No. 45

Canyon's '34 is Notable Year

Educational Facilities Greatly Enlarged—Indoor Sports Go Strong—Fruit Shipments Biggest, Yet—Cut Out Wealths

1934 has been a notable year at Canyon in many ways. In land clearing it has shown its greatest strides. Settlers have come in from the prairies and settled on the acreage along Goat River on the stretch from what is known as Winlaw's island to a point just above West Kootenay Power & Light, Company, dam. These small property holders have built homes and, in many cases, extensive clearing operations have got under way, with all available wood either used or disposed of to make a living.

Another feature to Canyon's 1934 is the increased fruit output, which is much the largest ever known in the district. All tree fruit crops were high, especially the apples, with Delicious and McIntosh Reds much to the front. Shipments of cherries were noticeable, which fruit is due for a rapid increase in the next few years due to the coming in to bearing of considerable new plantings four or five years ago. With the rapid increase in the output of tree fruits, berries and other fruits have been dwindling every year.

Horticultural developments show that most of the Wealthy apples in the district have been taken out and are being replaced by the later varieties of apples. Returns on Wealths were so low the past three years that they did not warrant further culture.

Dairying, too, has gained a noticeable place in the community, with practically every ranch boasting one or more cows, and most of these marketing a certain amount of dairy butter.

Every community endeavor has been given an unusual chance to thrive due to the availability of the Canyon community hall, which is now clear of debt, and has most every modern convenience, including electric light. The hall was erected in 1924 and certainly has done much to hold this district together and give the residents opportunity to enjoy themselves right at home.

In the building line a great change is noted. In the northeast section the two story home of Matt. Clayton, just completed, is considered one of Canyon's finest residences. The work on the house has been done almost completely by Mr. Clayton and his sons.

In the same locality, down by the power house and dam the Parker home is a great asset to that section. It is grey stucco and provides every modern comfort and convenience. Mr. Parker has done extensive gardening and last summer the place was surrounded with spacious and handsome flower beds. Below the house, on the ledge overlooking the river, a picnic park has been created and provides plenty of shade, with rustic tables and chairs for pleasure seekers.

Other new Canyon homes include the bungalows of Mrs. Bateman, sr., G. Messinger and Manfred Samuelson, all of which add to the appearance of Canyon.

September, 1934, saw the establishment of the first high school at Canyon. There are 21 pupils enrolled, with students from Canyon, Lister and Huscroft. Miss Magee is principal, and is assisted by Principal Hunden of the public school, who takes chemistry with the senior pupils. The new room is average size and fitted up to comfortably accommodate the students. In the absence of a laboratory room this work is well taken care of at a long table at the rear of the room.

In the public school there are two new teachers, J. S. Hunden is principal, and Miss Frances Knott in charge of the junior room. There are 66 pupils enrolled.

Another notable feature to Canyon school is the recent organization of a junior choir, under the leadership of Miss Knott. So far it has been an unqualified success. There are 22 voices, and is the first one of the kind to come into being in the valley.

The Boy Scouts, too, have been organized with a membership of 12, with Adam Johnson as acting scoutmaster. Two weeks ago they put on a concert to secure funds wherewith to purchase scout uniforms.

1934 saw the opening of new lines of sport at Canyon. In the spring the young people managed to raise enough money to put in a community tennis court and the club had a live membership. They have great hopes of adding another court this year.

Basketball was introduced to Canyon by Principal Hunden, and, is at present, Canyon's most popular sport. Although few of the pupils had played previously they have made a great showing. In the valley league they occupy top berth in both the girls' and boys' divisions. They also have a junior team which is being developed for next season.

Miss Nisale McRobb, at the head of the badminton club, reports the shuttle sport going the strongest ever this year. Playing nights are Tuesday and Thurs-

days at the community hall. The club boasts a membership of 20. In two tournaments they provided fast opposition for the more-experienced Creston players.

The Dramatic club which has functioned for some years at Canyon, and which has been responsible for the putting on of several really fine plays, is dormant this year. There has been talk of re-organization, and putting on an operetta, but nothing definite has been decided upon.

Kitchener

Miss Edith Nelson left on Saturday for Cranbrook, where she has secured employment.

Mrs. Art Simpson left on Tuesday on a visit at Cranbrook, a guest of Mrs. Arthur Bowness.

The roads are breaking up fast now and the Greyhound busses have not been through since Friday.

Chas. Nelson and daughter, Laura, were Cranbrook visitors at the weekend, returning on Monday.

Mr. McNabb of Calgary, Alberta, and Norman and J. White of Fort Steele, mining men, were here on business last week.

The new road at Goatfell east was opened on Monday morning. It has eliminated Goatfell hill, and is a great improvement.

The married men on relief resident in Kitchener are working at present on the construction of a bridge over Meadow Creek, for the pack trail up Goat river. Carl Anderson is in charge of the work.

The February report of Kitchener school as issued by the principal, Miss Jessie White, shows an enrolment of 18, with the high standings as follows: Grade 8—Helen Oja, Leonard Bohan, Robert Johnson. Grade 6—Jean Blair, Alice Bohan, Christina Parslow. Grade 4—James Thompson, Mary Bohan. Grade 3—Ralph Abar, Marjorie Blair, Maxine Nowlin, Harold Nelson, Lily McDonald. Grade 2—Robert Thompson, Jimmy Bohan, Alton Nowlin, Irene McDonald. Grade 1—Victor Parslow.

Lister

Birth—On March 1st, to Mr. and Mrs. Edward Herman, a daughter.

R. Stevens left at the end of the week for Trail, where he is a visitor this week with his son, Ernest.

Gordon Hurry got back at the end of the week from a holiday visit with friends at Rossland and Nelson.

The school commenced operating on the summer schedule on Friday morning, operations now commencing at 9 a.m.

Waddy Huscroft is at present laid up with a gash in the knee inflicted while working with an axe, and requiring a number of stitches.

Mrs. A. Holden, who has been a visitor with her daughter, Mrs. S. Whittaker, at Cranbrook, for the past three months, arrived home on Sunday.

Lister Community Society are having a bridge at the schoolhouse on Saturday night, which will be under the direction of Mr. and Mrs. Chas. Huscroft.

The address, prayers and hymns at the Anglican Church service on Sunday morning were appropriate to the day, which had been designated Peace Sunday.

Seven tables were in play at the Deer Lodge Club military whist at the new Huscroft schoolhouse on Saturday, with John Bird as master of ceremonies.

First prize went to table England, in charge of A. B. Bernard, assisted by Mrs. Bird, Miss Robinson and Miss Curtis. The consolation prize was taken by table India commanded by Harry Demchuk, assisted by Miss Maud Ross, Bill Demchuk and Roy Sakata. The evening was a lively one closing with an excellent lunch.

Notwithstanding a prevalence of colds the senior room of Lister school had an average attendance of 85 per cent. for February, according to the report issued by the principal, Miss Curtis. The following made the high standings: Grade 8—Martha Domke, Cyril Bird. Grade 7—Alice Wellspring, Margaret Dent. Grade 6—Margaret Sinclair, Erwin Ryan. Grade 5—Mary Daus, Martha Domke. Perfect attendance:—Kitty Beard, Cyril Bird, Margaret Dent, Martha Domke, Helen Gustafson, Eva Kilgren, Erika Meyer, Margaret Sinclair, Alice Wellspring.

In Division 2 there was an average attendance of 88 per cent. with the following making the high standings according to the report of Miss Webster: Grade 4—Stella Beard, Mary Millner. Grade 3—Dorothy Millner, Arthur Pondry. Grade 2—Freda Donaldson, Dorcen Beard. Grade 1—Alfred Sommerfeld, Ernest Dent. Perfect attendance:—Harold Daus, Mary Domke, Theodore Domke, I. ez Gus Alson, Harry Krebs, Dorothy Millner, Mary Millner, William Strelve, Albert Kilgren.

Fire Blight Clean Up is Ordered

Valley Orchards Badly Infested and Horticulturist C. B. Twigg Instructed Enforce Regulations Penalties Same Codling Moth

Fire blight, which has been prevalent in Creston Valley for some time past, has reached the point where it threatens to pretty well wipe out the pears and some varieties of apples in the area from Erickson through to Alice Siding particularly, and to avert such a catastrophe the department of agriculture has issued instructions to C. B. Twigg, local horticulturist, to see to it that a thorough clean-up is made this month.

The Review is informed that fire blight is considered as serious an infestation as codling moth, and the penalties an orchardist is liable to if he fails to rid his trees of the disease are just as severe as with the codling moth. On Monday Mr. Twigg was notified by wire to see to it that the regulations are observed.

In notifying of the action taken by the agricultural department, the deputy minister, J. B. Monro, adds "You will understand that Mr. Twigg's duty will be to attend to the inspection of orchards after they have been properly cleaned, either passing them, or reporting them as not being passed."

Fire blight, we are told, is a bacteria disease and lives in the cambium layer of the inner bark, and is active at the base of the previous year's infestation. Almost any kind of an insect is liable to carry it from tree to tree, or pruning shears that come in contact with it will carry it to the next tree on which the shears are used. The way to eliminate it is to cut out the infested limb at least a foot below what appears to be dead.

Reports to hand would indicate the blight is particularly bad with the Bartlett and Clapp's Favorite pears, particularly, and is quite noticeable on the Bosc and Clairgeau varieties. Amongst the apples the worst sufferers appear to be Wealthy, Jonathan and Spitzenburg, and the Transcendant crabapple.

Once the sap begins to rise effective control grows less easy, hence the order to clean up during the dormant season. Once the blight takes hold of the main trunk there is no hope for the tree. While the blight is altogether too prevalent, the loss of trees to date has been light.

Basketball Play Offs Under Way

End of Season in Sight—Cardinals and Moore's Garage in Finals Due to Start Tuesday—Pharmacy in Cellar.

