PAYMENTS ON CLOSED POOLS

Vernon Fruit Union Pays Finals on McIntosh, Cox Orange and Snow Apples

Vernon, Jan. 23.—Farther payments have recently been made on closed pools by the Vernon Fruit Uuion, which now bring the returns pretty well up to winter varieties, and these, as stated, may rnn on into March. The report of recent pools follows:

Final acconnt sales and payments ot McIntosh Red, Snows and Cox Orange were mailed to growers by the Vernon Fruit Union on the 24th of December.

Closing pool prices are as follows:

McIntosh—Extra Fancy, large $I.50, medium $1.80, small $1.55; Fancy, large, $1.33, medium $1.53, small $1.30; Combination F and C, $1.30; C grade, $1.28; crates, $1.18; O.K. crates, $1.33.

Cox Orange—ExtraFancy, large, $1.81; Fancy, large, $1.66; Fancy, medium, $1.86; Fancy, small, $1.71; C grade, $1.31; crates, $1.20.

Snow—Extra Fancy, medium, $1.70; Extra Fancy. small, $1.50; Fancy, large, $1.45; Fancy, medium, $1.50; Fancy, small, $1.35; C grade, $1.18; crates, $1.08.

The foregoing are Associated gross pool prices, all charges, both local and central, to be deducted.

While it is expected that certain of the smaller pools may close before the end of the present month, main winter varieties will not be fully accounted for before the latter part of Febrnary or esrly in March.

NEWS AND VIEWS FROM VICTORIA

Victoria, Jan. 22 —The efficacy of the provincial police, under direction of Attorney General Manson, has been fully demonstrated through the remarkable apprehensions of American criminals during the past two months. The finding of the murderers of Capt. Gillis and his son, owners and operators of the Beryl G., has caused police officials all over the continent to "take off their hats" to the British Columbia force. Added to that achievement was the apprehension of the perpetrators of the Nanaimo bank robbery. While the attorney general takes no particular credit to himself for the arrest of the criminals involved, it is only fair to say that he has shown shrewdness and legal judgment in the appointment of his law officers and the latter have "made a name for themselves" through their clever work. Upwards of a dozen hijackers and murderers will be brought back to Canada for trial, and it is safe to say that the almost incredible skill shown by the provincial police in tracking down the felons will act as a strong deterrent to other criminals from the United States who think British Columbia is a "soft" place in which to operate.

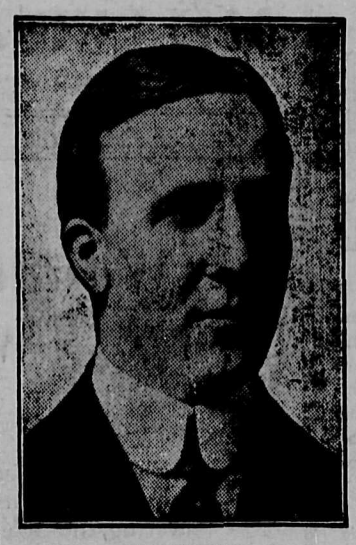
Exemptions to the regulations o the new eight-hour law have been made by the government, through the board of adjustment headed by J. D McNiven, deputy minister of labor and chairman of the board. In the interior of the province, where lumbering is one of the chief industries, some leeway has been allowed. Realizing that in many of the camps where the season only lasts from five to s ven months, the board is permitting the lumber mills to operate for nine hours daily where circumstances warrant. In the baking business, where holidays demand that an extra supply of bread be furnished at short notice, the bakeries will be permitted to operate for longer than eight hours daily. The same applies to the case of engineers in various lines of industries and in other cases where a hardship would be worked upon the businesses affected However, Hon. Mr. Manson has announced that the full letter of the new eight-hour law must be lived up to and prosecutions will follow any infringement of the regulations.

Premier Oliver's recent return from Ottawa, where he attended the federal railway conference, has been received with mixed opinions of his success with regard to the disposition of the Pacific Great Eastern railway. The Dominion government has decided to construct a railway that will give the Peace river country an outlet to the ports of the Canadian Pacific coast. Even though the proposed line may not form a direct line of communication over Pacific Great Eastern, it is felt here that the opening up of the huge empire of the north will benefit this province to such a large extent that the annual deficit and interest charges on the Pacific Great Eastern will be small i comparison.

Great Increase in Tea Consumption

The consumption of tea, it is estimated, increased in 1924 thirty nine million pounds. The price, as a result, may go to $1.00 per pound, but even then, tea is the cheapest beverage in the world—aside from water.

