FRUIT GROWING

Successful Meeting of Kettle Valley Farmers' Institute

Prof. Thornber and Mr. Dobie Deliver Instructive Lectures

The best attended Farmers' Institute yet held in this city was called to order shortly after 8 o'clock Tuesday evening in the city hall by President Cooke, who, in a few brief remarks, introduced Mr. W. H. Dobie, of the agricultural department, Victoria, as the first speaker of the evening.

Mr. Dobie spoke on fertilizers and soil conditions. He would only give a few concrete principles as to what constituted a successful farmer. Some thought that success had been attained if more was taken out of the ground than was expended in labor. This was not true, however. Lasting success could only be attained by keeping the soil in proper condition for future crops. "The plant foods are ten in number," he said. "It is only necessary to name four—nitrogen, phosphorus, potash and lime. The last of these can also be eliminated, because the supply of lime in the soil in this section is plentiful. The world's supply of potash and phosphorus is almost infinite, but the supply of nitrogen is limited, and the crop that is taken from the land is measured by the smallest element of these plant foods. Fortunately nature has provided a means by which nitrogen can be returned to the soil. On land short of nitrogen the best way to restore this element to the soil is to sow clover, which gathers it from the atmosphere and stores it in nodules on the roots. Stable manure also contains this element." Where available, the speaker recommended stable manure as the best fertilizer; but where this was not obtainable people should not be prejudiced against commercial fertilizers. The formula was printed on sacks, and any one could send samples to Ottawa and have them analyzed. If the analysis did agree with the printed formula, there was a severe penalty attached. The speaker cited numerous instances where commercial fertilizers had doubled the crops. The best time to apply fertilizers for vegetables and field crops was in the spring of the year. For fruit trees, possibly in the fall. All farm implements now had fertilizing attachments, and it could be sown with the seed. The question whether it paid to use fertilizers or not depended largely on proper cultivation of the land. Fertilizers alone could not take the place of good hard work. The speaker gave instances where worn-out farms had been brought back to a high state of productivity by returning the necessary elements of plant food to the soil. If any one had any doubts on this subject, he advised them to make tests. Mr. Dobie closed his lecture by advising those of his audience who had land which did not produce as much as it should, to ex-

periment with one or more fertilizers, or a combination of two or more varieties. It did not require a chemist to tell what the soil needed, and soil analyses had proved unsatisfactory, because the land frequently varied in a very small area. He advised rotation of crops as much as possible, which would prevent the land from wearing out.

Prof. W. S. Thornber, horticulturists of the Washington Agricultural college, at Pullman, followed. He had been intensely interested in fruit culture for over thirty years. There was a tendency even now to plant too many summer varieties of apples. Some of the orchards planted thirty or forty years ago in Washington were not worth calling orchards on this account. Only varieties that allow the grower a month's time, or even more, in which to ship should be planted. How to grow nicely colored apples, that would sell on sight, was a problem. The apples grown here were not all that could be desired in color, but the flavor was delicious. The Northern Spy apple grown here was superb. For this section he advised planting only four varieties, namely, Jonathan, Rome Beauty, Wagner and Wine Sap. The latter variety required lots of water during the month of maturing. Even that favorite in the English market, Cox's Orange, he would not recommend for extensive cultivation in this valley. During late years the western apple had outsold the apples from all other sections of the country.

He had not noticed any pear blight since he arrived in the valley. If the district was free of this disease, this was probably the most profitable fruit that could be grown. Two of the best varieties were the Bartletts and Winter Nellis.

There were splendid opportunities for growing cherries here. Of the sweet varieties he recommended the Bing, Black Republican, Lambert, Royal Ann and Hoskins. The Bing was a splendid shipper. It was today being shipped from the state of Washington to London and the City of Mexico. Of the sour cherries the Olivet and the Montmorency were two of the best varieties.

Of peaches only the hardest varieties, such as the Alexander, Triumph and Hart's Early, should be planted.

Only the hardest and early maturing varieties of grapes would be likely to admit of successful cultivation here.

In regard to buying nursery stock he said, "But from the nearest nursery where you can get the best stock." First-class one-year-old trees were better than two-year-olds for transplanting. Apple trees should be planted from 25 to 30 feet apart. The triangular system of laying out an orchard was preferable to the old style, as it admitted of planting more trees to the acre, at the same distance apart. Care should be taken in planting. The holes should be large enough—not auger holes—with the ground well packed around the roots, and a loose mulch on top. The trees should be planted one inch deeper than they grew in the nursery. Heavy winter pruning produced wood, while summer pruning was productive of fruit.

