17TH YEAR—No 52

GRAND FORKS B. C., FRIDAY, OCTOBER 25, 1918

\$1.00 PER YEAR

## INVESTIGATION TO START SOON

### Smelter Charges Schedule Will be Subject of Probe by the Federal Government Shortly

VICTORIA, Oct. 24.—An early commencement of the investigation into the complaints made by mine operators in the Slocan against the schedule of smelting charges by the Consolidated Mining & Smelting company, brought into effect early this year, will be made by the federal government. Hon. Martin Burrell, federal minister of mines, has informed Hon. William Sloan. The first sitting of the commission will be held at Nelson on October 31.

Mr. Burrell also announced that the advisability of installing a testing mill and laboratory for industrial research along metallurgical lines is now being considered by the federal department.

### A Story Verified

When Bill Jewell was down in old Kentucky, a couple of weeks ago, he casually mentioned the fact that in Grand Forks we raised Irish Potatoes that weighed two pounds apiece. His auditors sarcastically inquired if he was talking about pumpkins, and Bill allowed the subject to drop. This week Mr. Jewell boxed a 2½ pound spud and sent it down to his friends.

### Save Your Wood Ashes

The experience of many generations of farmers and gardeners has proven the high value of unleached wood ashes as a fertilizer, especially for clover, corn, farm roots and vegetables and fruit crops generally. Wood ashes contain no nitrogen and supply no humus, but as far as mineral plant food is concerned there is probably no compounded mineral fertilizer on the market that is more effective and more lasting. They furnish potash, lime, phosphoric acid—the very elements taken from the soil by the forest trees, and, returned to the soil, they will supply, in the very best form and combinations, the mineral plant food required by our crops.

According to analyses by the division of chemistry, experimental farms, unleached hardwood ashes, free from sand, etc., will contain between 5 and 6 per cent potash, about 2 per cent of phosphoric acid and from 20 to 30 per cent of lime. Before the war Germany supplied all the potash used for fertilizing purposes; since that supply has been cut off, potash has tremendously increased in price, so that now it is worth almost ten times what it was in the early part of 1914, and as a consequence it has practically disappeared from commercial fertilizers. The potash in 100 pounds of good quality wood ashes is now worth from \$1 to \$1.50.

Owing to the scarcity and high price of coal, farmers will be burning more wood this winter than has been customary for many winters. We counsel them to save carefully

the ashes from their stoves, storing them in a dry place protected from the rain. Leached ashes contain very little potash, for this element is readily soluble in water.

The soils most benefited by wood ashes are light sandy and gravelly loams, and mucks and peaty soils. They are also especially valuable for sour soils deficient in lime. The application may be from 600 to 2000 pounds per acre, preferably broadcasted in the spring on the prepared land before seeding and harrowed in.

### ROBERT STEAD'S NEW NOVEL

Robert J. Stead, in his new novel, "The Cow Puncher," (Toronto, the Musson Book Co., Ltd., cloth \$1.50), has written a notable book with a western Canada setting. David Elden, the cow puncher of the story, grows to young manhood on a ranch in the foothills, outside the influence of church or school. At eighteen he is accidentally thrown into the company of a young eastern girl, who kindles in him the ambition to be somebody in the world.

With this purpose in view, young Elden leaves the ranch and goes to make his fortune in a young western city. The first night he is swindled out of all his ready cash by a gang of card-sharps, and he takes a job next morning as a coal heaver. For a time it looks as though Dave's course would be downward instead of up, but he fortunately comes under influences which revive his ambition for self-betterment.

About this time the big western real estate boom breaks out, and Dave's course is meteoric. His wealth comes quickly and goes as quickly. Following the collapse of the boom a tragedy in his love affairs sends him as an enlisted man to France. In the closing chapters is found one of the highest patriotic notes struck by any author during the war.

