MR. LOW'S VIEWS

Visit of the Director of the Geological Survey to This Province

The Mining Properties of Southern British Columbia Described

Mr. A. P. Low, director of the Geological Survey, has lately returned to Ottawa from British Columbia, a visit, which, owing to the late adjournment of Parliament and to business connected with the transfer of the geological survey from the charge of the Minister of the Interior to that of the Minister of Inland Revenue, was much shorter than originally intended. However, in the brief time that the director was able to devote to devote to personal inspection of the mining areas, and in making and renewing acquaintances with the prominent mine managers, he was able to do a considerable amount of work and he has returned more than ever impressed with the capabilities of British Columbia as a mineral province. When it is remembered that only a few years ago one of the survey officers commenced a portion of his report with "There being no copper works in Canada" and that last year the copper production of British Columbia alone was 48,000,000 pounds, the progress has indeed been astonishing.

Mr. Low first visited the coal mines of East Kootenay. He found that at Fernie and at Michel a large output of coal and coke is being made from the mines and ovens, which are not only operated to their full capacity, but new working are being operated to increase the output, for which a ready market is found, both in our Dominion and the adjoining portions of the United States.

Since the momentous summer of 1890 when two prospectors located in a few hours what are now the world renowned mines, LeRoi, Centre Star, War Eagle and Idaho, few mining districts have experienced a more romantic career than Rossland. The booming of the LeRoi shares in London, England, the sudden collapse of the Standard Mining company and trial and sensational suicide of the unfortunate Whittaker Wright combined to form a chapter in mining romance seldom equalled. After the suicide and the seeming hopelessness of securing sufficient capital to carry on mining operations the Rossland mines were on the point of shutting down and it was largely owing to the favorable reports by the geological survey that work was continued. Naturally, therefore, the Survey takes a sort of parental interest in the opertions of the Rossland camp, and, naturally, Mr. Low included it in his visit.

Both in Rossland itself and in the vicinity a distinct revival of mining has taken place, owing to the new discoveries of richer ore in the deeper parts of the principal mines, discoveries which Mr. R. W. Brock, acting for the Survey, had predicted with considerable confidence. The work of Mr. Brock and his confreres is much appreciated in the district, more especially owing to the renewed confidence it has imparted both to mine managers and prospectors. At Trail, extensive alterations and additions were being made to the smelter and similar improvements are taking place in Nelson, Grand Forks, Greenwood and Boundary, showing that the output of the mines supplying these furnaces is of such a nature as demands more extensive and better plants for its treatment. All the mines of the Boundary copper camps were active and their general tone appeared to suggest healthy improvement without any sign of an undesirable boom.

A hurried visit was made to the silver lead districts of the Slocan showing an awakening there also; several mines are working profitably.

The finding of the vein of the Rambler-Cariboo mine at a depth of more than 1,200 feet chanced to be coinci dent with Mr. Low's visit and is of the greatest importance to the district pointing as it does to the probability of the silver and lead ores being found at a depth previously unknown.

At Hedley in the Similkameen valley the large Nickel Plate mine was visited and a trip was made over the adjoining properties. These give surface indications of large ore bodies and when the railway freights are reduced to a reasonable figure it is expected that these ores will prove payable.

Mr. C. Camsell who was working along the Similkameen valley above Princeton was seen at Hedley and was quite enthusiastic about the large masses of ore in that region which, although low grade, can, he confidently believes, be profitably worked, upon the completion of the railway.

The coast was reached on the 22nd of Angust, when Mr. LeRoy who was working on the coast section about and to the northward of Vancouver made very favorable reports concerning the mineral deposits both of the mainland and Tuxedo island.

