51

Enderby, B. C., August 12, 1915 AND WALKER'S WEEKLY Vol. 8; No. 24; Whole No. 378

ENDERBY AND DISTRICT NEWS

F. B. Dill left Sunday on a business trip to the coast.
John Bell and family left on Monday for Lacombe, Alta.
Miss Mellish is staying for a few days with her sister, Mrs. C. Reed.
E. C. Wheeler left for Saskatchewan points on business this week.
A. Fulton and family went to Mabel Lake this week on a short camping trip.
Mrs. Wm. Love has accepted the position of teacher at the Olalla public school.
Mrs. F. S. Stevens left for the coast Wednesday evening, to be absent a few weeks.
Miss Maud Burnham leaves on Saturday for Vancouver, where she will spend a year at school.
The camping party of Messrs. Gillman, Warwick and Mann returned from Mabel Lake Tuesday. James Weir suffered a paralytic stroke Tuesday, and is confined to his bed in a very serious condition.
Mrs. Thos. Gray sent us a fine sample of head lettuce to show what they can do at Mara in this line.
Miss Moore, who has been visiting Mrs. Winter the past month, left for Victoria Wednesday evening.
Kaslo is safe for the winter. Indications point to a big run of red fish in the Slocan streams this season.
Mrs. Walter Robinson came in on Saturday from Alberni, B.C., on a visit to her parents, Mr. and Mrs. Henry Hill.
Frank Pearson left for the Northwest on Wednesday, where he expects to spend the summer, and possibly the winter.
Miss Church, who has spent some weeks visiting Mr. and Mrs. C. F. Bigge, returned to her home at Edgewood on Monday.
P. W. Chapman is spending a few weeks at his Loon Lake property, enjoying a much needed rest from his musical studies.
Mrs. Greenhouse returned to Vernon on Friday, after a short stay with Mrs. A. L. Fortune, who returned to her home last week.
The Girls' Guild of St. Andrews Church will hold a social on the main lawn, Friday evening, Aug. 13th, in aid of the Guild funds.
Parish of Enderby, 11th Sunday after Trinity. Holy Communion, 8 a.m.; Mattins and Litany, 11 a.m.; Sunday School, 2.30 p.m.; Evensong, 7.30 p.m.
The past two or three have been wall-paper weeks at the Enderby Music Store. The values and beautiful patterns have drawn business from all parts of the district.
Mrs. A. McPherson favored the Press with a huge vase of the most exquisite gladiolus we have seen in this section. For coloring, strength of petal and stock and quantity of bloom, these are prize-winners.
Leonard Stroulger, who has been confined to his bed at Edmonton for the past four months, following an attack of measles, expects to be able to return to his Enderby home at an early date.
Preparations are being made by the Sunday Schools of Enderby to hold a basket picnic on Thursday, Aug. 19th. Further announcement as to place, etc., will be made at the Sunday Schools next Sunday.
Ed. Gray had the misfortune to seriously injure his left arm, on Monday, while assisting in unloading a tank of gasoline at the garage. He slipped and fell to the ground, the 400-pound tank following him before he could get upon his feet. The full weight of the tank fell upon his outstretched arm. Fortunately the ground was soft, and instead of crushing the bone as it otherwise would, only the flesh and muscle were desperately bruised.
A. C. Skaling left for Vancouver on Saturday, where he was married on the 11th to Miss Alma B. Noble. Mr. and Mrs. Skaling will be at home to their friends in their Enderby cottage, Sicamous and Mill streets, after October 1st. In his year's residence in Enderby, as barrister and solicitor, Mr. Skaling has won the respect and esteem of

