30th Year—No. 46 | "Tell me what you Know is true, I can guess as well as you." | Friday, September 25, 1931 | $1.00 PER YEAR

Road Camp Opened for The Jobless

The road camp at Billings, nine miles east of this city, for the unemployed, was opened last night

The cook house and dining-room have a capacityy for feeding 100 persons. Besides this building there are three or our bunk houses.

The groceries and nearly all supplies for the camp were shipped in from the coast. There is a very strong feeling among the merchants of the city for this action.

The rules of the camp, it is understood, prohibits any workman from leaving the camp but once every two weeks. The members are also debarred from visiting beer parlors, theaters, dances, and from driving their own automobiles.

Camps in this riding are also being established at Boundary Falls and at Rock Creek canyon.

SUMMERLAND SHIPS A CAR OF APPLES TO SOUTH AFRICA

SUMMERLAND. — Work in the packing houses slowed up considerably this week on account of the rains over Sunday and Monday. Stone fruit has reached the stage where the peaches are more of a hinrrance than a help. Small lots of peaches keep coming along.

Some eiport apples left for the old country last week, and a few more cars were shipped this week.

A tthe Occidental a car of Cox Orange and Macs was made up for export, but there are no Macs packed for the domestic market as yet. Pears are about over for the most part, with the exception of d'Anjou, which will be coming in shortly. At this packing house Macs are expected to come in heavily next week.

At the Cooperative, Cox Orange and Grimes Golden for export have about been cleaned up. This year's shipments were of nice quality. A few Macs have started to come in and are showing up well for color.

Walters Limited shipped out a car of Macs and Johnnies export for South Africa Monday.

Penticton Gale Carries Off Roof

PENTICTON.—Lifting the entire roof of one section of the Penticton Cooperative Growers' building, like a gigantic kite, Sunday's high velocity wind carried it over the roof of a railway shed and into the road, a distance of more than two hundred feet.

The roof of the building,which was erected only last year, is about 75 feet square, and was of fairly solid construction.

Fragments of it were carried for several hundred yards along the path of the storm. Other pieces were driven through the sides of waiting refrigerator cars wit hthe velocity of bullets.

Telephone and electric light poles and wires are strewn on the streets in many parts of the town. Trees were blown down, some with property damage the full extent of which is not yet ascertainable by the "breeze" which is thought to have reached a speed of between sixty and eigthy miles per hour.

Roads approaching Penticton were blocked by fallen tress in many places, and much damage done in some of the smaller communities, although details are as yet unavailable.

VACANCIES ARE FILLED BY TRAIL EMPLOYEES' COCIETY

TRAIL.—W. C. McKenzie, Gilbert J. Page and G. W. Williams were elected by acclamation to vacancies created in Consolidated Mining & Smelting Company's Employees' Benevolent society, Trail.

The annual election for president and vice-president of the society will be held Thursday. G. C. Eyes will be be returning o cer.

CONDITIONS IN INTERIOR GRAVE, SAYS PATTULLO

VANCOUVER.—Grave conditions through the interior and rural parts of British Columbia, observed T. D. Pattullo, opposition leader in the legislature, will be laid before the public of Vancouver at a mass meeting under Liberal party auspices in Hotel Vancouved Thursday evening. Mr. Pattullo, the Liberal leader, will be the speaker.

Since the house adjourned Mr. Pattullo has toured almost every quarter of the province. Believing that the Vancouver public is largely unaware of the manner in which the Tolmie government has carried on its activities throughout the interior. the executive of the City Liberal association asked Mr. Pattullo to explain the situation at a public meeting at the earliest possible moment.

It is felt in Liberal circles in the city also that the party has permitted an almost daily barrage of Conservative propaganda to be foisted on the people of Vancouver in the form of press statements without any adequate presentation of the opposition viewpoint.

The handling of the unemployment situation, its relation to taxation and the government's failure to obtain action on such vital matters as the Peace river rail outlet will be among the topics discussed by Mr. Pattullo Thursday.

MIXED FARMER HAS ADVANTAGE OVER CITY DWELLER, SAYS PREMIER

VICTORIA.—British Columbia is passing through a period of depression such as it has seen on other occasions and weathered successfully, and the present instance would be no exception to the rule, Premier Tolmie told a large audience at the North and South Saanich Fair association opening last Thursday. Never before, he said, had the position of the mixed farmer shown to better advantage over the city dweller and there was a sound lesson to be drawn from that circumstance. The premier advised young men to set about the acquisition of a home, the spare time development of land sufficient to reduce their living costs, and to work at their own callings until times improved.

Gold Hoarding Cause of Crisis, League Is Told

GENEVA.—The cause of the present world financial crisis is the accumulation of g old in the United States, France and elsewhere, M. H. Colijn, of Holland, told the economic commission of the League of Nations on Monday.

"There never will be a free circulation of capital until there is a free circulation of gold," he said.

Sir Arthur Salter, of Great Britain, told the commission thta because of the events of the past 24 hours in England, he was obliged to abandon his intended speech on the world-wide financial crisis. He formally notified he commission of the suspension of the gold standard by Great Britain and the reasons.

Sir Arthur said he appreciated the repercussion of the action in other countries, especially those accustomed to finance themselves in London. He gave assurance that the British government would cooperate in every egort to reduce such effects. England's post-war record, he said, shows she fulfills her obligations, and she intends to continue to do so.

Douks Still Hope for Entry

NELSON.—Colonization plans of Doukhobors with respect to Mexico, so far as is known here, relate exclusively to a proposed emigration from Russia.

While a Doukhobor commission is in Russia making representation to the Soviet government on the matter of passports, dispatches from Mexico state that there is little likelihood that the new petition by Doukhobor farmers of Canada for permission to colonize a part of northern Mexico will be granted.

A similar petition was rejected several months ago when President Ortiz Rubio took the stand that it would be unjust to admit foreign colonists as long as the home agraarian problem is unsolved.

Until Peter Veregin made his recent statement that he proposed to bring a new body of Russians to Canada, precipitating a bond of protest from western governments and a statement from Ottawa that the migration to Canada would not be permitted, the whole Mexican project had been understood here to be concerned with Doukhobors in Russia

McINTOSH RED APPLES SHOW BEST QUALITY AND COLOR IN YEARS

PENTICTON, Sept. 22.—This year finds the McIntosh apples with better color, size and quality chan in any year since 1926, according to L. Roadhouse, manager of the Penticton Cooperative Growers. The Macs have taken on a fine red tinge and the size is quite good. In 1930 the Penticton Cooperative packed 55,000 boxes of Macs, while this year's crop is estimated at between 40,000 and 45,000 boxes.

Peaches are cleaned up at the Penticton Cooperative as well as other stone fruits. There are still a few late pears to pack and then the whole packing plant will be turned onto apples.

Five graders were on apples this week. Three export cars of apples were shipped by the occidental packing house this week, one car of Cox Orange and McIntosh apples going to Glasgow.

Light Damage By Sunday's Windstorm

Damage from the high windstorm on Sunay afternoon is reportd to have been confined mainly to the lower end of the valley.

In the Mehmal orchard a large number of Delicious apple trees were badly wrecked. A quantity of apples were also blown from the trees.

In the Atwood orchard it is estimated that between 400 and 500 boxes of apples were blown on the ground. These two orchards were the heaviest losers.

From the Carson end of thevalley reports of any serious damage to the fruit crop have been received.

In the city the damage was confined to the blowing out of a plate-glass window in D. A. McKinnon's store and to the wrecking of a few windows in the residential part o f the city.

EXHIBITING SEED

Prize lists of the Vancouver Winter fair, to be held November 30 to Dceember 3, are now available, and farmers who are intending to exhibit grain, grasses, field roots or potatoes are requested to secure a copy of the prize list. Fruit growers who intend exhibiting fruit can secure information on the prize lists from the district agriculturist at Grand Forks.

The provincial department of agriculture will refund transportation charges on exhibits of seed, vegetable, roots, etc., going to Toronto or to Chicago to compete at the Toronto Royal Winter fair or the Chicago International fair, provided the exhibit has been approved as worthy by the district agriculturist and by the department at Victoria. Information on these matters can be secured from the district agriculturist at Grand Forks.

DOES THE CAPITALISTIC PLAN FAIL WITH THE POUND?

ORONTO, Sept. 24.—That what has been witnessed within the last 24 hours may not be merely the failure of the pound sterling to maintain parity under the gold standard, but the final failupe of the capitalistic system of the world to assimilate that gold standard, was the opinion voiced to the Canadian Club here yesterday by Dr. T. E. Gregory, professor of banking at the London Shool of Economics, member of the gold committee of the League of Nations, and one of the world's foremost economists.

He traced some of the immediate and permanent consequences of Britain's suspension of the gold standard 'If sterling," he said, "finally settles down at $4 to $4.20 it will be equivalent, from the standpoint of the British manufactuer, to a reduction of selling prices to foreigners.

"If the pound does not fall below this figure, the British manufactuer will be in a position to compete more egectively with the countries with lower internal costs than possessed by Great Britain herself."

SEED JUDGING TEAM

The coaching of the contestants for the Boundary district seed judging team to compete in the elimination contest at the Vancouver Winter fair will commence immediately. Boys or girls who wish to try out for membership on the team are requested to notify the district agriculturist at Grand Forks. The winning team at Vancouver will go to Regina World Grain exhibition in 1932.

