PRICE 10 CENTS

STRIKE AT THE
TYEE MINE

Encouraging Find at the Local Smelter Company's Vancouver Island Property

A New Lease of Life to the Well Known Mount Sicker Mine

Mining men and the public generally who have followed the career of the Tyee Copper Company, Limited, will be pleased to learn that while crosscutting south from the main shaft at the thousand-foot level, three feet of low grade copper ore has been run into, says the Victoria Colonist.

During the past two weeks development has been carried forward at the thousand-foot level of the Tyee and a cross-cut has been run in a southerly direction, resulting in striking the ore, the first ever encountered at depth. Below the 300-foot level the workings have followed a barren lead, and General Manager Clement Livingston has always contended that the vein had faulted and would be found far in the south. If the ore continues as well as it has started to imply a new lease of life to this well-known Mount Sicker property.

Over the long-distance telephone yesterday Mr. Livingston confirmed the news of the strike, which he described as very encouraging.

The Tyee ships about two thousand tons per month to the company's smelter at Ladysmith. The general average of the ore treated at the smelter runs five per cent copper, \$3 to \$4 in gold, and three to four ounces silver, and carries 25 to 35 per cent barium sulphate. In the upper levels portions of the ore bodies are richer in copper than others and permit of a certain amount of sorting. The new strike resembles the ore found in the north vein, of which it is believed to be a continuation, and consists of chalcopyrite. Needless to say it is to be enclosed in a matrix of quartz and hoped the anticipations of the minority, with some time. No same-agent may be fully realized.

RUSSIAN
MILITARY
ANGERED

Tiflis, Jan. 31.—The assassination of General Gnaznols on Monday brings to a head the discontent among the faction of the military. They regard with strong disfavor the power of the Viceroy of the Caucasus in the war between the Tartars and the Armenians. They announce their determination of wiring direct to the authorities at St. Petersburg demanding an immediate change.

KILLED BY REQUEST

London, Jan. 30.—A youth named Arthur Davenport, aged 17 was recently shot dead at King's Sonborne, near Ramsey, under peculiar circumstances. His employer's son George Peddle, a lad 14 years of age, has been arrested, charged with causing his death.

Davenport was working for Emmanuel Peddle, a farmer of King's Sonborne, and he and the farmer's son were out together, having a gun with them. The father of the dead lad had heard a shot, and immediately afterward, George Peddle came running up, crying "come quick; your Arthur is dying." The father found his son lying dead. He had been shot through the right eye.

In accounting for what had happened young Peddle told the police that Davenport said to him, "Blow out my brains." Not knowing that the gun was loaded and thinking that it was all a bit of fun, he raised the gun took aim and pulled the trigger.

The New Zealanders are anxious to meet an All-British Columbia fifteen at San Francisco and if necessary arrangements can be made the fifteen will be pulled off in the Bay city. Last night Mr. R. P. Woodward received the following despatch from the New Zealanders:

PEOPLE
DISSATISFIED
WITH CASTRO

Washington, Jan. 30.—Official news has reached Washington from Paris that Franco will bide her time in her solution of the Venezuelan problem. It is believed that president Castro himself may prove of assistance to France if the reports from Venezuela regarding the dissatisfaction among the people alleged to be growing against the president are true.

The All-Blacks reached New York on Saturday last after a most successful tour of the old country. After spending a few days in the eastern metropolis they will leave for San Francisco where they will embark on one of the Pacific liners for New Zealand, sailing from the Golden Gate on Monday, Feb. 19th.

Professor Blake used to form a very picturesque figure in the Edinburgh streets. He was a cheery old patriarch with handsome features and hair falling in ringlets about his shoulders. No one who had seen him could possibly forget him. One day he was accosted by a very dirty little shoe-black with his "Shine your boots, sir?" Blake was impressed by the fitness of the boy's face. "I don't want a shine, my lad," said he. "But if you will go and wash your face I'll give you a sixpence." "All right," was the lad's reply. Then he went over to a neighboring fountain and made his ablutions. Returning, he held out his hand for the money. "Well, my lad," said the professor, "you have earned your sixpence. Here it is." "I'dinna want it, and chap," returned the boy with a lordly air. "Ye can keep it and get yer hair cut."

