion Government to His Majesty the King for appointment as Canadian minister plenipotentiary to Paris, Premier King has announced.

Mr. Roy has been Canadian commissioner in Paris for the past 18 years.

No action to appoint a Canadian minister to Tokio has yet been taken, the prime minister said.

It is expected that the formal commission for the appointment of Mr. Roy will be issued by His Majesty in time for the opening of the legation in Paris during the first week of October.

Mr. Roy was born on December 18, 1868, at St. Francois, Que., and was called to the Senate on March 8, 1906. He was appointed to Paris on May 1, 1911, being one of the administration of the late Sir Wilfred Laurier. Mr. Roy was also appointed agent-general for the province of Quebec at Paris on January 15, 1912.

Message From Amundsen

Believe Note Found In Bottle To Be In Handwriting Of Lost Explorer

London.—Despatches to the Daily Mail from The Hague state that the Norwegian Minister at Amsterdam announced an apparently genuine message from Roald Amundsen, noted explorer who was lost while participating in the expeditions seeking the crew of the wrecked Polar dirigible Italia, had been found in a bottle near Rottumeroog.

The message, which was compared with Amundsen's handwriting and was said to be authentic, gave the position of the explorer and his party on July 1.

Rottumeroog is in the Netherlands Islands in the North Sea.

Amundsen and four companions have been missing since they started in a French seaplane to search for the Italia party.

12,000 People Visit New Cruiser During Stay At Montreal

Montreal.—H.M.A.S. Australia, flagship of the Royal Australian Navy, sailed for Quebec following a visit of several days to Montreal. It is estimated that 12,000 persons visited the new cruiser while she was here.

The Australia will remain at Quebec four days, following which she will proceed to Halifax, which will be visited on August 22. Other places to be visited include Boston, August 25; New York, August 30; Chesapeake Bay, September 4; Colon, September 17; Tahiti, September 20; Wellington, N.Z., October 9; Brisbane, Australia, October 17; Sydney, N.S.W., October 23.

Recognition Of Ecuador

United States Now Convinced Of Country's Good Intentions

Washington, D.C.—The United States has accorded complete recognition to the Government now functioning in Ecuador, the State Department announced.

Secretary of State Kellogg has informed the Ecuadorian Government by note that beginning immediately the United States, convinced of Ecuador's good intentions to return to a constitutional form of government which it abandoned in 1925, accords recognition to the present regime.

Will Visit Ireland

Washington.—Secretary of State Kellogg has practically decided to visit Ireland after signing the fifteen-power anti-war treaty in Paris, August 27, in order to return the call of President Cosgrave of the executive council of the Irish Free State, made during his visit to this country. It is not unlikely that Mr. Kellogg also will visit London.

Receives Re-Appointment

Dr. McLean To Be Assistant Chief Commissioner Of Rail Board
Ottawa.—Dr. Simon J. McLean, Ottawa, has been re-appointed assistant chief commissioner of the board of railway commissioners. Dr. McLean's term of office expired August 6, and his re-appointment is for a further period of ten years. Dr. McLean was originally appointed to the board in 1908.

The term of Commissioner Frank Oliver will terminate toward the end of September, when Mr. Oliver will have reached the age limit of 75 years.

Dr. McLean drafted the Dominion Railway Act, and his re-appointment for a third term creates a precedent. Since the formation of the Board of Railway Commissioners in 1904, Dr. McLean has been the only commissioner to be re-appointed after expiration of the ten-year term.

While no official statement has been made in the matter, it is rumored that legislation may possibly be introduced at the next session of Parliament providing for the superannuation of members of the board.

To Take Care Of British Harvesters

Effort Will Be Made To Provide Permanent Work Throughout Winter

Saskatoon, Sask.—If the British miners who are coming to the west to work in the harvest fields do not obtain permanent work throughout the winter it will not be the fault of the railway companies or want of effort on their part.

No stone will be left unturned to try to keep these men here and in the opinion of T. Devlin, local manager of the Canadian National colonization department, future immigration from the British Isles depends largely on the success or failure of this venture.

Mr. Devlin said that he could see no reason why the project should not prove an outstanding success. "The men who are coming are by no means strangers to hard work and they know just as much about farm work as the average harvester from Eastern Canada," he says.

Death Of Canadian Novelist

Mrs. Isabel Ecclestone MacKay, Dies At Her Home In Vancouver

Vancouver.—Mrs. Isabel Ecclestone MacKay, Canadian novelist, poetess and playwright, wife of Peter J. MacKay, official reporter of the Supreme Court of British Columbia, died at her home here after a year's illness. She was born in Woodstock, Ont., 52 years ago.

The late Mrs. MacKay was the daughter of Mr. and Mrs. Donald MacLeod MacPherson, of Woodstock, and came to Vancouver 19 years ago. She was the authoress of several novels, including "House of Windows," "Up the Hill and Over," "Mist of Morning," "The Window Gazer," and "Glengarrow." Mrs. MacKay was also the writer of a book of lyrics, "Fires Of Driftwood" and a volume of poems for children entitled "The Shining Ship."

She also wrote a number of plays which have been produced in Canada and the United States.

In addition to her husband she leaves three daughters.