Summed up, the result of Mr. Low's visit to Southern British Columbia showed a renewed and increased activity in mining at all the mining centres, and he came away with the feeling that the operations are now being conducted throughout those districts in a solid and legitimate manner, with the object in view of making money, not from speculative dealings in shares, but from the actual output of the mines. That this visit of the director, which we trust will be of annual occurrence, will result in much mutual benefit to the mining interest and to the geological survey we make no doubt. Mr. Low's endeavor to meet personally all the principal owners and operators of the several camps and, where possible, to freely exchange ideas as to the present and future work of the department is, we feel sure, a step in the right direction. By this means and by this means only can a clear understanding be obtained as to the desire of the department to help in every possible way the mining interest of Canada; at the same time the director receives valuable suggestions as to the manner in which such help may be given and these suggestions, we feel sure, will be acted upon as far as circumstances permit, thus increasing the usefulness of the geological survey.

Mrs. A. Birnie, Sr., of Vernon, who has been visiting with her daughter, Mrs. Forbes M. Kerby, in this city, returned to her home last week.

NEWS OF THE CITY

Work on Kettle Valley Line Bridge Will Start About November 1st

Owner of New York Claim Says He Will Ship First Ore Over K.V.L.

Kettle Valley line officials state that work on the big bridge across the Kettle river at Third street will be commenced about the first of next month, as it is expected that the second bridge up the North Fork will be completed by that time.

W. A. Pounder, who is doing development work on his New York claim, on the North Fork, was in the city last Saturday. Mr. Pounder states that his property is looking fine, and that he has struck a large ore body carrying 60 per cent iron. He further informed The Sun that he intended to ship the first ore over the North Fork extension of the Kettle Valley lines.

Coke has now commenced to arrive at the Granby smelter from West Superior. Six furnaces are now in operation, and it is stated that the two that are now idle will be blown in in a few days.

Mr. John Lind desires to thank the officers and members of Grand Forks Union No. 180, W.F.M., for their many kindnesses and expressions of sympathy at the death and burial of his late nephew, Fred Gunderson.

Mrs. J. C. Catlett will open the Delicatessen bakery and restaurant in the Sears' block, next door to The Sun office, on Winnipeg avenue, the latter part of this week. She will make a specialty of home-made bread, pies and cakes, and will undoubtedly meet with success.

City Clerk McCallum and A. Erskine Smith returned last night from Gloucester camp, where they inspected the M. S. mine and other properties.

M. M. Johnson, of Salt Lake City, consulting engineer of the Dominion Copper company, and F B. Cook a prominent mining engineer of the Mormon c ty, returned Saturda evening from Franklin, where they examined the Maple Leaf p o erty for the New York purchasers. Yes terday they inspected the Lone Star claim, on the reservation, and las night they left for Rossland.

A winter road is being cleared from Franklin to Gloucester C ty.

The funeral of the late Fred Gunderson, who died in the Greenwood hospital last Thursday, took place from Cooper's undertaking rooms in this city at 9 o'clock last Sunday morning, and was largely attended by the members of Grand Forks Union No. 180, W.F.M., under whose auspices it was conducted.

While in Danville last Sunday, The Sun man was shown three potatoes that weighed five and one-half pounds each. They had been grown on the ranches of James Wilcher, the well known prospector, and Abe Logston, near Danville. The largest measured 11½ inches in length and 15½ inches in circumference. During the afternoon it is reported that another potato weighing 11 pounds was brought into the town. We expect to hear of a great influx of Irishmen to that section before long.

George W. Wooster, treasurer of the Granby Consolidated, has returned from New York, where he attended the annual meeting of the board of directors of the Granby company.

Geo. A. MacLeod returned to the city last night from a week's visit to Seattle.

At a meeting of the band association Saturday night last H. C. Davidson tendered his resignation as manager, H. Sheedy being elected to fill that capacity. The question of giving a home-talent minstrel show was discussed, and the following gentlemen were appointed a committee to look after the available talent: H.C. Davidson, H. Sheedy and Richard Thomas. The entertainment will be given for the benefit of the band, and everybody should bring forth their talents to make the show a complete success. Ah, there, you end men!

Phoenix Aerie No. 258, Fraternal Order of Eagles, will give a Halloween ball on the night of October 31st.