"The Cow Puncher" is decidedly worth while. It is interesting and refreshing, and at times inspiring, written with all Mr. Stead's intimate knowledge of the west and skill of delineation. Through the book runs a happy vein of humor and philosophy which is not the least of its charms. It is illustrated by Arthur Heming, ex-lumberman and Northwest Mounted policeman, and is announced by the publishers as an all-Canadian book—written by a Canadian, illustrated by a Canadian, and printed and bound in Canada. It should receive a warm welcome from the Canadian reading public. The United States edition is issued by Harpers.

### POTATOES SCARCE IN EASTERN PROVINCES

Manitoba may have to supply Toronto and Montreal with potatoes this winter, Col. F. J. Clarke, of the Winnipeg food board office, announced this week.

Col. Clarke has received a dispatch from the food board at Ottawa asking for quotations on potato shipments to the two provincial capitals.

Potatoes are scarce in Ontario and Quebec. Col. Clarke finds few shipments probable from Alberta and Saskatchewan, but tubers are plentiful in Manitoba, where prices range from 60c loose in car per bushel to 75c and 80c in sacks.

## TERMS OF VICTORY BOND PAYMENTS

Many people are inquiring about the terms upon which the payments for Victory loan bonds 1918 are to be made. These vary somewhat from those of the Victory loan bonds of last year. In that loan the purchasers got from the government a full half year's interest, just as though he had paid in full; that is, the government allowed him interest upon his instalments yet unpaid. Thus the interest paid for the first half year exceeded 5½ per cent for the period, upon the money actually paid. This year the terms are such that the rate of interest is exactly 5½ per cent. Thus, to give a specific example: If a person buys a \$100 bond in the present Victory loan, he can, on or before the 1st of November pay the \$100, and will be entitled to a full half year's interest on May 1, 1919. If he wishes to pay in instalments, he will pay \$10 on application, \$20 on December 6, January 6, February 6, and \$31.16 on March 6. These figures, it will be seen, are 10 per cent on application, 20 per cent on December 6, January 6, February 6, and 30 per cent on March 6. The \$1.16 represents the interest on the instalments for the deferred period.

### THE CAFETERIA SYSTEM FOR HOGS

Much of the drudgery is taken out of hog feeding by the use of the self-feeder. According to investigations carried on at the experimental farm at Ottawa, hogs, after they have reached a certain age, do better when fed in this way provided the proper mixtures are used. Strange to say, when properly handled, dangerous and wasteful overfeeding is not so likely to occur with the self-feeder as when meals are given at stated hours. It has been shown that the hogs are the best judges of when they should take food. The feeder is fully described in Special Circular No. 15, obtainable at the office of the publications branch of the department of agriculture at Ottawa. This bin-like receptacle is easily made at a cost of about \$10 even when new lumber is used in its construction.

### The Unknown Visitor

On a certain spring day in 1890 a young man about twenty years of age walked into the office of the Philadelphia Inquirer on Chestnut street. According to a writer in the Philadelphia Public Ledger, he introduced himself to Joseph Rogers, who was then at his desk, and remarked that he was on his way from India by way of Japan to London.

"May I look round the building?" was the next request of the visitor.

He began by exploring the Inquirer plant from top to bottom, asking innumerable questions about the presses and the printing. No mechanical detail was too small to escape his interrogation. But he said nothing about himself.

"I'm thinking of a trip to Japan presently," remarked Mr. Rogers.

"Let me tell you what you ought to see!" the stranger said eagerly.

Thereupon he sat down and filled six or seven sheets with a written description of "things not in the guidebooks," as he put it.

Four years later Mr. Rogers came upon the manuscript, laid away in his desk and forgotten. He was startled when he saw the signature. He said to Mr. MacIntyre:

"Do you know who that young fellow from India was that was here four years ago? It was Rudyard Kipling."

Two years later a fire destroyed part of Mr. Rogers' house, and the precious pages went up in smoke.

