I can guess as well as you."

\$1.00 PER YEAR

SESSION OF CITY COUNCIL

S. Carruthers Wants \$500 Damages for Trespass by City on Land Which He Claims to Own

Mayor Acres and all the aldermen were present at the regular meeting of the city council on Tuesday evening. The session was brief. A letter from the civil service commission, Victoria, asked the council's opinion of the desirability of the establishment of a superannuation fund for civil servants, to include the provincial police and firemen. The clerk was instructed to acknowledge the letter and to state that the council favored the movement.

A letter from Pemberton & Son, Victoria, respecting the sale of the present bond issue, was ordered filed.

A letter from B. F. Boyce, Kelowna, stated that he did not consider his house, near the Great Northern station, any greater fire menace than many other houses in this city, and that if the council decided to tear it down he cautioned them to be sure of their legal position before they did anything rash.

A letter from J. A. McCallum, general road foreman, stated that he had taken up with the public works department the matter of government assistance for the upkeep of main streets in municipalities forming part of the provincial highway.

A letter from F. A. McDiarmid, solicitor for the Union of B. C. Municipalities, stated that the city would not be permitted to make any further loans for the redemption of maturing bonds, and that the present bond issue would have to be sold in time to take care of the debentures falling due on July 15.

A letter from R. Campbell, acting for Stewart Carruthers, asked for \$500 damages for the city trespassing and dumping refuse on a parcel land, near the city park, claimed to be the property of the said Stewart Carruthers. The letter further stated that, a short time ago, Mr. Carruthers had rented the land to a tenant, who had had the same ploughed and was preparing to put in crop, when an alderman of the city had appeared on the scene and told him that the land belonged to the Townsite company and that the city intended to use it for a dumping grounds. Some of the aldermen were still of the opinion that the land belongs to the Townsite company, and the chairman of the finance committee stated that Mr. Carruthers should make his claim good by showing his title to the land. The matter was referred to the finance committee. Mr. Carruthers claims to have the deed and registration certificate of the land, and that the taxes are fully paid up.

A letter from the deputy provincial secretary in regard to the admission of persons to the Provincial home was ordered filed.

A resolution was adopted making obligatory for all communications

from the police board to the city council be in writing.

The chairman of the board of works reported that there was no available gravel in the city for graveling the streets, but that it could be hauled from outside the city by a truck and a trailer at a cost of about \$2 per yard, and he recommended that this be done. The recommendation was approved.

The chairman of the water and light committee reported that W. J. Galipeau had completed the repairs to the city reservoir. He also reported having received an application from G. A. Evans for electric power for a 2 h.p. motor for use in The Sun office. The report was accepted.

The chairman of the health and relief committee reported one charity case.

Aid Hull gave notice that at the next meeting he would ask leave to introduce a bylaw fixing the rate of interest on taxes after they become delinquent.

THE WEATHER

The following is the minimum and maximum temperature for each day during the past week, as recorded by the government thermometer on E. F. Laws' ranch:

Inches

Pointing a Moral

A dear old lady, writes Edwin Pugh in A Book of Laughter, was in charge of a party of her nephews and nieces. They were going the rounds of a museum, and the guide had just said in a very impressive voice:

"Here you see the waistcoat worn by Lord Nelson at the Battle of Trafalger. The bullet that ended his life went through this hole here."

And the dear old aunt said:
"You see, children! Haven't I always warned you against carelessness and untidiness? If that hole had been mended at the proper time, the bullet could not have gone through, and dear Nelson would still be alive."

Suggests Good Spirits

Some time ago a distiller bought a beautiful estate in the country, and after having the house rebuilt to suit his taste, he set about to give the place an appropriate name. Nothing that he could think of appealed to him, so he decided to consult a friend.

"Say, Bill," he said, going into the office of a friend one afternoon, "I want you to help me out of a hole."

"All right, old man," responded the friend. "State the case and you will find me right on the job."

"I want a fitting name for that new place of mine," returned the distiller. "I have considered a hundred, but none of them seem to do."

"That's an easy one, old man," was the smiling reply of the friend. "What's the matter with calling it 'Alco Hall?'"