Mr. Thornber gave a number of blackboard illustrations of the proper

(Continued on Page Three.)

BOARD OF TRADE

Asks Council to Gather Data in Regard to Installation of Sewerage System

Favors a One-Foot Raise of Sidewalks in the Burnt District

A meeting of the board of trade was held in the city hall last Monday evening, the board being called to order by the vice-president immediately after the adjournment of the city council.

J. B. Henderson was elected second vice-president, and S. T. Hall secretary. It was decided to pay the secretary a small salary. The following executive council was chosen: Dr. Kingston, Ed Davis, G. M. Fripp, A. B. W. Hodges, John Temple, Fred Clark, J. C. Macdonald, P. T. McCallum, Geo. Clark, Geo. Hull, N. L. McInnes, Jeffery Hammar, Geo. Chapple, E. Spraggett and John McKie.

The committee appointed at the last meeting to investigate the matter of raising the street grade, recommended that the sidewalks in the burnt district be constructed one foot above the present street grade, and that the business men when they rebuild be requested to make the entrances to their stores one step above the sidewalks, thus giving an actual raise of twenty inches without interfering with the present street grade. The committee also recommended that the board request the city council to secure the best legal advice on the rights of the city to change the grade. The report was received.

J. B. Henderson furnished the board with the levels at various points in the business district, which showed that Bridge street was four feet lower at Bridge and First, and a decimal point over four feet lower at Bridge and Second than the driveway of the North Fork bridge.

The legal phase of raising the grade was discussed pro and con, nearly every one present expressing his views on the subject. The consensus of opinion appeared to be that an official street grade had never been established, and that the present city council was at liberty to make whatever they deemed proper.

On motion a committee, consisting of W. K. C. Manly, D. D. Munro and A. B. Hood, was appointed to secure the signatures of the property owners to a petition requesting the city to construct the sidewalks above the old grade in the burnt district.

Mr. J. B. Henderson submitted an outline and estimated cost of a sewerage system. He stated that a system for the six business blocks could be installed at a total cost of \$7500. This would mean a cost of about \$75 to each lot, or an assessment of \$15 per year if spread over a period of six years. The system he suggested was to construct a trunk sewer to the confluence of the rivers, and there build a large elevated septic tank and raise the sewage into it by means of a slow pump. The over-

flow from the tank could be run into the river.

Dr. Kingston, provincial health officer, was requested to give his views on this question from a sanitary viewpoint. Mr. Kingston said an opinion prevailed that the overflow from septic tanks was innocuous. This, however, was not the case. The liquid, after leaving the tank, still contained disease germs, and he had grave doubts of the provincial government allowing this matter to pass directly into the river. If the tank was constructed a short distance from the river, there might not be any objection to it. But, in either case, the city would first have to secure the consent of the provincial health officers, as it would not be wise to inaugurate a system without first consulting the government. An ideal way, continued Mr. Kingston, of disposing of sewage was by the sewage-farm system. A ten or twenty-acre tract of land could be purchased a mile or so below the city, and a sewer laid to this point.

Mr. Henderson replied that the farm system would probably cost a little more than a septic tank, but that it would be impossible to estimate the cost of the former in the absence of an engineer's levels. To give even an approximate cost, it would first be necessary to have a survey made of the route.

After a general discussion on the subject, a resolution was adopted setting forth that, in the opinion of the board, the installation of a sewerage system was desirable, and the board memorialized the city council to thoroughly investigate the matter, and to secure all the data possible on the various methods of disposing of sewage.

A vote of thanks was tendered Mr. J. B. Henderson and Dr. Kingston for valuable information furnished the board on the above subject, after which the board adjourned.

Accident at Granby Smelter

A serious accident occurred at the Granby smelter at about half past six Tuesday evening. While dumping hot slag over the dump the track gave way and four of the large pots which convey the red hot slag from the furnaces to the dump went down the embankment, a distance of between 60 and 70 feet. The dinkey engine, which was being run by T. Hickey, narrowly escaped following the pots, only hanging on by the hind wheels. Fortunately no one was injured. All the men that could be got at the time were rustled from the city to work on the wreck. The slag pots are now being hauled back onto the dump, but it will take two or three days more before the wreck can be entirely cleared away.