	Pld.	Won	Lost	Ptge
Cardinals	12	10	2	.333
Imperial Groceteria	12	8	4	.667
Wynndel	12	6	6	.500
Loallo	12	0	12	.000

	Pld.	Won	Lost	Ptge
Cecil Moore's Garage	12	10	2	.333
Creston Review	12	8	4	.667
Creston Motors	12	3	9	.250
Pharmacy	12	3	9	.250

With the playoffs for Creston basketball league already started it looks as if it will only be a matter of ten days before the champions can be announced.

As the standing now shows, in the men's section Cardinals are at the top with Groceteria but two games behind. Wynndel, a new squad in basketball circles this year, has annexed a well deserved third place in the standing, with the game and sporty Loallo, also newcomers, bringing up the rear. Although the latter have not won any games they have showed a splendid sports spirit and certainly have provided first class opposition for the other teams. In one game, in the early part of the season, coming very close to trimming the present champion Cardinals.

The latest report is that Wynndel has definitely withdrawn from the playoffs due to the bad shape the roads are in for travel these days. Loallo automatically moves into third place.

In the ladies' division everyone is keenly awaiting to see the outcome of the final series of games, with no team at all sure of cropping the pennant. Moore's Garage is at present two games to the good on Creston Review, and have drawn a bye. They are due to meet the winner of tonight's sudden death game between Creston Motors and Review, the Pharmacy having been eliminated in a sudden death game Tuesday night by a 19-17 score.

The league semi-final contests are announced for to-night when Loallo meet Groceteria and Review takes on Motors in sudden death games to decide

who appear in the finals with Cardinals and Moore's Garage.

The start of the finals, which will be two, out of three games, is scheduled for Tuesday night. For all the playoff games there will be a double referee, the executing picking Messrs. Levirs and Marriott for these assignment at a meeting Monday night.

Canyon

Darcy and Allan Barnhardt of Glenlily are visitors here this week, with their grandparents, Mr. and Mrs. F. Knott.

Canyon Ladies' Hospital Auxiliary had a very successful pussywillow tea at the home of Mrs. Knott Wednesday afternoon.

Axel Berggren is enlarging operations at his fox farm with some fine young stock he has just secured from the Putnam farm at Erickson.

The first Robins at Canyon made their appearance on Friday—coming in with the lamblike weather that featured the first day of the month.

Remember the C.C.F. St. Patrick's dance at Canyon Community Hall Friday evening, March 15th. The admission is 35 cents to ladies and 50 cents to gentlemen, supper included. Music by the Serenaders orchestra.

Shareholders in the Canyon Community Hall met in annual session one night last week, at which officers for 1935 were elected as follows: President, Roy Brown; secretary, Mrs. W. H. Kolthammer; treasurer, W. H. Kolthammer; executive, G. Niblow, jr., Mrs. Cross, Miss Nissie McRobb.

Canyon Farmers' Institute March meeting was at the home of W. H. Kolthammer on Saturday night. Business was largely routine. A request will be made for gravelling the main highway from the Wearmouth place to Martin Nelson's corner. F. Knott was engaged to take the usual livestock census in order to protect local cattle owners in the matter of grazing this season.

Canyon C.C.F. Club had a good turnout for the annual meeting on Tuesday night, at which the following officers were elected: President, F. Knott (re-elected); vice-president, L. Moberg; secretary, Mrs. Norman Strong; treasurer, Chas. Pipe; Executive committee, Miss F. Knott and Frank Baker. Previous to the election of officers those present listened to a talk on current events, dealing with conditions in Russia, Germany, Italy, England, and the U.S., by Rev. A. Walker. The speaker left for home immediately after his talk.

Sirdar

Leslie Dee of Grey Creek was a business visitor here at the weekend.

Arthur Lombardo was a weekend guest of his brother, Frank, at Drury.

Frank Hamilton of Kootenay Landing was a visitor to Creston, Friday.

Sydney Rogers was at Creston, Friday night, attending the hospital dance.

Lars Anderson of Boulder Creek was a business visitor to Creston, Monday.

Unmistaking signs of Spring are here the youngsters all being engaged in the games of marbles.

The Greyhound stage did not make its run on Saturday much to the inconvenience of local passengers.

Norah Nastasi of Creston was a weekend visitor of Misses Frances and Sylvia Talarico.

Mrs. T. Rogers left by stage for Nelson, Monday, where she is receiving medical attention.

Vincent Cherbo left for Bellvue at the beginning of the week, at which place he has secured employment.

Miss Annie Pascuzzo, who has been on a visit to Yahk for a few days, returned home at the end of the week.

Dr. Henderson of Creston was a professional visitor here and up the Lake points Wednesday afternoon.

J. S. Wilson was a weekend visitor at Creston. Godfrey Vine was at Creston on Friday taking in the hospital dance.

A. Vito, who has been in Cranbrook for medical attention for about a month, has returned to his duties as section man.

Sydney Rogers was at Kimdorley, Saturday last, playing for Creston basketball team in their match with Kimberley.

Miss Jenn McLean of Kuskanook has left for Nelson where she will visit before proceeding to her home near Grand Forks.

Ice at Kootenay River and the slough has now gone and the water flow is free. As the water is rising it is well the ice has left.

The water as indicated by gauge at Slough bridge reads 1.85, a rise of 0.25 for the week. This upward trend in the

Hoop League Season Ending

Review and Cardinals Win Concluding Games of Regular League Season—Groceteria Defaults Game to Wynndel.

At the final game in the basketball league, Thursday night, there was a rather small crowd in attendance. The first game, between Creston Review and Creston Motors, was taken by the newspaper girls 24-14. The Cardinals won from Loallo, 34-14, and Imperial Groceteria defaulted their game with Wynndel, but it made no difference in the league standing as they had a comfortable hold on the second place.

In the girls' game play started with Motors having a little the best of the argument, but as play continued the Review got back to business and as far as scoring was concerned they white-washed the garage help. Review displayed nice combination in the first quarter but as play continued it was completely lost due to roughness and too much individual play. Motors played a nice game Liz and Margaret Armitage and Kate Payne putting up a splendid display. For the winners Iren Bourdon and Nora Payne starred. Teams:

Review—Levirs, Lewis, N. Payne, Bourdon, Dot Falmer.
Creston Motors—L. Armitage, M. Armitage, Avery, Wightman, J. McCreath, K. Payne.

The greater attraction of the evening was the Cardinal-Loallo game. Although the Cardinal score was high it did not at all indicate the play. Loallo had the ball in their possession the greater part of the time, making a lot more tries for the basket than the redshirts. Loallo had nice combination and only failed to win on account of poor shooting. Buff Nastasi, F. Bourdon and L. Maddess were the pick of the losers. Doug. Corrie and Holmes starred for the winners. Teams:

Cardinals—D. Corrie, Holmes, H. Corrie, Ross, Mark, Gobbett.
Loallo—Buff Nastasi, Maddess, Sam Nastasi, F. Bourdon, LaBelle, Truscott, Goplin.

Referees for the games were: Girls, Howard Corrie, Boys, Mrs. F. P. Levirs and Bill Bourdon.

Erickson

Jim Handley is at present a patient in the hospital at Creston.

F. Feebles of the Peebles Motors, Nelson, was a business visitor here this week.

Miss Helen Dodds, who has been on a visit at Cranbrook, arrived home this week.

Erickson school is back on the summer schedule, opening at 9 a.m. commencing Friday last.

Harold Rhodes of Wynndel is an Erickson visitor this week, a guest of his sister, Mrs. Melt Beam.

Frank Putnam, M.P.P., has just taken delivery of a new 1935 DeLuxe Plymouth sedan, which arrived this week.

Mrs. Melvin Jorde of Arrow Creek left at the end of the week on a visit at her home at Cardston, Alberta.

Mrs. K. Knott was hostess to Erickson Christ Church Ladies' Guild at the March meeting on Tuesday afternoon.

water is mainly the result of the ice thawing on the lake.

Douglas Butterfield, Howard Slingsby and Charles Wilson were at Wynndel Wednesday attending the Kill Kare Klub social evening.

Mrs. Tucker and child have left for Lethbridge, Alberta, where they will join Mr. Tucker, who is employed there. The Tuckers' had a lease of the lodge at Kuskanook for the past year.

Mr. Grindron, inspector of telegraphs, was an official visitor Wednesday. At present a linesman is on duty all the time at the new highway so as to repair broken wires after each blast.

A work train was engaged last Saturday distributing ties along the C.P.R. track, judging from the number laid down a considerable amount of maintenance work is to be done in this area.

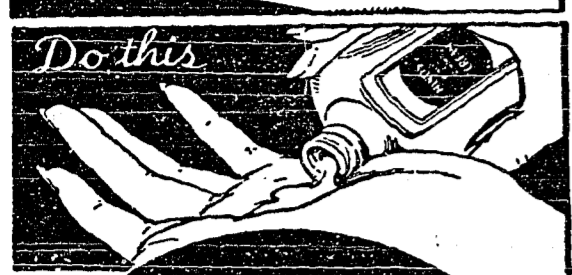

Last Saturday evening a slide took place on the right of way at Blako displacing a few rails. The damage was speedily put right and traffic was not held up. The noise of the slide was heard in Sirdar and Athara.

R. S. Boyan, cook at the camp here, had the misfortune to slip while engaged clearing the water flume which was in an icy state. It was found necessary to take him to Creston where several stitches were put in his leg, and some bruises treated. He was able to return to work the same evening.

GET RID OF THE CROWS
(By JACK MINER)

My reason, dear reader, for writing this article is simply to encourage you to take more interest in our great out-of-doors and closer study of the so-called wild creatures that occupy it. Yes, and to ask you to study them closer for yourself, since at the present day there are so many indoor naturalists writing and misleading the public. This is why I am asking all classes of humanity to take a deeper interest. When you are driving, walking, running or flying, keep both eyes open so as to gain more from personal observations, and when you see a crow pursued and pecked by smaller birds, stop and ask yourself why? Surely they don't want to eat him. Then, why are they chasing him?

Jack Miner in the days of his youth.

