

EIGHT-HOUR BILL

Defeated in the Legislature
by a Vote of 26
to 12.

Individual Opinion, and Not
Party Lines, Governed
the Vote.

The Hawthorthwaite bill to enforce the eight-hour day in smelters was defeated on its second reading on Wednesday afternoon by a vote of 26 to 12, as follows:

For—Hawthorthwaite, Williams, Socialists; Davidson, Labor; McNiven, Henderson, Jones, Liberals; Clifford, Fraser, Houston, McGowan, Shatford, Gifford, Conservatives—12.

Against—McBride, Green, Fulton, Cotton, Tatlow, Bowser, Price Ellison, Grant, Garder, A. Macdonald, Ross, Taylor, Wright, Young, Conservatives; Brown, Cameron, Drury, Evans, Hall, King, Munro, Murphy, MacInnes, Oliver, Patterson, Tanner, Liberals—26.

In moving the second reading of the bill, Mr. Hawthorthwaite appealed to the members to set aside all prejudices, and deal with the bill on its merits. He had no desire to stir up industrial strife in the Province; on the contrary, his object was, by procuring this legislation, to promote industrial peace and aid in the advancement of an important industry. He did not believe for one moment that any industry in the Province would be injured by the enactment of laws regulating the hours of labor, and closed with an eloquent appeal to the house to relieve smelter employees from "merciless and deadly exploitation of greedy capitalists."

Premier McBride, after complimenting the introducer of the bill on his able speech, and declaring his hearty sympathy with any measure designed to meet fair and reasonable demands of labor, proceeded to show why the bill at this juncture should not receive the assent of the legislature. In the first place he was not prepared to accept as correct Mr. Hawthorthwaite's account of the conditions in smelters. He did not consider them to be of such a dangerous and unhealthy nature as to warrant the passage of the bill. In conclusion he declared that the passage of the bill at this time was not only inopportune, but would give the Province a setback from which it would take several years to recover, a setback which would result still more injuriously to workmen.

J. A. Macdonald, leader of the Opposition, said he felt some delicacy in addressing the house on this question, owing to the fact that he happened to be connected professionally with one of the large smelters of the Province, and perhaps any words which he might utter would be attributed to personal interest in the discussion, but he felt that he must express to the house his sentiment on this important measure, for even though connected with the smelting industry, he had not one dollar invested therein. He thought it would be well, before any act of this kind should be passed, that fair opportunity should be given to both

employers and employees to come together and endeavor to agree upon a schedule of hours fair to both, and which would not work harm to the general interests of the Province, and failing in this, if it appeared that the men were still working unreasonable hours, then the legislature might properly and legitimately interfere.

Mr. Brown, of Greenwood, spoke briefly as to the conditions of labor in the smelters in the Boundary district and of the friendly relations heretofore existing between employers and employees. He feared that if the bill was passed, the smelters would close down, and by the time they reopened the men now employed would have been compelled to leave and a new class of cheap labor, possibly Mongolians, would be introduced to take their places. For these reasons he could not support the bill.

Mr. Fraser, of Grand Forks, read the telegram he had received from smelter employees asking him to support the bill, and he intimated his intention of so doing. Working in smelters was infinitely more dangerous and injurious to health than working in metalliferous mines, and if it was fair to grant an eight-hour day in the one case, in all fairness the legislature should accede to the appeal to the smelter employees. The bill before the legislature, it had been affirmed, promised to disturb the industrial relations between employers and employees. They might, however, get together and agree upon a schedule of hours just as they do upon a schedule of wages.

Mr. Houston, of Nelson, said that he represented a constituency that contained neither mines nor smelters within its limits, so that he was free to give an independent expression of opinion on the subject before the house. Moreover, being at present an Ishmaelite, he was under no party obligations. He had received telegrams from the Nelson board of trade asking him to oppose the bill. He had also received a telegram from the Nelson trades and labor council asking him to support it. It was evident, therefore, that the people of Nelson were divided on the subject. That Premier McBride had announced his intention of opposing the bill did not surprise him at all, although as minister of mines he should have been first and foremost in its defense. He pointed out that when the eight-hour law for metalliferous mines was passed, a general cry was raised that there was no demand for it. While that might be true, he would like to know how many members of the legislature would vote for its repeal. The same conditions applied to the present bill. While there may be no loud demand for it now, once in effect, he questioned if any member of the legislature in years hence would vote for its repeal.

