# CROSSING PUT IN

## The V., V. & E. Will Have Steel Laid Into the City Tomorrow Night.

Sunday evening a march was stolen on the Hot Air road by the V., V. & E. construction gang, and as a result the steel of the latter road will be laid into the city by Wednesday evening.

Sunday afternoon the work train of the Washington & Great Northern came up from Marcus with a gang of men under Foreman M. Duffey, and all material necessary for the crossing, which had previously been prepared. Work in cutting the rails of the Hot Air track and in putting in the crossing was begun at 5 o'clock and finished within an hour.

So quickly was the work done that not a person in the city knew of what had occurred until about 8 o'clock in the evening.

Yesterday morning the Hot Air officials learned the news, and they immediately sent an engine, box car and flat car out to the crossing. They took up a position right over the diamond frog, and remained anchored there until 5 o'clock, when they became weary of the fight and returned to this city. This proceeding materially interfered with the tracklaying on the V., V. & E., as all the material had to be carried over the Hot Air track, and then hauled to the workmen on a handcar. Conquently but little headway was made yesterday.

Today, however, no interruptions occurred, and the work of laying steel was prosecuted with vigor. If Nothing out of the ordinary happens, steel will be laid to the depot site on the boundary line between the two cities by tomorrow night.

The original plan for sidestracks in this city will be adhered to. At present three will be laid.

The work of building the freight and passenger depots will be let to local contractors. Notices calling for tenders have already been sent out from the head office in St. Paul, and the plans and specifications are now on their way to this city.

The putting in of the crossing across the Hot Air track, even if it was not strictly according to Hoyle and the British Columbia courts, is generally approved by our citizens.

## SUNSET SAUNTERINGS

The transformers secured in Phoenix for the smelter branch pole line arrived at the smelter last Sunday in two carloads. Chief Electrician Lane and assistants are now busy putting them up, and they will be ready for use in eight or ten days. Two or three smaller transformers are expected from Rossland tomorrow.

Mayor McCallum is expected to arrive home from Ottawa today.

The Queens hotel will celebrate the entry into the city of the V., V. & E. tonight.

H. C. Killeen, of Victoria, provincial supervisor of roads, trails and bridges, has either been lost or stolen. It was announced that he would visit Grand Forks last week, but he has not yet put in an appearance.

Ross S. Craddock, who moved into Mrs. Parvin's residence, Columbia, last week, will give lessons in Latin, Spanish, French, German, mathematics, elocution and drawing during the winter months by a practical and successful method. Pupils will also be prepared for college.

The Epworth League of Christian Endeavor will give a social in the Methodist church this evening. No admission. Everybody cordially invited.

P. D. McDonald left yesterday for Phoenix, where he will erect a short branch pole line to the Granby mines for the Cascade Water, Power & Light company.

TUESDAY, NOVEMBER 11, 1902

THE outlook for the future of our city was never brighter than it is today. The railway fight, which has now been in progress for nearly a year, has luckily come to a sudden end, and the V., V. & E. is at liberty to resume its construction work in this vicinity. The dispatch from St. Paul, printed last Friday's issue of THE SUN, stated that Mr. Hill intended to commence work at once on the smelter branch. We have no reason to doubt this statement, as it is quite apparent that as soon as the road gets in position to deliver ore at the Granby smelter the tonnage of the Great Northern between this city and Republic will be more than doubled. And the building of this spur will probably take the major portion of the winter, as there is a great deal of rock work to be done. As large a force as can be advantageously worked will be put on the construction gangs, which will mean a big payroll, and portion, at least, of this money will ultimately be distributed among our citizens.

In addition to the improved condition of the railway situation, unusual activity is now going on at the Granby smelter. Inside of two weeks it will be in operation to its fullest capacity. It is stated that by the first of the year two more furnaces will be added to the plant, making six in all. This means steady employment to a greatly increased force of workmen, and a larger payroll.

Taken all in all, the future is decidedly roseate.