C. E. Lane, head electrician for the Granby Consolidated, spent several days in Phoenix last week, and repaired one of the 700-h.p. motors in the compressor building in that camp.

Mrs. Kate Hoffman, who has conducted the Clarendon restaurant in this city for the past few years, left on Saturday last for Montana, where she will visit with relatives during the winter months. She still owns considerable property in this vicinity, and will probably return here next spring.

Those who have enjoyed "Uncle Josh Spruceby" in times past will not need any urging, and to those who have never enjoyed that pleasure, we say, look in on "Josh" and you will know that you have put in a pleasant evening and only regret that the time passed so quickly. Admission, 50c and $1.00.

Harry LaDow spent Sunday in Phoenix.

The Roscians

"Vini, Vidi, Vici." Well may the Roscians repeat that old Latin phrase For they came, they saw and they conquered.

It was a well filled auditorium that greeted the "Mikado" at the Spokane last night, and if there was a person present that did not thoroughly enjoy every minute of the evening it must have been because they were deaf or blind, for never has comic opera been presented in a better manner in this city.

Each member of the company portrayed his or her part in a most acceptable way, and the only regret that the writer has is that limited space forbids an extended mention of each member of the Roscians. The voices of the principles are splended and the choruses deserve much praise. The orchestra was fine.—Spokane Review.

V.V.&E. PROGRESS

Authoritative Statement as to Future Plans of the Company

Will Push Through From Keremeos to Cloverdale

Private information received in Nelson yesterday from St. Paul contained positive assurances of the intention of the Great Northern to proceed with the V. V. & E. westward from Keremeos through the valley of the Similkameen and across the Hope range, just as soon as laying of steel is completed to Keremeos, so as to permit of the moving of construction outfits and material.

Interviewed in Nelson, both Pat Welch and J. W. Stewart, who have the contract for building the first section of the V. V. & E., admitted that it was Mr. Hill's intention to build right along. Said Mr. Welch: "The tracklayers will reach Keremeos early in February, and the steel is into Molson. All the track between that point and Keremeos is practically built. Immediately on completion of this section the work of moving the construction outfits forward will be undertaken and sometime in February it is expected the Great Northern will let the contract for the road right through to connect with the Cloverdale-Abbotsford section. The distance between the two points is in the neighborhood of 150 miles and embraces one of the heaviest and most difficult pieces of railway work in the west, including, as it does, the passage of the Hope range." Mr. Welch stated that to build this section would take about two years, with a force of 3000 men. In conclusion he said that once the contracts are let the builders will go at it hammer and tongs until the complete line is finished from Keremeos to the coast.

Copper Market

NEW YORK, Oct. 22—Copper has had a farthur sensational advance. Sales of lake ore reported as high as 22 cents, and the market for both lake and electrolytic is between 22½ and 22 cents per pound. Consumers, in some instances are unable to supply their immediate needs at ahy price, and the result of this is to make a very strong demand for future deliveries. It is reported that copper is being contracted far as far ahead as June, 1907. A representative of several producing mines says that he has been offered 20½ cents per pound for the entire production during the first six months of next year.

Married

John P. Loftus and Miss Mary Kennedy were united in marriage at 8 o'clock this morning in the Catholic church, Rev. Father Hartman performing the ceremony. The groom is an old resident of the city, and the bride is an estimable young lady. Both have a large circle of friends, who will wish them abundant success in their wedded life. Mr. and Mrs. Loftus will continue to make Grand Forks their home.

GENERAIONS OF GOOD TIME IN YOUR WATCH

FRICTION THE ENEMY

Therefore pivots are finely polished, jewels of ruby or sapphire, the oil carefully refined—all to reduce friction on such bearings. The balance revolves 432,000 times daily.

ASTOUNDING, ISN'T IT?

Yet if cleaned and oiled yearly a watch will run for generations; but if neglected it must, with much ceaseless toil, wear itself to ruin in accumulating dirt and corroding oil.

Let us examine it. An honest opinion from us will cost you nothing.

We guarantee prompt delivery of all repairs.

