Ladies' White Underskirts, from 75c.
" Corset Covers, from 35c.
" White Night Gowns, from 75c.
We shall be pleased to have you inspect these Goods.

J McPhee & Sons

## Baseball.

All the Go, and the only Game Worth Playing in Cumberland. Ladies Interested.

Baseball has become the most popular game in Comox district. The enthusiasm displayed puts the Gun club, the tennis club and the football club in the cold shades of departed night. Even the ladies have "caught on" and given an exhibition of their skill while standing on the diamond.

Last Tuesday, and people are not yet through telling how they enjoyed the game. the merchants and clerks played the professionals and lost 12 to 10. The match was a good one. A challenge was given out before the game was began, by Mr. T. Haggart that he would play the winners. The professionals won and accepted the challenge, match to be played on the 18th, provided they be allowed to engage a professional battery.

On Monday evening the ladies decided to have a match on their own account. Where it was to be played was to be kept a great secret, but a woman cannot keep a secret for long, and the time and place became pretty well known by the time the match begun.

Down on the green near the Y witnessed one of the liveliest games of the season The ladies gave a most excellent exhibition of their skill and knowledge of the game. The bases were well protected, the fielding was all that could be desired, the pitchers and catchers did their duty, and had their not been a man in the case, a fair, young single chap who acted as referee, the game would have been pulled off to the satisfaction of all. When he announced that the game was 28 to 30 in favor of the town, he learned how earnest woman can be when love gleams not from out her bright eyes. The return match will be played soon.

There is some talk of a league for the district being formed the finals to be played at the exhibition at Courtney this fall.

Mr. W. Mitchell who filled Mr. Ward's position during the latter's sickness, returned to Vancouver on Friday. Mr. Mitchell made many friends who are sorry to see him leave so soon.

In his departure baseball in Cumberland loses one of its most loyal supporters, many avering that it was through his excellent work last Tuesday that the professionals won their match.

### A CHALLENGE.

The following baseball team called the "Mixtures" hereby challenge any team in Comox District to play at any time:

A: McNeil, Thos. Robinson, J. Nord, O. Harrison, N. Robinson, R. Struthers, J. Whyte, Sr., J. G. Grant, Wm. Walker R. Somerville, W. H. Harrison, Captain

## An Entertainment.

Given for a Good Cause. Everybody Come.

The entertainment to be held in the Comox Hall on June 20th the proceeds of which will be devoted to assist in the building of the Sanitarium for Consumptives in B. C for all denominations and nationalities should alone cause all those who are able to help by their attendance.

There is no need to go deeply into the matter. It has so many times appeared in the papers the last few years, that every one must know the awful death rate of chiefly the young and middle aged through out the whole world. It has also been proved by the most eminent medical men in all parts of the world that this terrible disease is amendable to treatment in such Sanitariums, more especially if taken in its earliest stage, also that it is a curable and prevent able complaint.

The very fact of the entertainment being undertaken by Mrs. Horace Smith Jr. and her usual willing helpers will alone cause many to attend but we think the entertainment being given for such an extremely worthy cause we should not only go to see and enjoy, but to help wi h a free heart, and free hand and by so doing are helping to relieve the suffering of hundreds of thousands of our brothers and sisters, also helping in years to come to eradicate such a dread disease from the face of the earth.

E. D.

Mr. J.A. Fraser has purchased Mr. O.H. Fechner's barber shop business, and will combine that business with his own. With many improvements which Mr. Fraser intends making to his present establishment he will be in a better position than ever to serve his many customers, all of whom appreciate his ability as a tonsorial artist.

The deal was put through by Cumberland Estate Agency.

Mr. Byron Crawford of Courtney, owing to the scarcity of labor, has decided to dispose of his fine herd of cattle. Mr. Crawford is a well known breeder of Holstein cattle. Chester white pigs, and barred Plymouth Rock hens. Any one wishing to purchase would do well to call on or write Mr. Crawford.

Rev. R. J. McIntyre left on Friday morning for his new field of labor. Before his departure a very pleasing event took place when the members of the Junior League of his Church presented him with a fancy clock and traveller's dressing case.

Mr. McIntyre was very much taken by surprise but found words to thank the young ladies for their tokens of friendship.

## Examinations.

Mr. H. Dunnell of Victoria arrived by Thursday's train and will remain until after the teachers' examinations in July. In the meantime Mr. Dunnell will continue his classes in painting with the teachers.

The Entrance Examinations this year will begin on Wednesday, June 26th and continue on the 27th and 28th Although the term's work has been very much broken up by sickness in the school, there will be a number of pupils ready to try the examination.

The High School examinations for teachers' certificates will begin on Tuesday, July 2nd and end on July 8th.

Mr. Dunnell will conduct both examinations.

## Gun Club.

On July 2nd the shoot for the grand trophy offered last year by the Dominion Cartridge Co, and the championship of British Columbia will be held in Vancouver. The shoot will be 100 birds unknown angles. The trophy is a beautiful cup standing on a 5 inch base and is 20 inches high over all and nicely engraved, and solid silver valued at $150.00 T.E. Bate as member of the Cumberland Gun Club is entitled to take part in the shoot, he having established a record shoot last season of being the best shooter in the club. He will probably go to Vancouver.

Nanaimo 11—Mrs John May of Newcastle townsite died this morning after a long and painful sickness.

Nanaimo 11—In the greatest football match ever played in B.C., field was blackened with hundreds of people from Ladysmith and Nanaimo, Nanaimo's team defeated Ladysmith champions yesterday in this city in the final match for the B.C. challenge Cup, score 4 to 1.

The excitment was intense, feeling ran high and betting was brisk, first half score was 1 to 0 in favor of Ladysmith, in second half Nanaimo scored 4 goals.

The game was the hardest ever played in Nanaimo.

The 24th of May Sports committee held their final meeting on Thursday evening last to receive reports of committes, etc.

The treasurer reported that in the treasury there was a balance of $40.55. On reading the report it was found that $257.15 had been collected and $216.60 had been spent.

Passed on motion that money be placed in bank in name of treasurer to be disposed of according to wishes of a public meeting called by three members—the treasurer, the secretary and the president—of the sports committee.

# DARREL of THE BLESSED ISLES

By IRVING BACHELLER,

Author of "Eben Holden," "D'ri and I," Etc.

(Continued.)

CHAPTER XVIII.

NEXT day Trove went home. He took with him many a souvenir of his first term, including a scarf that Polly had knit for him and the curious things he took from the Frenchman Leblanc and which he retained partly because they were curious and partly because Mrs. Leblanc had been anxious to get rid of them. He soon rejoined his class at Hillsborough, having kept abreast of it in history and mathematics by work after school and over the week's end. He was content to fall behind in the classics, for they were easy, and in them his arrears gave him no terror. Walking for exercise, he laid the plan of his tale and had written some bits of verse. Of an evening he went often to the Sign of the Dial and there read his lines and got friendly but severe criticism.

"Is there anything you do not know?" Trove inquired.

"Much," said the tinker, "including the depth o' me own folly. A man that displays knowledge hath need o' more."

Indeed, Trove rarely came for a talk with Darrel when he failed to discover something new in him—a further reach of thought and sympathy or some unsuspected treasure of knowledge. The tinker loved a laugh and would often search his memory for some phrase of bard or philosopher apt enough to provoke it. Of his great store of knowledge he made no vainer use.

Trove had been overworking, and about the middle of June they went for a week in the woods together. They walked to Allen's the first day and after a brief visit there went off in the deep woods, camping by a pond in thick timbered hills. Coming to the lilied shore, they sat down awhile to rest. A hawk was sailing high above the still water. Crows began to call in the treetops. An eagle sat on a dead pine at the water's edge and seemed to be peering down at his own shadow. Two deer stood in a marsh on the farther shore looking over at them. Near by were the bones of some animal and the fresh footprints of a panther. Sounds echoed far in the hush of the unbroken wilderness.

"See, boy," said Darrel, with a little gesture of his right hand, "the theater o' the woods! See the sloping hills, tree above tree, like winding galleries! Here is a coliseum old, past reckoning. Why, boy, long before men saw the Seven Hills it was old. Yet see how new it is, how fresh its color, how strong its timbers! See the many seats, each with a good view, an' the multitude o' the people, yet most o' them are hidden. Ten thousand eyes are looking down upon us. Tragedies an' comedies o' the forest are enacted here. Many a thrilling scene has held the stage—the spent deer swimming for his life, the painter stalking his prey or leaping on it."

"'Tis a cruel part," said Trove. "He is the murderer of the play. I cannot understand why there are so many villains in its cast. Both the cat and the serpent baffle me."

"Marry, boy, the world is a great school, an' this little drama o' the good God is part of it," said Darrel. "An' the play hath a great moral—thou shalt learn to use thy brain or die. Now, there may be many perils in this land o' the woods, so many that all its people must learn to think or perish by them. A pretty bit o' wisdom it is, sor. It keeps the great van moving—ever moving—in the long way to perfection. Now, among animals a growing brain works the legs of its owner, sending them far on diverse errands until they are strong. Mind thee, boy, perfection o' brain an' body is the aim o' nature. The cat's paw an' the serpent's coil are but the penalties o' weakness an' folly. The world is for the strong. Therefore God keep thee so or there be serpents will enter thy blood an' devour thee—millions o' them."

They sat a little time in silence, looking at the shores of the pond.

"Have you ever felt the love passion?" said Darrel.

"Well, there's a girl of the name of Polly," Trove answered.

"Ah, Polly! She o' the red lips an' the dark eye," said Darrel, smiling. "She's one of a thousand." He clapped his hand upon his knee merrily and sang a sentimental couplet from an old Irish ballad.

"Have ye won her affection, boy?" he added, his hand on the boy's arm.

"I think I have."

"God love thee! I'm glad to hear it," said the old man. "She is a living wonder, boy, a living wonder, an' had I thy youth I'd give thee worry."

"Since her mother cannot afford to do it I wish to send her away to school," said Trove.

"Tut, tut, boy. Thou hast barely enough for thy own schooling."

"I've $82 in my pocket," said Trove proudly. "I do not need it. The job in the mill—that will feed me and pay my room rent, and my clothes will do me for another year."

"On my word, boy, I like it in thee," said Darrel, "but surely she would not take thy money."

"I could not offer it to her, but you might go there, and perhaps she would take it from you."

"Capital!" the tinker exclaimed. "I'll see if I can serve thee. Marry, good youth, I'll even give away thy money an' take credit for thy benevolence. Teacher, philanthropist, lover—I believe thou'rt ready to write."

"The plan of my first novel is complete," said Trove. "That poor thief—he shall be my chief character—the man of whom you told me."

"Poor man! God make thee kind to him," said the tinker. "An thou'rt willing, I'll hear o' him tonight. When the firelight flickers—that is the time, boy, for tales."

They built a rude lean-to, covered with bark and bedded with fragrant boughs. Both lay in the firelight, Darrel smoking his pipe, as the night fell.

"Now for thy tale," said the tinker.

The tale was Trove's own solution of his life mystery, shrewdly come to after a long and careful survey of the known facts. And now, shortly, time was to put the seal of truth upon it and daze him with astonishment and fill him with regret of his cunning. It should be known that he had never told Darrel or any one of his coming in the little red sleigh.

