AND WALKER'S WEEKLY

Vol. 7; No. 12; Whole No. 324

Local News of General Interest and General News of Local Interest

CITY OF ENDERBY

B. J. Cameron left for Alberta points on Tuesday.

What a blessing it is that linotype machines are made fool-proof.

Fifteen cars of lumber were sent out this week by the Okanagan Saw Mills.

The church ladies of Mara held their annual tea party Wednesday afternoon, a number of Enderby friends participating in the happy event.

A. C. Skaling, barrister, left last evening on a short business trip to Kamloops and Vancouver, and will remain at the coast metropolis the week end.

Word is received from Seattle to the effect that Mrs. Wm. Hatcher's condition is not showing the improvement that was apparent a week or two ago.

Rev. Mr. Estabrooks, of Summerland, on behalf of other residents of that section, shipped a carload of milch cows from Enderby to Okanagan lake points this week.

Earl Grey, former governor-general of Canada, has been on a visit to the coast cities the past week, and is concluding his trip to the west by visiting the Okanagan.

Mr. West, tailor, cleaner and repairer, of Vancouver, arrived in Enderby on Monday, accompanied by Mrs. West and son, and has located in the old Walker Press building.

A. Green, of Mara, visited Enderby on Monday, and reports the outlook bright for an abundant crop of all early-planted farm produce, but indications not so bright for the late plantings.

Capt. Henniker led his squadron of B. C. Horse from Enderby into camp at Vernon on Monday, thirty strong out of a total enrollment of forty, which speaks well for the interest of the men.

The Enderby junior baseball team played the junior team from Vernon last Saturday afternoon, on the recreation ground, and at the close of the game the score stood 12-9 in favor of Vernon.

Bob Roberts, who received a bad laceration of one of his legs in a runaway accident a few weeks ago, is still confined to his bed at the Enderby Hotel, but is hoping to get about at an early date.

DIED—On the 12th of May, 1914, by drowning in the Shuswap river, Violet Rosoman, youngest daughter of Mr. and Mrs. Bernard Rosoman, aged 3 years and 3 months. Buried in Enderby cemetery, Sunday, the 17th.

A number of Enderby fans went to Vernon yesterday to see the Vernon and Revelstoke teams play at baseball. Si Webb was in the box for Revelstoke, but he had poor support, and the railroad centre boys lost out—11-4.

Parish of Enderby: Thursday being Ascension Day there will be choral evensong at St. George's at 7.30. Sunday after Ascension Day, Mattins at Mara, 10.30 a. m.; evensong at Grindrod, 3 p. m.; evensong at Enderby at 7.30 p. m.

The success of the sale conducted the past week by the Murrin Hardware Co. and the firm of Polson, Murrin & Speers, has been somewhat of a surprise even to the men

putting on the sale, which proves that money is not so tight as some think—when the right inducements are offered to bring it out.

Ex-Mayor George Bell, and now an alderman of the city of Victoria, came in from Kamloops Tuesday morning for a few days' visit with friends at Mara and Enderby.

Hon. D. M. Walker and Mrs. Walker, after visiting Enderby a week or two, left for their home in Winnipeg on Saturday. They were delighted with the balmy days in the sunny Okanagan.

A young but promising cyclone visited the ranch of H. F. Cowan one day last week and lifted the roof off his chicken-house. Just when it seemed as if it were going to pluck the chickens, the funnel-shaped thing scooted off and was lost in the bush.

Mrs. F. H. Barnes was called to Kelowna Sunday evening by the death of her brother, Arthur Gillard, which occurred Sunday morning. Mr. Gillard was a pioneer of Kelowna, and an esteemed citizen of a quarter of a century's residence of that community. Interment took place Monday.

The Fair of Nations will be held in the curling rink, at Vernon, next Tuesday and Wednesday evenings, under the auspices of the Vernon Hospital Auxiliaries. It promises to be a very noteworthy event, the number of local people in costume being 150. The celebrated 72nd Seaforth Highlanders' Band from Vancouver, will give a band concert Tuesday evening.