8000 Tons of Tomatoes Rot In the Fields

VICTORIA.—Eight thousand tons of prime British Columbia tomatoes will not be taken from the vines this year because the growers can not sell them, according to advises received by the department of agriculture.

Many acres of ripe fruit are being ploughed under and horses' hooves in tomato districts are red with the juice of this vine vegetable.

Restrictions in the canning of tomatoes is responsible, it is said. Altogether 2700 acres produced tomatoes this year as against 4000 acres usually used for the purpose and still the market could not absorb the reduced production. Pear growers are reported in about the same position.

EXPORTS FROM NEW FERTILIZER PLANT WILL START SOON

VANCOUVER.—The chemical fertilizer industry established at Trail is expected to add 50,000 tons annually to British Columbia's export totol, according to the Vancouver Merchants' Exchange. The movement is expected to commence in the near future, it is said, from the plant at Trail, which produces ammonium sulphate, ammonium phosphate and triple phosphate fertilizers for the Canadian market. The export quantity suggested is the expected surplus over the Canadian demand.

POULTRY CLUBS

The judging of the eight junior poultry clubs in the Boundary districts has now been completed and the winners will be announced shortly. There are three clubs at Grand Forks, three at Midway and two at Rock Creek.

Basis on Which Relief Work Is To Be Handled

It has been announced from Victoria that the British Columbia government is prepared to enter into agreements on the following basis of cost participation in the various programs for creation of work:

The federal government will pay:

One-half the cost of the transcanada highway.

One-half of the cost of the provincial highway undertakings.

One-half of the labor cost on apmen with dependents.

One-half of the cost of transients.

One-half of the cost for men without dependents, and

One-third of the cost of direct relief in municipalities.

The provincial government will pay:

One-half of the cost of the trans-Canada highway.

One-half of the costs of provincial highways and works.

One-half of the labor cost of approved municipal undertakings.

One-half of the cost of transients.

One-half of the cost of men without dependents.

One-half of the cost of provincial direct relief. and

One-third of the cost of municipal direct relief.

Municipalities are asked to pay:

One-quarter of the labor costs of approved municipal undertakings and all material costs.

One-third of the cost of municipal direct relief.

No charge is to be made on the municipalities for transients and none for men without dependents. The whole arrangement as outlined in the foregoing is the basis upon which the government is prepared at present to immediately enter into agreefents with the municipalities.

Ayrshire Cows Making History

VANCOUVER.—Ayrshire history is being made in Trail by the herds of the Consolidated Mining & Smelting company. It is reported that no less than 60 cows there have established producton records of over 60 pounds of milk daily. The company is going in for production and has followed a merciless system of weeding out non-efficient cows. Young stock on favorable terms is being distributed to the boys' and girls' clubs throughout the interior.

In reporting upon a recent visit to Trail, P. L. Scott, Ayrshire fieldman, had the following comment to make upon the herds:

"On visiting the herd of Ayrshires at the C. M. & S. farm at Tfail, I was much impressed with the large number of outstanding cows kept. At the present time the herd consists of around 240 head; 60 cows have milked up to 50 pounds per day and over, and some of their young imported cows are doing exceptionally well.

William Forrest, superintendent of the company's farm, says he is going right after the production end of it and that no loafers will be kept.

"From these high-producing cows he has sold 28 head of heifer calves in the Boundary and has a waiting list to be supplied as soon as they are available. This is a genuine opportunity for boys and girls to get a foundation of high-producing stock from which to build up a herd.

"The cow barn on this farm is large and modern in every respect ard the milk is handled by machines in the most sanitary manner. They have recently installed a plant to pasteurize the milk before it is bottled and supplied to the employees of the smelter, assuring them of a product unexcelled in purity. Mr. Forrest is to be highly complimented on the efficient way he has everything handled in this mode dairy."

Summary of Fruit Market

VICTORIA, Sept. 25.—The Canadian trade commissioner at Buenos Aires has wires the department of agriculture at Ottawa: "No prospects for potatoes nor apples in barrels. but market for box apples if arriving here before 15th December." An embargo is effective on that date.

A trial shipment of low grade apples is to be forwarded to Shanghai on the next China boat. Arrangements for the shipment has been made by Col. L. M. Cosgrave, Canadian trade commissioner to China, and the markets division of the department of agriculture. Fifty boxes of faall apples of digerent varieties will be forwarded. Col. Cosgrave thinks that a lot of British Columbia apples should be sold to the Chinese if placed on the market at a reasonable price.

The movement of bulk apples from Okanagan continues strong and prices have dropped. Wealthies are selling at $25 and other varieties at $20 per ton f.o.b. Apples are running to larger sizes than was expected, but the color is slow to come and may delay shipping for a few days.

Shipments of apples are running heavily to bulk this season, due no doubt in part to the demand ffr apples on the prairies shipped in the cheapest form. Up to date 94 cars of bulk apples, chiefly Wealthies, have rolled to prairie points from British Columbia. Of these 32 have been shipped to Manitoba, 31 to Saskatchewan, 39 to Alberta and 2 to British Columbia.

McIntosh Red shipping has started at many valley points in the Okanagan. They are well colored and of good size. The Shippers' Council has ordered that no Macs must be shipped before the 21st, but picking for storage will not be agected by that order. The shipping o Macs to the prairies has been delayed in order to stimulate the movement of Wealthies, which are a heavy crop this year, while the McIntoshes are considerably less than last year.

First quotation of prices for McIntosh Reds f.o.b. are $1.30 a box for Extra Fancy or $1.10 for ordinary box run. These are prices at the point of production.

The first McIntosh Red apples from Kamloops have arrived on the Victoria market and are quoted at $2.y0 a box. Okanagan Wealthies C grade are selling at $1.75 a box, local Wealthies at $1.60 and Blenheim Orange at $1.25. Local pears from $1 to $1.25 a box. Tomatoes from Mayne Island are selling at from $1 to $1.10 per four-basket crate. These prices are wholesale.

The duty on grapes has been fixed at 5c per pound in bulk or 7c per pound weight of package included, in baskets or other packages. The increase of 2c per pound on grapes in packages became effective of September 12

ONE THOUSAND CARS FRUIT ROLL FROM THE PROVINCE

VERNON.—Since its inception recently the Vernon bureau of market information has listed the movement of 1000 cars of British Columbia fruit vegetables to coast and prairie points, it is stated by J. A. Grant, who is in charge of the bureau for the provincial government.

Word has been received in Nakusp that a survey will be started of the Sitkum Pass road and shortly 300 men will be employed. This is a new road that the government proposes to build from Vernon to Nakusp.

Payrolls Killed ByBulkApple Shipments

VERNON.—Movement of Wealthy apples in bulk rather than in boxes is depriving the city of Vernon of a payroll which is conservatively estimated to be $10,000. A visit to the packing houses shows thousands of dollars worth of machinery standing idle. The movement of the crop is a movement in one door, over the weigh scales, and into the box cars. Not only is there half the staff but the half that is working is getting odd half days instead of steady employment.

If this type of movement continues, two things are liable to happen. The Okanagan will lose its reputation as the premier apple producing district in the Dominion; and the labor which is employed in making boxes and in packing apples will be employed in the markets on the prairies and not in the packing houses of the Okanagan.

Supposing that this resulted in the growers receiving higher returns there would be some reason for gratification, but if it results in the growers getting less, and the loss of the payroll, will the Okanagan benefit? Will the properties improve in value? Will it be easy to sell lands at a good valuation? Will labor find profitable employment?

These are the questions which concern every resident of the valley. Vernon retail merchants do not appear to be interested. There were only three at the meeting called by the board of trade on Tuesday and at which questions which directly interest every one of them were discussed.

Members of the Shippers' Council have decided not to ship McIntosh Red apples in bulk. They control 90 cent of the crop.

Already bulk McIntosh have been shipped.

The suggestion is made that bulk shipments should be discouraged and that every one interested in the welfare of the valley assist the members of the Shippers' Council to hold fast to their determination.

If the McIntosh is a bulk deal, there will be very small payrolls in the packing houses.

KRESTOVA SCHOOL PARTLY DESTROYED BY FIRE WHILE THE TEACHER IS ASLEEP

NELSON.—Partial burning of the Doukhobor school at Krestova while the teacher, Mrs. Alicia Dalgas was asleep in it, two attemps to burn the sawmill of the Christian Community of Universal Brotherhood on Goose creek, in the same area of Slocan valley, that were frustrated by watchmen, and an attempt to burn the Kinnaird school, that failed only because the flames in the igniting box went out, marked the small hours of Friday, or in the case of the Kinnaird outrage possibly the preceding night.

The three new arson outrages in the river areas in which the Doukhobors are an element brought the number of such outrages for the week to five, two having occurred last Saturday midnight. The toll for the last three weesk is seven.

STORM CAUSES MUCH DAMAGE IN OKANAGAN

PENTICTON.—A storm of almost hurricane force swept down the Okanagan valley from the north at noon on Sunday, leaving destruction in its wake both on fruit ranches and in the town. The wind struck the lake front at Penticton with terrific force. It blew down trees, telephone poles and wires and did considerable damage tto the tourist camps, store awnings and light structures in town.

Fortunately the roof of the old storage plant. in which much valuable fruit is stored, was left intact. No damage was done to the interior of the packing house or to the packing equipment, and packing and shipping of fruit will not be interrupted. Within an hour of the demolit the roof packing house empolees were mobilized and the debris was cleared up.