Gold Strike In Ontario

Rich Find Is Reported In Vicinity Of Mine Centre

Toronto.—A special despatch to the Mail and Empire from Lochalsh, Ont., says:

"Reports from Mine Centre, west of Fort William, on the Canadian National Railways, bring word of what is described as a sensational gold strike made on the Johnson claims at that point. The claims are located south of the Foley mine of British-Canadian Mines, Ltd., and east of Little Vermilion Lake.

"A mining engineer returning from the scene of the strike says that the ore taken from the surface is glittering with visible gold which would run thousands of dollars to the ton, and is said to equal or even eclipse the remarkable find made on the Isabella property of Northern Red Lake Mines, Ltd., reported several weeks ago.

Heads Native Sons Of Canada

Dr. J. H. Cotton, of Toronto, was elected president of the National Council of the Native Sons of Canada at their annual meeting in Regina. Dr. Cotton is the first eastern member of the organization to be appointed to the presidency. Formerly he was appointed to the vice-presidency of the council.

Expedition Well Equipped

Commander Byrd's Antarctic Venture May Cost One Million Dollars

New York.—The Antarctic expedition of Commander Richard E. Byrd, which starts from this port this week, will be the most extensive expedition in the history of exploration and may cost one million dollars.

At the expedition's headquarters here, it was said the cost would be not less than \$855,000, and before the expedition returns to this country may reach \$1,000,000.

Contributions received to date include \$435,000 worth of equipment and \$237,543 in cash. The total expense of Commander Byrd's North Pole expedition in 1926 was \$140,000.

Fuller Party Reported Safe

Have Been Reprovisioned and Are Now Headed For Shores Of Hudson Bay

Regina, Sask.—Three weeks ago the John D. Fuller expedition of student geologists from Iowa into the north was safely launched on a new and shorter route to Hudson bay. The four men, who have been almost given up as dead for the past six weeks, have been reprovisioned and given new equipment for the trail. They are now headed along the route through Neultin Lakes and smaller bodies of water and down the Thlewiaza River to Hudson Bay. They are expected to emerge near Driftwood Point, halfway between Chesterfield Inlet, their first objective, and Fort Churchill.

Hope For Peaceful Relations

Kellogg Peace Pact a Revolutionary Policy Among Nations

Wausau, Wis.—Within a fortnight of the date on which the international treaty for outlawing war is to be signed, President Coolidge declared before the Wisconsin State American Legion here, that the Kellogg pact "holds a greater hope for peaceful relations than was ever before given to the world."

The President maintained that by taking a leading position in securing this agreement, the United States proved its pacific inclinations toward all nations.

"We have demonstrated," Mr. Coolidge declared, "that when we have said we maintained our armaments, not for aggression, but purely for defence, we were making a candid statement which we were willing to verify by our actions."

Th President said that while "it would be too much to suppose that war had been entirely banished, yet a new and important barrier, reasonable and honorable," has been created to bar it.

"This agreement proposes a revolutionary policy among nations," he said. "It holds a greater hope for peaceful relations than was ever before given to the world. If those who are involved in it, having started it, will finish it, its provisions will prove one of the greatest blessings ever bestowed upon humanity. It is a fitting consummation to the first decade of peace."

Influenza In the North

Serious Epidemic Has Broken Out In MacKenzie River District

Winnipeg.—A serious epidemic of influenza has broken out along the banks of the Mackenzie River with considerable loss of life, according to a letter received from Rev. W. B. Singleton, principal of the Hay River Indian school of the Indian and Eskimo mission of the Missionary Society of the Church of England.

At Fort Resolution, where Slave River flows into Slave Lake, 20 deaths were reported. At Hay River, towards the west end of the lake, there were ten deaths. The toll of deaths at other points was thought to be even greater, the letter stated.

The Manitoba Division, Dominion Department of Indian Affairs, had received no information of any epidemic in this province.

Miners For Harvest Fields

The Pas, Man.—Men are flocking in from railway construction camps along the Flin Flon railway seeking higher wages in the harvest fields in the interior. Five hundred men have departed from The Pas on the last two trains going south.

SPIRITED FIGHT ON LAKE ERIE WITH RUM FLEET

Buffalo.—The struggle for supremacy between the rum running fleet on the Niagara River and Lake Erie blazed into spirited action in which government boats set afire and sank one craft and captured two others carrying contraband liquor and ale.

At Niagara below the Falls a speedy boat carrying many cases of both whiskey and ale fell into the hands of the federal patrol.

Earlier in the day the C.G. 121 sighted a suspicious looking craft off Brocton, on Lake Erie. A chase followed during which the government boat fired 50 rounds.

After the gun fire had set the rum runner ablaze the coastguard boat took off the crew of two men and stood by while the damaged craft burned to the water's edge.

The other boat was caught on Lake Erie, off Barcelona. Three hundred rounds were fired at it before the crew decided to heave to and surrender. Two men and a small quantity of liquor were found.

Praises Pool System

Toronto Professor Says Pool Has Revolutionized Morale Of Farming Community

Williamstown, Mass.—Agricultural co-operation is not merely a marketing device but a means of lifting the farmer to a plane of greater prosperity and keeping him there, Prof. C. R. Fay, of the University of Toronto, told the Institute of Politics here.