The school boys' lacrosse team deserved a larger number of spectators to see them operate against the B team from Armstrong, on the Enderby recreation ground yesterday afternoon. All of 60 cents was taken in at the gate. This will not greatly encourage the young lads who are endeavoring to keep interest in the Canadian national game, and, incidentally are hoping to win the Joe Lally medals. The score stood 8-1 in favor of the Enderby team.

While at work on the Mara bridge last Friday evening one of the bridge gang noticed the body of the little Rosoman child, for which such diligent search was made last week, submerged in the water, its tiny frock caught upon a barb wire entanglement on the river bank. The body had been carried many miles down the river from the point where the little one had fallen in. Tenderly the wee tot was rescued and carried to its home. Interment took place on Sunday afternoon.

D. W. Sutherland, deputy district grand master of the Masonic order, from Kelowna, paid Enderby lodge an official visit last Thursday evening. Mr. Sutherland was piloted by Ex-Mayor F. R. E. DeHart, who incidentally took a look at his hay farm, formerly the Fortune place. Mr. DeHart told the Press to give a boost to the Kelowna Empire Day celebration, and so we would say, if you would like to see what gives promise of being a fast baseball game, go to Kelowna, but if you are looking for an all-round day of pleasure, stick to Enderby.

CITY COUNCIL MEETS

A special meeting of the City Council was held last Friday evening; Mayor Barnes in the chair, and Aldermen Grant, Murphy, Dill and Mack around the table.

The communication of G. R. Lawes, asking that the road on Enderby Heights be widened and otherwise improved, was taken up, and after considerable discussion it was decided that the city could not undertake the work at this time.

The tax by-law for the year 1914 was given two readings, and it was decided that the Council should meet again on Monday at 1 o'clock to put the by-law through its final stage.

It was the general opinion of the members of the Council that they would like to extend the time-limit for the rebate to be allowed, but it was deemed unwise to do so this year in view of the urgent need of available funds by the city for the carrying on of public work early in the season.

Tenders were opened for the digging and back-filling of 1000 feet of water pipe line to be laid on Johnson street as follows:

Mike Smith, digging only, 5c per foot, and 1c per inch for anything more than two feet in depth.

M. Paradis, 17c per lineal foot.

Robert Jones, opening and back-filling, 7c per lineal foot.

H. Gildemeester, \$120 for the job.

W. A. Russell, \$150 for the job.

W. Golightly and J. Folkard, 7c per foot for digging, back-filling and laying of pipe.

Moved by Ald. Dill, seconded by Ald. Murphy that the tender of Messrs. Golightly & Folkard be accepted. Carried.

Word was received from Health Officer Keith that he had been notified by the officials at the Kamloops Tranquille Sanitarium that there was now room in that institution for Miss Carlson, and he was empowered by the Council to take the necessary steps to have Miss Carlson taken thither.

A letter was read from Mr. McKay, superintendent of the Revelstoke division of the C. P. R., recrossing at the end of Belvedere street and saying that in his opinion Enderby already had as many crossings as traffic warranted. The Clerk was instructed to reply to Mr. McKay that the city was prepared to take the matter before the railway commission unless the crossing asked for is put at an early date.

A communication from T. H. Calder asked permission on behalf of the boys of the lacrosse and baseball teams for the privilege of using the recreation ground on the afternoon of June 3rd, when the boys will hold three or four games for the public to witness; and the boys wish to charge a nominal admission fee for the assistance of the boys and the encouragement of the sport. Permission granted.

September 12th was fixed as the date for the annual tax sale.

A letter from the Agent General's office, London, Eng., requested that that office be supplied with all information available relating to this district.

The secretary of the celebration committee appeared before the Council to ask for \$600, to be expended in carrying out the program arranged by the committee for Empire Day. The amount was allowed.