New Feeding System

Manager Rossa, of the British Columbia Copper company, is now perfecting a plan to feed the two smaller furnaces at the Mother Lode smelter with buckets operated on an aerial tram from the ore bins to the furnaces. Mr. Rossa states that it is the intention of his company to install this bucket tram, as it is considered much more economical than the trackage system.

Wanted—A position as mother's help by a middle-aged lady; best of references; good plain cook. Address Mrs. K., Sun office.

PASSED BY-LAW

City Council at a Special Meeting Establishes a Fire District

Includes Practically All of the Down-Town Business Section

At a special meeting of the city council Monday evening the bylaw defining the fire limits of the city, and regulating the construction of buildings within the fire district, was reconsidered and finally passed. The boundaries of the fire district, as finally approved by the council, are: On the east, the North Fork of Kettle river; on the north, the first lane north of Winnipeg avenue; on the west, a line running south along the western boundary of the lane between Third and Fourth streets to Spokane avenue, thence along the centre of Spokane avenue to Fourth street, thence along the centre line of Fourth street to Main street; on the south, the centre line of Main street. All buildings inside the fire limits must be constructed of either brick, stone, cement, or iron facings with brick or stone backs. The walls of two-story buildings must be at least thirteen inches thick, and the roofs must be constructed of non-combustible material. All chimneys must be started at the foundations of buildings. The storage of oil and all other combustible materials, except in very small quantities, is prohibited inside the fire limit.

Shot Near Republic

Rol Sibert, of Republic, was shot by a one-armed halfbreed named Charles Phillips about five miles out of Republic on Saturday last. The two men had some trouble at the celebration which was held in that city on the 4th of July, and the halfbreed threatened to kill Sibert the first chance he got. Some years ago Phillips shot a policeman in Seattle, and in attempting to make his get-away his arm was shot off. He served a term in the penitentiary for this crime, and has always been considered a bad man ever since his release. The commissioners of Ferry county have offered a reward of \$250 for the capture of Phillips, dead or alive, but so far nothing has been seen or heard of him.

Holdup at Greenwood

A holdup is reported from Greenwood this week. Two masked men entered the Vendome hotel at midnight and made six persons who were in the bar at the time throw up their hands and face the wall. One of the holdup men then proceeded to go through the persons lined up, while the other kept a revolver covering them. Then they rifled the cash register, securing about \$125 out of it. After searching all the drawers back of the bar to make sure that no firearms were secreted in them, the bandits backed out of the side door and made their escape. So far no trace of them has been found, but it is stated that they have left Greenwood. The total amount obtained was about \$140.

FRIDAY, JULY 31, 1908

VERY much *a propos* of the Quebec tercentenary celebration, *The London Graphic* for the week of July 18 contains two magnificent portrait supplements of the Prince and Princess of Wales, drawn in our contemporary by Mr. Seymour Lucas, R.A., at sittings specially accorded by their royal highnesses, and beautifully printed upon art paper. As a further instance of the enterprising methods of *The Graphic* and the keen interest which it is displaying in things Canadian, it may be mentioned that England's premier illustrated weekly has specially engaged Mr. Frank Craig, one of the best known draughtsmen in the United Kingdom, to depict in its pages the most striking aspects of the Quebec festivities. He accompanies the royal party to Canada for this purpose, and proposes afterwards to make a trip through the Dominion, the artistic results of which will be seen in the pages of *The Graphic*.

THE SUN has received from the Superintendent of Immigration, Ottawa, a nicely printed and beautifully illustrated pamphlet entitled "British Columbia: Canada's Land of Promise on the Pacific," printed by the king's printer at Ottawa. We are pleased to note that the immigration department is bestirring itself in the matter of advertising this province. The book, being in the nature of a work of art, should do more to make the resources of British Columbia known to the outside world than all the boasting clubs that have yet been organized. Among the numerous beautiful half-tone illustrations, there is a scene from the famous Covert orchard near this city. The pamphlet contains a number of maps, and is replete with information on the resources of the province in general, including climate, agriculture, dairying, hop culture, markets, fruit growing, mining, smelting and refining, fisheries, the lumber industry, pulp and paper, sportman's paradise, cities, education, description of lands, Dominion government lands, homestead conditions, Canadian Pacific lands, taxation, how to reach the province, meteorological, synopsis of mining laws, provisions of land law, altitudes, etc. We notice one or two errors in

the book. Mr. J. D. Honsberger, of this city, should be given the credit of winning the first prize gold medal for the best five boxes of apples in Class 1 at the fifteenth annual convention of the North-West Fruit Growers' association in Vancouver last December, instead of the Kelowna Fruit Growers' association, and Jas. Cooke should be credited with winning the second prize, instead of Mr. Honsberger.