Or you may see a killdeer or other species of bird fluttering and hobbling out from right near you. Immediately you are convinced that she is crippled or the back of her wing is broken, since she keeps falling over herself every time she attempts to get away. Of course, you are going to catch her and see just what is wrong. But soon you find you can get just so close and no closer and when you have yourself out of breath you will get discouraged and stop, for you find the bird you are pursuing can fly fairly well and is five times further from you than she was when you started. Now, please ask yourself why and go back to where you first saw her. But be careful where you put your feet, for you might step on her eggs or one of her babies. Keep both eyes open and be convinced as to how these God-given creatures, in the majority of cases, take advantage of color protection. For illustration: if it is a killdeer's nest, see how well she has gathered pebbles, shells, bits of wood or fragments of anything of the color of her eggs, and placed them all around the nest. Remember this is the mother's doings, and when you see a ruffed grouse (Partridge) not over three days' old, hide among leaves the color of itself, what do you call this? I simply call it God.

In the spring of 1879, which was the second year we were in Canada, I put in every Sunday hunting for young foxes, to keep them as pets. With axe in hand, I would scour the woods for miles around and, when I heard something meowing and screaming, which sounded like an old Tom-cat making his last screech, instead of running for home to tell mother I was chased by a lynx or wild cat, I quietly marked the exact direction from which the sound came. When about one quarter of a mile away, the squalling usually ceased. Now I turned and, if the noise took me straight north, I went back south from where I first heard it, keeping both eyes open for hollow logs and so forth and for remnants of rabbits, ruffed grouse or turkey feathers, and in the majority of cases I would soon be using the axe to chop out the young foxes.

Sometime ago I read a nine page letter sent to me from a gentleman explaining that "it was not the English sparrow that was driving the barn and eave swallows out, but that the systematic control of house flies by the human race was robbing the swallows of their food and starving them out." Really, it was a beautifully written letter and, if one did not know better, he might be induced to believe it. But the fact is, the English sparrow is the direct cause of the decrease of fully ninety per cent. of our barn and eave swallows. I haven't seen an eave swallow in Ontario for twenty-five or thirty years. In Alaska there are no English sparrows, but in July, 1925, I counted forty-seven occupied eave swallows' nests under the eaves of a building we stayed in while there. In other words, they are there now just the same as they were here in eastern America 50 years ago, and would be here now were it not for the devilish, dominating ways of this imported, undesirable house sparrow, a dirty bird that doesn't do as much good in a year as a swallow will in a week.

Some years ago, I saw an article in a sporting paper stating that canvas-back ducks and Canada geese migrated at the rate of 120 miles per hour. One hundred and twenty

miles per hour, or, in other words two miles per minute! Say, I am from Missouri and you have got to show me! During the last ten years, I have been privileged to give this question a fair test and, on several occasions, when the wild geese have left my home for Hudson Bay, I have wired ahead of them, I wired to the C.P.R. agents at Stralok, Ontario, and to the C.P.R. agents at Cochrane, Ontario, and in every case I received a reply. If those agents saw the same geese that left here, these birds were making between forty or fifty miles per hour. Another short but accurate test I have been making recently is as follows: My oldest son lives two miles south of me on a road running east and west, the same as the one I live on. The wild geese that make their home with me at least five months of the year, all go out to Lake Erie to roost, returning early the next morning. Lake Erie is three miles south of my home. When I hear them honking and see them towering high before leaving the sanctuary getting ready to cross over this three miles of no-man's land, I get my son on the telephone. As I say, he is two miles south of me between the lake and the sanctuary. He holds the receiver with a watch in his hand, and just as a big distinguishable flock crosses the road at my house I call "Go." He marks the exact time, goes to the road and, of course, can see the geese coming. Here are the results of the last three tests: First, 2 1/2 minutes. Second, with a nice breeze in their favor, lifting them along—two minutes and eleven seconds. Third, as they were facing quite a stiff breeze, four minutes. Remember, these birds are from three to five hundred feet high before they leave the sanctuary, therefore they are not doing climbing after they leave here.

Oh, but you sigh and say, "What has all of this to do with Crows?" Nothing at all. I have only unrolled these experiments to encourage you to study for yourself.

The first hunting I did in Canada was crow hunting. This was May, 1868. We shot the crows because they pulled up our corn, and from boyhood up, whenever I started to hunt any creature I studied its habits. Soon I found myself practicing how to imitate the call of the creature that was causing the young crow's trouble; I would practice this quivering, cawing and hooting in the early morning, when all was silent, and let the echo from the forest speak for itself as to the perfection of the deception. Then I would conceal myself in the thick undergrowth of the woods, in easy range of a few dead tree-tops for Mr. Crow to perch on. I would then start giving these low delicate caws of distress, just the same as I heard the young crow utter, now and then giving the low hoot of the owl. Many, many of these black, old nest-robbers have brought food or come to protect the wrong baby but, to my surprise, they were not feeding their young on corn. As I held these old

birds up by the tall as they gasped their last, they spewed up bird's eggs. I have seen as high as seven unhatched robins pour out of the mouth or throat of a dying crow, and the little bits of life were sometimes still squirming.
(To Be Continued.)

**SUNDAY SCHOOL LESSON
MARCH 10**

PETER PREACHES TO GENTILES

Golden text: "God is no respecter of persons: but in every nation he that feareth him and worketh righteousness, is acceptable to him." Acts 10:34b, 35.
Lesson: Acts 10:1 to 11:18; 15:6-11.
Devotional reading: Psalm 67:1-7.

Explanations And Comments

Peter's Sermon, verses 34-43. The solemnity of the occasion and the weightiness of Peter's message are indicated by the words with which they were introduced: "And Peter opened his mouth and said." "Of a truth," he exclaimed, "I perceive that God is no respecter of persons: but in every nation he that feareth him, and worketh righteousness, is acceptable to him." Moffatt's translation reads: "I see quite plainly that God has no favorites, but that he who reverences him and lives a good life in any nation is welcomed by him."

To those Gentiles Peter preached the Christ, who is "Lord of all". In the Greek the word he is emphatic: to show this, the words have been rendered, "He, yes he, is Lord of all," of Gentiles as well as Jews. "You yourselves know the story of what took place in the life of Jesus," Peter declared, "and we are witnesses of all things, of his life—how he went about doing good—of his crucifixion and resurrection, and how he charged us to preach unto the people and to testify that he is ordained of God to be the Judge of the living and the dead." And Peter ended his sermon by saying that every one—even Gentiles—who believe on him shall receive remission of sins.

The Gentiles Receive The Holy Spirit And Are Baptized, verses 44-48. Peter's sermon seems to have been interrupted by the manifestation of the Holy Spirit's presence. Peter and the other Jewish believers who had accompanied him were amazed, for they heard the Gentiles "speak with tongues," as the Jews had spoken on the Day of Pentecost. "Can any man forbid the water, that these should not be baptized who have received the Holy Spirit as well as we?" questioned Peter. And he directed that the Gentiles be baptized in the name of Jesus Christ.

"Peter had only to tell Cornelius of the Master's life, and to win his allegiance to the Lord and Savior of mankind, for the Spirit of love and unity to be poured out upon both alike. The power which unites people of diverse racial tradition and religious customs is the power of the Spirit. Jew and Gentile, Englishman and African, bond and free, may become one in Christ." (R. H. Coats).

Grows Large Apples
Eight-pound apples have been grown by Mr. Lobituro Metauda, of Nagane, Japan. Although sour, they have a good flavor. Their size is the result of many experiments. Now they are to be grown for sale.

The ancients called the planet Venus "Hesperus" when it was an evening star, and "Phosphorus" when they saw it was a morning star, not knowing it was the same body.

Allee—Why do they have knots on the ocean instead of miles.
Skipper — Well, you see, they couldn't have the ocean tide if there were no knots.
2088.

Starvation The Cure

When People Do Not Have Money To Buy Rich Foods Then Health Is Improved

In days of depression, general health is better than in days of opulence and fine living, several doctors told the House of Commons during a health debate. Dr. J. P. Howden (Lib., St. Boniface) said "starvation is the cure for many diseases" and it was because people did not have the money to buy rich foods that their health improved. And it was true, Dr. Howden added, that "many people dig their graves with their teeth."

A new disease of corn, which may become important, has been reported in Florida.

Uli Baba.

I can help you. . . Remember old Dad Kane, Peyotl?"

"For heaven's sake lay off that, Mist' Sam. . . ." The man's arm flung up to guard before his eyes and he shivered as though with an ague. "I ain't slept a wink since I came back. . . I'd never git sleep if it wasn't fer . . . fer . . . you know what" He tugged a red-and-green cigarette packet from his pocket.

Dustin snatched it from him, tore out four cigarettes and gave them to him, and thrust the package into his desk drawer.

"You damned fool. I've told you a dozen times not to get any of these things except what I give you. I give you your full allowance. Just suppose you take too many of these and talk too much. You know what'll happen. You'll be hung as high as Haman."

Peyotl looked dazed. He had looked for a coin and perhaps an errand and he found a threat that he only half understood. He could not guess what was coming, but he knew that he was on the verge of being violently ill. His stomach was queasy. Man, born of woman, cannot smoke unlimited peyotl cigarettes to kill the memory of a murder that he never committed and still carry himself like a free man. Peyotl squirmed and Dustin gladly noted it.

"I wish I could help you, Peyotl," he said. "But I don't see how I can."

THE TENDERFOOT
By **GEORGE B. RODNEY**
Author of "The Coronado Trail", "The Canyon Trail", Etc.

CHAPTER XIII.—Continued

"Wait a bit. I've got a better plan than that. . . ." Dustin's grin was the grin of a dog who sees the meat that he intends to seize. "Wait! If I had sprung that on Joe Carr, he'd simply wait till this Gerald Keene, his partner, turns up. Young Keene might have the money. If he has, then old Carr would get out of my clutches. See? Keene would sure help Carr meet that note. He'd sure do it if he ever learns of what we found in that mine and prospect of old man Kane's. I told Carr that if he'll get Edith to agree to marry me, I'll call off the suit about Soda Springs. He can't finance that suit anyhow. See?"