ON CHARGE OF MURDER

James Berryman, a logger employed in one of the camps in the vicinity of Mabel lake, was brutally murdered on the road to Lumby some days ago, and his body left on the roadside. In company with Thos. Christien of Lumby, Arthur Quinn, for ten years or more a resident of Enderby, and Larry Green, Tom Sullivan and William King, Berryman left Vernon for Lumby. All were more or less under the influence of liquor. This was the last time Berryman was seen alive in Vernon. The other men named turned up at the camp the following day. Berryman's body was found by the roadside.

Christien, Quinn, Green, Sullivan and King were taken into custody, and at the preliminary hearing all were held to appear for trial for the killing of Berryman.

The murder was one of the most brutal in the annals of crime in the Interior. Judging from the bruises on the body, the murdered man was beaten to death with stones after being kicked to insensibility by his assailants.

EMPIRE DAY PREPARATIONS

Everything is now ready for the dawn of Empire Day—all except the trimmings and flags and bunting and the merry-go-round. All of these things will be here on time, however, and there is every promise that May 25th will be a very happy day for all of Enderby and her guests. The various events to be pulled off at the recreation ground are listed on another page. They include three games of baseball, one of football, and the usual footraces, etc., for children and grown-ups. In addition to the ball games and other field sports, several interesting events on the river are to be carried out. The day is to conclude with a dance in the Opera House, under the auspices of the senior baseball club. The Armstrong band has been engaged for the day. Owing to so many members of the Enderby band belonging to the 30th squadron, B. C. H. and being in camp at Vernon, it is doubtful if the local band will appear in uniform on that day.

EVERYBODY BUSY

F. Pyman writes from Clinton, to say that things are humming at that point. Not houses, but shacks, are springing up "like toad stools after a rain." He counted fourteen from his doorway, and wrote it down. There are 400 men employed at Clinton, and when they get some money it will be a lively camp. At present, however, while there are 400 men employed, there are 500 "on the rocks" and sleeping out of doors. The correct amount for one to carry with him on the streets of Clinton is ten cents. Mr. Pyman intimates that he cannot eat well without having the Press handy; he wants to read about his Enderby friends.

PENTICTON ROBBERIES

Under cover of a heavy rain storm which swept Pentiction during the early hours of Thursday last, burglars forced an entrance to the postoffice, and after blowing the safe and rifling it of currency amounting to nearly \$6,000, made good their escape. Some time earlier the safe in the Pentiction Steam Laundry was also blown and the contents taken, but in this case only a small sum of money was secured.

Leaving not even enough evidence to establish the number of men engaged in the robbery, and executing their work with a completeness and despatch that proclaimed them experts at their business, the burglars did not leave the most fragmentary clue upon which the police could work. No suspicious characters to whom the robbery might be attributed, have been definitely spotted. In one of the registered packages taken by the burglars was the sum of \$5,000, consigned to one of the local banks from Vancouver, which arrived on Wednesday evening's boat. These packages arrive at long intervals, and it is thought by the authorities that the burglars might have been in possession of some inside information regarding the shipment of the money, making their plans accordingly. This theory, however, is a very unlikely one, and the big haul made by the safe-blowers was more probably the result of a coincidence that was a big piece of luck for them.—Pentiction Herald.

A later report from Pentiction states that C. A. Miller and Daniel Johnson were arrested at Princeton on the 17th and are held at Pentiction as suspects. On the person of Miller was found a number of 25c scrips, and as a number of these were taken from the postoffice safe it is looked upon as an incriminating circumstance.

CARD OF THANKS

I take this means of expressing, on behalf of myself and family, our keen appreciation of the many expressions of sympathy received since our bereavement became known, and our deep sense of gratitude to the many, who, actuated by a broad spirit of humanity, abandoned their personal interests, and put forth noble efforts to save our missing child or to determine her fate.

As indelibly impressed on our minds as our affection for our beloved child, the memory of the great kindness shown us during our time of trial, will ever remain with us in high esteem, a bright and ennobling reminder of the spirit of the brotherhood of man—too often lost sight of in this age of ceaseless business activity and sordid cares.

We thank you, one and all,
BERNARD ROSOMAN.

