This paper will not hold itself responsible for the opinions of othens, as may appear in its columns from time to time.

The control of the co TUESDAY, APL. 7, 1909,

Mr. A. Knechtel, Inspector of Dominion Forest Reserve, has written an account of these reser ves, which has been published as Bulletin No. 3 of the Forestry Bra seh of the Department of the luterior.

In regard to the purpose of the forest reserves, Mr. Knechtel writes: "The Dominion Forest Reserves are intended to preserve and produce a perpetual supply of timber for the people of the prairie the homesteaders' needs being con sidered of first importance. They are not intended to furnish wood for the lumber trade. Hence the policy of the Department is favor able to small mills rather than to large ones which need large tracts of forest and manufacture lumber beyond the needs of the settlers."

Mr. Knechtel then gives in de tail the area of the different reserves, with the dates of their formation. The areas are summarized_as_follows:__

Manitoba, 6 reserves. . . . 35751 sq. mls Sanka chewan, 4 reserves, 740 sq. mla Alberta, 6 reserves g mis B. C., 10 reserves, 2203 sq mls Grazing will be allowed, under certain restrictions, of those portions of the reserves that are adapted for this purpose. Good grass should not be allowed to go to waste, the Inspector thinks, besides, grazing may even be desirable on portions of the reserves as the cattle will consume the grass and peavine, which, if dried, would be very inflammable. Besides the cattle, in going to water, make paths which, narrow as they are, serve to check any fire which may come along that way and give lines from which a back fire may be

started.

The fire problem in the West Mr. Encentel shows shows to be one of special difficulty, much more so even than in the East, The number of rainy days and the amount of rainfall is shown, by to dea supplied by the Western Jures a to be much loss in Alberta backateliowan and Manitolia than in Outario, The velocity of the wind, moreover, is about twice as great in Winnipog as in Toronto. The reserves are under constant patrol summer and winter. Only two fires of any consequence occured in 1908. Of last one in "The Pines" reserve burned over 22 square mile, but destroyed no merchan able timber; the other, In the Tuette Mountain Reserve, burned over 28 square miles, most ly covered with grass. Both fires, however, damaged large quantities of young growth. Various matheds amyioned to prevent fire. such as the language of fire lines and the plan dring of the grands the monttoned, funds privage the reasons and along the remains arres or blood by constructed, largely with this end in view. One road were made last year, Experiments are being made with a view to reforesting areas on the reserves that have been danaded

A number of equations were re-Tartle Mountain R serve.

are pleased with the change,

Issued Every Tuesday by the are being marked and timber sur- standard rate of roc. a line. veys conducted on them with the object of ascertaining the present amount of timber and the annual General repairing,

The species of timber growing ves. The estimates total as folday.

For the Manitoba reserves, 602, 933.000 bd, ft of saw timber and 6,250,000 cords of fuel wood;

For the Saskatchewan reserves, 55,000,000 bd. ft. of saw-timber and 690,000 cords of fuel wood; For the Alberta reserves, 8,402, 000,000 bd. ft. of saw tim er and 54,220,000 cords of fuel wood;

For the British Columbia reserves, 600,000,000 bd, ft of saw. timber and 6.000,000 cords of fuel

The saw-timber cut from the reserves during the year ending 31st. March, 1908, totalled about 45,751,325 board feet and the cordwood 105,943 cords.

The regulations for homesteader's permits for cutting on the reserves are given in full, Proposed regulations for portable mills (the only kind to be allowed on the reserve) are also given. Similar regulations have already been imposed | months; - also Carman Seed Potaon one mill in the Cypress Hills, Alta reserve this winter and have Harrigan, Minto.

apparently been a success. The use of the reserves as pleasure resorts is also noted.

The Bulletin is illustrated with number of good cuts.

It may be obtained by addressing R. H. Campbell, Superintendent of Forestry, Ottawa, Out.