He lay thinking for a time after the tinker spoke; then he began:

"Well, the time is 1835, the place a New England city on the sea. Chapter I—A young woman is walking along a street, with a child sleeping in her arms. She is dark skinned—a Syrian. It is growing dusk. The street is deserted save by her and two sailors, who are approaching her. They, too, are Syrians. One seems to strike her—it is mere pretense, however—and she falls. The other seizes the child, who, having been drugged, is still asleep. A wagon is waiting near. They drive away hurriedly, their captive under a blanket. The kidnapers make for the woods in New Hampshire. Officers of the law drive them far. They abandon their horse, tramping westward over trails in the wilderness, bearing the boy in a sack of sailcloth, open at the top. They had guns and killed their food as they traveled. Snow came deep. By and by game was scarce and they had grown weary of bearing the boy on their backs. One waited in the woods with the little lad while the other went away to some town or city for provisions. He came back, hauling them in a little sleigh. It was much like those made for the delight of the small boy in every land of snow. It had a box painted red and two bobs and a little dashboard. They used it for the transportation of boy and impedimenta.

"In the deep wilderness beyond the Adirondacks they found a cave in one of the rock ledges. They were twenty miles from any postoffice, but shortly discovered one. Letters in cipher were soon passing between them and their confederates. They learned there was no prospect of getting the ransom. He they had thought rich was not able to raise the money they required or any large sum. Two years went by, and they abandoned hope. What should they do with the boy? One advised murder, but the other defended him. It was unnecessary, he maintained, to kill a mere baby, who knew not a word of English and would forget all in a month. And murder would only increase their peril. Now, eight miles from their cave was the cabin of a settler. They passed within a mile of it on their way out and in. They had often met the dog of the settler roving after small game—a shepherd, trustful, affectionate and ever ready to make friends. One day they captured the dog and took him to their cave. They could not safely be seen with the boy, so they planned to let the dog go home with him in a little red sleigh. Now, the settler's cabin was, like that of my father, on the shore of a pond. It was round, as a cup's rim, and a mile or so in diameter. Opposite the cabin a trail came to the water's edge, skirting the pond, save in cold weather, when it crossed the ice. They waited for a night when their tracks would soon disappear. Then, having made a cover of the gallon sack in which they had brought the boy and stretched it on withes and made it fast to the sleigh box, they put the sleeping boy in the sleigh, with hot stones wrapped in paper and a robe of fur to keep him warm, hitched the dog to it and came over hill and trail to the little pond awhile after midnight. Here they buckled a ring of bells on the dog's neck and released him. He made for his home on the clear ice, the bells and his bark sounding as he ran. They at the cabin heard him coming and opened their door to dog and traveler. So came my hero in a little red sleigh and was adopted by the settler and his wife and reared by them with generous affection. Well, he goes to school and learns rapidly and comes to manhood. It's a pretty story—that of his life in the big woods. But now for the love tale. He meets a young lady—sweet, tender, graceful, charming."

"A moment," said Darrel, raising his hand. "Prithee, boy, ring down the curtain for a brief parley. Thou say'st they were Syrians—they that stole the lad. Now, tell me, hast thou reason for that?"

"Ample," said Trove. "When they took him out of the sleigh the first words he spoke were 'Anah jouhan.' He used them many times, and while he forgot they remembered them. Now, 'Anah jouhan' is a phrase of the Syrian tongue, meaning, 'I am hungry.'"

"Very well," said the old man, with emphasis, "and sailors. That is a just inference. It was a big port, and far people came on the four winds. Very well! Now, for the young lady. An' away with thy book unless I love her."

"She is from life—a simple hearted girl, frank and beautiful and"— Trove hesitated, looking into the dying fire.

"Noble, boy. Make sure o' that, an' nobler, too, than girls are apt to be. If Emulation would measure height with her see that it stand upon tiptoes."

"So I have planned. The young man loves her. She is in every thought and purpose. She has become as the rock on which his hope is founded. Now he loves honor, too, and all things of good report. He has been reared a Puritan. By chance, one day, it comes to him that his father was a thief."

The boy paused. For a moment they heard only the voices of the night.

"He dreaded to tell her," Trove continued, "yet he could not ask her to be his wife without telling. Then the question, Had he a right to tell? For his father had not suffered the penalty of the law and, mind you, men thought him honest."

"'Tis just," said Darrel. "But tell me, how came he to know his father was a thief?"

"That I am thinking of, and before I answer, is there more you can tell me of him or his people?"

(To be Continued.)

## FIND PREHISTORIC BONEYARD.

### Excavations Reveal the Largest Mastodon Ever Uncovered in Alaska.

What is perhaps the largest mastodon ever uncovered completely in Alaska was uncovered during the last six months at a place near Circle City by Max L. Lohbrunner. The exact place of the location of the mastodon is on Alice Creek, a tributary of Mineral Creek, which flows into Woodchopper Creek.

To judge of the other dimensions of the animal it must only be said that one tusk of the mastodon which is still intact is over nine feet eight inches long, and has a circumference of eighteen inches. The jaws of the animal still have teeth four in number in the jaw. Each of these teeth, which have been taken out and replaced, weigh fifty pounds apiece. The other parts of the mastodon are in a poor state of preservation compared with the tusk, although the bones that have been collected weigh in the neighborhood of 1,000 pounds.

Lohbrunner, who got the bones, dug them out at a depth of eighty feet below the surface of the ground. It took a great amount of care and pains on his part to see that the bones were not burned to charcoal while he was excavating and thawing the ground.

Lohbrunner has moved part of the animal into storage at Circle City and will hold it there until the spring time, when it will be removed to Seattle, where it will be put together and eventually find its way into the Alaska-Yukon-Pacific Exposition, if the Smithsonian Institution does not get it before that time.

In speaking of his find Lohbrunner said: "Alice Creek, where I found this mastodon, is perhaps one of the most wonderful on earth, from the standpoint of research. It seems to be the boneyard that a lot of the prehistoric animals made for in order to die or to be killed. We have found on the creek the skeletons of mastodons, muskox, caribou, bear, and other animals. If this creek ever goes into a hydraulic mining proposition the world will be astounded with the many finds of bones of animals of prehistoric times."

### In the Sickroom.

Pearl—I am awfully jealous of that pretty trained nurse. I wish they had engaged a homely one to attend George.

Ruby—But she is only taking his pulse.

Pearl—Yes, but what guaranty have I that she might not take his heart?—Chicago News.

## FURNACES IN ENGLAND.

### John Bull Prefers to See a Blaze in Open Grate.

According to London papers, Englishmen are up in arms over a threatened invasion of what they regard as one of their inherent rights, the right to keep their houses uncomfortably cold. At a recent meeting of remonstrants resolutions were passed condemning a rumored attempt to supplant open fires with furnaces. The British husbands and fathers assembled agreed that home would be anything but attractive had it always an atmosphere reminiscent of the House of Commons, or, worst still, of the reading room of the British Museum.

There is reason to believe that the house that is improperly heated possesses a number of advantages over the house that is thoroughly heated, although it is impossible to persuade people on this side of the water that any change is desirable. It costs much less partly to heat a house—to heat the ends of two or three rooms—for one thing, and that is an important consideration, surely, when coal goes up whenever the temperature goes down. Again, given an armful of logs piled near an open fireplace, and almost anybody can keep a fire going, whereas it is a very different matter to descend to the cellar and fix a furnace. The trouble with most furnaces is that they are located in the cellar.

Then, too, if callers call at all at a house in which their teeth chatter they remain only long enough to "pay their respects"; they do not accept invitations to be seated and rock the hours away chatting about nothing in particular while the members of the family on whom they are calling are waiting for an opporunity to go to bed.

It isn't surprising that Englishmen are opposed to warm houses, but why they continue to cling to open fires is a mystery. The open fire is more or less ornamental, it is true, but it merely serves to accentuate the general chill and gloom which pervade the average English "living room."

## LOOSER IN MORALS.

### Bishop of London So Describes Married Men.

"Taking them all round, married men are much looser in their morals than single men." This affirmation by the Bishop of London, England, quite startled his hearers at a meeting of the Council for Promoting Public Morality. Those present were pleased, however, to learn, on the Bishop's authority, that London is becoming more moral, thanks to the efforts of the police. There is still, however, much to be done. The Bishop said he would never rest content until the open sale in shops of things to make sin easy was suppressed.

### Underground London.

Nearly 500 miles of sewers are situated beneath the feet of London's population, and this includes only the large sewers, several of them so large that a number of boats could float down them abreast. Some idea of the enormous cost of draining London may be gathered from the fact that the drainage works and machinery alone cost £8,000,000 sterling.

The three main sewers in London run from Fleet street to Hampstead, from Blackfriars to Abbey Mills, and from Harrow to Old Ford. Connected with these are a multitude of smaller sewers, measuring about twelve feet in diameter, which makes London one of the best-drained cities in the world.

A thousand men are employed all the year round, not even excepting Sundays, in keeping London properly drained, and the stupendous total of 1,000,000,000 tons of sewage is chemically treated every twelve months and taken away in sludge vessels to the North Sea.

At Barking, where the sludge is dealt with, there are fourteen sewers measuring thirty feet across; that is to say, any one of them would be wide enough for a small tugboat to pass down. Here the sludge, after being chemically treated, has to go through enormous iron cages, resembling gigantic colanders, which keep back solid objects, such as pieces of wood, old boots, and so forth, whilst not infrequently valuable articles of jewelery are found wedged between the bars of a cage.

### Waste Not—Want Not.

Doctor—I must know what you have eaten today in order to understand your stomachic disorder.

Patient—Oh, doctor, only a little pork. It was left over from last week and was perhaps not quite fresh.

Doctor—Would it not have been more sensible to let the pork spoil entirely rather than to upset your stomach?

Patient—But, doctor, you can cure a diseased stomach, but what can you do with spoiled pork?

### Got the Habit Later.

In a sermon preached in a small church in Glasgow the pastor, after inveighing against slothfulness, said by way of climax, "Do you think Adam and Eve went about the garden of Eden with their hands in their pockets?"

### One Dry Spot.

Angler—Hang it! Is there a dry spot in this boat where I can scratch a match? Boatman (who has been disappointed as regards refreshment)—Try my throat, sir.—London Punch.

## PEEPS INTO WOMEN'S LETTERS

If our readers could spend one morning looking through the letters received from all over Canada by the Zam-Buk Co., it would bring home to them with irresistible force the healing virtues of this great household balm. Old women, young women, wives, mothers and even young girls have something to say about how Zam-Buk did this or that good office in their home. Many of these writers give permission to make extracts from their grateful testimony. From these the following were taken at random:

"I was troubled for some weeks with salt rheum in hands and arms and was using a salve which did me little good. On receiving a supply of Zam-Buk I applied it, and it really seemed to act like magic! The itching and burning ceased, and in a few days the skin was cleared and healthy." So writes Miss E. A. Butchard, of North Keppel.

"Three boxes of Zam-Buk cured me of Eczema, from which I had suffered a long time." So says Mrs. Gladden, of Mansonville, Que.

"Zam-Buk cured a case of blood poison in my family, and I wish to thank you for the great blessing it has proved," is the effect of a letter from Mrs. Webb, of Dovercourt.

