Sept 18 1523 29

GRAND FORKS is situated in the center of Grand Forks valley the premier fruit growing district of Southern British Columbia. Mining and lumbering are also important industries in districts contiguous to the city.

The Grand Forks Sun

and

Kettle Valley Orchardist

THE SUN is the favorite newspaper of the citizens of the district. It is read by more people in the city and valley than any other paper because it is fearless, reliable, clean, bright and entertaining. It is always independent but never neutral.

TWENTY-FIRST YEAR—No ~~45~~ 47 GRAND FORKS, B. C., FRIDAY, SEPTEMBER 29, 1922 "Tell me what you Know is true: I can guess as well as you." $1.00 PER YEAR

GOOD EXHIBITS AT FALL FAIR

Fruit Display of an Exceptionally Fine Quality--Other Lines Well Represented

The annual Grand Forks Fall Fair was officially opened at 7:30 last night by Superintendent Helmer of the Summerland experimental station under very favorable conditions. There was a large crowd present, and everybody put in a busy evening inspecting the exhibits, which, while not on as large a scale as those seen here in former years, in quality and attractiveness they far surpassedanything seen at other fairs in this dirtrict.

Mr. Helmer's address was rather short,the subject which he emphasized above all others being the purpose of fall fairs, which was to create competition among the farmers to excel in production. To create a desire to produce the best, he said, meant a larger yield per acre. The exhibits he had seen in the building far surpassed anything he had seen in the province this year. He complimented the ranch display of C. C. Heaven, and if he had occasion to visit the city next year he hoped to find more competition in this line. Mr. Helmer closed his remarks by welcoming Grand Forks valley to the irrigated districts of the province.

The opening address was followed by a coneert by the city band, and community singing, with E. F. Laws as song leader, closed the day's program.

During the afternoon an inspection of the Grand Forks irrigation district, Unit No. 1, was made by the officials of the fair and the water municipality, a number of visitors and some local citizens.

C. C. Heaven and Taulford Padgett have very good ranch displays.

The Grand Forks Furniture & Hardware company has an interesting display of beekeepers' suplies, and in the industrial section A. E. McDougall has an exhibit of a new kind of wall board. Frache Bros'. floral display surpasses former efforts of this firm.

In the extracted honey exhibits J. A. Hutton was awarded first prize and C. C. Heaven second. The prizes for frnits and vegetables were well distributed among the ranchers of the valley.

The displays of fancy work, paintings, amateur photography, preserves, home cooking and baking are up to those made at former fairs here.

The stock and ponltry exhibits are smaller than usual, but the grade has improved.

Owing to the wet weather prevailing today, the children's sports are being held in the fair building this afternoon.

PREPARING BEES FOR WINTER

Now that the honey crop of 1922 is practically all gathered it is time for the beekeeper to begin his preparation for the crop of 1923. The beekeepers's success depends largely upon the condition of his bees in the early spring just after coming out of winter quarters, and this condition in turn depends upon the preparation for the winier.

Three things are essential for successful wintering, namely, strong colonies consisting mainly of young bees, sufficient wholesome stores, and adequate protection from the cold. To neglect any one of these factors is to invite failure.

By strong colonies we mean populous colonies. A colony can not be too strong for the winter. These bees must be comparatively young in order to live through the winter until brood rearing is safely commenced the following spring. To get the hives filled with young bees every colony must be headed with a young, vigorous queen during August and September; therefore all colonies containing old or failing queens should be requeened not later than the last week in July. Colonies with bees covering less than eight full sized Langstroth frames at the beginning of October should be united.

A colony of bees should have not less than forty pounds of stores to carry it through the winter until new honey is coming in in the spring. The honey stored in the brood chamber is usually of uncertain quality and deficient in quantity. It should, therefore, be supplemented with either good clover or buckwheat honey, or better still, with a syrup made of two parts of pure, granulated sugar to one part water. The colony should be given enough honey, or sugar made into syrup to bring the stores up to the required weight. Even if a colony has enough natural stores in the brood chamber it is advisable to give it at least ten pounds of sugar made into syrup in order to postpone or minimize the consumption of poor honey and thus delay a possible attack of dysentery.