"In Canada," he said, "the wheat pool has revolutionized the morale of the farming community, relieving the farmer of the difficulty of deciding when to sell, eliminating the pressure to sell at certain seasons, and basing all farm marketing on statistical knowledge."

The co-operative system he declared, is of special benefit to the small farmers, whose plane of living has been raised to the highest level it ever reached.

In the United States the government's attitude toward the farmer's problems is one of encouragement through active assistance in research and educational facilities, C. L. Christensen, chief of the department of co-operative marketing of the department of agriculture, said.

All Bitterness Forgotten

Remarkable Tolerance Is Shown In Irish Free State

Victoria, B.C.—Right Hon. Hugh Kennedy, chief justice of Ireland and honorary member of American and Canadian Bar Associations, was the guest-speaker at the Canadian Club luncheon here.

"We had a fight with England but that fight terminated in a treaty of peace, and a reconciliation was reached which I believe has wiped out the rancor which existed in the past," the chief justice said.

One of the first steps in the reorganization of the country was placing agriculture on a firm basis, as agriculture for years to come would continue as the foundation of prosperity in Ireland, he said.

He said that the Free State had shown a remarkable degree of toleration with the test of religion never entering into politics. As an example, he referred to the fact that the minister of finance was a Presbyterian from an Orange county.

Montreal Garment Workers Quit

Montreal.—Twelve hundred employees and 70 work shops in Montreal are affected by the present "stoppage" of work of local members of the Amalgamated Clothing Workers of America. It is not spoken of as a strike by union officials because not all the shops of the city are affected. Speedy termination of the dispute is expected.

Mine Blast Is Fatal

Calgary.—L. L. Johnson, for years chairman of the Department of Soldiers' Civil Re-establishment at Calgary, was instantly killed when a charge of dynamite exploded prematurely in Mr. Johnson's mine at Dodds, Alta., according to information received here.

BRITISH STUDENT HARVESTERS

British university students seeking information, experience and adventure are coming to Canada to help with the harvest in the West this year and places for them are being found by the colonization department of the Canadian National Railways. If they are all of the type of the first four to arrive in the West both Canada and Great Britain should gain by their enterprise. The photograph shows the advance guard of four of these young men. From left to right, with the places where they are being stationed, they are: W. D. Harrison (Marcelin, Sask.); E. A. Corcoran (Wellington, Sask.); F. W. Beale (Carleton Place, Ont.); and J. D. Preston-Jones (Atwater, Sask.).

H. A. COMFORT

the advertisement elsewhere in this issue of a special meeting of ratepayers on Friday night, August 31st, at 7.30 at the public school. The object of the gathering is to consider the purchase of additional land, also the installing of a more adequate heating and ventilating system.

The need for additional land arises out of some friction that has existed between the high school and public school, each thinking themselves belonging to a different system, and so antagonistic to each other.

Two of the rooms of the public school have had more pupils enrolled during the past year than the school law allows, therefore it is considered advisable to purchase about an acre of land adjoining for the use of the high school, as at no very distant date an additional room will have to be built onto the present high school. Then, with more land the schools can be separated.

As to the heating system, the firebox of furnace has holes in it; or what we might term burned out, and for several years now the smoke and fumes have been entering the rooms; the registers making things both disagreeable and unhealthy for teachers and scholars. Under such circumstances a regular heat cannot be kept with this type of furnace in all the rooms, especially in cold weather—when most needed. Lots of times it is noon before some of the rooms get sufficient heat to be comfortable, and occasionally these rooms do not get heated sufficiently at all during the day.

The ventilation is bad under the present system. The occupants have to breathe the same air continually, as the cold and impure air is drawn through the cold air registers, past the furnace, and comes back into the rooms again reheated (but by no means re-purified). If windows are opened, as they have to be under present conditions, if fresh air is required, the children sitting by them catch the draft and become chilled, and often times take cold.

In view of the above it is very important that parents, who are ratepayers, make a point of being present at this meeting and help by their votes and influence to make the public school more comfortable, healthful and up to date, by sanctioning these very necessary improvements. —Com.

HOME BREW

The Kimberley Press has changed hands. C. D. Pearson of Grand Forks is to be in charge and his conduct of the paper will be watched with a great deal of interest. With a population that must total 1500 Kimberley is the only place of anywhere near that size that is not enjoying municipal government. And the word "enjoying" is used advisedly in this instance, because we can get track of no place that could govern itself to such splendid advantage in many directions, and with absolutely no disadvantage to itself. With its considerable school population the resultant cash receipts from liquor profits, motor licenses and pari mutuel revenues might well give the residents even reduced taxation. Even with a president with the splendid qualifications of our former townsman, A. R. Swanson, Kimberley makes a great mistake in depending on a board of trade to direct its affairs, and the Press has a great opportunity for community service in educating all and sundry out of the prevail-

ing idea that government control is the best investment.

Co-Op's. Picnic Sports Winners

Creston Valley Co Operative Association's second annual picnic on August 15th not only registered a bigger attendance than its predecessor, but those present are agreed that the line of hospitality dispensed made the 1928 outing just a little more enjoyable as well. In the line of sports chief attention was paid to giving the army of youngsters a busy afternoon, and along with the free ice cream, candy, nuts, lemonade, etc., went a programme of races that fully occupied the time of the boys and girls. The sports were in charge of Messrs. F. Knott, H. Young and T. Goodwin, and the winners of the various events are given out as follows:

Boys' race, under 10—Emmett Johnson, Alfred Nygaard.

