THE CRESTON REVIEW

VOL. XXV. CRESTON, B. C., FRIDAY, FEBRUARY 22, 1935 No. 43

Creston Trims Kimberley Twice

Creston Teams Win First Game in East Kootenay Basketball League—Score in Men's Clash Uncomfortably Close.

Creston rang up two wins in the first round of the Kootenay basketball playoffs last Saturday night when they played Kimberley on their home floor. Senior B Women, last year's Kootenay champions, registered a decisive win against the visitors, 25-15, while the Senior B men took a close-checking game by the narrow margin of 3 points

The first score in the women's game came right after the opening whistle when Nell Payne passed to Edith Swain from the tip-o . Howe countered with with a score for Kimberley, only to have Creston again take the lead with another basket by Swain. Kimberley never succeeded in tying the score again, although a rally in the third quarter brought them very dangerously close. The large floor undoubtedly proved a handicap to the mining town misses, but they never developed the smooth combination of the Kootenay champs. Nell Payne and Marge Levirs were outstanding for the victors, with Dot. Palmer and Edith Swain also figuring largely in the play. For Kimberley Z. Sims and E. Whebell starred, not only in scoring but also in the floor play. The teams:

Kimberley—Sims 6, E. Whebell, Howe 2, Morrison, McFarlane, Swann, Bell, Bryant, Nesbitt. Total 15.

Creston—Nora Payne, Speers 2, Nell Payne 5, Palmer 2, Swain 4, Bourdon 4, Abbott, Armitage 1, Levirs 7: Total 25

Referee, F. P. Levirs.

The men's game was a torrid struggle from beginning to end, featured by a strong defense tactics, coupled with low scoring and hard checking. Kimberley got away to an early lead by sinking 6 out of 8 free throws in the first half, Creston converting only 2 out of the same number. Kirk for Kimberley, and Crawford for Creston, scored the only field baskets of that stanza. The second half was marked by a Creston rally which brought the local team into a one-point lead. A nice basket by Couling increased this 2 points just before the closing whistle. It was a guards' game throughout, Swanson, Doug. Corrie and Crawford starring for their respective teams, but the work of two diminutive forwards, Herb Couling and Alf. Foubister was spectacular.. The teams:

Kimberley—A Foubister 7. D. Foubister 7, Shaw. Nicholson, Basso, Barr, Kirk 5, Swanson 2: Total 14.

Creston—H. Corrie 3, Couling 6. Holmes, Bourdon, Cobus 2, D. Corrie 4. Downes, Crawford 2, Rogers Total 17.

The return game will be played at Kimberley on February 23rd.

Wynndel

Miss H. Andestad spent last week renewing acquaintances in Nelson.

Lester Martell left last week for Cranbrook, where he is receiving medical advice.

Miss Ruth Hare of Creston was a weekend visitor, a guest of Miss Hilda Hagen.

Mr. Cuell of Calgary, Alberta, was a visitor here last week with his niece, Mrs. R. Eakin, jr.

Mr. and Mrs. Paul Ofner, jr., and daughter, left last week for Lumberton, where they will reside.

Mrs. C. Ogilvie entertained on Wednesday last at bridge. The high score prize was taken by Mrs. Wood, and Mrs. Packman, consolation.

Chas. Moore, surveyor, of Creston, was here last week on a survey of a new road to serve the flats. Some work is being done on the main road by the blacksmith shop.

The Women's Institute bridge party at the home of Mrs. Hagen on Saturday evening was a very sociable affair. Six tables were in play, with high scores going to Miss O. Hagen and O. Payette. Consolation prizes were annexed by Mrs. A. Benedetti and A Glasier

The home of Mr. and Mrs. Wittman was the scene of a surprise party on Tuesday of last week, the occasion being the 25th anniversary of their marriage. The family and friends gathered to extend congratulations and good wishes, and a very pleasant evening was spent.

The usual school St. Valentine party was held at the school on Thursday last. In the junior room, after lunch, visiting children were made welcome and games were played. At 2.30 p.m. the schools combined for delivery of the valentines. Three large boxes of these were distributed by four postmen elected by the children. Both teachers and children were well remembered by their friends.

Splendid tribute was paid the late Alex. Cameron of Wynndel, who's death occurred at Coleman, Alberta, on February 7th, at the memorial service in the United Church on Sunday morning. The congregation filled the edifice to capacity, in the audience being a dozen members of Creston Masonic Lodge, of which order the late Mr. Cameron was a distinguished member in Alberta. The pastor, Rev A. Walker, spoke feelingly of the activities of deceased in the community as well as the church and of his high regard for the children and much unselfish service rendered in various ways. Deceased was in his 86th year, and came to Frank in 1901, later moving to Blairmore and Coleman, Alberta, in which town h served as mayor for several years. as well as town councillor. He was prominent in the work of St. Paul's United Church and held many offices in the Masonic order. Particularly appropriate was the sacred number rendered by the children at the church service, while Mrs. Geo Huscroft sang with feeling, "Only Remembered by What He Has Done."

Erickson

L. T. Leveque has just taken delivery of a new 1935 Plymouth sedan.

Mrs. F. J. Donkin was a visitor with Nelson friends the latter part of the week

L. Littlejohn was oombining business with pleasure on a trip to Spokane at the end of the week.

Rev. M. C. T. Percival of Creston will officiate at Anglican Church service at the schoolhouse at 3 p.m., Sunday, 24th.

Mr and Mrs. R. M. Telford and Miss Marcella Sanford were at Kimberley on Sunday for the Creston-Kimberley badminton tournament

Mrs. R. Thurston is now associated with Mrs. E. Haskins and Mrs. W. H. Kemp in the conduct of the Anglican Sunday school at Erickson

A night shift is now being worked by a crew in charge of channel improvements at the West Kootenay Power & Light Company, Limited, plant at Goat River canyon.

The St. Valentine tea and sale of cooking by Erickson Christ Church Guild on Wednesday afternoon last was a great success in every way, and enjoyed a cash intake of over $25.

A meeting of the ratepayers of Erickson school district is called for Tuesday evening, February 26th, at 8 o'clock, to decide upon the consolidated high school district offer from Creston.

Lister

Miss Ida Rylan of Kimberley has arrived on a visit with her parents, Mr. and Mrs. B. Rylan.

Fred Yerbury and Douglas McKee are home from a short holiday visit with friends in Kimberley.

Mrs. StDenis of Canal Flats is a Lister visitor this week, with her parents, Mr. and Mrs. J. W. Pendry.

Miss Agnes Sinclair has left for Cranbrook, where she has secured a position and expects to remain permanently.

Miss Jean Flynn, who has been with her grandfather, Tom Yonng, has been called to Trail due the illness of her mother.

Harry Yerbury is home for a few days from his trap line at Summit Lake and reports a very satisfactory catch of fur this winter.

John Huscroft, who is at the mine at Tochty, was home at the end of the week. Elmer Huscroft has just left to work at the mine.

The Community Society are having a court whist on Saturday night at the schoolhouse, with Mr. and Mrs. Fred Powers in charge. President Frank Baker will give a ten minute talk on "Telescopes and Stars."

The community Society entertainment on Saturday evening at the school included a couple of hours fun for the children followed by dancing to music by a local orchestra. Those in charge of the evening were Mrs. D. J. McKee, who was assisted by Misses Minnie and Margaret Huscroft, Agnes Sinclair and Peggy Smith. There was the usual lunch at midnight.

There was a fair turnout at the ratepayers meeting on Thursday night for the discussion and vote on joining in with the proposed consolidated high school at Creston. Fred Powers presided, and he and John Bird very thoroughly explained the proposal. While the vote was against the proposition the motion also expressed regret that due to present circumstances it was impossible to entertain the proposition.

A representative lot of residents of the Huscroft district met at the home of Mrs. M. Ross on Monday evening and after talking things over it was decided to organize the Deer Lodge Club, a community organization for betterments at Huscroft. There is a managing committee of three with Harry Demchuk, chairman; Mrs. Ross, secretary, and the third member is Fred Huscroft. The opening event is a skating p rty and weiner roast this (Friday) evening.

Hospital Drive Ends March 1st

Ask Generous General Public Buying of Membership Tickets—Hospital Appreciated and Valuable Asset to District.

No matter from what angle you view the proposition it still must be admitted that Creston and district's most valuable asset is the Creston public hospital.

In taking care of the usual run of patients, accidents or emergency cases the hospital is admirably equipped, efficiently staffed and provides a medical service that few would like to see the district be without.

And aside from the humanitarian aspect, the hospital, as a purely business proposition, means much to the village with an annual expenditure of several thousands of dollars in patients' fees, government grants and fees from transients which, were there no hospital, would go to some other town.

That the hospital is appreciated is indicated in the annual report which shows a 98 per cent. increase in hospital service as compared with 1933.

In taking care of all requiring its service the hospital must, of necessity, admit more than a few who are unable to pay for treatment, and to provide for this as well as free the new building of debt, the hospital must have money to carry on its work.

To secure these funds a drive is now drawing to a close and a last appeal is made to the general public to purchase generously of these one dollar membership tickets, all of which give holders an opportunity to win $750 in cash or ten acres of the land now being dyked by Creston Reclamation Company, Limited.

Friday next, March 1st, is the last day these tickets may be purchased. "He that giveth to a good cause lendeth to the Lord and He will repay." If you are satisfied with the security, step right up and get your t.ckets.

Sirdar

Frand Parento, who is employed at Tye, was home for the weekend.

Gerald Timmons of the Lakeview mine, Twin Bays, was a business visitor here, Saturday.

D. Butterfield, Chas. and J. S. Wilson were at Creston, Thursday evening, attending K.P. lodge.

Chas. Moore of Creston has been engaged the past week laying out the grade on the new highway.

A. Vito, who is at present in Cranbrook receiving medical attention, is reported as being much better.

Further shipments of beef have been made to Trail this week and will continue for the next two weeks.

Percy Mackie of Boswell was a visitor here on his way from Creston from where he brought in a load of baled alfalfa.

Coote and Gray who ran the freight service between Nelson and Creston have sold their interests to Mr. Humphries.

Clarence Tedford has completed the haul of timber from Wynndel to Crawford Bay for the bridge at that point.

Donald Young and Godfrey Vigne, both of whom are employed here, spent the weekend at their homes in Creston.

Douglas Butterfield of Wynndel has taken over the position of second cook at the road camp here, replacing Donald Bolton.

Mike Talarico is engaged as watchman on the C.P.R. track and adjacent to where the new highway is being constructed.

Lin Anderson, who received a rather severe injury to his back on the new highway construction, has now returned to his duties

"Shorty" Mill n of Creston was a business visitor to Atbara at the first of the week making some repairs to the telephone line.

Several experienced prospectors, it is learned, are to operate on the area lying behind Sirdar, and will go in from about Sanca in the early spring

The water as indicated by guage at Slough bridge reads 1.85, a fall of 0.10 for the week. According to the present prevailing weather a drop in water is to be looked for.

A considerable crew is engaged on the highway at present, with two caterpillars. Much progress has been made this past two weeks and the work is beginning to come into shape.

Mr. Deverson, poultryman from Crawford Bay, was at Atbara on Thursday and is very proud of the honor his Leghorns have won in the championship contests.

The number of autos passing through here of late has been on the incr.ase. It is noted that a considerable portion of the traffic is composed of cars from up the lake on their way to Creston.

Usually at this time of the year many deer are to be seen in the vicinity of Atbara, but this year none are encountered due it is thought, to the heavy and frequent blasting on the highway.

The badminton match slated to take place here between Boswell and Sirdar at the weekend had to be postponed on account of structural repairs being deemed necessary to the community hall.

The C.P.R. bridge crew under G. McLean was here for several days this week removing the old navigation dolphins at Kootenay Landing, and effe ting some repairs on the approach to the steel bridge crossing the Kootenay River.

The Bayonne Mining Company have a crew of ten men quartered at Tye. This crew is engaged on road repairs. Weather conditions are not favorable for the operations of the crew and the work of hauling ore is being retarded to a considerable extent on this account.

Extreme care has to be exercised in blasting on the new highway as the road is in places as close as 70 feet from the railway track making it necessary to cover the rails with timber to protect them from flying rocks. Th rock cut at one point rises to over fifty feet.

Mrs. George Cam entertained at a bridge party on behalf of the Sirdar Badminton Club on Thursday evening, Mrs. Pelle was the winner of the ladies first, and Mrs. Proctor, consolation. Gent's first prize, Bert Ingram; consolation, Chuck Lombardo. A dainty lunch was served afterwards. The club will benefit to the extent of a tidy little sum.

A meeting of the Community Hall directors was held here with President J. Talarico in the chair. The resignation of Tony Lombardo was accepted and a resolution passed to acquire the land on which the hall is situated. Certain repairs to the hall itself were discussed and it was decided that these be carried out immediately.

Kitchener

A large crowd from here attended the dance at Yahk on Friday night.

Miss Mary McDonald left for Cranbrook, where she has secured a position.

F. Pym, head of the forestry office, Cranbrook, was here on business last week

Z Geroux, who has been working at Yahk, is home having been injured while at work.

Mrs. Arthur Bowness of Cranbrook is here on a visit with her parents, Mr. and Mrs. Chas Nelson.

Mrs C. Senesael spent the weekend at Erickson, a guest of her daughter, Mrs. D. F. Putnam.

Mrs. E. Driffil of Vancouver is here on a visit with Kitchener friends, a guest of Mr. and Mrs. G. A. Hunt.

A good crowd was out for the bridge drive in the Paulson store on Wednesday evening last. Bridge and Five Hundred were played. The receipts were $4.10.