MAY 21, 1914

A VALUABLE REPORT

The report of the Royal Commission on Agriculture recently published in full, though fully summarized at the time the report was presented to the Provincial House, is one of the most valuable documents yet issued by the Government, particularly to the agriculturists of the Province. The commissioners go exhaustively into every phase of the industry, and, after reciting conditions as they found them, they proceed to make certain recommendations, which will receive the attention of the local legislature when the next session opens. These recommendations are "influenced by the conviction that there is nothing within the power of the people of B. C. to do that will so much conduce to their present and future prosperity and their national strength and well-being, and so raise the credit of the Province in the money markets of the world, as to take measures to place the business of agriculture on a sound basis and make it attractive and profitable as an occupation for a large and increasing proportion of its population."

Speaking of the natural advantages of British Columbia for the highest development of animal life, combined with its large and ready home market, which make the Province particularly suited for dairying, horse-breeding, and the production of beef, mutton, pork, eggs and dressed poultry, the report adds:

"Some districts are pre-eminent suited to some branches, other districts to others. In some parts alfalfa, in other parts vetch and oat hay, corn and roots, will be the leading fodder-crops; but there are no farming districts where crops of valuable stock-food could not be raised with great regularity. It is instructive to note in this connection that what seem to be the most prosperous districts in the Prairie provinces are those where live stock raising is the principal industry rather than the growing of grain for sale. Districts where climatic conditions made wheat an uncertain venture, and which accordingly were forced to devote themselves to mixed farming, seem most uniformly thriving."

The Commission strongly recommends the adoption by the Province of New Zealand's long-term

farm-loan system. "We find that conditions in British Columbia are such that it requires considerable capital to bring the land into a proper state of cultivation for profitable production, and that in a large proportion of cases the making of farms rather than farming alone is the task that is being undertaken."

"In competing for settlers," the report says, "a country with an efficient system of long-term credit will have a great advantage, and agricultural countries which do not adopt some such system are likely to lose many of their own farmers by their emigration to countries furnishing such facilities. In the countries where long-term farm-loan systems have been adopted there has been a marked improvement in the standard of living on farms, which, including as it does more recreation and culture, is not only good for the farmers and their families, but tends to keep the boys and girls on the land and to attract others to follow this pursuit. This is found to be good for general business and for the welfare of the whole people."

So much is said in the Royal Commission report about the vast improvements in New Zealand as the result of the close co-operation of the farmers and the long-term farm-loan law, that it is interesting to note some of the accomplishments there.

New Zealand's co-operative society began in two small rooms, where seeds and fertilizers were sold and where farmers met to discuss grain prices. In a year's time larger premises were built. Then a grain and wool store was added, a railway siding was built to the store, a London agent was appointed, another in Sydney, Aus-

tralia, and others elsewhere. It is at the present time the largest co-operative society south of the Equator. It began with two employees, a secretary and a boy. Today its staff numbers 650 persons. Among its departments are a land and estate agency, a live stock department, where the members' stock are sold. Another department sells the members' grain and supplies seed. Another department is devoted to agricultural machinery. A new branch sells motor cars. There is a bacon factory and freezing chambers. The society has twine works and manure works of its own, grain stores and wool stores. It does a banking business and has thousands of current accounts. It has bakeries, coal-yards, packing warehouses, motor garages, drapery, grocery and provision departments. There is nothing which farmers produce which the society does not deal in. There is nothing they require which it does not cater for. Its trade in its first year was 15,234 pounds sterling; in 1911 it had risen to 2,961,688 pounds sterling. It started with 800 members. It now has 6,445. It made a profit of 51,000 pounds sterling on its trade turnover. It has a reserve fund of 100,000 pounds sterling. It paid 5 per cent bonus on trade and a rebate of 30 per cent on commission, and has premises valued at 120,199 pounds sterling.

One of the things the New Zealand co-operators realized was that a big business cannot be carried on without capital, and the members provided adequate financial resources. Their paid-up share capital is now 308,382 pounds sterling, and the uncalled capital 281,728 pounds sterling.