Passenger Man Appointed to Railway Executive



W. B. HOWARD

W. B. Howard, whose appointment as General Executive Assistant has been announced by E. W. Beatty, Chairman and President of the Canadian Pacific Railway. Mr. Howard, who has been Assistant General Passenger Agent, succeeds F. L. Wanklyn, whose retirement was announced at the end of the year.

Mr. Howard is one of the younger of the Company's officials although he entered its service twenty-five years ago. Born in Chatham, N.B., he joined the Canadian Pacific forces as junior clerk at St. John, N.B., in 1897, and two years later was promoted to the position of travelling passenger agent. Since that time his promotion has been rapid and he is well known throughout the east as a very competent officer. On two occasions Mr. Howard has been in charge of the train placed at the service of the Prince of Wales by the Canadian Pacific.

"How much do you charge for a room per week, madam?"
"Twenty five shillings up."
"But madam, I am an actor."
"Then it's twenty-five shillings down!"—Passing Show.

MEMBERSHIP OF MORE THAN 2000

British Columbia Fruit Growers' Association in Convention at Penticton This Week

The British Columbia Fruit Growers' association has been in annual convention at Pentiction this week. With more than 2000 members, this establishes a membership record of more than half the possible membership of all fruit growers in the province. Victoria and Salmon Arm tie with 266 members each for leadership in districts. Eight districts have surpassed this year all previous membership records.

Reeve J. Kirkpatrick, in his welcome, expressed the belief that the Oliver irrigated area would soon be one of the leading fruit producing districts in British Columbia. President L. E. Taylor stressed the extension of the tomato growing industry as an outstanding example of the value of united action by the producers.

Discussion of a resolution with reference to closed packages for fruit elicited from Mr. Tanner of Saanich an emphatic opinion favoring the grading of strawberries. He said Gordon Head and Saanich growers did grade, with the result that last season they got 40c per crate more for th ir berries than anywhere else.

President E. J. Chambers of the Associated Growers said they would welcome the classing of crates for apples as closed packages.

More than ordinary importance attaches to this convention, because of the extended policy of fruit merchandising during the past year. Following the convention a meeting of tae directors of the Associated Growers will be held.

The program of addresses included one on dehydration experiments, results ank recommendations, by C. S. McGillivray, based, in part, upon valuable aesults attained at the dehydration plant in Penticton.

President E. J. Chambers, Associated Growers, spoke on "Cooperative Marketing."

The resolutions for discussion covered the whole range of fruit growers' problems from irrigation of the orchard land to freight rates by rail and ocean.

The new agent general for British Columbia in London, F. A. Pauline, delivered an address which was of more than ordinary interest in view of his recent appointment aud the importance of developing in Great Britain a market for British Cylumbia fruit.

Resolutions endorsing imperial preference and Dominion marketing boards were consolidated at the convention Thursday morning, and the executive instructed to further these questions. with power to appoint a special committee to deal with the matter. The importance of the imperial preferenae question and the best method of furthering its consummation evoked considerable discussion, F. A. Pauline pointed out that such matters should be taken up through the Canadian high commissioner's office, on whom he would call immediately on his arrival in London.

The resolution fathered by E. Foley-Bennett of Penticton, requesting the federal government to establish facilities in Britein for the storage of apples. so as to eliminate the auction system of selliug, was amended so as to ask for orderly market conditious. It was pointed out by Mr. Chambers that the storage question was being thoroughly gone into by the Associated.

Thomas Bulman's resolution asking the C.P.R. to give improved boat service on Okanagan lake for the handling of fruit was passed.

Trabsportation companies will be asded to allow the commodity express rate to extend through the year for such fresh fruits and vegetables as are shipped between the dates of November 30 and May 15.

Lazy Men

I can't abide to see men throw away their tools i' that way the minute the clock begins to strike, as if they took no pleasure i' their work, aud was afraid o' doing a stroke too much. . . . I hate to see a man's arms drop down as if he was shot, before the clock's fairly struck, just as if he'd never a bit o' pride and delight in 's work. The very grindstone 'ull go on turning a bit after you loose it.—G. Eliot.

Organization Meeting of School Board

The new board of school trustees met yesterday for organization purposes. E. F. Laws was reelected chairman. The chairman appointed the following committees:

Finance—Trustees Kerman and Willis.

Management—Trustees Huffman and Vant.

Buildings—Trustees Willis and Huffman.

Grounds—Trustees Vant and Kerman.

Working all night never makes one feel half so worn out as frolicking all night.