Little Miss Marjorie Blair was hostess at a St. Valentine party at the home of her parents, Mr. and Mrs. Elmer Blair, where she entertained a number of her young friends on Thursday.

Will Wickholm, who has been driving truck at Gentfell West National Defence camp, has been transferred to the airport at Kitchener. Pat Kennedy of the airport has been shifted to Gentfell.

George Priest has been transferred to Michel, where he will be first cook in a National Defence camp. He will be greatly missed as he has conducted an orchestra at Kitchener the past two years, and was in great demand for all entertainments.

Cardinals Even Count, Groceteria

Men's Division Local League is Evened Up When Cardinals Beat Groceteria—Review and Moore's Garage Win Again.

Led by Nell Payne and Betty Speers, Cecil Moore's Garage ran Pharmacy ragged in their league fixture Friday night. Betty Speers found the basket within a ew seconds of the first whistle, but the promise of a high-scoring game was soon withdrawn. Lack of combination and passes that failed to connect kept the score down throughout the first half, After the intermission Moore's got down to business and found little difficulty in piercing a disorganized defense. A feature of the game was the atrocious foul shooting. Moore's netting one out of 7, and Pharmacy none out of 14. The teams:

Moore's Garage—Swain. Payne 10, Speers 6, Hare 2, Crane 2, Tompkins 1, Abbott 2: Total 23.

Pharmacy—O. LaBelle 2, E. LaBelle 2, Olivier, Learmonth 2, Tompkins, Y. LaBelle, Moore: Total 6.

Loallo made a poor start but a great finish, giving Wynndel a hard run for the money. Outplaying Wynndel at their own speedy game, they only failed to bring home the bacon because of their tough luck in shooting. Time after time shots by Bourdon and Maddess rolled round and round the rim, only to fall out in the end. Chet. Goplin and Art. Nastasi played a bang-up game for the losers, while Andy and Elvin Hagen and Joe Martell starred for the winners. The teams:

Wynndel—O. Payette, C. Payette 2, A. Hagen 5, E. Hagen 5, B. Martell, J Martell 6, Packman 5. Total 23.

Loallos—Truscott 3, LaBelle, Goplin 4 Bourdon 4, Maddess 2, A. Nastassi 3. Total 15.

The fans expected a thriller from the Groceteria-Cardinal game and they got all they expected an more. The redshirti built up a nice lead in the first half, leading 17 to 7 and it looked as if the grocery boys could pack up and go home any time. Just about then, however, the latter decided things had gone far enough and unleashed a speedy attack which had their opponents dizzy. Hunden, the rangy centre, engineered some beautiful plays, while Rogers played brilliantly on the guard line. To Doug. Corrie and Ben Crawford goes the chief credit for the Cards' victory, the latter team winning out by a slender margin of one point.

Cardinals—H. Corrie 5, Mark, Holme 3, Cobus 5, Ross, D. Corrie 4, Gobbett Crawford 5. Total 22.

Imperial Groceteria—Couling, Payne, Bourdon 2, Hunden 13, Rogers, Martello 6, Downes. Total 21.

Canyon

Rev. Lindgren of Nelson was here on Tuesday and had Swedish Lutheran service at the United Church that evening.

The Boy Scouts are putting on a variety concert at the hall this (Friday) evening to raise funds or the troop's successful operation.

E. Bothamley is away on a visit with friends in California, making the trip with the Clarks of Erickson, who left by auto on February 12th.

C. B. Twigg, district horticulturist, of Creston is conducting a pruning school in Canyon this week, with a dozen ranchers taking the course. He has been operating in the Knott and Berggren orchards.

All the local nursery companies representatives have been calling on Canyon orchardists the pa t week They include W. V. Jackson and Percy Boffey of Creston, and A. Bond of Canyon. All report a preference for cherries in tree buying.

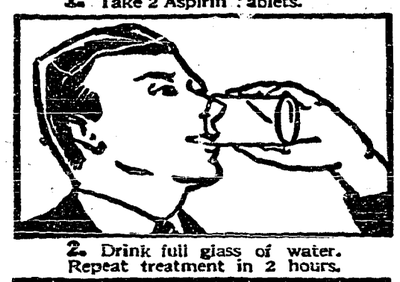
R. G. Smith, who is in charge of the crew of about a dozen men who are at work on rock removal at Goat River canyon below the power plant, is making satisfactory headway. With so much spray from the dam crest operations are not altogether comfortable.

35 ratepayers of Canyon school district were out on Friday night for the meeting to discuss the proposed consolidated high school at Creston. The chair was occupied by A. Spencer and after talking the proposition over at some le gth the meeting by unanimous vote decided to stay out of the project.

A feature to the United Church school session on Sunday morning was the presentation of attendance certificates. Bars to attach to medals previously won were awarded Leonard Bond, who has 12 years attendance without a missed Sunday to his credit, while Holly and Grace Bond have a similarly fine showing for 11 years. Charlie Kolthammer has completed seven years without a miss and Kenneth Kolthammer four years. It is doubtful if another boy in B.C. can claim a better showing than Leonard Bond.

QUICKEST METHOD TO RELIEVE A COLD

1. Take 2 Aspirin Tablets.



2. Drink full glass of water. Repeat treatment in 2 hours.

3. If throat is sore, crush and stir 3 Aspirin Tablets in a third of a glass of water and gargle. This eases the soreness in your throat almost instantly.

Follow Directions to Ease Pain and Discomfort Almost Instantly

When you have a cold, remember the simple treatment pictured here . . . prescribed by doctors everywhere today as the *quick, safe way.*

Because of *Aspirin's* quick-disintegrating property, Aspirin "takes hold"— *almost instantly.*

Just take *Aspirin* and drink plenty of *water* . . . every 2 to 4 hours the first day—less often afterward . . . If throat is sore, use the *Aspirin* gargle.

But be *sure* you get ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer in the form of a cross on every *Aspirin* Tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

Danger On Highways

Open Road Often Tempts Motorist To Excessive Speed

Straight stretches of rural highway vie with city street intersections as the general scene of the greatest number of Pennslyvania motor vehicle accidents, says Capitol News. Thus far this year 184 persons were killed and 7,460 were injured in 10,606 collisions at street intersections. On the open highways, where the lure of high speeds draws unwary drivers to the brink of danger the Division of Safety reports 9,051 accidents, including 502 fatal and 5,354 non-fatal have occurred.

TELLS EXPERIENCE BEFORE A NOTARY

Mrs. Albert Aubry, 1605 Maisonneuve St., Montreal, relates in a sworn statement how Fruit-a-tives bettered her health. She now enjoys life after years of poor health and, so you may be sure of its truth, Mrs. Aubry tells of her experience in a statement made under oath. She says,—"I was troubled for years with dizzy headaches. My bowels did not function regularly. I had no appetite. I had no sleep. It was difficult for me to do my work. I tried a great many laxatives but found most of them too violent. Finally I started taking Fruit-a-tives. In a very short time my health became greatly improved. I now enjoy life much more than before I learned about Fruit-a-tives."

Copy of Mrs. Aubry's complete sworn statement will be sent on request. Write Fruitatives Limited, Ottawa, Canada.

FRUIT-A-TIVES—25c and 50c EVERYWHERE

FALSE TEETH DR. WERNET'S POWDER HOLDS FAST

When this dentist's grand prescription for holding plates firmly, snugly and comfortably in place has the largest sale in the world—there's a reason—ask your dentist—he prescribes it—never causes soreness—inexpensive.

SUNDAY SCHOOL LESSON

FEBRUARY 24

PETER HEALS A LAME MAN

Golden Text: "But Peter said, Silver and gold have I none; but what I have, that give I thee." Acts 3:6.

Lesson: Acts 3:1 to 4:31.

Devotional Reading: Isaiah 35:1-6.

Explanations And Comments

Peter Heals a Lame Man, 3:1-10. Nine in the morning and three in the afternoon were the hours for sacrifice and prayer. It was the ninth hour, or three in the afternoon, when Peter and John went to the temple to pray.

At the temple door which was called Beautiful they saw a man sitting and begging alms of all who entered the temple. Josephus says of this door that it was adorned in a more costly manner, having much richer and thicker plates of silver and gold than the others. The man had been lame from birth, and was daily carried to that spot to beg. He must have been well known to all in Jerusalem, "he was part of the city landscape, the people knew him as they knew the carved columns of the temple doorway."

The man was not expecting alms from every worshipper, and probably glanced indifferently at Peter and John. To rivet his attention upon them and arouse his expectations, Peter said to him, "Look on us." The beggar gave heed to them. Then said Peter, "Silver and gold have I none."

Instead of silver and gold the man needed strong limbs that he might earn his own living. True charity helps men to help themselves. Peter had no money, but he had a look of sympathy a word of hope, and he quickly added, "But what I have, that give I to thee." You recall the story told by Turgenieff of the Russian who put his hands in his pockets and found nothing there, and then said to the beggar before him, "I am sorry, brother; I have nothing with me, brother." And the beggar, touched by the word "brother," said, "That, too, was a gift, brother."

"In the name [by the power] of Jesus of Nazareth, walk." Peter then took the man by the right hand and raised him up. That was the secret of the cure. "It was human sympathy and human helpfulness cooperating with divine grace. The power of God just then was operating through Peter's strong right arm."

Immediately the man's feet and ankle-bones received strength. The Greek words used here for ankle-bones are said to be those which a doctor would use in describing a patient, and are one of the minute proofs that Luke the physician was the writer of The Acts. The man leaped up and began to walk, and he entered the temple with them, all the time leaping and praising God.

Chinese Finds Queer Spider

A spider with a human face has been discovered in Chumatien, Honan. Its body is small, but its head is abnormally large. The face is dead white, with black eyebrows and a back nose. White lips add to the horror of its appearance; its feet are dark brown. A well-to-do Chinese found the creature in his house. He has sent it to the people's educational institution.

"I received twenty proposals before I was married."

"Heavens! Wasn't your husband persistent!"

WORLD HAPPENINGS BRIEFLY TOLD

A special committee of 15 members will study a national housing scheme for Canada, it was announced in the House of Commons by Premier R. B. Bennett.

Five Red army officers reported in Moscow after walking and skiing 4,300 miles across Russia in 74½ days of actual travel. They started from Perchinsk, Siberia.

Provision for the appointment of a board of reference to arbitrate the dismissal of teachers under the Secondary School Act, is provided in legislation before the Saskatchewan legislature.

Regina's community chest organization, under the Saskatchewan Benevolent Societies Act, took place recently with 25 charitable, philanthropical and social service agencies signing as charter members.

Arnold Webster, teacher of history at the Fairview commercial high school, has been chosen Co-operative Commonwealth Federation candidate for Vancouver-Burrard federal constituency.

An administration bill which revealed the United States plans to seek reciprocal agreements with Canada and other countries in an effort to end liquor and other forms of smuggling has been made public by the house of representatives ways and means committee.

Damage From Motor Boats

Cause Waves Which Are Menacing Buildings In Venice

Fears that the appearance of motor boats in the canals of Venice, Italy, would injure the buildings, have been realized. Venice is built on piles, and a committee of architects has found that the pounding of the waves made by the "put-put" boats has weakened the piling. At least $5,000,000 will be required to repair the damage already done, and immediate action is necessary to save many beautiful buildings from collapse.

Scientists have found "regulators" of animal growth. Tests on salamanders give a clue as to why ears do not grow as big as hands.

ARE YOU RUNDOWN, AILING?

Mrs. John Blackmon of 5 Victoria St., Stratford, Ont., said: "My health failed, I had weak and dizzy spells, had an all-gone feeling, poor digestion and was constipated. After taking Dr. Pierce's Golden Medical Discovery the stomach trouble and constipation were corrected and I had no more dizzy or faint spells." New size, tabs. 50 cts., liquid $1.00. Write to Dr. Pierce's Clinic, Buffalo, N. Y., for free medical advice.

I'll TELL YOU HOW TO COOK CAULIFLOWER *without the neighbors knowing it*

Wrap it in Canapar cookery parchment. Seal in the aroma, flavor and goodness all at once. Cook your boiled or steamed FISH in Canapar. Line your roasting pan with it. It prevents fats and juices from burning and makes the meat more tender.

Canapar saves fuel . . improves food . . and eliminates scraping and scouring of pots and pans.

You can use Canapar over and over again. It will not absorb odors. It makes a wonderful dish cloth, being silky and very tough when wet. Doesn't shed lint.

THE TENDERFOOT

By GEORGE B. RODNEY

Author of "The Coronado Trail", "The Canyon Trail", Etc.

CHAPTER XII.

Duro Stone summed up affairs fairly accurately as he headed for Seco. That summary included Joe Carr, Frank Crewe, the Hour-glass, Dustin, Kane (whom he knew not) and . . . Edith! He grinned a little as he realized that she was not to be judged by any ordinary standards. Yet . . .

"The dirty hound. . . . He wants to marry her. . . ."

That appealed to his sense of humor and he chuckled.

"To be sensible . . . If I can . . . How can I blame another man for wantin' to do what I want to do myself? Dog-gone it! It makes me tired. I've spread my rope from Canada to Mexico and now I've come to the end of the trail. . . ." Suddenly he knew that, if Edith Carr was at the end of that trail to welcome him, he wanted no other trail.

"All the same that man Dustin's a dirty hound," he muttered. "Now to try to find out what I want. . . Here's Seco. . . ."

Seco was an ordinary cow-town with a courthouse in the middle of a square from which the rest of the town radiated. He parked in front of a small frame building that bore the sign:

SECO COURIER
Evan Jameson, Editor and Prop.