OFFICERS
DISMISSED
IN DISGRACE

Tiflis, Jan. 31.—By an Imperial order, the government orders governor general and the vice governor of Kutais who are alleged to have shown weakness and incompetency if not actual treason in dealing with the revolutionists at Mingrelains to be dismissed in disgrace from the Imperial employ and an investigation of their conduct has been ordered with a view to proceeding against them on a charge of treason. Advances from Latus say that the revolutionists there have not been suppressed. They have been driven from the railroad line to the mountains, and it is hoped to enclose them in a trap between the troops advancing from the sea-board and the expedition from Tiflis. Troops have been landed all along the Black sea.

The Herald says—Martin Woodburn has bought out the Vendome bar from Mr. Archie Dunlop, the change taking place last night. Martin is well known throughout this city and district, at one time being a member of the famous Hornets, the many year rugby champions of B. C. He is also well known in athletic circles, being prominent in wrestling events as well as taking a keen interest in almost every line of sport. He will be assisted in the work by G. Hardy, who is also well known in this city, and between them they will no doubt draw a fair share of the public patronage.

Dan McLeod Wins

(Montreal Star.)

Dan McLeod won from Emil Maupas at mixed style wrestling at St. Merit last night.

Apollo and the new wonder, Alex. Samson, champion of Sweden, went six bouts of ten minutes each, to a draw.

Among the preliminaries, Cote and Bamboulad wrestled to a draw and Montmarand defeated St. Armor after a lively struggle.

Everyone was anxious to see Samson. He came on with Apollo previously to the McLeod-Maupus bout and certainly proved all that was to be expected. He and Apollo wrestled for one hour with rests, and during the entire time neither had the other in danger. Apollo received a black eye during the first bout; otherwise there did not seem to be much harm done.

Apollo, too, covered himself with glory. Any man that can shake a man live Samson loose, really him half way across the mat, simply by a powerful shake of his body, as Apollo did, is worth watching. The match was fast and aggressive all the way through. Samson certainly did more execution on Apollo than any other man who has met him heretofore at the park with the single exception of Gotch. Samson seems to be more powerful than Gotch, quite as aggressive, and fearless, and possibly as quick. Theway he hored into Apollo last night, never giving him a minute's rest, was a wonder. When Samson and Frank Gotch meets, Gotch will have to look out for his laurels.

Samson challenged the winner of the McLeod-Maupus match, and will consequently go on with Dan next Friday night. Apollo will go on with Belzil and these two big fellows will make a powerful match. As to the McLeod-Maupus match, it was about one of the best ever seen in the Park. If anyone thinks for one moment that Dan is a has-been, he needs to come out of his trance. Dan was in splendid condition last night, and went through an hour and a half of the fastest work ever seen at the Park. Maupas put up a most wonderful fight, his work on the defence, in the second bout of the second fall, bringing the spectators to their feet in a wild burst of enthusiasm.

The style of the first fall was decided by the loss of a coin. Maupas winning, and choosing Graceo-Roman. He threw Dan in after 37 minutes' working him to the mat by one of his famous head twists. The next fall was in catch-as-catch-can style, and here Dan was at home. But Maupas showed himself a good learner. In the first bout he was under the whole time; in the second his defence, while on his feet, was greatly improved and this was the case during the rest of the match.

TRAIN WRECK
AT NORFOLK
FOUR KILLED

Norfolk, Va., Jan. 30.—A disastrous wreck occurred on the Seaboard Air Line railway between Hamlet, N. C., and Columbia, S. C., early today, by which four persons are officially reported dead and two others are said to have been killed. The wreck was between a northbound passenger and an extra freight train south bound from Hamlet. Those officially reported dead are:

A. A. SMETCK, Hamlet, engineer.
ANDY WHITE Hamlet.
Two unknown railroad mail clerks.

A great number went up to Nanaimo at noon to attend the funeral of the late Mrs. Smith.