all, for his fidelity in business dealings and close attention to legal matters placed in his hands, and the Press joins with his many friends in wishing him and bride a long life of wedded happiness and service.
The committee having the subscription paper in hand for the machine gun fund, have not been able to give the paper general circulation the past week, but will have the list in shape for publication in the next issue of the Press.
According to a coast report, one of the examiners of the high school papers of the Province stated that those coming from the Enderby high school were the best to come from any high school in British Columbia. This report fully sustains the high opinion Enderby parents and scholars have held of the excellent work done by Miss Campbell, who resigned at the end of the past year to accept an advanced position in one of the city schools in a western state.
Deputy Fire Warden Hawes reports the bush in the hills in a fit condition for dangerous fires, and he wishes to warn campers and others travelling the hills to be on guard against lighting fires for the camp or leaving them smouldering. The extra wet spring caused an excessive growth of underbrush, while the excessive heat of the past few weeks has parched the underbrush brown. A lighted match dropped in the thicket might start a fire in a moment that would sweep the hills and cause untold damage to the forests.
Mrs. H. M. Walker and children are spending a few weeks in camp on Mabel Lake. This is the first opportunity in seven years that the Press staff has had to get away from the space-box, and on Friday and Saturday for the next two weeks (weather favorable) the staff, from editor to devil, is going fishing. If you want to pay your subscription or any other account, and cannot find it convenient to do so on Monday, Tuesday, Wednesday or Thursday, kindly stuff it under the door or poke it through the key-hole. We're goin' fishin'.

Report Progress in Dardanelles

Sir Ian Hamilton reports that troops of the Entente Allies in the Dardanelles made a gain of 200 yards on a front of 300 yards east of the Krithia road on the Gallipoli Peninsula. A footing also has been obtained on Chanak Bahr, and another landing effected elsewhere, the statement adds.

Joe's ice cream sodas will make you forget it.

THE IDEAL CAMPING GROUND

Each year Mabel Lake is attracting an increased number of family camping parties. This year the lake shore is dotted with the tent houses of numerous Enderbyites, and a very happy lot of campers they are. In addition to these camping parties, numerous week-end outing parties gather there. Last Saturday and Sunday six autos, three double rigs and one single, arrived at the lake with parties' pleasure bent. Some fish, others visit the campers and others just relax and look at the scenery.
Within hailing distance of the Okanagan Sawmills' storehouse at the road-end, Mr. F. D. Abbott has an established general accommodation depot, where the campers get their fresh milk supply, fish supply and boats for hire, and Mr. Abbott and his boys are always ready to do their utmost to accommodate anyone calling upon them. In addition to the rowboats he has a motor boat large enough to accommodate a party of a dozen.
Leighton Beach is ideal for family camping parties. The lake shore is clean, sandy and the water warm and shallow, with plenty of drift wood handy for the camp fires. The tents are pitched in the shade of the fir trees and cottonwoods. Here Mr. and Mrs. Leighton have erected a summer cottage overlooking the beach and lake, a grand site for a summer resort for Enderbyites who desire to get away from home and business cares, where the children can paddle in the water in perfect safety.
Just now, when the road is in good shape for travel, autos cover the distance of 25 miles in something less than an hour and a half, while a team with a double rig will cover it in from three to four hours. And the road winds up a valley dotted every mile or so by settlers' homes, overlooking low lands and meadow which, if stocked for dairy purposes, would produce butter, eggs and pork enough to feed every mouth in the Province, and with the sleepy, soft-flowing Spallumcheen spreading out over the green meadows or skirting the wooded hills and low lands.

SCHOOL OPENS MONDAY WEEK

Enderby school children are already getting a supply of school books, pencils, slate, pen nibs and holders. School re-opens Monday, Aug. 23rd. Of the five teachers engaged by the board of school trustees,

three have never taught in Enderby before, but all come very highly recommended, and it is felt that the staff will be fully up to the standard of that of the past year.
J. Walter Hughes, second in command of the Revelstoke schools last season, will be principal, with Miss Beattie, Miss Rae and Miss Carlson in the order named. The high school will be in charge of Miss H. Alice Bligh, who comes highly recommended.

SMOKES FOR THE SOLDIERS

The second tea held in K. of P. Hall on Saturday, Aug. 7th, in aid of the Enderby tobacco fund for the Canadian soldiers in the trenches, was even more successful than the first. Many thanks are due Mrs. S. Polson, who voluntarily offered to help by donating all the ice cream, and, with the assistance of Mrs. S. Speers and Mrs. C. Polson made at their tables the sum of \$11.60, which helped the fund considerably. Praise is also due Mr. Speers, who gave so much time to the guessing competition for the cushion, which netted the Enderby machine gun \$4, and in giving his store window for the children's tableau on Saturday afternoon.