PERSONAL

Martin Burrell returned yesterday from Midway and other western points.

I. A. Dinsmore, chief of police of Greenwood, visited his family in this city last Tuesday.

Miss Edith Gilmour, of Victoria, is visiting at the home of her sister, Mrs. J. C. Taylor.

H. P. Nebold, representing the Capital City Nursery company, of Salem, Ore., was a visitor in the city last Monday.

Jack Coryell, who has been living in South Africa for a number of years, has returned to his home in this city and expects to remain here.

James Cowey, formerly a mechanic at the Granby smelter, but now with the Grant Mining company, of Chehalis, Wash., visited friends in the city last Monday.

BREVITIES

At a meeting of the principal fruit shippers of the valley, held in the city hall last night, it was unanimously decided to form an association to be known as the Grand Forks Fruit Growers' association, and the preliminary steps towards perfecting an organization were taken. This organization will be of a commercial nature, and will not interfere with the Farmers' Institute, but will co-operate with that body.

B. Lequime, the lumber man, intends to add a cement building block plant to his other enterprises, having associated with him a gentleman of practical experience in the manufacture of this modern building material. They expect to have the plant in operation inside of two weeks.

Constable Docksteader, of Phoenix, was in the city last Friday for the purpose of arresting five Italians who had left that camp in a hurry, and who were turned back at the international boundary line. He took his prisoners back to Phoenix in the evening of the same day.

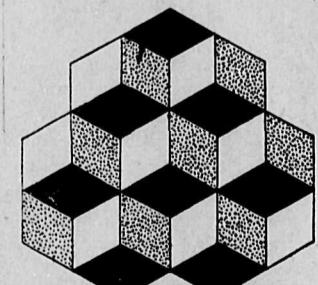

Cedio, who dynamited the Canadian hotel at Niagara, ten miles north of this city, in November, 1906, thereby causing the instant death of the proprietor's 18-year-old daughter, Louise King, is to be hanged in the Kamloops jail today.

Born—in Grand Forks, on Thursday, July 23, to Mr. and Mrs. Leonard Vaughan, a son.

P. T. McCallum is performing the duties formerly assigned to Wm. Cook in the customs department during the absence of Customs Officer Gilpin.

Some portions of the burnt district have already been pretty thoroughly cleared of the debris caused by the late fire.

The British Columbia Copper company at Greenwood is adding

Synopsis of Canadian Homestead Regulations

ANY available Dominion Lands within the railway belt of British Columbia may be homesteaded by any person who is the head of a family, or any male over eighteen years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situated.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of his homestead, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by such person residing with the father or mother.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal-Coal mining rights may be leased for a period of twenty-one years at an annual rental of \$1.00 per acre. Not more than 2,500 acres shall be leased to one individual or company. A royalty at the rate of five cents per ton shall be collected on the merchantable coal mined.

W. W. CORY,
Deputy of the Minister of the Interior.

THE COPPER HANDBOOK

(New Edition Issued Nov. 15, 1906.) Is a dozen books in one, covering the history, geography, geology, chemistry, mineralogy, metallurgy, terminology, uses, statistics and finances of copper. It is a practical book; useful to all and necessary to most men engaged in any branch of the copper industry.

Its facts will pass muster with the trained scientists, and its language is easily understood by the everyday man. It gives the plain facts in plain English without fear or favor.

It lists and describes 4626 copper mines and companies in all parts of the world, descriptions running from two lines to sixteen pages, according to importance of the property.

The Copper Handbook is conceded to be the

World's Standard Reference Book on Copper

The mining man needs the book for the facts it gives him about mines, mining and the metal.

The investor needs the book for the facts it gives him about mining, mining investments and copper statistics. Hundreds of swindling companies are exposed in plain English.