### 2,000,000 AMERICANS NOW IN FRANCE

WASHINGTON, Oct. 23.—At the same time that the president's reply to Germany was made public the White House gave out correspondence between Secretary Baker and President Wilson showing that more than 2,000,000 American soldiers have embarked to participate in the war overseas.

### The Use of the Apple

"Those who make a liberal use of apples will serve the dual purpose of saving for shipment overseas such articles of food as are fit for that purpose and at the same time furnish a useful and valuable food for the household."

The apple without question is the king of fruits. Whether fresh, dried, evaporated or canned, it is a wholesome food, easily prepared, attractive and palatable at all times.

"Always cook apples in earthen or granite utensils and use silver, granite or wooden spoons for stirring. The use of the apple as the basis for all manufactured jam is well known. This is due to the large amount of pectose which it contains. There is no waste to a good apple; even the paring and core may be utilized for jelly. Fruits are classified as flavor fruits and nutritive fruits—the apple comes under both of these heads."

Extracts from a little booklet issued by the fruit branch of the Dominion department of agriculture, giving 160 recipes for the use of the apple. The book can be had free on application to the publications branch, Department of Agriculture, Ottawa.

### Fruit Storage

M. J. Dean, of the division of horticulture, Olympia, Wash., state department of agriculture, is calling the attention of fruitmen, and especially apple growers, to the fact that fruit should be put into storage as soon as possible after it has been picked.

The extreme warm weather of the autumn months has had a tendency to hasten the ripening of apples, and this makes immediate storage all the more important to the grower who would realize top prices on his crop.

Since storage space is scarce in all parts of the country, the arrangement for such space as will be needed is all the more important. Storage is the one "safety first" measure against bad weather and congested shipping conditions.

Share in the war for right by saving the food the allies want.

## TANKS ARE EQUAL TO ANY TASK

### Few Important Battles Fought That Land Mon- sters Do Not Play a Conspicuous Part

PARIS, Oct. 24.—The versatility of the tanks is being emphasized in every story that comes from the battlefields.

A British tank ordered to charge a house which was a nest of German machine guns, plunged against the building amid a hail of bullets on its steel sides. The first lunge shook the house, the second brought it down about the tank, which drove through the wreckage, crushing the Germans in the house and permitting no one to escape. Five other houses were similarly reduced.

Another tank sighted a German colonel in a wheatfield and started after him. The German ran in circles, doubled and turned, but the tank relentlessly followed. He dashed into a trench and the tank ran over it; he came out and the tank followed. He bolted breathlessly across a field and the tank overtook him and forced him to surrender and took him aboard.

### A Facetious Reporter

On my first visit to Cripple Creek by train, writes Mr. Raphael Pumpelly in his Reminiscences, I had quickly risen from an altitude of six thousand feet to one of almost ten thousand, adding greatly to the apparent weight of my legs and to the effort of walking to the hotel. An enterprising reporter who had watched my registering accosted me:

"Mr. Pumpelly, would you mind telling me how you like Cripple Creek?"

"I have only just come from the station," I answered.

"Well, how do you like what you did see?"

"My eyes were glued to the board walk, and that seemed too narrow for safety in a town full of saloons."

"Were you ever in a mining camp before?"

"Yes."

"Well, how does Cripple Creek compare with those you have seen?"

I laughed. "Oh, it overtops them by several thousand feet," and I went away. The next morning some one gave me a Denver paper containing an account of the interview by its reporter.

"A Scientist in Camp.—Rachel Rumpelly has arrived in Cripple Creek. He is the author of several books on Egypt. He is about ninety years old. He sports a gray beard that reaches to his knees, and in his get-up he closely resembles Rip Van Winkle."

The moral seems to be: Don't try to have fun with the reporter.

We notice that influenza patients at the coast are given regular rations of real government liquor. It is not at all likely that we will be lucky enough to catch the disease.

GRAND FORKS, B. C.