Prize for the largest amount in the collection box was won by Mrs. Dill. The cushion was won by Mr. Speers, who guessed \$27. The actual amount being \$27.90.
Following is a list of the names of those who gave so generously to the fund: Mrs. Pound, Mrs. Martyn, Mrs. Leighton, Mrs. Dougal, Mrs. Peel, Mrs. Sowden, Mrs. A. Campbell, Mrs. E. C. Wheeler, Mrs. Ellison, Mrs. Sparrow, Mrs. Russell, Mrs. W. Cavers, Mrs. E. Mack, Mrs. Hartley, Mrs. Twigg, Mrs. Piper, Mrs. Brown, Mrs. Teece, Mrs. Forster, Miss Salt, Miss Gibbs, Miss Etchell, J. Doerflinger, A. McPherson, E. Black, V. Polson, J. Harvey, J. Crane, Fulton Hardware Co.
Mrs. E. GRAY,
Miss FORSTER.

FINE HARVESTING WEATHER

If the weather conditions of June and July were against the farmer, the weather of the past three weeks has been distinctly in his favor, with the result that the field crops in the vicinity of Enderby have never been larger, or the weather more favorable for their harvesting. The hay men have been working long hours each and every day, and the greater part of the hay crop is now under cover or safe from serious damage no matter what kind of weather follows.

LATEST WAR SUMMARY

The following statement of Field Marshal French is published under date of Aug. 10th: "Since my communication of Aug. 1st, the artillery on both sides have been active north and east of Ypres. In the exchanges the advantage has been with us. This morning, after a successful artillery bombardment, in which the French on our left co-operated effectively, we attacked the trenches at Hooze, captured by the enemy on July 30th. These were all retaken, and following up this success we made further progress north and west of Hooze, extending the front of the trenches captured to 1200 yards. The captures reported amounted to three officers and 124 men of other ranks and two machine guns."

Kitchener's Army Now Ready

A London dispatch under date of Aug. 9th says that Kitchener's army, not all of it, but a very large part, is at last in France. Supplies of ammunition and equipment are being rushed to the front. There is every indication that the Allies are nearly ready to develop the big movement in the west that has been expected ever since May.

Trying to Escape German Grip

The struggle of the Russian forces to shake themselves free of the Austro-German grip remains the chief factor in the war news of the past week. Since the fall of Warsaw, the third largest city in Russia and the capture of Ivangorod, by the Austro-German forces, all of Poland has gone into the hands of the enemy. The retreat of the Russian army continues. No news of a definite nature as to the success or fate of the Russian armies has come from the front, but London military opinion is reported to be inclined to believe the retreat was started in ample time to enable most of the Russians to get out of the pocket they found themselves in when the enemy captured the Vistula forts. In an effort to deprive the Germans of the use of railway communications and of the Vistula river for bringing up supplies for their armies, the Russians are making a desperate effort to still hold Novo Georgievsk, a great entrenched camp at the confluence of the Narew and Vistula rivers.

Italians Dominate Gorizia

A Paris despatch says that after a desperate battle the Italians have stormed and captured the summit of Monte San Michele, which dominates Gorizia, 22 miles northwest of Trieste.

Red Cross Fund Sale

The second monthly sale of vegetables, fruit, etc., in aid of the Red Cross Fund, was held on Saturday last, the proceeds being \$8.10. The following contributed: Messrs. Turner & Donaldson, Mrs. Jaquest, Mrs. Attenborough, Mrs. Gaylord, Mrs. Salt, Mrs. Johnston, Mrs. Bigge, Mrs. Mowat, Mrs. Butchart, Mrs. Grahame, Mrs. Douglas Smith, Mrs. Lawson Stroulger, Mrs. Forster, Mrs. Stapleton and children, Mrs. Jamieson, Mrs. Emeny, Mrs. Lawes, Mrs. Twigg, Mrs. Robson, Miss Rosoman, Mr. Brown, Mr. Cowan, Mr. C. Polson, Mr. Gibbs. The vegetables remaining unsold were sent to the camp at Vernon, for the use of soldiers. The next sale will be held on Saturday, Sept. 4th.
M. R. GIBBS, Secretary.