"I see; you've given your hand away when there was no need to," said Goddard testily.

"Hub. Suppose I've got four good aces in the hole. What then?"

"Show me your aces," growled Spike. "Damned if I can see any sign of an ace in this mess."

"All right. I'll show you. Do you happen to remember the date that young imp of hell, Gerald Keene, the owner of the other half of the Hour-glass, is due here?"

"On the tenth of next month, it said. This is the next month and today's the ninth. He's due in Seco tomorrow night, I reckon."

"All right. Now listen to me. . . ." Dustin sat forward and tilted his chair on its front legs. "You and I've been partners for a good many years. That right?"

Spike Goddard stared at him. Was his partner losing his mind? He studied Dustin for a long three minutes and Dustin grinned quietly at him. Finally:

"We've been strippin' the Hour-glass of everything its got for more'n five years," said Spike. "If one of us told what he knows about the other, he'd sure as hell go to jail, I reckon. We've soaked away every dollar we could raise. We've got seventeen thousand in cold cash right now in our office safe. You don't need to have me say it but . . . Make your game. I'm playin' her as she lays."

Dustin nodded complete satisfaction.

"I knew you'd say that," he said. "Now listen. . . . Old Kane located that mine. It's on the Hour-glass, I know that. Kane and Peyotl and I went there. Kane showed me the mine. Then he and Peyotl got into a fight over some water. I wasn't in camp when it happened but I got back to find Kane dead with his head all mashed in and Peyotl in one of his confounded fits after dopin' all up with his stuff. . . ."

"That you give him . . ." said Spike, grinning.

Dustin's face turned the color of old dough. He leaned forward and gripped Spike's arm.

"If you weren't my partner, I'd kill you for that word," he said.

Spike shivered. He felt suddenly as though his veins had been filled with ice water.

"Go on," he said awkwardly.

"I'm listenin' . . ."

"Aye. Well, when Peyotl saw what he'd done, he went all to pieces. Old Kane is buried up Red Water canon. No one will ever find him there. Well. . . . This man Gerald Keene is Gerald Kane. He's the nephew of old Kane. . . . That's his name, d'ye see? Gerald Kane is comin' out here to investigate the reported death of his uncle, Dad Kane. . . . If the murderer is discovered Peyotl Gregg will hang. . . . Is it gettin' clear to you?"

"Good God," said Spike explosively. "Do you expect me to believe that . . ."

"I don't care a damn if you believe it or not so long as Peyotl believes it. Get me so far?"

"I sure do. . . ." Spike glanced admiringly at his partner. This would be a master stroke indeed. If Peyotl Gregg, the well-known "hop-head" could be got to kill Gerald Keene then Keene's share of the Hour-glass would pass to old Joe Carr, and they held old Joe Carr's note for the Hour-glass . . . where Kane and Dustin had located the gold.

"By God," he said, "you've hit it. But I swear I don't see how you can pull it off."

"You don't have to see. Go on out of here and tell Peyotl that I want to see him at once. Not a word more than that."

Spike went and ten minutes later Peyotl dropped his hat at the door and came shamblingly into the room. Dustin looked up from some pretended work at the desk.

"It's a good thing for you, Peyotl, that you came at once," he said. "I'm sorry for you, but I don't see how

"What's the matter, boss? What's come up?"

"You know damned well what you did. The question is how're you goin' to keep the world from knowin' what you did, too? I'll hate to see you at the end of a rope, Peyotl. You remember Wills?"

Peyotl gulped audibly and sat down. He remembered Wills very well. Caught while in the very act of changing brands on two horses of the Cross Keys' stock, Wills had been given two hours to confess his sins. The time had been wholly insufficient and Wills had gone to some questionable place with a lariat about his neck. Peyotl remembered seeing the long body swinging in the wind under a giant live oak while a yellow-hammer and two woodpeckers hammered cheerfully above him. He had never forgotten it and Dustin knew it.

"You see, Peyotl, it's this way. When you killed old man Kane, we though he was just an old desert rat who had no friends. It seems we were wrong. He had some friends back East. He had a nephew. His name is Gerald Kane or Keene or something like that. Anyhow old man Kane must have written him that he had found a gold mine. This nephew telegraphed that he will be out here to-morrow night to look up his uncle. You know what that means. Every one knows that I've been grub-stakin' old man Kane. They'll come to me first of all. If they ask me any questions, Peyotl, you can see that I've got to tell 'em the truth. I'm willin' to help you all I can, Peyotl, but not to the extent of perjury. Of course I know just about how it was . . . You smoked that damned stuff that I've told you to leave alone. You had a bad dream and you got into a doped row with old man Kane and killed him . . ."

Peyotl shuddered. "Mexico ain't so fur away," he muttered.

"They'd get you there. They extradite for murder in Mexico. I guess you've got to pay the bill, Peyotl . . . if this man Gerald Kane turns up. . . ."

He had suggested the answer even to a drug-deadened brain.

(To Be Continued)

TRY FASTER WAY TO RELIEVE A COLD

Discovery Bringing Almost Instant Relief to Millions

Follow Simple Directions:

When you have a cold, remember the simple treatment pictured here . . . prescribed by doctors as the quick, safe way.

Results are amazing. Ache and distress go immediately. Because of Aspirin's quick-disintegrating property, Aspirin "takes hold"—almost instantly. Your cold is relieved "quick as you caught it!"

All you do is take Aspirin and drink plenty of water. Do this every 2 to 4 hours the first day—less often afterward . . . if throat is sore, the Aspirin gargle will ease it in as little as 2 minutes.

Ask your doctor about this. And be sure you get ASPIRIN when you buy. It is made in Canada and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

1. Take 2 Aspirin tablets.
2. Drink full glass of water. Repeat treatment in 2 hours.
3. If throat is sore, crush and stir 3 Aspirin tablets in a third of a glass of water and gargle. This eases the soreness in your throat almost instantly.

Little Helps For This Week

"I have learned in whatsoever state I am therewith to be content." Phillipians 4:2.

No longer forward or behind
I look in hope or fear;
But grateful, take the good I find,
The best of now and here.
—J. G. Whittier.

If we wish to gain contentment we might try such rules as these:
Allow thyself to complain of nothing, not even the weather.
Never picture thyself to thyself under any circumstances in which thou are not.
Never compare thine own lot with that of another.
Never dwell on the morrow. Remember it is God's, not thine. The heaviest part of sorrow is often to look forward to it. "The Lord will provide."
Never allow thyself to dwell on the wish that things were otherwise than they were. God Almighty loves thee better and more wisely than thou dost thyself.

An Unusual Accident

A strange accident occurred when a motorist approaching a bridge near Pershore, Worcestershire, was held up by two stationary motor cyclists. Their machines stood close together in the road. They leaned towards each other, their heads touching. When the motorist alighted to complain, he found both unconscious. They had collided and their machines had interlocked. They were taken to hospital with bad injuries.

Camel May Be Displaced

And now the motor car may displace the camel. By use of 15-ton transport units, recently tested over 10,000 miles in northern Australia, it appears adequate and cheap service can be provided in undeveloped areas, combined with economical road construction. The unit reduced the rates to the level of those charged for hauling by camel teams.

ARE YOU TROUBLED WITH NERVES?

Do you find it hard to go to sleep at night? Do you feel poorly rested in the morning, "jumpy" all day, and "ragged" by evening?

Then take Wincarnis. Here's a delicious wine, not a drug, that soothes nerves as nothing else can; that helps you quickly to sleep and floods your whole being with vibrant new energy.

Wincarnis brings you all the valuable elements of grapes combined with the highest grade beef and guaranteed malt extract. Almost as soon as you begin taking Wincarnis, you feel wonderfully better. This is because Wincarnis enriches your blood, soothes your nerves and creates lasting reserves of strength and energy.

Over 20,000 medical men have proved in practice the value of Wincarnis in cases of jumpy nerves, insomnia, anaemia, debility and general indisposition. Get Wincarnis from your druggist.—Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto.

The Berlin fire department is now equipped with portable searchlights, strapped to the bodies of the firemen. The lights have a range of 100 feet.

The Blue Nile in Africa was so called from the dark color of its silt-laden waters.

Banish Constipation Nature's way!

A Natural Corrective . . . doctors advise its use to get rid of Constipation

Take your doctors' advice! If you suffer from headaches, bad breath, sour stomach and other constipation ills . . . use Quaker Bran.

Remember, Quaker Bran is different from all prepared bran cereals. It is pure bran, uncooked—untreated—unadulterated. For these reasons it is definitely richer in mineral and vitamin content.

Quaker Natural Bran works with nature to induce normal healthy bowel movement. It is safe, effective and gentle. And it saves you money because it allows you to dispense with costly drugs.

Serve Quaker Natural Bran with your regular cereal each morning. It is ideal for muffins, cookies, etc. A booklet of tested recipes for many delicious bran dishes is in every package.

QUAKER BRAN
Pure, Natural, packaged bran.

Mothers' Pensions

British Columbia To Increase Allowance By A Small Amount

Recipients of mothers' pensions will have their allowances increased by a small amount, it was stated in the British Columbia legislature by Mrs. Paul Smith (Lib., Vancouver-Burrard). It will be the first step in an upward scale and will be put into effect during the next six months, she said. The government had also decided that mothers with only one child should be eligible for pensions. Although the act provided for such eligibility the practice for years had been to exclude them from benefits.

The Abundant Vitality of Cod Liver Oil PLUS PLEASANT TASTE

I FIGHT GERMS, I'M VITAMIN A. PEOPLE NEED ME EVERY DAY!

I BUILD BONES, I'M VITAMIN D. HEALTH & STRENGTH DEPEND ON ME!

For over fifty years doctors have specified "Scott's Emulsion", wherever the bone-building, strengthening qualities of pure cod liver oil were indicated. For Scott's Emulsion is more than just cod liver oil, Scott's Emulsion is pure cod liver oil, emulsified for easier digestion, greater efficiency and pleasant taste.

THE CRESTON REVIEW

Issued every Friday at Creston, B.C. Subscription: \$2.50 a year in advance. \$3.00 to U.S. points.