OFFICE: COLUMBIA AVENUE AND LAKE STREET.

FRIDAY, OCTOBER 25, 1918

October 31 is National Fish day. It is the new national day which for its benefits ought to be as well known as Thanksgiving. The intention is to make known the tremendous wealth of our Canadian seas and lakes, now largely going to waste because people's tastes have run toward meat. At present the annual value of Canadian fisheries is \$52,000,000, or only about one-eighth of a dollar a week for each person. Forty-three years ago it was \$35,000,000. The fish industry and fish consumption have not kept pace with the general progress of the country. A revival is long overdue. The average price of fish is about one-half that of meat, so that the housewife who insists upon getting fish from her local dealer combats the high cost of living. National Fish day was established to give a right direction to the thought of the people respecting fish in the ordinary home diet. Eat fish October 31.

German methods of dealing with the small nations that it noisily asserts that it has "freed" are worth a moment's notice. Lithuania has elected a king, but the kaiser tells him that he must not accept and adds that the choice of Lithuania is between accept a Hohenzollern prince and submitting to absolute annexation to Germany. In Finland, where a majority of the people want a republican form of government, the Germans have compelled the temporary ministry to dissolve troublesome parliament, which refused to vote for a monarchy, and have caused it to be announced that, if the Finns do not at once establish a throne and put a German prince upon it, they will have to accept a German military government. That is what Wilhelm II and his ministers mean when they talk of the "free determination of peoples."

They are going to call the wheat harvest of 1919 "the Liberty wheat harvest," and before the 1918 crop was out of the fields plans were afoot to increase the acreage of winter wheat alone in the United States to at least 45,000,000 acres. That would be an increase of seven per cent. The total harvest this year will reach almost 900,000,000 bushels; but that does not mean what it would mean in normal times, for the "carry over" of old wheat is almost exhausted, and a reasonable amount must be laid aside to furnish a wheat reserve in case of crop failure next summer.

The great bell of the Cologne cathedral, which was cast from cannon taken by the Germans in the Franco-Prussia war of 1870, has been broken up for gun metal. Is that not a symbol of profound significance? So much of what Germany won in that war has already gone into the melting pot—so much of its material gains, so much more of its moral prestige among the nations. There is more to follow; more will follow if the war ends, not in an ineffectual compromise, but in the achievement of justice.

In a little while the geese will be going south, and we shall probably hear again the old story of the wonderful meteorological instinct that enables wild fowl to foresee a storm and to start ahead of it. Of course they have

no such instinct. They merely start as the storm begins, and outfly it. The speed of migrating ducks and geese is on the average more than eighty miles an hour, and a wind of half that velocity is a gale.

A movement, started in Montreal and continuing in Chatham, Ont., might well be carried throughout Canada. This is the contracting idea as applied to farm lands. City men with a little capital are forming syndicates to buy tractors and break idle land under the direction of practical contractors. This principle could be applied to regular farm lands and would help solve the labor problem for the Canadian farmer.

For the year ending July 1, 1919, the allies look to the American continent for 17,550,000 tons of meats, fats, sugar, feed grain and breadstuffs. This means 5,730,000 tons more than was shipped in the year ending July 1, 1918, and the surplus is 197,000 tons greater than the entire shipments based upon the average for the three years before the war. Conservation and production are absolutely essential in Canada.

It is estimated that nearly five million people have died of starvation or malnutrition during during the war. This total is more than half the population of Canada.

It is no longer the hostess at the tea urn who asks, "One lump or two?" but the coal dealer.

To be honest as the day is long is not enough; you may be kept out late at night.

There are now 270,000 women working on farms in England.

**THE ALTAR OF HUMANITY**

The Altar of Humanity! On that the lives, the hopes, the happiness, of millions have been offered in this war. Here in Canada, three thousand miles from war's fierce flame—that flame which has scorched and seared and devoured so many of our bravest, our brightest and our best—what are we offering on that altar? What can we, what should we, offer on it?