Armstrong's Fall Fair

Attention is directed to the advertisement appearing in this issue of the Press of the 1915 Fall Fair now in preparation at Armstrong. It is promised that this will be the best ever held in our sister town. Certainly, some features are advertised which will add much interest along new lines, and these will unquestionably receive the warm support of all. Four cups are offered for district exhibits, the main one being given by the Hon. Martin Burrell.

After the Blowing Up of a German Trench. Remarkable photograph from the battle line in Flanders, showing a German trench blown to pieces by a British mine, with British soldiers who charged at the instant of the explosion, standing guard over their German captives.

AUGUST 12, 1915

CANADIAN PATRIOTIC FUND

It falls to the Weekly Chronicle, the camp bulletin of the 47th Overseas Battalion C. E. F., at Vernon, to direct attention to the wrongful handling of the Canadian Patriotic Fund at that point. It is a good omen. It will lead to the showing up of other matters which have been whispered on the streets for many weeks, and which, for the good of the cause of patriotism should be handled rough-shod by the powers that be. Where there is so much smoke there must be some fire. No doubt the Militia Department will if it has not already, take the matter in hand.

In an interview with Mr. E. D. Watts, chairman of the Vernon relief committee of the Patriotic Fund, a state of affairs was revealed that we do not think is generally known to those big-hearted people who have subscribed so generously, that the children of those men leaving for the Old Country should not suffer," says the Chronicle. "This is a difficult matter for an enlisted man for overseas service to speak on, but we have failed to find, in any paper, the facts of how this fund is being administered, simply, we are sure, because the papers of the various cities are not aware of how the money is being distributed. During these times, it is a pretty easy job for a young, married, healthy man to enlist for home guard work, and leave the older married man to find for himself, and we sincerely hope the day will speedily come, when the single man and young married man will be barred from home service, and the married men of from 45 up selected. Hundreds of men are wanted in the prairies just now for farming. Why not send the lusty, young, enlisted home guards? They will best defend their country by seeing that the bread-basket is in no way depleted."

From Mr. Watts, chairman of the relief committee, the editor of the Weekly Chronicle gleaned the following information: "That in Vernon alone 40 per cent of the money subscribed to the Patriotic Fund was being paid to families of those men enlisted for Home Defense, that is to say, that men remaining in Canada are placing in jeopardy a fund subscribed to by generous-hearted Canadians throughout the Dominion, for the aiding of families of those men who have left or are leaving these shores for the great battlefield of Europe."

"It is a difficult subject for a soldier to handle, but the excuse is simply, that it is our duty to look after and plead for those who are too far away to plead for themselves."

"Another factor that has come to light, which on the face of it is most distressing, and that is that one family has received from the Government and Patriotic Fund about \$160, and now after all this the wife has withdrawn her consent. In another similar case \$52 had been paid. Wives should not be allowed to withdraw permission except under exceptional conditions, and then the money received from the Patriotic Fund should be returned."

"A serious case at the Mobilization Camp, Vernon, at the present time is the fact that Sergeant-Major W. A. Carey of Chilliwack, who has a family of six children (one born a week

ago), has been denied a grant from the Patriotic Fund of that city, and yet there is a case of a sergeant in the Home Guard of Vernon who is receiving \$27.50 a month for his family."

AMERICA WILL BE ENRICHED

H. E. Wells, the famous British novelist and sociological writer, last week published these views on what he considers will be Europe's fate as the result of the great war, and how America will share in the spoils of war:

I will assume the war regime will continue for Europe for at least another year. Neither side will or can give in until decisively beaten and there is far less appearance now of any such decisive ending than there was a year ago, when the Germans marched upon Paris and had Calais for the taking.

We have to clear our minds of the idea of possible internal collapse on either side. I will assume, too, that whatever happens the United States will remain morally above the possibility of participation in the struggle.

One thing follows upon these assumptions. Almost inevitably the United States will take the financial scepter out of the hands of London and become the country of rich men, a usurer country, to which all other countries will be in debt.

An exhausted Germany will face peace with no gold and an enormously depreciated paper currency. France and Great Britain will be in a scarcely better position. For the necessary capital for peace recuperation, just as much as for war supplies, they will look to America. England will cease to be the fat land of the world. That doubtful privilege of fatness will pass across the Atlantic.