UNION LABEL

TUESDAY, OCTOBER 23, 1906

Whenever an outsider, who is averse to the growth and prosperity of our fair city, wishes to ease his mind, he invariably unsheathes his muck-rake to bring in the limelight a bit of ancient history, holding that the shortcomings of the men who were once connected with a carnival in its name is the one and only crime perpetrated in the western country, and that the recollection of this one circumstance is disastrous to the city even unto the third and fourth generation. It may possibly interest these outsiders to know that Grand Forks is not laying awake nights to deplore an imaginary curse, but instead is coming down the line in a way to make the envious ones gasp for breath.

CITY NEWS

C. B. Bash, of the Dominion Copper company, Greenwood, is in the city today.

Lorne Bricker arrived from Berlin, Ontario, last week, and has taken a position with a local jeweler.

Frank Hartinger last week purchased the Grand Forks hotel on Riverside avenue, the deal being negotiated through the British-American Trust company.

The most beautiful story of American life told on the stage will be presented at the opera house next Saturday night, October 27. The famons play of "Uncle Josh Spruceby" is a story of New England farm life full of fun that keeps the audience in a merry mood through the four acts, and with a touch of pathos that will cause a tear or two to trickle down the cheek. The scene is laid in Vermont and some of the characters are taken from the life ahd daily habits of the people the author met there. The company presenting the play this season is an efficient one, and in addition to considerable special scenery, a first-class orchestra fills an important part. Prices, 50c and $1.00.

The Lion Bottling Works are selling Gooderham & Wort's Rye Whiskey, the best rye whiskey in Canada for $3.00 per gallon.

Three quart bottles of Nelson beer for 50c at the Lion Bottling Works.

Dominion Copper Machinery

PHOENIX, Oct. 20.—Two carloads of machinery containing the first consignment of the new furnace for the Dominion Copper company's Boundary Falls smelter, are expected to arrive at the works any day, having been shipped some time since from the works at Allentown, Pa. The Granby company has the fashion of making blast furnaces larger than ordinarily in the Boundary, followed by the B. C. Copper company, which has one giant furnace in blast and will blow in another early next week, probably to be followed by a third in a few weeks. But the Dominion Copper company's new furnace is larger than either of the others, in fact, one of the largest, if not the largest, in Canada. The Dominion Copper company also received a couple of cars of the parts of the new air compressor to be installed as a central power plant at the company's mines in this camp, the machinery coming from Sherbrooke, and to be followed soon by the balance of the order.

A Hard case Overcome

No longer necessary to suffer from muscular rheumatism. Every case can be cured. Ferrozone is unfailing as proved by David Johnston of Ormond, Ont. "My wife was a dreadful sufferer," he writes. "For two years she could scarcely do any work. Her knuckles and joints swelled, causing torture. To get up or down stairs was impossible. She took box after box of Ferrozone and rubbed the sore places with Nerviline. Improvement started and she mended fast. Today she is quite cured and we thank Ferrozone for her recovery." No remedy more popular with doctors than Ferrozone; it does cure; 50c per box at all dealers.

Rossland Shipments Small

ROSSLAND, Oct. 20.—Owing to the closing down of the furnaces at Trail, shipments were again small this week. The LeRoi continues to ship its ore to Northport but the ore is stored pending the time when a snpply of coke can be procured. The mines here coniinue to work their usual force of men, only a few miners and trammers having been dispensed with There will be plenty of work for employees for a month or two yet and by that lime it is hoped that the strike will have come to an end.

Pity the Busy Office Man

He feels half dead, a sense of nausea, headache and nerve strain. He is on the verge of breaknown through overwork and lack of exercise. These difficulties are best overcome by Dr. Hamilton's Pills, which make the bowels active, stimulate kidneys and liver and thereby free the system of impurities.

To revitalize and stimulate your whole being, to shake off lethargy and tiredness, nothing compares with Dr. Hamilton's Pills, which do make good looks, good spirits, good health. Sold everywhere in 25c boxes.