At least we can do more than many of us are doing, forego more than many of us are foregoing. Too many of us, by far, are going our ways just as though no war were on—as though the Altar of Humanity asked no sacrifice from us.

But it does—and we must make it or be forever shamed. It asks of us the sacrifice—small enough it is—of ease, pleasure, luxury, extravagance.

What are you doing about it all? With the world in travail, you must cease pleasuring—cease from much of pleasure save in sternest self-denial. Live sparingly, simply, savingly. So only can you live nobly. The reward will come. Victory!

**SACRIFICE TO SAVE**

In times like these the nations at war rightly demand sacrifices of all citizens. Particularly is this true of Canada, which has enjoyed unexempted prosperity as a result of the war. Many thousands of her sons have not hesitated to make the supreme sacrifice, but many thousands more are doing better in a financial way than they ever did before.

To the latter the easiest way to Sacrifice is open. All that is asked of them is that they Sacrifice to Save—that they give up a little in a cause for which others have sacrificed their lives. By sacrificing to save, and saving to Lend they can make the burdens of Canada lighter. It is a small demand. It is the easiest kind, yet very paying patriotism.

Sacrifice to Save; Save to Lend.

**Doing Your Bit**

- ¶ When everyone is anxious to do his part to win the war, and many are working under considerable stress, it follows that the eyes are subject to a good deal of strain.
- ¶ No one can be 100 per cent efficient and suffer from eyestrain. It is a duty you owe to yourself to have your eye troubles corrected.
- ¶ It is our business to correct those troubles.

At a parade of a company of newly called up men the drill instructor's face turned scarlet with rage as he slated a new recruit for his awkwardness. "Now, Rafferty," he roared, "you'll spoil the line with those feet. Draw them back at once, man, and get them in line." Rafferty's dignity was hurt. "Plaze, sargent," he said, "they are not mine; they're Micky Doolan's in the rear rank."

### News of the City

Sergt. Percy Taylor, who has been spending a couple of weeks with his parents in this city, left at noon today for the military hospital at the coast.

Mrs. Jeff Davis is visiting her parents at Pembroke, Ont.

Hugh McDonald has returned to Phoenix from the war zone in France.

According to the press reports, President Wilson's answer to the last German peace note was more favorably received in London and Paris than in some quarters of Grand Forks.

By order of the city health officer, the theater, pool rooms, schools, churches and Sunday schools were closed last Saturday until further notice owing to the appearance in the city of Spanish influenza. It is said that there were about ten cases in the city on Saturday. No new cases have since been reported, but the citizens do not intend to take any chances by sneezing at the disease.

One of our Calgary readers sends The Sun the following precautions to be taken to avoid the Spanish influenza: (1) Fill a small sack, made of cotton, with camphor, and attach a string or piece of tape to it which can be worn around the neck. Place the sack inside your clothing on your breast, and the effluvia of the camphor will kill the germs. The

camphor must be renewed when its strength gives out. (2) Get a box of Wampole's Paraformic Throat Lozenges and, when in a crowd at a meeting or anywhere else, dissolve one or more of these slowly in your mouth. The ingredients of the lozenges will kill any germs which may happen to enter mouth. The above prescriptions are recommended by Dr. Gershaw, the C.P.R. physician at Medicine Hat.

Captain W. Garland Foster, formerly editor and manager of the Nelson Daily News, died in France this month of wounds. He joined the army in 1915.

### LEMONS WHITEN AND BEAUTIFY THE SKIN

Make this beauty lotion cheaply for your face, neck, arms and hands.

At the cost of a small jar of ordinary cold cream one can prepare a full quarter pint of the most wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It is marvelous to smoothen rough, red hands.

You can not reach The Sun's numerous readers except through its advertising columns.