R. Campbell returned Sunday night from a business trip to the coast cities.

GOOD BASEBALL TOURNAMENT

Grand Forks Wins From Republic, But Loses in the Finals With the Colville Team

In the baseball tournament on Monday Republic won from Danville 5 to 3, Curlew lost to Colville 10 to 0, Grand Forks won from Republic 8 to 7, but lost in the finals to Colville.

The Grand Forks Republic game was the most interesting of the day. Neither side scored in the first. Republic tallied one in the second, and another in the third. Nothing happened in the fourth, but the fifth was the lucky inning for Grand Forks, when during a wild batting rally they ran in five runs. Republic did nothing in their half, but in the sixth, with Cagnon, the Grand Forks second sacker, laid out with a badly spiked ankle, they ran in three more, the locals having also scored two in their half. In the seventh Cronant and Snyder scored for Republic, making it a tie, and things looked serious. However, with a speedy runner like McLeod on bases, Kidwell also getting a place, Fielding came up with the mighty war club and did the business. It was enough. Only three men faced Pitcher Duffield when Republic came to bat, two striking out and the other out on a fielder's fly. It was a good game and a fine finish.

The Grand Forks team, badly demoralized by Cagnon's accident, started in the next game without a rest and against the strongest team of the day. At that, they were not blanked, getting a run in the first inning, and also one in the third, with three men on bases. The second inning was bad for Grand Forks when Colville started a batting rally and scored four runs, having made one also in the first. Whitehead relieved Duffield in the box for Grand Forks, but poor support gave Colville four more runs before the end of the game, although it was the opinion of one of the umpires that Whitehead was the equal or superior of any other pitcher taking part in the tournament.

Grand Forks players: McLeod 2b, Kidwell s.s., Fielding r.f., Whitehead p., Atwood c., Jenne c.f., McIlwaine l.f., Siddell 3b, Duffield 1b. Newbauer, Tepoortin and Brasard also took part.

Colville players: Rogera s.s., Sill 2b., Hard c.f., Laird p., Butts c., Welch r.f., Trombley l.f., Werali 1b, Smith 3b.

Atwood, Cagnon and Kidwell played their customary good game. McLeod was exceptionally fast.

CONTROL OF SWARMING

[EXPERIMENTAL FARMS NOTE.]

Swarming is the bees' natural method of increase, and the instinct to swarm is particularly strong under the extremely favorable conditions for bee culture of the Canadian

spring and summer.

The uncertainty of swarming, the loss of honey following the division of the working force of the colony, the possibility of swarms escaping, and the difficulty of preventing swarming in many parts of Canada without considerable labor, all make the control of swarming quite the greatest problem in bee management.

To encourage work in the hive and to discourage the desire to swarm, plenty of room, both in the brood chamber and in the super, and large entrances should be given to all colonies as soon as conditions are favorable, but these measures will not always be enough to prevent swarming in many places, especially in the north.

If the apiary can be watched all day, it is a good plan to clip the queen's wings at fruit bloom time. When the colony swarms, remove the hive to a new stand, place on the old stand an empty hive, to which the swarm will return, the queen having been meanwhile picked up and placed in a cage in the new hive. The field bees will join the swarm and the parent colony will be so much weakened by their loss that it is not likely to swarm again.

Where the apiary can not be watched the plan of preventing swarming by examining all brood in every colony every week and destroying all queen-cells is very laborious and not always effective. A similar plan is to remove the queen at the beginning of the clover honey flow, and eight or nine days later destroy all the queen cells except one, or destroy all and give a ripe cell of select parentage. In this way a young queen is obtained which will not swarm and, besides, will be more prolific in the fall and next year than the old queen, and will be less likely to swarm next year. This plan, however, causes a certain amount of loafing until the new queen starts laying. This loafing can be much reduced by introducing a ripe queen cell at the time the queen is removed, and if this is done early enough before any preparations for swarming have been started, the bees are unlikely to build further queen cells. Where, however, one prefers to use the surer method, only those colonies that are actually preparing to swarm should be treated, and some means for quickly ascertaining if a colony is building queen cells in preparation for swarming should be employed. One of the best of these is to have the brood nest occupy two chambers, and then by prying up the upper chamber one can see at a glance if the queen cells are being built along the lower edge of the combs in this chamber.