Amusement seekers are awaiting with pleasurable anticipation the forthcoming production of "Paul Kauvar," at the Grand Forks opera house by Mr. Harold Nelson and his company. This is by all odds the strongest play the talented Canadian actor has yet had outside of the classics, and the stage settings will be in the nature of a revelation to our theatre-goers, even after the lavish production given "Quo Vadis" and "Faust" by Manager C. P. Walker.

DOINGS OF THE CITY

Taylor & Fisher Receive an
Important Contract From
the Granby Co.

Federal Labor Union Will
Give Their Annual Ball
on March 7th.

Taylor & Fisher, the local contractors, were this week awarded two important contracts by the Great Northern and Granby companies. One calls for hauling from the smelter and loading on Great Northern cars all the blister copper shipped east by the Granby company; also for unloading and hauling to the smelter all machinery consigned to the company. The other contract involves the clearing away of a large amount of rock and dirt, and preparing a foundation for the new smokestack, which will be erected between the smelter and the dam early this spring. This contract also includes the hauling of the brick for the smokestack. All the teamsters and contractors of the city put in tenders for this work, but Messrs. Taylor and Fisher had the lowest figures, and received the contracts. They think they have nearly a summer's job at the smelter, and will establish a camp there as soon as possible.

The Grand Forks Federal Labor Union No. 231, A.L.U., will give their third annual ball, on Tuesday, March 7, in Eagles' hall. It is the intention of the union to make this dance a social event, and the best music obtainable will be secured. The following committees have been appointed to take charge of the affair: Arrangement, Geo. Nye, Dan Kelly and J. Singer; floor, H. Lutley, J. Singer, Dan Kelly, John Bunting and J. C. Harris. Tickets will be \$1.00. Supper, which will be served in the hall, will be extra.

That Manager C. P. Walker intends to give the people of western Canada the very best possible is evident from what is said by the press everywhere of his latest production for Mr. Harold Nelson. The play is Steele Mackaye's masterpiece, "Paul Kauvar," in which the favorite actor plays the title-role. Complete stage settings were prepared under Mr. Walker's supervision by the Twin City Scenic Studio, of Minneapolis, whose artists are the best in the west. The costumes have been made from the original designs, and are beautiful and historically correct. From all reports Mr. Nelson's many admirers will be more than pleased with this his latest success.

Services at the Methodist church, E. Manuel, pastor, at 11 a.m. and 7:30 p.m., Sunday school and bible class at 3 p.m. The pastor will preach at both services. Morning subject, "The Cause and Cure of Religious Doubts"; evening, "Invaluable Lessons From Nebo."

City Electrician Waterston received a telegram from Wetaskiwin, Alta., Wednesday evening, containing the sad news that his father,

Andrew Waterston, had died at his home in that city on Sunday last. Mr. Waterston was over 70 years of age, and was highly respected by everybody in the community where he resided.

Geo. A. McLeod, of the McKinley mine, left on Wednesday morning for New York city.

The regular monthly dance and social given by the Ladies of the Maccabees in Eagles' hall last night was, as usual, an enjoyable affair. The attendance was good, withal the entertainment

Grand Forks has a new business institution in the shape of a traveling butcher shop. Meat by the quarter and weigh scales compose the outfit, the purchaser choosing what he desires, and paying for it.

Kirchner's orchestra, formerly of Grand Forks, supplied the music for Spokane's big French ball on Wednesday night.

The associated boards of trade for Eastern British Columbia met at Nelson on Wednesday.

A. B. Hood, who for the last year has been acting manager of the Phoenix branch of the Eastern Townships bank, has received official notice that General Manager McKinnon, of Sherbrooke, Que., has made him manager at Phoenix.

Born—In Grand Forks, B. C., on February 24, 1905, to Mr. and Mrs. C. E. Lane, a son.

Mrs. W. L. Germaine left yesterday over the Great Northern to join her husband at Vancouver.

City Engineer Reid and Electrician Waterston are still working hard thawing out frozen water pipes by electricity. Yesterday noon they commenced work in the West end, where nearly every consumer's water supply was cut off by the cold snap.

There will be a "Service of Praise" in Knox church next Sunday evening. The subject will be, "Thy Will Be Done," and some of Charlotte Elliott's famous hymns will be sung. A cordial invitation is given to all.