C. F. HAYES, Editor and Owner

CRESTON, B.C., FRIDAY, MAR. 8

HOME BREW

Creston is not the only town in the province where the dogs are receiving some attention in the way of increased cost of license tags. At the last meeting of the Vernon council the tax on police dogs which are described by eight different breeds, and to give the by-law still more teeth it is set forth that "any parts of such breeds" are liable to the ten spot tax. It is further legislated that these animals shall not be allowed at large unless equipped with a muzzle, or on a leash in the custody of a competent person. Vernon is not making any change on the licenses of other dogs, which are two dollars for males, and five for females.

According to the latest statement by the cartel operated in connection with the B.C. Tree Fruit Board the Okanagan has still about 10 per cent. of its 4,279,331 box apple crop to market. In connection with the detailed statement issued, local growers may be interested in the figures in connection with shrinkage to date. The worst sufferer is the Wagener with a loss of 5 per cent. Rome Beauty is next with a shrinkage of 2.1 McIntosh have taken a loss of 1.3. Jonathans have stood up the best with a loss of but .7 and Wine-sap .9. According to the crop figures McIntosh accounts for more than 33 per cent. of the total output, and Jonathan about

20 per cent. No figures are available on Delicious, as to quantity on hand, or shrinkage.

Most everyone read with satisfaction the despatch in Friday's papers that the vote of \$30,000 for Creston's new postoffice building, along with some similar votes, had been passed at Ottawa and the money is now available for the work. It was quite natural that preliminary announcement of this amount being forthcoming should create a whole lot of talk, as to site particularly, and doubtless much advice in this respect has been forwarded Ottawa, under which circumstances it would not have been altogether surprising had the vote not been finally approved. Now that the novelty of the thing has worn off and most everyone has "got it off his chest" it will be good business to put on the soft pedal when broaching the site question. The main thing is to get the postoffice; with an election on their hands this summer the government can surely be trusted to put the structure on a site that will do just about the greatest good to the greatest number—during this generation, at least.

Ratepayers within the Creston school district are reminded of the special meeting of the taxpayers at the schoolhouse on Monday night at which increased school accommodation will be up for discussion and disposal. Whether taxpayers like it or not, more accommodation must be provided at the public school, and in view of the prospective increase in population from developments that are under way adjacent to the village it will be a good policy to look well to the future in deciding upon new construction. Building costs will never be lower than they are now, and never was there better opportunity for judicious expenditure to provide needed employment. Along with accommodation to take care of an overflow enrolment, the ratepayers should not overlook the good health of all the children. Classes in basements specially constructed for that purpose can be tolerated, but makeshift below stairs schoolrooms are a very doubtful economy. From many angles this is a most important meeting and the trustees are hoping for a large attendance.

While the turnout for the open meeting of the Rod and Gun Club Monday night last was quite satisfactory it was unfortunate that more of the local hunters and fishermen were not out to hear the talks by Inspector Kearns of the game department, and C. H. Robinson, fishery inspector. The latter was particularly interesting, chiefly due the fact that he confined his remarks largely to matters that affect Creston district, and showed himself well acquainted with local streams and the fish that make their home there. Where request had been made for restocking and it was not his intention to comply with the request he was quite frank in saying so, and advanced the best of reasons for the action he proposed to take. It was well that he directed attention to the changed conditions of the streams and the much greater number that are fishing in them as compared with even ten years ago. Having in mind the new era in which the fisherman is now living should be helpful to the club in making its seasonal recommendations.

It is to be hoped there will be some follow-up to the idea put forward by chairman Col. Mallandaine at the open meeting of the Rod and Gun Club at which he stated that the club was incorporated with very wide powers and was owner of some likely town property that could be used to good advantage for indoor sports. The chairman's observation was that the club charter was sufficiently elastic that it could be turned into a sports club or athletic association and the land it owned would be a good site for a building to house basketball, badminton, etc., and provide a hall for dances, concerts, meetings and public gatherings of all sorts. If the club property is big enough those interested in indoor sports would do well to follow the matter up. So far as size goes Park pavilion

fills the bill but its interior construction and other facilities are not conducive to the best in either the hoop or shuttle sports.

Our K. B. O. Broadcast

Kaslo Women's Institute will have a one-day fall fair this year.

Cranbrook Conservative Association has been revived with A. J. Balmert as president.

Salmon Arm is the latest to have the provincial police take over the town's police work.

On the sunny south sides of gardens at Bonners Ferry buttercups were in bloom last week.

At Cranbrook the trustees have restored 50 per cent. of the cut made two years ago in teachers' salaries.

During the sunny weather last week the Kootenayan states butterflyes were quite a common sight at Kaslo.

The Spokane Seed Company representative is at Bonners Ferry to contract for 800 acres of seed peas.

The Miner is of the opinion that profanity is altogether prevalent amongst the children of Rossland.

After being inactive for two years the Conservative Association at Penticton has been reorganized.

The Herald is expecting a small sized building boom at Bonners Ferry this year—both in business blocks and homes.

Vernon council is increasing the license on police dogs to \$10, and they will not be allowed to run at large unless muzzled.

Kamloops, Summerland and Kelowna are already making preparations to combat the mosquito nuisance this season.

The Courier estimates that contestants at last week's badminton tournament at Cranbrook spent \$2000 during their stay.

The liquor vendor at Yahk did \$17,758 of business last year. The turnover at Invermere was \$16,188, and at Kimberley \$56787.

Deer are unusually numerous in Kaslo and vicinity this winter. Three of them are making headquarters in the town park on the lake shore.

If water was available and there was a demand, the Herald claims the Penticton soft fruit area could be readily increased by 1000 acres.

The new cold storage plant at Summerland will cost \$50,000. \$20,000 will be spent on the building, and \$12,000 on refrigerating equipment.

If they can be assured of \$12.50 a ton growers at Oliver will supply all the tomatoes required to keep the cannery at that point busy this season.

GOAT RIVER CANYON DEVELOPMENT

By JESSIE SPRATT

Awarded SECOND PRIZE for best essay on "West Kootenay Power & Light Company, Limited, Development" by pupils in Grade 8, Creston Public School, at the recent School Fair.

For many years Creston Valley has been supplied with electrical power from two small Diesel engines. As the village began to grow and more people settled, the outlying districts wanted the electric light, and due to this reason the West Kootenay Power & Light Company decided to build a dam and power plant which would be able to supply the whole of Creston valley.

This plant is situated at Goat River canyon, four miles east of Creston. The work on the dam began in November, 1932. The cement was brought from Bonnington. 14,000 sacks were used for its construction. A crew of 100 men were at work on it and it was completed at the end of November, 1933.

The dam is built with reinforced steel. It is 70 feet high and 130 feet long; 12-foot base, and

four feet across the top. It is also provided with one five-foot sluice gate at the bottom which, at the present time, is open.

There are two turbines, one being able to develop 250 horse power, and the other 800 horse power. The water comes in at the back and goes out at each side into the river below. An air compressor is operated during the cold weather. This prevents the water from freezing. A governor has control over all the machinery, which is automatic.

At the present time 100 horse power is used, but when in full operation, and during the normal flow, 2400 horse power is obtained. On April 26th, when the water was at its highest level, 32800 horse power could have been developed with adequate machinery.

After the power leaves the powerhouse it goes by underground cable to the step-up transformer station, where the voltage is increased from 2200 volts to 6600 volts. From there it is distributed over the different areas. Creston has its own step-down

transformer station where the voltage is decreased from 6600 volts to 2200 volts. The areas receiving power are Creston, Erickson, Wynndel and Canyon. This has been a great development they already have 12-inch pipes where water is received and will be used for future irrigation.

CHRIST CHURCH

Perfect attendance—Rodger Archambault, Dolores Biccum, Mary Biccum, Dorothy Boffey, Dorothy Dickinson, Gordon French, Raymond Gariepy, Betty Gilchrist, Alvin Hendren, Lloyd Ibbittson, Jennie Kinkade, Alvin Leavitt, Gertie Lewis, Lyle Mawson, Allen Merrit, Irene Moore, Violet Pagens, Bobby Patrick, Bobby Rentz, Victor Rota, Sylvester Schmidt, John Swan, Robert Swan, David Timmons, Mary Timmons, Helen Armstrong, Clayton De rey.

Alice Siding

Dick Smith is getting ready for spring operations. He just purchased another work horse.

Principal Page has the school working on the summer time table, opening at 9 a.m., starting Friday last.

Frank Martin has just completed work on the new barn he is building on his ranch, back of the Hester place.

W. A. Pease, who has been a hospital patient at Cranbrook the past two weeks, arrived home on Thursday and is greatly improved.

Although the nights are frost there is real spring feel to the weather and at points along the road the grass is showing quite green.

Mr. and Mrs. Jones and family, who have been living in the Pease (Beazer) house at the corner, have moved into the house on the Bates ranch.

W. Armstrong left yesterday morning on a business visit to his ranch at Central Butte, Sask. He will probably bring back a carload of work horses.

Wynndel

School started on the summer schedule on Friday, and is now opening at 9 a.m.

Mr. and Mrs. Birch were weekend visitors at Cranbrook, making the trip by auto.

The March meeting of the Woman's Auxiliary will be at Mrs. Towson's Wednesday, 13th, at 2.30 p.m.

March came in like a lamb on Friday. According to tradition bad weather may be looked for before the month is out.

Thaws by day and frost by night puts the road in poor shape for travel. Sunday night's snow did not help any, either.

Lester Martell, who has been a patient at Cranbrook hospital for the past two weeks, returned home on Friday, much improved in health.

G. W. Taylor was a weekend visitor at Cranbrook to visit Mrs. Taylor, who is a hospital patient there. It is good news to hear Mrs. Taylor is recovering nicely.

Mr. and Mrs. Dawson of Spokane were visitors last week with the latter's mother, Mrs. E. Williams. They were on their way to Alberta, where they will make their home.

Following play on Sunday night members of Wynndel badminton club enjoyed a supper provided by those playing on the secretary's side which lost out by one point in the playoff with the president's talent on Friday night.