"If any information is to be had it ought to be in a newspaper office," he muttered. "If he hasn't got an encyclopedia I don't know who will have one."

A slouching man rose from a half-recumbent position across a desk and eyed him as he entered. Stone grinned affably and thrust out a hand.

"My name's Stone," he said pleasantly. "I work for Carr at the Hour-glass. Are you Mr. Jameson by any chance?"

"Not by chance, by design and for my sins I think." said Jameson with a sour grin. "What can I do for you?"

"Have you got an encyclopedia in the office and if so, will you let me consult it?"

"Over on the shelf yonder," said Jameson. "Help yourself."

He watched curiously as Stone took down volume after volume. When he replaced the last with a sigh as of disappointment, Jameson became frankly curious.

"Can't you find it?" he asked.

"It's not in the book . . ." Stone perched on the desk and rolled a cigarette. "Maybe you can help me, Mr. Jameson. Have you lived long in this part of the country?"

Jameson went to the dusty window and pointed to the great bulk of Myrant Peak that thrust above the skyline.

"When I first came here," he said, "that peak was just a hole in the ground. It's grown up since then. I haven't. You say your name's Stone? Are you the man who slapped a drink of whisky in Corse's eyes in the Silver Dollar?"

"I reckon I did," said Stone, grinning. "Sometimes I'm mighty careless where I throw my heel-taps. Why?"

"It was you, too, who had the quarrel with Sam Dustin and who dumped him into Soda Springs, hey?"

Stone nodded. He wondered how and where Jameson had learned of that. Jameson enlightened him.

"My wife heard it . . . from a friend and she told me. I haven't said a word about it. I thought it best. Maybe I can help you about that item you want in the encyclopedia," said Jameson shortly.

"First of all. . . . Do you know an old desert-rat named Kane?"

"Who? Dad Kane? Old man Shammy-skin Kane? They call him that because he always wears a shirt made of chamois skin. He says he can use it with his mercury to try out his gold ore . . . when he finds it. Of course I know him."

"Is he straight?"

"Absolutely. That is, he's perfectly honest except in minin' matters. He's queer though. Tell me what these questions mean."

Stone thrust a hand deep into his coat-pocket and kept it there while he studied Jameson. He liked what he saw and his face broke into a pleasant smile.

"I've been on the Hour-glass payroll for four months now," he said irrelevantly.

"It's a good outfit," said Jameson. "I'm sorry they've had so much hard luck. Now take Joe Car. He's a fine old fellow but he has dropped behind in the race for money and he will never catch up. He just don't know what it's all about. He's got a good outfit, too, but a good body can't help if the head is gone. Of course he's got a good man in Frank Crewe. They don't make many men like Crewe. . . ."

"And Edith . . ." said Stone tentatively.

Jameson's grim face instantly lit with a light that there was no mistaking. Even the silence answered Stone's half-formed question.

"Yeah," said Jameson quietly. "Edith . . . What about her?"

"Crewe told me that, while Edith was out riding with me, that man Dustin came over to the Hour-glass. He saw old man Carr and told him that he wants to marry Edith . . ."

Evan Jameson, the lanky editor of the moribund paper that certainly could not support him, threw himself across his desk and grabbed at Stone's arm.

"Tell me that again," he said earnestly. "See if I'm hearin' right."

Stone told him curtly and every word sank in. Jameson nodded once or twice and seated himself on the edge of the desk.

"You listen to me," he said quietly. "You've been some months at the Hour-glass. You must know how things are out there. . . ." Stone nodded. . . . "I thought so. I've heard a lot of you. . . . From . . . Oh, from some people and what I've heard I like. . . . Wait. . . ." He stopped Stone's attempted speech.

"I'm a married man, Stone. I've got the finest wife in the world and we've got two kids. One's a boy named for me. The other's a girl, Mabel; named for her mother. Some day when you have kids of your own, you'll understand what I'm tryin' to tell you. . . . Last year the boy was taken mighty sick while I was away. Edith Carr only knew us fairly well but she stopped in from time to time to see if she could help Mabel. I was over at Wilton longer than I expected and I couldn't get back. The third day Sim Young came in from Seco and told me the boy was down with a bad case of diphtheria. . . You may guess what that means in a place like Seco. Our only doctor then was a horse-doctor and he was generally full. I got back as soon as I could make it . . . It had been a cold night and Edith Carr, hearin' how sick the boy was, spent it with Mabel. They spent that night tryin' to cook the poison out of him. . . . You know how it is I reckon. Know anything about diphtheria?"

Stone shook his head.

"It stops up all the tubes and chokes the person to death. You've got to be right on the job . . . Mabel was played out. . . She was sick, too. . . . The boy was taken sick in the night an' Mabel . . . Well, she says frankly that she lost her nerve and didn't know what to do. . . . She stood there watchin' the boy choke to death before her eyes. . . .! That's when Edith Carr came in! She saw what was takin' place. . . . She saw Mabel couldn't help herself. . . . She pushed Mabel out of the room, pulled the rubber tube off a hot-water bottle and stuck it down the kid's throat. . . Then . . . By God, Stone . . .! She sucked it clear! Do you get that? She gave him back his life. . . Any need to ask what we think of Edith Carr?"

There was no need. After one brief glance at Jameson, Stone knew that he could "go the limit."

"I'll tell you why I want to find old Man Kane," he said.

He perched on the desk and told Jameson of his first row with Dustin. He told him of the fight wtih Corse and Gray in the hills above the ranch. He told how he found old Kane's lost notebook and of the trip that he took with Edith. Finally he laid on the desk the pieces of rock from the mine.

"I can get Buxton right here in town to assay 'em," said Jameson. "He'll will not talk if I tell him not to. . . Go on. . . ."

"Well . . . we were riding home when Dustin, who had been at the Hour-glass, came peltin' down the trail and tried to ride me down in the golpe de caballo. His horse must have slipped or something for Dustin was upset. (Jameson's eyes gleamed at that.) While he was lyin' there unconscious, I went through his pockets. I found a note from Joe Carr to Pegram of the Seco bank for eleven thousand dollars. Pegram had sold it to Dustin. Then, when I got to the Hour-glass, Crewe told me that Dustin had come there to tell Carr that he wants to marry Edith. . . ."

"Well . . .?" Jameson's voice took a tool edge. "Go on. . ."

"Then I took the car and came here. . . ."

"To look for something in an encyclopedia," said Jameson.

Stone grinned. "You stick to the point, don't you? Look here . . ." And he laid on the littered table an envelope and the cigarette that he had taken from Dustin's pocket. He emptied the envelope on the desk and fingered the contents—three or four stubs of burned cigarettes and a little pile of brown dust. Then he picked up the whole cigarette that he had taken from Dustin.

"These are not tobacco," he said. "I found the stubs in the camp where Kane must have gone with Dustin. . . . Or else Dustin was there alone. I don't know. I want to find Kane. This stuff may be marahuana. . . . I don't know it. I know it is not tobacco in any form. Do you know it? I was lookin' for marahuana in the book."

Jameson crumbled some of the stuff between thumb and forefinger; made a face and spat suddenly.

ONE OF THE WORLD'S GREATEST ILLUSTRATED WEEK-END NEWSPAPERS

PRODUCED IN CANADA BY CANADIANS FOR CANADIANS

10¢ EVERYWHERE

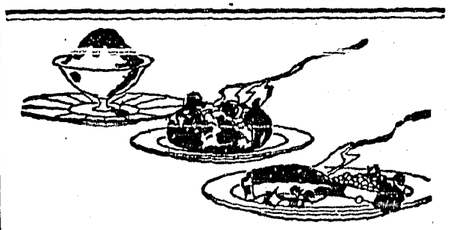
THE TORONTO STAR WEEKLY

5 Sections Every Week — 34 colored comics

THIS Great Canadian Illustrated Weekly--produced in Canada by Canadians — for Canadians — one of the world's greatest newspapers — is as Canadian as Hockey and quite as vigorous—with news of the world, stories and articles by world-famed writers and artists and by Canadians of international reputation. A clean, happy, youthful, illustrated newspaper. . 5 sections — in fact, 5 newspapers in one — every week—Entertainment—Amusement—Information for every member of the family.

U.S. Population

Census bureau figures disclosed that the population of the United States has jumped up nearly 20,000,000 since 1930. The latest census estimate places the population at 141,574,000 people, compared with the 1930 census of 122,775,046.



If You Eat Starches Meats, Sweets *Read This*

They're All Necessary Foods — But All Acid-Forming. Hence Most of Us Have "Acid Stomach" At Times. Easy Now to Relieve.

Doctors say that much of the so-called "indigestion," from which so many of us suffer, is really *acid* indigestion . . . brought about by too many *acid-forming* foods in our modern diet. And that there is now a way to relieve this . . . often in minutes!

Simply take *Phillips'* Milk of Magnesia after meals. Almost immediately this acts to *neutralize* the stomach acidity that brings on your trouble. You "forget you have a stomach!"

Try this just once! Take either the familiar liquid "PHILLIPS' ", or, now the convenient *new* Phillips' Milk of Magnesia Tablets. But be *sure* you get Genuine "PHILLIPS' ".

Also in Tablet Form:

Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

HOW TO AVOID ILLNESS

When you begin to feel fagged out at the end of the day, look out. Illness is just around the corner waiting to lay you low. At times like this there's nothing like Wincarnis, the great tonic that has won over 20,000 recommendations from medical men.

Wincarnis is a delicious wine, not a drug. In each bottle there are all the nourishing elements of 2½ lbs. of grapes added to the strengthening elements of beef and guaranteed malt extracts.

These elements in Wincarnis will quickly restore lost energy. They will help you to sound sleep, vigorous awakenings and active, enjoyable days. Drink this delicious wine regularly three times each day, and soon years will drop from your shoulders.

To pick you up when you are out of sorts, to soothe your nerves, enrich your blood, or in cases of nervousness, insomnia, anaemia and debility, take Wincarnis. At all druggists—Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto. 15

Letters to the Editor

The Postoffice Site

Editor Review:

Sir,—The new postoffice site, so current rumor says, is to be somewhere in close proximity to the present office.

I wonder if people are considering that, despite the pessimists, Creston is due for expansion; that the natural avenue of growth is eastward; that the corner of Canyon Street and Victoria Avenue will, before many years, be the centre of the warehouse district.

Are the people of Creston going to have any voice in the ma ter, or are they going to leave the patronage committee to choose the site? Are they going to take enough interest to get at least fair value for the $30,000, Like the Cninaman, I ask to know.

R. G. PENSON.

Defends "Electric Sewer"

Editor Review:

Sir,—With regard to the comments on my "electric sewer," it appears there must be some misunderstanding. I had no idea in the world that the cement block which I speak of was to be heated, and my letter does not say so. It was simply to supply the basis of a seat through which an electric nozzle would be inserted so as to come in contact with the receiving chamber, I have in my mind the nozzle of an accetylene torch, or the ordinary blow pipe, and presumed that an electric torch, would be of the same nature.

I did not know how many watts it takes to run an electric toaster, but I do know we have often used one and never, or very exceptionally did we ever have to pay more than the minimum rate. One kilowatt is the equal of 1000 watts, therefore a continuous light of 60 watts would use up a kilowatt in 20 hours, the cost of which would be 12 cents.

To me it seems strange that 10,000 watts would be required to generate enough heat to bring le s than a pound of organic matter into a state of destructive distillation. These gentlemen admit it that it can be done, but that the cost would be too great.

As I understand it, there are 1800 horse power of hydro electric at the Canyon which is there idle, doing absolutely nothing, when it would be like found money were it used for the purpose of destroying or the burning up of the sewage of the town. The one congested part of the town is that from the post office to the theatre, and it is my belief that all wash water could be carried off by means of a gravity flow through a 3-inch pipe as far as the liquor store, then across tne railroad, where people would be glad to use it for irrigation of their land or gardens.

With regard to cleaning out of the "ash" pan, there would be nothing objectional about this as fire purifies and there would not be more than 30 pounds of ash from 2000 pounds of excrement, and not so objectionable as the handling of the ordinary blood and bone.

With regard to hydrogen sulphide blanketing the town with noxious fumes, I think this farfetched as comparing the specific gravity of hydrogen 0.0692 as against that of air being 1, it goes to show that this is a most unlikely thing to occur, and if it did it is most healthy as an iron sulphide is the best disinfectant known. These men complain about hydrogen sulphide but say nothing about the monoxide gas from autos and trucks—a deadly poison which blankets Canyon Street from the post office to the theatre almost every day, and yet no one is injured thereby. And still farther, the average rancher will put 25 pounds of lime and 25 pounds of sulphus in a kettle—two of the most suffocating agents—and then spray all day with a power sprayer until they are covered from heel to head with this terrible stuff without any evil effects. The putting in of an "electric sewer" is a personal proposition and anyone might install it if they so desired.

To those gentlemen, probably not ratepayers, who would like to soak our town with $75,000.00 of a debt paying interest at 7% per cent, $5250.00 per annum interest alone, and a sinking fund of $7.000.00 a year, making a total of $12,500.00 a year, or about four times the amount of revenues received by the town now, it would seem as though those gentlemen had better go to Vancouver, Edmondton, Calgary, Winnipeg, Penetanguishene or Midland, where the taxpayer is charged a rate as high 67 mills on on the dollar.

We are one of the most happily situated towns in the Dominion having no debenture indebtedness. Today we own the town, but the minute we get a $75,000 debenture debt we are thrust out; we will lose our homes because we cannot pay it.