It is reported that Peter Larson, the well-known Western contractor, who built many miles of the main lines of the C.P.R., G.N. and N.P., has secured, in conjunction with Foley Brothers, of St. Paul, the contract for the construction of the Western extension of the Grand Trunk Pacific. It is said the contract involves \$15,000,000 or \$20,000,000, and is the largest railway contract awarded in years.

The International Coal & Coke company has reached a satisfactory arrangement with its employees and work will be resumed immediately.

In chambers, at Nelson, this week, David Whiteside, of this city, obtained an order on behalf of the plaintiff in Eastern Townships Bank vs. Yale Hotel company, for the payment out of the monies in court. In Graves vs. Hemenway et al., Mr. Whiteside obtained a final order of foreclosure.

RAILWAY MATTERS

Another Death on Great
Northern Local Con-
struction Work.

Inspector McCarthy Permits
Phoenix Branch Open-
ing March 5th.

Daniel M. Cantlon, a brakeman employed with a Great Northern ballasting crew, was badly injured in the yards in this city last Saturday evening by getting his arm caught between the drawheads of two cars while engaged in shunting. The arm was badly crushed and mangled, the bones being also injured. Dr. Northrop was immediately called, and he advised amputation, but the railway people thought the limb could be saved, and so the arm was dressed, and the man was sent to the Sacred Heart hospital in Spokane the following day. After reaching Spokane blood poisoning set in, and Cantlon died on Wednesday evening. The remains were shipped to Everett for interment. Deceased has been a resident of this city ever since ballasting on the Phoenix branch commenced, and was well liked by his fellow-workers.

On Wednesday last a special train arrived in the city, bringing William McCarthy, of the railway department at Ottawa, who was making his final inspection of the V. V. & E. extension of the Great Northern from this city to Phoenix. Since Mr. McCarthy's visit of several weeks ago the work on the new line has been completed to almost the last detail, and is now ready for the opening of passenger traffic on the 5th of March. Mr. McCarthy expressed himself as well satisfied with the condition of the roadbed, bridges, etc. In the absence of Chief Engineer Kennedy, who is in St. Paul, he was accompanied on the trip by Mr. Hale, an engineer in the Great Northern office in this city. At Mr. McCarthy's invitation, W. P. Tierney, an old friend and a C.P.R. contractor, of Nelson, was also one of the party.

Grand Forks is becoming the center of one of the railway show districts for foreign railway men on observation trips. Last week Captain Barnardiston, a member of the Royal Engineers employed in the railway service in India, arrived in Rossland. He is looking over the railway systems of this section so as to gather such information as they may give to him as to construction in mountainous districts. He is going over all the principal lines in Canada and the United States. From Vancouver he went over the C. P. R. main line east to Calgary, and back over the Crow's Nest to Rossland. Later he left there for Grand Forks and Phoenix over the Columbia and Western, and while en route he will inspect the Bulldog tunnel and the railway construction over the Gold mountains, also the climb from Grand Forks to Phoenix. He will walk from Phoenix to Greenwood, and will there take the C. P. R. train for Grand Forks, and will reach Spokane, by way of Marcus, over the Great Northern system.

GRAND FORKS, B. C.

FRIDAY, FEBRUARY 24, 1905.

A new school act has been introduced in the British Columbia legislature. It provides for a radical change in the system of contribution to the schools of the Province. Under this plan the districts in which each school is situated shall have to bear directly more of the cost of maintaining it, thus lessening the burden on the Provincial treasury.

The C. P. R. holds the honor of having the swiftest boats between America and the Orient. In a race recently between the Great Northern's new steamer, the Minnesota and the C. R. R. Empress of Japan, the Canadian boat won in the trip from Vancouver to Yokohama by the big margin of five days.

W. A. Aldridge, manager of the Canadian Pacific's mining department, who is to be manager of the Le Roi-Centre Star combination if it goes through, is credited with being the highest salaried man in British Columbia, with a retainer of from \$20,000 to \$30,000 a year from the C. P. R.

The question of securing a Provincial university is now being discussed, to meet the requirements of the growing educational development of British Columbia.

This year's convention of the British Columbia Mining association will be held in Victoria some time between the 24th and 31st of July.

Conservative members at Ottawa have chosen their respective Provincial whips. For obvious reasons no British Columbia choice was made.

Letters from Canada to Mexico may now be sent at the rate of two cents per ounce, the newspaper rate being one cent for four ounces.