There are two methods of protecting the bees during the winter—either to place them in a cellar or to pack them in cases outside. For outside wintering the bees should be placed in the cases during the latter part of September or early in October and the packing placed on the bottom and all four sides. The bees should be fed the required amount of stores as rapidly as possible, then the top packing is put in place. These bees will require no further attention until the following sprin.

Bulletin No. 43, on "Wintering Bees in Canada," can be had free upon application to the pubications branch, department of agriculture, Ottawa.—C. B. Gooderham, Dominion Apiarist.

Geo. E. McIntosh, who has been acting Dominion fruit commissioner since the resignation of C. W. Baxter, has been appointed fruit commissioner of the department of agriculture at Ottawa. Following several years of journalism, Mr. McIntosh, on behalf of the Ontario Fruit Growers' association, conducted an investigation of the conditions surrounding the marketing of fruit, as well as the transportation of fruit, both within and without the province. He was engaged in this work from 1911 to 1917, when he was appointed transportation specialist in federal fruit branch, which position he has been holding up to taking over the present position. As transportation specialist Mr. McIntosh has become intimately acquainted with fruit and vegetable growers, shippers and carriers in all parts of Canada, and has become thoroughly familiar with the marketing problems of the different provinces and districts.

"LAND!"

PROCDUCER AND CONSUMER

Production does not end until the fruit reaches the consumer. This means that the shippers, brokers, jobbers and retailers are each and all "partners in production."

A commodity has a just value. The grower deserves a fair price, or, as the economists term it, "a living wage" for his product. It costs a certain amount to produce the article, so much more to carry the living expenses of the grower and his family. Above that sum each man is entitled to a fair profit, something additional which will add cheer, eomfort or whatever goes to make life really worth while to the individual. Above this this living wage to the grower should be added the actual cost of distribution.

The consumer is entitled to as low a price as the snm of these two figures, "a living wage" for the producer plus the actual cost of distribution.

There are too many hands exaeting demands from the fruit as it passes by. Too many men who take toll from the producer. These men have failed to realize that they are "partners in production." Be loyal to your association. It is the only force in the control of the growers that is fighting to reduce the breach between the grower and consumer.

THE PRAIRIE FRUIT MARKET

Calgary, September 27.—The weather during the past week has been exceptionally fine and has resulted in a big increase in the number of cars of new wheat arriving here. Threshing is general throughout Alberta and it is thought that the markets in general will soon begin to show increased activity as a result of the marketing of the new crop, which is fnlly up to expectations.

Betailers state that sales during week have been badly retarded owing to a shortage of preserving jars. There was a plentiful supply of splendid fruit to be had at prices which were probably the lowest during the season, but owing to the shortage stated above it was impossible for the housewives to take advantage of the occasion There were, however, considerable purchases of prunes and other fruit which can be kept until the containers arrive.

A shipment of very fine Pond's Seedlings and Yellow Egg plums, shipped through the O.U.G., were sold at 50c per crate, which was much below their actual value.

There is still a good demand for preserving pears, and crabapples now occupy a prominent place.

Some very nice Gravenstein and Wealthy apples are being offered on the market, but while these can be purchased at $1.35 to $1.50 the movement of No. 1 stock will naturaly be slow.

The car of Washington Bartletts which came in last week is now pretty well cleaned up, and as a result the price of Flemish Beauties should soon firm up.

The orop of local potatoes is now being harvested and from repo ris received it would appear that the total production will not be quite up to that of last year.

Local vegetables are on the market in large quantities—quite sufficient for the local demand for the time being.

A regrettable feature of the week was the selling by a large wholesale firm of crated Gravensteids at $1.35. These appies were nicely packed, of even color and grade and shouid have brought much more than the price mentioned.

Calgary wholesale prices:

Apples, Red June, Duchess, Red per box, $1.75 to	$2.00
Apples, McIntosh Red, No. 1	2.25
Apples, Wealthies, No. 1	2.15
Apples, Wealthies, No. 3, $1.75 to	2.00
Pears, B. C. Bartlett, No. 1, per box	2.25

Hyslop crabs, per box	1.50
Prunes, B.C., box, 65c to	.75
Grape, Ont., Concord, Niagara, 6 qt	.32

Washington reports rhow a big slump in prices in apples compared with 1921, and very few sales are reported. Last year at this time most of the crop was sold. Extra Fancy Winter Bananas from Olds, Wash., shipped to Chicago on September 1 sold for $1.25 as against $2.75 for the same class last year.