Although the gale blew for less than half an hour, the loss of fruit will be quite heavy, more especially to the orchardists who had not commenced to pick McIntosh Reds, Delicious and Yellow Newtons fell heavily, strewing the ground with the larger and better apples from the tree tops.

The loss in this district alone will run into thousands of boxes.

Rossland's liquor store, located in the basement of the court house, was burglarized last week, but just what amount of liquor was stolen is not known.

New Denver has just opened a golf course. At present it has only five holes, but it is being enlarged to include nine.

SAGO TEHONIATARAKAKOWA!

"Greetings, Chief Swiftest Rider Of Mighty Waters"

Honours have been heaped upon Captain R. G. "Jock" Latta, commander of the trans-Atlantic record liner Empress of Britain since his new 42,500 vessel regained the Blue Ribbon of the Atlantic for the British Empire by all classes of people but none have been more sincerely offered than the recent tribute of the Six Nations Indians.

Encamped at Loretteville, Quebec, where they are establishing a village in which the ancient arts of the redman are practiced, members of the Six Nations under the leadership of 81 year old Chief Wolverine recently honoured the Canadian Pacific Commodore by adopting him into the tribes and conferring chieftainship upon him as a tribute to his feats of seamanship with the big white "war-canoe." Meeting the Empress of Britain in their gaily decorated birch-bark canoes a score of braves and Squaws, led by Wolverine, Running Bull, American Horse and Princess White Eagle, danced their ceremonial dance on the Games Deck of the mighty liner, stood in reverent silence while the old Chief invoked the great spirits and rent the air with their whoops as Princess White Eagle and Chief Wolverine crowned the new chief with a war bonnet of eagle's feathers.

Photos show (left) Chiefs and braves in their canoes cluster round the big ship as she arrives, (right) The final ceremony, and the deer skin certificate of adoption.

FRIDAY SEPTEMBER 25 1931

Some apprehension is beginning to develop in labor circles that when the camps, camp equipment, commissaries, well-paid foremen and clerical staffs have been paid, the common unemployed laborer will have to be content with the small end of the blank cheque.

VOCABULARY is a fairly reliable index to a person's mental ability, states Calvin T. Ryan in an article, "Speech Habit and Personality," in Hygeia magazine. A man's language is considered the shaper of his thoughts and no longer as a mere conveyance of thought, he declares. Precocious children who learn to talk before the normal age have been found to have abnormally large vocabularies and to be above the average in intelligence, Mr. Ryan writes. The children who begin to talk later than the normal period have been found to have small vocabularies for any certain age and to be below the average in intelligence. We are called a lip-lazy people. We are told that we do not love our language. Boys and girls graduate from high school, go into college and professional school without learning to speak grammatically. They have never been taught the seriousness of speech habits, and they do not realize that a listener is entitled to think that a slovenly speaker is a slovenly thinker. Thanks to our modern science, mental and physical, we are now able to recognize the cause and egect off speech abnormalities and to do something for them. Speech clinics are becoming almost as popular as baby clinics were 25 years ago and ways have been found to remedy stammering, stuttering and organic malformations of the organs of speech. Parents and relatives of young children who set a bad example by incorrect speech are deplored by Mr. Ryan. For the normal child, learning to talk is not only a great event but a great task. If he is normal and acquires habits that are abnomal, the result is nothing short of a disaster.

A DISTINCTLY better trend in earnings as second-quarter reports continue to appear is noted by Moody's Investors' service in an analysis based upon results annouced by 184 large industrial companies, which show aggregate profits for the June quarter 35.6 per cent higher than in the previous six months. The extra-seasonal character of this advance, the survey states, contrasts with a gain of only 5.1 per cent for the same corporations from the first to the second quarter of 1930. Including 171 railroads and 46 utilities which have reported on a five-month basis, total net of 629 companies for the first half of this year was 44.9 per cent. Further reduction in operating costs doubtless contributed in large measure to improved second-quarter industrial earnings, Moody believes. The picture is more shadowed when comparison is made with the same period in 1930, and a 38.2 per cent decrease is seen. Nevertheless the substantial average gain over the early months of the year indicates that business has been operating somewhat more profitably than many have realized. Industrial groups which made the best contrast with 1930 on a half-year basis included 12 automobile companies, with a drop of 19.9 per cent; drugs, with a decrease of only 5.1 per cent, and biscuits, where earnings were og 6 per cent. Poorest results were found in the case of automobile accessories (with a decrease of 68.4 per cent), cement (66.3 per cent), machinery (71.' per cent), steel and iron (88.2 per cent), petroleum (95.2 per cent), and copper (with a 1931 deficit for five companies).

HUNTING lions from airplanes is distinctly out, in all parts of Africa where the British writ rules. The open veldt of the great African game country ogers great possibilities for cross-country coursing in automobiles, and easy landing for airplanes. Hence sportsmen have been rather overshooting lions. This is regarded as bad for several reasons. It threatens the sport with extinction, but sportsmen are joined in their anxiety for zoologists, who do not wish to see another splendid wild animal added to the list of extinct species. Conservationists and animal ecologists also see in the lion a useful regulator for the numbers of antelope and other grazing animals, which without some natural check might increase too rapidly and overgraze the range. Only in thickly populated districts, where lions become troublesome stock killers and potential menaces to human life, is is exterminative hunting tolerated.

How to save men from being buried alive is being taught to a nnew kind of lifeguard in the coal mining district of Upper Silesia, on the German-Polish frontier. A mine, deserted many years ago, is being utilized for the experiments in life savings. Young mountaineers, whose occupations may take them into hazardous underground passageways, are being instructed in the working of the oxygen pulmotor, in the use of gas masks and the correct way to get a man out of the subterranean tomb in which he may be buried alive or imprisoned by a landslide or other accident.

The king among wild animals was the great cave bear, a creature twice the size of the grizzly bear of North America. Lions and tigers had little chance against this powerful enemy. In the prehistoric age of man it became abundant in the British iles, as proved by the extraordinary number of remains which have been found in caverns and caves. It did not extend further north than Yorkshire. Remains of a bear found in Ireland more resembles the grizzly of today, and bones of this mammal have been discovered in England.

Figures gathered by Alden B. Mills and given to the committee on the costs of medical care, which is making a five-year study of sickness and medical facilities, show that the average American man is disabled by illness at least once a year, the average woman once or twice a year, and the average American child at least twice during every school year. The common cold and allied ailments cause 40 per cent of the illnesses, though they are responsible for but 20 per cent of the deaths, according to Mills figures.

Diving through a rear screen door, a small deer entered the home of Prof. John J. Martin, of Bangor (Maine) Theological seminary. The deer raided two or three of the downstairs rooms, including Doctor Martin's study, and a member of the family was compelled to seize it by one of its legs and drag it to the outdoors before it would depart.

The United States air service has a plane constructed especially for an air ambulance. It is a Fokker ship, painted white hith a red cross on the side. Twelve patients, a doctor and attendant can be carried in the cabin.

A dancing pavilion at Elsinore, California, is contructed on the lines of a boat and when the party is assembled the moves out to sea on a track which has been laid under the water, but the "boat" never leaves the rails. The dancers get the romance of the sea and the moon and all that as well as the refreshing breeze from the water. The experience answers all the purposes of a moonlight excursion.

All France is again laughing at the ridiculous workings of a French courtmartian. Napoleon Klein, who was born in 1908 near Belfort, was called to the colors in 1928. He failed to cmake his appearance. In 1929, having been declared an absentee, he was sentenced by a military court to a year's imprisonment. It has since been discovered that Napoleon Klein died in 2909 at the age of four months.

Three legs in one gives a calf owned by a prominent dairy farmer near Stigler, Oklahoma the distinction of having seven legs. From the right shoulder of the calf there grows a large leg about the size of a cow's leg. At the end of the leg are three separate and distinct feet with divided hoofs, bones and joints.

Cancer victims have blood more alkaline than normal, and the increased alkalinity seems to be related to the speed with which the disease ends fatally.

Many Mysteries of Ocean Unsolved

DISCOVERY of an outwad spinning whirlpool in the Atlantic ocean is reported by a vessel of the coast and geodetic survey. While charting the Georges banks, 150 miles east of Cape Cod, the survey vessel Hydrographer encountered the strange whirlpool, which was strong enough to throw the vessel og its course. The cause of the phenomenon is unknown, but further investigation will be made. It differs from other whirlpools known to navigators in that it spins outward instead of toward its center.

"An outward spinning whirlpool is another oddity added to the long list of unexplained mysteries of the sea," says a bulletin of the National Geographic society. "It is half in jest and half in awe that old tars refer to the bounding main as 'that old devil sea.' In olden days the sea was believed to be peopled with strange monsters which devoured both ships and men. Even today, with all the safeguards and comforts of modern travel, a voyage is not without its hazzrds. Mother ocean constantly plays new unexpected tricks because man's knowledge of the sea, for all his centuries of study and experience, is extremely meager.

"Explorers and geographers who have been sighing for new lands to conquer may find their best field, paradoxically, in the sea. When it is realized that nearly three-quarters of the surface of the globe consists of water, it is rather remarkable how little we know of the vast surface of the solid sphere which lies under this screen of liquid.

"Little wonder, then, that man marvels at how much has been learned about the sea, the while he realizes that what he knows is much less than the proverbial drop in the bucket as compared with what remains a mystery.