A huge wooden, tar-paper lined shell erected over the space provided for the structure and heated by thousands of feet of steam coils connected with 380-horse power boilers, which provide a summer-like atmosphere for the carrying on of construction, is an interesting and novel feature of the arrangements made to combat the difficulty of building the new wing of the Chateau Lake Louise, the Canadian Pacific Railway's famous Rocky Mountain hotel, under winter conditions. Thanks to this innovation, the wing, despite frequent drops in temperature to far below zero, is progressing excellently and the company expects it to be ready for next summer's tourist season.

WILL REMAIN IN THIS COUNTRY

Temporary Leader of the Doukhobors Says They Have No Intention of Returning to Russia

The Doukhobors of Canada will not leave this countr, to go back to Russia if Peter Veregin (Lordly) Jr., son of the late leader, declines to come to this country.

This was the very definite statement made to the Canadian press at Calgary last Friday morning by M. W. Cazakoff, of Veregin, Sask., acting president and general manager of the Christian Community of Universal Brotherhood, Ltd., the organization under which the Doukhobors carry on their commercial transactions.

Mr. Cazakoff said there was no truth in the interview given out in Toronto last week by Michael Veregin, a distant relation of the late leader. In this interview he said that if Peter Jr. did not decide to come to Canada some eight thousand of his followers in this country would go back to Russia. He also said that if Peter Jr. did come, 15,000 followers would come with him from Russia.

A Virginia gentleman of color tells us that he doesn't hit his wife any more since he got fined in police court. "No, sah, from now on when that wife zasperates me, I'se gwine kick her good—den she can't show it to the judge."

Are those who perform grateful enough to those who look on?

"Fifty Dollars and Cost," Said the Judge

By Erwin Greer, President Greer College of Automobile Engineering.
(Copyright 1925 by Erwin Greer.)

You who read this little column of mine think that the fellow who writes it is a pretty wise bird. But did you ever wonder why I am able to write wisely? Well, this particular article cost me over $55, but you get it for nothing.

Two months ago I bought a straight eight, guaranteed to turn up nearly a hundred miles an hour. After breaking it in running around twenty-five miles an hour for one thousand miles—as every good motorist does—I decided to take friend wife on a trip through the country. And when we came to a long stretch of macadam I sampled my bus to see what speed it really could turn up. Yes, the car was as fast as the manufacturers claimed. The mntorcycle cop who arrested me proved it to the judge

The judge—an old but experienced motorist—welcomed me with open arms, and his advice ran thusly:

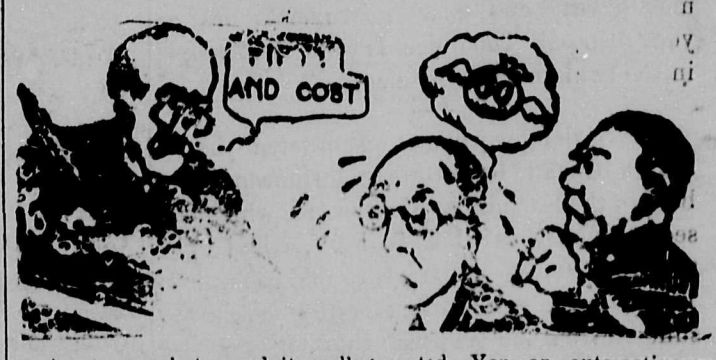
"Your first duty is to impress upon the public the fa t that you have a new car. Always drive it as fast as it will go. Thts gives people the impression you could easily win a race. When turning a corner always do it on two wheels. Everyone loves to be thrilled. Don't push the horn button until you are in the midst of a crowd. It is great sport to see people knock each other down in thei[illegible] being run over. B[illegible] you as welcome as a mad dog.

"If you desire excitement, try beating a train to a crossing, or run your car into a tree. This will bring you newspaper headlines and it is quite possible that some movie company will offer you a big salary for becoming a stunt man. Always vary your antics. To keep people guessing is the spice of life.

"Fifty dollars and cost! Now get out of here. If I ever cateh you speeding again in this county I'll send you up for life!"

And my poor wife drove poor trembling me home with remarks that would shrivel a sheet of steel.

"Now I don't get that new hat I wanted. You an automotive expert, bah! You ought to be engineer of a peanut stand. If you ever speed again I'll tell every automobile editor in the country and then your reputation won't be worth a wooden nickel. Hereafter, you drive to the office via the elevated."



And so, reader, you see by the foregoing that even I—whom you think knows all about automobiles—am only a human being after all. Did I tell that judge my right name? I did not! I'd have been given ten years if he knew who I was.