News Paragraph As will be seen in our advertisment columns the Plimley Automobile Co. of Victoria, are offering to the public the greatest anny in automobiles that has been known in the history of the pastime on this Island. It is not a worm out, second hand, obselete class of car they are offering, out a swell little machine of well-tried staving power and durability. The liover Company long ago made a great name with their 8 h. p. enoabout, and wherever more call hiero been fined they have not ovalfound wanting. Here on the istand one of these same cars was driven tundred and sitty miles of such by a lady, Miss Pither, from Vietoria to Alberni in the Victoria Automobile Club's run in 1908, That journey involved the climbing of two summits, and the Roby fire; sowing is favored rather ver car tackled the job without a check and got through in capital shape. The cars now offered by moved from the reservos during the Plimley Co. are not being sac-1908, one hundred and twenty six rificed on account of any defeat in from the Riding Mountain 150- material or design. HONEST AMERICANS.

Incidents That Greatly Surprised a Visitor From Germany.

On his first visit to the United States a German manufacturer was the guest of a kinsman in New York He expressed surprise when, a few days after his arrival, he saw a number of men help themselves to papers at an unattended newsstand, where some men laid down the exact price of their purchase, others made change away without paying. He was told that the last named group were customers who paid only once a week, but that no one ever failed to pay.

To demonstrate his contention that most people are honest in this country" the Americanized German took his visitor that day to a restaurant where both were unknown, and when they had finished their luncheon the host went to the cashier's desk with his check and said he had no money with him, but would pay the next

The cashier gave the couple a hasty glance and said, "All right; I'll take a chance," and the men started for the street. At the door a right about face movement was executed, the check was paid, a good cigar was handed to the cashier, to whom the plot was revealed, and the German exclaimed "Grossartig!" (magnificent).

A CINGALESE DAINTY.

Ceylon White Ants and Their Numerous Natural Enemies.

It is estimated that two-thirds of the island of Ceylon is undermined by white ants. The number of these insects is certainly quite incalculable, but it is fortunate that their natural enemies are almost as numerous.

The workers are preyed upon by true ants and many other insects; by spiders, lizards and centipeds; by rats, mice and palm squirrels. But it is the adult winged insects that are especially victimized. It is probable that scarcely 1 per cent of the mature insects survive the dangers of the po-

They run the gantlet of nearly every other animal. Birds, bats, squirrels, rats, toads and lizards all flock to the feast. Dogs and cats ent tha winged ants with avidity.

"Even man himself does not disdain to participate," says E. E. Green. "The Tamil cooly looks upon a mess of fried termites as a great dainty, and I have several European acquaintances who consider that termites on toast form a dish worthy of more general inclusion in the menu. They are said to taste not unlike mushrooms."-Agricultural Journal of Ceylon Botanic

The Warning Signals.

A Boston physician tells a story of a youngster of his own that an overstrenuous vacation had put on the sick list. The father had an appropriate prescription filled and left the bottle with the child's mother. As she, however, is very forgetful, he gave her a chart and suggested that she set down the hours when the medicine should A cure for chronic cranks in be given, checking off each dose as taken. Upon returning from his evening calls, however, he found the chart blank.

"Good gracious, Mary!" he exclaimed. "Surely you haven't falled to give

"Oh, no. I did not miss a single time," his wife assured him.

"How in the world did you remember'it without the chart?" he asked. She smiled.

"That was easy. I just told Tom this morning at what hours he was to have it, and half an hour before each time he would begin hallooing that he wouldn't take it."

The French Are Good Travelers. The French on their travels are the very reverse of the English. Imperturbably amiable, they never grumble and without the slightest effort, as a more matter of course, make the best of everything. I have made journeys with many French friends of both sexes, young, mklille aged and elderly, often in out of the way places meeting with discomforts enough. Nothing ruffice their temper. Pleased to enjoy frosh scenes with a genial commanion, they extract the utmost possible pleasure from every incident, even little annoyanees being turned to good account -- Miss Rotham-Edwards in Landon Chronicio.

What He Would Keep. When the late Francois Coppee was elected to the academy, he told his friend, Theodore do Banville, that he wished he were in too. Bunville declined to canvuss.

"Suppose your nomination were brought to you one fine morning on a silver salver."

"I don't know what I should do (with the nomination" entil Banville. "but I should cortainly keep the aniver.

Financial Advise. "Here's a man," said the old citizen, "who lost \$5,000 in a bank whar ha sut it fer safe keepin!. Bill, don't you ever take no risk like that. Ef evel you gits hold of any money, do like your father before you done-bury it an' spen' the rest of your life sittin' over it with a shotgun."