T. M. EDMONDSON.

P.S.—Job said. "The thing which I know not I search out" In passing Ness Electric I thought I will just see what he has in the line of an electric apparatus for an electric sewer." To my surprise and delight he showed me an electric apparatus which filled the bill exactly for heating the receiving chamber I have spoken of, without the need of a cement block Regarding the 10.500 watt these gentlemen speak of, and the installing of higher po ered transformers, this is tommyrot, as 600 watts would run an electric toaster for a full hour at a cost of six cents and possible not half of that. 6000 or 7000 watts would suffice a big electric range. I must be brief, but if a copper chamber were set flat on this electrical device with a pipe such as we use in connection with evetroughs the whole thing would not cost more than $25, as compared $250 and up for a sewer connection. I have met all objections and claim 100 per cent. efficiency and immediate installation can be made. T.M.E

PROVINCE OF BRITISH COLUMBIA

INCOME TAX RETURNS

ARE NOW DUE TO BE FILED BY:—

(1.) Employers, respecting salaries and wages paid to employees during the calendar year 1934.

(2.) Every person in receipt of salary, wages, or investment income.

These Returns are required to be filed not later than

February 28th, 1935

Taxpayers should obtain forms from any Provincial Government office or chartered bank in the Province.

An urgent request is made for these Returns to be filed as much in advance of the final date as possible to enable the Department to give better service to taxpayers than can be provided during the rush of the last day.

Corporation, business, or professional income is required to be returned within three months after the end of the taxpayers fiscal year.

Victoria, B.C.

C. B. PETERSON,
Commissioner of Income Tax.

Erickson Looks Back Over '34

Fruit Shipments Show Considerable Gain Over 1933—Building Has Been Active—Ranches Have Changed Ownership.

	1933	1934
Apples, boxes	97,680	108,050
Cherries, crates	2,284	3,283
Currants, crates	229	259
Crabapples, boxes	1,456	1,652
Gooseberries, crates	129	300
Pears, boxes	5,784	4,829
Plums, crates	755	3,738
Prunes crates	602	2,519
Raspberries, crates	1,629	3,053
Strawberries, crates	1,028	,913
Cucumbers, crates	1,360	1,675
Peppers, boxes	256	294
Tomatoes, crates	2,782	4 526
Eggs, doz	4,800	5.676

Looking back on the happenings of 1934 we notice many changes in Erickson. Both in land clearing and building this has been a banner year. On the Connell Subdivision, especially, great improvements are observed. In the past two years 14 houses have been erected, 1934 accounting for two. J. S. Fisher of Cranbrook has built on the ten-acre tract he purchased the year previous, and H. H. Tooze has also completed a home on his ten-acre holding. Both residences are average size and modern in every way. In this section, too, much clearing has been done and it now gives the appearance of an industrious and prosperous section of Erickson.

Other new homes erected last year are the E. Haskins and Geo. Hobden bungalows on the main highway, with those of W. V. Jackson and J. Mermet to the east of Erickson, and at the extreme west (on the Creston boundary) R. B. Robinson has erected a residence. All these houses are fully mod rn.

Some new businesses have started which are beginning to give Erickson the air of a small village. In October the Connell Motors was taken over by Messrs. Swain and Brown of Calgary, Alberta, and is now operating under the name of Speedway Motors. Across the street from the garage, in the old Speaker building, we find a new butcher shop operated by J. Cochrane.

1934, too, saw the change in ownership of several fine orchard properties, and the arrival of the new owners in the valley. The G orge Hobden ranch, on the lower road, was purchased early in the spring by Mr. McCoy of Winnipeg, Man. The Wickstrom property early in the year was purchased by T. Wilson who a couple of years previous acquired the Maxwell ranch, coming here from Fernie to take possession on the completion of a handsome new two-story residence. Another sale was the Harry Clements place, which was purchased by J. A Bale of Elrose, Sask.

The East Creston irrigation system, which came into use in 1930, has, undoubtedly played a large part in the development of Erickson, and last year the district would have suffered a tremendous setback had it not been for the plentiful supply of water. If the valley is to have a recurrence of the very dry weather experienced in 1934 it will be universally granted the supply will be none to ample when the district is fully settled up. In November the irrigation district opened their new office building in Creston, located on Canyon R ad across from the Orchard Service station. The new building is thoroughly modern in appearance and is set off by a paint job of red and white. It will be used as an office, store building and meeting place of the water users.

Since the disastrous blizzard of 1924, Erickson has been steadily increasing the fruit production, with 1934 figures showing a considerable increase over that fateful year. 1933 shipments of apples totalled 97,680 boxes, as compared with 108,050 boxes in 1934. A big increase is also shown in the shipping of plums, prunes, cherries and pears. Figures show 105 cars of apples shipped, with 57 cars of mixed fruit and vegetables. It may also be noted here that 17 cars of hay, mostly from Camp Lister, have left Erickson statio , as also have eight cars of poles.

W. G. Littlejohn last year had another successful season for both bulbs and cut flowers, and for 1935 is expecting to again increase his output. Congratulations are due Mrs C Kelsey on her success with seed wheat and corn, exhibited at Toronto, Chicago and Vancouver the past three years as well as at the World's Grain Fair at Regina, Sask., in 1932, with outstanding success, particularly with Dent and Flint corn.

September, 1934, saw the commencement of a new line of sport at Erickson Tony Cobus, public school principal, has organized a girls' basketball team and they are entered in the district junior league. Considering this is their first year they have made a creditable showing. It is expected a local packing shed will be fitted up for this sport next season.

Bide-a-Wee tourist camp, under the capable management of Knotts', reports a successful season, although the traffic slackened up in August on account of forest fires and bad roads, but fall trade showed a marked increase. Tourists were registered from all parts of the continent, with some from London, England, and a party from Wales, en route home from China and Japan. The increase in business last fall is accounted for by the interest in the dyking project and the trucking out of fruit by prairie residents.

Miss Kathleen Bundy's splendid educational achievement directed much attention to Erickson. In her fourth year at Creston high school she ranked fourth highest in all British Columbia at the midsummer junior matriculation examinations, winning one of the governor-general's medals as well as a scholarship at U.B.C. She is at present attending MacDonald College, which is affiliated with McGill University, Montreal.

NOTICE TO

FRUIT GROWERS

Growers of tree fruits in the area under the jurisdiction of the Board, who have not yet registered with the Board, are hereby advised that they are required to register before February 28, 1935.

Lists of registered growers have been sent to the delegates who elected the Board on November 20th, 1934. Any grower who is in doubt as to whether or not he is registered should ask his delegate for the necessary information, or write to this Board at Kelowna, B.C. On application a registration card will be sent to any grower requiring same.

The Marketing Scheme provides that only growers who have registered are entitled to vote in connection with the continuation of the scheme, or at future elections for members of the Board.

John Arrowsmith Pioneer, Passes

Head of One of First Families to Locate in the Creston Valley —Reached Here 1892—Trustee First Valley School.

In the death of John Arrowsmith, who passed away at Creston hospital Wednesday afternoon, Creston district loses one of its very first residents and a man who played a useful part in the early development of this section of the valley-

Deceased, who was 77 years of age, was born in Ogden, Utah, in which state he was married in 1882, and nine years later with his wife and the younger members of the family started the trip north with the intention of settling in the Kootenay Valley. They spent the winter of 1891 at Kalispel, Montana, arriving here early in 1892, at which time deceased found employment on the valley's first reclamation project, he dyking of the present Reclamation Farm. Since that time he has been a permanent resident, except for a few months spent in Porthill and Kaslo

The late John Arrowsmith, the late Fred Little and John W. Dow were the first to pre empt land in what is now the Creston Valley, deceased locating on his place on the K.V., where he continued to reside until the time of his death. Being at the head of the first family to arrive at Creston it was but natural he took a keen interest in education and served on Creston's first school board as well as taking a very active part in the building of Creston's first schoolhouse. In addition to his activities at Creston deceased for some years had extensive property holdings at Arrow Creek.

In addition to his widow he is survived by three daughters, Mrs. G. A. M. Young of Creston, Mrs. E. Driffil of Kitchener, and Miss Effie Arrowsmith, Creston; and three sons, Will, who is the present mayor of Rossland; Osman, at Arrow Creek, and Joy of Creston. A son, Bert, died here in 1921

Burial will take place at Creston today (Friday) with service at Trinity United Church, commencing at 2.30 p.m. Throughout his long residence here deceased enjoyed the friendship of all and much sympathy is felt for the family in their bereavement.

Pythian Anniversary

The 71st anniversary of the founding of the Knights of Pythias order was fittingly celebrated by members of Wild Rose Lodge of Creston on Tuesday evening, when they were at home to the members of Blossom Temple Pythian Sisters at the lodge hall. The first part of the evening was given over to whist at which the high score prizes were taken by Mrs. Beaton and R. D. Penson, while the consolation prizes fell to Miss Beulah Penson and Wes. Eddy. After cards there was a dinner spread followed by a programme which included a talk on old times in Creston valley by Col Mallandaine, followed by songs by W. J. and P. R. Truscott and recitations by Mrs. Joe Foster and R. M. Telford. Vic. Mawson had very kindly installed a Philco radio and the audience were thrilled by the address on "The Fraternity, Now and Then," by the Supreme Chancellor, S. Harp, who spoke from Baltimore. Md, whose talk came in splendidly At the close, Mrs. McWilliams, head of the Pythian Sisters, expressed the appreciation of the fine hospitality extended the ladies and all others present.

Alice Siding

Mrs Dick Smith was a Porthill visitor with her mother a few days during the past week.

Mr. and Mrs. A. Ronmark of Nelson are visitors here with the latter's paren s. Mr. and Mrs. Jas. Compton.

The young people are out in full force most every night for the fine skating on the pond at the T. Trevelyan ranch.

Pruning is well under way in this section now and the orchardists claim the trees are showing very healthy condition.

Harry Webster was a weekend visitor at Kimberley for the badminton tournament between the Creston and Kimberley talent.

Gilbert Hayes, who has been employed with Reed & Mather for the past couple of years, returned to his home at Abbotsford, on Wednesday.

John, eldest son of Mr and Mrs. Dick Smith, had to have three stitches put in his foot to take care of a gash he inflicted while handling an exe one day this week.

Mr. and Mrs. Simpson, recently of Saskatchewan, who have been occupying the Bates ranch for the past few months, have removed to Canyon, where they will reside permanently.

The 1934 ice harvest is under way at Hood's lake. The demand is not so great as other years as quite a number put in electric refrigerators last year when no ice was to be had.

Listeners in on radio station KFEI, Spokane, on Sunday night, 17th, were delighted to hear the voice of Jesse Barraclough, eldest son of Jack Barraclough. His vocal number came in well and he has a very fine boys' voice.

Moore's Garage Leading League

Trim Creston Review by One Point to Take Undisputed Possession First Place—Pharmacy and Groceteria Also Win.

Basketball fans were kept in breathless suspense in the first fixture in Tuesday night's league basketball games at Park pavilion, when Moore's Garage downed Creston Review in a spectacular game by a one-point lead, 26-25, leaving the league leadership unchanged, Moore's Garage topping the circuit by a margin of two games on the Review, with Pharmacy and Motors tied for third place. Creston Motors were beaten by Pharmacy in an overtime game, 16-12, and Imperial Groceteria handed Loallo 33 24 beating.

Right from the first whistle there was nothing slow about the first game, with both teams playing a hard checking game Moore's got away to a good start, leaving the Review behind 10-2 before quarter time. However, after milling around for a few minutes Lewis managed to sink a basket from the left wing on a pass from Bourdon. Then the newspaper girls took heart and there was no stopping them, with Levirs Payne and Palmer scoring alternately, and by half time the score was 15-12 in Moores' favor. The start of the second half was a nightmare with a great deal of rough play and both squads out to win, and by three-quarter time the score stood 18-15 in Review favor. At the start of the last quarter saw the crowd in suspense with the Review managing to net a couple of classy baskets, bringing the score to 21-17 in their favor. Emerging from a pileup Ada Lewis left the floor for personals, leaving the Review with only four players. From then on the Review played against five members of the Moore squad and held them in hand well, but in spite of their good defense the garage girls broke through several times and scored. With four minutes to go they tied the score 21 all. Then coach Cobus of Moores pulled Betty Speers leaving each side with four players. By this time both teams were keyed up and nervous and the newspaper defence was unable to stop Nell Payne as she got through notching a basket just before the whistle to make the final score 26-25. All the Review squad played wonderful basketball all evening with Irene Bourdon the most prominent. For Moores, the pick of the quint. were Nell Payne and Edith Swain. The teams:

Creston Review—Nora Payne, Ada Lewis, Levirs, Palmer, Bourdon.

Moore's Garage—Nell Payne, Speers, Swain, Crane, Theo. Tompkins, Hare, Abbott.

Pharmacy beat Creston Motors by a narrow margin. Both teams were playing hard but from the first it was marked by rough and tumble pile ups. At full time the score was 12-12, and overtime of five minutes was played. In the last two minutes the druggists played a beautiful game and nosed out the Motors by scoring two baskets. Opal and Yvonne LaBelle starred for Pharmacy, with Liz. and Margaret Armitage the pick of the losers. The teams:

Creston Motors—M. Armitage, K. Payne, Dot. Wightman, L. Armitage, Jean McCreath, Edith Avery.

Pharmacy—O. LaBelle, Dot Olivier, Y. LaBelle, M. Moore, E. LaBelle, M. Learmonth, Fay Tompkins.