At a meeting of the railway committee at Ottawa on Tuesday a bill authorizing the construction of a railway from Osoyoos lake to a point near Grand Forks was referred to a sub-committee. This is the Nicola, Kamloops and Similkameen Coal and Railway company bill which overrides certain provisions of an act of the British Columbia legislature, which is to the effect that notwithstanding anything in Federal legislation, the lieutenant-governor-in-council of British Columbia shall have control of the rates to be charged on the road. The sub-committee reported on Thursday, but Duncan Ross, member for Yale-Cariboo, objected to this road monopolizing the Kootenay and Similkameen passes, as there was only room for one or two roads at most, and this company might take up all the available space. Minister of Railways Emmerson satisfied Mr. Ross, however, that other railways were fully protected by the general railway act, as far as passes were concerned, and the bill was passed.

If you want a nice, fancy box of Candy, be sure and drop into Donaldson's. Extra large stock from which to choose.

THE RECORDS

Following are the locations, certificates of work, bills of sale, etc., recorded in the Government office at Grand Forks, B. C., of the Grand Forks mining division, from February 16 to February 23, inclusive:

Banner, $\frac{1}{2}$, Franklin camp, Donald McLaren to Frank McFarlane.

CERTIFICATES OF WORK.

Willada, Wellington camp, J. A. Nelson.

Record, Fourth of July creek, Meyer and McMynn.

SUNSET SAUNTERINGS

Wales, piano tuner. P. O. Box 325.

The Winnipeg mine, in Phoenix camp, recently purchased by W. T. Hunter of Greenwood, head of the Hunter-Kendrick company, has been bonded to the Granby company for \$15,000. The property was sold by the court to pay up certain obligations against it incurred under the administration of the mine by Richard Plewman, formerly of Rossland. The Granby people will explore the property thoroughly before any considerable part of the purchase matures price, and the belief exists that the bond will be duly taken up. In the early days the stock of the Winnipeg touched high water mark at about 33c, but immediately thereafter became of no trading value whatever. The methods of the Granby company, however, may prove the property a valuable one.

John Mitchell, national president of the United Mine Workers of America, which is opposed to politics in the unions, will address the union miners at Fernie, B. C., on Dominion day, July 1st next.

We want your patronage for Candy, Fruits, etc. We believe we are entitled to it. Why? Because we have the best, carry the largest stock and consequently can give you the best values for your money. Donaldsons, Phone 64.

Charles M. Hays, president of the Grand Trunk Pacific railway company, says there is no truth in the report from Ottawa that a point about two miles from Port Simpson, named Cunningham Inlet, has been chosen as the Pacific terminus "I suppose they will choose every place on the coast before they get through," said Mr. Hays. "It will be some time yet before we can make a choice. We have to await the hydrographic report of the admiralty, and it may be late spring or summer time before we receive it."

A rumor comes from New York that the great Guggenheims American smelting trust expects to get control of the Montreal and Boston Copper company's properties near Phoenix and Boundary Falls, B. C.

The Dominion government will take over the naval stations at Halifax and Esquimalt from the Imperial government. It is estimated that \$2,000,000 yearly will be spent on these works.

A FAMILY NECESSITY

Is a remedy capable of affording immediate relief to the hundred and one ailments that constantly arise. It may be a cold, perhaps toothache, neuralgia, pain in the back—use Nerviline, it's more penetrating, pain-subduing and powerful than any other liniment. Nerviline is at least five times stronger than ordinary remedies, and its worth in any household cannot be over-estimated. For man or beast Nerviline is a panacea for all pain, and costs only 25c per bottle. Buy Nerviline today. H. E. Woodland, druggist.

ENGLISH DOCTORS' FEES.

They Are Regulated by the Royal College of Physicians.

The specialists must be divided into two distinct classes, the surgeon proper and the pure physician. The former unquestionably gets big fees in ratio to his reputation. The famous surgeon has only to name his fee to the millionaire with appendicitis. With the fear of death before his eyes he will write his check gladly. When he has recovered he will often grumble if he does not boast. A younger and less known man will perform the same operation for a tithe of the cost, but the public, with death staring them in the face, will have the man with the big name, regardless of expense.