"The most impressive thing about the sea is its shallowness as compared with the size of the earth, and its depth as compared with the height of the land. If one were to take a globe six feet in diameter and excavate the deepest trench of the ocean thereon, it would be a bare pin-scratch deep—about one-twentieth of an inch.

"Among the sea's unexplained mysteries are the origin and actions of storm waves, commonest of nautical phenomena. Often storm waves travel much faster than the storm itself, meaning that the storm as a while, and sometimes they break with greatfor ce on a short-line where conditions otherwise are very quiet and serene.

"There is a curious superstition, varying in various parts of the world, that every seventh or every ninth, or every tenth wave is larger than the ones that precedes it. Writers often take advantage of this belief, not supported by scientists, to illustrate definite periods or sequences in ideas or lives.

"Much is still to be learned about the vagaries of ocean currents. Vessels and debris caught in these natural sea lanes often play uncanny tricks."

ANCIENT HISTORY

LIFE IN GRAND FORKS TWENTY YEARS AGO

J. D. Honsberber will commence to pick and ship his prune crop next Monday, and he expects to finish the work in about a week. He estimates the crop this year at five carloads of between 800 and 900 crates to the car. This 8-acre orchard is paying a net profit of about $350 per acre yearly.

The first carload of apples shipped from the vallep this season was sena out from the packing house at Carson last Saturday. It was billed for Edmonton, Alta.

There were 12,600 bushels of grain threshed in the Grand Forks district this season. Among those threshing large amounts were: John T. Lawrence, 2830 bushels; Gus Schnitter, 2010; The Big Y Orchard Co., 1400; Mr. McAdam, 834, and Geo. Lemaster, 780.

The activity in the building line in this city, together with the demand for labor in the orchards in the valley, has had the effect of making the closing down of the smelter scarcely noticeable from a business standpoint.

From returns received from the various provinces up to the time of going to press, the political complexion of the next house will be: Liberals, 80; Conservatives, 132; Independents, 2. There is not much satisfaction in making explanations. During the first moments of our rage on Thursday, as the returns indicated in which way the wind was blowing, we made up our mind to say that the Conservatives had won a victory by blinding the people with "drunken phophesies, libels and dreams." Since our anger has now been somewhat assuaged, we amend this hasty judgment by throwing the entire blame for the lamentable result on Champ Clark. The reciprocity agreement was proposed by the Americans, and it was defeated by them.

POEMS FROM THE NEAR EAST

CHINA

MORAL LESSONS FROM NATURAL FACTS

All true words fly, as from yon reedy marsh
The crane rings o'er the wild its screaming harsh.
Vaily you try reason in chains to keep;
Freely it moves as fish sweeps through the deep.
Hate follows love, as 'neath those sandal-trees
The withered leaves the eager searcher sees.
The hurtful ne'er without some good was born:—
The stones that mar the hill will grind the corn.

All true words spread, as from the marsh's eye
The crane's sonorous note ascends the sky.
Goodness throughout the widest sphere abides,
As fish round ilse and through the ocean glides.
And lesser good near greater you shall see,
As grow the paper shrub 'neath sandal-tree.
And good emerges from what man condemns;—
Those stones that mar the hill will polish gems.

—From the Shi-King.

Health Service

GUARD YOUR CHILD

It is possible to eradicate diphtheria from Canada. No longer need this disease be feared. No longer need children suffer and die as a result of diphtheria. The menace can be withdrawn and children can be protected from this severe and frequently fatal disease.

The germ which causes diphtheria is found in the throat and nose of those who ar developing the disease or who actually have diphtheria. It persists for varying periods of time, during and after convalescence. Not a few apparently well persons are diphtheria carriers, that is, they harbor the germ although they are well.

Such being the case, it is obvious that, in our daily lives, we are almost sure to come in contact with such individuals and so be exposed to the diphtheria germs which they throw out in their coughs ands neezes or in talking. The germs pass out in the secretions of the mouth and nose, and may be transferred in the ways mentioned or in any other way, such as by means of the common drinking cup which allows for the secretions of one person to reach others.

The only practical hope of controlling diphtheria is to render each individual invulnerable to the germs to whose attacks each one is exposed from time to time. Fortunately it is in our power to render ourselves resistant to such attacks. We can be armed with the forces which overcome the poisons given off by the diphtheria germ and which render the diphtheria germs powerless to do harm.

We know, as the result of common experience, that the person who has recovered from an attack of diptheria retains, as a result, some power, which he did not possess before, to resist subsequent attacks of the diphtheria germs. We say of such an individual that, as a result of the attack of the disease, he has become immune to diphtheria.

It is possible to ge
ty without being exposed to the suffering and danger which accompany the disease. By the injection of diphtheria toxoid, which is a perfectly harmless substance, the body of the person injected develops the same protective forces as are produced during an actual attack of the disease, and so this person is rendered immune to diphtheria.

It is because this is so that our statement that diphtheria can be eradicated from Canada is not merely a hope or a dream, but is a practical possibility which is within our reach. We can make diphtheria disappear, but it will not do so until each and every parent realizes the responsibility to guard each and every child against diphtheria. When this is done, diphtheria will become a rare disease and the lives of children will be saved.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answerel personally by letter.

FACTS THAT YOU MAY NOT KNOW

Fresh Lemons

Lemons will keep fresh if they are placed in an air-tight jar filled with water. This will keep them fresh for a long time.

Silverware

Scouring silverware scratches it. To clean it without scratching use an old aluminmum pan. Put water, common sault, and baking soda in the pan. Use one teaspoon each of salt and baking soda for each quart of water. Place the pan over a flame and heat until the tarnish disappears from the silver. Then wash in hot, soapy water.

Colds

Snuffing powdered borax up the nose will often dry out a cold in the head within a verp short time.

Linen

Tablecloths of linen are much more beautiful than cotton. Linen laundries well and is easier to iron than cotton, because the heat of the iron dries it readily. It leaves no lint on garments. This makes linen especially desirable for table napkins.

A Cherry Stain

To make a cherry stain, mix one quart of baoled linseed oil, 3 gills of turpentine, six tablespoonfuls of burnt sienna, anr 4 tablespoonfuls of whiting.

Sandwiches

When slicing bread for sandwiches, cut the slices about ¼-inch in thickness. As the bread is cut, arrange the slices in pairs so that one slice of a sandwich will exactly fit the other slice.

Faded Colors

When sweeping rugs, add a teacupful of gasoline to a bucket of water and wet the broom in it. It restores the faded colors.

Bacon

The fat of bacon should be drained frequently so that the bottom of the pan is only well greased. Remove from the pan when the bacon is light golden brown and evenly crisped.

SUNSHINE

Two Lives Saved; Two Tempers Lost

A stout, determined-looking man reached the station just as the train was pulling out. He ran down the platform, seized the handrail of a coach and was about to hop aboard when some one clutched him by the coat tails. It was a brakeman, very angry and blustering.

"There, I've saved your life," the brakeman said. "Don't ever try to hop a train when she's in motion."

Then as the train continued to gather speed the brakeman skillfully swung himself on the steps of the last coach; but the stout man caught his coat and plucked him off like a ripe peach.

"You saved my life," said the stout man, grinning. "Allow me to save yours."

And the train disappeared round the curve.

* * *

Safety First for Bobby

In spite of repeated warnings little Bobby persisted in driving nails into blocks and boards. He had arrived at the play-at-carpenter stage. One morning his father heard the familiar pounding and, looking out, saw Bobby busily banging away; his little sister Mary was down beside him, apparently llooking on.

"Haven't I told you, Bobby, that you will your fingers if you drive nails?" his father asked.

"Yes, I know you did, father, but you see Mary's holding the nail," replied the boy.

* * *

His Punishment

An old farmer who had been to market and had got good prices for his cattle bought several yards of cloth, intending to have his wife make him a suit of clothes. Unfortunately, he lost his purchase on the way home. His wife, much annoyed at his expensive carelessness, told the story to the vicar.

A week or so later the vicar met the good man and hailed him: "By the way, Mr. Green, have you heard anything about your cloth?"

"Morning, noon and night I hear about it,' the farmer replied disconsolately.

* * *

An Orange in Law

A lawyer thus illustrates the language of this craft: If a man were to give another an aronge he would simply say, "Have an orange." But when the transaction is entrusted to a lawyer to be put into writing the lawyer adopts this form:

"I hereby give and convey to you, all and singular, my estate and interests, right, title, claim and advantages of and in said orange together with all its rind, juice, pulp and pips and all rights and advantages therein with full powers to bite, cut, suck and other wise eat the same or give the same away with or without the rind, skin, juice, pulp or pips, anything hereinbefore or hereinafter or in any other deed or deeds, instrument or instruments of whatever nature or kind whatsoever to the contrary in any wise notwithstanding."

And then the chances are that another lawyer will come along and take the orange away from you.

* * *

Getting His Wood Cheap

Is there a parable concealed in this apparently humorous story in the Argonaut? Some social philosophers would say so.

A traveler on the desert came upon a lone stock raiser on the lower Colorado river. The chief object of interest on the barren ranch was a giant heap of firewood, and curiosity caused the visitor to ask the stockman how in the world he happened to possess it.

"Wal," the man drawled, "last year this here brush came piling down the river at flood time, and so I jest rounded up a bunch of Indians and told them they could have half of all they drug ashore. Golly, them Indians worked."