In the men's game Loallo worked hard to beat the Groceteria and nearly succeeded. The Groceteria was poor on shooting in the first half and time after time missed the basket with what would have been perfect shots. Loallo's combination was pretty to watch and with a good supply of substitutes they never seemed to tire. Sid Rogers and Fred Martello were the pick of Groceteria, the latter scoring 23 points. For Loallo, Maddess, Goplin and Wilfred LaBelle starred. The final score was 33-24. Teams:

Loallo—Goplin, Maddess, LaBelle, Bourdon, Truscott, A. Nastasi, S. Nastasi.

Imperial Groceteria—Martello. Rogers, Downes, H. Couling, Bill Bourdon, Payne.

President's Side Wins Badminton

Have 87-Point Lead in Second Series of Games—Five Points to the Good First Encounter—Players Going Cranbrook.

The time honored President vs Vice-President contest of Creston badminton club was finished on Wednesday evening, and the honor goes to the supporters of President A. R. Lynn by a margin of 92 points. In the first encounter the president was hard put to finish in front, his plurality being but five points, but his supporters were in better form Wednesday evening, when in a series of 18 games the forces of Lynn triumphed by a margin of 87 points. The scores; with the president's teams shown first:

MIXED DOUBLES

Mr. and Mrs. R. M. Telford, won from Miss M. Smith and H. Cornwall, 21-10,

C. H. Hare and Miss Hazel Hobden won from Dr. and Mrs. McKenzie, 21-7.

Miss Cartwright and Mrs Weir won from Mrs. Swain and Mrs. Bereau, 23-22.

Miss Henderson and Miss McCreath lost to Miss Smith and Mrs. Levirs, 15-21.

Miss M. McDonald and Miss E. Couling won from Miss A. McDonald and Mrs. McLaren, 21-19.

MEN'S DOUBLES.

A. R. Lynn and R. Chandler won from H. Cornwall and O. Sostad, 23-22.

R. M. Telford and G. Sinclair won from Dr. McKenzie and J. P. MacDonald, 21-8.

C H Hare and W. A. Millen lost to H. A Powell and J. Bereau, 22-33.

About a dozen members of the club left today for Cranbrook to take part in the East Kootenay shuttle tournament.

For 1934 the smelter at Trail treated 510,028 tons of ore.

The Rossland Miner would have the government conduct examinations as to the ability of auto mechanics and issue licenses to those who pass the tests.

While the very cold weather in January has badly crippled the peach and apricot crops in the south Okanagan, the experts are agreed tree injury has been small.

A.H. DeWolf, one of the engineering firm of DeWolf & Ham who put in the Kitchener road about ten years ago, if now conducting a tap dancing school at Cranbrook.

PROVINCE OF BRITISH COLUMBIA

INCOME TAX RETURNS

ARE NOW DUE TO BE FILED BY:—

(1.) Employers, respecting salaries and wages paid to employees during the calendar year 1934.

(2.) Every person in receipt of salary, wages, or investment income.

These Returns are required to be filed not later than

February 28th, 1935

Taxpayers should obtain forms from any Provincial Government office or chartered bank in the Province.

An urgent request is made for these Returns to be filed as much in advance of the final date as possible to enable the Department to give better service to taxpayers than can be provided during the rush of the last day.

Corporation, business, or professional income is required to be returned within three months after the end of the taxpayers fiscal year.

Victoria, B.C.

C. B. PETERSON,
Commissioner of Income Tax.

Population Of Canada Is Year By Year Becoming More Of Canadian Born Composition

Remarkable changes are taking place in the population of Canada. As it increases year by year it is becoming more and more a Canadian-born population. This is one of the direct results of the years of depression.

As 1935 begins it finds Canada with a population of some 10,835,000 according to the Dominion bureau of statistics, just 185,000 more than a year ago. This is so despite the barriers which have been steadily maintained against immigration during the last four years.

Further the increase from 1933 to 1934 of 185,000 is the largest in a single year since 1928.

Prior to 1930 when Canada's doors were open to immigrants from overseas the doors of the United States were open to Canadians. As immigrants moved in Canadians moved out. Now immigrants stay out and Canadians stay in. The natural increase in population balances the gain formerly made by the excess of immigrants over the number of Canadians leaving Canada.

In the 19 years from 1911 to 1930 the number of people in Canada rose from 7,207,000 to 10,206,000, an average yearly increase of 157,000. In the four years from 1930 to the present when the immigration bars were set up the population has increased from 10,206,000 to 10,835,000, an average annual increase of 157,200, approximately the same.

Heavy Water Compound

Toronto Man Not Afraid To Sample New Chemical Composition

G. H. Carter, 48, government employee, of Toronto, has $50 or any part of it to bet he will drink a thimbleful or even a glass of "heavy water", a compound of recent discovery and valued at $10,000 a quart —and suffer no temporary or permanent ill effects.

The heavy water compound, discovered a year ago by Dr. Harold C. Urey, has been mentioned as one of the possible causes of symptoms of old age and cancer. He has been awarded the Nobel prize in chemistry.

Heavy water is composed of two atoms of double-weight hydrogen (deuterium) and one of oxygen. Of every 5,000 drops of water, one is "heavy." It is far more weighty than river water and believed to have therapeutic uses as yet undiscovered. It is being used now almost entirely by research chemists.

The British Isles

Most Numerous Are Hebrides But Majority Not Inhabited

It is scarcely possible to calculate how many islands comprise the British Isles if we include every little rocky projection, but more than 5,000 have been charted. Most of them are to be found off the western shores of Scotland and Ireland, where the coast has been broken up by the full fury of the Atlantic.

Most numerous are the Hebrides, which comprise about 500, although the majority of them are uninhabited.

There are more than 50 inhabited islands in the Shetlands and Orkneys, and there are about 150 others on which no one lives.

Studying Cereal Diseases

Dr. Greaney Of Winnipeg To Spend Year In England

Dr. Frank Greaney of the Rust Research Laboratory, Winnipeg, has gone to England to spend a year at the Rothamsted Experiment Station. Dr. Greaney has been working on the control of root rot disease of cereals and for the past few years has devoted considerable time to a study of the effect of fertilizer in connection with the diseases of cereal crops. At Rothamsted are the most famous and outstanding fertilizing experiments in the world and their work on soils is known all over the world.

People of Rumania are again adding to their bank savings accounts.

Think Drought Punishment

Queer Ceremonies Held In India To Bring Rain

So acute has the drought become in several districts of the Madras Presidency that religious ceremonies are being held in a number of towns to appease the wrath of God, who, the inhabitants believe, has sent the drought to punish sinners. Effigies of "Kodumpapi" (the Greatest Sinner on Earth) are dragged through the streets, with "mourners" accompanying them, beating their breasts. This ceremony represents the death of great sinners, and, the world being rid of them, it is believed that rain will be sent. In Dharapuram, where acute distress prevails because of the lack of even drinking water, a crowd of Moslems marched bare-footed and bare-headed in the blazing mid-day sun to a neighbouring village, where prayers for rain were offered up. That night, for the first time in eight months, rain fell in Dharapuram.

Source Of Instinct

Interesting Experiment Conducted By American Scientists

A hypodermic of "hen instinct" extracted from a hen's head, sets roosters to clucking.

This in brief is the amazing story of an announcement at the American Association for the Advancement of Science of the first discovery ever made of the real nature and source of an instinct.

This particular instinct, "broodiness" or the wish to cluck and sit on eggs, turns out to be a very powerful chemical called prolactin. It appears to open a new explanation of the things called behavior and beyond that of understanding the sources of consciousness.

The experiments were reported by Dr. Oscar Riddle, Dr. Robert W. Bates and Mr. Ernest L. Lahr, of the Carnegie Institution of Washington station for experimental evolution at Cold Spring Harbor, N.Y.

Football Fatalities

Challenge To United States Schools To Reduce Death Toll

A sharp challenge to United States high and preparatory schools to reduce their football death toll was issued by Prof. Floyd H. Eastwood of New York University in reporting the results of a four-year survey of football fatalities.

Fatal injuries in college, athletic club and sandlot games are decreasing, Eastwood told the American Football Coaches Association. In contrast, the undiminishing number of high and preparatory school fatalities form an increasing percentage of the total. The percentage was 56.5 this year against 36.3 in 1931.

Return To Native Land

One Hundred And Fifty Destitute Chinese Sail From B.C.

One hundred and fifty Chinese, destitute and unable to find employment, have started the journey back to China at the expense of the British Columbia government, Hon. G. S. Pearson, minister of labor, announced.

Mr. Pearson said the Chinese went voluntarily because they felt they would be better off in their native land, where they can join relatives and frends. The government will also gain through the arrangement by eliminating future costs for their support.

All the Orientals were from British Columbia and there is no bar against them returning when they are financially able to do so.

Edmonton Fair Profitable

Showing a profit on the 1934 operation of $13,984, the Edmonton Exhibition Association's summer fair was more successful than any other class "A" fair on the North American continent, Manager Percy W. Abbott, K.C., told the annual meeting of the exhibition shareholders.

Success Seems Assured

Medical Authorities Believe Anti-Paralysis Vaccine Is Ready

Five years ago, in a Montreal laboratory, Dr. Maurice Brody set himself on the trail of the germ responsible for afflicting untold millions wtih infantile paralysis.

Some medical authorities accept his anti-paralysis vaccine as a now proven guardian against the disesae which destroys the spinal motor cord of the muscles, thus causing lameness and withering of limbs.

"Final proof," says the young scientist, "will be in studies in epidemic areas."

Only then can be determined if the immunity gained in vaccinated persons is adequate.

The young Canadian bacteriologist reported before the Pittsburg convention of the American Association for the advancement of science on his long labors and the vaccine they have produced to bring high hopes that the frightful disease is to be curbed.

The modest, 31-year-old Ottawa scientist left untold, however, the fact that his experiments appear to be also pointing a way to ridding the world of sleeping sickness.

His laboratory search for a preventive vaccine for this mysterious malady is advanced to the point where vaccinated white rats are able to withstand intracerebral injections of the virus itself.

Senseless War Talk

General Smuts Says Pacifists Are Mostly Responsible For It

The condemnation by General Smuts of what he rightly described as senseless war talk is very timely. The curious thing about it, he said, is that the pacifists are mostly responsible for the scaremongering. This is perfectly true. There is an old saying that if a thing is repeated sufficiently often people will come to believe it. The pacifists never weary of proclaiming that we are on the brink of another war.—Belfast Telegraph.

Monkeys and apes are afflicted by tooth trouble in the same manner as human beings.

Records Show Climate Of Dominion Gradually Turning Milder During Past Fifty Years

Although the Pacific coast is experiencing some of the coldest weather it has had for some time, F. Napier Denison, director of the Dominion meteorological observatory at Victoria, said recently that the climate of British Columbia and of the whole Domnion has been gradually turning milder for the past fifty years or more.

Winnipeg can boast of the greatest change in average temperature, said Mr. Denison, with an improvement of six degrees, 1883 being the coldest year on record during the last 53 years and 1931 the warmest.

Records for Toronto and Montreal show these cities have experienced a gradual rise of about four degrees. Montreal's record cold year was 1875 and 1931 was the warmest.

Alberta and the Maritime provinces are tied in third place, both being about three degrees warmer. Records at Calgary show the lowest temperatures there in 1887 and the highest in 1931, while 1875 was the coldest year recorded at Charlottetown, P.E.I., and 1901 the mildest with 1930 and 1931 coming next.

The Pacific coast shows the smallest change of all, about one and one-half degrees. Records show 1880 and 1884 were the coldest years with 1893 and 1915 coming near the low mark, and 1926 being the warmest. Fort St. James, in the northern interior, shows a change of about three degrees in the past 40 years.

These figures seem to indicate the warm and cold years come in cycles with the cold years around 1875 to 1890 and the warm years between 1926 and 1931.

Two important questions to be answered in the future will be, what is causing this peculiar change in our climate and how long will it continue? Mr. Denison can answer the first question as far as British Columbia is concerned.

"It is evident that in recent years the North Pacific ocean storms have been more severe and widespread, and have caused unusual ocean currents from the warmer southern latitudes, and these in conjunction with mild weather prevailing in these vast ocean storms have caused milder weather on this coast," he said.

Minerals For Young Chicks

Feeding Too Little Is As Bad As Too Much

There is such a thing as overfeeding young chicks on minerals, and that is just as bad as underfeeding. The rather strange thing, however, is that an excessive supply of minerals manifests itself in much the same manner as when too little mineral matter is suppled. A mash containing the usual percentage of meat scraps or meat and bone meal and dry skim-milk, according to tests at the Ohio experiment station, carries plenty of mineral matter for chicks until they are ten weeks old.

These tests are in accord with results obtained at other stations, and may therefore be considered as quite reliable. Meat scraps, of course, are very rich in calcium, carrying from 20 to 25 per cent. of that element, which normally makes up three-quarters of the minerals in the mash of chickens. Dry skim-milk carries about 10 per cent. of phosphorus and calcium in a very digestible form. When one substitutes part vegetable protein for meat scraps in the mash, it is highly desirable to feed additional minerals as the vegetable proteins do not contain as much mineral matter as the animal proteins.

Pay Old Debt

Turkey Finishes Payment To Britain Of Loan Made 60 Years Ago

Turkey recently finished paying off a debt to Great Britain which dated back to 1874 and the Balkan Wars of that period. She paid the last of a series of £6,000 ($30,000) instalments on loans made 60 years ago. British authorities expressed satisfaction with the promptitude and regularity of the Turkish payments.

One-fifth of all homes in the United States are without kitchen sinks.

Taken Out Of Circulation

Sixty Million In Paper Currency Destroyed Every Year

Sixty million dollars in Canadian money goes down the sewer annually —into the Ottawa river. From the east block of the Parliament buildings it is poured into the sewage system with all kinds of refuse periodically, it is beyond retrieve, even in times of depression.