---

FOR SALE—Two second-hand injunctions; have been used effectively for nearly a year; warranted to kill the prosperity of the most flourishing city; out of repair at present; no reasonable offer refused. Apply to either the Hot Air or the Columbia & Western.

---

IT pays to advertise in THE SUN. The lost, strayed or stolen gentleman has returned to Grand Forks.

---

IT is reported that Mayor Holland is grooming a Good Man Friday as a mayoralty candidate.

---

WHAT will Mr. Cowan do with his injunction?

---

THE fight is over.

---

THE SUN learned late this evening that all the injunction proceedings against the V., V. & E. at Vancouver have been dropped.

## SUNSET SAUNTERINGS

MAYOR HOLLAND ARRESTED—Last Friday morntng Provincial Constable I. A. Dinsmore arrested Mayor Tracy W. Holland on a bench warrant for contempt of court in connection with the Packard case on Sept. 19th last. Mr. Dinsmore immediately after the arrest brought the mayor before Judge Leamy, who reprimanded him severely and dismssed him.

---

THE BACHELORS' BALL—The fifty odd couples who attended the bachelors' ball in the Biden opera house last Frlday night all agree that it was a most successful social affair. The ball room, which was tastefully and elaborately decorated, was comfortably filled, and the animated scene presented when the dance was at its height will long be remembered by those who took part in it. Many beautiful costumes were worn by the ladies. The various committees are to be congratulated on the skill with which they performed their work. Each member appeared to know what he had to do, and he did it. There was not a single blunder—everything moved like clockwork. The music, which was furnished by Graham's orchestra, of Rossland, was excellent, and many complimentary remarks were made in reference to it by the dancers. At midnight a dainty supper was served at the Hotel Winnipeg. The dining room and office had been prettily decorated for the occasion, and the menu was conceded the best ever provided at a similar function in the city. The dancers returned to the hall after supper, and it was nearly dawn when the gaiety ceased.

---

NEW MASONIC LODGE—Harmony Lodge, W. D., A. F. & A. M., Grand Forks, will be instituted on Wednesday evening, the 19th inst., at 7:30 p. m., by the district deputy grand master, Right Worshipful Brother George W. Hering, of Rossland, assisted by brethren from Phoenix, Greenwood, Trail and Rossland. The institution will take place in Oddfellows' hall, and will be followed by a banquet. Invitations will be extended to resident and sojourning brethren. The occasion should prove a most enjoyable one, as so pains are being spared in making the preparations.

---

LORD'S DAY ALLIANCE—At the regular monthly meeting of the Lord's Day alliance, held in Knox Presbyterian church last Thursday evening, it was decided to meet at the office of W. H. Creitz in future for the transaction of the monthly business of the executive board. The alliance has arranged for a public meeting for next Thursday night at 8 o'clock in the Ederal Labor Union hall. The object of the meeting is to discuss the principles of the alliance, to which the public is cordially invited. A special invitation is extended to the ladies.

SOCIALIST LEAGUE—The Socialist League of Grand Forks will hold its first meeting for the winter season next Friday night at the Federal Labor Union hall. It is the intention of the league to establish a free reading room, and later a library is to be added. A large number of new members are expected to enroll at this meeting.

---

It has been semi-officially announced that Mayor Holland is no longer an official of the Hot Air. But he still owns some stock in the road.

## GRAND FORKS COUNCIL

At last night's meeting of the Grand Forks city council Mayor Holland occupied the chair for the first time in many moons. Ald. Donaldson, Gaw, Hammar, Matheson and Sheads were present. The session was short and but little business was transacted, doubtless owing to the fact that the aldermen have not yet had time to become acquainted with the mayor.

The minutes of the previous meeting were read and approved.

On motion of Ald. Gaw, seconded by Ald. Matheson, a resolution was passed that James Addison be given the contract to repair the First street bridge, the cost to be applied to his taxes.

