By AUGUST WOLF.

Subways, Edmonton—City Engineer Latornel has prepared plans for sixteen subways, costing $1,160,000, to be built under the main lines of the Grand Trunk Pacific and the Canadian Northern roads at Spruce, Alberta, Government, Ottawa, Syndicate, Kinistino, Namayo, Isabella, Grisbach, First, Ninth, Sixteenth and Twenty-fourth streets. The subway at Ninth Street is to cost $300,000, the others costing about $50,000 each. The cost of raising the tracks for the subways is estimated at $80,000. Track raising to a height of 12 feet is estimated to cost $2,000,000. Mr. Latornel has been instructed to prepare plans for a subway under the Canadian Pacific Railway tracks at Whyte Avenue. If the work is carried out on the Grand Trunk Pacific line before 1921 the city must bear the cost of grade separation. Until the matter of subways is decided the level crossings will be protected by gates and other safety apparatus.

Schools, Edmonton—The board of education of Edmonton has completed its programme for school buildings to accommodate 4,116 additional pupils. The details follow: Ritchie school, 12 rooms, 504 pupils; Elm Park temporary school, two rooms, 84 pupils; King Edward school, 17 rooms, 714 pupils; H. A. Gray school, 16 rooms, 672 pupils; John A. McDougal school, 17 rooms, 714 pupils; Highlands school, 17 rooms, 714 pupils. The completion of these buildings will relieve the congestion that has been a marked feature in the schools this year. It is understood that several additional schools will be erected next year.

Armory, Edmonton — Tenders have been called for an armory for the regiments in Edmonton, the estimated cost of the building being between $500,000 and $600,000. The armory of the 101st Regiment Edmonton Fusiliers was destroyed recently with the burning of the Thistle rink, the regiment's losses being placed at $30,000, of which $15,000 is on building. The new building will be practically a replica of the Winnipeg armory. The original plans were for a much smaller building, but representations have been made to Ottawa regarding the growing needs of the regiments in Edmonton, with the result that a building of ample proportions with the latest equipment will be provided.

Office and Stores, Edmonton—McDougall & Second, owners of the Thistle rink in Second Street, recently destroyed by fire, occasioning losses aggregating $40,000, announce they will erect a modern business building on the site. The ruins are being cleared and it is expected that building operations will begin early in 1914.

Warehouse, Edmonton—Sixty thousand dollars is being expended by the Canadian Consolidated Rubber company on a brick warehouse in Fourth Street. The building, 50 by 130 feet, conforming with the plans of the original structure, will contain five storeys. It will be of steel construction. The external work will be of brick, with cut stone facings, and the interior work, with the exception of that portion required for the company's offices, will not be subdivided. The foundation of concrete of the old building, which was destroyed by fire last winter, is intact and will be used in the present structure.

Baths, Edmonton—The Dawson Crystal Bath Company, headed by John Dawson, announces it will expend $30,000 on a Turkish bath establishment in the Crystal block, Jasper Avenue West. Sanitary arrangements will be the best and the most up-to-date appliances will be installed. The water used in the baths will go through a special process of filtration.

Apartment, Edmonton — Plans and specifications are now in preparation for an apartment building costing $200,000 at Fourteenth Street and Victoria Avenue. Messrs. Wilson & Thompson have taken out a permit for the excavation work only, which will be done this fall. The building will be 82 by 142 feet and built of brick and stone. Mr. Wilson, one of the moving spirits back of the undertaking, lives in Maple Creek, Sask. G. E. Thompson is a resident of Edmonton.

Hotel, Edmonton—Robert McDonald, proprietor of the Hotel Selkirk, where $90,000 has been expended upon alterations, improvements and fixtures, will open the house in a few days. The fixtures in the cafe cost $23,000.

The Value of Spare Moments

From every section, and from all sorts and conditions of men, messages come to tell of earnings increased and futures brightened through study of I. C. S. Courses during spare time.

One letter gives the romance of a young man in California that began with little or no education; another tells the story of a high school graduate in Maine that found himself educated for everything but to make a living. Here are the heart-trobs of a fellow that toiled 12 hours a day and studied his Course as best he could; of a foreman or superintendent that enrolled because his ambition aimed at still bigger things.

No matter where you live, how little spare time you have, or how brief your schooling, the I. C. S. can raise your salary. That statement is backed with 20 years of success and a record of 400 or more advancement letters received every month.

I. C. S. Courses have made draftsmen, foremen, and superintendents of shop hands; building contractors, architects, structural and concrete engineers of carpenters and masons; advertising men, window trimmers, chemists, illustrators, and designers of clerks; electrical, mechanical and steam engineers of laborers; mine inspectors, foremen, and mining engineers of mine workers; bridge engineers, surveyors and mappers, civil engineers, gas engineers, automobile runners and civil service employees of young men willing to use their spare time to mold a career.