That does not mean that American common man will be any better off than at present. The rise in prices probably will make him practically worse off, but the American plutocrat will become the financial master of the world.

One of the practical consequences of the world's debt to America will be that imports will rise. There will be more prosperity and less stimulus in American life. The United States will in fact tend toward pre-war conditions of Great Britain, and in many ways take her place in the world's affairs.

THE A B C OF CO-OPERATION

Are you trying to get your neighbors to buy their fertilizers, feedstuffs, etc., co-operatively? This, according to an authority on co-operation, is "the A B C of co-operation," but the economies so effected have often been eye openers to farmers who have previously sat in darkness. Even if you are not a member of the Growers' Association—though this is the institution that should be receiving your support, you can still get your neighbors to join with you and make a bulk order at considerable saving to all concerned, but you can work more easily and effectively through the local organization.

On this subject, Clarence Poe, in his book "How Farmers Co-Operate and Double Profits," says: "To make my position perfectly clear, I think I ought to repeat that I believe every farmer should participate in co-operative buying, but I should not say at all that every farmer should participate in co-operative merchandising. Ordering together certain definite supplies you need in farm work—this may be a very different proposition from buying a miscellaneous assortment of goods and hiring a man to sell them, to a miscellaneous body of people. This policy may or may not be a desirable form of co-operation. But in any case farmers should join together to buy their fertilizers, feedstuffs and machinery, whether bought through a local merchant or from a distant dealer."

FARMERS ARE MANUFACTURERS

Speaking on the question of co-operative buying by farmers, Mr. George W. Russell, of the Irish Agricultural Organization Society has well said: "You must bear in mind, what is too often forgotten, that farmers are manufacturers, and as such are entitled to buy the raw materials for their industry at wholesale prices. Every other kind of manufacturer in the world gets trade terms when he buys. Those who buy, not to consume but to manufacture again, get their requirements at wholesale terms in every country in the world. If a publisher of books is approached by a bookseller he gives that bookseller trade terms, because he buys again. If you or I as private individuals want one of those books we pay the full retail price. Even the cobbler, the carpenter, the solitary artist, get trade terms. The farmer, who is as much a manufacturer as the shipbuilder, or the factory proprietor, is as much entitled to trade terms when he buys the raw materials for his industry. His seeds, fertilizers, plows, implements, cake, feeding stuffs, are the raw materials of his industry, which he uses to produce wheat, beef, mutton, pork or whatever else; and, in my opinion, there should be no differentiation between the farmer when he buys and any other kind of manufacturer. Is it any wonder that agriculture decays in countries where the farmers are expected to buy at retail prices and sell at wholesale prices? You must not, to save any row, sell the rights of farmers."

It used to be that an optimist was considered a fellow who had some unimproved real estate for sale, but today an optimist is a fellow with spuds to sell from the real estate.

Allied Fleet under a heavy fire from the Turkish forts.

This unique battle photograph gives a vivid impression of the vigorous defense put up by the Turks during the period when the fleet was pounding away at the fortifications. Shells are seen falling about the warships in the first line, sending up great columns of water.

NEW RED CROSS CAMPAIGN

Canadian Red Cross Society and St. John Ambulance Association, Vancouver, B.C.:
Editor Enderby Press:

Dear Sir: May we enlist your assistance in a Provincial-wide movement to provide the Fifth Army Medical Corps with surgical and ambulance equipment in addition to that provided by the Dominion Government. This equipment will be used for the purpose of saving the lives of British Columbia soldiers. The principal items to be provided will be special surgical instruments, X-ray apparatus and powerful motor ambulances; the latter to convey the wounded soldier from the battlefield to the hospital in the quickest possible manner, and the former to enable the surgeons in charge to quickly and painlessly determine the extent and nature of his injuries, to locate bullets and shell splinters definitely, thus enabling their extraction with a minimum loss of time and the least amount of suffering to the soldier.

Many lives have already been sacrificed because such apparatus was either lacking or inadequate in amount to enable all the wounded to receive its benefits. Many more of our boys will fail to return unless such equipment is provided.

While the enthusiasm for furnishing machine guns is at fever heat it must not be forgotten that the saving of our own soldiers is just as important as the destruction of the enemy troops.