That is the difference between successful co-operative societies in New Zealand, and non-successful co-operative societies elsewhere. The non-successful expect that co-operative societies will do all sorts of things without adequate capital being provided.

A POWER OR A MOB—WHICH?

Organization is a modern policy. The organized man is a power, he moves shoulder to shoulder with his brother; the unorganized man is merely a part of a mob, with no chart or compass to guide him.

Organization is the spirit of progress, and the spirit of progress is the greatest asset a business or an individual can have.

The more people we can work with and for, the bigger and better you and I are.

We are living in an age of organized interests. Men get together to discuss things; to better conditions. They are doing it in a spirit of progress.

Reciprocity, mutuality, co-operation are combined in this spirit, and the greatest of these is co-operation.

Competition may have been the life of trade once, but it is no longer so. Competition died when the inventive genius of modern engineers devised machines that will manufacture beyond our present economic wants. Competition, then, became suicidal and destructive, and anything that is suicidal is dying—dead. We have passed through the savage age, the stone age, the competitive age, and now we are passing into the co-operative age. We will not be here so very long, anyway, and soon Death, the kind old nurse, will come and rock us to sleep—and we had better help one another while we may.

Finest in the Country

"Enderby is a charming village with city airs. When Paddy Murphy shook the snow of Sandon off his feet he came here, and now owns one of finest brick hotels in the country. Although Paddy is an Irishman from Michigan, he calls his hotel the King Edward. In addition to the excellence of the meals, breakfast is served up to 10 o'clock, which is an added attraction for tourists."

(Extract from Lowery's Ledger.)

King Edward Hotel, P. H. MURPHY Enderby

Homeseekers Should

Come to Enderby

BECAUSE it is one of the healthiest spots on earth, only two children and no adults having died of disease in the last eight years.

BECAUSE, when you arrive, the Board of Trade will take you in hand and make you feel at home and see that you are satisfactorily settled.

BECAUSE you will find here all the advantages and beauties of a magnificent river, ever green hills, grassy meadows and cool, delightful valleys.

BECAUSE if you prefer a home-site on the hills, in groves of birch and alder, cedar and pine, overlooking the river and valleys, you will find it here most ideally located.

BECAUSE we have the purest of water piped to every home from a sparkling mountain stream, a perfect system of electric lighting, and an abundant supply of wood.

BECAUSE, if you are a person of means, and wish to make a home for yourself on the banks of the soft-flowing Spallumcheen, you will find good roads already leading to the site, and all the materials necessary to build close at hand.

BECAUSE you will find here all the advantages to be found any place else in the Valley, and none of the disadvantages.

BECAUSE there is work to be had by anyone looking for it, in the mills, in the lumber camps, on the farm, in the lumber yards, in the brick yards, in the building trades or the orchards.

BECAUSE fruits, hay, vegetables and grain grow to perfection here without irrigation.

BECAUSE Enderby has never been boomed, therefore you can buy at reasonable prices and be sure of doubling your money.

BECAUSE this District has a climate second to none; not too wet or too dry; splendid growing summers and glorious healthful winters.

BECAUSE you will find the religious, educational and social advantages all you could wish.

When your Letter Paper runs low, let us print the next lot. Walker Press

SUIT YOURSELF ABOUT IT

A hat made of fine blue straw braid turns up high on the left side. About the entire brim is a wreath of spring flowers caught down low on the right side and high on the left with pin roses and leaves. This hat would be ideal to wear with a blue tailored suit of coarse-wale serge.

COMMUNICATED

Was Enderby Cheated?

Editor Enderby Press:

Dear Sir: Will you be good enough to publish the following extract from a long letter of the Minister of Education, which shows clearly according to the Minister's stated case, that Enderby should have got the medal given to Trail.

Official Heading, Victoria, 11th September, 1913.