In many parts of southern Ontario, southern Quebec and similar regions the desire to swarm is strong only during the first two or three weeks of the honey flow from clover, and the separation of queen and brood by a queen excluder, the queen being put into a lower chamber containing only empty combs and foundations may be enough to tide the colony over this period. Another good plan that may be enough to prevent swarming in this region is to use two brood chambers and confine the queen to the lower one early in the honey flow, at which time the combs in this chamber usually contain a large number of empty cells.

STUMPING PLAN MAY SAVE MONEY

Demonstration on Van- couver Island Attended by Government Of- ficials--Secret Chemicals

Victoria, May 27.—New methods of stumping, which if successful will save the province hundreds of thousands of dollars within the next few years, are being investigated by the agricultural department under the Hon. E. D. Barrow and officials of the land settlement board.

The first official demonstration took place yesterday at The Grange, the farm of C. E. Whitney Griffiths, Metchosin. Hon. Mr. Barrow and other officials attended. The demonstration was made by a man from Calgary, who has just been successful with 800 of the worst stumps in the state of Washington.

The stumping operation consisted of boring an auger hole about eighteen inches deep in the center of the stump. This hole is filled with secret chemicals mixed with coal oil. The hole is then sealed. The mixture penetrates to every part of the stump and the roots.

In two months the chemical penetration is complete. The plugs are knocked out of the hole and the stump is rendered highly inflammable and when ignited it burns completely right to the tips of the roots.

Among the 800 stumps treated in Washington there has not been a single failure. The stumps at Metchosin on which the government experiment is being made are all plugged now and carefully guarded, so that no one can fool with them. In July they will be touched off with a match.

PREMIER OLIVER HERE MAY 31

Accompanied by the Two Boundary Members-- Will Address Public Meeting in the Evening

Hon. John Oliver, prime minister of British Columbia; Hon. J. D. MacLean, minister of education and provincial secretary, and J. E. W. Thompson, member for Grand Forks, will arrive in Grand Forks on Monday, May 31. In the evening, at 8 o'clock, the premier and his associates will address a public meeting in the Empress theater. It is expected that at this meeting considerable light will be thrown on many questions affecting this district.

A fire in J. B. Cook's woodshed, Columbia, Wednesday evening called out the fire department. The shed was not seriously damaged.

FRIDAY, MAY 28, 1920

When "the rule of the road" changes on July 15 next, a great deal of confusion will undoubtedly result at first. To lessen this as much as possible, the secretary of the Good Roads League of British Columbia has made a good suggestion. His remedy is: "On the morning of July 15, before starting out, automobilists should paste a clearly printed 'sticker' on the windshield in front of them, bearing the legend, 'Turn to the Right.' There will still remain vehicles which can not conveniently carry this reminder, and government and municipal authorities should see to it that highways are properly marked with signboards on the eve of the change."

A number of complaints have recently been made by citizens that anonymous letter writers are endeavoring to damage their standing in the community or to undermine their business or official integrity. It is not easy to express to express proper contempt for this species of sneaks, because they can not be classified as belonging to the human family.

With an English one pound note a British soldier stationed on the Rhine bought a leather case containing three pairs of good scissors, a snake skin jewel case, a huge shaving brush of real badger hair and a number of other odds and ends. At the normal rate of exchange his purchases were worth at least thirty-five dollars, or more than seven times what he paid for them.

The British firm that has bought twenty-five German submarines to break up for scrap metal estimates that it will get \$12,166 worth of material from each submarine. The journey from Kiel to the junk heap is short and appropriate, and, according to the stories told about Germans in the U-boat service, no one will be so much relieved to see them go as the men who used to man them.

Of every one hundred men who fail, too much work ruins one and too little work ruins the ninety-nine others.

France, where it is the custom to pay pensions to the descendants of original pensioners until the line expires, still pays a pension to the D'Assas family, whose forefather sacrificed his life on the eve of the battle of Klosterkamp in 1760 to keep the French army from being surprised. It also pays seventy-eight pensions that date from the First Empire to descendants of heroes of Austerlitz and Friedland. It paid the last La Beissiere de Chambord six thousand livres a year until his death a few months ago, because a dauphin of France killed one of his ancestors, and until recently it paid a pension to the descendants of Montcalm. But the tremendous pension list, which is the more surprising because of the traditional thrift of the French, now has attracted the attention of economical legislators and is likely to be much curtailed.