It is estimated that at least \$25,000 will be required to meet the exigencies of the case, and the B. C. branches of the Red Cross Society and the St. John Ambulance Association have combined their forces to direct and stimulate the raising of this amount. All other patriotic organizations of the province will join hands with us. Without the co-operation of the press throughout the Province the campaign cannot meet with the success which its importance deserves.

We realize the powerful influence that the papers exert, and appeal to your patriotism to lend your columns in support of the cause, which is provincial-wide in extent. In towns and cities where Red Cross or St. John Ambulance branches have been established the treasurers of these societies will be the natural custodians of funds collected until they are forwarded to the central fund in Vancouver. Where there is no branch of either society we would request you to co-operate with the mayor or reeve (as the case may be) with respect to the funds while the campaign is in progress.

We will rely entirely on your own judgment as to how the campaign should be waged in your own particular locality, since you alone know more of local conditions than any other person. However, material will be forwarded from the head office weekly, of which you may use as much as is justifiable in your opinion.

The offices and everything in them, from furniture to typewriter ribbons, are costing the societies nothing, and the officers are giving their services gratuitously.

Yours very truly,
C. R. C. S. & S. J. A. A., per R. W. Hull, P.A.

CURING ALFALFA OFF THE GROUND

Here's the way a heavy producer of alfalfa, Otto Herold, of Lincoln, County, Ont., cures alfalfa without injury during unsettled or rainy weather without the loss of leaves, the real food-parts. The same practice is followed in parts of the state of Illinois, in Ireland, and in Germany.

To cure alfalfa above the ground, a man is sent to the bush to cut and prepare the stands. No special name is given the frame, so, for convenience the Farmer's Advocate calls the frame a 'skeleton.' Three sticks seven feet long and not more than three inches in diameter at the large end, are first cut and loosely wired together at the top, by holes being bored near the top and the wire fastened through. A 5-inch spike is

then driven into each stake 18 inches from the ground. After the skeleton is stood up in tripod form, a 6-foot stick, lighter in weight than the uprights, is laid across two spikes. Then another stick is laid on the remaining spike and brought inside of one leg of the tripod to rest on the horizontal bar. When a third horizontal bar is laid in place, the skeleton is complete. Mr. Herold recommends boring holes and using pegs in place of spikes. Such a change would make them more easily stored, as the pegs could be removed in the fall.

In stacking, a forkful is first placed on each projection of two horizontal bars, then a forkful on each bar between two legs on the tripod. After that the building may go on round and round the form until enough is laid on to weigh approximately 500 pounds, when it is dry enough to haul to the barn.

Being elevated 18 inches from the ground there is abundant opportunity for a circulation of air under the stack and up in the cone-shaped centre of it. The plants beneath the stack would not be killed out even if the alfalfa should be allowed to stand a considerable time in the field, as often happens when the crop is cured in cocks.

In preparing the alfalfa for this system of curing, it is tedded, and in some cases put on the skeleton the same day it is cut. If the dew and extra water is dried off and nothing left but the juices within the plant, it is safe. It is left thus until it is fit to draw to the mow.

Mr. Herold said to the Farmer's Advocate: "I will guarantee it to stand two weeks of unsettled weather and not spoil. It will bleach, of course, on the outside, but under that it will be fresh, and best of all, the leaves will remain on it."

BECKER'S LAST WORD

Becker, the New York police captain convicted of the killing of Rosenthal some two years ago, was finally executed at Sing Sing last Friday. He led the way to the execution chair after reading this last message to the prison officials and reporters gathered to witness the execution:

"I stand before you in my full senses, knowing that no power on earth can save me from the grave that is to receive me. In the face of that, in the teeth of those who condemn me, and in the presence of my God and your God, I proclaim my absolute innocence of the foul crime for which I must die. You are now about to witness my destruction by the state, which is organized to protect the lives of the innocent. May Almighty God pardon everyone who has contributed in any degree to my untimely death. And now on the brink of my grave I declare to the world that I am proud to have been the husband of the purest, noblest woman that ever lived—Helen Becker. This acknowledgment is the only legacy I can leave her. I bid you all goodbye. Father, I am ready to go. Signed, Charles Becker."