Due to the poor shape the roads are in Wynndel team has withdrawn from the Creston basketball league and will not have a hand in the playoffs. The boys made a great showing for a first year team, finishing in third place.

West Kootenay Power & Light Company, Limited, employees have been busy erecting transformers at the pre-cooler in preparation for the installation of electrical equipment, some of which has arrived, to supplement the present cooling facilities.

Os. and Cam. Payette, Andy and Alvin Hagen, Joe and Buster Martell, and Ken. Packman made up the intermedate team that played in the return East Kootenay league basketball game at Kimberley on Saturday night, which resulted in a tie score, 27-27.

About fifteen members of Wynndel badminton club were at Creston on Monday night for a series of games with the shuttle experts at the metropolis. Those making the trip were Misses Florence Wood, Betty Hulme and Ethel Towson and Messrs. Edward and Jim Hulme, A. E. Towson, A. L. Birch, L. G. and D. Benedetti, Clarence Wilson, Whitfield Abbott, Allan Cooper, Murray Hackett and D. Taylor.

New Stomach Treatment Gets Quick Results

It takes only about 3 minutes for Bisma-Rex, the new, delicious-tasting antacid powder, to bring you relief from stomach agonies. And its relief is lasting, too! Thousands are finding a new freedom from the slavery of indigestion and other stomach troubles. Creston Drug and Book Store, your Rexall Store. Get a jar from them today!

On the sunny south sides of gardens at Bonners Ferry buttercups were in bloom last week.

Surplus elk in the Yellowstone Park are being slaughtered and some of the carcasses have been shipped to Bonners Ferry to feed the Indians in the mission there.

Local and Personal

Creston village council has its March session on Monday night.

WANTED—Tenders for clearing three acres of land. Enquire Review Office.

C. O. Rodgers is a business visitor at Nelson this week, leaving on Thursday.

FOR SALE—1929 Chevrolet Six coach, excellent condition. R. B. Robinson, Creston.

The weather continues quite cold at nights but with considerable bright sunshine most every day.

250 pupils were enrolled at Creston public school in February. Miss Hobden had 49 in Division 5.

Lent started on Wednesday, Easter will be on April 21st—just about three weeks later than last year.

WANTED—Baby buggy in good condition, large wheels. Write Mrs. John Wood, General Delivery, Creston.

At March 1st the official estimate was that not more than 500 boxes of the 1934 apple crop remains unsold in the valley.

An early spring is predicted. Horse-shoe pitching has been resumed on the Roadside Club crease on Wilson Avenue.

At the quarterly service at the Presbyterian Church on Sunday morning, six members were added to the membership roll.

Arthur Mark, who has been a guest of Mr. and Mrs. A. S. Dickinson for the past few weeks, has just left for Vancouver.

The World's Day of Prayer is being observed at a service at the Presbyterian Church this (Friday) afternoon at 8 o'clock.

To-Night's social attraction is the bridge under Pythian Sisters auspices at the K.P. Hall at 8.15 p.m. The admission is 35 cents.

The vote of \$30,000 for Creston's new postoffice building was passed at Ottawa on Thursday last, and the money is now available for that work.

The Union meat market, which has been operating for the past three months in the former F. H. Jackson store on Wilson Avenue, has discontinued business.

The playoffs in the basketball league get under way tonight. Creston Review meets Creston Motors at 8 o'clock, and Imperial Groceries takes on Loallo at nine.

FOR SALE (time payment)—Kroehler davenport, dining table, buffet rocker, heater, bed, complete; china tea set, sealers, fruit and dishes. F. E. Clark, Erickson.

A meeting of all organizations interested is called for Friday night 15th, at the town hall, to arrange for the celebration on May 6th of the twenty-fifth anniversary of King George's coronation.

Creston intermediate basketball team got an even break in the return game with Kimberley in that town Saturday night. The score was 27-27. In the game here the week previous Kimberley won 18-6.

Fire blight is reported unusually bad in the Erickson-Alice Siding district and the department at Victoria has instructed C. B. Twigg, district agriculturist, to see that orchardists make a thorough job of getting rid of it this month.

There was a very large turnout for the hospital sweepstakes dance at Park pavilion on Friday night, with excellent music by the Serenaders orchestra. Due to the attorney general issuing instructions that the draw was illegal the draw for the \$750 cash prize had to be postponed.

Due to a rather slim turnout for the annual meeting of Creston Valley Liberal Association on Monday night the election of officers was deferred to a later date. Delegates, however, were named to attend the East Kootenay nominating convention, which is likely to be called this month.

The Brighter Side

For the past five years the people of Canada in common with those of other countries have been looking at the dark side of things, and during these years the picture at which they have been looking has become progressively darker and more gloomy. In fact, following the stock market crash in the late months of 1929, people generally did not seek to find any rays of light, they became more and more fearful, and preferred to dwell upon every unfavorable factor in the situation and to close their eyes and refuse to see anything that could be regarded as hopeful.

This state of mind spread throughout the whole country and, unfortunately for Western Canada, it was accentuated by reason of the advent of a cycle of abnormally dry years, accompanied by other climatic conditions, with their aftermath of pests and other drawbacks entirely beyond the control of man, and all discouraging and destructive of confidence on the part of people so grievously afflicted.

Under the circumstances the amazing thing is that people, taken on the whole, have displayed such wonderful fortitude, so much courage and such fine patience.

Within recent months the clouds of depression have been thinning, conditions have been slowly improving, and the time has come when, we think, the people of Canada may well, to their own advantage and further encouragement, take a look at some of the brighter things in our national life for which they have deep reason for thankfulness in comparison with the lot of other peoples and nations.

Unlike quite a few nations, Canada has maintained its national honor, has not repudiated but has met its national obligations. As a result, Canada stands higher than ever in the estimation of the world. It is a great asset that has not decreased in value but has been substantially increased, and that increased value will stand this Dominion in good stead in the years that lie ahead.

The general business situation in Canada is improving. In view of the economic depths to which the whole world had sunk, this improvement will naturally be slow at first, but it is gathering momentum and volume. The trade of Canada, both import and export, and internal as well, is increasing; the volume of business is becoming larger; railway revenues are rising; national revenues are substantially larger and are increasing, all of which means more employment in the not distant future, and especially so if action is taken to remove or materially lessen the many restrictions now imposed on trade.

Another bright side to the Canadian picture is to be found in the fact that, despite all the difficulties and problems, worries and sufferings of people, Canada has been remarkably free of riots and other forms of defiance of the law which have characterized other lands and resulted in open strife and bloodshed. The Canadian people have kept their heads, and as a result they are winning through, just as the people of Britain are winning through.

Considering the past, the present and the future, there is another and very large and important spot of brightness, leading to hope and confidence for the future, in the fact that almost alone among the nations of the world Canada has been free and is free of the one great burden which rests with crushing force upon the world to-day. That is the burden of armaments,—the enormous cost of warlike preparations. While other nations are paying annual tribute reckoned in hundreds of millions, even billions of dollars, to the great war god Mars, the Canadian people are not called upon to do so.

A couple of small destroyers, one on either seacoast, and a handful of militia which is merely a reserve to the established police forces of the country to assist if and when necessary in the maintenance of peace within our own borders, but in no sense an army maintained for offense against any nation,—that is all. With no great battleships, no standing army, no great line of fortifications, Canada lives at peace with the world, the friend of every nation, having no quarrel with any.

If this picture was otherwise, if the Canadian people were taxed to the limit, as other peoples are, to provide the god of war with the machinery and equipment of wholesale human destruction, then Canada might have cause to fear for the future. Fortunately, that fear does not exist.

Given a return to more normal and therefore favorable climatic conditions throughout Western Canada, with a removal of the artificial restrictions imposed upon the commercial transactions and business life of the country,—both of which conditions are not only possible but probable and ones we have every reason to expect,—and free from the entanglements of war-affrighted nations, the Canadian people without any undue optimism may well turn their eyes away from the darker picture of the past five years, and find renewed confidence and happiness in the brighter, better days now dawning.

Magic Of Science

Electric Lung Restores Speech To Persons Without Voice

An electric "lung" and a pair of magnetic handcuffs, both new, have come out of the scientific magic box of the Bell laboratories.

They were shown at a meeting of the University of Michigan Club of New York by Dr. Sergius P. Grace, vice-president of the laboratories.

The lung substitutes electric current for air to make vocal sounds in the artificial larynx, which the laboratories invented to restore speech to about 1,000 persons in the United States who have lost their vocal cords.

The new instrument is placed in the mouth, much like a pipe. It pours into the mouth a pure tone which becomes intelligible speech merely by movement of mouth, lips and tongue in ordinary conversational manner. The voiceless person uses a pocket battery little bigger than a deck of cards. He puts his "pipe" in his mouth. He presses a button and the sound continues as long as he holds this switch closed.

The magnetic handcuffs demonstrate the super-magnetic power of a new alloy which possesses 20 times the attraction of pure iron. With a cuff on each wrist, or held on each hand, the chain between is joined by placing together two flat pieces of the new metal.

The most powerful man cannot pull these plates apart.

WHY HIS HEADACHES CEASED

Wife Put Kruschen In His Coffee

He could not understand why the headaches he had been subject to suddenly ceased. His wife told him, and he at once sat down and wrote the following letter:—

"I am 62 years of age, and ever since I was a boy of ten years, I was subject to very bad headaches. But two years ago the headaches stopped—for what reason I did not know. I was surprised when one day my wife told me I had been using Kruschen Salts in my coffee for over two years. I am still using them, as I know of nothing finer for the system."—J. T.

Headaches can nearly always be traced to a disordered stomach, and to the unsuspected retention in the system of stagnating waste material which poisons the blood. Remove these poisons—prevent them forming again—and you'll never have to worry any more. And that is just how Kruschen Salts brings swift and lasting relief from headaches. Kruschen Salts aid Nature to cleanse your body completely of all clogging waste matter.