But the pure physician is an entirely different matter. His fees are standardized not by act of parliament, but by that autocratic body, the Royal College of Physicians. His fees for consultation at his own house are fixed at 2 guineas the first visit and a guinea for each subsequent one. For consultations away from home he receives a fee at the calculated rate of two-thirds of a guinea a mile. Elstree, twelve miles out of town, is ipso facto 8 guineas, Liverpool (201 miles) is 134 guineas, and so on pro rata. But it must be remembered that nowadays all the big provincial centers have their own specialists, and the town man is very seldom sent for unless he be one of the very biggest names and the case desperate and rich.

If the physician should accept more he transgresses that professional fetich, "medical etiquette," and is branded a quack by his less lucky brethren.

Moreover, when he arrives at a sufficient standing in the ranks of his profession the Royal College of Physicians will not elect him to their all important fellowship, the crowning qualification and high water mark of his calling.—London Mail.

The misfits of life, the square pegs in the round holes, cause all the trouble. When a square peg gets into a square hole we think it an example of genius.

It is but poor eloquence which only shows that the orator can talk.—Raynolds.

MUSIC LESSONS

Miss Anna Kent, a professional musician of Minneapolis, has arrived in the city, and has decided to remain and organize music classes. If given sufficient encouragement, she may decide to locate here permanently. Miss Kent possesses the highest testimonials from the best musicians in all parts of the country. Expert instruction on either the violin or piano at moderate rates. Those intending to avail themselves of this opportunity should call on Miss Kent at the Hotel Winnipeg for further particulars. She is also prepared to furnish music for dances, socials and church entertainments at reasonable charges.

CATARRH, PNEUMONIA, CONSUMPTION

Death's fateful triuity they are often called. Catarrh is the first stage, pneumonia often follows, and consumption finally exacts the full penalty. This can all be averted by using healing, balsamic Catarrh-ozone, an antiseptic that penetrates the remotest air cells of the lungs. Catarrh-ozone reaches the entire mucous surface of the throat and breathing apparatus; it carries health wherever it goes, brings instant relief and is absolutely certain to cure. Don't delay, get Catarrh-ozone today. It means health, certain cure. Two months' treatment \$1.00, trial size 25c. Catarrh-ozone is guaranteed. H. E. Woodland, druggist.

If your watch needs repairing, take it to White Bros. All work guaranteed.

Synopsis of Regulations Disposal of Minerals on Dominion Lands in Manitoba, the North-West Territories and the Yukon Territory.

COAL—Coal lands may be purchased for \$10 per acre for soft coal and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton of 2000 pounds shall be collected on gross output.

QUARTZ—Persons of eighteen years and over and joint stock companies holding free miner's certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$7.50 per annum for an individual and from \$50 to \$100 per annum for a company according to capital.

A free miner, having discovered coal in place, may locate a claim 1000x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end on the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for each additional ten miles or fraction. The fee for recording a claim is \$5.00.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When \$500 has been expended or paid, the locator may, upon having a survey made, and upon complying with the other requirements, purchase the land at \$1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

The lessee's right is confined to the submerged beds or bars in the river below low water mark, the boundary to be fixed by its position on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles width, six years from such date. Rental \$100 per mile for first year, and \$10 per mile for each subsequent year. Royalty, same as placer mining.

Placer mining in the Yukon Territory.—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being 1000 to 2000 feet. All other placer claims shall be 200 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of mining recorder's office. One additional day allowed for each additional ten miles or fraction.

The discoverer of a new mine is entitled to a claim of 1000 feet in length, and if the party consists of two 1000 feet altogether, on the output of which no royalty will be charged; the rest of the party ordinary claims only.

Entry fee \$10. Royalty at the rate of 25 per cent on the value of the gold shipped from the Yukon Territory, to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of \$5. A claim may be abandoned and another obtained on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least \$200.

A certificate that work has been done must be obtained each year. If not, the claim shall be deemed to be abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and published in the Yukon Official Gazette.

PETROLEUM—All unappropriated Dominion lands in Manitoba, the North-West Territories and within the Yukon Territory are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected, an area of 640 acres. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the land on which such other land as may be determined, will be sold to the discoverer at the rate of \$1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

JAMES A. SMART, Deputy of the Minister of the Interior, Department of the Interior, Ottawa.

Millinery Goods

The largest and most carefully selected stock of Fall and Winter

Our stock of watches was never larger or more attractive. With the best movements that America makes, we have about every variety of case that choice may suggest or circumstance demand. A. D. Morrison, the Jeweler.