Suppose you were to increase your earnings only $20 a month—what a fine return that would be on your spare-time investment! Yet some have increased their earnings $250 a month.

Mark and mail this coupon and you will receive free information how you can increase your earnings by spare-time study.

OUTSIDE BUILDING TENDERS

School, Victoria—Proposals are being received by Archt. J. C. M. Keith, 416 Sayward bldg., Victoria, until 4 p.m., Nov. 18, for the erection of the "Beacon Hill" school in Victoria.

Plans, specif., etc., may be obtained at Mr. Keith's Victoria offices between 9 a.m. and 5:30 p.m., daily.

MUNICIPAL TENDERS WANTED.

Consulting Engineer A. D. Creer tates that specif. and date may be obtained from him at his Vancouver offices, 119 Pender W., beginning Monday, Nov. 17.

The tenders will be received upon the basis, first, of "concrete in place," tnd as an alternative, on "concrete pipes."

The probable cost of the work is variously estimated at from $200,000 to $400,000, depending a great deal upon which of the alternative methods is adopted.

It is desired to have the work completed as quickly as possible, so the contract will probtbly be let and undertaken as quickly as possible.

Sewer, Victoria—The city engineer is preparing to call for alternative tenders on pipe for the Northwest trunk sewer. Water Commissioner Rust explains that this would enable the engineers to go ahead whether Saanich passed the by-law in time to authorize proceedings or left it over till the annual election. There is no intention of delaying commencement a day longer than necessary.

Piers, Victoria—An Ottawa dispatch announces that proposals have been invited by the Dept. of Public Works, at Ottawa, for the construction of two piers for Victoria; tenders to close at Ottawa on Dec. 9, 1913, 4 p.m. (The official call stating where specif. may be obtained has not reached Vancouver).

The piers, which are part of the big development scheme of Victoria harbor, are to be known as Piers Two and Three and are between Rithet's wharf No. 2 and the breakwater.

The harbor scheme calls for two additional piers. One will be next the breakwater and the fourth between Pier Three and Rithet's wharf.

The first plans called for the construction this year of Piers One and Two but owing to the work now proceeding on the breakwater it was afraid it might interfere with construction there, so it was decided to build Piers Two and Three.

The two piers will have four slips—three being eight hundred feet long; and one a thousand feet.

The piers are 250 feet wide and each slip has a width of 300 feet.

The specifications call for reinforced concrete work throughout so that the piers will be thoughly modern in every respect.

The arrangement will be as follows: On the east the breakwater, then a space that will be left vacant until that great work has been completed; then will come a pier, then a slip 300 feet wide; then another pier and then a vacant space where a fourth pier will be built. The two piers now to be built will give 3,400 feet of dockage and this will be at east doubled when the others are built, so that the present plan provides in all for a mile and 1,500 feet, approximately, of dockage.

Detention Bldg., William Head, B.C.—Proposals for erecting a first-class detention bldg. at William Head quarantine station, will be received by R. C. Desrochers, of the Dept. of Public Works, at Ottawa, until 4 p.m., Nov. 17.

Wharf, Ainsworth, B. C.—Proposals for the construction of a wharf at Ainsworth, B. C., will be received by R. C. Desrochers, Dept. of Public Works, Ottawa, until 4 p.m., Nov. 17.

Plans, specif., etc., may be obtained at Ottawa and also at the offices of J. P. Forde, Dist. Engineer, at Revelstoke; C. C. Worsfold, Dist. Engineer at New Westminster, and from the postmaster at Ainsworth.

COMPETITION OPEN.

Masonic Temple, Toronto—Competitive designs for this structure will be received up to noon on the 20th day of January, 1914. The conditions of competition have been prepared by a competent professional adviser who will also report upon the merits of the various designs. For copy of conditions apply to Mr. W. H. Best, No. 181 Avenue Road, Toronto.

Dept. Bldgs., Ottawa—The commission of architects appointed by the government to direct the preparations of designs for the new departmental buildings at Ottawa has just submitted its report outlining the conditions of the competition.

It will be open to competitors throughout the British Empire. There will be at least two buildings and probably a third one for the courts. Half a million superficial feet of floor space will have to be provided.

Designs of a general character will first be submitted and from this number the best six will be selected and the authors of these will be asked to elaborate their designs. The one finally selected will get the job of superintending the work based on his plans and will be given a five per cent commission. The cost of the buildings will probably aggregate five million dollars.

The other five competitors who will be asked to develop their general designs will each receive $3,000. The sketches will be received up to January 2 next. Then three months will be given for the best half dozen to develop their plans.

The competitors whose plans are accepted will be given a further period of four months to prepare working plans. Afterward tenders will be called for, but, in view of the time allowance, this will not be before next autumn.

The cost of the building will aggregate $5,000,000 dollars. The other five competitors will be asked to develop their general designs and each will receive $3,000. The sketches will be received up to January 2, next. Then three months will be given for the best half dozen to develop their plans.