The high cost of production seems to be world-wide. In central Africa, travelers report, the price of wives has doubled. The native who before the war could buy a fine wife,

sixteen hands high, for four spearheads or for four cows, now has to pay eight.

Little by little we are learning how far back our ancestry extends. Dr. Ameghino, director of the museum at Buenos Ayres, asserts that he has discovered evidence that man existed, made tools and built fireplaces in the tertiary age of the world. He had previously found important deposits of the stone age, including fossilized bones of huge mammals of the tertiary age, and now he has discovered a fragment of a human jaw and two molar teeth that belonged to a type of man older than any previously discovered. If his statement is scientifically true, we may yet learn that the first home of the human race was not Asia, as has been generally believed, but the American continent, south of the equator. It will also prove that this planet was inhabited by man 500,000 years ago.

Put one hundred men on an island where fish is a staple article of sustenance, says the Chicago Herald and Examiner. Twenty-five men catch fish. Twenty-five others clean the fish. Twenty-five cook the fish. Twenty-five hunt fruit and vegetables. The entire company eats what thus is gathered and prepared.

So long as everybody works there is plenty. All hands are happy.

Ten of the allotted fish catchers stop catching fish.

Ten more dry and hide part of the fish they catch.

Five continue to catch fish, but work only part of the day at it.

Fewer fish go into the community kitchen.

But the same number of men insist on having the same amount of fish to eat as they had before.

The fifty men who formerly cleaned and cooked fish have less to do owing to the undersupply of fish. But they continue to demand food.

Gradually greater burdens are laid upon the fruit and vegetable hunters. These insist upon a larger share of fish in return for their larger efforts in gathering fruit and vegetables. It is denied them, and soon twenty-five quit gathering fruit and vegetables.

But the entire one hundred men continue to insist upon their right to eat.

The daily food supply gradually shrinks. The man with two fish demands three bananas in exchange for one of them. The man with two bananas refuses to part with one of them for fewer than three fish.

Finally the ten men remaining at work quit in disgust. Everybody continues to eat. The hidden fish are brought to light and consumed. Comes a day when there is no food of any kind. Everybody on the island blames everybody else.

What would seem to be the solution? Exactly. We thought you would guess it.

For we repeat that you can't eat, buy, sell, steal, give away, hoard, wear, use, play with or gamble with what isn't.

The following advertisement appeared in Farm and Ranch Review, published in Calgary: "Poland, Germany, Austria, Roumania, Bulgaria, Jugo-Slavia, Syria, Czecho-Slovakia, Greece. We are pleased to announce that we are now in a position to bring your relatives and friends from these countries to Canada.—The Jules Hone Travel Agencies, Montreal." Why not include Italy, Persia, Abyssinia, Armenia, Palestine, Turkey and hell in the list? We presume the federal government is paying this Montreal outfit for inducing "desirable" immigrants to settle in the country. This is the reward of the men of Ypres, Vimy, Paschendale, Cambrai, Mons—that the hordes of Europe should be imported to take the bread out of the mouths of their wives and children. This is what we are paying taxes on a two billion war debt for. Is it any wonder that there are more Cadadians in the United States than in Canada today?—Kootenaian.

News Items and Comment Which Appeared in The Sun for the Corresponding Week Eighteen Years Ago

A couple of bear cubs in the window of the Maze hotel, on Bridge street, furnish amusement for children and loiterers. They are about four weeks old and were caught by Elmer Ness near Christina lake.

Miss Tenkate, proprietress of the Windsor cafe, has leased the Alberta hotel.

The Granby Smelter company is hauling silica from Frank Coryell's ranch. It will be used for lining the converters.

At the special meeting of the Grand Forks city council Wednesday night an appropriation of \$1000 was voted the Driving Park and Athletic association, to be used in connection with the Dominion day celebration.

The Grand Forks hose team has unanimously decided to send the money won as second prize in the hub and hub race at Greenwood on Victoria day to the sufferers from the Fernie disaster.

Robert McCutcheon was severely injured at Chas. Sandner's shingle mill, at the head of Christina lake, on Tuesday by getting his right foot too close to the saw. The knee cap was badly cut.