And so one could go on quoting extract after extract, showing how Zam-Buk cures chronic sores, ulcers, abscesses, bad leg, itch, and blood poison; takes the soreness out of cuts and burns, and grows new, healthy skin over injured or diseased places. All stores and druggists sell at fifty cents a box, or the Zam-Buk Co., Toronto, will mail for price.

"What kind of a road is this branch line of yours through Central Kansas?"

"It's one of the sort that makes you part your hair in the middle and sit in the aisle of the coach to keep from upsetting the train."—Chicago News.

### A SPRING DANGER

Many People Weaken Their Systems by Dosing with Purgative Medicines

A spring medicine is a necessity. Nature demands it as an aid to enriching the blood and carrying off the impurities that have accumulated during the winter months. Thousands of people, recognizing the necessity for a spring medicine, dose themselves with harsh griping purgatives. This is a mistake. Ask any doctor and he will tell you that the use of purgative medicines weaken the system and cannot possibly cure disease. In the spring the system needs building up—purgatives weaken. The blood should be made rich, red and pure—purgatives cannot do this. What is needed is a tonic, and the best tonic medical science has yet devised is Dr. Williams Pink Pills. Every dose of this medicine actually makes new, rich blood, and this new blood strengthens every organ and every part of the body. That is why these Pills banish pimples and unsightly skin eruptions. That is why they cure headaches, backaches, rheumatism, neuralgia and a host of other troubles that come from poor watery blood. That is why the men and women who use Dr. Williams Pink Pills eat well and sleep well and feel active and strong. Miss Mabel Swnott, Lisle, Ont., says: "I was pale and weak and suffered greatly from headaches, and I found nothing to help me until I began taking Dr. Williams Pink Pills. These have completely restored my health and I bless the day I began taking them."

But be sure you get the genuine Pills with the full name "Dr. Williams Pink Pills for Pale People" on the wrapper around each box — all other so-called pink pills are fraudulent imitations. Sold by medicine dealers or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

Kidder—The best illustrated paper I've seen in a long time was handed to me today.

Jenks—What was it?

Kidder—A $50 note.—Philadelphia Ledger.

State of Ohio, City of Toledo, Lucas County.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the city of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure.

FRANK J. CHENEY.

Sworn to before me and subscribed in my presence this 6th day of December, A. D. 1886.

A. W. GLEASON, (Seal.) Notary Public.

Hall's Catarrh Cure is taken internally and acts directly on the blood and mucous surfaces of the system. Send for testimonials free.

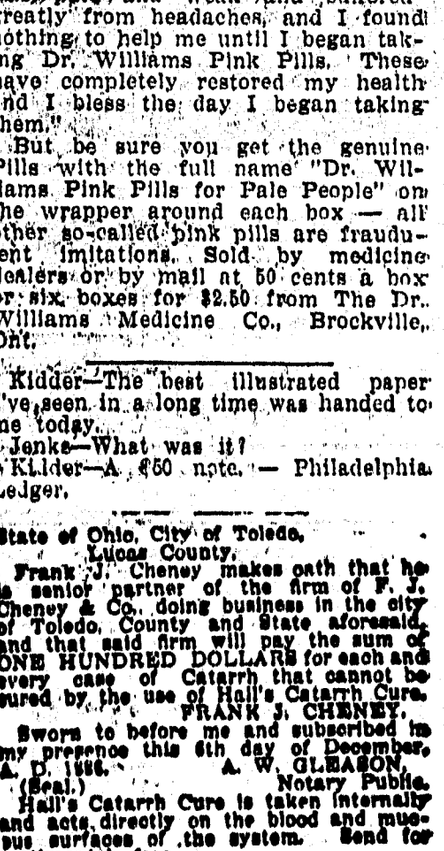
F. J. CHENEY & CO., Toledo, O.

Sold by all Druggists, 75c.

Take Hall's Family Pills for constipation

Elderly Spinster—Ah, I ought to have married; that's where I made the mistake.

Friend—And I married, and that's where I made the mistake.—Meppendorfer Blaetter.



# COULD NOT SPEAK ABOVE A WHISPER.

## Cold in the Chest Seemed to be Unmovable But Cure was Soon Effected by

## Dr. Chase's Syrup of Linseed and Turpentine

It is waste of time to use ordinary cough mixtures for serious colds on the chest, and time is of infinite value when the lungs are in danger.

The risk is too great, especially when you wait to think that Dr. Chase's Syrup of Linseed and Turpentine is for sale in nearly every store that keeps medicines at all.

This letter gives you some idea of the effectiveness of this great medicine.

Mrs. A. Barnum, Ingersoll, Ont., writes:—"My husband had a very severe cold on his chest and got so bad he could not speak above a whisper. The cough medicines he tried seemed to have no effect and reading about Dr. Chase's Syrup of Linseed and Turpentine I sent for a bottle. In two days he was cured and is very grateful for such a medicine. He says we will never be without this medicine in the house."

The very name of Dr. Chase's Syrup of Linseed and Turpentine is sufficient to explain the simple and yet powerful and well-known ingredients of which this great medicine is composed.

While linseed sheathes the mouth, tongue and throat, with a protective coating to prevent injury from hard coughing, turpentine disinfects and stimulates the ulcerated parts of the bronchial tubes and lungs and is almost specific for bronchitis.

Other ingredients which along with these go to make up Dr. Chase's Syrup of Linseed and Turpentine, soothe the nerves, loosen the cough, aid expectoration, and by thorough action on the whole system completely cure coughs and colds, bronchitis, asthma, whooping cough and sore throat.

Dr. Chase's Syrup of Linseed and Turpentine, 25 cents a bottle at all dealers, or Edmanson, Bates & Co., Toronto. To protect you against imitations, the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every bottle.

### A REVISED EDITION

A small citizen of Springfield, Mass., says Lippincott's Magazine, made out a list of the things he hoped to receive for his approaching birthday, and this is what his fond mamma found recorded as the first item of all:

"Anew testimunt, reversed virgin!"

### Minard's Liniment Cures Distemper.

Mme. Gallay, wife of the defaulting bank clerk who fled to South America in the yacht Catarina, is dead in a Paris hospital.

Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Toronto, Ont.

### Why Did They Go?

Why were the early settlers of Manitoba drawn so largely from the counties of Huron and Bruce? asks a writer in Toronto News. Are they more rocky and less fertile than other Ontario counties, and did the people go because population over-ran the growth of wealth, just as Scotchmen have been popularly supposed to be shoved out from their barren land to conquer the world? There may be something in that, but the writer, never having seen either country, cannot say. But, looking at the map, and remembering the process of settling the Western United States, one is inclined to believe that proximity and ease of travel had much to do with it. Steamers ran from both Lake Huron and Georgian Bay ports for Duluth long before the Canadian Pacific Railway was built. Water travel is cheap and the tendency would be for adventurous spirits to go up to have a look at the new country. Some of them would be seized of its advantages, and after the first score started, and reports were received of their prosperity in the new land, their relatives and neighbors would follow. There is no immigration agent like the prosperous settler, and so it happened that there was a large colony from those counties in Manitoba before the rest of Ontario had fairly awakened to the fact that there was such a place. If that is not the true explanation, perhaps somebody who knows can give it.

### "HOMES, HEALTHFUL AND BEAUTIFUL"

Under the above caption the Alabastine Co., Limited, of Paris, Ontario, have put out probably one of the handsomest booklets on home decoration ever issued in Canada. While designed primarily as a catalogue, the book is handsomely illustrated with numerous cuts of the interiors of rooms in colors, and, as well as containing complete information on wall decoration, is filled with many valuable suggestions, both pictorial and otherwise, on tasteful home furnishing. It is a book which needs only to be seen to be appreciated.

"Homes, Healthful and Beautiful" is gotten out in the form of an edition de luxe, and is too expensive a book to distribute promiscuously to everyone who might write for it merely out of idle curiosity. The Alabastine Co. are therefore making a charge of ten cents for it, which amount, while not nearly covering the cost of the book, is intended to discourage those who would write for it merely to gratify an idle whim.

It is well worth reading. A copy will be mailed to any address on receipt of ten cents.

### PRACTISING

Georgie Goode—That nasty Tommy Tuffin called me a liar today, ma.

Mamma—The young villain! What made him say such a thing?

Georgie Goode—His uncle told him he might be president some day.—Puck.

A Requisite for the Rancher.—On the cattle ranges of the West, where men and stock are far from doctors and apothecaries, Dr. Thomas' Eclectric Oil is kept on hand by the intelligent as a ready made medicine, not only for many human ills, but as a horse and cattle medicine of surpassing merit. A horse and cattle rancher will find matters greatly simplified by using this Oil.

### ANOTHER JOB FOR ALCOHOL

That the method of garbage disposal is about to be revolutionized by the manufacture of denatured alcohol is the statement made to the common council of Milwaukee by Dr. W. A. Boyd, of Rockford, Ill. Milwaukee now pays $1.89 a ton for burning its garbage at a municipal plant, and Dr. Boyd has offered to do the work at 70 cents a ton, and at the end of ten years give the city his plant. Milwaukee gets no return in the way of by-products from burning its garbage. Dr. Boyd says he will get grease, fertilizer and alcohol from the waste. Alcohol would be the most important of the by-products.—New York Tribune.

### ARTIFICIAL NUTMEGS

Artificial nutmegs are made in Belgium in so clever a manner that they can hardly be distinguished from genuine ones, especially if mixed with the latter. A chemical analysis has shown them to consist of a mixture of finely powdered nutmeg (from extracted or injured kernels) and about 20 per cent of mineral substances. The following means of detection are recommended:—When the kernels are cut the well known plantlike structure so characteristic in genuine nutmeg is absent: if the kernels are treated for three or four minutes with boiling water they become soft, and can be rubbed up into a powder with the fingers; on being burned they leave about 18 per cent of ashes, while true nutmeg contains only 2 to 3 per cent; the imitation nuts are generally much heavier than the genuine article.

Pale, sickly children should use Mother Graves' Worm Exterminator. Worms are one of the principal causes of suffering in children and should be expelled from the system.

The members of the Wellman North Pole expedition are completing the preparation of the balloon America, and will leave shortly.

THE LATE MR. C. B. RECORD,

FOUNDER OF THE RECORD FOUNDRY.

Reproduced above, is a portrait of the late Mr. C. B. Record, the founder and original head of the Record Foundry & Machine Co., of Moncton, N.B., and Montreal, P.Q.

Previous to Mr. Record going into the manufacture of stoves, those used in Canada were almost wholly of American manufacture. The character of the work turned out by the Record Foundry & Machine Co., at once gave their stoves a standing, and as a result a very large business soon grew up, largely owing to Mr. Record's untiring industry and perseverance against many obstacles.

Although Mr. Record retired from active business as far back as 1879, the solid basis on which he had established the industry, has resulted in its growth from a sturdy pioneer into one of the largest stove manufacturing plants on the northern half of the American continent. With two large plants, one in Moncton and one in Montreal, the Record Foundry & Machine Co. are known from Halifax to Vancouver, and their "Calorific" and "Admiral" furnaces and "Penn Esther" ranges recognized as the standard of Canadian excellence.

