CONTRACT IS AWARDED FOR VICTORIA HOTEL BLDG.

Archts. Coats and Fleet have let the contract for the hotel at the corner of Government St. and Fort St., Victoria, to Metzger & Weston, contractors, at a figure totalling about $25,000.

The owner, Mr. Malone, has only a limited time in which to comply with the new license regulations, and by the time that the present lessees, Fitzpatrick & O'Connell have vacated their large clothiers store on the Government St. front there will actually be only 11 days in which to convert the whole building into a first class hotel.

As the construction will be completely fireproof, and the accommodation quite up to date with every modern convenience—telephones to every room, hot and cold water, etc.—the rapidity with which the contract will have to be carried out is apparent. In order to ensure completion within the limit there will be three shifts of eight hours. Materials fittings, furniture are all being prepared and arranged so that they can be rushed into place.

The plumbing and heating is let to L. Borde, electrical work to Chas. Chitty, and the B. C. Hardware are supplying the whole kitchen equipment. The contracts are being carried out on a percentage basis.

The Value of Spare Moments

From every section, and from all sorts and conditions of men, messages come to tell of earnings increased and futures brightened through study of I. C. S. Courses during spare time.

One letter gives the romance of a young man in California that began with little or no education; another tells the story of a high school graduate in Maine that found himself educated for everything but to make a living. Here are the heart-trobs of a fellow that toiled 12 hours a day and studied his Course as best he could; of a foremen or superintendent that enrolled because his ambition aimed at still bigger things.

No matter where you live, how little spare time you have, or how brief your schooling, the I. C. S. can raise your salary. That statement is backed with 20 years of success and a record of 400 or more advancement letters received every month.

I. C. S. Courses have made draftsmen, foremen, and superintendents of shop hands; building contractors, architects, structural and concrete engineers of carpenters and masons; advertising men, window trimmers, chemists, illustrators, and designers of clerks; electrical, mechanical and steam engineers of laborers; mine inspectors, foremen, and mining engineers of mine workers; bridge engineers, surveyors and mappers, civil engineers, gas engineers, automobile runners and civil service employees of young men willing to use their spare time to mold a career.

Suppose you were to increase your earnings only $20 a month—what a fine return that would be on your spare-time investment! Yet some have increased their earnings $250 a month.

Mark and mail this coupon and you will receive free information how you can increase your earnings by spare-time study.

to be delivered at the King's Wharf in the City of Quebec.

Plans, tender forms and specifications of this steamer can be seen at the office of the Purchasing Agent of the Marine and Fisheries Department, Ottawa, at the offices of the Collectors of Customs, Toronto, Collingwood and Port Arthur, and at the agencies of the Department of Marine and Fisheries at Montreal, Quebec, St. John, Halifax, and Victoria, B. C.

All tenders must be made with the distinct understanding that the steamer must be built in Canada.

Plans, tender forms and specifications can be procured upon application from the Purchasing and Contract Agent, Ottawa.

Drill Hall, Victoria—Proposals for the new drill hall to be erected in Victoria are being received by R. C. Desrochers, sec. of the Dept. of Works at Ottawa, until 4 p.m., Dec. 11.

Plans, specifications and form of contract can be seen and forms of tender obtained on application to the office of Wm. Henderson, resident architect, Victoria, B. C.; on application to the Postmaster at Vancouver, B. C., and at Ottawa.

Wharf, Pritchard, B. C.—The Dept. of Public Works, at Ottawa, will receive proposals until 4 p.m., Dec. 15, for the erection of a proposed wharf at Pritchard (Yale Dist.), B. C.

Plans, specif. etc., may be obtained from the offices of the district engineers at Chase, New Westminster, and on application to the postmaster at Pritchard.

Piers, Victoria—An Ottawa dispatch announces that proposals have been invited by the Dept. of Public Works, at Ottawa, for the construction of two piers for Victoria; tenders to close at Ottawa on Dec. 9, 1913, 4 p.m.

The harbor scheme calls for two additional piers. One will be next the breakwater and the fourth between Pier Three and Rithet's wharf.

The first plans called for the construction this year of Piers One and Two but owing to the work now proceeding on the breakwater it was afraid it might interfere with construction there, so it was decided to build Piers Two and Three.

The two piers will have four slips—three being eight hundred feet long; and one a thousand feet.

The piers are 250 feet wide and each slip has a width of 300 feet.

The specifications call for reinforced concrete work throughout so that the piers will be thoughly modern in every respect.

The arrangement will be as follows: On the east the breakwater, then a space that will be left vacant until that great work has been completed; then will come a pier, then a slip 300 feet wide; then another pier and then a vacant space where a fourth pier will be built. The two piers now to be built will give 3,400 feet of dockage and this will be at east doubled when the others are built, so that the present plan provides in all for a mile and 1,500 feet, approximately, of dockage.

COMPETITION OPEN.

Dept. Bldgs., Ottawa—The commission of architects appointed by the government to direct the preparations of designs for the new departmental buildings at Ottawa has just submitted its report outlining the conditions of the competition.

It will be open to competitors throughout the British Empire. There will be at least two buildings and probably a third one for the courts. Half a million superficial feet of floor space will have to be provided.

Designs of a general character will first be submitted and from this number the best six will be selected and the authors of these will be asked to elaborate their designs. The one finally selected will get the job of superintending the work based on his plans and will be given a five per cent commission. The cost of the buildings will probably aggregate five million dollars.

The other five competitors who will be asked to develop their general designs will each receive $3,000. The sketches will be received up to April 2 next. Then three months will be given for the best half dozen to develop their plans.

The competitors whose plans are accepted will be given a further period of four months to prepare working plans. Afterward tenders will be called for, but, in view of the time allowance, this will not be before next autumn.

The cost of the building will aggregate $5,000,000 dollars. The other five competitors will be asked to develop their general designs and each will receive $3,000. The sketches will be received up to January 2, next. Then three months will be given for the best half dozen to develop their plans.