A Verbal Bracer. "My wife," said the first elubrana, "always mixes me a cocktail when I

CLEANING A CLOCK.

It Is Not Very Difficult, According to These Directions.

It is very simple to elemn a clock, which may sound rather abstird. For an amatour it is not always necessary to take the clock to places. With a little care and patience and using some bouzine, a clean white rag, a subjebrush and some oil a clock can be cleaned and put in first clars running order. The beazine should be clean and free from oil. You can test benzine by putting a little on the back of the hand. If it is good, it will dry off, leaving the hand quito clean, but it any grease remains on the hand it is not fit to use.

The oil should be of the very best: that can be procured. Vegetable oils should never be used. Clock oil can be procured from your druggist or jeweler. All loose dirt should be removed from the works by blowing with believe or n fan or dusting with a dry brush. In the latter case great cure should be exoreised not to injure any of the parts,. Din the brush in the benvine and clean the spindles and spindle boles and the tooth of the encapement wheel. After washing a part wipe the brack on " rng and ringe in the bearing. This should be repeated frequently until no muro dirt in seen.

When the clock has dried oil the apindle holes carefully. This may be done with a toothpick or a suver of weed cut to a fine point. Oil the tooth of the occupement wheel slightly, using a Quan

Mr. Fred Ray returned home on Sunday after spending a short vacation in Vancouver.

The local fans are quite busy in regard to having a better diamond this year, if arrangements can be made to have site cleared they have chosen, no doubt with the assistance of several other new men will make our other friends "go some" this season.

Mr. Jackson Arthurs is having his new house built at Fairview, Union Bay, and when completed will greatly add to Union Bay's splendid homes,

· The Yacht Daloura, with Hon James Dunsmuir and party sailed for Victoria Sunday evening.

Capt. Seward of the barge Oregon, was drowned at Henry Bay, last Friday. The Captain had been on board the yacht Daloura having dinner with the cap tain of the yacht, after which he got into his boat to return to Henry Bay where the Oregon was unchored, awaiting orders. Captain Delebay, of the barge day last by S. S. Cowiehan, Heroda, heard someone call out and when he went out to see! who was calling, alt he could see was the boat with no one in it: so he lowered a boat and searched for the missing man, but up to the present time they have not found the body, Captain Seward will be greatly missed by everyone at Union Bay, as he was well known by all shipping

Mr. W. J. Goard has arrived in the instrict and will be in Cumberland this & week. Those wanting their piano or organ tuned in a practical manner should > get Mr. Goard to do it while 🤰 he is here. Charges moder. ate. Leave orders a NEWS. ***********************

Rod and Gun.

Spring Fishing Number

The first sight of the fine cover of the excellent Spring, April Fishing Number of Rod and Gun in Canada, published by W. J. Taylor Woodstock, Ont., will stir the blood of the thousands of fishermen throughout the Dominion and start them on the congenial work of preparing for the coming fray, The long and varied nature of the contents of the number, in which fish and fishing topics predominate, will still further stimulate them, and the opening of the fishing season will probably see an increase in the anglers' ranks as one result of the interest aroused through the wide dissemination of these stories. Three articles stand out as of value to the country: -Preserving the Nation's Fish," by Cyrus McMillan, an illustrated descriptive account of the work of the Prince Edward Island hatch-

"The unsolved Mystery of the Salmon," by Bonnycastle Dale, who has spent two years on the of the salmon and, with the exception of one point, leaving the mystery still unsolved; and "Conservation of Non-Nest Building Mrs. Wm. Carter returned Fishes of the Great Lakes," by missioner for Pennsylvania, in which a plea-is-put-forward-on-chairs, bedroom suits, stores etc. behalf of a policy on which there will be great differences of opinion but which closely concerns the future of the Great Lakes fisheries. Then fishing trips in four separate provinces are told in a manner irresistibly reminding fish er men of incidents in their own experiences. A New Brunswick good, though each story has an interest all its own. A similar variety of fare will be found for those interested in other forms of sport, "A Lady Moose Hunt in New Brunswick," by Miss Emach being a good specimen. On every page of an excellent number the the sportsman will be able to find material which cannot fail to prove of the deepest possible interest of