### "CASCARETS" WORK WHILE YOU SLEEP

For Sick Headache, Sour Stomach,  
Sluggish Liver and Bowels—  
Take Cascarets tonight.

Furred Tongue, Bad Taste, Indigestion, Sallow Skin and Miserable Headaches come from a torpid liver and clogged bowels, which cause your stomach to become filled with undigested food, which sours and ferments like garbage in a swill barrel. That's the first step to untold misery—indigestion, foul gases, bad breath, yellow skin, mental fears, everything that is horrible and nauseating. A Cascaret to-night will give your constipated bowels a thorough cleansing and straighten you out by morning. They work while you sleep—a 10-cent box from your druggist will keep you feeling good for months.

### WHAT TO DO IF INFLUENZA GETS YOU

[By the national conference of  
American army, navy and civilian  
doctors]

How to prevent it:

1. Avoid contact with other people so far as possible. Especially avoid crowds indoors—theaters and other places of public assemblage.
2. Avoid persons suffering from "colds," sore throat and coughs.
3. Avoid chilling the body or living rooms of temperature below 65 deg. Fah. or above 72.
4. Sleep and work in clean, fresh air.
5. Keep your hands clean and keep them out of your mouth.
6. Avoid expectorating in public places and see that others do likewise.
7. Avoid visiting the sick.
8. Eat plain nourishing food and avoid alcoholic stimulants.
9. Cover your nose with your handkerchief when you sneeze, your mouth when you cough. Change handkerchiefs frequently. Promptly disinfect soiled handkerchiefs by boiling or washing with soap and water.
10. Don't worry, and keep your feet warm. Wet feet demand prompt attention. Wet clothes are dangerous and must be removed as soon as possible.

How to treat it:

1. If you get a cold, go to bed in a well ventilated room. Keep warm.
2. Keep away from other people. Do not kiss anyone.
3. Use individual basins, knives, forks, spoons, towels, handkerchiefs, soap; wash plates and cups.
4. Every case of influenza should go to bed at once under the care of a physician. The patient should stay in bed at least three days after fever has disappeared and until convalescence is well established.
5. The patient must not cough or sneeze except when a mask or handkerchief is held before the face.
6. He (or she) should be in a warm, ventilated room.
7. There is no specific for the disease. Symptoms should be met as they arise.
8. The danger is from pneumonia. Avoid it by staying in bed while actually ill and until convalescence is fully established.
9. The after-effects of influenza are worse than the disease. Take care of yourself.
10. Strictly observe the state and city rules and regulations for the control of influenza.

### 10 CENT "CASCARETS" FOR LIVER AND BOWELS

Cure Sick Headache, Constipation,  
Biliousness, Sour Stomach, Bad  
Breath—Candy Cathartic.

No odds how bad your liver, stomach or bowels; how much your head aches, how miserable you are from constipation, indigestion, biliousness and sluggish bowels—you always get relief with Cascarets. They immediately cleanse and regulate the stomach, remove the sour, fermenting food and foul gases; take the excess bile from the liver and carry off the constipated waste matter and poison from the intestines and bowels. A 10-cent box from your druggist will keep your liver and bowels clean; stomach sweet and head clear for months. They work while you sleep.

## IT'S THE STEADY ADVERTISING That Brings the Steady Trade to You

Isn't the news of your store something like the news of the whole city?

There is news every week in Grand Forks --- some weeks more than others --- but every week there is news.

Isn't there news in your store every week? Isn't there something to advertise?

Your customers are shopping every week. Aren't you losing many of them the weeks you do not advertise?

It's the steady trade that counts with a store --- it's the steady advertising that brings the steady trade.

RESOLVE --- To use newspaper space regularly, and be sure it is in THE GRAND FORKS SUN, the paper that reaches the most consumers in this valley.

## Ride a Bicycle

Make your money go further. Saves car fare and shoe leather. Costs very little for upkeep. Gets you to work feeling fine. Lets you slip home for a hot dinner, instead of a cold lunch.