The sum total represents Canadian bills of all denominations, taken out of circulation. Because of wear and tear, their life averages from nine to 10 months. In one and two-dollar bills alone, $40,000,000 are destroyed each year.

Time-worn paper currency is treated now by the department of finance in paper-mill fashion. Oiled beyond recognition with the aid of chemicals to obliterate the print and coloring, the bills are put through a steam pressure and beater and then shoved into the sewer pipe.

Indians Blame White Man

Say They Have Caused Disappearance Of Caribou Herds

From Fort Chipewyan, in Alberta's northland, thousands of caribou which a short time ago roamed the bush country, closest to that post in many years, have vanished, according to a wireless despatch received by the Edmonton Journal.

Indians blame the white man for the disappearance of this natural meat supply. They base the claim on an old superstition that wild animals must be speared or shot to death and not clubbed. The story is that a white hunter recently wounded a caribou and then kicked the animal down with the butt of the gun.

A bachelor's life, after all, is just one undarned thing after another.

The SNAPSHOT GUILD

HOW ABOUT MOVIES?

Making home movies with a modern, low-cost camera is actually as easy as making snapshots. It's fascinating sport, too.

May as well be frank about it. Until a few months ago I had the notion, shared by a good many other folks, that home movies were (1) expensive, (2) difficult, and (3) not very good, anyway.

And then Bill, a friend of mine, got a movie outfit. Neither he nor his family can be classed as wealthy, or anything like it, but there he was —sporting a movie camera. Naturally, I was curious.

The camera itself was about the size of a small book. Slid into a topcoat pocket without any fuss at all. It was neat as the proverbial pin and about as simple. Bill showed me how to run it. You merely held it up, aimed it as you would a gun, pressed a button—and you are making movies. Oh, of course, there was a spring to wind and a lens aperture to set, but it was any amount simpler than my favorite snapshot camera. Even the loading was easy.

That particular camera, as I recall it, cost about $40. It used 8 mm. film and held enough to allow for a couple dozen full-length shots—each shot long enough to show, for example, a sensational football play, from the snap of the ball to the end of a fifty-yard run, forward pass included. All that on about ten cents' worth of film.

Movie film, I learned, is really pretty cheap to begin with and doubly so when you consider that the purchase price includes the cost of finishing done by the manufacturer.

Well, I revised my notions of movies, as to cost and difficulty, promptly. And when I saw the finished movies, a week later, I got all over the idea that amateur movies weren't very good. Bill's were excellent. And he's only an average person, a snapshooter like the rest of us.

I'm passing all this on merely for your consideration. Movies, at their best, will never in this world take the place of good snapshots. The snapshots camera has a charm all its own. But there's no reason at all why snapshooters shouldn't take up movies, too. For, obviously, movies can do things that still cameras cannot. They can get the whole of a bit of action instead of merely a part of it.

As far as technicalities are concerned, anyone who has mastered the essentials of snapshooting can take up the modern movie camera without a qualm. Bill has permitted me to make a number of movie shots and I'm both surprised and delighted with the results. Maybe someday I'll get me an outfit.

I find that there are two standard sizes for amateur movie film—8 millimeter and 16 millimeter (Hollywood uses 35 millimeter film.) Naturally, costs are less in the 8 mm. class than in the 16, but even the 16 mm. outfits are surprisingly reasonable in both first and operating costs. Of course, you can spend a great deal of money on special equipment, but it's not at all necessary. By the way, with certain 16 mm. outfits you can get action pictures in full color. That's something we snapshooters can't quite do, to date.

JOHN VAN GUILDER.

Grand Theatre **Sat., Feb. 26**

THE SURPRISE HIT OF THE YEAR!

For weeks we heard that one of the great pictures of the year was coming—a great human drama with a musical background! Now it is here—finer, with more thrills and heart-throbs, music and spectacle than you could imagiue! Truly the surprise hit of the year!

Local and Personal

A. Goplin and H. B Johnston were Kimberley visitors Monday night for the playoff game in the Kooteday hockey league, in which Kimberley beat Trail.

Creston Valley Rod and Gun Club open meeting on Monday night should be well attended. Mr. Kearns the West Kootenay game warden of Nelson, and C. H. Robinson, fishery inspector for the Kootenays, will both be present and their talks will both be of interest. All are invited to attend.

The veneer mill at the Chas. O Rodgers box factory commenced operations at the end of the week, giving employment to half a dozen men and three girls. Veneer is being put in the dry kiln for the make of bedding baskets, tintops and berry cups. Work on thd bedding baskets will start shortly.

There will be no days of grace in connection with issuance of 1935 car licences and dri ers' licences provincial authorities state, and provincial police here have been given instructions to prosecute all persons found operating cars on and after the first day of March with 1934 icence plates and drivers' cards.

Thirteen members of Creston badminton club made the trip to Kimberley on Sunday for a series of games with the shuttle talent of that town in which Kimberley won by quite a wide margin. In the party were Mr. and Mrs. R. M Chandler, Mr. and Mrs. R. M. Telford, Mrs. Weir, Misses Nora Payne, Ada Lewis, Marcella Sanford; Messrs. J. P. MacDonald, R. Lynn, H. Webster, O Sostad and Ted Moore.

H. Langston, W. M.; H. Ostendorf, W. L. Bell, W. McL. Cooper, M. R. Joyce, H. H. Wilks, R. J. Forbes, T. W Bundy, C. F. Hayes, Col. Mallandaine and S. A. Speers represented Creston Masonic Lodge at the memorial service to the late Alex. Cameron at the United Church, Wynndel, on Sunday morning. Deceased was long identified with the craft at Coleman, and served as D.D.G.M. for the Crows Nest Pass district about 20 years ago.

Both Creston ladies' and men's teams are just at present in the lead in the East Kootenay basketball league due to trimming Kimberley in both games played at Park pavilion on Saturday night. The men had a real close call winning by the narrow margin of 17-14, while ladies' victory was by a 25-15 score. The return games will be played at Kimberley tonight with total points to count, the winner to play Michel for the district championship.

The weather since Thursday last has been too mild for curling and play has been halted with only a start made on on the Imperial Bank and Cranbrook Brewing Company cups, and the semi-final still to be played in the Fernie-Fort Steele Brewing Company trophy between the Boyd and F. V. Staples rinks, the winner of which will meet the Joyce quartette In the Fraser cup the stage is set for the final round between the Boyd and Dolf Weir rinks.

Creston will have about a dozen players from the local badminton club in action at the East Kootenay tournament, which opens at Cranbrook this evening. Creston talent will compete in the ladies' singles, as well as the men's, ladies' and mixed doubles. Those making the trip are Misses Hazel Hobden, M. Smith, Jean Henderson, Marjorie Hamilton, Mrs. Levirs, Mrs. Telford and Messrs. J. P. MacDonald, F. V. Staples, C. H. Hare, O. Sostad and H. Cornwall.

The young people of Trinity United Church got together at the Parish Hall on St. Valentine's evening for a most enjoyable time. The occasion was a hard times' party. Despite a forewarning a few were fined a small sum for appearing dressed in conventional garb The fore part of the evening was taken up with a few hands of whist at high score prize was taken by Margaret Armitage and Ed. Erickson. For comic costumes the cake was awarded Elizabeth Armitage, Letty Couling and Dot Wightman. Dancing was the feature of the evening, with a delightful lunch about midnight.

Hospital Board Meets

There was a good attendance at the February meeting f the directors of Creston Valley Hospital Association which was held on Wedn sday with the president, F. V. Staples in the chair. The secretary read correspondence with the West Kootenay Power & Light Company which culminated in a reduction of the monthly X-ray power rate from $8 to $1.50. The financial statement revealed other savings on operating account, though collections were disappointing.

January was the record month for births since incorporation. There were six, four girls and two boys. There were 352 hospital days compared to 331 in December, and 181 in January, 1934. Votes of thanks were accorded to Mrs. Archibald for be l wiring to basement, and fruit; to T. Lacey for vegetables; to H. W. Gobbett for milk, and to the Creston Review for donation of advertising.

Addition to equipement during the month consists of a modern fire-proof safe for the secretary's office, which fills a long-felt want. In view of the difficulty of heating Park pavilion at present it was decided to postpone the membership drawing until Friday, March 1st. Arrangements for the dance on this date, at which a large attendance is expected, were left in the hands of the Membership Committee and the Creston Hospital Women's Auxiliary.

The secrerary reported improved sales f tickets, with Miss Edith Cook, Creston, J G. Abbott, Wynndel, and C S. Hester, Alice Siding tied for best seller prize, each having sold 110 membership tickets.

Our K. B. O. Broadcast

For 1934 the smelter at Trail treated 510,028 tons of ore.

Bonners Ferry is paying $3.50 per cord for 4-foot cut-green fir to heat the courthouse.

Rossland has collected 75 per cent of the 1934 taxes. In 1933 payments were but 71 per cent.

Night life at Cranbrook is so quiet that even the howls of the coyotes can be heard in that town.

Still another cold storage warehouse is to be erected at Kelowna, with a capacity of 100 carloads of apples.

The C.P.R. is looking for at least a normal summer. It is putting up 3000 tons of ice at Cranbrook.

For the purposes of the new Marketing Act a yone with an acre of orchard is entitled to vote as a grower.

The flour mill at Bonners Ferry is to be enlarged and modernized. It now has a capacity of 25 barrels a day.

The miner's union at Fernie has just signed a two-year working agreement with Crows Nest Pass Coal Company.

According to the Courier the ice crop at Cranbrook is the cleanest ever harvested. Blocks are 20 inches thick.

The per capita cost of operating Salmon Arm Hospital last year was $1.93. There were 5565 hospital days.

At February 1st the Okanagan still had almost 600,000 boxes of apples to sell. There were 3,026 boxes left in the Kootenays.

Penticton Co-Operative Fruit Growers will spend $22,000 to still further increase their cold storage plant by 40,000 boxes.

Observer: Salmon Arm library readers appear to shy clear of serious study. Every book taken out last year was a fiction story.

The depression is so bad at Cranbrook that the Courier finds the Chinese failed to celebrate their new year with much enthusiasm.

Penticton council has been notified the school board will require $50,000 for a new 12-room one-story school building this year.

With the proposed addition completed the Co-Operative Fruit Growers at Penticton will have storage for 185,000 boxes of apples.

According to general manager E. J. Chambers the Associated Growers had 100,000 boxes more apples to sell than at February 1st, 1934.

At Bonners Ferry the new owners of the Grain & Milling Company business will increase the grain storage facilities to 150,000 bushels.

A new 20 h.p. Case engine is being installed in the ferry at Copeland. The old engine did not have power enough to put the ferry through the ice.

Cranbrook's health is so good that it is now only necessary for one of the doctors to take the evening shift at the office of Drs. Green and McKinnon.

Kaslo United Church claims an average morning attendance during 1934 of 56. Evening congregations averaged 90. With 68 enrolled the Sunday school attendance averaged 54.

Beware The Danger Spots

The inauguration throughout Canada of new social services, and the extension of social services already existing, are policies to which it is now clear all political parties in Parliament are definitely committed. Since the beginning of the present century there has been a steady growth, not only in Canada but in all countries in the number and scope of these services of a social character, and it is now evident that the people of this Dominion are in favor of more and still larger and comprehensive services of this character.

This development is in line with modern trends and the new conception that all the people are responsible for the welfare of each individual citizen. We refer to this as a new conception, yet it is as old as civilization itself. Man is his brother's keeper and if and when man fails to discharge that responsibility to his fellowmen, then the very civilization which protects him will collapse. So it is that the great majority of people will be found to welcome the introduction and enlargement of a national programme of social services.

There are, however, one or two danger spots in connection with such a programme which the Canadian people will be well advised to recognize at the outset. These services are designed to be helpful to us as individuals and as a nation; let us therefore beware that they do not actually prove harmful.

The first danger to avoid is, that in our enthusiasm and commendable desire to provide social services, and to establish them upon a generous scale, we do not overdo it, and embark upon programmes which may prove to be beyond the financial capacity of the Canadian people to maintain. Social services such as old age pensions, mother's allowances, unemployment insurance, free medical services, etc., will cost an enormous amount of money annually. Some of these services are already costing the Federal and Provincial Governments many millions of dollars, but present expenditures are undoubtedly small in comparison with the cost of proposals now being advanced.

Each and every one of these social services can be provided and made possible by just one method, and that is taxation. That is, the community as a whole must through the payment of taxes provide the money which will be distributed through one social service or another to the people who are in need of such service. If fifty million dollars are required for, say the payment of old age pensions thoughout Canada, then taxes which will yield fifty million in revenue to the government must be imposed and paid by the people. There is no other way. This fact must be recognized, together with the further fact that there is a limit beyond which people cannot pay taxes, and any social or other service which depends upon government taxes beyond that limit will find itself in difficulty.

Once established, experience has proven that these social services grow very rapidly and that expenditures largely increase. This experience indicates a second danger spot. It is this: So long as individual man and woman are required to look out for themselves and plan for their future, they will, as a rule, work, exercise some degree of thrift, and save against sickness and old age. In a word, self preservation will be one of the guiding rules of their life. But once it becomes an accepted and established fact that people will be provided for whether they are at work or not, that the community will care for them and all their ills if and when sick, and that the community will suppot them throughout their old age and bury them when they die,—then there is grave danger that the incentive which is now the great driving force in our human nature will become less keen, weaken and gradually die.

DON'T RISK BAKING FAILURES . . . .

Canada's best-known Cookery Experts and Dietitians warn against trusting good ingredients to poor-quality baking powder. They advise MAGIC Baking Powder for sure results!