* * *

The Superman

Private Banks had been the most bashful and retiring little man in the army. When women visited the camp he had always fled to shelter and stayed out of sight until after they had gone. So it came as a surprise when one of his former companions ran across him in civilian clothes and accompanied by a large, robust girl, whomhe introduced as Mrs. Banks.

When he was able to get Banksaside he asked him how he had met his wife

"Well," replied the little man meekly, "it was this way; I never did exactly meet her. She just kind of overtook me."

* * *

A Perfect Txcuse

Nurse was bringing little Betty home from a party and took her hand to help her up a high curbstone.

"Good gracious, Betty," she cried, "how sticky your hands are!"

"So would yours be," replied Betty serenely, "if you had two meringues and a chocolate eclair in your muff."

* * *

The Little Cat.

There was once a yyunge man who quarreled with his fiancee and married another girl. His former lady love had a sense of humor and, deciding to "get even" with him, sent the bride a charming book to read on the honeymoon. It was Stevenson's Travels with a Donkey.

What the Rural Weekly Press of B. C. Can Offer

THERE are fifty-five regular weekly newspapers in British Columbia. They are published in a widely scattered field in communities with populations of from 300 to 400 to one of 10,000. Sixteen are published in communities of less than 1000 population; fifteen in communities of 1000 to 2000 population; seven in communities of 4000 to 5000; four in communities over 5000 to 10,000. These weeklies appeal to 145,000 of British Columbia's population. The news in these newspapers is mostly all local, because that is what interests the readers, and the advertisements for the most part tell what local merchants are doing. The country editor knows the people he serves; they are farmers, lumbermen, miners, fishermen, prospectors, laborers, all. It is estimated that the average farm family spends $2000 every year for things which are not necessary to raise crops. The total sum that is spent by farmers in the United States for those things with which to live well is the appaling sum of thirteen billion dollars. Seventy-two per cent. of all automobiles sold go to people living in towns and comunities of less than 5000 population. Using the same proportionate figures to estimate the buying power of the rural population of British Columbia served by the weekly newspapers of the province, and we have something like 70,000 automobiles purchased by residents of the province in towns and communities of less than 5000 population, and $6,000,000 spent every year by these rural families for things which are not necessary to raise crops. If one is inclined to think that only a few people, and an insignificant few at that, live in country communities served by the weekly newspapers let him study these figures or consult the last census statistics.

If Benjamin Franklin Could Revisit the Earth

WHAT are your sensations when you behold the spectacle of a lighted metropolis at night? Do you wonder at the towering white skyscrapers thrust upward like the arms of giants breaking through the crust of the earth? Do you marvel at the electric signs binging their messages through space overhead, and motor cars sweeping the broad boulevards below? Do you consider the miracles of achievement that appear on every hand, or have you come to take it all for granted, since to see a thing too often is not to see it at all?

An easy way to revive your sense of wonder at the age in which you live is to imagine what it would be like to bring back a man like good, old Ben Franklin and show him the sights! Think of what fun it would be to take him on a personally conducted tour of a city at night, ablaze with what would appear to him as a species of lightning! It was he who first suspected that lightning, which had been a great mystery, was nothing more or less than electricity,and that was why he flew his famous kite with a brass key tied to its string It would be exciting to lead him to a telephone, to show him the radio, or even so simple a thing as an electric bell! What would he think of the huge power houses with dynamos running at night and by day to manufacture electricity in any quantity desired? And how great his interest would be in an internal combustion engine as manifested in the automobile which we now accept with the greatest complacency.

A more primitive man than Franklin would only be tiresome to bring back, for he would probably attribute these marvels to an enormous manifestation of supernatural power, and you could hardly talk him out of it. A year or so ago some explorers hew up to the headwaters of the Amazon river, where lived a primitive type of Indians who had never seen white men before. These savages were not o bit surprised to meet men who were white or men who could fly. They were not overcome with curiosity at firearms or even matches, which, after all, are an ingenious method of producing fire. Because thei rignorance was so great and their intelligence so low, they could explain away mechanics and chemistry with astonishing ease. The men were gods! And gods could do anything! But a man like Franklin would not wipe the enormous strides of sciece off the slate by attributing them to an inscrutable power. He lived in an age that was just on the verge of scientific discovery,and was himself an inventor of no mean order

To the primitive mind the easiest and most satisfying explanation of natural phenomena has always been based on superstition. It was not until 1840 that a geologist at Yale dared to tell the true story that the rocks told him because of the popular belief that all rocks had been formed by the flood in Noah's time. The populace tried to burn Galileo at the stake for saying that the earth travelled around the sun, because this theory conbicted with the dogma of the day. When the flames began to lick his legs he recanted and was released. Here is a gentleman who would enjoy a trip back as much as Franklin. He really deserves to see his theory accepted. It would be be a pleasure to let him look through one of the great telescopes of the day. It is such a contrast to the poor little instrument through which he pecked at the stars.

Certainly it would merely be dull to recall the ordinary man from the past, for without doubt he would react like an Amazonian savage, glibly passing over the noble work of man to lay the credit for progress at the feet of magic. Better pick on a mind like that of James Watt, who was the first to think of the power of steam while watching the lid rise and fall on the tea kettle, thereby showing that there was enough power in the kettle to raise the lid. Wouldn't it be thrilling to show him a locomotive or a monster steamship like the Leviathan? What would Sir Isaac Newton think of his law of gravitation if he saw an airplane, carrying men, sailing overhead? Certainly he would be too intelligent to think for a moment that the law of gravitation had been violated. He would feel only a vast curiosity as to what was keeping the plane in the air, and it would be easy to teach him the theory of aeronautics. Such men would sharpen our appreciation of things which we now take for granted, and not bore us with savage cries about spooks.

Needles

When fastening a paper pattern on fine satin or silk, use thin needles instead of pins. Bp doing this one will avoid large holes in the material.

Greased Muffin Tins

Use greaser muffin tins for baking apples. They will also be found convenient for stuffed tomatoes, stuffed peppers, and individual meat pies. Other combinations can be baked and coofked and held in their shape better in this way.

Do not keep flour near vegetables or meat, as it absolves the odors.

The war and marine department of Mexico has announced that only men who can read and write will be admitted to the army and navy, and soldiers and sailors who refuse to go to school will be discharged.

GENERAL NEWS

Canada's total wool clip is about 21,000,000 pounds annually, while Canadian mills use at least twice as much as this every year, and Canadian consumption of manufactured woollens equals about four times the clip.

Lake Louise Icelandic poppies, one of the glories of this part of the Canadian Rockies, are in demand in thousands of gardens all over the world. Gardeners at the Chateau are now busy gathering seeds which will later be mailed to guests of the hotel this season.

Representing an increase of 31,000,000 bushels over the same period last year, 199,989,000 bushels of grain were marketed on Canadian Pacific Railway western lines during the twelve-month period since August 1, 1930. This gives the railway company a percentage of 52.3 of all the grain handled in that period.

More than 479,000,000 fish eggs, fry, fingerlings, and yearling fish and a few older fish were distributed last year from the hatchery establishments operated by the Fish Culture Division of the Canadian Department of Fisheries. Largest distribution was from the hatcheries in the Prairie Provinces.

Nipigon River Bungalow Camp Trophy competition is getting some fine entries this season. Recently a trout of seven pounds and one ounce was put in, and shortly afterwards, a six pounds, fifteen-ounce trout was taken. Catches of three to five-pound fish are frequent and one of the best seasons in years is reported from the camp.

J. O. Turcotte, Canadian Exhibition Commissioner, who visited Regina recently in connection with interior decoration in the magnificent new building which will house the World's Grain Exhibition and Conference, states that a start on this work will be made immediately. Decoration will be in grain seeds, no paint of any kind being used.

The Dutch wheat mixing law, effective July 4, enforcing a maximum of 25 per cent. of soft domestic wheat in the making of bread in Holland, may lead to an increase of this percentage which should have the effect of creating a great demand for Canadian hard wheat, says J. C. Macgillivray, Canadian Trade Commissioner at Rotterdam.

"Development of Canada's ocean ports is not merely a Dominion problem but is a matter of interest and concern to the British Empire and the world as well," is the conviction expressed by Sir Alexander Gibb, G.B.E., world famous engineer and authority on port development and operation, who has been called in to superintend the rebuilding of the Saint John port facilities, recently destroyed by fire.

Stay of the King and Queen of Siam at the Banff Springs Hotel during the latter half of August marked the peak of the season at that famous Canadian Rockies resort. His Majesty, under the incognito of Prince Sukhodaya, opened the Highland Festival August 27, and the royal party made a thorough inspection of the mountains in motor excursions, had a couple of fishing trips, saw a rodeo at Kananaskis ranch, and were guests of honor at a Pow-Wow of the Stoney Indians. 767

Open Seasons For Game; Bag Limits

According to annual custom, the following summary of the Provincial Game Regulations is published for the information of sportsmen. The dates given of open seasons are inclusive.

The "Eastern District" includes all of the Province east of the Cascade Mountains and south of the Electoral District of Atlin.

The protection of female deer, which were open for 15 days in 1929, is continued as in 1930, and they may not be killed at any time.

BIG GAME

Moose

Moose, of the male sex, in the Electoral Districts of Atlin, Fort George, Cariboo, Omineca, and that portion of the Kamloops Electoral District situate and lying north of the 51st parallel of latitude, September 1 to December 15.