Girls' race, under 10—Ruth Spencer, Rachel Morrow.

Boys' race, 10 to 13—Herbert Couling, Herbert Dodd.

Girls' race, 10 to 13—Molly Moore, Ruth Spencer.

Boys' race, 14 to 16—Herbert Couling, Herbert Dodd.

Girls' race, 14 to 16—Molly Moore, Eleanor Blair.

Boys' under 16, standing jump—Herbert Couling, Ed. Hills.

Boys' running high jump—Herbert Couling, Jim Downes.

Skiping—Ethel Sutcliffe, Effie Littlejohn.

Girls' running high jump—Margaret Nygaard, Dorothy Melvor.

Girls' sack race—Molly Moore, Nellie Payne.

Girls' sack race, any age—Ethel Lewis, Emily Nygaard.

Apple race, boys—Ed. Hills, J. Bliss.

Nail driving, ladies—Miss Muriel Knott, Miss Margeory Hamilton.

Apple race, girls—Madeline Moore, Sally Johnson.

Needle race—Lillian Trevelyan, Mary Sutcliffe.

Men's race—Bert Boffey, Matt. York.

Ladies' race—Mrs. Walsh, Mrs. Frank Botterill.

For dinner and supper all the available shady spots in the neighborhood of the Goat's second bend were required for the spreads of the many groups and in this department Teddy Haskins dispensed a brew of the Co Op's. "Our Best" that should certainly make this blend of tea a great favorite with all.

WITH the superb ease of a thoroughbred that takes all in its stride, the "Bigger and Better" Chevrolet never falters in the most trying circumstances—proves its mettle on the steepest grades and in the face of the greatest obstacles.

The ruggedness of Chevrolet construction alone makes these things possible. There is no part of the engine—of the chassis—of the body that was not designed primarily for rugged endurance—put to the test again and again on the General Motors Proving Ground.

As a result the "Bigger and Better" Chevrolet sturdily climbs without a halt, the steep slopes of the Rockies, and ploughs its way through the deep mud and gumbo of half-made prairie trails. In whatever conditions it may be placed, the splendid ruggedness of Chevrolet remains loyal in the service of its owner.

Its long life has become proverbial—the very name Chevrolet is a synonym for strength that endures.

The "Bigger and Better" Chevrolet—beautiful in form—luxurious in appointments—supremely rugged in construction—powered by the famous Valve-in-head engine—offers solid, enduring, trustworthy performance even under adverse conditions.

No matter what the roads—no matter what the weather—at all times the "Bigger and Better" Chevrolet stays on the JOB.

Aggregate Value of \$1,048,837,828

The substantial progress of the Mining Industry of this province is strikingly exhibited in the following figures, which show the value of the production for successive five-year periods: For all years to 1895, inclusive, \$94,547,241; for five years, 1896-1900, \$57,007,987; for five years, 1901-1905, \$98,507,068; for five years, 1906-1910, \$125,534,474; for five years, 1911-1915, \$142,072,602; for five years, 1916-1920, \$189,622,325; for five years, 1921-1925, \$281,915,492; for 1927, \$50,720,356.

Production Last Ten Years, \$453,266,721

Lode mining has only been in progress for about 25 years, and only about one-half of the Province has been even prospected; 200,000 square miles of unexplored mineral bearing land are open for prospecting. The Mining Laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any Colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, the security of which is guaranteed by Crown Grants.

Practically all British Columbia Mineral Properties, upon which development work has been done are described in some one of the Annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B.C. Reports covering each of the six Mineral Survey Districts are published separately, and are available on application. Reports of the Geological Survey of Canada, Winch Building, Vancouver, are recommended as valuable sources of information.

The local Indian reserve is almost deserted this week, the reds being at Bonners Ferry for the annual celebration of the Kootenay Indians in Idaho. The doings will last a week.

W. H. Browne, grazing ranger, will be here today for the purpose of issuing buying permits on the flats for 1928. Prospects are for a cut of about 1200 tons if good weather prevails.

For their dance on Labor Day night, Monday, September 3rd, the Rod and Gun Club have been fortunate in securing Vic. Hild, banjo, to assist with the music to be supplied by Mrs. Lister's orchestra.

Provincial police H. McLaren is taking his usual two weeks' vacation at present and left on Wednesday on a short trip to Spokane. In his absence Constable Hassard of Nelson is in charge at Creston.

Before Magistrate Major Mallan daine on Wednesday afternoon Adolph Hjort of Yakk was convicted of setting fire without a permit in contravention of the Forest Act and fined \$25 and costs.

Much sympathy will be felt for Mrs. Percy Truscott who on Friday received word of the death of her father, Robert Waldie, at Nelson. Mr. and Mrs. Truscott left immediately for that city to attend the funeral.

The trustees again remind of the school ratepayers meeting on Friday night next, 31st, at which the matter of buying a new heating plant for the public school as well as another acre of playground will be discussed.