Be satisfied to drive slowly, using all possible forethought and consideration. Don't speed when you come to a straight stretch. You

Notes • Notions • Notables

John Phillips, of Los Angeles, Cal., head gardener for a big hotel, was troubled with potato bugs, so he evolved a new bug to destroy them. This polygenetic creature has the disposition of a rattlesnake, a reservoir of chemicals a little worse than carbolic acid, and a hypodermic mechanism that fitted his desire to use it. Besides all these things he has an electric battery which apparently is connected with his transmission and ignition. He has a headlight among other things, but so far as recorded no tail lights. What he has them for is unknown as he hunts the potato ugs in the daytime, but Alonzo Clackpool of New Jersey is trying to sick him on to the mosquito, and thinks he can use this ignition for a flashlight in their pursuit.

A colony for lame ducks has been discovered in California. According to annuncement of the state fish and game commission, thousands of ducks, crippled by hunters, have congregated in the sloughs of Victoria island in the delta of the San Joaquin river. The cripples, unable to stand the pace set by the ablebodied, have fallen behind and gradually formed a colony, where they obtain food by cooperative efforts. An examination of the ducks at the island failed to reveal one not crippled, according to the game commission.

A kauri tree has recently been discovered in the New Zealand bush which rises to a height of 75 feet to the first branch and measures twenty-two feet in diameter or about sixty-six feet in girth. It is estimated to contain more than 195,000 superficial feet of timber.

An inscription that is also a sort of dedication ornaments the outside af the new palatial Home of Science recently opened in Washington, D. C. It reads: "To Science, Pilot of Industry, Conqueror of Disease, Multiplier of the Harvest, Explorer of the Universe, Revealer of Nature's Law, Eternal Guide to Truth." This house of wonders is unique among scientific museums in that vistors to it are urged to handle and use auy of the exhibits. If you want to use a spectroscope, a microscope or an X-ray machine, you may do it. You can study germs or astronomy; the most delicate and exact instruments are at your disposal. The object is to interest people in the fundamentals of science.

The Soviet government has ordered that a search be made for certain subterranean chambers in the Kremlin at Moscow in which the secret library of Czar Ivan IV, called Ivan the Terrible, is supposed to be concealed. That versatile ruler and cultivated book lover suffered from the mania of thinking that he was constantly the object of persecution, and so wherever he lived for any length of time he had secret subterranean chambers constructed In the Kremlin, tradition says, he concealed his famous library of eight hundred original manuscripts, among them the priceless texts that the Greek princess Sophia Paleologue brought as her dower to her husband, the Czar Ivan III, in the fifteenth century.

The interior of the Cave of Macphelah, in southern Palestine, where are the tombs of Abraham and Sarah, Isaac and Rebecca, Jacob and Leah, was photographed for the first time not long ago. This burial ground of the old Bible patriarchs is the most famous in the world. Its authencity has never been questioned. The Jews kept it as a holy place [illegible] Christians venerated it also; and when the Mohammedans conquered Palestine they in turn kept the spot sacred. In the eleventh century the Crusaders built a castle-like church over the cave, and the Turks turned it into a mosque, which is still standing. The Moslems regard the cave as a holy place. Before the war the Christians who were permitted to enter it could be counted on the fingers of your hands. One of the last to enter was the late King Edward when he visited the Holy Land as Prince of Wales. The six places of sepulchre are marked by monumental tombs in separate chapels. Entrance is gained to those of Abraham and Sarah through silver gates. Abraham's tomb consists of a coffin like structure built up of plastered stone or marble and covered with three green carpets embroidered with gold. They are said to have been preseuted by Mohammed II, Selim I and the late Abdul-Mejid. The shrine of Sash the photographer was not allowed to enter because it was a woman's.

The speed of light was measured first by timing the elipses of Jupiter's moons; light takes about 16½ minutes to cross the earth's or it, so when the earth is on the side of its orbit away from Jupiter the eclipses will seem to occur 16½ minutes later. Several other methods of measuring the velocity of light have been worked out.

A hollow fir log, 22 feet long and 8 feet in diameter, mounted on a large truck, was introduced to motordom by Mr, and Mrs. C. F. Cave of Longview; Wash. They proposed to show easterners what a real fir splinter from the northwest woods looks like. The interior of the log is divided into a combiuetion bedroom and parlor, kitchenette, breakfast nook, brthroom with shower aud other conveniences, such as electricity and running water.

As a rule, those who cherish sorrow haven't a great deal of the real kind to cherish.