Rather Hard Luck

Seventy-year-old Thomas Dresser has instituted proceedings to bring himself back to life. When he walked with his frayed bank book into a Victoria bank the other day he was surprised to find that he could not draw on his account for the reason that he was "dead." He had been declared dead by the Supreme Court of British Columbia and his estate had been ordered to be divided among his relatives.

BUILD UP THE BLOOD

Mr. G. W. Vollick of 14 Poullette St., Hamilton, Ont., said: "I have found Dr. Pierce's Golden Medical Discovery to be the best tonic to build up a weak and rundown system. It also regulated my digestion, increased my appetite and strength." Large size, tablets or liquid, \$1.35. Write to Dr. Pierce's Clinic, Buffalo, N. Y., for free medical advice.

Wants Tariff On Ice Cream

The Bermuda Board of Agriculture has recommended protective duties on ice cream and the raw materials thereof. The assembly referred the matter to its finance committee for investigation. The local dairy industry suffered, it was pointed out, because during 1933 there were 512 gallons of milk and cream imported from Canada, and 22,667 gallons from the United States.

The lobster chews its food before putting it into its mouth; a set of external food choppers cuts up the food before it is passed into the mouth proper. 2088.

Little Journeys In Science

ACETYLENE

(By Gordon H. Guest, M.A.)

Acetylene is a colorless gas produced by the action of water on carbide. It is prepared in large quantities for use as an illuminant and as a source of great heat. When heated it decomposes into hydrogen and carbon. It was by this method that the Germans prepared much of the hydrogen used for filling the Zeppelins in the World War.

When compressed in cylinders, acetylene is very explosive, since the heat produced in compressing the gas is sufficient to start decomposition. However, scientists have found that acetylene can be compressed with safety by forcing it at low temperatures into steel cylinders completely filled with some porous material which has been soaked in a liquid called acetone. The gas is very soluble in this liquid and under such conditions it is not explosive.

The chief use of acetylene is in the cutting and welding of metals. For this work the gas is burned in pure oxygen in an apparatus known as the oxyacetylene blowpipe. A temperature of about 4,800 degrees Fahrenheit may be obtained in this way. In taking iron structures apart the tip of the flame is held in contact with some part of the metal, until the metal is heated to a high temperature; then more oxygen is turned on and the hot metal at once commences to burn away. By moving the tip of the flame containing the excess of oxygen over the metal plate, the metal is cut into pieces.

Recently Langmuir, an American scientist, has invented a device known as the hydrogen-arc welding torch by means of which very high temperatures can be obtained. In this type of blowpipe a stream of hydrogen is conducted from a small tube through an electric arc maintained between tungsten electrodes. A temperature of at least 10,000 degrees Fahrenheit may be reached with this new torch.

GARDENING

Gordon L. Smith

Planting Nursery Stock

The proper time to plant perennials, roses, fruit trees, shrubbery and other kinds of nursery stock is just as soon as the ground can be worked. But of course they must be purchased first. There is a vast range in prices and quality. Only shrubs and trees that are in good condition should be considered. This means that the stems and bark will be pliable and green and will have plenty of good, live buds. There will be a good root growth, and this, as well as the top, will be soft and moist. Each plant should be wrapped separately. Granted that good stock has been purchased, the next thing is to get it planted as quickly as possible and with absolutely no exposure to the open air. If the ground is still unfit to plant, open the parcel, soak in water, and plant in a shallow trench, covering the roots and most of the stems with earth firmly packed down. Leave here until permanent locations are ready.

Spring Pruning

Most pruning is done in late winter or early spring. It is not a difficult task, though a little is usually essential with all sorts of shrubs, roses and both fruit and ornamental trees. Dead growth should be removed, though at this time of year it may be difficult to detect dying from live wood. The general idea is to let in light, encourage strong growth and also turn out a tree or shrub which is fairly symmetrical. With shrubbery, pruning of those things that bloom late in the year, should be done early in the spring, but shrubs, like the Spirea, which blossom in early summer, should not be touched with the knife until late summer. Special precautions are necessary with grape vines. If these are pruned in late spring, they will bleed profusely. The work must be carried out before the sap starts to rise. Commercial grape men leave a mere skeleton each spring as the fruit is produced on new growth. Raspberries are borne on two-year-old canes only, so that after the crop has been harvested and the new canes well started, all old wood should be removed. Most of the ordinary roses are cut back severely after growth starts in the spring, and best results are obtained from climbing roses where almost all the old wood is removed in late summer after blooming is over. With flowering shrubs, the aim is to keep new vigorous growth coming on by the removal of weak three and four-year-old wood. Young fruit trees need little pruning beyond shaping slightly, but after they have started to bear fruit, considerable growth should be removed each spring, so that the light and air are distributed evenly through the whole tree.

England is one of the greatest horse racing nations in the world with tracks all over the country.

Rolling down to Ogden's

to make the fragrant, friendly cigarette tobacco that gives a man real satisfaction in "rolling his own". Only the best leaves can pass the Ogden's test for mildness and smoothness and easy rolling. That's why Ogden's Fine Cut is such a favourite. Roll your own with Ogden's and you'll find it rolls them easier and rolls them better,—especially when you choose the finest cigarette papers, "Chantecleer" or "Vogue".

SAVE THE POKER HANDS

OGDEN'S FINE CUT

Your Pipe Knows Ogden's Cut Plug

It was stated in London the British Poppy Day realized £11,000 more than in 1933, when the total was £511,853, the record collection being £524,650 in 1930.

In six years Moscow has had 1,630,000 people added to its population total.

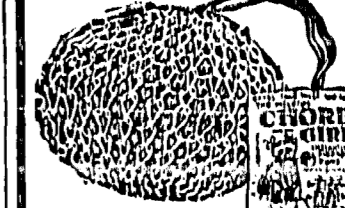

DR. WERNET'S POWDER FOR HOLDING TIGHT FALSE TEETH

No slipping or sliding—no clicking when you use this grand powder that most dentists prescribe. It's a joy to all users and is the largest seller in the world—leaves no colored, gummy taste— all drug stores.

CHORE GIRL Cleans Pots and Pans

A safe and efficient sponge made of pure copper ribbon which will not rust or splinter.

MAKES VIGOROUS DEFENCE AGAINST HIS MANY CRITICS

Doncaster, Yorkshire, Eng.—Prime Minister Ramsay MacDonald said here he will resign whenever he feels he can no longer "pull my full weight in the boat."

Defending himself and his National government against its critics, the prime minister said:

"So far as I'm concerned, I hold the position I do at the wish of my colleagues."

"When the moment comes they find my services too dearly bought, or when . . . I myself for one reason or another—and unfortunately there are many—am no longer satisfied that I can pull my full weight in the boat, I shall require nobody's advice to make up my mind what my duty is."

Mr. MacDonald disclosed the government is actively after financial speculators whose scandals, he said, "are besmirching the financial probity of this country and damaging our credit in the eyes of the world."

(The government's opponents in parliament have demanded an investigation of the recent crash of an attempted pool in pepper, which forced three firms to the wall.)

Replying to charges the government has been shielding speculators, Mr. MacDonald said there was no truth in such statements. The government is not shielding anyone, he asserted, "but the government is not going into a panic."

The prime minister also denied former prime minister David Lloyd George's charges that the government had turned down his "new deal."

"Mr. Lloyd George said 'I am going to produce from time to time the plans themselves—actual plans,'" Mr. MacDonald said. "I'm still waiting. Until I see the plan I can neither accept it nor reject it. I certainly have not rejected it yet."

He asserted that the cabinet was willing to look at any plan any man has which offers solution of the unemployment problem.

Relief Standards Urged

Plan Made Public By Canadian Council On Welfare

Ottawa.—Establishment of a federal advisory committee on unemployment relief which would set up standards and principles of administration to which provinces would be bound was recommended in a national relief plan made public by the Canadian Council on Child and Family Welfare.

Provinces failing to observe the standards laid down by such a committee would be refused financial assistance from the federal authority. The outline presented by the council described the situation as urgent in view of the fact present agreements expire at the end of March while there were, the statement declared, 1,350,000 persons receiving unemployment relief.

Protest By Ethiopia

Desire A Peaceful Settlement Of Border Dispute

Rome.—Foreign office officials began drafting a response to the protest by Ethiopia against the continued sending of troops and munitions to Italian Somaliland.

The Ethiopian charge d'affaires, Negrades Yesus, delivered the protest—a note to the Italian government from Emperor Haile Selassie—that "Italy could retire its last soldier and its last cannon from Italian Somaliland and Eritrea, and Ethiopia would not touch a single stone in these two colonies."

The African emperor's statement also reiterated his desires for a peaceful settlement of the border dispute.

Jurisdiction Ended

Saarbruecken.—League of Nations jurisdiction over the Saar territory ended at 11:30 a.m. Feb. 28, it was announced. Geoffrey G. Knox, president of the governing commission, turned police authority over to Reich representatives.

Imperial Press Conference

Vote Of Thanks Given To Major Astor Of London Times

Johannesburg.—The fifth Imperial press conference concluded its sittings locally with a vote of thanks to Major J. J. Astor, chairman of the Times Publishing Company, of London, who acted as chairman. The vote was passed with all delegates standing and applauding Major Astor for two minutes.

It was stated deliberations were eminently successful. Agreement has been reached on formation of a London committee to co-ordinate the work of the Empire Press Union and to look for lower press cable and wireless rates.

The conference referred to the Empire Press Union for inclusion on the agenda of next year's meeting of the new annual committee in London, a resolution for lower postage rates on British newspapers and periodicals mailed to the Dominions and colonies.

Court Martial Conviction

Captain Of Cruiser Renown Is Tried On Charge Of Negligence

Portsmouth, England.—Capt. H. R. Sawbridge, of the battle cruiser, Renown, was convicted by court martial on a charge of negligence following collision of the Renown with the Hood.

The charge, that he caused to be "hazarded" the two giant war vessels during manoeuvres off the Spanish coast in January, was similar to that on which Rear-Admiral Sidney Bailey, commander of the battle cruiser squadron, was acquitted. A third court martial is yet to be held, the trial of Capt. F. T. B. Tower, of the Hood, on which the rear-admiral's flag flew.