In the Electoral Districts of Fernie and Columbia, except that portion of the Columbia Electoral District situate and lying south of Bugaboo Creek and west of the Columbia River, September 15 to October 31.

Bag limit: one.

Caribou

Caribou, of the male sex, in the Eastern District, except the Electoral Districts of Mackenzie and Skeena and that portion of the Electoral District of Cariboo situate and lying to the west of the Fraser River, and that further portion of the Eastern District situate and lying to the south of the main line of the Canadian Pacific Railway, September 1 to December 15.

Bag limit: north of the G. T. P., two; south of the G. T. P., one.

Wapiti (Elk)

Wapiti (elk), of the male sex, in the Electoral Districts of Fernie and Columbia, except that portion of the Columbia Electoral District situate and lying to the west of the Columbia River, September 15 to October 15.

Bag limit: one.

Mountain Sheep

Mountain sheep, of the male sex, in the Eastern District, in that portion thereof situate and lying to the north of the main line of the Canadian National Railway, formerlp known as the Grand Trunk Railway, and in those portions of the Electoral Districts of Cariboo and Lillooet situate and lying to the south of the main Chilcotin River and west of the Fraser River, and in the Electoral Districts of Fernie, Cranbrook and Columbia, September 1 to November 15.

Bag limits: north of the G. T. P., two; elsewhere, one.

Mountain Goat

Mountain goat, in the Eastern District, except the Electoral Districts of North and South Okanagan and Grand Forks-Greenwood, September 1 to December 15.

Bag limit: two.

Bear

Bear, except White or Kermodei bear, in the Eastern District, September 1 to June 30, 1932.

Provided, that no bear shall be trapped in the Eastern District.

Bag limit: grizzly, two; other species, three.

Deer

Deer, Mule, White-tail and Coast, bucks only, throughout the Eastern District, except that White-tail deer may not be killed in North Okanagan, South Okanagan and Similkameen Electoral Districts and in the Grand Forks-Greenwood Electoral District west of the summit of the Midwap Mountains, September 12 to December 15.

FUR-BEARING ANIMALS

Beaver and Muskrats

Beaver and muskrats, in the Eastern District, in that portion of the district described as follows: That portion of the Eastern District situate and lying south and east of a line commencing at Birken, on the Pacific Great Eastern Railway; thence following said railway to the Lillooet railway station; thence due east to the Canadian National Railway at Ashcroft; thence following said railway in a northerlp and easterly direction to the British Columbia-Alberta boundary line; March 1, 1932, to April 15, 1932.

In the remainder of the Eastern District, March 1, 1932, to May 15, 1932.

Otter

Otter, except sea otter, in that portion of the Eastern District described as follows: That portion of the Eastern District situate and lying south and east of a line commencing at Birken, on the Pacific Great Eastern Railway; thence following said railway to the Lillooet railwap station thence due east to the Canadian National Railway at Ashcroft; thence following said railway in a northerly and easterly direction to the British-Columbia-Alberta boundary line; December 1, 1931, to April 15, 1932.

In the remainder of the Eastern District, December 1, 1931, to May 15, 1932.

Other

All other fur-bearing animals, in the Eastern District, November 1, 1931, to February 28, 1932.

GAME BIRDS

Ducks an Geese

Ducks (except Wood and Eider ducks), Wilson Snipe, Coots, Geese and Brant, throughout the Eastern District, except the Electoral Districts of Creston, Skeena, Atlin, Omineca and Fort George, September 15 to December 31.

In Atlin, Omineca, Fort eorge and that portion of the Electoral District of Skeena situate and lying within the Eastern District, September 1 to December 15.

In Creston Electoral District, September 15 to November 30.

Bag limit: ducks, daily 20, total 150; geese and brant, daily 10, total 50; snipe and coots, daily 25, total 150.

Grouse

Blue grouse onlp, in the Eastern District, in that portion thereof known as Grand Forks-Greenwood Electoral District and that portion of the Similkameen Electoral District situate and lying to the east of Allison Creek, the South Similkameen River and the Pasayten River, September 12 to October 15.

Grouse, Blue, Ruffed (commonly called Willow), Franklins and Ptarmigan, in the Cariboo, Fort George, Omineca, Skeena and Atlin Electoral Districts, September 12 to October 15.

In the remainder of the Eastern District, xcept the Electoral Districts of North and South Okanagan, Grand Forks-Greenwood and Similkameen, Ruffed grouse, September 12 to September 30; Blue and Franklins grouse, except the Grand Forks-Greenwood Electoral District and that portion of the Similkameen Electoral District situate and lying to the east of Allison Creek, the South Similkameen River and Pasayten River, September 12 to October 15.

Prairie Chicken, or Sharp-tailed Grouse, in the Eastern District, in that portion thereof known as the Electoral District of Fort George, situate and lping to the north and east of the Rocky Mountains, and in the Electoral District of Cariboo, September 1 to October 15. In the Electoral District of Lillooet, October 15 to October 31.

Bag limit: Grouse and Ptarmigan, except Prairie Chicken, or Sharp-tailed Grouse, daily, six of one species or 12 of all species; total, 50 in the aggregate. Prairie Chicken, or Sharp-tailed Grouse, in the Electoral District of Fort George, daily six, total 50; in the Electoral Districts of Cariboo and Lillooet, daily three, total 12.

Recalling Solomon And Sheba's Queen

If the queen of Sheba could behold the million-dollar crowns of which

If the queen of Sheba could behold the million-dollar crowns of gold which were placed October 21, upon the heads of her reputed decendants in Abyssinia, and witness the ceremonious splendor of the homage paid to her country that has now been admitted to a seat among independent nations, she might be expected to exclaim, as she did in the presence of Solomon's glory, that the half had not been told her. But when it is remembered that one of her gifts to Solomon amounted to approximately $4,000,000, in addition to spices of great abundance and precious stones, the crowns of gold and the Kaiser Wilhelm coach and the gifts which the duke of Gloucester bore from the only other emperor in the West would seem meager to her, however lavish in the eyes of a modern democracy.

Though Christianity was not adopted before the Fourth century, the first dweller in the part of the world to be baptized as a Christian was the treasurer of Queen Candace, whom Philip saw sitting and reading in his chariot on the road to Gaza. So the emperor who kept vigil in meditation and prayer at St. George's cathedral at Addis Ababa should have recalled in his litany of thanksgiving not only the queen of Sheba but also the nameless man who "had great authority' under Queen Candace, who went to Jerusalem "for to worship', and who on his way back to Ethiopia went down into the water with Philip and was baptized.— New York Times.

BUILDING UP FLOCKS WITH R.O.P. PULLETS

Reports received by the poultry division of the Dominion department department of agriculture at Ottawa indicate that poultry breeders entered in the federal policy of Record of Performance have available a good supply of ten to twevle week old R.O.P. pullets.

Pullets of this type produced for sale as R.O.P. approved chicks offer the farmer who wants to expand his operations to include poultry breeding in a practical way, a special opportunity for getting right into this kind of work. The progeny of approved flock matings under the broad general scheme of flock improvement developed by the federal department, these pullets are eligible for entry in either registration or R.O.P.

Some of the reasons why more farmers are finding it worth while to take up poultry breeding work are: Sales of eggs to supply approved hatcheries; the hatching and sale of R.O.P. approved chicks; the production of approved cockerels; and last, but not least, improvement of the production ability of their own laying flock.

In the Breast Pocket

The home missionary's wife looked out at the swirling snow sighed. There couldn't be much for Christmas this year. She sighed again. She hadn't had a real Christmas dinner since she had come west, and that was eight years ago.

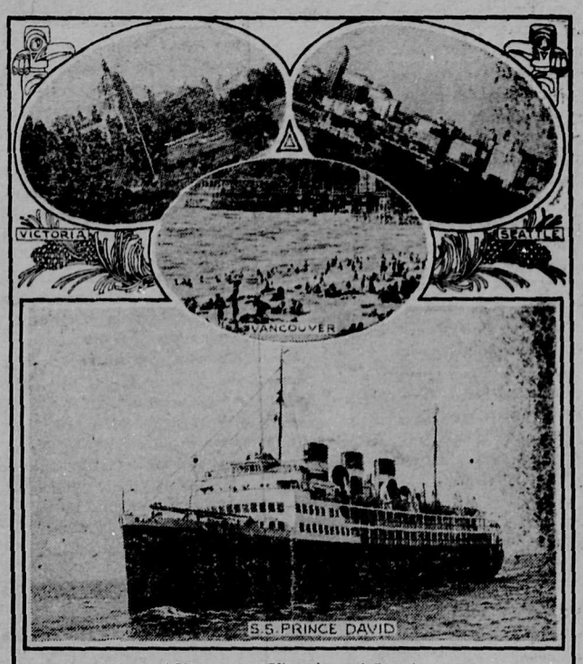
"Tired, mother," inquired a sweet little voice, and, turning, the missionary's wife looked into the sober eyes of little Betty.

Perspiring Hands

If the hands perspire, rub them several times a day with a solution of 125 parts of rosewater, 10 parts of borax and 8 parts of glycerine.

Turnips

The flavor will be improved and the odor lessened if a teaspoonful of white sugar is added to the water when boiling turnips.