### The Coat of Arms.

The original coat of arms was the surcoat, or sleeveless tunic, which the knights of the middle ages wore over their armor for the purpose of distinctive marks.

### Making a Needle.

It takes eleven complete processes to make a needle. The first is gauging the wire, and the last are drilling the eyes, finishing the points and papering. Each needle will pass through the hands of over a score of workmen.

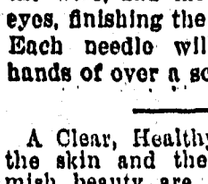
A Clear, Healthy Skin.—Eruptions of the skin and the blotches which blemish beauty are the result of impure blood caused by unhealthy action of the liver and kidneys. In correcting this unhealthy action and restoring the organs to their normal condition, Parmelee's Vegetable Pills will at the same time cleanse the blood, and the blotches and eruptions will disappear without leaving any trace.

### A Limited Habit.

"I see that some of our scientists claim that death is largely a matter of habit, depending upon thought and all that," he said.

"Nonsense," she replied. "Did you ever know any one who was in the habit of dying?"

PEN-ANGLE



In a variety of styles, fabrics and prices, for women, men and children. Form-fitted. Dealers are authorized to replace instantly and at our cost any Pen-Angle garment faulty in material or making.

Pen-Angle Underwear is form-knit so it can't help fitting your figure,—it's made of long-fibred wool so it won't shrink—and it's guaranteed besides. The whole idea is to make it so good you can't afford not to buy by the trademark (in red).

UNDERWEAR

HEALTHFUL

Because of its Purity and Freedom From Coloring Matter

"SALADA"

GREEN TEA

Sold only in sealed lead packets at 40c, 50c and 60c per lb. At all grocers.

### AN AWKWARD COMPLIMENT

Budding Poet—Have you read my "Descent into Hell"?

Worldly Person—No; but I should like to see it very much.—Illustrated Bits.

I consider MINARD'S LINIMENT the BEST liniment in use.

I got my foot badly jammed lately. I bathed it well with MINARD'S LINIMENT, and it was as well as ever next day.

Yours very truly,
T. G. McMULLEN.

The McCourt benefit fund has been launched in Ottawa.

Beer makers walked out of twenty-three breweries at St. Louis to enforce wage demands.

There are 1,700 miners in British Columbia, 350 at Coleman, 250 at Frank, 200 at Lille, 100 at Belleview and 100 at Lundbrek now working under the eight-hour day.

Nurses' & Mothers' Treasure
—most reliable medicine for baby. Used over 50 years. First compounded by Dr. P. E. Picault in 1855.

Makes Baby Strong

Restores the little organs to perfect health. Gives sound sleep, without resort to opium or other injurious drugs.

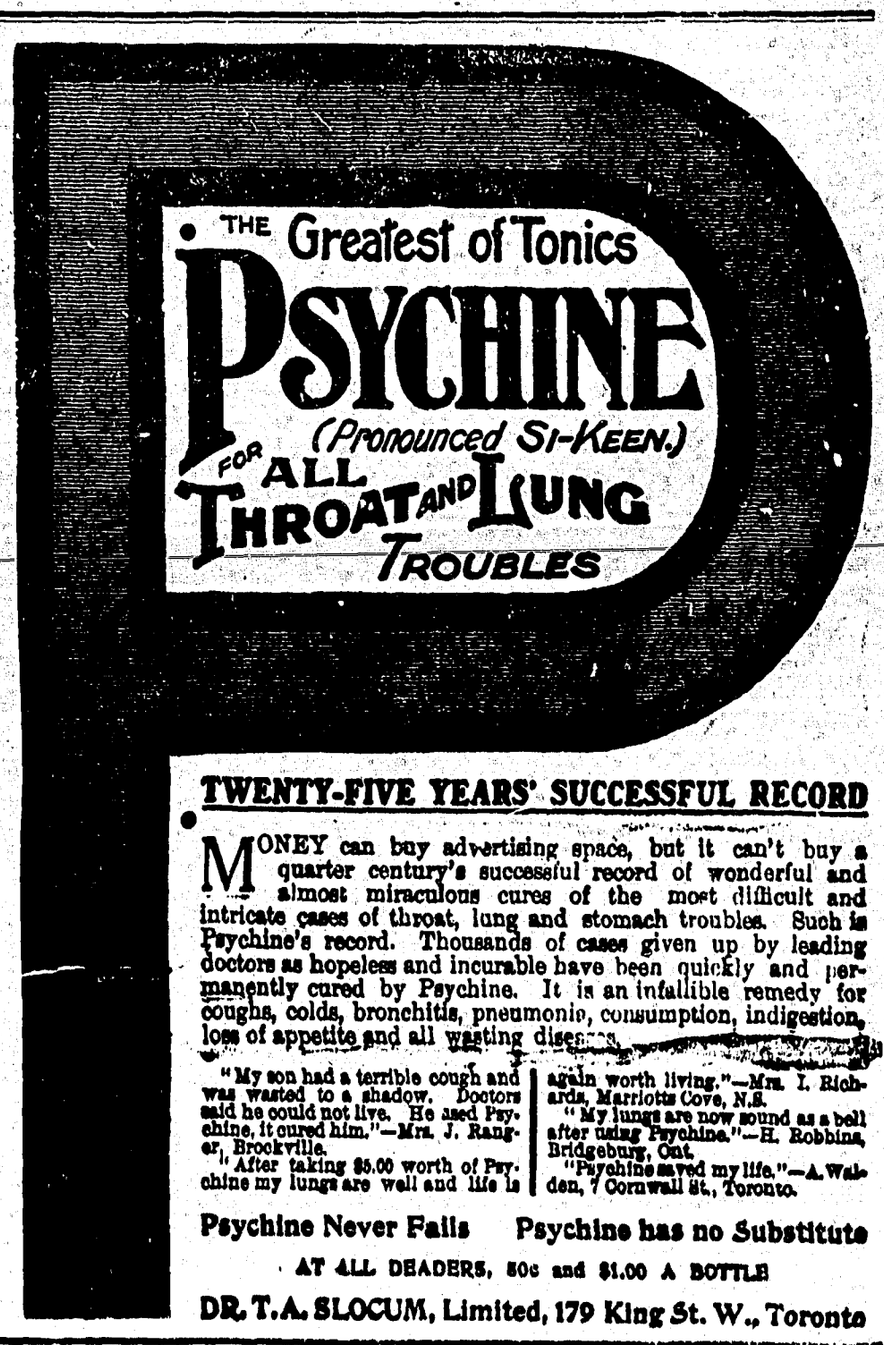
National Drug & Chemical Co. Ltd., Montreal



TWENTY-FIVE YEARS' SUCCESSFUL RECORD

MONEY can buy advertising space, but it can't buy a quarter century's successful record of wonderful and almost miraculous cures of the most difficult and intricate cases of throat, lung and stomach troubles. Such is Psychine's record. Thousands of cases given up by leading doctors as hopeless and incurable have been quickly and permanently cured by Psychine. It is an infallible remedy for coughs, colds, bronchitis, pneumonia, consumption, indigestion, loss of appetite and all wasting diseases.

"My son had a terrible cough and was wasted to a shadow. Doctors said he could not live. He used Psychine, it cured him."—Mrs. J. Ranger, Brockville.

"After taking $5.00 worth of Psychine my lungs are well and life is again worth living."—Mrs. I. Richards, Marriotts Cove, N.S.

"My lungs are now sound as a bell after using Psychine."—H. Robbins, Bridgebury, Ont.

"Psychine saved my life."—A. Walden, 7 Cornwall St., Toronto.

Psychine Never Fails Psychine has no Substitute

DR. T. A. SLOCUM, Limited, 179 King St. W., Toronto

The Habit of Health

Many people have a habit of ailing. How much better it would be to learn to keep well. For health, after all, is largely a matter of habit, which all may acquire with a little practise.

BEECHAM'S PILLS

teach good habits to Stomach, Liver, Kidneys and Bowels. If you are subject to Bilious Attacks, suffer from Constipation or are troubled with Indigestion, Nervousness or Headache, Beecham's Pills will reform all these bad habits and set an example of good health, which the body will quickly follow. You can break up all sickly habits by occasionally using the health suggestions transmitted by Beecham's Pills.

Prepared only by Thomas Beecham, St. Helens, Lancashire, England.
Sold by all Druggists in Canada and U. S. America. In boxes 25 cents.

AS A BRACER FOR A HARD DAY'S WORK BREAKFAST ON

SHREDDED WHEAT

As a food it is far superior to mushy porridge or pasty corn products. It is hygienically perfect and more wholesome and nutritious than meat.

BISCUIT and TRISCUIT are an Ideal Combination.

All Grocers—13c a carton, or 2 for 25c.

THE CUMBERLAND NEWS
Issued Every Wednesday.
J. A. BATES,
Editor and Proprietor.

The columns of THE NEWS are open to all who wish to express therein views o matters of public interest.

While we do not hold ourselves re sponsible for the utterances of correspondents, we reserve the right of declining to insert communications unnecessarily personal.

WEDNESDAY, JUNE 12, 1907

There was a man in Cumberland and he was awfully wise. He marked a silver dollar and then gave it to Bess; she went to the butcher shop and blew the dollar in—it was not long before the coin came back to him again. He took it to a merchant and bought a new dress for June, before the week had finished back came that plunk again. He spent that self same coin quite fifty times or more, and always had the pleasure of spending it over and over. Each time it came back 'twas like meeting an old friend, but one day he sacrificed his dear old friend for a post-office order and sent it off to T. Eaton's store, back it came "nevermore"

We can take care of the people who come through of their own accord, especially those who have money enough to buy small places in which they can usefully employ themselves when other work is at a standstill. But we shall find ourselves in difficulties if too many laborers of the hand-to-mouth type are thrust upon us—World.

There is room and plenty in British Columbia for many thousands, shall we say millions, of that class of people who have a little money to invest and "can usefully employ themselves when other w rks are at a standstill." In Comox valley there is available land for at least five hundred such families. There are too manyof that birds-of-passage class in the province, men who work a while then loaf a while, and some eventually become a burden on the community.

We would suggest to the Vancouver World to do a little missonary work in how the present Alien Labor Act is being carefully followed by some of our lumber companies, and give results of investigation. We hear rumblings even in this district of violations of the act, and if all be true, or even one half, then it is up to somebody to protest vigorously and effectively.

### SLIGHTLY MIXED

Two correspondents wrote to a country editor to know, respectively; The best way of assisting twins through the teething period, and how to rid an orchard of grasshoppers. The editor answered each question faithfully, but unfortunately got the initials mixed, so that the fond father of the teething twins was thunderstruck by the following advice: If you are unfortunate enough to be plagued by these unwelcome little pests, the quickest means of settling them is to cover them with straw and set the straw on fire.

While the man who was bothered with the grasshoppers was equally amazed to read: The method of treatment is to give them each a warm bath twice a day and rub the gums with boneset.—Green wood Ledge.

## LAND ACT.

### Skeena Land District
### District of Queen Charlotte Islands,

TAKE notice that John F. L. Embury, of Regina, Saskatchewan, Barrister-at-law, intends to apply for a special timber licence over the following described lands:—situate on the North side of Skidegate Inlet, Graham Island.