"Mr. Muir has been answered repeatedly during the last few years, but persists in misrepresenting facts. His own letters have been answered through the press, on the platform, and on the floor of the House. He makes out a case where apparently there is favor shown in the distribution of the different medals. The medals are distributed to the town which shows the best result in the examinations; for instance, if Enderby and Trail send up the same number of pupils—say 20—for the entrance examination and Enderby were to pass 17 out of the 20 and Trail only 14 out of the 20, then the medal is awarded to Enderby, and to the pupil in Enderby who had the highest number of marks. Although there might be a pupil at Trail having more marks than the highest pupil at Enderby, yet the highest pupil at Enderby gets it because the number of passes at Enderby was higher than the number at Trail; in other words, we not only encourage the pupils by offering the medals, but we make it an object to the teachers in any particular school to try to se-

cure the greatest number of passes. Mr. Muir picks out two pupils, one from Trail and one from Enderby, and says that we are unfair because, on the face of it, the one who gets the medal had not as many marks as the one who did not. This has been explained so often that it has got to be an old story. Mr. Muir understands it perfectly, but persists in making false comparisons."

H. E. YOUNG, Provincial Sec'y.
You are no doubt aware that in the only year in which Trail got a medal six pupils passed at Enderby whilst only one passed at Trail. Why, then, was the medal not given to Enderby, since it actually had the greater number of passes, as well as the best scholar in the Province.

Ought not Premier McBride to use his influence now to get that governor-general's medal for Enderby since his minister of education's letter so clearly proves that it should have got the one given to Trail.
J. N. MUIR.
Sandwich, B. C., May 12, 1914.

OBITUARY

On Friday, April 24th, 1914, the death occurred of Mrs. Margaret Moore, one of MacGregor's most respected and oldest pioneers. She had been in failing health for the past five months, and on Friday she passed peacefully away at the home of her son, Mr. Joseph H. Moore.

The deceased lady, whose maiden name was Margaret McMillan, was born in Sherbrooke, in the Province of Quebec in 1833. In 1852 she married John Bell. In 1882 she moved with her husband and family to the MacGregor district, taking up their residence on the S.W. 1/4 28-11-10, where she had since resided. In the year 1886 she married William Moore, who died in 1893.

She is survived by four sons and five daughters, viz: First family—Duncan Bell, Michigan, U.S.A.; Mrs. J. B. Hawley, Portage la Prairie; Mrs. D. Bain, Halliburton, Ont.; Mrs. W. J. Thompson, Enderby, B. C.; and Mrs. D. McDougall, Washington, U.S.A. Second family—Mrs. Jennie Hamblin, Elstow, Sask.; W. J. Moore, Edrass; James and Joseph H. Moore, MacGregor.

The body was laid to rest in the Wellington cemetery on Sunday afternoon. A large number of old-timers and friends attended the funeral to pay their last respects to a worthy pioneer, who will be missed from our midst. Rev. A. Birch, of St. Paul's church, conducted the services at the house and graveside.

The pall-bearers were, Messrs. W. Young, Jas. Pogue, T. Rowan, F. Orchard, S. Fox and R. Stirling. Much sympathy is extended to the family in their bereavement.

SUNSHINE SERMONS

Cheerful Guidance to a Happier, Healthier Life
By the Philosopher-Physician
GEORGE F. BUTLER, A. M., M. D.

There are many wrong ideas about medical things. There are innumerable medical fallacies that seem to be well founded.

One fallacy is that beef tea is nourishing. It is nothing but water in which certain pleasant and exhilarating meat salts are dissolved. You would starve to death on beef tea alone, the same as on whisky or on coffee.

Another fallacy is that alcohol—whisky—warms the body. Alcohol lowers the temperature. It ultimately chills. Instead of warming. Hence it is of no use whatever as a guard against cold. Alcohol, moreover, is not a food, and does not create any new force, but may perhaps enable a man to use up a little of his reserve power more quickly.

A third fallacy is that one egg contains as much nourishment as a pound of meat. Sick people without appetite think complacently that if they take an egg or two a day they are doing well. As a matter of fact, they are doing anything but well. They must remember, if they are substituting eggs for meat, that eight eggs, not one, are required to equal one pound of meat. Then, there's the liver fallacy. Many, as soon as their stomachs get out of order, begin to treat their liver. But the liver is a dangerous thing to treat unless one understands it, for there are over ninety distinct liver troubles, and what is good for one of them may be bad for all the rest.