NEW MUSIC MASTER

As an advertisement elsewhere in this issue will show, Mr. Frank, of Ashton, a graduate of the Guild Hall School of Music, and of Trinity College, London, England, has taken up his residence in Ladysmith. He is at present, the guest of Rev. R. J. Howen. Mr. Ashton is newly out from England, where he had great success as a music master, but taken with the immigration fever and desiring to see the great west, he left his home and has for some time been teaching music in Winnipeg, where he also played with Barcoug's famous orchestra. However, the climate did not suit his health, so he was obliged to give up his numerous pupils and come further west. Considering that there is a good opening for a music master Mr. Ashton announces that he will make this city his home and is now prepared to take pupils. Mr. Ashton is himself a first rate musician and now performs the duties of organist at the Church of England. No doubt when his merits become known he will receive a fair share of the patronage of the Ladysmith public.

In the third bout Dan had him in danger for two or three minutes at a time and no one thought it possible that he could come out safely. Nevertheless the fourth bout was almost through before he succumbed. Time 37 minutes 30 seconds.

The toss of the coin now favored McLeod, for the third fall, so that the style again was catch-as-catch-can. Emil now pushed Dan down by a leg hold and had he known what to do with him on the mat, might have won out. But Dan was generally up and away like a shot. In the second bout McLeod picked Maupas up by a croch hold brought him to the mat and worked him through in fast style for a few minutes, scoring a fall in 18 minutes.

The match was a credit to both men, being fast, swift and clever, both in aggressive and defensive tactics.

INCREASE
IN EXPORTS

Returns of Canada's foreign trade during the past six months of the current fiscal year to the end of December shows total imports of \$138,327,199, an increase of \$8,474,785, and total exports of \$130,213,810, an increase of \$21,218,023. The customs revenue was \$22,531,556, an increase of \$1,509,862. There were large increases in the exports of Canadian produce of every class excepting timber and manufactures, which latter was practically the same as 1904. There was an increase of \$11,675,953 in agricultural produce, of \$4,376,945, in animals and animal produce, of \$2,296,299 in fish and \$128,670 in minerals.

The returns for December alone show an increase of \$1,097,012 in imports and \$2,170,768 in exports of Canadian produce.

There is a possibility that an All-British Columbia Football team will journey to San Francisco in next month and play a match with the famous New Zealand fifteen says the New Advertiser.

TERJE VIKEN HAS
NARROW ESCAPE

Coming From Frisco She Was Carried Out of Her Course By the Current Now Running

SOUND OF BREAKERS ON SHORE

Gave to Captain Warning of His Danger—A Mile From the Rocks on Which the Valencia Struck

The S. S. Tirje Viken, Captain ed slowly. There was nothing to Guileken, which arrived here this tell that she was out of her course morning came within an ace of striking the same rock on which the ill-fated Valencia broke up. Coming was no current running. Had it been from San Francisco to this port not been for the cautiousness on the part of the Tirje Viken was caught in the part of the Captain it is quite probable strong westerly current which dashed on the rocks. She had been Captain Cutler informed the Ledger yesterday is now running. Capt. Guileken, who has been running current and was rapidly being carried into the rocks at a point between Cape Beale and Carmanah, but fortunately the sound of the known on the coast for years. In breakers on the shore caught the the thick fog the Tirje Viken steamers of the officers. Discovering

their danger they immediately turned out, and steaming slowly got aground in the course. The journey was a slow one, and the Tirje Viken arrived here considerably late.

Capt. Artzen, of the Telhus, which has been coasting here, also speaks of the current as the strongest in his experience on the coast, and both mariners agree with Captain Cutler that it was undoubtedly the cause of the disaster to the Valencia and both are of the opinion that Captain Johnson cannot be justly blamed.

INTERNATIONAL BASKETBALL MATCH

There will probably be a large crowd at the Opera House tonight for there is every indication that the basketball match between Lady Smith and Seattle will be one of the most interesting games that the Ladysmith public have had a chance of seeing for many a long day. The visitors are bringing with them a good reputation and will find a bunch of men who are in good shape and who know how to play the game, and what is more who are determined not to let honors leave the city.

Before the big intermediate game a local match will be played, the contesting teams being Fire Brigade and Alcomers.