On motion of Ald. Hammar, seconded by Ald. Gaw, a committee of two was appointed to collect samples of products of this vicinty and forward the same to the Vaneouver Tourist association. The committee was also allowed the necessary expenses for prosecuting its work. Ald. Sheads and Ald. Donaldson were appointed to serve as such committee.

The following bills were ordered paid: Robert Petrie, $5.90; Geo. Taylor, $53; W. K. C. Manly, $36.94; J. I. Gill, $21; Joe Taylor, $18.

## WHY GO EAST

Over the sun-burned, sage brush and alkali plains, when you may just as well take a delightful, cool and comfortable ride through the heart of the Rocky Mountains in view of the grandest scenery on the American continent?

This you can do by travelling on the Rio Grande system, the far-famed "Scenic Line of the World," the only transcontinental line passing through Salt Lake City, Glenwood Springs, Leadville, Colorado Springs and Denver enroute to eastern points.

Three daily express trains make close connections with all trains east and west, and afford a choice of five distinct routes of travel. The equipment of these trains is the best, including free reclining chair cars, standard and tourist sleepers, a perfect dining car service, and also personally conducted excursion cars, each in charge of a competent guide, whose business is to look after the comfort of his guests. No more pleasant and inexpensive means of crossing the continent can be found than is provided by these excursions.

For additional details address J. D. Mansfield, Gen. Agt., Rio Grande Lines, No. 124 Third Street, Portland, Ore.

## CHURCH DIRECTORY

# COLUMBIA

## A City of Beautiful Environments, Healthful Climate and Bountiful Resources--Civic Improvements, Including Electric Light and Waterworks Systems, Are Well Advanced.

The City of Columbia is situated near the junction of the North Forks of the Kettle river with the main Kettle river, and is distant about 300 miles east of Vancouver.

Thoroughly up-to-date and modern Electric Light and Waterworks Systems are dow under construction, and will be completed in September. The electric light syst m will include street arc lamps. The waterworks system is planned on a sufficiently large scale to meet all present and future needs, and insuring ample protection from the ravages of fire. At present water is supplied the city by pumping from a beautiful spring of exceptional purity.

The natural situation of the city for beauty is not excelled in Ameriea. A verdure-clad and flower-bespangled rolling prairie, traversed by a river of bright, sparkling waier, fringed with forest trees and surrounded by mountains, forming a charming combination of picturesquesness and grandeur.

The Columbia & Western railway, which was constructed by the Canadian Pacific Railway company, has its station, freight warehouse and yards in the center of Columbia, and the Vancouver, Victora & Eastern Railway company, has located its depot, freight sheds and yards along the east line of the corporation, thus giving the city connections with two transcontinental lines.

The Canadian Pacific railway company has large interests in the city, having selected the site on account of the superior natural advantages as a railway centre.

The climate, taken all the year around, is the best in anada—part of the summer is rather hot and dry, but the rest of the year is enjoyable.

Throughout the Kettle River valley there is an extent of fertile agricultural land, part of which is now being cultivated.

Apples, plums, pears, prunes, cherries and all the small fruits grow abundantly. The valley surrounding Columbia, divided into small fruit and vegetable farms, will sustain a large population.

Building material is plentiful in the district. Lumber can be procured at fair prices, and brick lime and stone of good quality can always be obtained when required.

The mining interests areof the first importance to this country, and will do much to build up Columbia. Large mineral lodes have been discovered throughout the mountains adjacent to the city, and what were mere prospects a short time since are now large paying mines.

The Granby smelter and converter—the most modern and perfect plant of the kind in America—employing hundreds of men, is contiguous to the city.

Owing to the fine climate, the central situation, the beautible environments, the bright prospects for future growth and prosperity, Columbia will be an educational centre, a city of homes as well as a wholesale distributing point; and when finally allied and wedded to her sister city, will be the best and largest city in the interior.