Don't be satisfied with anything less than an Edison Phonograph

Throughout the history of sound reproduction Mr. Edison has blazed the trail. Every important step has been conceived first in his mind. He is the acknowledged master of acoustics throughout the world. His recent triumph is the Blue Amberol Record.

It came, after countless experiments, with all its strength of volume, sweetness of quality and lasting endurance. To bring out the remarkable tone of this new record demanded a new reproducer. He invented it—the Diamond-Point Reproducer. With it there is none of the annoyance of changing the needle after each record. The diamond is as much a part of the phonograph as its beautiful cabinet.

Hear a Blue Amberol—that's all we ask. Your Edison dealer will play over as many as you like. We are content to leave the verdict with your ear.

New Tax For German Householders

An enormous amount of dissatisfaction has arisen among householders in Germany with regard to the new tax of 50 shillings per annum on every servant kept. For the payment of this sum the State undertakes to relieve the householder of all responsibility when servants become ill.

Do You Know What This Label Means?

It means **QUALITY** in Portland Cement, and **RELIABILITY** in anything made from this cement. Our cement Building Blocks, cement Bricks, and other building materials stand on their merits—always reliable. Estimates furnished and materials supplied.

J. S. JOHNSTONE, Enderby

AN EXCELLENT ARRANGEMENT

It is safe to say that all who study without bias the arrangement which the Borden Government has brought down for the relief of the Canadian Northern will agree that, taking everything into account, it is an excellent one in every way, at any rate for the country.

Briefly, the Government guarantees the bonds of the company to the extent of forty-five millions. In return, there will be a consolidation of the thirty odd companies which make up the Canadian Northern system, including railway and steamship lines, express, terminal and telegraph companies, and all other interests of whatever kind and the capital stock of the whole concern is reduced from \$145,000,000 to \$100,000,000, of which the Government will receive outright \$40,000,000, inclusive of the \$7,000,000 received last year. This is the immediate compensation.

The Government is further protected by a mortgage on the entire assets of the company, and will supervise the proceeds of the guaranteed securities in order that they may be properly applied to the completion and improvement of the system. Should the company default either in respect to the securities that are guaranteed, or for any other reason, the Government has power forthwith to take over the road as the absolute property of the Dominion, subject only to the bonded indebtedness.

No part of Canada is more interested in the completion of the Canadian Northern than is British Columbia. Stagnation in C. N. R. development, or bankruptcy of that road, means commercial stagnation. Penetrating the most fertile parts of Western Canada, with lines projected or partially constructed in many districts, the failure of the Canadian Northern would work a hardship in the country tributary to it as well as throughout the West, and would

have meant ruin to many innocent thousands. The Government's proposals, which protect the people, yet go to make this road an effective factor in western transportation, will be most welcome and strongly endorsed in the West.

Not only to the people, but to the Provincial governments, must the settlement be heartily welcomed. Each of the four Provincial governments had become endorsers for the C. N. R. for many millions. To have had to assume payment of interest on the bond guarantees would have crippled, and, perhaps, seriously embarrassed some of these Provincial governments.

Placing the Canadian Northern on a sound basis will do much to increase the prosperity and progress of the West. Railway construction will again be underway, and a more hopeful spirit followed by trade expansion will result. Districts waiting to be served by the Canadian Northern will now have every prospect of realizing their desire, and a strong competitor for western trade will replace a road which was at the mercy of its rivals. Incidentally the Okanagan District is one of the sections that will immediately benefit by the new arrangement.

THE COCKTAIL BITE

Mynheer Nicholas von Nellenbogen, of Curacos, who has arrived at New York, declares that the Dutch colony is happy in the possession of a "jag bug" whose bite is intoxicating. One bite has the effect of a cocktail, he declares, while a number of bites produce such consequences as are followed by champagne. A parasite has been introduced on the island, he declares, which destroys the jag bug and, strange to relate, anyone who has been bitten by the jag bug and then by the antidotal bug immediately becomes sober and a teetotaler thereafter.