THE FUTURE OF CONSTANTINOPLE

Sir Edwin Pears, speaking at Leeds the other day regarding the future of Constantinople, predicted that Bulgaria and Serbia would become one nation and people. The difficulties before the Allies in the Dardanelles were, he said, enormous, but they could be surmounted. With regard to the future of Constantinople, it would be a misfortune for Russia to try to possess it. If Russia occupied Constantinople every one of the Balkan states would become jealous. In his opinion the solution of the problem lay in creating a neutral state. It would be a small state, which would go round the Sea of Marmora and include the Bosphorus on the north and the Dardanelles on the south. His suggestion was that the government should be in the hands of a commission. Such a scheme would help the countries we had assisted into freedom, and would keep the navigation of the Black Sea open.

We believe we can save you DOLLARS if you will buy your GROCERIES at our GRINDROD store. We have saved dollars for other patrons—why can't we for YOU? Give us a trial order and let us convince you. Fresh goods.

H. TOMKINSON
GENERAL GROCER
GRINDROD

SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories and a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent of sub-Agent of the district in which rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights as may be considered necessary for the working of the mine, at the rate of \$10 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.
N.B.—Unauthorized publication of this advertisement will not be paid for.—58782.

Fresh Meats

Box 43, Enderby.

At Armstrong a week or more ago, a charge of fraudulent intent against F. T. Jackson, laid by his former partner, Mr. Dakin, was dismissed by Magistrate Patten, Graham and Wright. The charge was that with intent to defraud, Jackson had inserted in the minute book of the company a resolution declaring a dividend on certain stock, when as a matter of fact no such resolution had been passed. The prosecution was conducted by A. H. Macneil, K.C., and the defense by S. S. Taylor K.C., both of Vancouver, and A. O. Cochrane of Vernon.

Fall Millinery

A. Munro & Co., Armstrong

Begin to announce that they have secured Mrs. Geo. Watson to take charge of their Millinery Department. Mrs. Watson is now selecting the latest novelties, and states she will bring to Armstrong some extremely smart pattern hats—copies of late New York models. These, together with direct imported European creations, will make—

WRITES FROM THE FRONT

Ex-Provincial Constable Oland, who left Enderby early on the outbreak of war for active service at the front, with Rein Brown, writes to B. Johnstone from the front, under date of July 13th. He wishes to be remembered to all Enderby friends. From his letter it is apparent he has been in some of the thickest of the fighting at the Ypres front. At the time Rein Brown was killed in action, Oland was in the hospital, a fever patient. He says of Rein's death: "Tell the boys Brown died like a man, and was right with his gun when he got it. He was hit in the back of his head and neck by a piece of shell, and died instantly."

"She is a warm baby, 'Buck,'" he writes, "and believe me, I will be a pleased boy when peace once more is here; and Canada is good enough for me. Talk about shells and bullets—gee whizz, there seems to be no scarcity of them in Germany. But we are having a very quiet time at present, although doing quite a bit in the front line of trenches. It is hell in a way, and yet, outside of the night when we have to stand to, expecting things to happen all the time, I am beginning to enjoy it."

"The English front is at present quiet. We are getting nothing to what the French have been getting, although we are liable to think we are doing it all. The French artillery is wonderful. The boys have great fun, 'at times,' hollering over to the Germans. You can imagine the remarks. And the Germans are just as good answering back. You see the trenches are quite close— from 500 to 30 yards apart. The snipers get quite a few, and mostly head wounds. Am getting quite expert at digging dugouts. We generally spend the day digging one and then have to get out to reserves, do a stunt there and then to billets—generally an old cow stable—but never away from the German shells; in fact it is as bad away as in the first line, in many ways. Some of our first lot are having leave in England, and as we are part of the bunch, I am looking forward to it. We only get the amount equal to six dollars a month while here—paid twice monthly—then have a feed and are broke again."

"They are sending us over some souvenirs this morning. They call them 'whizz-bangs.' They are about six pounders, and come kind of sudden as their name implies. They sure keep a variety, everything from Jack Johnsons to dum dum bullets; but the trenches are deep and thick and the dugouts pretty safe, so we manage to get along and cook our bully beef and tea."