Claim No 1—Commencing at a post planted on the North West corner of lot 16a Range 4 running north 40 chains, east 160 chains, south 40 chains, west 160 chains back to the place of beginning. and containing 640 acres more or less.

Dated May 4th, 1907.
JOHN F. L. EMBURY—Applicant.
CARL G. JOHNSTONE, Agent

Claim No. 2—Commencing at a post planted on the North West corner of Claim No 1, running North 40 chains, East 160 chains, South 40 chains, West 160 chains, back to the place of beginning and containing 640 acres more or less.

Dated May 4th 1907.
JOHN F. L. EMBURY—Applicant.
CARL G. JOHNSTONE, Agent.

Claim No. 3—Commencing at a post planted on the North West corner of Claim No. 2, running North 40 chains, East 160 chains, South 40 chains, West 160 chains, back to the place of beginning, and containing 640 acres more or less.

Dated May 4th, 1907.
JOHN F. L. EMBURY—Applicant.
CARL G. JOHNSTONE, Agent.

Claim No. 4—Commencing at a post planted at the North West corner of Claim No 3, running South 40 chains, West 160 chains, North 40 chains, East 160 chains, back to the place of beginning and containing 640 acres more or less.

Dated May 4th, 1907.
JOHN F. L. EMBURY—Applicant.
CARL G. JOHNSTONE, Agent.

Claim No. 5—Commencing at a post planted at the South East corner of Claim No 4, running South 80 chains, West 80 chains, North 80 chains, East 80 chains, back to place of beginning, and containing 640 acres more or less.

Dated May 7th, 1907.
JOHN F. L. EMBURY,—Applicant.
CARL G. JOHNSTONE, Agent.

Claim No. 6.—Commencing at a post planted at the North West corner of Claim No. 4, running North 40 chains, East 160 chains, South 40 chains, West 160 chains, back to place of beginning, and containing 640 acres more or less.

Dated May 7th, 1907.
JOHN F. L. EMBURY,—Applicant.
CARL G. JOHNSTONE, Agent

Claim No. 7.—Commencing at a post planted at the North East corner of Claim No. 6, running South 40 chains, West 160 chains, North 40 chains, East 160 chains, back to place of beginning. and containing 640 acres more or less.

Dated May 7th, 1907.
JOHN F. L. EMBURY,—Applicant.
CARL G. JOHNSTONE, Agent.

BEER BEER

The drink of strong men and healthy women

UNION BREWERY BEER

Is The Best
Bottled or in Barrels.

The UNION BREWING Co., Nanaimo B.C.

CARL G. JOHNSTONE, Agent.

Claim No 8—Commencing at a post planted at the North East corner of Claim No 7, running North 40 chains, West 160 chains, South 40 chains, East 160 chains, back to the place of beginning, and containing 640 acres more or less.

Dated May 7th, 1907.
JOHN F. L. EMBURY—Applicant.
CARL G. JOHNSTONE, Agent.

Claim No. 9—Commencing at a post planted at the North East corner of Claim No 8 running North 40 chains, West 160 chains, South 40 chains, East 160 chains, back to the place of beginning, and containing 640 acres more or less.

Dated May 7th, 1907.
JOHN F. L. EMBURY,—Applicant.
CARL G. JOHNSTONE, Agent.

Claim No. 10—Commencing at a post planted at the North West corner of Claim No 6, running North 40 chains, East 160 chains, South 40 chains, West 160 chains, back to the place of beginning and containing 640 acres more or less

Dated May 8th, 1907.
JOHN F. L. EMBURY—Applicant.
CARL G. JOHNSTONE, Agent.

Claim No. 11—Commencing at a post planted at the North West corner of Claim No 10 running North 40 chains, East 160 chains, South 40 chains, West 160 chains, back to the place of beginning and containing 640 acres more or less.

Dated May 8th, 1907.
JOHN F. L. EMBURY—Applicant.
CARL G. JOHNSTONE, Agent.

Claim No. 12—Commencing at a post planted at the North West corner of Claim No 11, running North 40 chains, East 160 chains, South 40 chains, West 160 chains, back to the place of beginning and containing 640 acres, more or less.

Dated May 8th, 1907.
JOHN F. L. EMBURY—Applicant.
CARL G. JOHNSTONE, Agent.

Claim No 13—Commencing at a post planted at the North West corner of Claim No 1, running North 40 chains, East 160 chains, South 40 chains, West 160 chains, back to the place of beginning and containing 640 acres, more or less.

Dated May 8th, 1907.
JOHN F. L. EMBURY,—Applicant.
CARL G. JOHNSTONE, Agent.

Claim No. 14—Commencing at a post planted at the North West corner of Claim No 13, running North 40 chains, East 160 chains, South 40 chains, West 160 chains, back to the place of beginning, and containing 640 acres more or less.

Dated May 8th, 1907.
JOHN F. L. EMBURY,—Applicant.
CARL G. JOHNSTONE, Agent.

Claim No 15—Commencing at a post planted at the North West corner of Claim No 14, running North 40 chains, East 160 chains, South 40 chains, West 160 chains, back to the place of beginning, and containing 640 acres, more or less.

Dated May 8th, 1907.
JOHN F. L. EMBURY,—Applicant.
CARL G. JOHNSTONE, Agent.

Claim No. 16 - Commencing at a post planted at the North West corner of Claim No 15, running North 40 chains, East 160 chains, South 40 chains, West 160 chains, back to the place of beginning, and containing 640 acres, more or less.

Dated May 8th, 1907.
JOHN F. L. EMBURY—Applicant.
CARL G. JOHNSTONE, Agent,

Claim No 17—Commencing at a post planted at a post 80 chains distant from the North West corner of Claim 16 in an eastern direction from said North West corner running North 80 chains, East 80 chains, South 80 chains, West 80 chains, back to the place of beginning, and containing 640 acres more or less.

Dated May 8th, 1907.

## AN EARLY CALL.

**Mark Twain's Story About His Absentminded Brother.**

One bitter December night Orion (Mark Twain's brother) sat up reading until 3 o'clock in the morning and then, without looking at a clock, sallied forth to call on a young lady. He hammered and hammered at the door; couldn't get any response; didn't understand it. Anybody else would have regarded that as an indication of some kind or other and would have drawn inferences and gone home, but Orion didn t draw inferences. He merely hammered and hammered, and finally the father of the girl appeared at the door in a dressing gown. He had a candle in his hand, and the dressing gown was all the clothing he had on, except an expression of welcome, which was so thick and so large that it extended all down his front to his instep and nearly obliterated the dressing gown. But Orion didn't notice that this was an unpleasant expression. He merely walked in. The old gentleman took him into the parlor, set the candle on a table and stood. Orion made the usual remarks about the weather and sat down—sat down and talked and talked and went on talking, that old man looking at him vindictively and waiting for his chance, waiting treacherously and malignantly for his chance. Orion had not asked for the young lady. It was not customary. It was understood that a young fellow came to see the girl of the house, not the founder of it. At last Orion got up and made some remark to the effect that probably the young lady was busy and he would go now and call again. That was the old man's chance, and he said with fervency, "Why, good land, aren't you going to stop to breakfast?" — Mark Twain's Autobiography in North American Review.

Holloway's Corn Cure is a specific for the removal of corns and warts. We have never heard of its failing to remove even the worst kind.

### COOKING A SQUASH

A correspondent of the Listener writes:—I think you will enjoy the following from our English cousins. We have laughed ourselves weak over it. A barrel was sent to London at Christmas containing apples, a Hubbard squash, some cranberries and sweet potatoes. This is from the reply: "The apples were fine, but the potatoes, alas, had gone quite bad and yellow. The cranberrie are very handsome, but seem somewhat acid to our taste. The squash was a novelty, and I daresay we didn't know exactly how to deal with it. We put it on the table for dessert, but James found it extremely difficult to cut. Later I stewed it with lemon and sugar, and we all declared it delicious."

For Inflammation of the Eyes.—Among the many good qualities which Parmelee's Vegetable Pills possess, besides regulating the digestive organs, is their efficacy in reducing inflammation of the eyes. It has called forth many letters of recommendation from those who were afflicted with this complaint and found a cure in the pills. They affect the nerve centres and the blood in a surprisingly active way, and the result is almost immediately seen.

"I heard you giggling in the library last night," said the stern parent. "I think you must have been beside yourself."

"Oh! no," said the pretty girl, blushing deeply. "I was beside Charlie."—Life.

**Minard's Liniment Cures Garget in Cows.**

### AN EVEN BREAK

There was once a sporting parson at Eastington, a place on the English coast which was a favorite landing place for woodcocks at the time of their immigration to England. When the birds arrived, exhausted by their long flight, everybody in the parish, including the parson, at once turned out to join in the sport of knocking them down with sticks. One Sunday the people were in church, and the parson in the pulpit, when the church door was cautiously opened, and a head appeared with a beckoning finger. "Well, what is it?" asked the parson. "Cocks is coom!" The parson hurriedly shut up his sermon case. "Shut the door and lock it," he cried to the clerk. "Keep the people in church till I've got my surplice off. Let's all have a fair chance."

### CRYING BABIES

Babies do not cry for the fun of it, nor is it always because they are think. Nine times out of ten baby's hungry, as so many young mothers cry indicates that his little stomach is out of order. Mothers will find instant relief for their suffering little ones in Baby's Own Tablets. A few doses will cure the most obstinate cases of constipation, indigestion or vomiting, and a Tablet given now and then to the well child will keep it well. Mrs. Mary Pollock, Gawas, Ont., says: "Baby's Own Tablets have been a great benefit to my baby. They have made him happy, peaceful and contented, when before he used to cry all the time. I have more comfort with him since giving him the Tablets than I ever had before. He now sits and plays and laughs while I do my work. What greater praise can I give Baby's Own Tablets." For sale at druggists or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Miss Pepprey—No, he didn't like your eyebrows. He said they were too black.

Miss Painter—The idea!

Miss Pepprey—However, I assured him they were not as black as they were painted.—Philadelphia Inquirer.

W. N. U. No...632.

### ON THE SCRAP HEAP

In an Irish court recently an old man was called into the witness box, and being inarm and just a little blind, he went too far in more than one sense. Instead of keeping up the stairs that led to the box, he mounted those that led to the bench. Said the judge, good humoredly:

"Is it a judge you want to be, my good man?"

"Ah, sure, your honor," was the reply, "I'm an ould man now, and mebb it's all I m fit for."

The judge had no ready retort.—Tit-Bits.

**Minard's Liniment Cures Colds, etc.**

A lady returned from the country to find her town garden denuded of all bulbs and plants, and a few months later a very worthy old woman told the lady's former housemaid that she had taken the flowers.

"People was beginning to steal 'em, my dear, and I felt sure your missus would rather they was took respectable."—Nursing Times

**Cellu-loid Starch**

Saves time, because it makes ironing easier. Saves linen, because it gives a better gloss with half the iron-rubbing. Saves bother, because it needs no cooking, .. just cold water. And it CAN'T stick. Buy it by name.

Saves Plenty

**Look into this roofing question**

Get book on "Roofing Right" and see how little risk you take when you roof any building with

"OSHAWA" GALVANIZED STEEL SHINGLES

Sold under a plain GUARANTEE that keeps your roof good for 25 years. With decent care, an Oshawa-Shingled roof will last a CENTURY.

