NEW SPECIFICATIONS FOR VICTORIA WORK

VICTORIA—In pursuance of his scheme of reorganization of the works dept of the city, Engineer Rust has had drafted and printed new specifications for city works, including paving, curb and gutter, concrete and other work.

Paving specifications for asphalt pavements show changes from those used last year and this. For heavy asphalt pavements, which will be laid on streets subject to heavy traffic, the thickness of the concrete base has been increased from five to six inches, the asphalt wearing surface will remain the same at two inches, but the binder course between the base and wearing surface will be one and a half inches instead of one inch. For light asphalt the concrete base will be five inches instead of four, though the wearing surface will remain at two inches. No binder course is required for the light asphalt pavements. The percentage of bitumen will also be raised from not less than nine nor more than eleven per cent to not less than eleven nor more than thirteen per cent.

Hereafter bulk tenders must be submitted on Victoria work.

WOOLEN MILLS

CALGARY—Plans are being prepared for a plant for the Globe Woolen Mills, 8th ave E. The estimated cost is $10,000.