H. S. McCreath reports the sale of his residential property on the lower side of the track to Mr. Lindquist of Kimberley, who will take possession as soon as the present occupant, Mr. Morabito, can locate a new home.

J. O. Kirk will be vice-principal of the public school next term. His appointment is made necessary due the trustees last week receiving the resignation of Miss Grace Rendall, who had charge of Division 2 last term.

J. W. Robinson took charge of the evening service at Trinity United Church on Sunday evening, in the absence of Rev. R. L. Crib, who has gone to New Westminster to accompany Mrs. Crib to Creston, and will arrive this week.

A summer carnival with a merry go round, side shows of various kinds, shooting gallery, etc., is to play Creston on Friday and Saturday, August 31st and September 1st. The tents will be set up on Barton Avenue, opposite the town hall.

R. B. McLeod, who was with the S. A. Speers store up till a few years ago, since when he has been with the Crowe grocery in Kimberley, has been engaged as manager of the Consolidated Company's big general store at Kimberley, and takes up his new work September 1st.

Mr. and Mrs. Geo. Strong, who have been operating the Commercial Hotel for the past 18 months, are quitting the business at the end of August and intend moving to reside in Southern Alberta. Mrs. J. A. Bell has taken a lease of the building and gets possession at September 1st.

Peter Andestad of Wynndel returned on Saturday from Cranbrook, where he closed a deal with Joe Jackson for the purchase of the old King George Hotel property at a price said to be in the neighborhood of \$500. As yet the purchaser has not announced what he intends doing with the building.

The Rodgers box factory had an output of at least a million and quarter pint cups for the make of strawberry and raspberry crates this season. Someone has figured it out that if the cups were laid alongside each other they would cover about 80 miles. In addition to this about 50,000 tomato "tin top" baskets were also manufactured.

Miss Bostock and Miss Nettleton, who are this year in charge of the Sunday School on wheels in the diocese of Kootenay, spent the weekend at Creston, guests of Rev. and Mrs. Garlick, with the latter giving an address on their work at the morning service at Christ Church. They plan to return to Creston next month and

will spend a few days endeavoring to organize Sunday school work in the outlying points.

Creston was much to the fore in the boxing show at Nelson on Saturday night. Ted Bush put up a fight that won the admiration of the crowd to win his three-round preliminary, and Fred Burnett, a former Creston youth, also got the decision in a three-round curtain raiser, while in the main bout Dean Peairs, another ex-Crestonite handled George Harlow who got the decision on a foul over

his opponent in a bout that was scheduled to go ten rounds. Ron, Stewart handled Bush, who had only a couple of days to get in shape for his appearance.

HE DIDN'T THINK DYSENTERY COULD BE RELIEVED

Mr. John Melling, Fenner, Alta., writes:—"I am a returned soldier, and when I came home from overseas I suffered greatly with dysentery. The doctor said it was chronic and did not think it could be relieved. However, he doctored me for quite a while, but did me no good. One day the druggist asked me if I had ever tried

"On his recommendation I bought a bottle and after I had taken it got some relief, so I got two more, and have never had the dysentery since 1925."

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

We were now in the home of the Clydesdales, and a call by Mr. Weir, from Newcastle, in the morning had brought a pressing invitation from Messrs. A. & N. Templeton, of Sandy Knowe, near Kelso, to visit them. This took a section of our party to see the great horse "Benefactor" and some of his progeny as well as the Border Leicester flock of Messrs. Templeton and here we had our first taste of Scottish hospitality. The brothers with their sisters and mother entertained us royally to a delightful tea and the "wee drapple" was not missing. Ours was a great privilege because the afternoon was lovely and from the high ground at Sandy Knowe the eye can roam for twenty to thirty miles in every direction over the beautiful Scottish countryside. Our visit over, we continued our journey to Edinburgh enjoying the night with old familiar songs.

The "main body" had gone on, passing through Dalkeith at dusk, awakening many memories for one of the members of our party, Mr. James Walker, representing the Canadian Bank of Commerce, Toronto, who was born in this pleasant Scottish town. Evening found us in Edinburgh, comfortably established in the North British Hotel, overlooking the famous Princes Street.

From Melrose we had sent a challenge to meet the best curling rink in Scotland, the aspiring rink being our friends from Deloraine, Manitoba, but unfortunately a game could not be secured owing to its being Saturday.

Our first engagement was to visit the Clydesdale Stud at Portobello, of Mr. Robert Park, owner among other notable stock of "Brunstane Again" and "Brunstane Phyllis," both of which, along with a number of fine colts, were shown for our benefit. To our astonishment all these animals, including the great stallion, were put through their paces by Mr. Parks' twin daughters, girls of seventeen, whose competent horsemanship delighted us all, as did their modesty. Mr. Park is no believer in "fancy" Clydesdales, but prefers to breed for scale and power, and we listened with respect to his views as he expounded his breeding principles.

Mr. Park took us into his home, "Brunstane House." Here Mrs. Park and her daughters entertained us to high tea in the room where the final committee meeting was said to have been held when the Union of Scotland and England was decided in 1707. The room is eight-sided and contains a 14th century fireplace. But all eyes were turned to the great sideboard on which were two Cawdor Cups, both won in the same year by sire and daughter—"Brunstane Again" and "Brunstane Phyllis."