Some lively scenes have been enacted in the political rat pit at Victoria during the last two or three days. Premier Dunsmuir called Tatlow a liar, and Tatlow retorted by calling the premier a miserable cur. Both of these gentlemen may have spoken rather hastily, yet we are not in a position at present to dispute the word of either.

METHOD OF ORCAARD CULTIVATION

[EXPERIMENTAL FARMS NOTE.]

The method or system of cultivation to be adopted may be varied to some extent to meet local conditions. In reality, however, all systems should be, and in most cases are, a slight modification of the "clean cultivation and cover crop system."

The clean cultivation method calls for all the ground under and around the trees to be ploughed and frequently harrowed until around July 1.

This method has much to recommend it, viz., maximum conservation of soil moisture, excellent conditions for liberation of plant food, especially nitrogen; sightliness and cleanliness of the orchard; and control of insect pests.

In connection with this either fall or spring ploughing may be practised, the former, however, only in those localities with a favorable enough winter to so permit. The great secret of success with any system of cultivation designed to conserve moisture and liberate plant food is to get on the land as early in the spring as possible, otherwise if the land is not ploughed until late most of the advantages of cultivation are lost.

Modifications of the above consist of leaving a strip of sod about four feet in width next to the trees in old orchards where it is difficult to get close to the trees this may be practised successfully, in which case the grass is cut once or twice during the season and allowed to remain as a mulch.

In both these instances, on the cultivated portion a mulch is maintained until about July 1, when a cover crop of some sort should be sowed. If the seed is not too expensive, some leguminous crop like red clover or crimson clover at the rate of about twelve pounds per acre for the former and ten pounds for the latter, or summer vetch at the rate of fifty pounds per acre is advisable, as these will add a considerable quantity of plant food to the soil.

If too costly, rape may be used as a cover crop, at the rate of thirty pounds per acre.

The sod mulch system, if properly handled, may be advisable on moist soils where there is abundance of plant food. This system must not be confused with the sod system, which is not to be recommended. In the former, for the first few years grass or old straw is hauled onto the orchard and placed around the trees to

form a mulch. This practice is continued until the cuttings from the sod beneath the trees is sufficient in themselves to form a heavy mulch.

News of the City

The G.W.V.A. will give a "bard times" dance in the opera house on Thursday night, June 3. There will be two prizes for ladies' best worst dress and two for gent's best worst costumes. Admission 75 cents, including supper. The proceeds will be devoted to furnishing a ward in the hospital as a memorial to the late Comrade Charles Micheuer.

The members of the G.W.V.A. will march from their hall to Holy Trinity church in a body on Sunday morning next.

In the case of Omauney vs. Collins, tried the county court a couple of weeks ago, Judge Brown has handed down a decision awarding \$40 to Mrs. Omauney and \$102.80 to Collins. In the case of Laws vs. The V. V. & E. Railway company, Mr. Laws has been awarded \$600 and costs.

Ex Chief of Police Norgrove, through his counsel, J. H. Ryley, took the first steps to bring an action against the city for damages amounting to about \$500. He claims he was dismissed from office for insufficient cause and without the customary notice being given him.

The firemen's celebration on Monday was carried out according to the program. There was a good attendance at the various events, and everybody appeared to enjoy themselves.

An acre foot of water, a term commonly used in irrigation, is 43,500 cubic feet, or the amount needed to cover an acre one foot.

Two carloads of apples were shipped from Keremeos to Vancouver last week.

 Second door from Empress Theatre

News of the City

About 3 o'clock Thursday morning fire broke out in William Liddicoat's blacksmith shop on Second street, and when the fire brigade reached the scene the flames had gained such headway that the building and contents were burned to the ground. The two-storey frame building adjoining, owned by Mrs. Pocock, was also badly damaged, the roof and one wall being nearly consumed by the flames. How the fire started at that time in the morning seems to be a mystery. Mr. Liddicoat estimates his loss at between \$3000 and \$4000. He carried no insurance.

Mrs. Betsy Clary, aged 72 years and 9 months, died at her home in this city on Saturday evening last after a protracted illness. The funeral was held at 2 o'clock Tuesday afternoon. Deceased had been a resident of the city for about four years, and she had a wide circle of friends who held her in very high esteem. She is survived by four sons and eight daughters, four of whom live in this city—Mrs. T. K. Needham, Mrs. W. S. McPherson and Misses Jennie and Irene.