**Easy To Put On**

With a hammer and a snips (tinners' shears) anybody can put Oshawa Shingles on perfectly. Locked on all four sides—see the side lock? It drains the shingles so that water can't seep under. Top lock (see below) makes whole roof practically one piece and sheds water quick. Made in one grade only—28-guage semi-toughened steel, double-galvanized (saves painting).

**Wind-water-and-fire-PROOF. Keep buildings safe from Lightning. Cost only $4.50 a square (10 ft. x 10 ft.)**

Send for booklet and learn how little a RIGHT roof costs. Address

The PEDLAR PEOPLE Of Oshawa

Montreal 321-3 Craig St. W. | Ottawa 423 Sussex St.

makes your life a burden.

**Johnson's Anodyne Liniment**

dropped on sugar will cure it, and cure as well colds, cramps and all throat troubles. For Internal as much as for External use. 25c., three times as much 50c. All dealers. I. S. JOHNSON & CO., Boston, Mass.

"There's one thing I will say," remarked Mr. Millions, "and that is that my daughter, Arabella, has a fine disposition."

"Indeed!"

"Yes, sir. The way she can listen for hours to her own playing on the violin shows remarkable self-control."—Tit-Bits.

Count Itagaki, a Japanese nobleman, proposes the abolition of the nobility in that country.

**Minard's Liniment Cures Diphtheria.**

An important conference was held at the White House at which the railroad situation generally was discussed.

**$200.00 IN CASH**

AND NUMBERS OF VALUABLE PREMIUMS **GIVEN AWAY FREE**

Not One Cent of Your Money Required. Read Carefully if You Wish to Earn Part of the Above Amount.

Can you arrange the sets of mixed letters below, into the names of six well known wild animals; if so you can share in the distribution of the above Prize: Try: It is no easy task, but by patience and perseverance you can probably find three or four. It means money to you to do so.

To the person who finds the largest number of names, we will give the sum of One Hundred Dollars ($100.00) in Cash. To the person who finds the second largest number we will give the sum of Fifty Dollars ($50.00) in Cash. To the person who finds the third largest number we will give the sum of Thirty Dollars ($30.00) in Cash. To the person who finds the fourth largest number we will give the sum of Twenty Dollars ($20.00) in Cash. Should two persons send in equally correct answers for the first prize, the first two prizes will be equally divided between them, each receiving the sum of Seventy-Five Dollars ($75.00). Should three persons send in equally correct answers the first three prizes will be equally divided between them, each receiving the sum of Sixty Dollars ($60.00). Should four persons send in equally correct answers the whole sum of Two Hundred Dollars ($200.00) will be equally divided between them (each receiving Fifty Dollars ($50.00). And so on in like proportions. In order to help you a little we have put a mark under the first letter of each name.

DESCRIPTION OF PROPERTIES.

1—The S.-W. 1-4, of the N.1-2, Lot 5, Con. 4, Bucke Township., 36½ acres. 2—The S.-E. 1-4, of the N. 1-2, Lot 5, Con. 4, Bucke Tp., 37 acres. 3—The N.-E. 1-4, of the N. 1-2, Lot 8, Con. 2, Bucke Tp., 40 acres. 4—The W. 1-2, of the N.-W. 1-4, of the N. 1-2, Lot 25, Con. 4, Coleman Tp., 20 acres.

Since the rich strike the Directors have decided on selling only 200,000 shares. The first shipment will be made in about 90 days and the amount that will be realized therefrom and the stock sold up to that time will be sufficient for all development purposes. The balance of the stock will remain in the treasury insuring larger dividends on small amount of stock issued.

STOCK STILL OFFERED AT PAR

One Dollar per share. The rich strike on property No. 1 continues to improve and the vein has grown larger. The vein since the first assay published ($2,782.60 per ton) has shown higher values during the last few days. Report just received from Superintendent shows that the ore received from property No. 2 promises to assay as well as our rich strike on claim No. 1.

We have a most excellent proposition worthy of your investigation. We do not want you to wire us your money, nor do we want you to send us your subscription until after the most thorough investigation. Space is too costly in an announcement of this sort to give full explanations. We want you to purchase all the stock that you can conscientiously carry but not until you have satisfied yourself what a good proposition we have. The stock is payable in four equal monthly payments and our guarantee given below fully protects you.

WE GUARANTEE

To every applicant for shares to buy back their stock at price purchased from us any time within thirty days if the proposition on investigation does not prove to be exactly as represented. Write us today for full information, maps, copies of assays, etc. This is an unparalelled opportunity.

GORMALY, TILT & CO.

MEMBERS STANDARD STOCK EXCHANGE, TORONTO, CANADA. ESTABLISHED 1892.

**"PAGE FENCES WEAR BEST"**

Made of High Carbon Wire,—we'll prove it to you. COILED—not crimped. This makes it still stronger in service. It stays taut. Painted WHITE over heavy galvanizing—rust proof. Experienced dealers to erect it. Leads all in sales 200 —as in merit. Get illustrated booklet and 1907 prices before buying.

# The Practical Application of the Stenographer's Knowledge

## HOW TO ACHIEVE THE GREATEST RESULTS IN THIS BRANCH OF WOMAN'S INDUSTRY

*By Cynthia Westover Alden*

Copyright, 1905, by A. S. Barnes & Co.

NOW a word as to the different sources of employment when you have learned your profession. Business firms employ perhaps four-fifths of all who are employed. The age of the typewriter has come upon us almost stealthily, so that it is bad form to send out letters in somebody's doubtful handwriting. The man or the firm that does it is set down at once by its correspondent as either very eccentric or very hard-up. No matter which may be the supposition, it is one that repels trade. Therefore, in a general way, it may be said that if you know of any business house that has no typewriter at work for it, there is a chance that you may be afforded a job there, if you can make terms with the management.

I need not dwell on the necessity of accuracy in such work. Remember that every letter is a contract if it quotes prices or promises anything; that your employer can be held in a court of law to the performance of what your typewriter makes him promise to perform. If he dictates to you, "our price for such and such silk is 75 cents a yard," and you write out the letter "$.35," and he signs it without reading too carefully, the receiver may answer, "Ship me 1000 yards of such and such a silk at quoted price," the silk may be shipped, and no court will compel the buyer to pay more than was asked. The loss will be $400 from that one error. It might be ten times as much if the figures were multiplied. And there are recorded cases where $4000 or $5000 has been the penalty for just as simple a slip.

I know the reader will pardon me for going into the concrete in this way. It is so much easier to grasp than abstractions. It is meant only to impress you, when you have once got a business place, with the idea that on your accuracy great interests may hinge. There are one or two other suggestions which I want to make about this sort of a place as stenographer and typewriter.

### General Usefulness

The work of taking and writing out letters will not use up all your time. You will probably be asked to do things about the office, to assist in other ways between times. A man would certainly have even more of such demands if he were in your place. Remember that. And don't do what is asked of you as if it were a favor, as if you were being imposed upon. Do it always as a matter of course. The more you know about the way that business is run the more likely you will be to keep your job and have your wages increased. There is no instance that I know of where any woman in your place has ever got more than $15, except as a reward for this sort of interest in the employer's business. There's a deep lesson in that statement of fact. Read it over again. It will bear repeating.

Clergymen, lecturers, authors and newspaper editors have use for stenographers. The man who has prepared the thought of a sermon finds a great relief in being able to dictate the verbal crystallization of that thought to some one else, and having it come back to him in cold, legible typewritten form. He will demand a lot of patience from the stenographer. He will order a sentence stricken out; he will partially reconstruct another; he will change an adjective every now and then, and, worst of all, he is likely to make so many changes when he sees what he has said, that the matter has to be all rewritten. Never mind. That is what you are there for. He must use your services in his own way.

You will find the same annoyances in working for an author or lecturer. In all three phases of the occupation you will also find your hours subject to the whim or mood of the employer. There will be less of this in what an editor will ask of you. General information is of great assistance here, and a knowledge of reference books, where you can find what you never knew, or what has slipped your memory, is invaluable. You write the sound, but your copy must contain only words of the English language, and names or mythological references often compel the oldest hand to have recourse to the cyclopedia.

### Law Stenography.

Another and even larger field is law stenography. This does not call for quite as much general information as the branches just considered, but it is like business stenography in insisting on accuracy, and for the same reason, that errors are costly. Deeds, wills, papers in summons and complaint, and important contracts are copied in law offices. Thousands of dollars may depend on correctness, even in punctuation. The strain is great on any one who realizes this, and one who doesn't is worthless. But arguments for the court, or pleas for jury, are often to be dictated, and their scope covers a wide range of human information. It is not wise to interrupt the dictator. You must depend on yourself, even where the language used is technical and you feel that you are walking amid pitfalls. The reward is that you get good wages sooner than almost anywhere else, and that you can quickly make yourself nearly indispensable, for there are not many good law stenographers in the business.

### When Fitted.

Court stenography is a different thing. I know of no case where this is done in a court of record by a woman. The positions are public ones, their salaries are fixed by statute, and they are filled, more or less, by political influence.

When you think yourself fairly fitted to do ordinary work, that is, when you have attained a real speed of 120 words a minute, can write out notes correctly, and can manipulate the keys of a typewriting machine readily and effectively, you will hunt for a place. If you are in a large city, you will do well to advertise, understating rather than overstating your qualifications. You should also answer advertisements, never getting discouraged at a failure. You will locate somewhere, if you have patience.

But even in a village there are possibilities. Suppose there are ten or a dozen small merchants in town, and not one of them has ever sent out typewritten letters. Each one would like to, if he could afford to employ a stenographer. You may be able by dividing your time, to handle the small correspondence of half a dozen of these, to make it inexpensive for each, and to give every one the advantage of having his letters legible and businesslike. In the same way, the local clergymen might be available on a combination basis.

In concluding this instalment let me recapitulate some of the inexorable demands of the profession as mentioned above.

First—Good spelling.

Second—Knowledge of English grammar.

Third—A speed of 120 words a minute, with readable notes.

Fourth—Practical familiarity with the typewriter.

Fifth—Fairly good general information.

Sixth—Conscience that makes an error almost a crime.

Seventh—Personal dignity in your relations with men or women as employers or fellow-workers.

If you have all these, you will succeed in making a good living at the trying occupation of a stenographer and typewriter.

# DETECTING IMITATIONS --- HINTS FOR THE AMATEUR

THE detecting of imitations in various goods is an art that would stand any woman in good stead—or a man, for that matter. In fact, merely as a matter of general information, it is a valuable asset whenever one has not the integrity of some established house or person to depend upon for judgment.

Speaking first of the diamond, the expert's eye, without applying any tests, will tell at once the genuineness of a stone. A real diamond is opaque; you cannot see through it at all. Whereas the imitation is largely transparent, or, at the best, translucent. Moreover, the real diamond is an absolutely perfect reflector; that is, whatever the light may be that it is in, it reflects truthfully, and that with perfect brilliancy. So that daylight is the best in which to test the stone, for even in that pure, searching light, the diamond reflects the white, clear rays. An imitation, under such circumstances, has what the expert calls a "dead centre"; there is no brilliancy nor fire; it is dead. It may be remembered that imitation stones are always exhibited in a room brilliantly illuminated with artificial light, to lend all brilliancy possible. In honest daylight the diamond can bear the scrutiny of an eye; though, of course, it is specially brilliant when under a number of light sources, such as the myriad lights of a theatre or the dancing rays cast from above by the leaves of trees.