Foster's October Weather

Washington, Sept. 25.—October will be one of the most rainy, disagreeable months of the thirteen, of which its sixteenth day will be their center. Temperatures will go to such extremes that the three great cold waves of the last three weeks of that month will demand heat in residences and offices three weeks earlier than usual.

That means that heat will be in demand along and north of latitude 40 near and after October 6, and that frosts will be two weeks earlier than usual.

The principal reason is that three severe storm periods, centering on October 3, 12 and 27, will constantly keep the atmosphere stirred and prevent warm air from accumulating, the results being the reverse of the early September warm wave.

But the humidity—moisture in the atmosphere—will continue great of the Rockies; better weather will prevail west of the Rockies.

ENDORSES MILL CREEK PROJECT

Major Graham Is of Opinion That It Would Save the $1000 a Year on the Investment

Mayor Hull and all the aldermen were present at the regular meeting of the city council on Monday evening.

A communication from the Agricultural association invited the members of the council to a drive through the valley Thursday afternoon.

A communication from the fire department asked for the installation of a remote control of the fire alarm sireen, for a new nozzle, for a new hose cart, and for a new fire truck. Authority was given for the purchase of a new hose cart, and the other requests were referred to the fire and light committee.

Maj. Graham gave a report on the proposed Mill creek waterworks system. Both routes were feasible. The lower route would probably be the least expensive, but as a permanent improvement he preferred the upper route. He was of the opinion that the improvement would save the city $1000 a year on the investment.

The finance committee reported that out of $20,800 city debentures maturing this year, $9400 had been taken up and funds had been set aside for the retirement of the balance.

The water and light committee reported that the fire engine had been overhauled and that it was now in good condition, and recommended that connection be made either on Victoria avenue or Winnipeg avenue, along Sixth street, or completing connection on Observation avenue, to assure a more reliable water supply in the West ward. Some 3½-inch second-hand pipe was available at a reasonable figure. The committee was given authority to purchase and install the same.

The chairman of the cemetery and parks committee reported that the lower branches of trees overhanging the sidewalks had been trimmed, and recommended that the cemetery caretaker be retained during the month of October. The recommended was approved.

Mayor Hull was appointed delegate to attend the annual convention of the Union of British Columbia Municipalities, to be held in Kamloops on the 3rd of next month. In the event of not being able to attend, he was authorized to select a substitute.

A bylaw closing two short alleys in the packing house block was introduced and advanced to the third reading stage.

THE WEATHER

The following is the minimum and maximum temperature for each day during the past week, as recorded by the government thermometer on E. F. Law's ranch:

	Max.	*Min.*
Sept. 22—Friday	81	32
23—Saturday	85	38
24—Sunday	86	38
25—Monday	85	40
26—Tuesday	71	50
27—Wednesday	65	44
28—Thursday	55	38
		Inches
Rainfall		0.16

A wise man will make more opportunities than he finds.

FRIDAY, SEPTEMBER 29, 1922

While the members of the legislature and the delegates to the Liberal convention at Nelson are deliberating on questions affecting the welfare of the province, it might not be amiss if they would enquire if the mothers' pension act needs amending or whether its provisions are merely being violated. The taxpeyers who pay for the bringing up of widows' families have a right to demand that the children are brought up in a moral atmosphere. If the act does not provide for this, it should be amended so that it does, otherwise these children will be a burden on society after they reach maturity.

People who "need to be handled with gloves" are sometimes better handled with boxing gloves.

The major part of our waste by burning is really an outgrowth of the mistaken viewpoint of the general public in regard to fire. Too many persons still think that only the fire insurance companies should worry when a fire occurs. They do not stop to consider that the institution of insurance is simply a form of protection for which the many contribute to pay the losses of the comparative few. Few stop to consider the part which the fire waste plays in increasing these taxes; that when buildings are destroyed by fire, and not rebult, the taxes those properties would have yielded are added, pro rata, to the remaining structures. Neither do they realize that localities where many fires occur must maintain large fire departments, with increased budgets for men and equipment, water supply, alarm system and other necessary tems of defense. The colossal fire waste is endangering our economic future. Consequently our people must be taught in the press, in the schools and by public speaking, first, the unnecessary burden imposed by preventable fire, and, second, the way in which to eliminate it.