An English angler, says a London newspaper, asked a fellow sportsman whether he could tell him of a good fishing ground. "Yes," the man replied, pointing to a path marked "Private." "Go along there till you come to a field marked 'No Road.' Cross it, and on the other side you'll find a small wood where there's a board that says 'Trespassers Will Be Prosecuted.' In the middle of the wood you will find a pond marked 'No Fishing Allowed.' That's the spot."

There is too much "splendid isolation" of individuals.

About the year 2000, says an authority on biometry and vital statistics, the population of the United States will reach its greatest height at 197,274,000. Thereafter it will decline, which is good news if the number of antomobiles is going to increase in proportion to the population.

Every failure may be step nearer to success

Ancient History

[TAKEN FROM TWENTY-YEAR OLD SUN FILES.]

Local skaters are bemoaning the mild weather, which is preventing them from enjoying their favorite pastime.

Strong influences are at work in the Dominion parliament to create two new provinces, embracing the territory between Manitoba and the easterd boundary of British Columbia. The more western of the two would doubtless be called Alberta, while several names are suggested as the proper title of the other.

The first Great Northern passenger train arrived in Phoenix last Wednesday.

On Wednesday last N. McLellan & Co., the flour and feed merchants, disposed of their business to J. H. McNeil of Greenwood and E. C. Henniger & Co.

The Kettle Valley railway is asking the Dominion parliament for authority to build a branch line from Quilchina to the boundary and from Fire Valley westerly.

There are 1000 men to every 561 women in British Columbia.

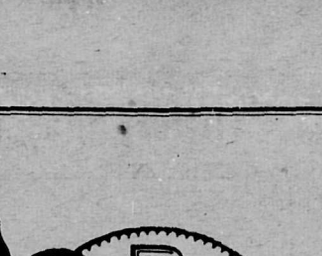
For Colds

BAYER

ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds — Headache
Pain — Neuralgia
Toothache — Lumbago
Neuritis — Rheumatism



Safe

Accept only "Bayer" package which contains proven directions.
Handy "Bayer" boxes of 12 tablets.
Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Can you allow a golden opportunity like this to pass? Remember there are no arduous rules to follow, no restriction on diet, nor are there any ill effects after. On the contrary it gives the entire system a feeling of exhaltation with increased mental and bodily vigour. Why not look and feel **30** at **50?** Do not delay, commence the treatment at once. You will never regret the slight cost Incurred for such incalculable benefits. The price of these Marvellous Tablets including Mail Charges is **3 Dollars** per bottle, dispatched in plain wrapper on receipt of amount.

Obtainable from
Dr. Legard's Laboratories,
106, Liv rpool Road, Barnsbury, London, England.

Here and There

That Hollanders who have located in Alberta are making good and are satisfied is the statement of Baron W. Van Heeckeren, of Rotterdam, after a recent tour of investigation.

The forming of a mining bureau as a branch of its activities is announced by the Winnipeg Board of Trade. The bureau is to collect data on the mining situation in the province and will do everything possible to foster greater mineral production in Manitoba.

Tourist traffic in Canada this year is likely to constitute a new record, in the opinion of the Commissioner of Parks. No estimate has been compiled as yet but the figures for 1923, which were carefully estimated at $186,000,000, indicate the value of this traffic to the Dominion.

Up to the end of October, 1924, more than 1,000 circulating libraries were in operation in Saskatchewan, as compared with about 800 at the same time in 1923. The average number of families reading each book is 17. More than half a million volumes were circulated by these libraries during the year.

Marriage isn't a failure any oftener than single blessedness is.