One crude test of a diamond is the file. It makes no impression whatever upon the real stone. Many clever "fakes" will demonstrate ostentatiously upon an imitation, seeking to prove by the file test that it is the real article. They heat the file, thus taking the tempering out of the steel, so that it cannot affect the imitation.

A perfectly cut diamond has fifty-eight faces, or facets (the planes), which number is the best for brilliancy. Also, two-thirds of the stone's height should be under the girdle (the circular edge) or belt, and one-third above. Many people experience an uncomfortable surprise when a stone breaks or chips. This casts no reflection whatever upon its genuineness. It is only an unfortunate circumstance. The diamond has a grain, or certain weak spot, which, with perhaps the slightest touch and at the most unexpected moment, will part it or chip it, when, under ordinary circumstances, it could be pounded all day with a steel hammer and come out unharmed.

The best test for a sapphire is to hold it up to the light, with the lower point toward the eye. If it is an imitation, a red circle appears around the girdle. In a ruby the same test may be applied, with the opposite result; a blue circle appears, if it is an imitation. In testing an emerald, the imitation presents a brownish red circle. The file test also may be used here. One means, which, however, is not reliable in every case, is to seek an imperfection in an emerald. Nearly all the real stones have them; it is next to impossible to obtain an absolutely perfect emerald. The French imitations are specially good, for they are careful to have the imperfections. So, should you find a perfect stone, it is either a cheap imitation or a gem of almost priceless value. Rather an amusing situation!

Perhaps the most interesting jewels are the so-called limestones—the opal, the turquoise, for example. It may be remembered that the opal is softer and more brilliant in damp, warm weather. This is due to the limelike qualities of its elements; it absorbs moisture and is affected by heat, which conditions add noticeably to its brilliance. It is soft and brittle, and acts very like a plant; when kept dry and cold, its life seems to droop and wither, and its fire grows dim; and yet it responds instantly to warmth and moisture, glowing with indescribable beams. The turquoise acts the same way, though in its "live" moments, it is a rich, pure blue.

### Clever Mexican Trick

An interesting example of this trait of the opal is seen among the Mexicans. On the border of the country the natives in possession of stones cluster about the points where travelers enter and besiege them to buy the gems. They claim to have smuggled them, and so sell them cheaply. However, they are not above resorting to a sly trick to raise the price on the spot. One has buttonholed a traveler, or, perhaps, is entertaining a party with his soft, glib-tongued persuasions. He whisks a jewel from his mouth, and, presumably to remove the moisture, vigorously rubs it on his coat for a few seconds. There you are—moisture and heat (by the rubbing), and before the interested traveler is a precious stone, aglow with beautiful fire and soft, myriad-colored lights. If he is a sensible man, he buys and chuckles about his bargain. However, a little later on he is not a little puzzled at the way that opal acts.

### Metals and Shells

Coming now to precious metals, gold, of course, cannot be imitated, except in platings and compositions of brass. The unfailing test is the use of muriatic or nitric acid. In the first place, "virgin" gold, as it is taken from the earth, is rated as "24 karat"—absolutely pure. The ancient artists of India use about a 22-karat gold. However, this is considered [illegible] Western world too soft for practical purposes, and the virgin gold is alloyed. The percentage of the alloy (copper for red gold, silver for yellow) makes the karat—18-karat, 14-karat, 10-karat and so on. United States money, by the way, is about 20-karat. This alloy gives firmness and strength to the gold without robbing it of its beautiful color.

When acid is applied to 24-karat gold (virgin gold) it has absolutely no effect upon it. So, according to the amount of alloy will the acid create a disturbance. In the presence of much alloy the acid makes a brown stain, and on down, proportionately, in deepening shades to red. When applied to brass, there is a green stain, with bubbles—a sort of effervescence. The only test for "gold-filled" articles is to cut them in half, or by weighing them. Gold-filled means two sheets of gold, with a layer of composition between, usually of copper and silver. This method is popular for watchcases and pins.

To the inexperienced, tortoise shell may seem to baffle all efforts to "tell which is which." But it is not so. Of course, the expert can tell almost instantly; but the amateur, with care and strict attention, can soon detect an imitation. Appearance, touch and smell are the clues. The practical observer will notice as he looks at the shell from each side that the brown and yellow markings go through sharply, with no tapering. The mottled effect is copied with chemicals applied to the horn, while heated rollers and pressure send pigments through celluloid, but in neither case does art equal in delicate beauty the work of nature in producing the shells. There is a clean, pleasant feeling to shell that is not found in the imitations. The horn and bone combs are likely to have a clammy feeling to the touch or a suggestion of grease. This feature is sometimes noticeable to the eye."

There is a popular method of using the smell test. Rub the shell vigorously on a piece of cloth or the hand till warm; if it is imitation, it will smell of camphor. The heat brings out the odor.

"Tortoise shell does not yield to heat below the boiling point. Hold a comb, and if the heat of your hand so affects the teeth that you can bend them easily to other shapes, you have celluloid or some other material. Shell is almost as elastic as a Damascan blade." Another point to note is that the teeth of imitation combs are always more or less curved, while the real shell teeth are straight, yet comfortable and firm in the hair. The chisels in the machine that cuts out the teeth are set at an angle so that they make wedge-shaped incisions, the sharp ends of the teeth in one comb coming from the roots of adjacent teeth, in another comb, thus avoiding waste.

A word here about the care of real shell combs might be timely. There is more or less electricity and oil in the hair; so the combs should be wiped carefully at night after being removed from the hair. Use a soft, dry rag, and the combs will retain their inimitable clean, polished appearance.

It is a simple matter to tell real ivory. The camphor test may be applied here, too, but the facts that ivory has a perceptible grain, is a rich, pure cream color, is heavier than any imitation, make enough information to protect a buyer in search of the real article.

Furs form another commodity that is widely imitated. Summing the matter up, they are either very excellently imitated or very badly; in the latter case no novice needs any "tips." And the good imitations are at the mercy of only the expert's eye; it is difficult to mention any special point. But it is the in-between imitations that may be spoken of. Coney is a fairly good imitation of ermine; but the hair, longer, lacks the fine, silky qualities, and easily "roughs." Black tips are sewed on to imitate the tails. Electric seal, the imitation of sealskin, has a longer, blacker, coarser hair than the real skin, though sometimes the real skin is dyed black. The imitation mole skin is dyed musk rat. But it has not the soft, silvery shades of the real skin, and is less silky.

There are imitations galore of everything; but, perhaps, these few suggestions in regard to the most valuable of life's commodities will help when one goes shopping about the world.

# Recipes Originated by Marion Harland

### A "Starter" for Bread.

"TELL 'Young Housekeeper of 19' to get a cake of yeast foam and dissolve it in half a cup of warm water. Have ready a quart of warm water in which potatoes have been boiled, mix into it the dissolved yeast, add half a cupful of sugar and let the compound rise until it is light. It will foam high, looking like soap suds. It is then ready for use. Save a little for the next baking, adding more sugar and potato water. I have this 'starter' made three years ago, and it is good still.

"I set it at noon, and at bed time I mix the bread. It is beautifully light by morning. In summer I use cold water for mixing bread. 'Young Housekeeper of 19' may write me if she would like to know more of the 'starter.'

"Mrs. F. B." (West Falls, N. Y.)

### Kidneys a la Creole.

(A West Indian recipe.)

Wash and skin lamb kidneys, dry them and leave on ice. With a sharp knife cut into neat dice two small onions, a carrot, a green pepper that has been scalded and allowed to cool, and a firm large tomato. Heat to a bubble a great spoonful of butter in a frying pan, add the minced vegetables and cook for five minutes after the contents begin to boil anew. Then add a tart apple cut into dice, season with salt, paprika, and a tablespoonful (scant) of curry powder. Stir into a cupful of good stock a tablespoonful of browned flour and cook together, stirring to prevent lumping until the stock thickens. If you have no stock, use hot water. When you have done this, cut the kidneys into small pieces, fry for three minutes in hot butter, and add to the heated vegetables. Boil up once, add the thickened stock and simmer all together five minutes before serving.

Mrs Rundle, (Alexandria, Virginia.)

### Stuffed Peppers.

Cut the peppers in half, remove the seeds with care, not touching the sides with them, and lay the halved shells in boiling water. Let them get cold in the water, then drain dry and set on ice until you are ready to cook them. They should be firm and in good shape. Stuff each half with a well-seasoned mince of cold chicken or lamb, made soft with gravy and mixed with one-third as much boiled rice, or bread crumbs, or cold cooked green corn, as you have meat. Round the forcemeat on top; arrange the shells in a bake-dish, pour a cupful of gravy about them and bake, covered, for half an hour, then brown lightly.

Peppers stuffed with cold fish are nice. You may vary the recipe given above by filling them with green corn, boiled, cut from the cob and seasoned with butter, pepper and salt.

They make a delicious vegetable entree.

### Codfish and Cheese Sauce.

Cut a neat square or oblong of codfish; lay in salt and water for half an hour; wipe dry and rub all over with melted butter and lemon juice. In the bottom of your baking pan, under the grating and just not touching the fish, have a cupful of veal stock or weak gravy, strained. Pepper and salt the fish; cover and bake ten minutes to the pound. Take up then and sift dry, fine crumbs thickly all over it. Put dots of butter on these. Set in the oven, uncovered, to brown while you strain the gravy from the pan. Thicken with butter rolled in browned flour, add the juice of half a lemon, four tablespoonfuls of grated Parmesan cheese and a little onion juice. Boil one minute, pour a few spoonfuls carefully upon the fish, the rest into a boat.

# ADVICE TO CORRESPONDENTS BY MRS. HENRY SYMES

### *To Clear the Complexion*

MARGUERITE—I cannot express an opinion upon the tablets you mention, since I know nothing of them, for or against. I advise you to try the remedy as published in this department, since it has benefited so many of my correspondents. Take the formula to a thoroughly reliable druggist, and he will prepare it for you.

Try this method of clearing your complexion:

Rub the face over, just before washing it, with two teaspoonfuls of flowers of sulphur mixed in half a pint of new milk. This mixture should stand at least fifteen minutes before using.

I have several recipes to lighten hair, but the one you quote is as good as any. If you are troubled with dandruff, try the remedy suggested to "Mrs. C. B. C."

### *Stubborn Freckles*

Kindly give me a prescription for freckles of very long standing. They are half way up my arms and all over my face.

K. O. U.

**Whitening Paste for Freckles and Brown Spots.**

Salicylic acid, 60 grains; bay rum, 4 ounces.

Apply night and morning with a soft cloth or sponge. This lotion soon produces a slight roughness of the skin, which should be subdued by the use of glycerine or starch.

### *To Increase Height*

Will you kindly answer these questions? I am 18 years old and am about four feet six inches tall. How am I to grow just a little more? What exercise could I do that would help me to grow taller? How can I reduce my hips and legs, as I have very large bones? What kind of cream should I use for my face? It is very rough and has small pits in it V. P.