His royal highness Prince Albert, duke of York, second son of King George, is what Canadians of his own age might call an all-round sport. They might even call him an "all-round guy." He is twenty six years old and holds the rank commander of the British navy and captain in the royal air force. When he was fourteen he went to the school at Osborne. Two years later he entered the Royal Naval college at Dartmouth. Like other cadets, he was appointed to the training ship Cumberland, did the same work, ate the same grub, and was subject to the same restrictions. In 1913 his ship went for a six months' cruise in Canadian and West Indian waters. Later in 1913 he was transferred to the battleship Collingwood and was on her when the war broke out. Just before the war ended, having completed his naval training, the prince joined the air force as a cadet and took the full training. Before the armistice he had made flights to France.

Charles Proteus Steinmetz, Shenectady, N. Y., is called the "Electrical Wizard." In the electrical world he enjoys international reputation. Probably he is almost as well known as Edison and Marconi. He is greatly interested at present in the possibility of radio power transmission. He says: "In some respects radio power transmission exists today, for the message which you receive by radio has been carried by the power of the electro magnetic wave from the sending to the receiving station. However, while the sending station sends out electro magnetic waves of sometimes hundreds of kilowatts, this power scatters in all directions, and often less than a millionth of it is received. But this small power is sufficient, when amplified, to give us the message. The problem of power transmission essentially differs from that of the transmission for communication, as in power transmission most, or at least a large part, of the power sent out by the generating station must arrive at the receiving station, to make it economical to transmit the power. Hence, the problem of radio power transmission is that of directing the radio waves so closely that a large part of their power remains together so as to be picked up in the receiving station. Much successful work has been done in directing radio waves, but the possibility of economical power transmission seems remote."

From a strictly financial viewpoint the offer of the minister of finance to issue new 5½ per cent bonds running for either five or ten years, as desired, in exchange for bonds of the 1922 issue, is most attractive. Commenting on the advantages of the conversion, the Financial Times says: "The holders of these bonds have until September 30 to decide their course of action. From the showing already made, it appears as though a very substantial proportion of the holders will be willing to accept the new issue ratheir than the cash. This might be naturally expected in view of the scarcity of high grade bonds now offering in the market. At the same time there appears to be a very substantial supply of money seeking investment, so that the conversion plan is obviously not one to be overlooknd, as a return of 5½ per cent on such gilt edge security will soon be a thing of the past."

Ancient History

Items Taken From The Grand Forks Sun for the Correspondtng Week Twenty Years Ago

J. W. Jones the furniture man has two teams engaged at present hauling 150 tons of Tom Thumb ore from the V. V. & E. track to the Granby smelter.

A NEW COMET.

A Grand Forks business man discovered a new comet last Wednesday. The tale he told about it was longer than that which follows in the wake of Biela's comet. For a time he had things his own way, and he discoursed learnedly on the periodic visits of these heavenly tailbearers, saylng that part of their light is reflected sunlight and part original light, and that carbon is present in the cometary state. The comet of 1882, he said, was shown to contain sodium and iron, in addition to carbon. Biela's comet, which has a periodic time of 6½ years, was discovered on Feburuary 28, 1826; Donati's, discovered June 2, 1858, periodic time about 2000 years; Encke's comet paid us a visit every 329 years; Halley's is next due in 1910, et cetera, et cetera. The bright comet now visible, he stoutly maintained, had been scheduled to appear on the 23rd, but it had come a day late, probably because Mayor Holland had issued an injnnction restraining it from crossing the Hot Air road.

And thus the amateur astronomer babbled on. He would probably have gone on forever, like Tennyson's brook, had he not met a man from Columbia who kindly informed him that uew comet he was raving about was merely a tree on the mountain-top that had been set on fire by lightning. The light might easily have been mistaken for The Evening Sun—it lit up the whole valley. But for a comet—never!

"What fools these mortals be."