Nobody should lose a chance of seeing the game of the season. Play starts at 7.30 sharp. Admission 25 cents.

VELLS STORY OF
HIS ESCAPE

Victoria, Jan. 30.—Regarding the matter of patrolling the beach, Mr. Bunker says there should have been an adequate supply of men so on the spot of which there was not, so that search could be made for the bodies and to prevent Indians from robbing the dead. The bodies drifted in at distances apart and the small number of men working on shore became thoroughly exhausted, having done with their power and they could not cover the ground. The Dominion government and the P.C.S.S.C. should have sent men, and I blame them for dilatoriness. They should have sent men adequate enough and sent parties with a launch to search the Islands. There are many individuals who deserve great credit, notably the men of the cable staff, Lineman Logan and his party, Capt. Ferris and the party from the Salvo, and many others.

When I reached shore after being thrown from the boat and losing my wife and children, I was dimly conscious, almost unconscious in fact. I dimly remember being sucked out by the undertow, and finally got straight enough to grasp a rock and then I crawled along the edge of it looking for my wife and babies. I afterwards crawled up and tried to get above high water mark. I heard a shout and knew someone else had escaped. It was Ritchie, the fireman. I crawled toward him in the darkness and soon we heard halloo, and knew that others were on shore. Soon nine of us got together, and lay on the rocks. I guess it was about 1 o'clock in the morning and pitch dark with rain and sleet falling fast. We huddled up one against the other on the rocks in the bitter cold to keep ourselves warm, and shivered until daylight. The story of how we reached the shore has been already told. I sent a telegram to the agent of marine in Victoria asking that men be sent to patrol, but only got an answer indirectly through the P.C.S.S.C., to whom my message had been seemingly been referred.

I really feel sore at the government for not taking steps quicker. The men on the scene worked prodigious, but were thoroughly fatigued and must be relieved. We organized a system for the identification of the bodies as they washed ashore. Each body was numbered and box with same number prepared to hold the effects found on the body, and as careful description as possible made, the facts being telegraphed to Victoria whence they were sent by the Associated Press. Indians were gathering in numbers when we left and those on the spot feared attempts would be made to loot, as I understand the Indians are a bad lot.

In conclusion let me state the Steamship Company has been very dilatory. The fact that no undertaker or coffins were sent until the public were at white heat leads me to say that the Company has not done all that it should. They must have known that undertakers and coffins would be necessary but it was not until Sunday that they were sent.

THE BOARD OF ENQUIRY
Ottawa, Jan. 29.—An investigation of all the facts in connection with the Valencia disaster has been authorized by the marine department. Captain Gaudin, agent of the department, will preside as commissioner, and with him Capt. Cox and Newcomb will act as assessors.

It is felt here that the investigation should be thorough and complete, and all possible steps to that end will be taken. In an interview in an evening paper, Senator Templeman says that he has been pressing upon the marine department to do something to lessen the dangers to navigation on the Pacific coast. Captain Gaudin seen after the receipt of the above despatch, said he had applied for some one to take his place on the board. Captain Newcomb, one of the assessors, is now at Port Simpson.

THREE MORE
BODIES ARE
RECOVERED

Victoria, Jan. 31. (Special.) Captain Smith, who went up the coast on the Tug Lorne, landed with Indians at the scene of the wreck of the Valencia, and recovered three bodies, two of which are identified as Mark's children, a boy and girl. Smith left a party of ten men on the beach, and they expect to recover nine more bodies tomorrow.

MOST REMARKABLE TOUR
The Greater Norris & Rowe Circus, a purely Western enterprise, has the record of making the most wonderful tour ever made by any circus in the world. During the season three countries have been visited, viz; the United States, Canada and the Republic of Mexico. During the forty-five weeks of constant travelling, the show covered nearly fifty thousand miles, going as far north, south, east and west as it is possible to go. The show visited the States of California, Oregon, Washington, Idaho, Montana, North Dakota, Minnesota, Wisconsin, Michigan, Indiana, Illinois, Iowa, Missouri, Kansas, New Mexico, Texas, Arizona, etc. The circus travelled the Canadian provinces from Sault Ste. Marie to Montreal, all of British Columbia and then visited every state in the republic of Mexico. It was the first American circus, museum, Menagerie and Hippodrome to visit that country and the tour was a remarkable one in many respects. It was at once full of picturesque incident and immense business. The governors of every state visited the show. During the nine days stay in the city of Mexico, President and Mrs. Diaz, Vice president Raymond Carroll and many of the highest officials of the republic honored the circus with their presence. The Greater Norris & Rowe circus will, as usual visit this section early next spring.