I have heard of methods to increase one's height, but I am not at all familiar with them. In such a case, I can only advise you to go to a specialist. I give you below some exercises to reduce hips and legs.

**To Reduce the Hips.**

Place hands on the hips, shoulders well back. The leg is raised with knee fixed. Then, after a high, quick side kick, bring the foot back again to the floor. This is to be repeated several times.

To reduce the legs, I would suggest that you walk as little as possible (taking other exercises, however), and bathe your legs frequently with clear alcohol or warm vinegar.

Here is the skin food you ask for:

**Skin Food.**

White wax, 1 ounce; spermaceti, 1 ounce; lanolin, 2 ounces; cocoanut oil, 2 ounces; orange-flower water, 2 ounces; oil of sweet almonds, 4 ounces; tincture of benzoin, 30 drops. Melt the first five ingredients together. Take off the fire and beat until nearly cold, adding, little by little, the benzoin and lastly orange-flower water.

### *Flabby Skin*

I am 40 years of age; am I too old for Vaucaire treatment? Would you kindly advise me what to use to restore face and neck to good condition, and how to use it?

I have been much stouter, but owing to trouble, now removed, lost twenty-five pounds, although my general health is good. My face and neck are very flabby, and the skin wrinkles with the movements of the head; my throat, too, is in a similar condition.

If you could tell me of some harmless method to restore my skin to its former firmness, I would be very grateful indeed, and would faithfully adhere to any advice you might give. Mrs. E. S. B.

I am sure the Vaucaire treatment would have only benefit for you. You need not be afraid to try it.

As to your skin and general appearance, try these general rules:

**To Gain Flesh Generally.**

Absolute freedom from care and anxiety. At least ten hours' sleep out of every twenty-four. In addition to this, naps during the day if possible. This sleep must always be natural. Nothing is so bad for the appearance and general health as sleep induced by anodynes or narcotics in any form. The diet should be liberal and should consist largely of food containing starch and sugar; potatoes, fresh, sweet butter, milk, cream, fruits cooked and served with sugar, all vegetables containing starch and sugar, such as corn, sweet potatoes, beans, peas, foods of the macaroni and spaghetti kinds, fish and oysters, ice cream, desserts without pastry; plenty of outdoor life and a moderate amount of exercise. Sleep in a well-ventilated room. I do not believe any one can gain flesh if there is an internal disease; certainly not if there is any tendency to dyspepsia or liver trouble. Where the patient is plump in one part of the body and falls in another a gymnastic course is advised. There is nothing better than bicycling, unless it may be a regular gymnastic course. In order to pursue the latter properly the patient is advised to go to a first-class gymnasium, submit to an examination and take the exercises prescribed by the attendant physician. These gymnasiums, at moderate prices, may be found in a town of any size in the country. Where the development is meagre in the upper part of the body, swimming is also an excellent exercise. Walking is always wholesome. The patient who wishes to gain flesh can never do so if she worries, is harassed or permits her nerves to get the better of her.

Dashing very cold water on the face and neck several times daily, and then rubbing briskly, does much to make the skin firm. Massage your face and neck with this skin food:

**Cream of Sweet Oranges.**

(A Skin Food.)

Two ounces sweet oil of almonds.
Two ounces orange-flower water.
Two drams white wax.
One dram oil of sweet orange.
Two drams spermaceti.

Half fill a saucepan with boiling water. Stand a jam jar in this. Shred the wax and spermaceti into the jar. Let it dissolve. Heat almond oil and add to the wax. Heat orange-flower water; add it half a teaspoonful at a time, stirring the mixture quickly. Lift the jar out of the saucepan. Beat mixture with the whisk. Heat and add oil of sweet orange. Whisk cream until it is cold. Put in pots and cover with parchment.

### *To Relieve a Red Nose*

You had a recipe in the paper about six months ago for something to whiten the nose. I have been bothered with a red nose for some time, otherwise I am in perfect health. J. S. S.

A red nose is usually caused by indigestion. You should be exceedingly careful as to what you eat, and how you eat it. Fresh, tender meats are good; fresh fish, also, and an abundance of vegetables and fruit. Fried foods, highly seasoned dishes and sweets are all mischief makers. Avoid them. Drink plenty of pure, cool—not cold—water. Eight glasses per day is the least amount required. Drink the water between meals, not with them.

Take a full bath from head to heels each twenty-four hours. Get plenty of fresh air and exercise, and sleep in a well ventilated room.

You might also apply local treatment to your nose. Try massaging vigorously along the leading nerve of the nose at each side. Use the tip of the finger, start at the bottom and rub up the nose on each side, and then under the eyebrows. Following the nerve in this way is sure to relieve congested circulation, which is often the secret of that unpleasant redness which comes to the nose. If it is extremely red, massage the temples and cheeks, also, using a brisk, vigorous movement.

When treating a red nose, be careful not to touch it with water. Instead, bathe it night and morning with cream.

### *To Reduce the Bust*

Having heard of your good advice to others, I thought I would ask you to please give me a recipe of something that will reduce the bust which will be harmless.

A. M. L.

Bathe the bust every day with clear alcohol or warm vinegar. Applications of cold water also help to make it firm. Use the following pomade:

**Pomade to Reduce the Bust.**

Iodide of potassium, 3 grams; vaseline, 50 grams; lanolin, 50 grams; tincture of benzoin, 20 drops. Make into a pomade and rub all over the fat parts twice a day.

### *Unknown Formula*

ELLA.—I know nothing of this formula you speak of, so cannot recommend it to you. However, I can assure you of the efficacy and safety of the remedy made from the formula so frequently published in this department.

### *The Shape of Her Nose*

I would like to know if there is any way of changing a pug nose to a straight, or, at least, to any other kind that does not turn up. I am in my teens, and so think that there is a chance of changing the shape of my nose while it is still soft. I hope you can give me some encouragement, at least.

SUBSCRIBER.

Much can be done with the shape of the nose by personal effort, particularly in youth. There are movements and manipulations by which the shape of the nose can be changed gradually. It is best, however, to get the advice of a specialist about this matter, for it would not be well to adopt treatment that was not exactly right.

### *Hair Grows Low on Neck*

Your kindness to a fellow-sufferer gives me hope that you may be able to help me. My hair had grown down on my neck so far on either side in the back that a collar was annoying, so I used a depilatory, and now it is so bad I am ashamed to go out anywhere. Have used ammonia and peroxide for six months without any success, so will you please tell me of something else, as I am almost in despair? Mrs. C.

If the methods you speak of have so far been unsuccessful, I advise you to consult a specialist at once.

### *The Vaucaire Formula*

Will you kindly publish the prescription of Dr. Vaucaire's remedy to enlarge the bust; also directions how to use it? J. C.

**Dr. Vaucaire's Remedy for the Bust.**

Liquid extract of galega (goatsrue), 10 grains; lacto phosphate of lime, 10 grams; tincture of fennel, 10 grains; simple syrup, 400 grams.

The dose is two soupspoonfuls with water before each meal.

Mrs. D.H Stewart and family have gone to reside in Vancouver.

On July 12th the local Orange Lodge intend to visit New Westminster to celebrate their anniversary. An excursion is being prepared.

The report that Albert Edwards. known among the boys as "Big Ding" had met death by accident while riding on a train, appears fortunately tor that gentleman not to be true. He is at Scranton, Pennsylvania, alive and well. A letter was received from him a few days ago by one of our citizens.

Rev. H. S. Hastings filled the pulpit of the Methodist church on Sunday for the first time.

Mrs. Mellado left on Friday morning on an extended visit to her daughter in Calgary.

After his long sickness Mr H. Mitchell, his many friends will be pleased to see, has once more resumed his place beside the anvil.

and

General Hardware

Mrs. Horbury, and her grand daughter, little Miss Charlotte Jaynes, left on Friday on a visit to Mrs. W. Anderson, Maple Creek, Sask. They expect to be gone for several months.

Mrs. Rutherford, who has been visiting her brother, Mr. Wm. Coundley, for the past few days, returned home to Cumberland Tuesday night.—Herald.

Mr. C. J. Moore, merchant of Comox, accompanied by his wife, arrived in town yesterday, and this morning will leave on a few months' visit to relatives in Dutton, Ont.—Herald.

Mr J.B. Bennett, principal of public school here for the past ten years has decided to leave Cumberland. We understood Mr. Bennett will take charge of North Vancouver school next term.

Mr. Smith of Rutherford, LeMessieurs & Smith, Vancouver, received a telegram on June 5th from Mr. LeMessieurs that work on the V&Y road through the Hastings townsite has begun. The telegram was shown us by Mr. Dobeson on Friday last.

Mr. George Tarbell accompanied by Miss Tarbell returned last week from California. Mr Tarbell has graduated with honors from Leland Stanford.

Nanaimo Io—The biggest pay in the history of local mines since advent of the Western Fuel Co. was paid out Saturday the amount on good authority is said to be $107,000

Mr. F Dalby is confined to the hospital.

## LIQUOR LICENCE NOTICES

NOTICE IS HEREBY GIVEN that I intend to apply, at the next sitting of the Licence Board, City of Cumberland, for a wholesale licence for beer and liqnors for my premises on Dunsmuir Avenue.

F. SCAVARDO.

Notice is hereby given that I intend to apply at the next meeting of the Licence Commissioners of the City of Cumberland for a renewal of my liquor licence for the Waverley Hotel situate on Lot 2 Block 3, City of Cumberland.

R. Coe, Snr.

Notice is hereby given that I intend to apply at the next meetinn of the Licenc Commissioners of the City of Cumberland for a renewal of my wholesale liquor licence for my premises on 2nd Street, Lot 12' Block 6.

John Marrochi,

Notice is hereby given, that at the next sitting of the Licence Commissioners of the City of Cumberland I intend to apply for a renewal of my wholesale liquor licence for my premises situated on Dunsmuir Ave.

Cumberland B.C.

FRANK DALLAS

Notice is hereby given that at the next sitting of the Licence Commissioners of City of Cumberland I intend to apply for a renewal of my liquor licence for the Cumberland Hotel, situated on Lot 1 Block 6, Dunsmuir ave Cumberland.

Diana Piket.

Notice is hereby given that I intend to apply, at the next sitting of the Licence Commissers for a renewal of licence of the New England Hotel, situated on on Lot 3 and Block 3, Cumberland.

Thos. Dwyer.

Cumberland, B C. June 1st '07

Notice is hereby given that I intend to apply at the next meeting of the Licence Commissioners of the City of Cumberland for a renewal of my liquor licence for the Vendome Hotel, situated on Lot 5, Block 3, Cumberland.

C. Ganner.

The marriage took place at Yale, B.C., on Tuesday evening of Miss Lydia McDonald of Comox, and sister of Mrs. Greenshields of this city, to Mr. Fred Richardson of Vancouver, traveler for Ames Holden and Co.—Herald.

Notice is hereby given that at a special meeting the Licence Commissioners to be held at Courtenay, B. C. the date of which will be published 14 days before the said meeting, I intend to apply for a transfer of the liquor licence I now hold to sell liquors by retail at the Riverside Hotel situated on Lots 55 and 58, Courtenay, to Otto H. Fechner.