THE Ports of Vancouver, Victoria and Seattle are again being served by the Canadian National Steamships. This service was resumed by S.S. "Prince David," one of the beautiful new steamships constructed during the last winter for the company at Birkenhead, England. Under the new schedule S.S. "Prince David" leaves Vancouver every afternoon at 2 o'clock, reaching Victoria at 5.45 p.m. and Seattle at 10.30 p.m. Returning the ship leaves Seattle at 1 a.m., reaching Victoria at 7 a.m. and Vancouver at 12.15 noon. Excellent accommodation is provided for 334 first-class, 70 third-class and 1,500 day passengers. There is plenty of room for motor cars. The new ship has beautifully appointed public rooms, radio, beauty parlor, barber shop and an automatic telephone service throughout the ship. Next Spring this service will be augmented by S.S. "Prince Robert."

Power of The Rural Weekly Press

Listen to what John H. Perry, President of the American Press Association, has to say on the influence of the country weekly:

"The force that controls this country of ours, in the long run, is the rural editor, in his capacity as spokesman for hundreds of thousands who live and earn their living on the farms and in the villages and towns.

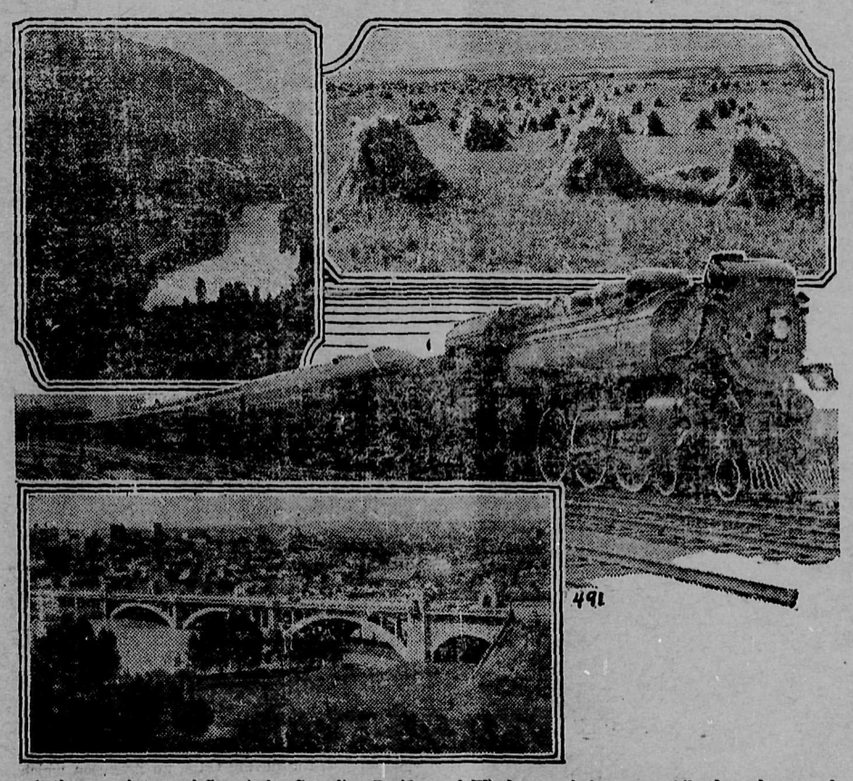
"It is not necessary to take the writer's word for it Ask any politician whom you know. He will tell you the truth. Ask any representative of the interests—big city bankers, for instance, or presidents of great railroad or industrial corporation.

"The politician, if he is above peanut size, will tell you that he worries little about what the city papers say; but let even half a dozen country weeklies in his home state or district open on him, and he pulls down the lid of his desk at the state capital and takes the next train home to see what it is he has done to make the farmer sore.

"The Big Businessman, if he is big enough to be entitled to the designation, will tell you that his business is gold or bad depending on how the country people like the way it is run, and that what those country people are thinking he finds out by reading or having others read for him, what the country papers are saying."

The Home-Town Newspaper is always ready to Cooperate in Giving Service

Across Canada and Back



A three week tour of Canada by Canadian Pacific train de luxe from Montreal and Toronto to Victoria and return by two routes touching at the major cities and beauty spots of the centre and west of Canada is again being brought to the attention of Canadians and others by an announcement recently issued by Dean Sinclair Laird of MacDonald College, who for the last six years has personally conducted these tours. The outward run takes in the northern shore of Lakes Huron and Superior to Port Arthur and passes thence through Winnipeg, Regina, Moose Jaw, Calgary, Banff, Windermere, Nelson, Penticton, Vancouver and Victoria. A hundred miles of this trip between Banff and Windermere is by automobile through some of the most magnificent scenery in the world. Return trip is also by Canadian Pacific Railway and takes in the famous mountain railway journey to Field, Lake Louise and Banff, thence north to Edmonton and by Saskatoon to Winnipeg and Fort William. From the latter city by Great Lakes steamship to Port McNicoll which practically ends the transcontinental journey.

Variety of scene and of means of transportation is thus assured. Numerous stops are made for sightseeing in the many noted beauty spots, national parks, experimental farms, forestry stations, larger centres of population and provincial capitals.

Long Distance Lends Enchantment

There is an indescribable thrill to the sound of a voice coming over the telephone from miles away. People give you their undivided attention on any subject—business or personal.

If there is someone, somewhere, you would like to talk to, ask the Long-Distance Rate Clerk how little it would cost. Enquiries do not obligate you to place a call.

B. C. TELEPHONE CO

THE CITY

The marriage of Jessie Corinne Downey of this city to William Lynes of Trail was solemnized at the home of the bride's father in this city on Tuesday morning, Rev. Mr. Archibald of United church performing the ceremony. Only a few of the relatives of the bride's family witnessed the ceremony. The bride is a popular young lady who was raised in this city, and the groom is a son of Mrs. H. N. Stewart and the late H. H. Lynes of Winnipeg. The young couple will make their home in Trail.

Complimenting Mrs. William Lynes, nee Jessie Downey, whose marriage took place in this city on Tuesday, Mrs. W. D. Smith was hostess at a shower on Monday afternoon. The invited guests were Mrs. McEwen, Mrs. F. Newbauer, Mrs. J. Kenyon, Mrs. George McCabe, Mrs. Don Manly, Mrs. G. Massie, Mrs. C. Hansen, Mrs. R. J. Gardner, Mrs. H. Matthews, Mrs. Glen Manly, Mrs. J. Murray, Miss Hattie Gaw, Miss June Downey, Mrs. W. Hadden and Mrs. J. Willis.

Mayor E. C. Henniger was called to Victoria on Thursday morning by the government, presumably on business in connection with the unemployment problem.

Mrs. A. B. Winter met with a painful accident on Tuesday when both her hands were caught in an electric washer. No bones were broken, but the right hand swelled to enormous size.

Three large eagles flew over the city this afternoon—very high. The eagle eyes of the citizens were unable to distinguish them from airplanes for a long time.

The fine residential property of Thomas K. Needham, on Winnipeg avenue, has been purchased by Mrs. C. I. Donovan. The sale was arranged by S. T. Hull.

H. B. Thomson, chairman of the provincial liquor control board, Victoria, was a guest at the Alpine Inn at Christina Lake for several days this week.

Seventy-two registrations have been made with the city clerk of Grand Forks under the unemployment legislation.

J. D. Galloway, of the provincial mines department, Victoria, spent several days in the city this week.

Mrs. James Allen and son visited friends in Trail during the first part of thew.

Mrs. Kenneth Woods visited her mother, Mrs. H. Pennoyer, in Trail during the week-end.

Dr. and Mrs. W. Truax and daughter Winnifred left on Monday for a trip to Montreal.

Dr. C. M. Kingston, M.L.A., left on Thursday for a trip to the coast.

Mrs. W. Euerby visited in Trail on Tuesday. f

FORMER GRAND FORKS RESIDENT DIES AT COAST

After a prolonged illness, Mrs. Emily E. Tanner, aged 61 years, wife of Rev. Gordon Tanner, formerly pastor of the Methodist church in this city, died at her home in Vancouver last Thursday morning.

Mrs. Tanner is survived by her husband, a son, Dallas O., and four brothers, Edgar H. and Charles E. Sands of New Westminster, Holton E. Sands of Vancouver and Harold P. Sands of Los Angeles.

Mrs. Tanner came with her mother the late Mrs. M. K. Sands and her brothers to British Columbia in 1896 from London, England. Prior to her marriage she conducted a private school in the west end of Vancouver which later she merged with the Queen's school.

She shared with keen delight the work of her husband in charges at Ladysmith, Hammond, Okanagan, Rossland, Trail, Grand Forks, Mission City and Beaconsfield where in 1922 her health broke.

The funeral was held in Vancouver on Monday afternoon. Conducted by Vancouver Presbyterian of the United Curch of Canada, Rev. R. Harbison officiated as chairman and was assisted at the service in Beaconsfield church and at the graveside in Ocean View cemetery by Rev. J. H. Wright, Rev. C.C. Owen, Rev. F. E. Reynolds, Dr. A. M. Sanford,, Rev. H. M. Rae and Rev. G. O. Fallis.

The palibearers were Rev. A. W. McIntotosh, Rev. J. D. Hobden, H. A. Stein, John Hickey, W. Harrowell and William Hembrog.

MINES ARE OPERATING AT PRINCETON; IMPROVED DEMANR FOR COAL

PRINCETON, Sept. 24.—Operations were resumed this month in the Blue Flame colliery, Lamont creek, where R. Alstead is manager. A dozen men are at work, and there appears to be a sufficient demand in sight to keep o force steadily employed.