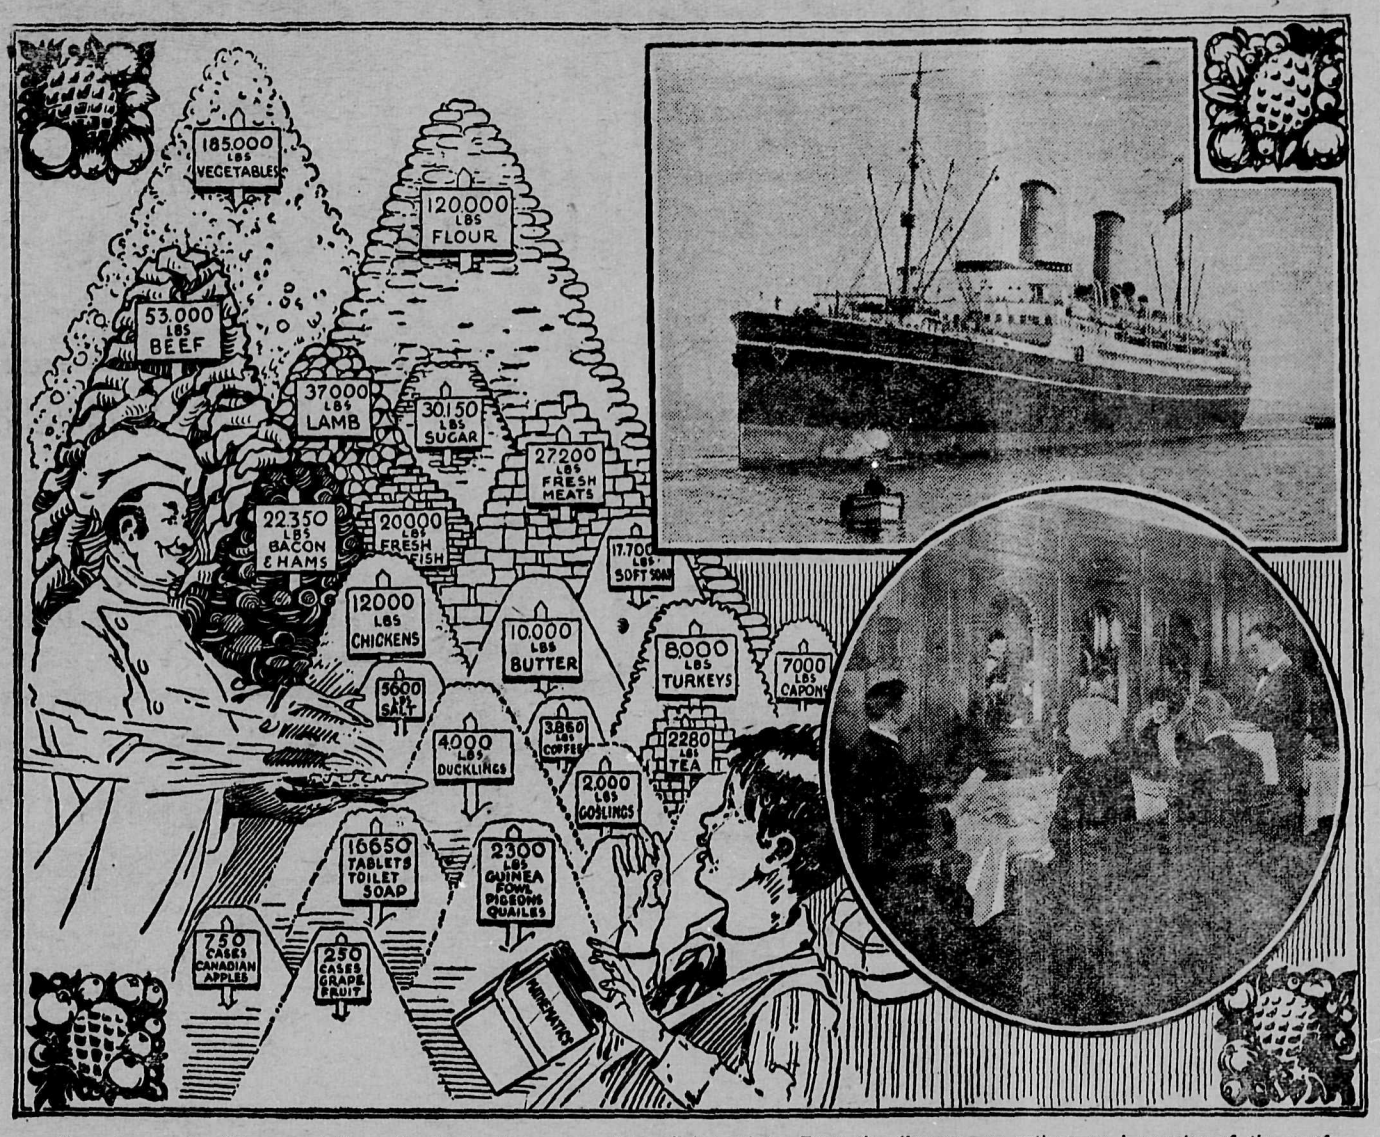
A Big Job in Housekeeping for Globe Circumnavigators.



Above is seen the "Empress of France," with inset, a corner of her dining salon. From the diagram one gathers an impression of the great amount of supplies this vessel carries on her round-the-world cruise.