Smoke Big B. Cigars.
A clever young London lady, a Miss Evans, has devised a new kind of autograph album that is likely to be popular. It is so contrived as to enable a young lady not only to collect the autograph signature of her relatives, schoolmates, and intimate friends, but to preserve also imprints of their kisses.

The book is equipped with a little pad of a soluble carmine-tinted substance upon which the lips are first lightly pressed so as to take up a little of the pigment. Then a little kiss is imprinted upon the page in the space provided for the purpose, leaving a clear carmine record of the pressure of the lips. By the side of the kiss print space is another for the autograph and date, and together the kiss and the signature make a very precious and intimate keepsake.

The Nile mud.
The Nile mud, which renders Egypt a habitable country, is said to bear a striking resemblance to that which every season is brought down by the Missouri.

On. Meal a Day.
The majority of the natives of India eat only one meal a day.

The Steam Engine.
The original idea of the steam engine is commonly said to have been suggested by the marquis of Worcester for his "Century of Inventions." A. D. 1633.

Children in India.
The cost of maintaining a child in India is only 6 cents a day.

The Bee's Market Basket.
Every bee carries his market basket around his hind legs. Any one examining the body of a bee through a microscope will observe that on the hind legs of a bee there is a fringe of stiff hairs on the surface, the hairs approaching each other at the tips so as to form a sort of cage. This is the bee's basket.

There is nothing more expensive than experience and nothing of which there is more sold.

There are 25,000 pores in the hand of man.

HARRISON'S MONTHLY COAL REPORT

Since the S.S. Samona left on December 14th, there have been the following arrivals of Colonial coal, namely: Invercoe, 2,304 tons; Ben, 3,000 tons; S.S. Vienna, 5,500 tons; Invermark, 2,270 tons; total 13,074 tons. There are on the engaged list to carry coal from Newcastle, N.S.W., twenty-four vessels, with a carrying capacity of 70,000 tons; four of these vessels are steamers, one of which is now fully due. Last month the total deliveries of Australian coal here amounted to 13,074 tons, for same period the year previous, the total deliveries of Colonial coal only amounted to 5,865 tons. The British Columbia shipments last month footed 45,852 tons against 17,579 tons in December, 1904. The quantity of coal here now is comparatively small and we will have barely sufficient to carry us through our winter demands unless British Columbia shipments are materially increased. No change of value has been established, although the prescribed amount of coal fuel here on hand would justify a material advance in prices, besides we are just passing through an exceedingly

Write a Story of the West

that would have the true ring to it, the author would of necessity require to live there for a time at least. He must study the characteristics of the western people—have to become one of them, living their daily life, sharing their joys and sorrows. He would have to mix with them, socially and in a business way. In short he is a "Westerner." It is a question of knowing local conditions. The same reasoning applies to the "Leckie Boot" for Western Miner, the Prospector and the Lumberman.

The makers of the "Leckie Boot" are Westerners with Western experience. They know what to make and how to make it. Its not so much a question of price as of quality. Their sole aim is to make a better boot for the same money—and the "LECKIE BOOT" is it.

MAIL DELIVERED WITH- IN ARCTIC CIRCLE

Edmonton, Jan. 27.—Rural free delivery within the Arctic circle is the latest achievement of the Canadian post office and at the present time a mail is now enroute to Fort Macpherson on the Mackenzie river not far from where it empties into the Beaufort sea. Four years ago this city possessed the most northerly post office in America, but with a rush of settlers from the south it became apparent that a service must be inaugurated for those living in the north. An office was then opened at Athabasca landing and proved to be a welcome benefit to the settlers. The following year offices were opened at Inuvik north until now Fort McPherson, 2000 miles to the north of the boundary line between Montana and Alberta, has a postoffice and receives a regular service from the south, altogether it is but once a year.