A trip to the famous Forth Bridge, reminding us so much of our own Quebec Bridge, completed our first day in Edinburgh.

Leaving for Stirling at 8 a.m. en route for Perth, we were treated to a taste of Highland weather, for snow began to fall by the time we reached Stirling Castle. This forbidding stronghold, perched high on a dominating rock overlooking the plain beneath, is interesting at any time, but seen through a Scottish mist and falling snow, it was doubly fascinating, notwithstanding that we were robbed of the view of the field of Bannockburn. Taken and retaken, this grey building, calm enough today, has withstood many sieges. Within its walls were born James II, IV, and V, of Scotland, and here were crowned James V., Mary and James VI., of Scotland, afterwards First of England.

We walked the courts and trod the battlements. We examined with some wonder the window of the Douglas Room where the rebellious Earl was stabbed to death by James II., in 1452. We left with the influence of those fiercely stirring times still upon us, to view in front of the castle the noble statue of Robert the Bruce, where, his voice thrilling with pride, a small boy with his sister told us of Scotland's glorious days, exclaiming in this the guide to the Castle itself.

Next we came to the wonderful Wallace Monument, a great granite tower, four square, 220 feet in height and standing 620 feet above the level of the Forth. In a niche on the west corner stands a bronze statue of Wallace, measuring 15 feet from heel to helmet, to the tip of the sword 21 feet, and raised 50 feet above the doorway—a noble figure,

sword on high, summoning his followers. Those of us who climbed the inside spiral stairway of 246 steps were amply recompensed. The inner chambers are noted among other things for a wonderful echo and in one of them, the Hall of Heroes, lies the double-edged sword of Wallace, 4 feet 4 inches long in the blade which narrows from 2 1/4 inches to 1 inch. The leather mounted hilt is 12 inches long and has a two inch pommel. For six centuries Wallace's sword lay in Dumbarton Castle, being transferred to the Monument by Hugh R. Wallace, of Glencairn Castle, his lineal descendant.

Snow still falling, we arrived in Perth, the pretty, ancient city by the Tay. Perth is not a big city but its charm is instant. Moreover its fame as a livestock centre is world wide. For many years it has been the most important centre in Britain for the selling by public auction of pedigree Shorthorn and Aberdeen-Angus cattle and our arrival coincided with the biggest sale of the year.

Following lunch and a warm welcome by Lord Provost Dempster, we were soon watching with critical eyes the judging and street parade of cattle, noting with admiration the high average of quality prior to taking our places next day in the auction room.

Accommodation in Perth was so taxed by the sale that nearly half our party had to spend the night in Dundee, an opportunity of seeing the Jute City which was appreciated.

Back in Perth we had the pleasure of hearing Mr. Lovat Fraser, the greatest livestock auctioneer in Great Britain: Mr. Fraser frequently sells pedigree stock at 50 animals per hour for several hours at a stretch. He did not belie his fame, for animal after animal was sold during the half day that was available to us. The lesson of the sale, so far as we Canadian farmers were concerned, was the excellent quality of stock that was sold at distinctly reasonable prices.

The sensation of the sale was the fetching of 3,500 guineas by Captain John MacGillivray's Supreme Champion, "Calrossie Double Event" which was bought by Mr. James Fidey, the well-known exporter to the Argentine.

RESCUES TRANS-ATLANTIC FLYERS

Buffeted about by waves in their fragile seaplane in mid-Atlantic, Capt. Frank T. Courtney, E. B. Hosmer, of Montreal, son of a former Dominion-wide financier, his financial backer, Fred Price, mechanic, and E. W. Gilmour, of Glasgow, wireless operator were succored by the Atlantic Transport liner Minnewaska a few days ago. Capt. Courtney and the other three were attempting a flight from the Azores to Newfoundland, when their machine fell in flames into the sea. By the aid of their small radio set the Minnewaska found them after she left her course to go to their aid. The Minnewaska reached New York on August 6 with the rescued fliers. PAUL AT PHILIPPI

Golden Text: "Rejoice in the Lord always: again I will say, Rejoice."—Philippians 4.4.

Lesson: Acts 16.16-40.

Devotional Reading: Isaiah 55.6-13.

Explanations and Comments

The Second Christian Convert In Philippi, verses 16-18.—Paul was greatly disturbed at Philippi by a fortune-telling maid who kept following him and Silas and crying: "These men are servants of the Most High God, who proclaim unto you the way of salvation." Professor Ramsay thinks that the slave girl's mind had become distorted and diseased by her belief in her supernatural possession, but was all the more acute in certain perceptions and intuitions, and that she had become alive to the normal influence which the intense faith of the strangers gave them.

The girl followed Paul and Silas for many days, and her reiterated chant drew a crowd of curiosity seekers. Paul was "sore troubled," and at length he turned to her, and in the name of Jesus Christ bade the spirit leave her, and she became wholly normal. Nothing further is told about this girl whose story arouses our sympathy. One writer expresses his belief that "She would partake of the generous help of Lydia and of the other Christian women at Philippi, who would see in her no longer a bond-servant of the men who had dominion over her, but a sister beloved in the Lord."