Preparations are being made oor an increased volume of business, and it is hoped that the force may be increased to 50 men at the peak of the season.

Considerable improvements have been made to the bunkers, and a re-screening process installed.

Operations are under way at the Tulameen coal mine, where new orders recently gained are already beginning to spell increased production More than 100 men are employed.

Considerable development work has been done during the summer, a new boiler pnit being added and hoist improvements made. A new dynamo is to be installed.

NEWS FROM OUR NEIGHBORS

Approximately 70 workmen are at present making Rossland their headquarters in connection with the erection of the transcanada telephone line of the British Columbia Telephone company. The contract for the placing of the poles and the cross arms is being carried out by A. H. Green & Co., of Nelson, who are pushing the contract to an early completion. The pole erecting gangs will be locatey in Rossland for probably a month longer.

Constable Broughton of New Denven has arrived in Rossland and will be in charge of the policing of that city while Constable McKay is taking his vacation.

For drinking beer in a parked car, a Rossland resident was recently fined $50.

A new fish hatchery is to be built at Cranbrook. It will take care of 5,000,000 eggs.

During August 117 cars carrying 371 passengers registered at Creston tourist camp.

Province-Wide Development

Fine Pilchard Catch

There has been a splendid pilchard catch for the reduction plants operating on the west coast of Vancouver Island this year. In July 41,500,000 pounds were taken as against 7,234,000 pounds last year. The landed value has increased in the same time from $36,170 to $166,450.

Abbotsford Land Sale

What has been described as some of the best logged-off land in the province is to be sold by auction at Abbotsford on September 26. There are 69 parcels running from 19 to 37 acres each, located near the international boundary line. The sizes are convenient for small holdings, and the land is situated conveniently for excellent markets. The sale is being conducted by the provincial lands department.

To Help Honey Exhibits

British Columbia beekeepers are assembling exhibits of honey for the Toronto Winter fair and the Imperial Fruit Show in London. The provincial department of agriculture is assisting and will pay the cost of transporting the honey to Toronto and London. Ten years ago the province was producing a quarter of a million pounds of honey annually; it is now producing a million and a quarter, worth about 11 cents a pound wholesale. Approximately about half a million pounds a year is still imported, but this year the beekeepers have been establishing contacts that should enable them to compete with the future importations.

Sea Lions Attack

The fisheries vessel Givenchy has been out on a hunt for sea lions, which injure the salmon fishery along the British Columbia coast. This season they have despatched 1357 of these marine lions. On the rookeries at the Virgin Rocks they shot 1286 and at the Pearl Rocks 71. On the Pearl Rocks there were more lions than usual, and they were much wilder than those found on the Virgin rookery. Twice the landing parties were charged by the lions, but they escaped without injury. Fishermen and canners report that the damage from sea lions in Rivers Inlet last year was the heaviest in history.

University Scholarships

Professor Farr of Victoria college, B. C. Nicholas of the Victoria Times, and C. Swayne of the Colonist have been chosen by Hon. J. Hinchliffe as a committee to examine the financial standing of applicants for scholarships of the University of British Columbia under the system just inaugurated. An applicant must have scholastic achievements which show him to be of more than ordinary ability, and his financial condition must be such that without assistance he would be unable to pursue his studies. His academic qualifications are passed upon by a committee chosen by the board of governors of the university; his financial standing is then investigated by the Victoria committee. These were selected because of their outstanding qualifications, and also because they were so located that they could be convened by the minister at any time. Many applications for these scholarships have been received.

Unemployment Relief Work

The department of public works is kept busy at this time in making provision for work for the unemployed duing the coming months. Already about 3000 men have been distributed chiefly on road work, and within another week that number should be employed. The location and construction of camps and the necessary equipment of stoves, beds and furniture involves a mass of detail preparation of which th public is little aware.

GENERAL NEWS

Ontario gold production for the half year to June 30 reached $20,608,195, the greatest on record. Indications are that the output for the full year 1931 will be well over $41,000,000 in value.

Working at the rate of a mile a day and employing a daily average of 450 men, completion of rockballasting in the Ontario district from Windsor to Smiths Falls on the Canadian Pacific tracks was announced recently.

Canadian hens are working much harder than their ancestors of ten years ago. In 1920, statistics show that 6010 birds produced an average of 122.1 eggs apiece. This average rose steadily until in 1930 it was 178 eggs per bird.

New Brunswick moose and deer will make their debut on the talkie screen this Fall while the famous moose calls of New Brunswick guides will be recorded in sound for the edification of millions of patrons in thousands of theatres across the continent.

The site of the first cheese factory in Canada, located in Oxford County, Ontario, will be marked with a cairn as an historic site. There are now more than 2,800 factories in Canada making butter or cheese, and the cheese production exceeds 150,000,000 pounds yearly.

"Generally satisfactory", is the comment on wheat grading in the Prairie Provinces, according to reports coming in from the Agricultural Department of the Canadian Pacific Railway at Winnipeg. Wheat cutting in the West was virtually completed by the middle of September and rather more than half of it was threshed at that time.

Playing spectacular golf, F. G. Hoblitzel, of the Lambton Club, Toronto, defeated Philip Farley, Ontario amateur champion, in the finals of the Prince of Wales Trophy, played at the Banff Springs Golf Course in September. Sixteen players from all over Canada and the United States, qualified for the title fight.

Award of three scholarships at McGill University to minor sons of Canadian Pacific employees has been made to M. M. Madge, D. K. Gowans and Keith W. Shaw. The scholarships provide for five years' tuition in architecture and chemical engineering, all fees being met until the recipients have taken their degrees as Bachelors of Science.

"We are coming to realize that most of our national problems have an international background and can only be solved by international co-operation," declared Hon. Vincent Massey, former Canadian Minister at Washington when sailing recently on the Empress of Canada at the head of the Canadian delegation to the forthcoming conference of the Institute of Pacific Relations at Hangchow, China.

"Jim" McKenna, dean of passenger travelling agents and friend of presidents, passengers and porters from Saint John to Victoria and from Montreal to New Orleans, with over 4,000,000 miles of railway travel to his credit, died recently at Quebec in his 79th year. His intimate knowledge of the Chinese whom he accompanied across Canada earned him the cobriquet of the "Chinese Ambassador" and "The Mandarin."

Canning Strawberries

Strawberries will keep their nice red color after they are canned, if two tablespoons of vinegar are added to each quart when canning. After the jar is sealed, place on its side until the berries are cool; this keeps the berries from coming to the top.

The Coffee Pot

Wash the coffee pot each time it is used, just as any other cooking utensil. Do not allow coffee or coffee grounds to stand in the pot from one meal to the other.

White Goods

To bleach white goods, put one tablespoonful of borax in one gallon of water. Immerse the goods and then dry in the sun. Repeat this treatment if necessary.

Men don't object to work if they pick it out.

DID YOU EVER STOP TO THINK

That advertising through the printed page has the necessary attractiveness and efficiency of performance that brings profitable results.

History has shown that continuous advertisers have found success, while non-advertisers have always been lagging behind.

Lack of advertising is killing many a business that should show increasing business instead of decreasing business.

Peple have been educated to the fact that well advertised products are the quality kind and thep won't buy any other.

Continuous advertising of quality creates a buying demand which assures the advertiser quicker turnover.

Anp business in this day and time cannot stand still. Progress and competition demand that it move ahead or go out of business.

Continuous advertising of quality and service builds and keeps the confidence of the public. Without the confidence of the public, no business can move ahead.

Continuous advertising is the modern way of building better business. It proves to the public that the advertisers are proud of what they have for sale.

Anything wodth selling is worth advertising.

Advertising is the most egective selling help that can be found, because continuous advertising paves the wap to bigger sales.

Every business having something to sell should advertise continuously so the public may know who they are, where thep are, and what they nave for sale.

A Tar Remover

Remove tar from the hands by rubbing with a slice of lemon or orange peel. the oils in the skin dissolve the tar so that it can be wiped off very easily.

The Gas Range

The oven of the cabinet type gas range should be on the side where it will not cast a shadow over the burners.

Face Pimples

Pimples can often be removed from the face by washing daily in hot castile soap sups. Rinse in hot water and then in cold water.

TRAIN TELEPHONE NOW A FACT

The Canadian National Railways, which first made possible the reception of radio concerts on board a moving train, an invention which many first class railroads have since copied, have achieved another mechanical triumph by perfecting the first two-way system of telephone communication in the world with moving trains. The system has been put into public service by the company on "The International Limited," which covers the 334 miles separating Montreal and Toronto in 360 minutes, the fastest train in the world traversing a like distance.

The photograph shows Sir Henry Thornton, Chairman and President of the Canadian National Railways, inaugurating the telephone service from "The International Limited" while the train is travelling at 60 miles per hour. At the train switchboard is J. C. Burkholder, Chief Engineer of the Canadian National Telegraphs, who developed and perfected the train telephone system.

Clean leather-covered furniture or other leather articles, by adding a little vinegar to tepid water and washing the leather with a clean cloth. Wipe dry and polish with the following solution: White of two eggs beaten slightly, mixed with two teaspoonfuls of turpentine.

A Funnel

A funnel for filling salt and pepper cellars can be made by using an old envelope. Merely tear off a small portion of one corner for the opening.

An excellent luncheon dish is made by combining scrambled eggs with a border of warm asparagus.