NOTICE

Notice is hereby given that I have secured a Bill-poster's license in the City of Grand Forks, whereby I will hereafter have exclusive control of the bill-posting, poster-advertising and the distribution of circulars within the limits of said city. I have the only license in the city for this class of work, and warn all parties to refrain from infringing on my legal rights. All work carefully and promptly attended to.

JOSEPH SCHNAVELY.

When that cold comes

How is it to be cured? This method is simplicity itself. Rub the chest and throat well with Nerviline, use it as a gargle and take some in hot water before retiring along with one of Dr. Hamilton's Pills. Next morning finds you refreshed, free from cold and bright as a dollar. These household remedies are wonderfully successful, and certainly won't fail in your case. For sale at all dealers.

The Lion Bottling Works have cut their price on all case and draught wines and liquors.

Get your wedding invitations printed at The Sun office. We have the closest script type imitation of a steel engraving made.

For a nice hair cut or shave go to the City Barber Shop on Bridge street. Baths 50c, three for $1.00.

NOTICE

NOTICE is hereby given that thirty days after date I intend making application to the Chief Commissioner of Lands and Works for a special license to cut and remove timber from the following described lands: Commencing at this post, located on the east bank of Savage creek, a west branch of the North Fork of Kettle river, at a point 75 feet southeast of where a landslide or dry wash enters said creek from the west side, and where a small jam or pond is formed on, and about three miles from the mouth of said creek; thence running west 40 chains; thence south 80 chains; thence east 80 chains; thence north 80 chains; thence west 40 chains to place of beginning, containing 640 acres.

Located this 20th day of October, 1906

AT A BARGAIN

That beautiful and centrally located property belonging to P. T. McCallum, being Lot A, Plan 76; Lot A, Plan 72, and Lots 10 and 11, Plan 22, in the city of Grand Forks, being adjoining and containing in all three acres, more or less. There is erected on this property a good frame dwelling house containing ten rooms, with bathroom, pantries, closets, etc., together with summer kitchen and woodshed. There is electric light, city and good well water, as well as a never failing stream running through the property; a good orchard of apples, pears, plums, cherries and small fruits. Stable containing four stalls, together with hay-loft, feed and carriage room.

Also 19 acres adjoining the Van Ness Addition; several lots in the city, and 95 acres situated at Niagara, on the North Fork of Kettle River, on which there are ten acres of meadow, some good timber, and balance A1 fruit land. Fisherman Creek runs through the property; small cabin and good outbuildings. Water record for 100 inches goes with the place.

An undivided one-half (½) interest in 160 acres of range land within two miles of the city.

For further particulars, prices, terms, etc., apply to the owner,

P. T. McCALLUM

Grand Forks, B. C.

BOUNDARY MINING NOTES

The International Coal, it is understood, will declare its first dividend at the annual meeting of the company this month.

The second furnace of the B. C. Copper company at Greenwood is to be blown in this week.

The Granby Consolidated is negotiating for the acquirement of more mining claims in Phoenix camp.

Owing to the blowing out of the Trail smelter, most of the men employed at the Snowshoe mine have been laid off, only about fifteen or twenty men now being employed.

Diamond drilling is being done at the Skylark mine.

Two cars of machinery for the new air compressor arrived in Phoenix last week for the Dominion Copper company.

A spur is being put in by the Kettle Valley line for the B. C. Copper company, at the nearest point to the Lone Star and Washington, which are shortly to begin shipping to the Greenwood smelter.

Proved After 50 Years

The test of time has proved that Putnam's Corn Extractor cures quicker, with less discomfort and more thoroughly than anything else. Contains no acids, is purely vegetable and absolutely guaranteed. Insist on Putnam's only—it's the best.

AS YOU LIKE IT

It is an easy task to be public spirited when some one else pays for it.

There is one advantage of living in Phoenix—you don't have to get used to the cold weather.

About all the "hot air" we have in Grand Forks comes from Greenwood. Ledge please copy.

The man who wants something for nothing never forgets to charge for his services.