Price is \$5 in Buckram with gilt top; \$7.50 in full library morocco. Will be sent, fully prepaid, on approval, to any address ordered, and may be returned within a week of receipt if not found fully satisfactory.

Horace J. Stevens,
Editor and Publisher,
453 Postoffice Block,
Houghton, Michigan.

FRUIT GROWING

(Concluded From Page One)

method of pruning. "When it comes to pruning time," he said, "it is best to entrust the work to the hired man, or your wife, because few owners have the heart to cut a tree back the required length."

"Start working the soil as soon as the ground is ready in the spring," he said. "Follow this up with summer tillage by harrowing the ground every week or ten, and after every rain, up to August 15th. After that date some crop that will add humus to the soil should be sown. Russian vetch and Canada peas are both good."

This section, he said, was not troubled very much with fruit pests, and he dwelt very briefly on the subject of spraying.

On the subject of packing the fruit growers of British Columbia did not need any lessons, because the growers of Washington and Oregon had crossed the line and taken instruction from us.

Mr. Thornber closed his address by saying that in Washington the fruit growers had a slogan—"Ship it best and can the rest." It would be well for the growers of this section to adopt a similar motto.

Mr. Dobie closed the meeting by urging everybody interested in ranching or fruit culture to join the Kettle Valley Farmers' Institute. The dues are only 50 cents a year, and this entitles you to all the literature printed by the government on subject of farming.

On Wednesday morning, between the hours of 10 and 12, Mr. Thornber gave a practical daylight demonstration of work in the orchard at Mr. Traunweiser's fruit ranch to a large class of interested farmers. The subjects gone into included planting, pruning, grafting, budding, thinning out of fruit, remedies for various tree diseases, how to keep the soil in proper condition, etc. A tree affected with canker was found. For this he advised cutting away the dead bark and then washing the affected portion of the tree with Bordeaux mixture, afterwards painting it.

Before leaving the Prof. Thornber took a picture of the members of the Kettle Valley Farmers' Institute, grouped in front of a huge apple tree in the middle of the orchard.

Messrs. Thornber and Dobie left for Midway Wednesday afternoon.

Cures Woman's Weaknesses.

We refer to that book to weak, nervous, suffering women known as Dr. Pierce's Favorite Prescription.

Dr. John Fife one of the Editorial Staff of THE ELECTRO MEDICAL REVIEW says of Unicorn root (*Erythrina Dicroidia*) which is one of the chief ingredients of the "Favorite Prescription":

"A remedy which invariably acts as a stimulating laxative *** makes for normal activity of the entire reproductive system." He continues: "In Helenitis we have a medicament which more fully answers the above purposes than any other drug with which I am acquainted. In the treatment of diseases peculiar to women it is seldom that a case is seen which does not present some indication for this remedial agent." Dr. Fife further says: "The following are among the leading indications for Helenitis (Unicorn root). Pain or aching in the back with leucorrhoea; atonic (weak) condition of the reproductive organs of women, mental depression, irritability, associated with nervous diseases of the heart and lungs of women; constant sensation of heat in the region of the kidneys; metrorrhagia (flooding), due to a weakened condition of the reproductive system; amenorrhoea (suppressed or absent monthly periods); arising from or accompanying an abnormal condition of the digestive organs and anæmia (thin blood) habit; dragging sensations in the extreme lower part of the abdomen."

If more or less of the above symptoms are present, no invalid woman can do better than take Dr. Pierce's Favorite Prescription, one of the leading ingredients of which is Unicorn root, or Helenitis, and the medical properties of which is most faithfully represented.

Of Golden Seal root, another prominent ingredient of "Favorite Prescription," Prof. Finley Ellingwood, M. D., of Bennett Medical College, Chicago, says:

"It is an important remedy for disorders of the womb. In all catarrhal conditions, and general enfeeblement, it is useful."

Prof. John M. Sender, M. D., late of Cincinnati, says of Golden Seal root:

"In relation to its general effects on the system there is no medicine in use about which there is such general unanimity of opinion. It is universally regarded as the tonic useful in all debilitated states."

Prof. R. Bartholow, M. D., of Jefferson Medical College, says of Golden Seal root:

"Valuable in uterine hemorrhage, metrorrhagia (flooding) and congestive dysmenorrhea (painful menstruation)."