A mass meeting of citizens and ratepayers in Federal Union hall, Grand Forks, last Friday, called by Acting Mayor Sheads for ths purpose of memorializing the railway committee at Ottawa to grant the applica-ion of the V. V. & E. to cross the Kettle Valley lines and the C.P. R tracks, near this city, was largely attended and fully 90 per cent of those present were ratepayers. Those who signed the petition for the meeting were: Frank Sears, P. McRae, F. Clark, F. E. Cooper, Robert Petrie, E. S. Biden, S. A. Richards, H. Hunter, N. Taylor, John Rogers, Jas. Rutley, M. To most people the connecting or disconnecting of a telephone seems a simple operation of installing or removing the instrument. As a matter of fact, in every case it necessitates changes in the cables and wires overhead or underground. It also necessitates changes in central office wires and switchboard connections; in subscribers' accounts and directory listings; and frequently requires new "drop" lines from open wires or cables. The problems of station movement are among the large problems of telephone service. Because of the double operation of disconnecting and reconnecting, the work involved is often twice as great as in the case of new subscribers.

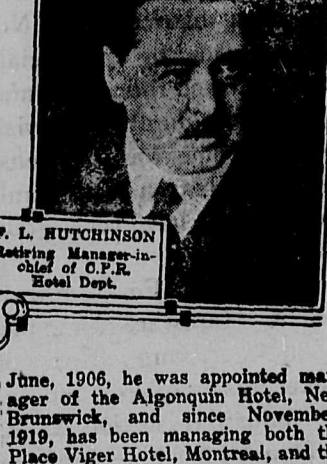
BRITISH COLUMBIA TELEPHONE COMPANY

New Manager For C.P.R. Hotels

Mr. Frank L. Hutchinson, after many years service has resigned his position as manager in chief of Canadian Pacific hotels to engage in other business, and Mr. Andrew Allerton is appointed general superintendent of Canadian Pacific hotels with offices at Montreal.

These announcements have been made in a circular issued by Mr. C. E. E. Ussher, passenger traffic manager of the C. P. R.



F. L. HUTCHINSON
Retiring Manager-in-chief of C.P.R. Hotel Dept.

ANDREW ALLERTON
New C.P.R. Chief of Hotel System.

Mr. Allerton, who is well known to Montrealers through his success as manager of the Algonquin Hotel, St. Andrews by the Sea, and the Place Viger, Montreal, entered the service of the C. P. R. in 1890 in the dining car department. In August, 1893, he was appointed manager of Windsor Street Station Dining Hall; in June, 1894, he became dining car conductor. In January, 1897, he was attached to the Chateau Frontenac, Quebec, and in February, 1905, he became clerk in the Place Viger Hotel, Montreal, of which he became manager in April, 1906. In June, 1906, he was appointed manager of the Algonquin Hotel, New Brunswick, and since November, 1919, has been managing both the Place Viger Hotel, Montreal, and the Algonquin.

Mr. Hutchinson, who is understood to have purchased a large farm in Vancouver Island, where he intends to reside, was born in London, Ontario, on August 10th, 1866. He entered the service of the Bank of Montreal in 1885 and remained there until 1901 when he became a member of the Montreal Stock Exchange. In March, 1908, he joined the C. P. R. service as assistant to the manager, Chateau Frontenac, Quebec, becoming manager in March, 1909. In June, 1911, he became assistant to the manager in chief of hotels, Montreal, and in April, 1913, manager of the Hotel Vancouver. In July, 1913, he resigned from the C. P. R. to manage the Windsor Hotel in Montreal but in April, 1915, he rejoined the service to become manager in chief of hotels.

EVENTS IN THE PASSING NEWS

(1) The Pipe of Peace, a scene in the David Thompson memorial pageant at Lake Windermere, B.C. The great explorer is here seen with the Indians after his arrival by canoe, at the reconstructed Hudson Bay Post that has been erected as a memorial museum.

(2) C. E. E. Usher, who has been appointed General Passenger Traffic Manager of the Canadian Pacific.

(3) C. B. Foster, who has been appointed Passenger Traffic Manager of the Canadian Pacific Railway.

(4) They are fond of pageants in England. The one from which this scene was taken was produced a little while ago at Harlech Castle, and told something of the history of Wales. The lady is Miss Megan Lloyd George and the knight in armour is Major Gwilym Lloyd George, her brother.

(5) 7,985 feet above the sea level, this tea room, on the Saddleback range of the Canadian Pacific Rocky Mountains, is the highest in the British Empire. Thousands of visitors had tea there this season.

(6) Kootenay House reconstructed—the David Thompson Memorial Museum, erected at Lake Windermere, B.C., to commemorate the explorations of Canada's greatest geographer. It was opened with an Indian pageant last month.