BOOT-BLACKING and polishing as a steady diet is to most people more objectionable than dishwashing. Yet there are some who take a pride and pleasure in this occupation and actually shine in it. A little blacking goes a long way and gives a high polish, but knowing even this, the bootblack on the Empress of France, now stocking up for the round-the-world cruise she will commence on leaving New York January 15th did not quail when he saw a hundred-weight of boot polish being run up the gang plank for him. As a matter of fact he beamed. Each task is but a means to an end and although he may be called upon to see that many square miles of shoes are shined, he will have an opportunity of wiping the dust of many lands from them, and seeing something of these lands beside. His office was sought after, as were all others on the ship.

But dealing with huge figures, one would think that at least the chefs on this giant Canadian Pacific Steamship would be to some extent awed by what is before them. Think, Madame Housewife, of having to prepare 185,000 pounds of vegetables, of having to roast 53,000 pounds of beef, 37,000 pounds of lamb, 27,200 pounds of other fresh meats and 2,750 pounds of sausages. Would it not tend to take some of the joy out of a four month cruise? Yet this is the task of the stewards' department of the cruising Empress. Supposing that with the necessary assistance you had to prepare 12,000 pounds of chickens, 7,000 of capons, 4,000 of ducklings, 2,000 of goslings, 8,000 of turkeys, 2,300 of guinea fowl, pigeons, quail, etc., and innumerable game fowl for the table en route; would you be so keen on your trip?

All joking apart, the unattached young ladies who figure on the passenger list will be thrilled to know that the aggregate weight of the nuts aboard totals 1600 pounds, and the unattached young men will be equally pleased to learn that on all the ship there are only 40 cases of lemons. But the little boys! It will indeed go hard with them. For some hard hearted purchasing agent, with no little boys of his own, has ordered 16,650 tablets of toilet soap, 17,700 pounds of soft soap, 55 gallons of liquid salt water soap, and two tons of scouring soap, and soap powder! He thinks that 6,000 Polar Bars and Esquimaux Pies are going to compensate for all this!

It seems that Dad has been looked after very well. Canadian Pacific cruise officers tell us that for the round-the-world trip of the Empress of France, some 59,170 bottles of various shapes and sizes have been taken aboard, and in addition 54,700 bottles of mineral waters.

A few other outstanding figures in connection with the four months supplies for the 450 or 500 passengers are as follows: 750 cases of Canadian apples, 250 cases of grape fruit, 36 barrels of grapes, 500 pounds of dates, 890 lobsters and crabs, 20,000 pounds of fresh fish, 3,864 pounds of coffee, 30,150 pounds of sugar, 2,280 of tea, 250 gallons of olives, 5,600 pounds of salt, 1,780 bottles of sauce, 120,000 pounds of flour, 10,000 pounds of butter, 22,350 pounds of bacon and hams, 50,000 drinking straws, 43,000 menu cards—and so on. Fresh fruits, vegetables, fish, milk and eggs will be purchased in considerable quantities to meet requirements as the cruise progresses. Fifteen thousand, four hundred tons of fuel oil will be used by the cruising steamer.

Every district of British Columbia has a Peace River Country that only needs development to become productive of wealth

A BARGAIN IN NEWSPAPERS

An Opportunity to Win $5,000

A Beautiful Art Calender Free

The Grand Forks Sun has concluded an arrangement with The Family Herald and Weekly Star of Montreal by which we can offer the greatest bargain ever given to newspaper readers

The offer includes a full year's subscription to both papers, an art calendar with a most beautiful picture subject ready for framing, and an opportunity to win a prize of $5,000 cash.

In the Federal Election of 1921 there were 3,119,306 votes cast out of a total of 4,435,310 names on the voters list.

How many votes will be polled in the next Federal Election?

The Family Herald and Weekly Star are offering Ten Thousand Dollars in 94 prizes for the best estimate, and our arrangement with the publishers of that great weekly gives every Grand Forks Sun subscriber an opportunity to make an estimate and perhaps win the capital prize of $5,000. Some person will win. Why should it not be you?

Read This Bargain

The Grand Forks Sun Costs $1.00 per Year.

The Family Herald and Weekly Star Costs $2.00 per Year.

We now offer a full year's subscription to both papers, including a copy of The Family Herald Art Calendar and the right to make one estimate in The Family Herald Election Contest.

All for $2.00

Estimates must be made at time of subscribing, and no changes will be permitted afterwards.

First Tyro—Shield and $2.50, presented to Chas. Meek.

Second Tyro—Grant Chase. $2.

Third Tyro—Wm. Danshin, $1.

Good Sports Bup—Presented to Wm. Liddicoat.