On Thursday last J. J. Smith was fined \$5 and costs by Magistrate McCallum in the provincial police court for dealing in hides without having applied for a license. The prosecution was conducted by Geo. Staddon, of the provincial police, for the department of agriculture under the Brand act. Smith was ordered by the court to renew his license, he having held a license for the year 1919.

A meeting of the Liberal association was held on Wednesday evening, when arrangements were made for the reception of Hon John Oliver and Hon. J. D. MacLean on Monday next.

Joseph Manly, one of Grand Forks' pioneers, returned Tuesday from south Florida, where he has made his home during the past four years. Mr Manly came here on a business trip, but he may decide to

relocate somewhere in this neighborhood. Mrs. Manly is still residing in Tampa, Florida.

The local Liberal association has been assured by the Victoria Government that the question of the establishment of a sub-land recording office in Grand Forks will be carefully considered.

The G.W.V.A. has changed its semi-monthly meeting nights from Friday to Thursday.

Good Enough for a Girl

A father and mother, says a British weekly, had brought their month old twins to an East London church to be christened. All went well until the rector asked, "And what is this child's name?"

The father drew himself up and replied, "Haig Pershing Foch Marne Mons Lloyd George Clemenceau Jones."

The rector gasped. Then, taking a deep breath, he turned to the mother, who was holding the other child, "And the name of this?"

The meek little woman smoothed her dress and whispered, "Maud."

EVERY PERSON LIVING IN Grand Forks can make excellent profits this year by investing a few dollars of their earnings through the columns of the Texas Pacific Oil News. Many thousands of people are making small and large fortunes by investing their earnings with **HONEST COMPANIES** operating in the greatest oil boom the world has ever known which is at present taking place in the state of Texas. Write to Messrs. **YORK & WEBSTER**, 419 Winch Building, Vancouver, B.C., for a copy of the Texas Pacific Oil News.

NOTICE Re ASSESSMENT ROLL, 1920

ATTENTION IS CALLED to Section 211 of 1919 Amendments to Municipal Act, which provides as follows:

"The Assessor shall prepare an Assessment Roll in which he shall set down with respect to each parcel of land:

"(f) The name or names of the registered owner thereof;

"(h) The name of any person, being the holder of a registered charge, who at any time gives notice (in writing) to the assessor of his said charge, and claims to receive notice of assessment and tax notices issued during the duration of his said charge as stated in the said notice. Such notice shall state the nature of such charge and its duration, and shall give an address to which such notices may thereafter be sent;

"(i) The name and address of any person who shall have furnished to the assessor a statutory declaration showing that he is the holder of the last agreement to purchase the lands by the terms of which he is liable to pay the taxes thereon"

JOHN A. HUTTON,
 Assessor.

Only Tablets with "Bayer Cross" are Aspirin—No others!

There is only one Aspirin, that marked with the "Bayer Cross"—all other tablets are only acid imitations.

Genuine "Bayer Tablets of Aspirin" have been prescribed by physicians for nineteen years and proved safe by millions for Pain, Headache, Neuralgia, Colds, Rheumatism, Lumbago, Neuritis.

Handy tin boxes of 12 tablets—also larger "Bayer" packages, can be had at any drug store. Made in Canada.

Aspirin is the trade mark (registered in Canada), of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company, Ltd., will be stamped with their general trade mark, the "Bayer Cross."

B. J. Averill returned on Tuesday from Franklin camp, where he has been doing assessment work.

You can not reach The Sun's numerous readers except through its advertising columns.

All free miners' licenses expire on May 31.

BUY "DIAMOND DYES" DON'T RISK MATERIAL

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished, but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued provided applicant makes improvements to extent of \$900 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company. Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for five years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS.

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING.

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

SNAPS

IN CITY PROPERTY

CITY OF GRAND FORKS will hold a sale of Acre Plots and smaller parcels of land suitable for gardening or building.

These properties have been listed at very low upset prices and may now be purchased at the City Office.

Many of these parcels of land are located on City Water Mains and Irrigation can be arranged for at low cost, while many, especially those in West Grand Forks, will come under the irrigation system when installed.

These would all be good buys at any time, but should be particularly attractive with the coming of irrigation to the valley.