(7) The new Evangeline memorial chapel, which was last month formally opened at Grand Pre, N.S. It is a reconstruction of the little church in which, according to Longfellow, the Acadians were imprisoned before being exiled 167 years ago.

(8) The new Canadian Pacific liner "Montclare," latest addition to the Atlantic fleet, is a palatial liner. She has the most modern equipment, and is the first vessel to be fitted with a third class children's nursery.

FEDERAL CROP REPORT

Harvesting has been delayed by rain in Manitoba and Saskatchewan, but conditions generally are satisfactory and grain continues coming forward in good volume and grades. Threshing is nearing completion in Ontario, where the yield is proving about the average. Cutting of the heavy crop of corn has begun. Cereals are practically all harvested in Quebec. Weather conditions have improved the outlook in the Maritime provinces. General conditions are now favorable in British Columbia, though crops are below the average.

Throughout British Columbia, with the exception of the Cariboo and the Kootenay, warm, dry weather has been experienced, local rains improving conditions in the Cariboo and Kootenay. Harvesting is practically completed. With exception of Okanagan valley, potato crop well up to previous estimates. Apples are moving in large quantities in Okanagan. Late varieties are shaping and coloring well. Peaches and stone fruits are moving rapidly; quality good. Tomatoes are being canned in large quantities—excellent crop both in Okanagan and Kamloops districts. Pasturage generally improving

Thanksgiving Day Nov. 6

Thanksgiving day this year will be November 6. The date was fixed by parliament at the 1921 session, being designated to fall on the Monday of the week containing Armistice day, which is November 11.

A Family Necessity

No other journal caters so intimately aad minutely to the needs of the agriculturist as does the Family Herald and Weekly Star of Montreal. From his medical to his religious needs, from the health of stock to the capabilities of his machinery, from his ladies' embroidery to their pickles, from the minerals on the land to the fish in his brooks, from the books of his leisure hours to the amusement of his children, from his individual cares to his public duties, he finds companionship, help and guidance in the same old journal, which delighted his father and is the joy of his children today. He could not afford to be without the Family Herald and Weekly Star of Montreal. The subscription price is $2.90 per year.

A farm bureau report says lambs are short. But there are plenty in town.

When a man loses anything else he advertises for it, but when he loses his head he stops advertising---

Don't Lose Your Head

Railway News

Port Coquitlam, B.C.—On July 29 the city treasurer received $16,000, the C. P. R. taxes, which were not really payable until August 31. There is jubilation in the City Hall for these taxes are the first paid since the expiry of the by-law fixing the flat rate.

St. John, N.B.—All the C. P. R. employees now living who served in the recent war will have a token to commemorate their sacrifice in the shape of a scroll which is a fine piece of work and is almost a copy of the large bronze tablet unveiled by the C. P. R. here on April 28, 1922. The scroll is signed by E. W. Beatty, President C. P. R., and E. Alexander, Secretary. The inscription on the scroll reads:

"In honor of duty nobly done. This scroll serves to commemorate that, while in the service of the Canadian Pacific Railway (the recipient's name appears here), relinquished his position in response to the call of King and country and served during the Great War 1914-1918."

The base of the scroll is set off by the names of the following battles: Ypres, Festubert, the Somme, Vimy, Hill 70, Passchendaele, Amiens, Cambrai, Drocourt-Queant and Mons.

Regina.—The Saskatchewan better farming train brought its highly successful tour to a conclusion recently, and Mr. Williams, agricultural agent of the Canadian Pacific Railway Company, expresed his belief that this train, the biggest yet operated, with the biggest attendance, also got bigger and better result than any of its predecessors.

"Many silos," said Professor Winters, of the Animal Husbandry Department of the College of Agriculture, who was on the train through the whole trip, "will be built as a result of the visit of the better farming train."

Professor Potts, who was lecturing on dairying and who was in charge of the dairy exhibit car, stated that in the southern and eastern parts of the province there is a very noticeable increase in the interest taken in cow testing work, and one result of the tour of the train, he was convinced, will be that a very large number of dairymen will now adopt this method and many others, formerly doubters, are now convinced of the value of this system.