Was Eminent Western Counsel

C. C. McCaul, K.C., Prominent Lawyer, Dies At His Home In Edmonton

Long prominent as one of Western Canada's most brilliant lawyers and a pioneer of forty-five years' standing, C. C. McCaul, K.C., aged 70, died at his home in Edmonton, recently, after a lingering illness.

Legal and business circles were shocked upon learning of the death of the eminent counsel, one who had taken a leading part in some of the most important cases heard in the Dominion. Known and held in high regard in the prairie provinces, in British Columbia and in the far away Yukon, where he was one of the hardy pioneers who went through the gold rush, C. C. McCaul had a wide circle of friends and acquaintances.

From 1883 to 1888, Mr. McCaul practiced law at Fort Macleod and then he removed to Lethbridge, where he established a law partnership with F. W. H. Haultain, who had opened a law office in Macleod in 1884, and later became chief justice of the Northwest Territories.

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

CHAPTER XXX.—Continued

"Here are Helmi's letters," at length said Warner; "they belong to you now. They will tell you everything. If we both get over I will take them back, after you have read them. I think if I had had a wife like Helmi I would not have doubted her. I don't think I would. However I am not saying that to hurt you—no one knows what he would do. Anyway I am glad I met you, Jack. And your wife is well and so is little Lili.

"And so you see you must get through. I may, but you must, and if you do you will tell Helmi. Come on—our chance is just as good now as it ever will be."

Jack took his hand and pressed it. "Arthur, I can't tell you what I want to say—you have been a better friend to Helmi than I have."

The bridge was a fine iron one, with heavily studded pillars. Every second light was burning. The road leading to it was not much travelled, and as they walked up the long approach their feet made a strange echoing sound. They had left their blue overcoats open, showing the gray German smocks. Jack knew what he was to say in German if accosted, but their hope was that no one was on the bridge. Every step brought them nearer, and the lights ahead of them on the Holland side twinkled like the lights at home.

Jack's heart was in a strange turmoil over what he had heard. On, on—they were half-way over now... steps echoing, echoing... no sound, but the gentle murmurings from the other side, gentle sounds... dogs barking... cow-bells... they must hurry... on, on... ten feet from the end now!

Suddenly from behind the last pillar stepped out a German guard, who thrust a flashlight in their faces, blinding them with its sudden gleam. At the end of his rifle a bayonet gleamed in the light.

"Halt!" he cried.
"Why do you halt us? We are honest men," said Arthur quietly.
"Give me your passports, then,"

said the guard, putting away his flashlight, but not lowering his rifle. Pretending to search his pockets, Arthur moved a little, then like a tiger he sprang on the guard, grasping him around the neck.

"I'll hold him, Jack!" he shouted. "Beat it! you're safe! Beat it!"

Jack found refuge in the trees on the other bank. There was a queer singing in his head, something droning like a swarm of bees. Then came a sudden pain in his shoulder like a knife thrust, and looking down, he saw the blood running off his fingers.

But he must see what happened. He crawled to the edge of the trees and looked back. Three guards were standing together, talking excitedly. He could see nothing of Arthur, but the smoke of rifles still hung around the pillars of the bridge. He crawled back into the trees and lay on the damp leaves, sobbing like a child. He was free; he was safe; but the loss of his friend was heavy on his heart.

CHAPTER XXXI.

It was a hot night in London in the early spring. The lights shone ghostly blue through their painted globes, and across the starless night search-lights stretched their spectral fingers, crossing, passing, converging, crossing again. Through the streets, in spite of the sombre gloom and the dangers of the night, an endless stream of people drifted, making a brave show of unconcern. The theatres were crowded, the dance halls echoed with rhythmic feet, and tinkled with laughter; and although grief, fear, and a sense of loss walked with every soul in London, the sound of their ominous footfalls were drowned by laughter and singing, true to the brave old British tradition.

At Victoria Station the V.A.D.'s were assembled with their waiting stretchers, for a hospital train was coming in. There were the usual noises of a great station—hooting of sirens, blowing of horns, calling of railway officials—all the sounds multiplied by the vaulted station roof. There was the usual variegated and cosmopolitan crowd, though the dominant note was the khaki of the thick-set, calm-faced Englishman; here the slim Canadian, independent and alert, actually looking for some one, and not ashamed of appearing anxious; there the blue-uniformed French officer, darting through the crowd like a gorgeous bluebird.

They are removing men on stretchers now, and the V.A.D.'s are busy. Very skillfully they manage to roll the bedcases to the stretchers and carry them to the waiting ambulances—pallid faces, all of them, some bandaged, but most of them smiling bravely, too, and glad to be home.

There is one V.A.D. looking very slim in her blue serge uniform who works feverishly. She is returning with an empty when she meets the walking cases coming out of their coach, some on crutches, some being helped by companions, arms in slings, bandaged faces, but all on their feet.

She stops with a cry of gladness. "Jack, oh, Jack!" she cries, as a young man with his arm in a sling is passing "Jack—it's Eva—don't you know me?"

She threw her arms around him. "It's my only brother—my only brother," she says to her companions, who wait for her. "Jack, are you a hospital case, or can you come with me? I have a flat, I can put you up. All right, wait for me inside on the first bench—I'll be through in half an hour."