It is a waste of energy to lock the barn door on a team that nobody wants. City teamster please take notice.

There is enough electricity generated at Cascade to shock the most refined people in the Boundary.

Republic is to have a big political meeting next Saturday night. Some of the peanut politicians will be roasted.

In Danville they raise potatoes so big that it takes a two-horse team to smuggle one across the line.

Midway is midway from Grand Forks—when you buy a return ticket from this city to that place.

The Greenwood papers call their town "The Copper City" because it is close to Grand Forks, where most of the copper in the Boundary is made.

A small-calibered man looks out for No. 1 when he engages in a public enterprise.

The trials of the baldheaded man are over for the next six months. He can now enjoy his seat in the front row in peace.

In this section some of the ranchers make enough money to operate papers to advertise their products, and a few newspaper men buy ranches from the profits of their business.

A case in West Arichat

Mrs. A P Ferguson, a well known Cape Bretoner, has cured asthma by "Catarrhozone." Her statement is convincing. "Althoug I was troubled for years it was only recently I tried Catarrhozone. When an attack started I got out my inhaler and invariably got quick relief. Feeling satiffied Chtarrhozone would cure, I continued the treatment till one bottle was finished. I didn't use more because I was cured and the asthma has never returned." Catarrhozone is sure death to asthma and bronchitis. Try it and be convinced. Two sizes, 25c and $1, at all dealers.

COOK—Desires position either in town or country. Apply at L. Johnson's Cleaning House.

FOR RENT—Newly furnished rooms with bath, near the smelter. Apply at Mrs. Ritchie's.

and Dining Car Service on all Trains.

CLOSE CONNECTIONS made at St. Paul and St. Louis in Union Depots for all points East and South-East.

To enable parties who so desire to visit friends and relatives in the East during the summer season of 1906, the NORTHERN PACIFIC will on JULY 2nd and 3rd, AUGUST 7th, 8th and 9th, and SEPTEMBER 8th and 10th sell round-trip tickets from points in this territory to Chicago, St. Louis, St. Paul, Minneapolis, Omaha and Kansas City at one lowest first class fare plus Ten Dollars, with final return limit ninety days from date of sale, but not beyond October 31st, 1906.

Extremely low rates are in effect from February 15th to April 7th and September 15th to October 31st, 1906, from all points in the East to points in this territory. If you desire to send for a friend or relative on these rates we telegraph tickets to Eastern points without extra cost.

The NOTHERN PACIFIC have all announced very low round-trip rates from points in the East to points in this territory, and tickets will be on sale from June 1st to September 15th inclusive, final limit for return October 31st, 1906.

For further information address any one of undersigned.

A. D. CHARLTON, Asst. G. P. A., Portland, Ore.
G. A. MITCHELL, Gen. Agt., Spokane, Wash.
W. H. UDE, Traveling Passenger Agent, Spokane, Wash.

NOTICE

NOTICE IS HEREBY given that the undersigned, John Carlson, holder of an hotel liquor license, for the Fife Hotel, situate at Fife Station on the Columbia and Western Railway, will at the first meeting of the License Commissioners for the Grand Forks License District, next after the last publication of this notice for 30 days, apply to said License Commissioners to transfer said hotel liquor license for said Fife Hotel to John Jackson of Fife aforesaid.

Dated at Grand Forks, B. C., 14th September, 1906.

JOHN CARLSON

NOTICE

IN the matter of the "Land Registry Act" and in the matter of the title to Lot 10 Block 6 Plan 52, in the City of Grand Forks, B. C.

WHEREAS, Certificate of title of William Thompson, deceased, to the above hereditaments has been lost or destroyed, and application has been made to me for a duplicate thereof.

NOTICE is hereby given that a duplicate Certificate of title to the above hereditaments will be issued at the expiration of one month hereof, unless in the meantime valid objection to the contrary be made to me in writing.

Dated 22nd September, 1906.

W. H. EDMONDS, District Registrar. Kamloops, B. C.