WHY GO EAST

Over the sun-burned, sage brush and alkali plains, when you may just as well take a delightful, cool and comfortable ride through the heart of the Rocky Mountains in view of the grandest scenery on the American continent?

This you can do by traveling on the Rio Grande system, the famed "Scenic Line of the World," the only transcontinental line passing through Salt Lake City, Glenwood Springs, Leadville, Colorado Springs and Denver enroute to eastern points.

Three daily express trains make close connections with all trains east and west, and afford a choice of five distinct routes of travel. The equipment of these trains is the best, including free reclining chair cars, standard and tourist sleepers, a perfect dining car service, and also personally conducted excursion cars, each in charge of a competent guide, whose business is to look after the comfort of his guests. No more pleasant and inexpensive means of crossing the continent can be found than is provided by these excursions.

For additional details address J. D. Mansfield, Gen. Agt., Rio Grande Lines, No. 124 Third Street, Portland, Ore.

MANY SUDDEN DEATHS

Are traced to a heart that was neglected. If your heart is weak or beats too rapidly you need Ferrozone to strengthen the heart's muscles, regulate its action and stop smothering spasms. Ferrozone always cures weak heart and restores this organ to a strong, healthy state. * The best heart medicine in the world is Ferrozone, which beats any substitute. Widely used by doctors and sold at 50c per box by H. E. Woodland, druggist.

MEASURING TIME.

Methods Used Before the Advent of Clocks and Watches.

Probably the oldest method of determining the time of day was by the sundial, but other devices have been used for ages, including the water clock, the burning wick and the hour glass filled with sand. Popular legend attributes to King Alfred the invention of the water clock, but long before his time it was in use by the Egyptians and in Judea, Babylon, Chaldea and Phoenicia. The contrivance for measuring time by means of water appears to have consisted of a basin filled with water and exposed in some niche or corner of a public place. At the extreme end of the vessel was a spout or tap from which trickled the liquid drop by drop into a receiver having on its inside marks for indicating the hours of the day and night.

In parts of southern India there was used a thin copper bowl about five inches in diameter and rather deeper than half a sphere, having a very small hole at the bottom. The bowl, placed in a vessel containing water and floating thereon, gradually filled. At the expiration of an arranged interval it sunk, and a boy or another watcher then struck a gong and thus announced the time. It showed the lapse of periods of forty-five minutes with tolerable accuracy, but the time varied with the temperature of the water. It was possible by the introduction of a cylinder containing a floating piston which worked on a cog wheel to indicate the hours.

Plato introduced the clepsydra into Greece. It was used by the Romans also. The king of Persia is said to have presented Charlemagne with a water clock of bronze inlaid with gold. Water clocks were used up to the seventeenth century. Even with the introduction of the pendulum water served "as the motor and the pendulum as a regulator."

Barge Day in Newcastle.

In Newcastle, England, the mayor enjoys the privilege of once a year being allowed to select and kiss any young woman who takes his fancy among the coal city's inhabitants. The kiss is rather costly, however, for it is the custom to present the young person kissed with a sovereign (\$5), while a further gift is made her by the lady mayress, no doubt to disprove jealousy. The sheriff, not to be outdone, also bestows a kiss upon a fair bystander, at the same rate of expenditure. The occasion is known as Barge day, when the mayor and corporation proceed in a procession of four gayly decorated steamers and two old state barges to claim the soil of the river Tyne. Their journey over, the mayor stands upon the boundary stone, and it is here that the kissing is indulged in.

When

You consider that a poorly printed job costs just as much as one that presents a neat and tasty appearance, do you not think that your business demands the latter kind?

Good Printing—the kind we do—is in itself an advertisement, and a trial order will convince you that our stock and workmanship are of the best. Let us estimate on your order. We guarantee satisfaction.

JOIN THE CANADIAN PREFERENCE LEAGUE

100,000
MEMBERS WANTED

THE object of the League is to educate Canadians how best to apply the Canadian Preference sentiment. Members of the League are expected, when making purchases, to give preference to the products of Canada and to all articles of Canadian manufacture, when the quality is equal and the cost not in excess of that of similar foreign products or manufactured articles. Each member is also expected to give preference to Canadian labor and to this country's educational and financial institutions. A monthly journal will be published in the interests of the League and mailed to each member. The annual membership fee and subscription for the Journal is \$1.00.