LUMBER EXPORT TRADE

The Provincial Department of Lands is receiving frequent inquiries in connection with the development of the coast lumber export trade, and it would appear that increased attention is being paid to the securing of millsites and timber along the northern seaboard. The information circulated under instructions from the Honorable the Minister of Lands for the guidance of manufacturers both in the interior and on the coast has aroused much interest. Trade inquiries from importers in the United Kingdom, Australia, South Africa, California and other markets have been circulated among the mills, and good results are hoped for.

If its fruit ices or a delicious cup of tea and light lunch that you want, you will find them at the Brownie tea rooms.

LUMBER IN BIG DEMAND

Cessation of the war in Europe will mean an enormous demand for the lumber products of the Northwest and will make necessary greatly increased shipping facilities if utter paralyzation of the industry is to be avoided. Assurance of these facts was given members of the Federal Trade Commission at Seattle on Monday by Allan H. Daugherty, president of the Ocean Lumber Company, one of the heaviest exporters of lumber in Puget Sound. There is at present a demand for lumber in Europe that is greater than can be supplied with the existing transportation facilities, Mr. Daugherty said, and exporters could double the lumber sales abroad if ships could be found to carry the cargoes. He suggested to the commission that the big problem in the development of foreign trade was the building up of a merchant marine adequate to the needs of American shipping.

CONSTRUCTIVE WORK

During the discussion at the midsummer quarterly meeting of the Western Pine Manufacturers' Association at Spokane, Wash., Mr. McGoldrich, of the McGoldrich Lumber Company, told of attending a meeting of the Mountain Lumber Manufacturers in Calgary, recently. He said the difference between the attitude of the U. S. Government and that of Canada toward the lumber industry was marked. "The United States Government," he said, "is holding a post-mortem examination on the industry, while British Columbia is doing constructive work for the industry."

BOTH ARMS AMPUTATED

Word was received from J. H. G. Baird the past week by Hupel friends saying that, while he was awarded the Victoria Cross, the final result of the shell wounds received by him while leading his troop into action, was that both arms had to be amputated. Mr. Baird says that so soon as he is in fit condition to travel he is coming back to Hupel and have over again the good old times of yore.

MANITOBA GOES LIBERAL

According to the latest returns in the Manitoba elections held last Friday, the Liberals elected 38 members and the Conservatives 7. In three constituencies, Nelson, Grand Rapids and The Pas, the election is yet to take place.

Inclined to Listen to the Pope

Berlin, Aug. 3.—Virtually the first editorial expression of Berlin news papers relative to Germany's willingness to accept peace terms was voiced today by the Deutsche Tages Zeitung in discussing Pope Benedict's plea for the cessation of the European war. "No country would receive the Roman Catholic Church's proclamation of peace with greater respect and less prejudice than Germany," says the paper. "Germany is willing at all times to accept reasonable peace conditions in accordance with an even balance, progress and safety for all nations."

BULLETIN ON SWINE RAISING

The second edition of Bulletin No. 17 of the Federal live stock branch, entitled Swine Husbandry in Canada, has been issued, and may be had on application to the agricultural department at Ottawa. The interest in swine raising, stimulated no doubt by the high values of pork products, made such a demand for information on this subject that the first edition, printed last year, was quickly exhausted. This new edition brings up to date statistics with respect to pedigree, registration and the trade in hog products. It is shown that the total exports for the fiscal year ending March 31st, 1915, amounted to 166,048,519 pounds, as against 27,561,140 pounds the previous year. This bulletin covers the whole field of swine raising, giving the results of official experiments as well as the practices of successful farmer swine raisers. An interesting section describes the system of feeding hogs in Denmark where combinations of food are prepared according to their food units, in which one pound of grain, wheat, barley, peas, corn, etc., constitutes one food unit, which is equal to 8 pounds mangels, 4 pounds boiled potatoes, 5 pounds alfalfa, six pounds skim milk or 12 pounds whey. It is shown that the diet is varied in a definite way for pigs of different ages.

We must have GROCERIES

And if you make it a point always to get the best brands and freshest goods, you will be money ahead—particularly when you can get them at prices as low as the poorer brands are sold for. Order from us if you want the best in quality and price.

Delicious pears and plums for preserving now in stock. Leave your orders and we will deliver.