Oh, happy, happy men of Curacos,

It's a very welcome "jag bug" that you've got

Von Nellenbogen says (he ought to know.)

Its bite is like a cocktail taken hot.

Oh, happy, happy men of Curacos, Several bites from this intoxicating thing,

Have consequences, as you already know,

That drinking ale and champagne often bring.

But of all you happy men of Curacos There is one who didn't like this little bite,

He's a kill-joy, as everyone must know,

Who brought the antidotal parasite.

One bite from this pestiferous little blast—

Makes a drunkard a sober man thereafter;

Manheer von Nellenbogen says at least,

He's not seen a Curacon die of laughter. —CHICOT THE JESTER.

SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories and a portion of the province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or sub-Agent of the district in which rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee for \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,

Deputy Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

Sir Thomas Lipton is building a new yacht to compete for the international cup at the International Yacht Races to take place at San Francisco during the Panama-Pacific International Exposition. President Woodrow Wilson and King George of England have offered trophies.

CHEAPER FENCE-POSTS

Preservatives Prolong Life of the
Poorest Woods

As a result of the many inquiries
in regard to the preservative treat-
ment of fence-posts, the Forestry
Branch, Ottawa, issued a circular on
this subject. The great advantage of
these treatments is that they keep
even cheap woods free from decay for
from ten to fifteen years. Many kinds
of wood found in farmers' woodlots
will last, when used as posts, only
four years or thereabouts; after treat-
ment, such as described, they last
twice or three times, even four times
as long. Creosote, which costs in
Canada, from ten to twenty-five cents
a gallon, is the best preservative.
When boiling-hot creosote is applied
liberally with a brush—a paint brush
or whitewash brush, for instance—to
the butts of well-seasoned posts from
which the bark has been removed, it
sinks into the wood for a distance of
about a quarter of an inch. This
should add at least ten years to the
life of a post made from a non-durable
wood, such as poplar, balsam, fir or
spruce. This is not the best method,
but it is the simplest and, on a small
scale, probably the cheapest. Other
methods require that the posts be
kept covered in tanks of hot creosote
for a longer or shorter period. Be-
sides lengthening the life of the post,
the preservative treatment also tends
to reduce the cost of the posts in an-
other way, for, as cheap local woods
can be used, the first cost and the cost
of transportation are usually much
lower than for cedar, oak or tamar-
ack. Moreover, as posts will need to
be set less often, the proportionate
cost of setting the post will be less.
Taking into account all the items that
go to make up the cost of the post,
and comparing this with the number
of years it will last, it will be found,
in the majority of cases, to be much
less for treated posts.

stamped on the sole. Best in style
and value. Enderby Supply Co.,

WATER NOTICE

APPLICATION for a licence to
take and use water will be made
under the "Water Act" of British
Columbia, as follows:

1. The name of the applicant is
Rosario Simard.
2. The address of the applicant is
Hupel, B. C.
3. The name of the stream is not
known. The stream has its source
in Hidden Lake, flows in a northerly
direction, and empties into Shuswap
River about four miles from
Mabel Lake.
4. The water is to be diverted
from the stream on the west side,
about 2,000 feet from Shuswap
River.
5. The purpose for which the
water is to be used is domestic.
6. The land on which the water
is to be used is described as follows:
—Fractional NW. ¼, section 8, ly-
ing north of the Shuswap River,
and S. 1-2 of SW. 1-4, Section 17,
Township 19, Range 6, West 6th
Meridian.
7. The quantity of water applied
for is as follows: 50 miner's inches.
8. This notice was posted on the
ground on the 21st day of May,
1914.
9. A copy of this notice and an
application pursuant thereto and to
the requirements of the "Water
Act" will be filed in the office of the
Water Recorder at Vernon. Ob-
jections may be filed with the said
Water Recorder, or with the Com-
ptroller of Water Rights, Parli-
ament Buildings, Victoria, B. C.

ROSARIO SIMARD,
Applicant.