CONTAINS NO ALUM—This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient. Made in Canada

Champion Bricklayer

Philip Lancaster, 24-year-old foreman in a brickyard at Hull, England, lays claim to the title of being the world's champion bricklayer. He laid 3,000 bricks in four hours, a record, he says. In the first hour he laid 908, a little better than 15 a minute.

HE FELT MISERABLE AFTER MEALS

Acute Indigestion Relieved by Kruschen

The treatment which put this man right must surely be worth trying in every case of indigestion, Read what he says:—

"Two years ago I suffered very much from indigestion, loss of appetite, and a most severe pain in my back. Food soured in my stomach. I felt most miserable after meals, and had no desire or appetite for them. A friend advised me to try Kruschen Salts. I did so, and I am most happy to testify that after a short time I felt the greates relief. I coninued taking Kruschen till I felt myself quite better and a new man. I feel as light-hearted as I did twenty years ago."—W. B.

What Kruschen did for him it will do for everybody else who suffers from indigestion as he did. The fact is that "the little daily dose" of Kruschen first stimulates the flow of gastric juices to aid digestion, and then ensures a complete, regular and unfailing elimination of all waste matter every day.

Ancient Stronghold Found

Viking Guards Did Not Allow Women In Garrison

A 1000-year-old Viking stronghold never visited by women is the discovery of Dr. Holger Arbman, who has been excavating at Sweden's ancient capital, Birka. That the Viking guards forbade women to enter this garrison is inferred because no single scrap of a woman's ornaments or apparel has been found in the ruins. On the other hand, Dr. Arbman has unearthed remains of the men's arrowheads and many knives and animal bones left from the meals of the guardsmen.

No Turkey At Aklavik

The Winnipeg Tribune says turkeys at Aklavik, according to a radio dispatch from the tiny ice-bound settlement, would have been valued at $1.50 a pound—if there had been any turkeys. There weren't, so the white and native trappers ate roast caribou and wild cranberries for Christmas and New Year's dinners.

Little Journeys In Science

COSMIC RAYS

(By Gordon H. Guest, M.A.)

Glass becomes negatively charged when rubbed with catskin, but positively charged when rubbed with silk. Also, a strip of celluloid becomes negatively charged when drawn between the fingers. In order to detect and measure the electric charges on any substance scientists have devised an instrument known as the electrocope. A simple type of electroscope consists of a bottle with a paraffin stopper, through which runs a piece of glass tubing. Passed through the glass tube is a piece of brass or copper wire from which are suspended two strips of gold leaf. A ball made of tinfoil is attached to the other end of the wire and is, of course, outside the bottle just above the paraffin stopper. Whenever the ball is given either a negative or positive charge the leaves fly apart in proportion to the amount of the charge. A rubber comb rubbed on a cat becomes negatively charged and if the comb is placed on the tinfoil ball some of this charge is imparted to the electroscope and the leaves will fly apart. Since the charge is negative, another negative charge will cause the leaves to spread still father apart, whereas a positive charge will cause the leaves to fall together before again flying apart. In this way the kinds of charges may be determined. When even the best of electroscopes are charged it is observed that the gold leaves slowly come together again. This means that some electrically charged particles from the atmosphere are neutralizing the charges on the leaves. Scientists set out to discover what was causing this discharge of an electroscope and found that it was due to certain rays which came to the earth from outer space. They are called cosmic rays.

Many attempts have been made to stop the natural leak or discharge of an electroscope. These attempts have always failed despite the use of the most perfect insulators and the protection of the electroscope by lead shields, several feet in thickness. These experiments suggested that there exists an unusually penetrating radiation of feeble intensity.

Scientists have carried electroscopes to points near the two poles of the earth, at the equator, and at various other latitudes. Electroscopes and similar indicating and recording devices have been sent up into the air in sounding balloons to altitudes of over 20 miles, and have been carried to altitudes of 25,000 feet by airplanes in various localities and have been taken to high mountains as well as to depths as great as 1,000 feet in lakes. All experiments show that the rays come from above the earth and so they have been called cosmic rays. Outstanding among the various investigators in this work are two American scientists, Millikan and Compton.

Congress Demands Respect

Persons Laughing At Chilean Parliament Will Be Arrested

Laughing at the Chilean parliament is now a punishable offence. Chile's deputies were annoyed at the increasing fun which was being made of congress and their debates. They especially objected to remarks made by members of the public in the gallery and in the precincts of the parliament. At the request of the chamber of deputies, therefore, the premier has given instructions to the police to arrest any person who is heard to "take in vain the name of the honorable congress."

"We're going to Ogden's, Sirs," they said!

Choice mild, mellow leaves *only* go into Ogden's Fine Cut . . . to make a cigarette tobacco that always gives a smoother, cooler, more satisfying smoke.

Try Ogden's. And choose the best cigarette papers . . . "Chantecler" or "Vogue". You can't beat that combination for all-round pleasure in "rolling your own".

Trans-Canada Highway

Road From Great Lakes To Winnipeg Expected To Be Open This Year

Ontario government highways department officials believe they can give assurance that in the month of May there will be a clear passage from the head of the Great Lakes to Kenora, Ont., and Winnipeg, containing wonderful stretches of good road in excellent shape, but naturally they could not guarantee anything that might occur due to unexpected weather conditions. To the normal tourist who was prepared to take a little trouble here and there, however, the road would be in good condition.

Guard against Rickets with Cod Liver Oil

PLUS

ADDED DIGESTIBILITY

All babies need the anti-rachitic value of Vitamins A and D, found in pure cod liver oil. Scott's Emulsion is rich in these Vitamins, PLUS the easy digestibility that results from Emulsification. PLUS the body-building aid of hypophosphites of lime and soda. Pleasant to take, Scott's Emulsion is tremendously more effective.

SCOTT'S EMULSION

THE COD LIVER OIL WITH THE PLUS VALUE

For Sale by Your Druggist 6A

HAUPTMANN IS SENTENCED TO DIE IN ELECTRIC CHAIR

Flemington, N.J. — Bruno Richard Hauptmann was condemned to the electric chair by the jury that tried him for the kidnap-murder of Baby Lindbergh.

White and unshaven, the German carpenter tottered slightly as he stood between his guards and heard himself ordered to "die in the electric chair."

He was sentenced to die in the week of March 18, but an almost certain appeal to the New Jersey court of appeals and errors would stay the execution. The high court is not likely to pass upon the appeal until late in May.

The jury of eight men and four women spent 11 hours and six minutes in a bare back room of the old court house where Hauptmann had been on trial since Jan. 2 before they reached their verdict.

"We find the defendant, Bruno Richard Hauptmann, guilty of murder in the first degree," intoned Foreman Charles Walton, Sr., in the deathly quiet of the littered, smoke-filled courtroom.

Anna Hauptmann, tears rolling down her cheeks as her husband went silently back to his cell, cried: "There is nothing left for me."

But she dried her eyes as she pushed through the thronged court room and left by a rear door.

"I am not afraid," she said. "I still hope."

Polled individually at the insistence of Edward J. Reilly, chief of the defence counsel, the jurors affirmed the verdict in quavering voices.

Reilly announced soon after the verdict was returned that he would file an appeal and carry it "to the highest court in the country."

"Although the jury has rendered a verdict on the facts in the case, we still believe that a great many errors in law have been committed, which will mean ultimately the reversal of this judgment," he said.

On the other hand, Wilentz said: "The tremendous responsibility imposed upon Hunterdon county was shouldered without flinching. The nation is indebted to these courageous men and women."

For Churchill Constituency

Hon. T. A. Crerar Is Nominated As Liberal Candidate

The Pas, Man.—Hon. T. A. Crerar, former federal cabinet minister, was nominated Liberal candidate for Churchill constituency in the forthcoming federal elections.

Nomination of Mr. Crerar came after a ballot with Dr. Daniel Baldwin, Benito, Man. Both Mr. Crerar and Dr. Baldwin spoke briefly before the vote was taken.

Mr. Crerar's first federal cabinet post was under Sir Robert Borden, prime minister of the Union government during the war-time years. He was made minister of agriculture in the administration in 1917.

He led the Progressive party a few years later, but in 1925 retired from politics.

In the cabinet shuffle of 1929 when Rt. Hon. W. L. Mackenzie King headed the Liberal administration, Mr. Crerar was summoned from private life and took the portfolio of railways.

Defeated in Brandon constituency in the general elections of 1930, Mr. Crerar retired again to private life.

May Run In East Kootenay

Ottawa.—It was understood generally here that Hon. H. H. Stevens, former minister of trade and commerce, would accept nomination for the next general election in East Kootenay, the seat he now represents in the House of Commons.

Wants Tariff Cut

Ottawa.—A general reduction of tariffs on farm implements and primary machinery was urged in the House of Commons by Hon. Charles Stewart, former minister of the interior.

W. N. U. 2086

Wreck Of U.S. Dirigible

Cause Of Mid-Air Collapse Remains A Mystery

San Francisco.—How the United States naval dirigible Macon reared and plunged crazily for 35 minutes before falling and sinking to the bottom of the Pacific was revealed in the stories of its survivors.

Underlying cause of the mid-air collapse remained undetermined. Commander H. V. Wiley and others who came through safely, revealed there had been a sudden lurch at the outset, after which the great sky cruiser soared upward, out of control, then settled haphazardly to a grave in the deep.

Outwardly light-hearted, the 81 surviving officers and men who stuck with the ship until she hit the water and then got away in rubber lifeboats, sang as they came ashore here.

Search was abandoned for the two missing members of the crew at the spot where the airship went down, 13 miles off Point Sur, Calif., 110 miles south of here.

Loss of the $2,450,000 Macon left the United States navy without a dirigible.

Hints the Macon's end, similar to that of the dirigibles Akron and Shenandoah, might mean discontinuance, or at least a curtailment, of naval development along this line were seen in Washington developments.

Must Ease Tax Burden

W. Sanford Evans Sees Taxpayers Becoming Bankrupt

Winnipeg. — Decentralization of government in Canada had far exceeded the intentions of the fathers of confederation, declared W. Sanford Evans, Conservative leader, during debate on the throne speech in the Manitoba legislature.

Multiplicity of taxes was making taxpayers bankrupt, said Mr. Evans. The man in danger of losing his home for inability to pay the tax was still paying a wage tax, he said. He urged some steps by the government to ease the burden of taxation on the lower paid wage earners.

Mr. Evans spoke after W. J. Westwood (Lib. Prog., Roblin) and J. L. Christie (Lib. Prog., Cypress) respectively had moved and seconded the adoption of the address. The debate was adjourned by S. J. Farmer, newly-named Independent Labor party leader.

Sees Japanese Menace

California Represenative Says Jap Army Reserves Are On Pacific Coast

Washington.—Representative John Dockweiller, California Democrat, told the house of representatives military committee that 25,000 trained Japanese army reserves in the Pacific coast state stood ready to take up arms. Packed into Los Angeles harbor, he added, were 150 Japanese fishing boats with a cruising range of thousands of miles.

"At least they appear to be fishing boats," he said significantly. Here the chairman stopped him with word that such testimony should be given in secret session. But Dockweiller replied he intended to make the same assertions on the house floor.

Ease Economic War

Irish Free State Makes Representations To Britain

Dublin.—A step in the direction of easing the economic "war" between the United Kingdom and the Irish Free State was revealed when President Eamon de Valera announced in the dail that representations had been made to Britain.

He referred solely to economic matters, saying the British government had been acquainted with the Irish belief that in view of the recent coal-and-cattle commercial exchange, there was a good cause for further negotiations.

Seek Cotton Substitute

Ottawa.—Officials of the Dominion experimental farm revealed they have supplied samples of Canadian flax for experiments being conducted in Manchester, England, in an effort to find a suitable substitute for cotton in textile manufacure.

DR. W. V. LONGLEY

Director of Extension and Professor of Farm Economics at the Nova Scotia Agricultural College, who has been elected president of the Canadian Council on Boys' and Girls' Club Work, an organization with a total membership of 27,000 in 1,544 clubs throughout Canada.

Would Lead To Revolution

Withdrawal Of Relief Would Cause Trouble In Canada, Says Mayor McGeer

Vancouver. — Withdrawal of relief allowances by the Dominion government would lead to revolution in Canada, Mayor G. G. McGeer declared during a discussion of means to repair storm damage in Stanley park, Vancouver.

Proposals are that the work be done by those on relief lists. Ald. W. W. Smith drew attention to the fact that the present relief agreement between British Columbia and the Dominion terminates March 31.

"And there is no certainty that the government will continue relief after that date," he added.

"If it doesn't, then there will be a revolution in Canada," said Mayor McGeer.

Honeymoon Tour

Prince George's Bride Has Slight Accident On Arrival at San Juan

San Juan, Puerto Rico.—The Duke and Duchess of Kent arrived at San Juan's airport from Port of Spain, Trinidad, in their honeymoon tour of the West Indies. A slight accident to the duchess marred the arrival.

While the British cruiser Dragon, anchored a mile away, boomed a salute of 21 guns and flag-decked craft in the harbor whistled shrill welcomes, the royal newly-weds stepped down to be greeted by Governor Blanton Winship. It was the first time they had touched United States terriory in their tour.

Prince George's bride, the former Princess Marina of Greece, turned her ankle while stepping on a float at the airport from the amphibian plane but was not badly hurt.

Establishes Farm School

Forty English Children To Be Sent To School On Vancouver Island

Montreal.—Forty English children, aged seven to nine, will come to Canada in May to form the nucleus of the Fairbridge farm school on Vancouver Island, Major M. F. Trew stated here.