## IMPERIAL LIFE.

In reviewing the list of prominent Canadian life insurance companies, the "Imperial" of Toronto stands out prominently on account of its remarkably successful career. The board of directors is composed of strong financiers and gentlemen of large experience in the insurance business. This company nas nothing but up-to-date liberal policies to sell, and the fact that many large policies have been issued by the Imperial, running as high as $200,000 on one single life, indicates the class of people who are patrons of this company. Mr. J. A. McCallum is agent at Columbia and Grand Forks.

---

BICYCLES—The Columbia, Perfect and Cleveland Bicycles, all top-notchers. Wheel supplies of all kinds. Repairing. Wheels to rent. GEO. CHAPPLE, opposite postoffice.

The Grand Forks hotel, the oldest hotel in the city, has a capacity for 70 people. Everything up to date. Rates, $1 and $1.50 per day.

Spring Chickens wanted at the Clarendon Restaurant.

For a nice hair-cut or shave go to the City Barber Shop on Riverside avenue. Baths 25c.

For Sale.—One three-seated Hack (Studebaker); one Carriage Horse. Apply to J. A. McCallum, Columbia.

---

### NOTICE.

TAKE NOTICE, that I, the undersigned, intend, 30 days after date, to apply to the Commissioner of Lands and Works for a License to prospect for coal and oil on the coal claim situated about 52 miles from Grand Forks, B. C., on the west bank of the West Fork of the North Fork of Kettle river, in Yale District of British Columbia; said claim consists of 640 acres.

Notice of location is on northeast corner, claiming 80 chains west, 80 chains south, 80 chains east, and 80 chains north to point of commencement.

Dated on the ground this 20th day of September, 1902.

## MINES AND MINING

Ore shipments last week: Granby mines, Phoenix, 5072 tons; Snowshoe, Phoenix, 720 tons; Mother Lode, Deadwood, 4256 tons; Sunset, Deadwood, 630 tons; B. C. mine, Summit camp, 990 tons; Emma, Summit camp, 360 tons; total for past week, 12,028 tons; total for 1902, 409,771.

The Granby smelter last week treated 4945 tons of ore. Total for 1902, 245,438 tons.

Over 15,000 cubic yards of material have been removed from the surface of the Knob Hill and Old Ironsides claims since Porter Bros. began their contract with the Granby mines in the middle of the summer.

Up to November 1st, this year, the Snowshoe had shipped 11,104 tons of ore.

The ore tonnage received at the Granby smelter from Republic last week aggregated 402 tons, the shippers being: Black Tail, 150 tons; Lone Pine-Surprise, 50 tons; Quilp, 200 tons; El Caliph, 3 tons. Thus far to date the Quilp mine holds the record with shipments of 675 tons. The San Poil comes next with 350 tons, and the Black Tail third with 251 tons.

Six men are employed on the Lone Pine-Surprise claims in Republic, and this force will be increased during the present week to 12 men. The campany has a contract with the Granby smelter for the treatment of 300 tons of ore per month, but hope to get even a better concession at an early date.

General Manager Jay P. Graves, of the Granby company, in an interview in Spokane, states that the Granby smelter is preparing to treat all the custom ore that may be offered it, at a fair margin of profit. "We can easily handle 200 tons of Republic ore a day," he said, "and we are preparing to fill the demand for treating more. At present the Republic ore treated at the Granby plant is being treated through the converters. That is handled, of course, at less cost than if handled through the blasts, but it costs us money to treat it, just the same. The Granby mines are developed and will be equipped by February 1 to a point where they can produce 5000 tons of ore a day for a period of years. The outlook for the Granby was never so promising as it is now. The future is very flattering."

The Lone Pine-Surprise property, in Republic, is showing up well. The company is now working on the second level, which will average about $10 per ton. In the upper level, however, a payshoot has been uncovered in the vein which gives assays of $18 to the ton. This payshoot ranges from three to four and a half feet wide. A winze sunk to a depth of 20 feet on the payshoot shows a width at the bottom of the winze of about eight feet of solid ore, which will go $19 to the ton.