Dr. Pierce's Favorite Prescription faithfully represents all the above named ingredients and cures the diseases for which they are recommended.

RANDOM REMARKS

Occasionally a man remains in the bachelor class because he is skeptical as to the ability of a woman to support him.

The trouble with most of us is that we'd rather sit around and kill giants than to get up and tackle a few little piggies.

It is the easiest thing in the world for a man to get engaged to a widow, even if he really doesn't mean it.

No matter what the future may have in store for a woman she expects to find it among the bargains.

A lot of men who think they are keeping step with the march of progress are only marking time.

The brand of faith that some men expect to move mountains with would not even move a mole hill.

Men successfully tackle big responsibilities only after having practiced up on little ones.

If absence makes the heart grow fonder it's up to the wise young man to go home early.

When a man doesn't amount to much he is apt to lay the blame on "environment."

While the conservative man waits the hustler gets busy and goes after the goods.

Life is like a cistern—what you get out of it depends upon what you put into it.

Whisky is said to improve with age, but so many men won't let it grow old.

People who struggle to keep up appearances usually give their ease away.

It's tough on a man with a chronic pride to be compelled to swallow it.

There's plenty of room at the top for the chap who is not dizzy-pated.

It's enough to discourage a tight-rope walker when business is slack.

Many a noble young idea has been thumped to death on a typewriter.

A lot of entanglements result from presents with strings attached.

The foolishness of yesterday is not cured by the regrets of today.

He is truly a shiftless man who is too lazy to shift for himself.

When a man is satisfied with himself he begins to shrivel up.

It takes a real worry to make a big man sit up and take notice.

But few dancing masters are to be found in the hop districts.

Rivers we fished in when a boy are nothing but creeks now.

If you would be happy let the other fellow do the worrying.

How harsh it sounds to hear a man criticise your pet hobby!

Moth-eaten jokes of a Croesus never fail to produce a laugh.

Ever notice how much truth there isn't in a compliment?

A pile of filthy lucre isn't necessarily a heap of dirt.

Self-interest and sympathy have nothing in common.

If there is a skeleton in the closet keep the door shut.

It is never too late to break yourself of a bad habit.

After saying you intend to do a thing, do it.

THREE GOOD ONES

\$2.00 THE THREE FOR \$2.00

Regular Price \$3.00

An Offer Which Meets the Special Wants of All Classes of Readers.

The Western Canadian reading public is made up chiefly of these classes. Persons who have lived in the West for a lengthy period and are out and out Westerners, and recent arrivals from the Old Country, from the United States and from Eastern Canada.

Perhaps no one newspaper could cater with complete satisfaction to all these classes, but by this combination offer every special need is met.

The Weekly Free Press and Prairie Farmer gives a complete record week by week of all happenings in the Western Provinces. In addition it has special departments for American and British settlers. The Family Herald and Weekly Star supplies the former resident of Eastern Canada with news of the Eastern portion of the Dominion in detail, and the Grand Forks Sun provides the local and Boundary news, which you cannot do without.

BREVITIES

David Mark Carley, late publisher of the Nelson Daily Canadian, is making preparations to commence the publication of the Ladysmith Chronicle early in August. Mr. Carley and The Sun man engaged in the journalistic business shortly after disembarking from Noah's Ark, and have followed that profession continuously since that time up to the present moment.

"The Spokane Interstate Fair will have a horse on the race track this fall that should pace the mile in less than 2:09," is the positive announcement of Manager Robert H. Cosgrove. "You may not believe this, but nevertheless that's what is sure to happen. G. W. Clark, of Calgary, Alta., has given me every assurance that his great horse Leland Onward, which he has entered in our 2:05 pace, will surely come to Spokane this fall. He is eager to place the horse against Sir John S. and the other crack California 2:05 horses. The contest between Leland Onward and Sir John S. should make the greatest race ever seen in Spokane."

The ordinance of believer's baptism will be administered in the Baptist church on Sunday evening, August 2nd.

The new lithographs issued by the Spokane fair is a very handsome piece of work and has attracted a great deal of admiration. The management advise us that a copy will be mailed free to any address on request.

Local advertisers should make a note of the fact that THE SUN is the most widely read paper in Grand Forks.

BOUNDARY ORE SHIPMENTS