Lubrication, ignition and carburetor troubles were the chief matters upon which farmers sought the assistance of Mr. Josephson in the farm mechanics car, and he believed that an unprecedented number of power users benefitted by bringing their problems for solution to the better farming train.

Both the household science and the forestry sections were very busy throughout the trip.

In the field husbandry car Miss Brayford's bees attracted considerable attention. This lady has kept bees for many years near Wawota, and last year her output of honey reached well over 900 pounds.

J. K. Finlayson, who was in charge of the poultry car the greater part of the trip, states there seems to be a good deal of doubt regarding the cotton fronted poultry house, some complaining that the birds froze their combs. This, he said, was because the house was overcrowded, and the more hens there are the more moisture comes from the condensing breath. A hen's temperature is 106, and she can stand the cold perfectly well, as long as the air is dry. The cotton fronted poultry house, with insulated walls and properly ventilated, has been found absolutely satisfactory at the College of Agriculture.

The total attendance for the tour was 32,881, and surpassed the former best on record by 107. The difference between this year and last year would have been many more had it not been for the fact that heavy rain spoiled the last day's attendance, when three meetings were scheduled. The average daily attendance was 1,061, and the total attendance was comprised of 9,275 men; 6,332 women; 12,971 boys and girls; and 3,303 babies.

News of the City

The following delegates from the Grand Forks Liberal association to the Nelson rally left for the convention city Tuesday evening: John Donaldson, A. F. Michener, D. McPherson, T. A. Wright, C. M. Meggitt, R. L Hodgson, of Grand Forks; R. G. Ritchie and W. S. Phillips, of Cascade; A. P. Holm and O. Tambellini. of Fife. W. J. Gallipeau, one of the alternates, accompanied the party to Nelson.

The coast members of the legislature, including Premier Oliver and many of the members of his cabinet, passed through the city Tuesday evening on their way to the Liberal conference and rally at Nelson. E. C. Henniger, local member, joined the party at this point.

At a well-attended meeting of the fire department last week it was decided to urge upon the city council the necessity of installing a remote control for the fire sireen, and purchasing at as early a date as possible a fire truck, even though it were necessary to borrow the funds for the same.

W. T. Ross, who has been a patient in a Spokane hospital for a number of weeks, returned home on Saturday. He is still weak from the effects of an operation and an attack of pneumonia.

If the packing house should run short of funds, it could easily replenish its exchequer by issuing admission tickets to its sparring matches.

The contract for the rebuilding of the Carson traffic bridge has been awarded to H. W. Young, and work was commenced on the same this week.

The coast delegates to the Liberal conference and rally in Nelson passed through the city by special train Wednesday night.

Mr. aud Mrs. B. Lequime, of Midway, were visitors at the home of John Leamy for a couple of days this week.

A prominent clubwoman wants divorce because she doesn't know where her husband is. He may be at home.

The anti-dumping clause as regards the importation of fruit has been in force for some weeks.

Mr. Crawford, the Cascade merchant, was a visitor in the city yesterday.

Mrs. A. E. Hales returned this week from a visit to Spokane.

S. T. Larsen, of Rock Creek, was in the city on Tuesday.

B. J. Averill left on Monday for Oregon.

Work was started this week on the basement of the Presbyterian church.

Beekeepers' Calendar for British Columbia

Issued by the Department of Agriculture, Victoria, B. C.

SEPTEMBER—All colonies requiring it should be fed up for winter with thick syrup, so that the bees are able to store it in the combs and seal it over before the nights get too cold. Combs containing fruit juice or honey dew, which are fatal to bees in winter. should be removed and may be kept for spring feeding.

Syrup for Winter Food—Two parts of white granulated sugar to one part of water, by volume, and boiled for about 15 minutes. Add 1 oz. of cream of tartar for each 40 pounds of sugar before boiling point is reached The latter helps to invert the sugar and retard granulation. Keep well stirred until sugar is dissolved. Burnt sugar is injurious to bees. Give syrup warm, and in the evening cover feeder well to retain the heat. A level-lid can with about twenty holes pierced in the lid, large enough for a pin to pass through, and inverted over feed-hole in quilt, makes an excellent feeder. Six deep Langstroth frames filled with sealed stores are required to last the bees through the winter.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished, but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for five years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS.

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING.

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travelers, up to ten head.

To Holders of Five Year 5½ per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.