Major Trew will be the headmaster of the new school which is sponsored by the Child Immigration Society of Great Britain to train English boys and girls to enter farm life in Canada. He passed through Montreal en route back to England from British Columbia.

The society, he said, had bought 1,000 acres of land on Vancouver Island, and building would commence shortly. Through private subscription and co-operation of the British government the children will be trained on the largest farm-school of its kind ever attempted in Canada. It will be modelled after the Fairbridge farm school of Australia. Major Trew estimated when the school is in full operation 400 boys and girls will be in residence. They will be taken from English institutions and chosen by the London committee of the society. At the age of 16 they will be sent to farms in western Canada.

Italo-Ethiopian Trouble

Peaceful Settlement Of Border Dispute Is Expected

Rome.—Peaceful settlement of the turbulent Italo-Ethiopian border dispute in East Africa was believed by official circles in Rome to be in the offing. According to the Havas News Agency, an unconfirmed report which circulated in Rome went so far as to say that a partial accord had been reached at Addis Abba, as a result of which Italian and Ethiopian forces had evacuated the disputed zone in the vicinity of Ualual, near the border between Italian Somaliland and Ethiopia.

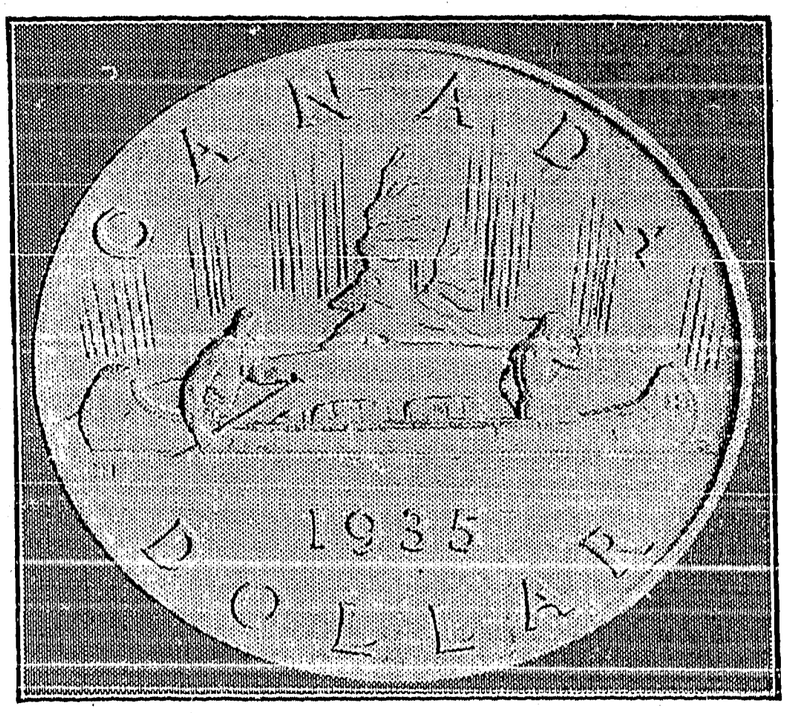
Vice-Regal Tour Of West

Edmonton. — His Excellency, the Governor-General, and Lady Bessborough, will be in Edmonton from 6:30 a.m., March 22 to 7 a.m., on March 23, during their farewell tour of the west, according to an announcement made from the office of Hon. W. L. Walsh, lieutenant-governor of Alberta. The vice-regal party will be in Calgary from 4:30 p.m. on April 11 to 5:20 p.m., April 12, as they travel east again from the coast.

Captures Wheat Prizes

Edmonton. — John D. Morris of Hardisty, captured two wheat trophies at the provincial seed fair when judges placed the registered and certified seed exhibits. He won the Bank of Commerce championship cup for best sample of milling wheat and the trophy for best sample of registered wheat, offered by the Alberta branch of the Canadian Seed Growers' Association.

CANADA'S FIRST SILVER DOLLAR



Here is a picture of the reverse side of Canada's first silver dollar, which will be ready for circulation on May 6th, the twenty-fifth anniversary of the accession of King George. The design is a canoe laden with pelts, paddled by an Indian and a "voyageur," passing through a rocky islet on which are two jack-pines. The word "Canada" is set above with northern lights, and, below, the word "dollar" appears with the year "1935". The obverse side of the dollar will carry a crowned effigy of His Majesty, with the inscription, "Georgius V, Rex Imperator, Anno Regni XXV." The design was executed by Emanuel Hahn, R.C.A.

SUGGEST MEANS TO LESSEN DEATH TOLL ON HIGHWAYS

Ottawa.—Longer jail terms for negligent drivers who kill and maim on the public highways will not stop the mounting toll of automobile crashes, Minister of Justice Hugh Guthrie advised the House of Commons. Urged by T. L. Church (Cons., Toronto East) to stiffen the penalties for drivers responsible for highway slaughters, he said education was the only possible means of inducing safe driving.

For two hours the house discussed Canada's mounting toll of highway accidents, with the Toronto member finally withdrawing his resolution and suggesting the government institute a broad investigation so the next parliament may have sufficient material to warrant recasting the laws.

Suggestions came from all sides. They included longer jail terms, elimination of level crossings, cancellation of drivers' permits for long periods, and inclusion of women on juries trying highway cases.

"Everybody seems to have the speed bug except the House of Commons," exclaimed Toronto's wartime mayor, claiming Canada was 20 years behind the time in highway legislation. He urged a general stiffening of penalties and possibly the adaptation of New York state's homicide law for highway killings. A general survey should be made with the co-operation of the provinces and possibly a new department of safety established at Ottawa to lead the fight.

Only by a process of education of the public, by teaching motorists to observe the courtesy of the road could any improvement take place, Mr. Guthrie believed. Increases in accidents occurred in other countries despite imposition of stricter penalties and changes in the speed limits.

Mr. Church had not suggested any definite proposals for amendments to the Criminal code.

Flyers Finish Race

New Guinea Airmen Rather Late In Reaching Melbourne

Melbourne, Australia. — Just 116 days after they took off from Mildenhall in the England-to-Melbourne air derby, G. E. Hemsworth and R. Parer, New Guinea airmen, roared across the finish line here, Feb. 18.

Their belated arrival, nearly one-third of a year after the winners, was unheralded and uncheered.

The flyers took satisfaction, however, in the reflection that they had bettered one record—one they had set themselves. "We're a bit late," observed Parer, "but we've beaten our previous record by four months."

Imperial Press Conference

Reception Tendered By Former Premier Of South Rhodesia

Bulawayo, South Africa. — Delegates to the imperial conference arrived in Bulawayo from Kimberley. Sir Herbert Stanley, governor of Southern Rhodesia, accompanied by Lady Stanley, made a special trip from Salisbury, the capital to greet them.

They met the governor and other officials at a reception tendered by H. H. Moffat, former premier of Southern Rhodesia and a nephew of David Livingstone, the noted explorer.

The delegates were entertained at a banquet at night.

Must Make Concessions

Yarmouth, N.S. — Since Canada achieved an independent status in world affairs following the war, she can expect to be forced to make concessions as well as demands when imperial bodies meet, Prof. M. C. Dawson of the University of Saskatchewan said while addressing a local service club.

Alberta Dairymen's Association

Calgary.—C. W. Burnell, Edmonton, was elected president of the Alberta Dairymen's Association at the close of the annual convention here. Fred Reynolds, Calgary, is secretary.

Local and Personal

HAY FOR SALE—Three tons alfalfa. J. G. Connell, Phone 42X.

For funeral or wedding flowers, Moores' Greenhouse, Creston.

BATTERIES RE-CHARGED—Orchard Service Station, Creston.

FOR SALE—Five-acre block, partly improved. J. G. Connell, Phone 42X.

Louise Parry spent a few days with friends in Nelson the latter part of the week.

Thursday, February 28th, is the last day you can legally run your car on the 1934 licence.

J. P. MacDonald, local forestry officer, was a weekend visitor with his mother at Cranbrook.

January established a record for births at Creston hospital, the stork making six calls last month.

Mrs. M. J. Beninger was a visitor with Spokane friends a few days the fore part of the week.

Mrs. S. A. Speers and son, Arthur, were Spokane visitors a few days at the first of the week.

Denzil Maxwell arrived on Tuesday from Cranbrook on a visit with his mother, Mrs. Jas. Maxwell.

Father Choinel will say Mass at Holy Cross Church, Creston, on Sunday, February 24th, at 10.30 a.m.

Mrs. O Gariepy, who has been a patient in Cranbrook hospital, has returned, and is much improved in health.

HAY FOR SALE—Good alfalfa hay, $15 ton delivered to town; $13.50 ton at ranch. Frank Hollaus, Lister.

WANTED—Girl wants house or other work, capable and reliable; experienced waitress. Enquire Review Office.

The local ice harvest is under way this week. The frozen fluid is of splendid quality and about 18 inches thick.

Mrs Frank Garrett and daughter, Beverley, are here on a visit with the former's parents, Mr. and Mrs. F. LaBelle.

Mrs Page McPhee and young son left on Saturday on a visit at Trail, where Mr. McPhee is working just at present

Construction is about completed on a new blacksmith shop on Park Road, just about opposite the Commercial Hotel.

Miss Phyllis Hamilton of the nursing staff of the New Denver hospital, is here on a visit with her parents, Mr. and Mrs. J. W. Hamilton.

FOR SALE—Jersey-Holstien cow, six years old, will freshen March 1st. Also 150-egg size Belle City incubator. A. Hoglund, Canyon.

According to an official announcement the usual supply of pheasants will be provided for release at Creston Valley points this season.

Mrs. G. R. John and her sister, Mrs. Chisholm of Kimberley, who is visiting her, are spending a few days with Spokane friends this week.

The weather still continues frosty in the mornings but warms up during the day with the result that the considerable supply of snow is steadily disappearing.

At the meeting of the school board on Monday night it was decided to have a ratepayers meeting early next month to discuss better educational facilities at Creston.

The Presbyterian Ladies' Aid St. Valentine tea and sale of cooking at the home of the president, Mrs. Henderson, was an outstanding success. The cash intake was $36.

DOG OWNERS—Owners of dogs within the village are notified that dog taxes are now due and tags can be obtained at the town hall. Prompt payment is requested.

If you are interested in hunting or fishing be sure and attend the ope meeting of the Rod and Gun Club in the United Church basement, Monday evening, February 25th, at 8 o'clock.

The auditor's report shows the village to have closed the year with a cash surplus of $1583. During the year $3754 was spent on streets and sidewalks. The report will appear next week.

Get your 1935 motor license on or before March 1st and avoid possible trouble. The police have been ordered to prosecute all who operate cars after March 1st on the old license plat .

Ralph Swanson, former resident of Creston, now of Kimberley, was renewing acquaintances in Creston on Saturday. He played on the Kimberley basketball team in the league game that evening.

Two orchestras will supply music for the hospital sweepstakes dance at Park pavilion on Friday night, March 1st, with the Hospital Women's Auxiliary putting on the lunch. The admission is 50 cents. Music by the Serenaders and Melody Five orchestras.

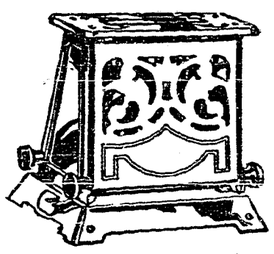
By trimming the Groceteria by a 21-20 score in the local basketball league game on Friday night the two teams are again tie for first plach. In the ladies' division Creston Review trimmed Creston Motors and Moore's Garage beat Pharmacy, with no change in the standing.

L. A. Campbell, vice-president and general manager, along with J D. MacDonald, general superintendent, of West Kootenay Power & Light Company, Limited, wers visitors from Trail at the middle of the week, making an inspection of rock removal operations at Goat River canyon.

Creston hockey talent broke into the winning column again on Sunday afternoon at the Tincan Slough when the locals had no trouble disposing of Kaslo, 11-0. The ice was slow but flashes of good hockey were seen at times, Creston staging two and three men rushes on occasion and the Kaslo net minder had no chance the way the locals skated in on top of him. The shots Kaslo had, however, kept Schade moving to prevent a score. The sub line of Creston were the hardest workers on the ice, and they were robbed time after time in scoring. Creston's counters were netted by Jake Fritz, Homer Eddy and J. Brown one each; Fred Simister and H. Corrie two each. Doug Corrie 4. Others on the Creston team were Bob Currie and Cliff. Reynolds. Allan, Rogers and LaBelle were the pick of the Kaslo team.

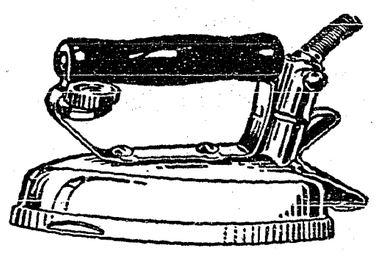
Come in and inspect these General Electric Hotpoint Appliances today. We will gladly explain their many exclusive features, their outstanding qualities, and the guarantee of satisfactory performance that goes with each regardless of price. General Electric workmanship insures you of quality merchandise, accurate performance, and long life.

TOASTOVER TOASTER



This popular Hotpoint model toasts two large slices at the same time, right at the table. Finished in highly polished nickel plate, this toaster will retain its gleaming beauty for years. It is the choice of those who want beauty combined with utility.

DeLUXE IRON



This six pound model is Hotpoint's finest iron. The "button hook" is one of the greatest convenience features. The exclusive Hotpoint thumb rest saves arm and wrist strain, and the heel stand makes lifting unecessary. A hinged plug prevents fray d cords and broken connections.