Owing to the large numbers of muskies and small creeks in the northern wilds it is necessary to wait until winter sets in and then the long trip is made on snowshoes and by dog train. Little time is lost by snap of cold weather, which necessitates an increased demand for barrels in excess of the previous year, and has been a source of great astonishment to large fuel consumers on the coast, it demonstrates very clearly, that if we had not oil to rely on, we would be in a sad plight in California for fuel for manufacturing purposes. Some idea of the quantity of oil that is being annually consumed in California may be derived from the fact, that over 15,000,000 barrels is annually used for railroad purposes alone.

DAY SCHOOL.

Usual subjects taught; also language, drawing in pencil and crayons, painting in oils and water colors, pianoforte and vocal lessons given in classes or individually.

MISS BERTRAM, Ladysmith, B. C.

wasted by the "mushers" who have contracted to carry his Majesty's mails. As soon as a carrier arrives at a post office another carrier with a fresh team of huskies continue the journey. With a crack of his long whip and yells, which are unintelligible to the average person but understood perfectly by the dogs, he starts off in a trot for the far north. Enroute he delivers mail to the settlers as the post offices are several hundred miles apart. He also leaves letters for settlers, who live off the trail, sells stamps and money orders and generally attends to the business of the post. The arrival of the mail in these wilds is looked upon by the lone inhabitants as the event of the year. Wars may be commenced and ended, rulers die and succeed and many other important events in the world's history occur but they are all unheard of in the far north until the mail arrives. Two cents will carry a letter from the heart of Africa to the Arctic ocean is but one of the achievements of the progress of the times.

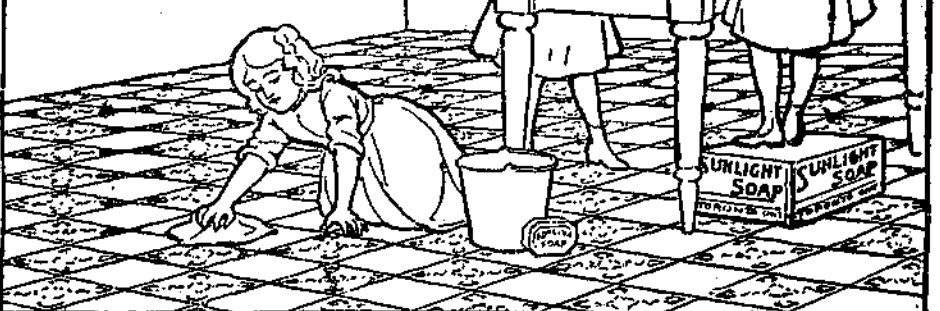

For high class stationary call at Knight's Book Store.

There is no other medicine manufactured that has received so much praise and so many expressions of gratitude as Chamberlain's Cough Remedy. It is effective, and prompt relief follows its use. Grateful parents everywhere do not hesitate to testify to its merits for the benefit of others. It is a certain cure for croup and will prevent the attack if given at the first appearance of the disease. It is especially adapted to children, as it is pleasant to take and contains nothing injurious. Mr. E. A. Humphreys, a well known resident and clerk in the store of Mr. Locke, of Alice, Cape Colony, South Africa, says: "I have used Chamberlain's Cough Remedy to ward off croup and colds in my family. I found it very satisfactory and it gives me pleasure to recommend it." For sale by The Ladysmith Pharmacy.

SUNLIGHT SOAP

Wash oilcloths and linoleums with warm water and Sunlight Soap, rinses clean and wipe dry. The colors will be preserved and the surface unharmed. Common soaps fade the colors and injure the surface. Sunlight Soap cleans, freshens and preserves oilcloths and linoleums. Sunlight Soap washes clothes white without injury to the most delicate fabrics, or to the hands, for it contains nothing that can injure either clothes or hands. Sunlight Soap is better than other soaps, but is best when used in the Sunlight way (follow directions). Equally good with hard or soft water.