The court ruled that he be dismissed from his ship. The deputy judge advocate announced that the charge had been proved.

Show Big Increase

Savings Deposits \$5,000,000 More Than In January 1934

Ottawa.—A decrease of \$12,000,000 in bank note circulation at the end of January compared with December and a drop of \$5,000,000 in central gold reserve deposits were shown in the monthly report of chartered banks to the department of finance as on Jan. 31, 1935.

Demand deposits were down \$45,000,000 from December but \$50,000,000 greater than on the same date last year. Savings deposits increased \$5,000,000 in the month and \$62,000,000 in the year. Call loans in Canada were down \$10,000,000 compared with the previous month while current loans were down \$18,000,000 from December and \$50,000,000 compared with Jan. 31, 1934.

Lepers Killed By Chinese

Brutal Massacre By Villagers To Stamp Out Disease

Hong Kong, China.—The inhabitants of the fishing village of Wai-chow, which is on an island in the delta of the Pearl river, have risen en masse and freed their little island of lepers by carrying out a brutal massacre of the 24 sufferers from the disease who lived nearby.

The lepers did not mingle with the other people on the island, but lived in a small settlement of their own. After the massacre, the leper settlement was burned to the ground.

Will Need Canada's Wheat

Toronto.—Britain will continue to need Canadian wheat, notwithstanding recent extensive development of agriculture over there, Sir Francis Ploud, high commissioner for His Majesty's government in the United Kingdom, told members of the Women's Canadian Club here.

Ask Free Text Books

Winnipeg.—The annual convention of the Manitoba School Trustees' Association asked the Manitoba government to provide text books free in grades one to six inclusive. Education until the sixth grade was compulsory and text books should be provided, said the resolution adopted by the convention. 2088.

SURGICAL TRIUMPH

Dr. Claude S. Beck, above, performed one of the first operations on record for the relief of angina pectoris, a heart ailment which hitherto has been considered incurable. The operation was performed at Lakeside Hospital, Cleveland.

Receive Recognition

Three Medals Are Awarded By Royal Society Of Canada

Ottawa.—Secretary Lawrence J. Burpee of the Royal Society of Canada, announced award of three of the society's medals to a Montrealeur and two Ottawans. The awards are made annually.

Dr. Edward Montpetit of Montreal University, prominent French-language Canadian writer, was awarded the Lorne Pierce medal for literature. Dr. F. T. Shutt, former chemist at the Dominion experimental farm here, was awarded the Sir Joseph Flavelle medal for outstanding achievement in science. Brig.-Gen. E. A. Cruickshank, widely known student of the war of 1812, was awarded the Tyrrell medal for history.

Hughes War Resolution

After Warm Discussion Was Withdrawn In The Senate

Ottawa.—Warm discussion of the Hughes war resolution was followed by its withdrawal in the senate by its sponsor.

The resolution proposed, if Canada ever again entered war, she would wage it "with every ounce of her strength in man and material power," and that declaration of war should be followed immediately "by mobilization and conscription of all human power and all the material wealth of the nation."

These two members of Toronto Chinese Boy Scout Troop were among the 3,000 Scouts taking part in their annual old clothing collection in that city, when 180,000 articles of clothing and thousands of pairs of shoes were gathered for distribution to the needy.

Disastrous Fire In Moscow

Explosion In Pencil Factory Kills Twenty-Nine Persons

Moscow.—Twenty-nine persons were killed in an explosion and fire which destroyed the Krassin pencil factory on the outskirts of Moscow.

The loss of life in the disaster was not disclosed for three days, and after the bodies of the victims were cremated.

The fire started shortly before midnight. All of Moscow's fire apparatus called out to combat the flames battled three hours before they brought the fire under control.

It was announced the factory and warehouse were a complete loss. Part of the workers thrown out of work by the fire had been sent on vacation. Others were absorbed by the Sacco-Vanzetti pencil factory, also in Moscow.

The explosion occurred in a high pressure compressor from causes not immediately determined. The blast sent a compressed air tank weighing one and one-half tons hurtling through two floors of the building and the roof. It crashed into the adjoining warehouse.

To Repulse Air Attacks

Britain Would Utilize Recent Scientific Inventions

London.—Sir Philip Sassoon, under-secretary for air, announced in the House of Commons a decision to appoint a special committee to investigate the possibilities of countering air attacks by utilizing recent scientific inventions.

He said the decision was reached some months ago and that the committee was composed of Henry Tizard, rector of the Imperial College of Science and Technology, as chairman, Professor A. V. Hill of the Royal Society and P. M. S. Blackett, professor of physics at the University of London.

The committee's report will be presented to the imperial defence committee.

Fear Drouth Will Continue

Western States Still Dry Is Weather Bureau Report

Washington.—Continuance of dry soil conditions over a large area in the western great plains, foreshadowing a possible return of drouth conditions in part of the area devastated last summer, was reported by the United States weather bureau in its weekly weather and crop bulletin.

Severe dust storms were experienced in the western portions of Oklahoma, Kansas, Nebraska and parts of eastern Colorado and eastern Wyoming.

Weather bureau officials said dust storms were occurring much earlier than usual.

SIR JOHN SIMON MAY VISIT RUSSIA TO TALK PEACE

London.—The cabinet at its weekly meeting was understood to have tentatively approved the sending of two of its internationalists to distant European capitals to further the plans for consolidating peace.

While no official statement was forthcoming after the cabinet's session, well-informed political circles said the government had approved plans for Sir John Simon, foreign secretary, and Capt. Anthony Eden, lord privy seal, to go to Moscow, Warsaw and Praha after they visited Berlin.

Government quarters admitted an informal invitation from Moscow had been well received, and it was expected an official announcement shortly would confirm the report direct contact with Soviet leaders would take place.

Impelling the government to that action was its determination to leave no stone unturned in an effort to bring about an inclusive European settlement which would end tension on all frontiers.

Lack Of Fodder

Minnesota Man Brings Emaciated Animals To State Legislature As Exhibits

St. Paul.—Outside Minnesota's state legislature recently stood three emaciated animals—a horse, a cow and a pig—quietly munching feed their western Minnesota owner said he had been unable to give them at home because of inadequate relief following last summer's burning drouth.

Inside the statehouse, the senate, although one of their number specifically denied the "exhibit" had influenced the action, promptly passed a measure to appropriate \$500,000 to be administered by the state executive council for livestock feed in western Minnesota drouth areas.

The livestock was the property of Arthur Spencer, western Minnesota farmer, who engineered the one man "bony march."

Reform Measures

Economic Advisory Council To Be Set Up

Ottawa.—Legislation to set up an economic advisory council as forecast in the speech from the throne is expected to be the next reform measure Prime Minister R. B. Bennett will introduce in parliament, it was learned here. The bill was practically ready, it was stated, but decision upon the three or more who will make up the personnel of the council had not been reached.

The board will act in the same capacity on matters dealing with economic progress of the Dominion as the national research council acts for scientific problems.

Tourist Traffic Better

Ottawa.—Foreign automobile tourist traffic entering Canada during the past calendar year increased at most points, totalling 3,261,848 automobiles as against 3,093,887 automobiles entered in 1933, a gain of 164,961, according to a statement issued by Hon. R. C. Matthews, minister of national revenue.

East Tremors

Toronto.—Eastend residents here thought of earthquakes when houses shook and dishes rattled. Similar shocks occurred a few weeks ago during cold spells. It was explained the ground was not settled in this district because of various waterworks operations and heavy frosts caused the earth tremors.

Sees Soviet Link

Washington.—Charges of a link between Soviet Russia and the Communist party in the United States were made in the house of representatives as its foreign affairs committee disregarded state department wishes and set a hearing March 18, on the Tinkham resolution for withdrawal of Russian recognition.

A number of the operators on the north end of the Reclamation Farm in 1931 and 1932, were Creston visitors during the week. In the party were L. Bishop of Pullman, Wash.; J. Holben, Genesee, Idaho; H. Stark, Pendleton, Ore., and E. C. Rogers and son, Dudley, of Athena, Oregon. They were well pleased with the headway that is being made with the new dyke along the north end.

Wynndel badminton talent made its first appearance at Creston at a series of games at Park pavilion on Monday night. Wynndel club was only organized late in December and the 15 members who made the trip gave a good account of themselves. There was the usual lunch after play at which the hostesses were,

Mrs. F. V. Staples, Mrs. Levira, Mrs. B. reau, Misses M. Smith, L. Trevelyan, Jean McCreath, and T. H. Wilson and Ted Moore.

There was a good turnout for the March meeting of Creston Valley Post Canadian Legion on Tuesday night, with the president, John Bird, in charge of proceedings. Correspondence was light the chief item having to do with Viny observation in 1936. The balance sheet was submitted and adopted. It showed receipts had been well maintained and that in spite of increased calls on Legion funds, the balance at the close of the year is most gratifying. The Legion is taking the initiative in seeing to it that King George's 25th coronation anniversary is fittingly observed. The Legion is asking all the community organizations to attend a conference to arrange for this notable event, the get together to be on March 15th, at 8 p. m., at the town hall, Creston. Legion representatives at this meeting will be President Bird, W. V. Jackson, W. G. Hendy and J. B. Holder.

We will gladly explain their many exclusive features, their outstanding qualities, and the guarantee of satisfactory performance that goes with each regardless of price. General Electric workmanship insures you of quality merchandise, accurate performance, and long life.

TOASTOVER TOASTER

DeLUXE IRON

This popular Hotpoint model toasts two large slices at the same time, right at the table. Finished in highly polished nickel plate, this toaster will retain its gleaming beauty for years. It is the choice of those who want beauty combined with utility.

This six pound model is Hotpoint's finest iron. The "button hook" is one of the greatest convenience features. The exclusive Hotpoint thumb rest saves arm and wrist strain, and the heel stand makes lifting unnecessary. A hinged plug prevents frayed cords and broken connections.