Cycling is easy and pleasant when you ride a Cleveland Bicycle, the wheel that runs smoothly and easily year after year. Look for the name-plate Cleveland. Let me explain to you my easy sale plan on terms.

## News of the City

About twenty men are employed at the Rock Candy mine at Lynch Creek. These are at present employed on constructing camp buildings, as mining operations on a large scale will not commenced until the tram line, work on which was started this week, is completed and shipping facilities are afforded. The tram line will be a mile and a half in length, and will connect with an extension of the Kettle Valley line a couple of miles above Lynch Creek. The buildings being erected at the camp are of a substantial character, and all the supplies and furnishings taken to the camp are of the best quality. Work on the wagon road from Lynch creek to the camp is now being rushed from both ends.

A Grand Forks business who made an experiment in war economies on Tuesday by smoking cartridges instead of tobacco, states that the experiment was a complete failure. The damage wrought to the pipe by the exploding shells, he says, far exceeds the difference in the cost of the two smoking materials.

The ranchers in this valley have nearly finished harvesting their potatoes, and if the weather keeps mild for a few days longer it is not anticipated that any of them will

## Speak Into The Telephone

The telephone mouthpiece has been designed to catch sound and convey it to the mechanism of the transmitter. The present shape has been determined to be the best.

Half of the telephone service difficulties of today would be prevented if persons would speak directly into the transmitter, with the lips half an inch from the mouthpiece, and speak slowly and distinctly in a moderate tone of voice, particularly when giving numbers to the operator

**BRITISH COLUMBIA TELEPHONE COMPANY, Ltd**

have to resort to the expediency of blasting the tubers out of the ground.

The potato crop in the Grand Forks valley will bring in about \$50,000 to the ranchers this year. This is a pretty nice revenue from one commodity alone.

Word was received in the city on Saturday that Pte. L. Frankovitch had been wounded in action in France.

O. E. Fisher, of Penticton, superintendent of the Kettle Valley line, was in the city on Wednesday.

Wm. Jewell and family returned on Saturday from a vacation trip to Kentucky and Tennessee.

Pte. E. Harrison returned on Wednesday from a visit with relatives at Rock Creek.

E. F. Laws has rented his ranch for next season to Mr. Kipping.

N. I. McInnes left on Wednesday for a trip to the coast cities.

## Potatoes

Digging time has arrived and the crop in British Columbia is not turning out as good as expected. There is a considerable loss due to a rot which affects a proportion of the crop. The quality of the spud is fine, but the surface is more irregular and less shapely than buyers would desire. Prices are stiffening and up country potatoes are now offering from \$32 to \$34 f.o.b. shipping point, with an advance very likely. Stockton, Cal., quotes fancy \$2 per cwt., extra choice \$1.75 to \$1.90, choice \$1.55 to \$1.75. Demand slow. The fancy names boil down to No. 1, 2 and 3, although some growers think their No. 3 is a No. 1. When greater care in grading is exercised less "comeback" or claims for potatoes not being up to grade will be made.

Vancouver Island reports a very poor potato crop. British Columbia growers should select their stock for seed and domestic use and sell as much as possible now, if present prices can be secured.

For Sale—Nine head young stock Also barrel churn and cream separator; incubator, 450 egg; combined hatcher and brooder; three brooders, new. No reasonable offer refused. Apply C. V. Meggitt, near Greenhouses.

Queen Victoria, on her last trip to Italy, visited the church at Assisi where she met a very devout monk, who escorted her through a chilly corridor. His head was shaven, and she asked him if he did not feel the draughts, wearing the tonsure the way his order did. His reply was not in Italian, as she expected, but in perfect English, tinged with Celtic brogue: "No, madam, I don't suffer at all in that way. You know, we Irish are a hot headed race!"