Jack sat on the bench inside watching the crowds endlessly milling around him. He was surprised to meet his sister here when he believed her to be safe in Winnipeg. He wondered what had brought her to London—Eva, the luxury-loving, indolent Eva. It was strange to see her in plain uniform, carrying stretchers. But there was a high look on her face that transformed her. She looked more like the Eva he had known long ago.

Eva came for him at last and led him to the rear of the great station, where endless cars were parked, and put him into one which seemed very small and low.

"We pay a license according to wheel base, you know," she laughed; "and anyway, a car is a car, no matter how small it is. Oh, Jack, it's good to see you, and I have a bed ready for you. I've kept lots of the boys—I've been here six months."

Eva brought him to her flat in

Maida Vale, and switched on a light, revealed a luxurious living-room, all in black and silver.

"Do you like it, Jack?" she asked with evident pride. "I work all day in misery and horrors so I have to have beauty at night."

A large black velvet divan, with round black cushions occupied one side of the room, the rug was black with a faint silver border—the fireplace black and white tiles, and on the mantel were silver candlesticks and a silver wrought image of the Madonna. On the black lacquered table stood a silver basket with American Beauty roses.

A slim maid appeared with coffee and sandwiches.

"We'll have a real meal later, Jack," said his sister. "And now tell me where you have been."

"First," said Jack, "tell me how you happened to come over?"

Eva laughed. "You will wonder, I know, but I couldn't stand it after the old crowd broke up—and I guess I missed Humphrey, too, though I won't admit it, because we had a row before he left, and he said things to me I shall never forget. But anyway, everyone was knitting and making bandages, and I couldn't get into it. So I rented the house and I can live easily here on the money. I really like the work I am doing, and I love the boys—they are so brave. I bring them home with me sometimes and write their letters and listen to their stories. I have one little extra room—and really, Jack, I never was so happy in my life. Now tell me your story."

Jack told her of his capture, imprisonment, escape, his friend Arthur Warner and his sacrifice.

Eva's eyes were filled with tears as she listened. "Oh, Jack, wasn't he brave? But why did he do it—why did he love you so?"

"It was not for me—it was his love for my wife!"

"Why, Jack, I didn't know you were married. Now begin at the beginning. Wait, do you want to go to bed first? You look pretty white. I mustn't let you tire yourself. You see I am a pretty good nurse now, and I know how to take care of people."

"No, I am fine," said Jack; "my shoulder is nearly well again. I have had two months in the hospital with it, and I want to tell you all about it."

Jack began with his meeting with Helmi at Eagle Mines; their marriage by the magistrate; the magistrate's objections, and his showing of the newspaper report.

Wool Grading Centre For Vancouver

Plans are reported to be on foot among sheep raisers to establish in Vancouver a wool grading centre similar to that functioning in Trenton, Ontario, where at present most of the wool business of Canada is conducted. An authority states this would probably have the result of increasing the returns to the producer from 25 to 50 per cent.

Would Solve Anastasia Puzzle

Noted Historian Believes He Has Solution Of Controversy

Dr. Edward A. Walsh, S.J., vice-president of Georgetown University and a noted historian, believes he has in his possession a documentary solution to the Grand Duchess Anastasia controversy.

Whether it will uphold the woman now in the United States, under the protection of William B. Leeds, Jr., and known as Madame Tchaikovsky, as a true daughter of the late Czar Nicholas of Russia, or brand her as an impostor, Dr. Walsh will not speculate.

He is certain the mass of documents and records which he recently brought to this country from Europe, will settle, at least in his own mind—whether or not the Grand Duchess escaped the massacre of the Imperial Russian family 10 years ago.

For the past seven years, the Jesuit priest has been conducting a historian's investigation into the facts surrounding the deaths of Czar Nicholas and his immediate family. His studies have carried him to Russia, Belgium, France, Austria, Switzerland, England and Italy.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

THE INCISORS

You are very particular to keep these eight front teeth (four upper and four lower), white and sound, so their function, then to you, would seem largely esthetical.

But they have another use from which they take their name—that is—to incise, or cut.

In your child you have seen them erupt with three distinct tips or tubercles, which by and by have worn down to leave a straight cutting edge.

This notching is a purely normal development, being due to the calcification of the enamel covering from three separate centres. Now, you have noticed too, with perhaps no little concern, that upon eruption, the two upper front teeth (central incisors) seemed quite out of proportion to the size of the face, giving them an ungainly appearance.

But you must remember this—that while the face will grow larger, the teeth will not increase in size—so Nature has planned with foresight as you might have guessed.

Now try this: consult a mirror, and note the shape of your face. To which of the three types does it incline, tapering, oval or square? Then study the form of your upper central incisor—imagine it inverted, and observe that it conforms to the shape of your face. Nature is very attentive to details, ever striving for harmony.

Remember then, that you must give redoubled zeal to the care of these incisors, which are not merely useful, but are also an asset to your appearance, if rightly cared for.

Now Included In Extension Made To Jasper National Park.

The extension of 980 square miles made to Jasper National Park, Alberta, in 1927, brought the Columbia Icefield within national park boundaries. Demand For Irrigated Land

Evidence of the demand for irrigated land in Southern Alberta is the fact that the Canada Land and Irrigation Company find it necessary to open up another unit of the Vauxhall project to meet the demand, a step it was not planned to take until 1930.