News of the City

J. T. Lawrence returned home this evening from Penticton, where he attended the annual convention of the British Columbia Fruit Growers association. Mr. Lawrence says that there was more optimism at the convention regarding the future of the fruit industry than there has been for years.

The first statutory meeting of the new city council was held yesterday morning, when the oath of office was administered to the members by Magistrate McCallum. Congratulatory addresses were made by all the members of the board, but no official business was transacted.

There was a fair attendance at the annual general meeting of the Grand Forks irrigation district in the G.W.V.A. hall on Monday evening.

C. M. Tobiassen returned to Cascade on Monday evening from an extended vacation trip to the coast.

H. E. Woodland is in Kelowna attending a meeting of representatives of the various locals in the Associated Growers of British Columbia.

H. R. Plummer has succeeded Valentine Quinn as manager of the Vancouver office of the Granby company.

"Willie," said his mother, "I must insist that you stop shooting craps those poor little things have just as much right to live as you have."

By winning the hockey game here Wednesday night by a score of 4 to 3, Greenwood retains the Boundary intermediate championship.

The Liberal Ladies will hold their second social evening of the first series, with cards and refreshments, in the Liberal committee rooms, Tuesday, January 27. Prizes will be awarded. Everybody welcome.

Sweeping changes in the Canadian Pacific Railway's service of great benefit to the communities concerned are scheduled for January 11. They include revision of the timetable of the Vancouver express (Toronto-Vancouver), to reach Fort William and Port Arthur between 10 and 11 p.m., instead of 2 and 3 a.m., and Winnipeg at 10 a.m., instead of 2.30 p.m., as heretofore. The new times are more convenient to the Twin Cities than the old and a half-day is gained for business in Winnipeg. Regina is to be reached by the same train at 11 p.m. instead of 1.20 a.m., and Moose Jaw at midnight instead of 2.45 a.m., Regina-Saskatoon connections being thus radically improved, while arrival at Calgary at 4 p.m. enables Edmonton to be reached that evening. Vancouver is reached at 7 p.m. instead of 9.30 p.m. as previously. The Toronto Express (Vancouver-Toronto) reaches Winnipeg more conveniently, while arrival at Toronto at 8.40 a.m. will make possible connections with early morning trains for Ontario points and with day trains for American cities, thus saving more time. Gains on other trains between Montreal, Ottawa, Toronto, Chicago and Winnipeg are also scheduled. These arrangements follow the cancellation of the recently inaugurated train between Winnipeg, Montreal and Toronto, which is to come off January 10.

Radio Manufacturers Are Unable to Keep Up With the Demand

The radio industry right now is running away beyond all estimates and expectations. The manufacturers who have been longest in the field had prepared for a record-breaking season, but the season started earlier than was anticipated and few manufacturers are now able to keep their production up to their orders.

Radio apparatus is much better than t ever was. More persons are discovering that it does not require a college course in electrical engineering to make it possible to build their own radio receiving sets.

The most satisfactory feature of the increase in business is that it probably will be permanent. I do not look for the usual drop next summer says Major Hert H. Frost. By the time the new higher power stations authorized at the recent radio conference called in Washington by Secretary Hoover, will be in operation. With those high-power stations it will be possible to cut through the atmospheric disturbances which have tended to hamper summer reception.

Also, these high-power stations will make it possible for the farmer to receive his market and weather reports during the daylight hours. Heretofore such reception has been extremely difficult, and this condition kept the farmer from buying radio. At the present time probably not more than 15 per cent of all the American and Canadian farmers have receiving sets. The farmers have had a very prosperous year and I look for a large percentage of them to begin buying radio within the next few months.

Thousands of people also have been waiting before buying sets in the belief that there would be revolutionary changes in receiving sets. The best engineers in the industry are of the opinion that there will be no such change. Development will be gradual and there is no danger of a person buying a good set today and finding it obsolete a few weeks hence.

DEPARTMENT OF LANDS

NOTICE

APPLICATIONS FOR GRAZING PERMITS FOR THE SEASON OF 1925

APPLICATIONS for permits to graze livestock on the Crown range within each Grazing District of the Province of British Columbia, must be filed with the District Forester at Cranbrook, Fort George, Kamloops, Nelson, Prince Rupert, Vancouver, Vernon, and Williams Lake on or before March 31st, 1925.

Blank forms upon which to submit applications may be obtained from the District Foresters at the above named places, or from the Department of Lands, Victoria, B C,

G. R. NADEN,
Deputy Minister of Lands.

Department of Lands,
Victoria, B. C.,
January 9th, 1925.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 1,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.