Employment Office—Do you need help of any kind, or do you want a position of any kind, phone or write. Headquarters for ranchers to sell or exchange stock. Let me know what you want or what you don't want, by mail or phone. L. C. Odell, Grand Forks. Box 242. Phone 80.

## Sure! High Heels Cause Corns But Who Cares Now

Because style decrees that women crowd and buckle up their tender toes in high heel footwear they suffer from corns, then they cut and trim at these painful pests which merely makes the corn grow hard. This suicidal habit may cause lockjaw and women are warned to stop it.

A few drops of a drug, called freeze-one applied directly upon a sore corn gives quick relief and soon the entire corn, root and all, lifts out without pain. Ask the drug store man for a quarter of an ounce of freeze-one, which costs very little but is sufficient to remove every hard or soft corn or callus from one's feet.

This drug is an ether compound and dries in a moment and simply shrivels up the corn without inflaming or even irritating the surrounding tissue or skin. Clip this out and pin on your wife's dresser.

You can read The Sun one year for \$1.00.

## THICK, GLOSSY HAIR FREE FROM DANDRUFF

Girls! Try It! Hair gets soft, fluffy and beautiful—Get a small bottle of Danderine.

If you care for heavy hair that glitters with beauty and is radiant with life; has an incomparable softness and is fluffy and lustrous, try Danderine.

Just one application doubles the beauty of your hair, besides it immediately dissolves every particle of dandruff. You can not have nice heavy, healthy hair if you have dandruff. This destructive scurf robs the hair of its lustre, its strength and its very life, and if not overcome it produces a feverishness and itching of the scalp; the hair roots famish, loosen and die; then the hair falls out fast. Surely get a small bottle of Knowlton's Danderine from any drug store and just try it.

Great Britain will give a new suit to 2,000,000 Yankee soldiers.

## SOUR, ACID STOMACHS, GASES OR INDIGESTION

"Pape's Diapepsin" neutralizes excessive acid in stomach, relieving dyspepsia, heartburn and distress at once.

Time it! In five minutes all stomach distress, due to acidity, will go. No indigestion, heartburn, sourness or belching of gas or eructations of undigested food, no dizziness, bloating, foul breath or headache.

Pape's Diapepsin is noted for its power in regulating upset stomachs. It is the surest, quickest stomach sweetener in the whole world, and besides it is harmless. Put an end to stomach distress at once by getting a large fifty-cent case of Pape's Diapepsin from any drug store. You realize in five minutes how needless it is to suffer from indigestion, dyspepsia or any stomach disorder caused by fermentation due to excessive acids in stomach.

## SYNOPSIS OF LAND ACT AMENDMENT

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished, but parties of not more than four may arrange for adjacent pre-emptions, with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$100 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued provided applicant makes improvements to extent of \$300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained on these claims in less than 5 years, with improvements of \$10 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesteads; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes, areas exceeding 640 acres may be leased by one person or company.

PRE-EMPTORS' FREE GRANTS ACT. The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

TOWNSITE PROPERTY ALLOTMENT ACT. Provision is made for the grant to persons holding uncompleted Agreements to Purchase from the Crown of such proportion of the land, if divisible, as the payments already made will cover in proportion to the sale price of the whole parcel. Two or more persons holding such Agreements may group their interests and apply for a proportionate allotment jointly. If it is not considered advisable to divide the land covered by an application for a proportionate allotment, an allotment of land of equal value selected from available Crown lands in the locality may be made. These allotments are conditional upon payment of all taxes due the Crown or to any municipality. The rights of persons to whom the purchaser from the Crown has agreed to sell are also protected. The decision of the Minister of Lands in respect to the adjustment of a proportionate allotment is final. The time for making application for these allotments is limited to the 1st day of May, 1919. Any application made after this date will not be considered. These allotments apply to town lots and lands of the Crown sold at public auction.

For information apply to any Provincial Government Agent or to

G. R. NADEN,  
Deputy Minister of Lands,  
Victoria, B. C.
